Rs. 2 on application
Rs. 5 on allotment (including premium)
Rs. 5 on first & final call.

All the shares were applied for and allotted. All money was received with exception of the first and final call on 1,000 shares which were forfeited. 400 of these were reissued as fully paid at Rs.8 per share.

Give the necessary journal entries, prepare the bank A/c and the balance sheet of the company.

9. Ambitions Ltd. Issued a prospectus, inviting applications for 2,00,000 shares of Rs.10 each at a premium of Rs.5 per share, payable as follows:

On Application	-	Rs.2.50 per share
On Allotment	-	Rs.7.50 per share (including premium)
On first Call	-	Rs.4.00 per share
On final Call	-	Rs.1.00 per share

Applications were received for 3,00,000 shares and allotment was made pro-rata to the applicant of 2,40,000 shares, the remaining applications being refused. Money received in excess on the application was adjusted towards the amount due on allotment.

David, to whom 4,000 shares were allotted, failed to pay allotment money and on his failure to pay the first call, his share were forfeited. Madan, the holder of 6,000 shares, failed to pay the two calls and so his shares were also forfeited. All these shares were sold to Robert, credited as fully paid for Rs.8 per share

Pass journal entries to record the above issue of shares by the company.

10. Wye Ltd. Issued for public subscription 20,000 equity shares of Rs.10 each at a premium of Rs.2 per share payable as under:

On Application	-	Rs.1 per share
On Allotment	-	Rs. 5 Per share
On first Call	-	Rs.2 per share
On second Call	-	Rs. 3 per share

Applications were received for 30,000 shares. Allotment was made pro-rata to the applicants for 24,000 shares, the remaining applications were refused. Money over paid on application was utilized towards sums due on allotment.

Akbar to whom 800 shares were allotted, failed to pay allotment and calls money and Babar to whom 1,000 shares were allotted failed to pay the two calls. These shares were subsequently forfeited after the second call was made. All the forfeited shares were sold to Charles as fully paid up at Rs.8 per share.

Show the journal entries in the books of Wye Ltd.

11. Super stare Limited issued a prospectus inviting applications for 50,000 equity share of Rs.10 each, payable Rs.5 on application (including Rs.2 as premium), Rs.4 on allotment and the balance towards first and final call.

Applications were received for 65,000 shares. Application money received on 5,000 shares was refunded with letters of regret and allotments were made pro-rata to the applicants of 60,000 shares. Money overpaid on applications including premium was adjusted on account of sums due on allotment.

Mr.Satish to whom 700 shares were allotted failed to pay the allotment money and his shares were forfeited by the directors on his subsequent failure to pay the call money.

All the forfeited shares were subsequently sold Mr. Jagan credited as fully paid for Rs.9 per share.

You are required to set out the journal entries and the relevant entries in the cash book.

12. Kamakshi Co Ltd. Issued a prospectus inviting applications for 50,000 shares of Rs.10 each. These shares were issued at par on the following terms:

On Allotment	Rs. 3
On Allotment	Rs. 4

Cash in hand	6,073		
	9,64,573		9,64,573

Prepare Profit & Loss account for the year ended 31.12.2008 and balance sheet at that date after taking the following into account:

- Closing stock Rs.1,10,000
- Depreciation 2 ½ % on freehold property and 6% furniture.
- Bills Receivable for Rs.2,000 maturing 31.12.2008 has discounted with bank.
- Directors proposed to pay second half year's dividend of pref. shares.
- 10% dividend on equity shares is proposed.
- Provide 5% towards reserve for doubtful debts on trade debtors.

18. Star Ltd, has a nominal capital of Rs.3,00,000 divided into shares of Rs.10 each. The following Trail Balance is extracted from the books of the company as in 31.12.2000.

	(Rs.)		Rs.
Calls in arrear	3,750	6% Debentures	1,50,000
Premises (Rs. 30,000 added on 1.7.2000)	1,80,000	P & L A/c (1.1.2002)	7,250
Machinery	1,50,000	General Reserve	12,500
Interim dividend paid	3,750	Share capital (called up)	2,30,000

Purchases	92,500	Bills Payable	19,000
Preliminary expenses	2,500	Sales	2,07,500
Bad Debts	1,055	Provision for bad debts	1,750
4% Government securities	30,000		
Stock (1.1.2002)	37,500		
Furniture	3,600		
Sundry Debtors	43,500		
Goodwill	12,500		
Cash	375		
Bank	19,950		
Wages	42,400		
General Expenses	8,450		
Salaries	7,250		
Debenture interest	4,500		
	6,53,000		6,53,000

Prepare final accounts of the company for the year ending 31.12.2002 in the prescribed form after taking into account the following adjustments:

- Depreciate machinery by 10%
- Write off half of the preliminary expenses.
- Wages include Rs.5,000 paid for the construction of a compound wall to the premises and no adjustment was made.
- Provide 5% for bad debt on sundry debtors.
- Transfer Rs.5,000 to general reserve.
- Provide for income tax Rs.12,500.
- Stock on 31.12.2000 was Rs.1,00,000.

19. The Iron Ore Co Ltd, was formed on 1.4.1998 with an authorized capital of Rs.3,00,000 in shares Rs.10 each of these 26,000 shares had been issued and subscribed but there were calls in arrear on 100 shares. From the following trail balance as on March 31, 1999, prepare the Trading and Profit & Loss Account and the Balance sheet.

	Rs		Rs
Cash at bank	55,750	Share capital	2,59,875
Plant	20,000	Sale of Silver	89,750
Mines	1,10,000	Interest on F.D.up to Dec.31	1,950
Promotion expenses	3,000	Dividend on investment	1,600
Advertising	2,500		
Cartage on plant	900		
Furniture & Buildings	10,450		
Administrative expenses	14,000		
Repairs to plant	450		
Coal and Oil	3,250		
Royalties paid	5,000		

Railway track & wagons	8,500		
Wages of miners	37,110		
Cash	265		
Investment- shares of tin mines	40,000		
Brokerage on above	500		
6% F.D. in Syndicate Bank	44,500		
	3,53,175		3,53,175

Adjustments:

- (v) Depreciate plant and Railways by 10% Furniture
- (vi) Write off a third of the promotion expenses
- (vii) Value of silver ore on March 31, 1999 Rs.7,500
- (viii) The directors forfeited on dec.20, 1998, 100 shares on which only Rs.7.50 had been paid.

20. A Limited Company was registered with an authorized capital of Rs.15,000 in equity shares of Rs.10 each. The following is the list of balance extracted from its books on 31.12.95.

	Rs.
Purchases	4,62,500
Wages	2,12,178
Manufacturing expenses	32,787
Salaries	35,000
Bad debts	5,275
Director's fees	15,563
Debenture interest paid	22,500
Preliminary expenses	12,500
Calls-in-arrears	18,750
Plant & Machinery	7,50,000
Premises	8,25,000
Interim dividend paid	93,750
Furniture and fittings	17,500
Sundry Debtors	2,18,000

Stock on 1.1.94	87,500
Cash-in-Hand	50,000
Goodwill	14,375
Cash at Bank	99,875
Subscribed and fully called up capital	10,00,000
Profit & Loss A/c (Cr)	36,250
6% Debentures	7,50,000
Sundry Creditors	1,45,000
Bills Payable	83,750
Sales	10,37,500
General Reserve	62,500

You are required to prepare Trading and Profit & Loss account for the year ended 31.12.94 and the Balance Sheet as on that date, after making the following adjustments. Depreciate Plant & Machinery by 10%. Provide half years interest on debentures. Also write off Rs.2,500 from preliminary expenses and make provision for bad and doubtful debts of Rs.4,250 on sundry debtors. Stock on 31st December 1994 was Rs.4,55,000.

UNIT IV

1. The following scheme of reconstruction has been approved for Divya Ltd.
 - a. The share holders to receive in lieu of their present holding of 60,000 shares of Rs.10 each fully paid the following :
 - (i) Fully paid new equity shares equal to 1/3rd of their holding
 - (ii) 8% preference shares fully paid, to the extent of 1/5th of the above new equity shares.
 - (iii) Rs.60,000 8% secured debentures.
 - b. The debenture holders' total claim of Rs.75,000 to be reduced to Rs.25,000. This will be satisfied by the issue of 2,500 8% preference shares of Rs.10 each fully paid.
 - c. An issue of Rs.50,000 6% first debentures was made and allotted, payment for the same having been received in cash.
 - d. The goodwill which stood at Rs.3,00,000 was written down to Rs.50,000. Plant & Machinery which stood at Rs.1,00,000 was written down to Rs.75,000.
 - e. The free hold premises which stood at Rs. 1,75,000 was written down by Rs.75,000

Give Journal entries in the books of Divya Ltd. for the above reconstruction scheme.

2. The paid up capital of Science Traders Ltd. amounted to Rs.5,00,000 consisting of 2,000 5% cumulative preference shares of Rs.100 each and 30,000 equity shares of Rs.10 each. The preference dividends were in arrears for Rs.30,000.

After a succession of losses incurred by the company, the directors recommended to the shareholders the proposal to reduce the capital to provide a sum sufficient for the following purposes.

- a. To write down the book value of patents by Rs.70,000; plant & machinery by Rs.17,000 and tools and implements by Rs.2,000.
- b. To write off debit balance on Profit & Loss account of Rs.1,98,000.
- c. Any balance made availability by the reduction of capital to be used to write of "Experiment and research Expenses".

