SYNOPSIS

Online food ordering system is a part of e-commerce. E-commerce or business through net means distributing, buying, selling, marketing and servicing of products or services over electronic system such as the internet and another computer networks. Thus if we own a restaurant we need to upload menu online to attract potential customers.

The online food ordering system gives restaurant the ability to increase sales and expand their business by giving customers the facility to order food online. With an online restaurant menu ordering system, customers can place orders online 24*7. Thus it is a simple, fast and convenient food ordering system giving an edge over the competition at an affordable price.

Internet has seen a tremendous growth in terms of coverage and awareness. So giving the business an online presence has become very crucial and important. With (online ordering system), we can setup restaurant menu and easily place order with simple mouse click.

SYNOPSIS

This project is like an e- bookstore website where books can be bought from the comfort of home through the Internet. An "Online Book Selling" is a virtual store on the Internet where customers can browse the catalog and select books of interest. User can select many books and those books are stored in cart. At checkout time, the items in the shopping cart will be presented as an order. At that time, more information will be needed to complete the transaction. Usually, the customer will be asked to fill the basic details or select a billing address, a shipping address, a shipping option, and payment information such as credit card number. Using this website admin can add books, delete books, update books, add category, delete category, update category, view order details, view message, view feedback and Report can be generated..