The scheme, duly approved and authorized, provided as follows :

- a. For every five 5% preference shares, three 4% cumulative preference shares, of Rs.100 each and twenty equity shares of Rs.2 each.
- b. For every Rs.10 of accumulated arrears of preference divided, one equity share of Rs.2 and and

- c. For every five old equity shares, one new equity share of Rs.2 each.

You are required to show the necessary journal entries and prepare capital reduction account to record the above in the books of the company.

3. Following a series of losses, XYZ co Ltd., resolved to reduce its capital to 50,000 fully paid Rs.5 shares and to eliminate share premium account. The company's balance sheet prior to implementation of the scheme was :

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
Share Capital		Goodwill	1,00,000
50,000 fully paid shares of Rs.10 each	5,00,000	Land & Buildings	1,62,000
Securities premium a/c	50,000	Plant & Machinery	2,07,000
Creditors	62,000	Stock	92,000
Bank Overdraft	73,000	Debtors	74,000
	6,85,000	P & L a/c	50,000
			6,85,000

It was resolved to apply the sum available under the scheme:

- To write off the goodwill account
- To write off the debit balance of the Profit and loss account.
- To reduce the book values of the assets by the following amounts.

Rs.

Land & Buildings 42,000

Plant & Machinery 67,000

Stock 33,600

- To provide a bad debts reserve of 10% of the book value of debtors.

Show the journal entries to give effect to the scheme and prepare the revised balance sheet after its implementation.

4. The following is the balance sheet of United Industries Ltd. on 31st Dec. 98.

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
Share Capital		Goodwill	45,000
6,000 6% preference Rs. 100 each	6,00,000	Land & Building	6,00,000
12,000 equity shares of Rs. 100 each	12,00,000	Plant & Machinery	9,00,000
8% debentures	3,00,000	Stock	1,30,000
Bank Overdraft	3,00,000	Debtors	1,40,000
Sundry creditors	1,50,000	Cash	15,000
	25,50,000	Profit & Loss A/c	7,00,000
		Preliminary expenses	20,000
			25,50,000

On the above date, the company adopted the following scheme of reconstruction :

- The equity shares are to be reduced to shares of Rs.40 each fully paid and the preference shares to be reduced to fully paid shares of Rs.75 each.
- The debenture holders took over stock and debtors in full satisfaction their claims.

- (iii) The land and buildings to be appreciated by 30% and plant & machinery to be depreciated by 30%
- (iv) The fictitious and intangible assets are to be eliminated
- (v) Expenses of reconstruction amounted to Rs.5,000

Give Journal entries incorporating the above scheme of reconstruction and prepare the reconstructed balance sheet.

5. The summarized balance sheet of Ambrose Co. Ltd., as at 31st Dec. 1998 was as follows :

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
Authorized & issued capital		Land & Building	15,00,000
2,00,000 equity shares of		Plant & machinery	10,00,000
Rs.10 each fully paid	20,00,000	Goodwill	2,00,000
10,000 6% cumulative		Patents & trade marks	1,00,000
Preference shares of Rs.100	10,00,000	Stocks	4,00,000
each fully paid			
Bank Overdraft	7,00,000	Sundry debtors	3,00,000
Sundry creditors	5,00,000	Preliminary expenses	1,00,000
(Note : The cumulative		Profit & Loss a/c	6,00,000
preference dividend is in arrear			
for three years)			
	42,00,000		42,00,000

A scheme of capital reduction was approved on the following terms :

- (ii) The preference share holders agree that their shares be reduced to fully paid shares of Rs.50 each and to accept equity shares of Rs.5 each fully paid in lieu of the dividend arrears.
- (iii) The equity shareholders agree that their shares be reduced to a fully paid value of Rs.5 each.
- (iv) The authorized capital of the company is to remain at Rs.30,00,000 divided into 4,00,000 equity shares of Rs.5 each and 20,000 6% cumulative preference shares of Rs.50 each.
- (v) All the intangible and fictitious assets are to be eliminated and bad debts of Rs.50,000 and obsolete stocks of Rs.80,000 are to be written off.

Give the necessary journal entries to record the capital reduction and draw up the revised balance sheet.

6. The following is the summarized balance sheet of Anant Ltd. as on 31st March 1998.

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
Share Capital:		Fixed Assets	
1,500 8% cumulative		Property (at cost) 1,10,000	
Preference shares of		Less : Depreciation 20,000	90,000
Rs.100 each	1,50,000	Machinery (at cost) 2,20,000	
2,000 equity shares of		Less: Depreciation 40,000	1,80,000

Rs.10 each	2,00,000	Goodwill	17,000
6% debentures	50,000	Patents	22,000
Debenture interest		Current assets :	
Outstanding	3,000	Stock	15,000
Securities premium	50,000	Debtors	31,200
Creditors	20,000	Preliminary expenses	32,000
		Profit & Loss a/c	85,800
	4,73,000		4,73,000

The following scheme of capital reduction was duly sanctioned by court

- (i) Equity shares to be reduced by Rs.90 each.
- (ii) Preference shares to be reduced to Rs.90 each.
- (iii) The debenture holders to waive their right over outstanding interest
- (iv) One new equity share paid-up to the extent of 50% only to issued for each Rs.100 of gross preference dividend, which has not been declared since April 1996.
- (v) All credit balances not being the outside liabilities and all debit balances not being the amounts receivable as well as the intangible assets are to be written off.
- (vi) Any balance available is to be utilized in writing down the fixed assets in proportion to their written down values.

You are required to give journal entries and balance sheet after the reduction.

7. Sandhya Ltd. has been suffering heavy losses in the past. It is now considered that the worst is over and sound reorganization will enable its business to be successful in the future. The balance sheet of the company immediately before the reconstruction is as follows :

Balance Sheet as on 31st Dec. 1998

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
Share Capital:		Goodwill	6,00,000
40,000 equity shares of		Fixed assets	31,70,000
Rs.100 each	4,00,000	Stock	1,90,000
10,000 6% preference shares of		Sundry debtors	1,00,000
Rs. 100 each	10,00,000	Investments	40,000
	5000,000	Cash at bank	24,000
Issued Capital		Preliminary Expenses	10,000
20,000 equity shares of	20,00,000	Discount on issue	
Rs.100 each			
4,000 6% preferences shares		Of shares	6,000
Of Rs.100 each	4,00,000	P & L A/c	25,80,000
5% debentures of Rs.100 each	33,20,000		
Sundry Creditors	9,60,000		
Liability for income tax	40,000		
	67,20,000		67,20,000

The preference dividends were in arrears for 5 days.

The following scheme of reconstruction was agreed upon and duly confirmed by the court.

- (i) The equity shares shall be reduced to shares of Rs.100 each, rs.5 per share being paid up.
- (ii) The preference shareholders shall forego 90% of their claims in shares and the remaining shares shall be converted to 7% preference shares of Rs.10 each, while their claim for arrears of dividend shall be reduced to one year's dividend and the same shall be discharged by the issue of fully paid equity shares.
- (iii) The debenture holders agreed to have 60% of their claims which shall be discharged by the issue of 7 ½ % debentures of Rs.100 each.
- (iv) The sundry creditors are required to forego 60% of their claims.
- (v) The assets to be revalued as follows:

	Rs.
Fixed Assets	24,00,000
Stock	1,40,000
Sundry debtors	80,000
Investments	20,000

- (vi) In order to provide sufficient working capital, the equity shareholders are to pay the balance amount due against each share.

Show the journal entries in the books of the company and also the balance sheet after implementation of the scheme.

8. A company's position on 31.13.1990 was as follows:

	Rs.
20,000 equity shares of Rs.100 each	20,00,000
10,000 6% debentures of Rs.100 each	10,00,000
Interest outstanding on debentures	1,20,000
Creditors	5,00,000
Assets on that date were as under:	
Fixed Assets	20,00,000
Current Assets	6,50,000

Fixed assets were revalued at Rs.9,60,000 and current assets at Rs.4,80,000.

The capital reduction scheme approved by court was as follows:

- (i) The shares were sub divided into shares of Rs.5 each and 90% of the shares were surrendered.
- (ii) Claims of debentures holders were reduced to Rs.4,90,000 for which Rs.2,50,000 equity shares were allotted.
- (iii) Creditors agreed to reduce their claims to Rs.3,00,000 1/3 of which was satisfied by the issue of equity shares out of those surrendered.

Draft journal entries.

9. On 31st March 1999, Thin Ltd., was absorbed by Thick Ltd., the later taking over all the assets and liabilities of the former at book values. The consideration for the business was fixed at Rs.4,00,000 to be discharges by the transferee company in the form of its fully paid equity shares of Rs.10 each, to be distributed among the shareholders of the transferor company, each shareholder getting two shares for every share held in the transferor company.

The balance sheets of the two companies as on 31st March 1999

<i>Liabilities</i>	<i>Thick Ltd. Rs.</i>	<i>Thin Ltd. Rs.</i>	<i>Assets</i>	<i>Thick Ltd. Rs.</i>	<i>Thin Ltd. Rs.</i>
Share capital			Good will	2,00,000	60,000

	11,93,569	3,11,356		11,93,569	3,11,356

Amalgamations expenses amounting to Rs.1,000 were paid by Thick Ltd., You are required to –

- Prepare realization account and equity shareholders account in the books of Thin Ltd.,
- Pass the necessary journal entries in the books of Thick Ltd., and
- Prepare the balance sheet of Thick Ltd., after the Amalgamation in the nature of merger.

10. The following are the Balance Sheets of X Ltd., and Y Ltd as on 31-3-2004

	<i>X Ltd.</i> <i>Rs.</i>	<i>Y Ltd.</i> <i>Rs.</i>		<i>X Ltd.</i> <i>Rs.</i>	<i>Y Ltd.</i> <i>Rs.</i>
5,000 8% Pref. Shares			Good will		15,000
Of Rs.100 each	5,00,000		Buildings	7,40,000	-
1,50,000 Equity shares			Machinery	16,38,000	-
Of Rs.10 each	15,00,000		Patents	60,000	
40,000 Equity shares			Furniture	27,000	50,000
Of Rs.10 each		4,00,000	Motor Vehicles	-	70,500
Capital Reserve	4,60,000		Stock	4,05,000	2,60,000
General Reserve	3,50,000	1,00,000	Debtors	80,000	1,29,000
P & L A/c	80,000	15,000	Bank	10,000	15,500
Creditors	70,000	25,000			
	29,60,000	5,40,000		29,60,000	5,40,000

A new company 'Z' Ltd., was formed to take over the business of X Ltd, and Y Ltd on the following terms:

- Z Ltd to allot 5,000 10% fully paid preference shares of Rs.100 each and 2,00,000 fully paid equity shares of Rs.10 each to satisfy the claims of preferences and Equity shareholders of X Ltd., respectively.
- Z Ltd, to allot 44,000 fully paid equity shares of Rs.10 each to be distributed to Y Ltd., shareholders.
- Mr. 'Z' who mooted the scheme of amalgamation is to be allotted 500 fully paid Equity shares of Rs.10 each in consideration of his services,
- Expenses of Liquidation of Y Ltd., Rs. 3,000 to be borne by Z Ltd.,
- Z Ltd made a Public issue of 20,000 Equity shares of Rs.10 each for cash at 20% Premium. Preliminary expenses of 'Z' Ltd., amounted to Rs.8,500. Assuring that the amalgamation is in the nature of merger, you are required to show (1).Computation of Purchase consideration; (2) Ledger accounts to close the Books of X Ltd., and (3) Journal and Balance Sheet in the books of Z Ltd.,

11. Raman Ltd., and Sivan Ltd., have agreed to amalgamate. A new company, Sivaram ltd., has been formed to take over the running concerns as on 31.13.1995. The following Balance Sheets show the position of the companies amalgamating.

<i>Liabilities</i>	<i>Raman Ltd.</i> <i>Rs.</i>	<i>Sivan Ltd.</i> <i>Rs.</i>	<i>Assets</i>	<i>Raman Ltd</i> <i>Rs.</i>	<i>Sivan Ltd</i> <i>Rs.</i>
Share Capital Rs.10 each	20,000	50,000	Good will Plant	14,000	6,000 20,000

General Reserve	16,000	-	Furniture	8,000	12,000
Capital Reserve	-	4000	Stock	16,000	8,000
P & L A/c	4,000	-	Sundry Debtors	10,000	17,000
Loan from Bank	10,000	16,000	Cash at Bank	12,000	7,000
Creditors	10,000	6,000	P & L A/c	-	6,000
	60,000	76,000		60,000	76,000

Sivaram Ltd., took over all the assets and liabilities of both the transferor companies at book values except cash at bank, creditors and the goodwill of Sivan Ltd., which was considered worthless.

The purchase consideration was agreed at Rs.60,000 for Raman Ltd., and Rs.40,000 for Sivan Ltd., Fully paid equity shares of Rs.10 each were issued to settle the purchase price for both the companies.

Cash at Bank of both the companies was exactly sufficient to settle their creditors at 10% discount and pay the liquidation expenses.

You are required to give important ledger accounts to close the books of the transferor companies and the Journal and Balance sheet in the books of the transferee company, assuming that the amalgamation is in the nature of purchase.

12. The following is the Balance Sheet of X Co Ltd., as on 30th June 1990.

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
Share Capital		Good will	35,000
2,000 shares of Rs.100 each	2,00,000	Land & Building	85,000
Reserves	20,000	Plant & Machinery	1,60,000
5% debentures	1,00,000	Stock	55,000
Loan from A (a director)	40,000	Sundry Debtors	65,000
Sundry Creditors	80,000	Cash at Bank	34,000
		Discount on debentures	6,000
	4,40,000		4,40,000

The business of the company taken over by Y Co., Ltd., as on that date on the following terms:

- (i) 'Y' Co. to take over all assets except cash, to value the assets at book values less 10% except goodwill which is to be valued at 4 years purchase of the excess of average (5 years) profits over 8% of the combined amount of share capital and reserves.
- (ii) Y Co Ltd., to take over trade liabilities at a discount of 5%
- (iii) The purchase consideration was to be discharged in cash to the extent of Rs.1,50,000 and the balance in fully paid equity shares of Rs.10 each valued at Rs.12.50 per share. The average of the 5 years profits was Rs.30,100. The

expenses of absorption of Rs.4,000 were paid by X Co Ltd, but afterwards reimbursed by Y Co Ltd.,

Pass journal entries in the books of X Co Ltd to close the above transactions.

13. Big Ltd. agreed to acquire the assets of small Ltd., except its investment, as on December 31,1981.

Balance Sheet of Small Ltd., as on Dec 31, 1981

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
Share Capital (Rs. 10 each)	1,60,000	Good will	50,000
Reserves	43,000	Land & Building	80,000
8% Debentures	60,000	Plant	80,000
Provision for taxation	20,000	Investments	30,000
Creditors	37,000	Stock	40,000
		Debtors	20,000
		Bank	20,000
	3,20,000		3,20,000

Big Ltd. Will:

1. Discharge the debentures at 8% premium by issue of 7% debentures in Big Ltd, at 10% Discount.
2. Issue of 3 shares of Big. Ltd at a valuation of Rs.11 for every two shares in Small Ltd.,

You are required to give the required journal entries and ledger accounts in the books of the vendor company.

14. Given below is the Balance Sheet of Hard Luck Ltd., as at 31st March 1995.

Balance Sheet

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
40,000 shares of Rs.10 each		Land & Building	3,20,000
Full paid	4,00,000	Plant & Machinery	1,30,000
Creditors	3,00,000	Stock	70,000
		Debtors	1,20,000
		Cash	500
		Preliminary Expenses	5,000
		Profit & Loss A/c	54,500
	7,00,000		7,00,0000

The following scheme of reconstruction was arranged:

- (1) The company to go into liquidation and a new company, Lucky Ltd., with an authorized capital of Rs.8,00,000 to be formed to take over the assets and liabilities.
- (2) Preferential creditors of Rs.10,000 included in the above Balance Sheet are to be paid in full.
- (3) Unsecured creditors to receive either (a) 50 percent of their claim in cash or (b) 6 percent debentures in the new company, equivalent to their claims at par.
- (4) Shareholders in Hard Luck Ltd., to be allotted one share in the new company of Rs.10 each, Rs.5 paid for every existing share held by them.
- (5) Reconstruction costs amounting to Rs.6,000 to be paid by Hard Luck Ltd from cash made available by the new company.
- (6) Half of the unsecured creditors in value opted out for immediate cash payment for which purpose necessary cash was made available as aforesaid. The new company valued all assets (except Land & Building) taken over from Hard Luck Ltd, at book values.

Prepare the Balance Sheet of the new company after the above transactions are concluded.

15. The Books of S Ltd contained the following balances as on May 31, 1994.

	<i>Debit</i>	<i>Credit</i>
Equity share capital (Rs. 10 each)		12,00,000
Creditors		14,00,000
Patents & Trade Marks	12,00,000	
Plant & Machinery	4,00,000	
Stock	3,00,000	
Debtors	5,00,000	
Cash	12,500	
Preliminary Expenses	72,500	
Profit & Loss A/c	1,15,000	
	26,00,000	26,00,000

The patents and trade marks are considerably over valued. The company is also not in a position to raise any further capital. The following scheme of reconstruction has, therefore been framed.

- (i) The company will go into voluntary liquidation. A new company S.S Ltd., will be formed with an authorized capital of Rs.20,00,000 to take over the assets.
- (ii) Liability will be discharged by the new company to the creditors by payment of 25 paise in a rupee in cash and 50 paise in a rupee by issue of 9% debentures.

- (iii) 1,20,000 shares of Rs.10 each (Rs. 5 Per share paid) will be issued to the shareholders of S Ltd., the balance Rs.5 per share to be paid on allotment.
- (iv) Expenses of liquidation amounting to Rs.17,500 will be paid by S.S Ltd., The scheme was approved by all concerned. You are required to:
 - (i) Close the ledger of S.Ltd.,
 - (ii) Give Entries to open the books of S.S. Ltd.,
 - (iii) Prepare the opening balance sheet of S.S. Ltd.,

16.The following scheme of reconstruction has been approved for Dharani Ltd.

- f. The share holders to receive in lieu of their present holding of 30,000 shares of Rs.10 each fully paid the following :
 - (i) Fully paid new equity shares equal to $\frac{1}{3}^{\text{rd}}$ of their holding
 - (ii) 8% preference shares fully paid, to the extent of $\frac{1}{5}^{\text{th}}$ of the above new equity shares.
 - (iii) Rs.30,000 8% secured debentures.
 - g. The debenture holders' total claim of Rs.37,500 to be reduced to Rs.12,500. This will be satisfied by the issue of 1,250 8% preference shares of Rs.10 each fully paid.
 - h. An issue of Rs.25,000 6% first debentures was made and allotted, payment for the same having been received in cash.
 - i. The goodwill which stood at Rs.1,50,000 was written down to Rs.25,000. Plant & Machinery which stood at Rs.50,000 was written down to Rs.37,500.
 - j. The free hold premises which stood at Rs. 87,500 was written down by Rs.37,500
- Give Journal entries in the books of Dharani Ltd. for the above reconstruction scheme.

17.The paid up capital of Science Traders Ltd. amounted to Rs.2,50,000 consisting of 1,000 5% cumulative preference shares of Rs.100 each and 15,000 equity shares of Rs.10 each. The preference dividends were in arrears for Rs.15,000.

After a succession of losses incurred by the company, the directors recommended to the shareholders the proposal to reduce the capital to provide a sum sufficient for the following purposes.

- a. To write down the book value of patents by Rs.35,000; plant & machinery by Rs.8,500 and tools and implements by Rs.1,000.
- b. To write off debit balance on Profit & Loss account of Rs.99,000.
- c. Any balance made available by the reduction of capital to be used to write of "Experiment and research Expenses".

The scheme, duly approved and authorized, provided as follows :

- d. For every five 5% preference shares, three 4% cumulative preference shares, of Rs.100 each and twenty equity shares of Rs.2 each.
- e. For every Rs.10 of accumulated arrears of preference divided, one equity share of Rs.2 and and
- f. For every five old equity shares, one new equity share of Rs.2 each.

You are required to show the necessary journal entries and prepare capital reduction account to record the above in the books of the company.

18. Following a series of losses, XYZ co Ltd., resolved to reduce its capital to 25,000 fully paid Rs.5 shares and to eliminate share premium account. The company's balance sheet prior to implementation of the scheme was :

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
Share Capital 50,000 fully paid shares of Rs.10 each	2,50,000	Goodwill Land & Buildings Plant & Machinery	50,000 81,000 1,03,500
Securities premium a/c	25,000	Stock	46,000
Creditors	31,000	Debtors	37,000
Bank Overdraft	36,500	P & L a/c	25,000
	3,42,500		3,42,500

It was resolved to apply the sum available under the scheme:

- (i) To write off the goodwill account
- (ii) To write off the debit balance of the Profit and loss account.
- (iii) To reduce the book values of the assets by the following amounts.

Rs.

Land & Buildings	21,000
Plant & Machinery	33,500
Stock	16,800

- (iv) To provide a bad debts reserve of 10% of the book value of debtors.

Show the journal entries to give effect to the scheme and prepare the revised balance sheet after its implementation.

19. The following is the balance sheet of United Industries Ltd. on 31st Dec. 98.

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
Share Capital 3,000 6% preference Rs. 100 each	3,00,000	Goodwill Land & Building Plant & Machinery	22,500 3,00,000 4,50,000
6,000 equity shares of Rs. 100 each	6,00,000	Stock	65,000
8% debentures	1,50,000	Debtors	70,000
Bank Overdraft	1,50,000	Cash	7,500
Sundry creditors	75,000	Profit & Loss A/c	3,50,000
	12,75,000	Preliminary expenses	10,000
			12,75,000

On the above date, the company adopted the following scheme of reconstruction :

- (i) The equity shares are to be reduced to shares of Rs.40 each fully paid and the preference shares to be reduced to fully paid shares of Rs.75 each.
- (ii) The debenture holders took over stock and debtors in full satisfaction their claims.

- (iii) The land and buildings to be appreciated by 30% and plant & machinery to be depreciated by 30%
- (iv) The fictitious and intangible assets are to be eliminated
- (v) Expenses of reconstruction amounted to Rs.5,000

Give Journal entries incorporating the above scheme of reconstruction and prepare the reconstructed balance sheet.

20. The summarized balance sheet of Ambrose Co. Ltd., as at 31st Dec. 1998 was as follows :

<i>Liabilities</i>	<i>Rs.</i>	<i>Assets</i>	<i>Rs.</i>
Authorized & issued capital 2,00,000 equity shares of Rs.10 each fully paid	10,00,000	Land & Building	7,50,000
10,000 6% cumulative Preference shares of Rs.100 each fully paid	5,00,000	Plant & machinery	5,00,000
Bank Overdraft	3,50,000	Goodwill	1,00,000
Sundry creditors	2,50,000	Patents & trade marks	50,000
(Note : The cumulative preference dividend is in arrear for three years)		Stocks	2,00,000
		Sundry debtors	1,50,000
		Preliminary expenses	50,000
		Profit & Loss a/c	3,00,000
	21,00,000		21,00,000

A scheme of capital reduction was approved on the following terms :

- (vi) The preference share holders agree that their shares be reduced to fully paid shares of Rs.50 each and to accept equity shares of Rs.5 each fully paid in lieu of the dividend arrears.
- (vii) The equity shareholders agree that their shares be reduced to a fully paid value of Rs.5 each.
- (viii) The authorized capital of the company is to remain at Rs.15,00,000 divided into 2,00,000 equity shares of Rs.5 each and 10,000 6% cumulative preference shares of Rs.50 each.
- (ix) All the intangible and fictitious assets are to be eliminated and bad debts of Rs.25,000 and obsolete stocks of Rs.40,000 are to be written off.

Give the necessary journal entries to record the capital reduction and draw up the revised balance sheet.

Unit – V

 a. **Rs. 1,64,000** b. Rs. 2,04,000 c. Rs.2,00,000 d. Rs.2,36,000
47. Annual value of the self-occupied house property is
 a. Municipal value b. Fair rent c. Standard rent d. **Nil**
48. The basis of charge of income from house property is
 a. **Annual value** b. Fair rent c. Standard rent d. Nil
49. Income from farm house is
 a. fully exempted b. partly taxable c. **fully taxable** d. exempted upto a limit
50. Fire insurance premium is allowed in respect of
 a. **rented house** b. sold out house c. self-occupied house d. purchased house
51. Gross Annual value of self-occupied property is
 a. **nil** b. municipal value c. fair rent d. standard rent
52. The rent fixed by the act is called _____.
 a. fair rent b. **standard rent** c. actual rent d. municipal rent
53. Only deduction available to self-occupied property is
 a. Land revenue b. Insurance premium c. Repairs d. **Interest on loan**
54. Rate of standard deduction U/s 24 is
 a. 20% of NAV b. 25% of NAV c. **30% of NAV** d. 35% of NAV
55. Deduction for other expenses except interest in the computation of income from house property is allowable to the extent of _____.
 a. 1/5th of Annual Value b. **30% of Annual Value** c. 25% of Annual Value d. 20% of Annual Value
56. Annual value is determined under which section of Income Tax Act-
 a. Sec 21 b. **Sec 23** c. Sec 25 d. Sec 274.
57. In case of rental house property only such municipal tax is deducted which is-
 a. Paid by tenant b. Actual payable amount c. Paid by owner d. **All of the above**
58. Deduction from annual value is allowed under section-
 a. **Sec 24** b. Sec 25 c. Sec27 d. Sec 28
59. Interest on loan for self-occupied house taken before 1st April, 1999 will be allowed up to-
 a. Rs 50000 b. Rs 100000 c. **Rs 30000** d. Rs 150000
60. Deduction allowed from annual value is known as
 a. **Statutory deduction** b. Interest on loan for constitution c. Interest on loan for repair d. net value

UNIT IV

61. Interest on capital paid by the firm to its partners is allowed _____
a. upto 15% b. upto 16% c. upto 18% d. **upto 12%**
62. While calculating business income, disallowed portion of preliminary expense is
a. 1/2 b. **1/5** c. 4/5 d. 3/5
63. Out of the following, which expense is not an admissible expense?
a. Bad Debts b. Sales Tax c. **Income Tax** d. Excise Duty
64. In business, If any payment more than Rs. 20,000 is made in cash, deduction is disallowed at
a. 25% b. 20% c. 10% d. none
65. Illegal income is
a. **taxable** b. not taxable c. exempt d. none of the above
66. Section 28 deals with
a. profit and gain of business [or] profession b. Deprecation c. Investment allowance
d. Income from other sources
67. The maximum rate of interest allowed to partners is
a. 15% b. 16% c. 17% d. 18%
68. Depreciation is allowed on professional books at
a. 60% b. 75% c. 90% d. 100%
69. As per the income Tax Act depreciation is allowed on
a. cost price b. written down value c. market value d. depreciation amount
70. _____ is allowed as deduction while computing the business income
a. Wealth tax b. Income tax c. Banking cash transaction tax d. fringe benefit tax
71. Gifts from clients are _____
a. Salary b. Professional incomes c. Capital gains d. Other sources
72. Share of income from firm is.....
a. Taxable in the hands of partner b. Exempted in the hands of partner.
c. Exempted in the hands of firm. d. Capital gain.
73. Preliminary expenses shall be allowed as deduction in.....
a. 5 Installments. b. 10 Installments. c. 15 Installments d. 12 Installments.
74. Bad debts allowed earlier and recovered later on is.....
a. Business income. b. Non business income. c. Exempted income. d. Income from other sources.
75. Interest is paid to partners' u/s-
a. 40(a) b. 40(b) c. 40(c) d. 40(d)
76. The rate of depreciation allowed on machinery is-
a. 10% b. 5% c. 15% d. 20%
77. The term business has been defined under section
a. 2(36) b. 2(31) c. 2(47) d. **2(13)**
78. Salary received by a partner from the firm is assessable under the head _____
a. Salary b. Profits and Gains c. Incomes from other sources d. Capital gains
79. Rent of business premises is allowable as a deduction if the building is _____ by the owner of business.
a. not owned b. owned c. shared d. rented
80. Income from speculative transactions is taxable under the head _____
a. Salary b. **Profits and Gains** c. Incomes from other sources d. Capital gains

UNIT V

81. Capital gain is classified into _____ types.
a. two b. three c. four d. five
82. The income tax rate on long term capital gain for an individual is
a. 10% b. 20% c. 15% d. 30%
83. Cost inflation index number for the financial year 2010 – 11 is
a. 351 b. 463 c. 447 d. 426

84. Capital loss is classified into how many types
a. Two b. Three c. Four d. Five
85. Interest on capital paid by the firm to its partners is allowed w.e.f. 1.6.03
a. upto 15% b. upto 16% c. upto 18% d. upto 12%
86. Any profits arising from the transfer of a capital asset is called _____
a. net profit b. gross profit c. capital gain d. none of the above
87. Capital assets does not include
a. stock in trade b. gold bonds c. gold deposit bonds d. all of the above
88. The term capital asset includes
a. jewellery b. car in case of car dealer c. television in case of television dealer
d. cash
89. Capital gain arises from the transfer of
a. cash b. any capital asset c. stock d. none of the above
90. Indexed cost of bonus share is
a. nil b. Rs 10 c. Rs. 100 d. Rs.50
91. Cost inflation index for the year 2012-13 is
a. 492 b. 852 c. 632 d. 711
92. Sec.45 is related to-
a. Capital gain b. Capital assets c. Assets d. Capital expenses
93. Capital assets includes-
a. Stock in trade b. Personal effects c. Gold deposit bonds d. Shares
94. Indexation will be done on-
a. Debentures b. Other Securities c. Shares d. All of the above
95. Index no. before 31st march, 1981 is-
a. 0 b. 20 c. 100 d. 150
96. Exemption is not allowed in which section?
a. 54 b. 54B c. 54E d. 54EC
97. Income from sub- letting of House Property is
a. Income from other sources b. property income c. exempted d. capital gain
98. Under which head pension is taxable?
a. Salaries b. Income from other sources c. Capital gains d. Profits and gains
99. Which of the following is not chargeable to tax under the head 'Income from other sources'?
a. Dividend from a cooperative society b. Prize on crossword puzzles
c. Profit on sale of goodwill of a business d. Interest from bank
100. Dividends received from an Indian company is
a. taxable b. nontaxable c. deducted d. added

Section – B (Two marks each)

Unit – I

101. What is income?
102. What is casual income?
103. Who is called as assessee?
104. What is assessment year?
105. What is tax avoidance?
106. What is tax evasion?
107. What is tax planning?
108. Write any two differences between tax planning and tax avoidance?
109. What is agricultural income?
110. Who is called as residence?

Unit – II

111. Define salary.
112. What is transferred balance?
113. What is meant by house rent allowance?
114. What is called as Hill allowance?
115. What is called as deputation allowance?
116. What is academic allowance?
117. What is daily allowance?
118. What is gratuity?
119. What is children education allowance?
120. What is transport allowance?

Unit – III

121. What is annual value?
122. What is composite rent?
123. What is gross annual value?
124. Who is a deemed owner?
125. What is annual value property under the head income from other house property?
126. Define annual value.
127. Define determination of expected rent.
128. Define determination of actual rent.
129. Write a computation of pre- construction period.
130. What is negative annual value?

Unit – IV

131. Define business.
132. Define profession.
133. What is Demerger Company?
134. What is resulting company?
135. What is speculative business?
136. What is speculative transaction?
137. What is emblezzment? How it is treated in income tax?
138. Write any two general deductions.
139. Write any two profits included in the profits and gains of business or profession.
140. How the bad debts are recovered in income tax?

Unit - V

141. Define capital gain.
142. What is capital asset?
143. What are commercial goods?
144. What is self-generated asset?
145. What is transfer of capital asset?
146. What is short term capital gain?
147. What is Income from Other Sources?
148. Mention the Income which is chargeable under the head Income from other Sources.
149. What is Bond Washing Transaction?
150. What are the deductions available for Dividend under the head Income from other Sources?

Section C (Five marks each)

Answer the following:

UNIT I

151. What are the conditions to become an ordinarily resident of an individual under the provisions of Income Tax Act?
152. Explain the following terms (i) Assessee (ii) Previous year (iii) Income (iv) Assessment year
153. Briefly give the basic conditions and additional conditions to decide the residential status.
154. Explain the partly agricultural income.
155. What do you mean by Deemed to Accrue or Arise? – Explain.
156. Mr. X, a foreign citizen, comes to India for the first time on July 23, 2020. On September 26, 2020, he leaves India for Sri Lanka on a business trip. He comes back on January 10, 2021. On January 19, 2021 he left for Sri Lanka again. Determine his residential status for the assessment year 2023-24.
157. Mr. Y, a foreign citizen (not being a person of Indian origin), leaves India for the first time in the last 10 years on November 28, 2015. During the calendar year 2015, he comes to India on 1st October for a period of 50 days. During the calendar year 2020, he does not visit India at all but comes to India on January 10, 2021. Determine the residential status of NG for the assessment 2023-24.
158. N comes to India, for the first time, on April 17, 2014. During his stay in India up to Oct 4, 2020, he stays in Surat up to May 23, 2020 and thereafter remain in Chennai till his departure from India. Determine his residential status for the assessment year 2023-24.
159. N, a UK citizen, comes to India for the first time (after 24 years) on May 25, 2023 and stays up to November 22, 2023. During his stay he visited 5 different cities. He worked for few days and balance days he was just in holiday. Determine his residential status for A/Y 2023-24.
160. Who is a non-resident individual?

UNIT II

161. List out the income, which are reckoned as salary income.
162. “For calling an income as salary its payer must be employer and payee must be employee” – analyse this statement
163. Explain the tax treatment of different types of Provident Fund under I.T. Act.
164. Compute the salary income of Mr. Kandan, who is working as driver in a transport company for the assessment year 2023-24.
- i) Salary @ Rs. 7,200 p.m.
 - ii) Dearness allowance @ Rs. 3,000 p.m.
 - iii) Remote locality allowance @ Rs. 3,000 p.m. (Notified to be exempted upto Rs. 200 p.m.)
 - iv) Running allowance Rs. 2,000 p.m.
 - v) Entertainment allowance Rs. 700 p.m.
165. Compute salary income of Mr. Nagarajan from the following:
- i) Salary received (after deduction of Income Tax and RPF) Rs. 1,00,000.
 - ii) Income tax paid Rs. 10,000.
 - iii) RPF deducted Rs. 12,000.
 - iv) Dearness Allowance at 20% of salary.
 - v) Bonus Rs. 15,000.
 - vi) Leave salary Rs. 13,000
 - viii) House Rent Allowance Rs. 1,000 p.m.
 - ix) Rent paid house in Chennai Rs. 1,300 p.m.

166. After serving for 33 years and 9 months in Bharat chemicals ltd, Mr. X, who is covered under the payment of gratuity act retires from services on 30th November 2022. The employer pays him a gratuity of Rs. 3, 00,000. His monthly basic salary at the time of retirement was Rs. 10,000, D.A. Rs.3000 and HRA Rs.1300. You are required to determine the amount of gratuity exempt under section 10(10) of the Income Tax Act.
167. What is the Provision for earned Leave Salary?
168. Mr.Mathew who resided in Chennai gets, Rs. 60,000 p.a as basic salary.He receives, Rs.10,000 p.a as house rent allowance.Rent paid by him is, Rs. 8,000 p.a. Find out the amount of taxable house rent allowance for the Assessment Year 2023 -2024
169. Mr.Luke is a government employee in Chennai. He is living in a furnished house provided by the Government, free of rent. His salary is, Rs. 15,000 per month. The licence fee fixed by the government for the unfurnished house is, 1,000 per month. Its fair value is, Rs. 7,500 p.m. He is provided furniture cost of, Rs. 20,000. Compute the rental value of rent free furnished house.
170. Mr. Vyas gets Rs. 80,000 as basic pay Rs. 1, 50,000 as house rent allowance from his employer during the previous year 2022– 2023. Further he gets Rs. 15,000 as commission on sales. He pays Rs.12, 000 as house rent. Find out the taxable portion of HRA assuming that
(i) He lives in Mumbai (ii) He lives in Madurai

UNIT III

171. How do you determine expected rent and actual rent?
172. Define and state the meaning of annual value of a house
173. How do you determine expected rent and actual rent?
174. Explain the computation of annual value of a house under different situations.
175. State the provision regarding interest on loan for self-occupied house.
176. How does the rent control act affect the annual value?
177. X owns a house. The municipal value is Rs.18, 000. Standard rent Rs.30, 000. He occupied a house for residence from 1.4.2022 to 30.9.2022 and from 1.10.2022 let it out on rent at Rs.2,000 p.m. Determine its annual value if municipal tax paid Rs.2, 000.
178. Calculate annual value from the following information:
Actual Rent Rs. 24,000 p.a: Fair Rent Rs. 28,000 p.a: Standard Rent Rs. 20,000 p.a
179. What will be the annual value of the house for the assessment year 2023-2024 if (i) fair rent value Rs. 1, 20,000: (ii) actual rent received Rs.1, 50,000; (iii) Municipal tax paid Rs.30, 000
180. From the following information of Mr.Vinay Johri,Compute the annual value of the let out portion of the house for the assessment year 2023-2024
Municipal value Rs.20,000, Municipal Tax paid Rs.4,000.House is being used for self-residential purpose but let out one fourth (1/4) portion @400 per month with effect from 1 st January,2021.

UNIT IV

181. Explain the meaning of Business and Profession.
182. Define speculative transactions.
183. State whether the following items are deductible or not and why, under the head business income.
(i) Fees paid to the lawyer of drafting partnership deed.
(ii) Donation to a political party.
(iii) Legal expenses paid to protect the building of business.
184. Profit and loss a/c of business shows a profit of Rs. 50,000 after debiting the following expenses:
- | | |
|------------------------|------------|
| Personal expenses | Rs. 5,000 |
| Life insurance premium | Rs. 8,000 |
| Income Tax | Rs. 11,000 |
| House municipal tax | Rs. 700. |
- Compute the taxable income of business.

185. State, giving brief reasons, whether the following items are allowable while computing profits and gains of business or profession.

Donation to a political party

Sums paid to labour to call off the strike

Salary paid to son, who is working in the office. The salary is reasonable.

Rent paid to daughter for office which was gifted to her at the time of her marriage.

Bonus to partners for extra services

Major repair to the air cooler in the office.

186. Explain in brief the provisions relating claim of expenses on scientific research.

187. State various disallowed incomes in computing taxable income from Business and Profession

188. State any two incomes that are taxed as 'income from business or profession'

189. Profit and loss account of M/S Balaji Traders shows a net profit of Rs. 1, 00,000 after

debiting the amount withdrawn for personal expenses Rs. 10,000, Life Insurance

Premium Rs. 15,000, Income tax Rs. 22, 000, expenses relating to income tax proceeding

Rs. 15,000 and Municipal tax relating to the self-occupied property Rs.1, 400. Compute his

taxable income under the head 'Profit from business'.

190. Explain book profit in firm

UNIT V

191. What is indexed cost of improvement?

192. What is capital asset?

193. Explain the term (i) Short term capital Assets (ii) Long term capital Assets

194. Which assets are not considered as capital assets, while computing capital gains?

195. Define the term "Index cost of acquisition"

196. Ramu purchased a residential house in 1984 for Rs. 2, 00,000 which he sold in October 2017

for Rs. 20,10,000. Fair market value of the house as on 1.4.99 was Rs. 3, 00,000. He

purchased a new house on 31.12.2021 for Rs. 4, 10,000. Compute his taxable capital gain.

197. From the following particulars submitted by Shri Gaurav, compute his income from other Sources for the Assessment Year 2023-2024

i) He was a director in a company from which he received Rs.13,000 as
director

ii) Interest received on deposits with a cooperative Bank Rs. 2,000

iii) Dividends received from a foreign company Rs.6,000

iv) Received winnings from lottery Rs. 28,000

v) Income from agriculture in England Rs.78,000

vi) Honorarium for delivering lectures in a registered society Rs. 1,200

198. Compute the income for the year ending 31 st March ,2022 under the head 'Income from other sources' of Mr. Abinay Johri. His investments were:

i) 5% Government securities Rs. 70,000

ii) 7. 5% Agra Municipal bonds Rs. 50,000

iii) 9% debentures of a company Rs. 30,000

iv) 7% capital investment bonds Rs.20,000

199. Mr.Vijayan had the following incomes during the year 2022-2023

Interest on Bank deposits Rs. 4000

Income from units of mutual fund Rs. 5000

Interest on Govt. Security Rs.8000

Winnings from lottery Rs. 10000

Winnings from horse race Rs.5000

He claimed the following deduction

Collection charges of interest on Govt. security by bank Rs. 100

Expenses for buying lottery tickets Rs. 1000

Compute the income from other sources of Mr. Vijayan for the

Assessment Year 2023-2024.

200. Calculate income from other sources from the information given below:

- i) Winnings from lottery Rs. 1, 00,000
- ii) Amount received from race winnings Rs. 35,000
- iii) Gifts received
 - a) Received Rs.20,000 as gift from his friend
 - b) Received Rs. 1,00,000 as gift from his elder brother
 - c) Received Rs. 1,40,000 as gift on his marriage
 - d) Received Rs. 80,000 as gift from his NRI friend.

Section C(marks each)

Answer the following:

UNIT I

201. Discuss the evolution of Income Tax Law in India.

202. Explain with reasons from the point of view of Income tax which of the following incomes is agricultural incomes and which are non-agricultural income

- (i) Income from growing flowers and creepers
- (ii) Income of salt producing, by flooding the land with sea water.
- (iii) Dividend received from a company engaged in agricultural operations.
- (iv) Profit on sale of standing crop after harvest and sale by cultivator.
- (v) Compensation received from insurance company for damage to crop by flood.
- (vi) Interest on arrears of rent, payable in respect of agricultural land.
- (vii) Income from sale of sugar, converted from sugarcane grown by a sugar mill.
- (viii) Interest on loan given to a farmer.
- (ix) Income from agricultural land situated in Srilanka.
- (x) Income from dairy farming.

203. Explain the term agricultural income with examples.

204. (i) Determine the residential status of Mr. X for the previous year 2022-23, assuming That he did not go out of India before this and come back to India on 10th April 2023 in the following cases:

Sponsored by his employer in India for training in U.K. and he leaves (a) on 15th Jun 2021 or (b) on 10th may 2022. 2. He goes for employment purpose to U.K. and leaves to India on 15th September 2022.

(ii) Shri Ramesh who was born and brought up in India, went for further studies to U.K. on 1st March 2021 and came back to India on 1st October 2022 early in the morning. Find out his residential status for the assessment year 2023-24.

205. Describe agricultural income and non-agricultural income.

206. How do you determine the Total Income and Gross Total income?

207. The following are the incomes of Shri Ram Prasad for the 2022- 23:

- (i) Profit from business in Iran received in India 5,000;
- (ii) Income from house property in Iran received in India 500;
- (iii) Income from house property in Pakistan deposited in a bank there 1,000
- (iv) Profits of business established in Pakistan deposited in a bank there 20,000(out of 20,000 a sum of 10,000 is brought into India) this business is controlled from India;
- (v) Accrued in India but received in England 2000
- (vi) Profit earned from business in Kanpur 6,000
- (vii) Income from agriculture in England – it is all spent on the education of children in London 5000 and
- (ix) Past untaxed foreign income brought into India during the previous year 10,000.

From the above particulars ascertain the taxable income of Shri Ram Prasad for the previous year 2022 – 2023 if Shri Ram Prasad is (i) a resident (ii) a not ordinarily resident and (iii) a non-resident.

208. Shankar a foreign national furnishes the following particulars of his income relevant for the

previous year 2022- 2023;

1. Profit on sale of Plant at London (one half is received in India) Rs. 1,46,000
 2. Profit on sale of Plant at Delhi (one half is received in London) Rs. 1,02,000
 3. Salary from an Indian Company received in London (one half is paid for rendering Services in India) Rs. 60,000
 4. Interest on U.K. Development Bonds (entire amount is received in London) Rs. 40,000
 5. Income from property in London received there Rs. 30,000
 6. Profit from a business in Delhi managed from India Rs. 49,000
 7. Income from agriculture in London received there, half of which is used for meeting Hostel expenses of Shankar's son in England and remaining amount is later on remitted to India Rs. 25,000
 8. Dividend (Gross) received in London from a company registered in India but mainly operating in U.K. Rs. 17,000
 9. Rental Income from a property in Nepal deposited by the tenant in a foreign branch of An Indian bank operating there Rs. 12,000
 10. Gift from a relative in a foreign currency (one third of which is received in India and remaining amount is used for meeting education expenses of Shankar's son in USA)
- Determine gross total income of Shankar for the assessment year 2020 -2021, if he is a
(i) resident (ii) non resident (iii) not ordinarily a resident What are the various conditions to determine the residential status of the individuals?

209. Explain the incidence of residence on tax liability.

210. Explain how tax liability of an assessee is determined with reference to his residence?

UNIT II

211. Mr. X is employed in Mumbai. His particulars of income for the assessment year 2023 – 2024

Basic Salary Rs. 6000 p.m

Dearness Allowance Rs.2000 p.m (40% is computed for retirement benefits)

Bonus Rs. 5000 p.a

Commission Rs. 4000 p.a

Entertainment allowance Rs. 500 p.m. Fair rental value of free house provided by the employer Rs. 30,000 p.a. Value of furniture provided Rs. 20,000. Find out Mr.X's income salary if the population is more than 25 lakhs.

212. Write notes on any ten allowances exempted upto specified limit.

213. The following particulars relate to the income of Sri Rajeev Mehta for the previous year 2022-23.

He is employed in a cotton textile mill at Bangalore on a monthly salary of Rs. 25,000.

He is also entitled to a commission @ 1% of sales affected by him. The sale affected by him during the previous year amounted to Rs. 40,00,000. He received the following allowances and perquisites during the previous year:

i. Dearness pay @ Rs.6000 per month

ii. Bonus @two month's basic salary

iii. Entertainments allowance @Rs.2000 per month

iv. House rent allowance @Rs. 5000 per month

v. The employer paid Rs. 10,000 towards the income-tax liability of Sri Rajeev Mehta

vi. The employer provided him L.T.C. of Rs. 35,000 for going to Simla

vii. He has also been provided with gas, electricity and water facility and employer spent Rs.15,000 on these.

viii. The employer gave him cotton worth Rs. 1000 free of cost.

ix. He and his employer both contributed 15 % of his salary to his recognized provident fund and interest to this fund @ 9% amounted to Rs. 30000 during the previous year.

x. He spent Rs. 6000 per month as rent of the house occupied by him in Bangalore.

Compute his taxable income under the head 'Salaries' for the assessment year 2023-24.
214. From the following particulars of Shri Y, compute his salary income appending notes where necessary:

- a. Salary Rs. 15000 pm - Rs.1,80,000
- b. Bonus – Rs. 6000
- c. Dearness allowance – Rs. 1800
- d. Entertainment allowance (never given before)-Rs. 6000
- e. Employer's contribution to recognized P.F. – Rs. 21,000
- f. Employee's contribution to recognized P.F. – Rs. 21,000
- g. Interest on P.F.@ 12 % - Rs.2400
- h. Personal expenses of Mr. Y's son met by the employer – Rs.1000
- i. Rent free unfurnished house provided by the employer, whose annual rental value is (city is Delhi) – Rs 36000
- j. Watchman engaged by the employer for many years for the security of residence of Shri Y, total salary paid to him by employer during the year – Rs. 4,800.
- k. Medical expenses of the employee – Rs.3000
- l. Club bill of the assessee paid by the employer – Rs. 400
- m. Unit linked insurance plan contribution paid by the employer – Rs. 6000
- n. He deposited Rs. 12,000 in PPF.

He was provided with rent free house for a period of 8 months only during 2022– 23 after which he shifted to his own house. He continued to enjoy the facility of a watchman for his own house also.

215. List out the taxable perquisites for all types of employees.

216. Mrs P is an employee getting a monthly salary of Rs. 5000 plus a dearness pay of Rs. 500 p.m. She contributed 14% of her salary and dearness pay to a provident fund to which her employer contributes and equal amount. Interest on provident fund is determined at the rate of 12 % p.a. which amounted to Rs. 3600 for the previous year. She also gets a house rent allowance of Rs. 200 pm. She has actually paid Rs. 600 pm as rent of the house occupied by her for her residence. What will be her taxable salary for the Assessment Year 2023 – 24: if the provident fund is Recognised Provident Fund.

217. Mr. Peter is employed in Mumbai. His particulars of income for the assessment year 2023 – 2024

- Basic Salary Rs. 6000 p.m
- Dearness Allowance Rs. 2000 p.m (40% is computed for retirement benefits)
- Bonus Rs. 5000 p.a
- Commission Rs. 4000 p.a
- Entertainment allowance Rs. 500 p.m. Fair rental value of free house provided by the employer Rs.30,000 p.a. Value of furniture provided Rs. 20,000. Find out Mr.X's income salary if the population is more than 25 lakhs

218. Explain the composition of salary from income tax point of view.

219. Give the classification of allowances.

220. Explain the special payments received by an assessee from his employer after his retirement.

UNIT III

221. Explain the computation of annual value of a house under different situations

222. Write short notes on (i) Assessment of arrears of rent received (ii) Realisation of unrealised Rent

(iii) Income from house property in a foreign country (iv) Standard rent (v) Fair rent.

223. X, Y and Z are three friends owing equally a house property consisting of six identical units. It was constructed on 1st July 2015. One unit is self – occupied by each one of them for their residence. The remaining 3 units are let out on a monthly rent of Rs. 6000 per unit. The

municipal value of the house property is Rs. 4, 00,000 and the municipal taxes paid amount to Rs. 80,000 during the year. The other expenses were as under:

- i. Collection Charges - Rs.6000
- ii Insurance premium paid - Rs 7000
- iii Interest on loan taken for construction of house – Rs. 1,30,000

One of the let out units remained vacant for three months during the financial year 2019-20. Mr. X could not occupy his unit for 8 months as he was transferred to some other city. He does not own any other house property. The other taxable income of X, Y and Z are Rs. 90,000, Rs. 1, 00,000 and Rs. 1, 20,000 respectively. Compute the taxable income from house property and the total income of three friends for the year 2023-24.

224. Mr. A has four houses, the municipal valuation of which are Rs. 10,000, Rs. 8,000, Rs. 6000 and Rs. 6000 respectively. He lives in the first house. In the second he runs his business. The third house let out for Rs. 400 per month. A loan was taken on 1st April 2015 for the construction of the fourth house, the construction of which began on 1st May 2015 and ended on 31st January 2017.

The house was let out on 1st February 2017 @ Rs. 600 p.m. For the previous year 2022-23 The interest paid by him in respect of the loan amounted to Rs. 800 and for the previous year 2012-13 and 2020-21 the interest paid has been Rs. 1500 and Rs 1400 respectively. Municipal taxes were assessed and paid @ 10% of the municipal valuation. Ascertain his income from house property for the assessment year 2023-24.

225. Mr. A has 4 houses. One house is let to a tenant for Rs. 3,000 p.a. The second house, Municipal valuation is Rs. 4,500 p.a. is in his own occupation. The third house remained vacant throughout the whole year as it is not in a rentable condition. The fourth house, municipal valuation is Rs. 6,000 is used by A for his business. His expenses in respect of these houses are as follows

Interest on loan taken to repair the residential house Rs. 400. Fire insurance premium for the 1, 2, 4th house Rs. 1,410. Collection charges Rs. 350. Ground rent in respect of 2nd house Rs. 200. The first house, which is let remained vacant for two months.

Calculate A's income from house property.

226. Mr. Sakthivel owns a house property which is let out for residence. He submits the following details to compute gross annual value of the property.

	Rs
Municipal value	1, 40,000
Fair rent	1, 45,000
Standard rent under Rent control Act	1, 42,000
Annual rent if property is let out throughout the previous year	1, 68,000
Unrealized rent	14,000
Loss due to vacancy	7,000

227. Mr. Raja, owner of two houses, occupied one for his own residence and the other he lets to a tenant at a monthly rent of Rs. 500. The municipal valuation of the house occupied is Rs. 2,600 and of the other is Rs. 5,200. The municipal tax of the two amounted to Rs. 600. The other expense in respect of the two houses are as follows:

Insurance premium (for both houses)	Rs. 1,200
Repairs of the house occupied	Rs. 700
Interest of loan taken to repair the two houses	Rs. 400

Calculate Mr. Raja's income from house property

228. Describe various types of house property from income tax point of view.

229. Give the proforma of computation of income from house property.

230. Mr. Raja owns three houses. Compute his income from house property for the year 2023– 24.

- i. He occupied a first house for residence.
- ii. The second house was let out at Rs. 400 p.m. The annual value was

- Rs.15, 600. He is paying Rs.600 per year as interest on money borrowed for construction of the house and Rs. 280 as land revenue.
- iii. The third house has annual value of Rs.16, 000 and was let out for Rs.600 p.m.

UNIT IV

231. Discuss the procedure for computation of income from Business& Profession.
232. State the procedure of computing the income of a lawyer under the head “Income from profession”.
233. What are the allowances that are admissible in determining the income from business?
234. What are the allowances that are not admissible in determining the income from business?
235. Given below is the profit & loss account of a Timber Merchant for the year ended 31st March 2023: Compute his taxable income

	Rs		Rs
Opening Stock	25,000	Sales	5, 00,000
Purchases	2, 50,000	Rent of Property	15,000
Wages	1, 00,000	Closing Stock	35,000
Audit fees	1,000		
Repairs (House Property)	2,000		
General Charges	1,500		
Commission for Raising loan	1,000		
Bad debts reserve	500		
Bad debts	2,000		
Interest on Capital	1,500		
Contribution to Staff Welfare Fund	2,500		
Provision for Income Tax	10,500		
Depreciation Allowable	2,500		
Net Profits	1, 50,000		
	5, 50,000		5, 50,000

236. Dr. Ganesh is a medical practitioner of Thoothukudi from the following calculate his income from profession for the A.Y. 2023 -2024
1. Gross receipts from dispensary Rs. 2, 35,000
 2. Gross receipts from consultation Rs. 1, 65,000
 3. Operation fees Rs. 2, 50,000
 4. Gifts from patients Rs. 30,000
 5. Visiting fees Rs. 50,000
 6. Medicine purchased Rs. 1, 25,000
 7. Closing Stock of medicine Rs. 35,000
 8. Salary paid to employee Rs. 1, 00,000
 9. Surgical equipment purchased Rs. 48,000
 10. Dr. Ganesh went to attend a medical seminar in Germany to update the Knowledge and spent Rs. 25,000.
 11. He owns a house whose municipal value is Rs. 50,000. Half portion of the house is Used for Profession. Expenses paid on the house: M.Taxes 10 % of M.V., Repairs Rs 10,000; Renovation expenditure Rs. 30,000
 12. Medical books purchased Rs. 20,000

237. The following is the P and L A/c. of Mr.Ravi for the year ended 31.3.2022. Compute his Taxable income

	Rs.		Rs.
To Office salary	6,500	By Gross Profit	36,750
To Bad debts		By Commission	1,250
Written off	1,700	By Discount	500
To Provision for Bad debts	3,000	By Sundry receipt	200
To Advertisement	3,800	By Rent of building	3,600
To Fire Insurance		By Profit on sale	
Premium	550	of investment	3,000
To General Expenses	2,750		
To Depreciation	1,200		
To Interest on			
Capital	2,000		
To Interest on			
Bank (due)	1,300		
To Net profit	22,500		
	-----		-----
	45,300		45,300
	-----		-----

238. Compute Business Income from the following Profit and Loss Account:

	Rs.		Rs.
To General Expenses	10,000	By Gross profit	1, 40,000
To Fire Insurance premium			
(50% for house property)	8,000	By Bad debts recovered	
		(Disallowed earlier)	10,000
To Salary	30,000	By Interest on Govt.Securities	5,000
To Advertisement	25,000	By Rent from house	
		Property	10, 000
To Salary to Proprietor	20,000	By Long term capital gain	10,000
To Interest on capital	5,000		
To Income Tax	10,000		
To Sales Tax	5,000		
To Donations	10,000		
To Motor car expenses	2,000		
To Net Profit	50,000		
	1, 75,000		1,75,000

Other Information:

- i) General expenses include Rs. 1,000 for drawings.
- ii) Car was used 50% for business purpose.

239. Shri Radhey Lal, the proprietor of a flour mill, has prepared the following P&L Account for the year ending 31 st March, 2023. You are required to compute his income from business and his gross total income for the A.Y.2023-2024.

Profit and Loss Account

	Rs.		Rs.
Trade Expenses	450	Gross Profit	1, 35,900
Establishment Charges	2,200	Dividends from a co-operative	
Rent, Rates & Taxes	1,400	society	2,600
Discount & Allowances	200	Rent from property	500

Income Tax	700	Bad Debts recovered (Allowed as deduction in an earlier year)	2,000
Advertisement Expenses	1,450		
Postage & Telegrams	100		
Gifts and Presents for publicity	125		
Fire Insurance Premium	250		
Charities	375		
Donations	400		
Repairs and Renewals	250		
Audit Fees	250		
Net Profit transferred to capital a/c	1, 32,000		
	1, 41,000		1, 41,000

240. Shri Ram Prasad is a registered medical practitioner. He has prepared the following Income and Expenditure Account for the year ending 31 st March 2023. You are required to prepare a statement showing his income from profession.

Income and Expenditure Account			
	Rs		Rs
Household Expenses	1, 20,000	Consultation fees	1, 10,000
Car purchased	1, 30,000	Visiting fees	1, 20,000
Travelling Exp. (Personal)	4,000	Gains on Race (gross)	10,000
Charity & Donations	1,000	Share in sale proceeds of an ancestral house	34,000
Income Tax	2,000	Capital gains	6,000
Salaries	8,000	Dividend from a domestic company	5,000
Gifts to daughter	7,000	Interest from P.O.Savings Bank	600
Establishment Expenses	1,000	Gifts from Father-in-Law	2,000
Surgical Equipment	4,000	Bad debts recovered (not allowed in earlier years)	2,000
Books (Annual Publications)	1,200	Int.on fixed deposit (Gross)	1,300
Life Insurance Premium	2,000		
Wealth Tax	1,000		
Interest on Capital	1,000		
	2, 90,000		2, 90,000

Rate of depreciation allowable on car and surgical equipment is @ 15 %.

UNIT V

241. What do you understand by the term ‘Capital Gains’ used in the Income Tax act?

242. Explain the term cost of acquisition of capital assets.

243. Discuss the procedure of computation of income from capital gain

244. Discuss the exemption provided U/s 54 and 54 F of I.T Act on capital gain

245. From the following data, compute capital gains taxable for the A.Yr. 2023 – 24.

Site purchased in 1994 Rs.33, 000

Market value on 1.4.2000 Rs.75, 000

Ground floor – cost of construction in 2000 Rs.1, 50,000.

First floor – cost of construction in 2005 Rs.2, 66,000.

Sale consideration in 2022 Rs.30, 00,000

Investment in new property Rs.10, 00,000

Assume the property sold and new property acquired is for residential purposes. Cost inflation index 2005 – 06 = 117 ; 2022 – 23 = 331

246. During the year ended 31st March 2023 Mr. Sathappan, sold the following assets:

Particulars	Sales Proceeds
i) Shop purchased in 1999 – 2000 (C.I.I. = 389) for	18,000
	70,000

- ii) Machinery purchased in 2007-08 (CII =129) for
50,000 (W.D.V. on 1.4.2018 = 35,000) 60,000
- iii) Furniture purchased on 1.5.2021 for 1,000 1,300
- iv) One residential house purchased in 2002-2003 (CII =105)
being 30,000 98,200

During the year he bought another house for his residence for 1, 60,000. Cost Inflation Index for 2023 – 2024 is 348. Compute his capital gain.

247. From the following information of Mr. Gowthaman, compute the capital gains for the assessment year 2023-2024.

- i) Cost of acquisition of residential house in 1994-95 Rs. 2,00,000
- ii) Sale consideration on 2.6.2022 Rs.18, 00,000
- iii) Cost of acquisition of new house for residential purposes by due date of filing the return
Rs. 3, 50,000
- iv) Amount deposited in capital gains a/c scheme by due date of filing the return for the
A.Y. 2023 -24 1, 00,000 ; The C.I.I. is 1994 – 95 = 289 and 2022 – 2023= 331

248. Mr.A provides the following data regarding his transaction for the sale of his residential house For the assessment year 2023-2024. Compute capital gains taxable for the A.Yr. 2023 – 24.

- House purchased in 1993- 94 Rs.4, 00,000
- Sold in November 2022 Rs. 40, 00,000
- Purchased another house in September 2022 Rs.6, 50,000
- Deposited in the capital Gains a/c scheme, 1995 in January 2021 Rs. 3,00,000
- Cost inflation index 1993 – 94 = 244 ; 2022 – 23 = 331

249. Mr. Basavaraju furnishes the following particulars of his investments for the P.Y. ended 31.3.2023

- i) Rs. 20,000 8% municipal debentures
- ii) Rs. 30,000 10% Karnataka State Government Loan.
- iii) Rs.20,000 18% tax free debentures of X co Ltd., listed in a recognised stock exchange.
- iv) Rs.20,000 7% Capital Investment Bonds of Government of India.

He also received during the same P.Y. :

- i) Rs.2,000 as interest on Central Government Securities.
- ii) Rs.2,000 as interest on State Government Securities.
- iii) Rs.900 as interest on Debentures of X Co. Ltd. (not listed in a recognised Stock Exchange)
- iv) Rs.1,500 as interest on bank deposit.
- v) Rs.1,000 interest on loan given to a relative.

He paid Rs.100 as commission to his bankers for collecting interest on securities. Compute his income from other sources.

250. Mr. Lalit an ordinary resident in India earned the following incomes during the financial year 2022-23:

- Director's fees Rs. 2,000
- Income from agricultural land in Pakistan Rs. 5,000
- Ground rent for land in Pathankot Rs.10,000
- Interest on postal savings bank account Rs.100
- Inteest on deposit with industrial finance corporation of India Rs.500
- Dividend from a foreign company Rs.700
- Rent from sub letting a house Rs.26,250
- Rent payable by Mr. Lalit for the sub let house Rs.12,000
- Other expenses incurred on this sub let house Rs. 1,000
- Winnings from race course Rs. 12,300
- Interest on securities Rs. 4,000

You are required to calculate ' Income from other Sources' of Mr. Lalit for the A.Y. 2023 -2024

A. Creditors

B. Debtors

C. Banker

D. Customer

9. The rate of interest charged for the loan by the banker compared to overdraft and cash
credit is generally.....

A. High

B. Low

C. Same

D. Based on the amount

10. The services rendered by a banker as an agent of his customers are called.....

- A. Principal services
- B. Agency services**
- C. General utility services
- D. Social services

Unit - III

1. Expand NEFT

- A. **National Electronic Fund Transfer**
- B. Neutral Electronic Fund Transfer
- C. Nominal Electronic Fund Transfer
- D. Natural Electronic Fund Transfer

2. What does the term "PIN" stands for?

- A. People Identification Number
- B. Personal Instruction Number
- C. Personal Identification Number**
- D. Personal Information Number

3. KYC means

- A. Know Your Card
- B. Know Your Cost
- C. Know Your Customer**
- D. Know Your Creditor

4. CRM stands for .

- A. Consumer Rate Mechanism
- B. Customer Relationship Management**
- C. Convenience Relationship management
- D. Consumer Relationship Management

5. MICR stands for

- A. Magnetic Ink Character Recognition**
- B. Magnetic Ink Company Recognition
- C. Magnetic Ink Cross Recognition
- D. Magnetic Ink Community Recognition

6. RTGS system works _____ days in a year
A. 365.
B. 362
C. 300.
D. 305.
7. Internet banking refers to
A. Operation of account through internet
B. Opening of account through ATM
C. Both (a) & (b)
D. None of above
8. ATM can be used for
A. Cash withdrawal
B. Account enquiry
C. Statement of account
D. All of above
9. Core banking is a _____ branch computerization model.
A. decentralized
B. centralized.
C. unified
D. ATM
10. ATMs are primarily used for performing the _____ functions.
A. infrastructure
B. computer-based
C. banking
D. hospitalized

Unit IV

1. Expand the term SWIFT. _____
a) Society for Worldwide International Financial Telecommunications
b) Society for Worldwide Interbank Financial Telecommunications
c) Society for Worldwide International Financial Transfers
d) Society for Worldwide Interbank Fiscal Transactions

2. Common name for ATM, Debit card, Credit card, Metro card etc is _____
- a) Master card
 - b) Visa card
 - c) **Smart card**
 - d) Electronic card
3. KYC means _____
- a) **Know Your Customer**
 - b) Know Your Character
 - c) know Your Consumer
 - d) All the above
4. Which of the following is used for International Monetary Transfer?
- a) RTGS
 - b) NEFT
 - c) **SWIFT**
 - d) MICR
5. One of the items is not related with e-banking
- a) **Demand draft**
 - b) SPMS
 - c) ECS
 - d) ATM
6. What is OTP in credit card transaction?
- a) Odd Transaction Password
 - b) Owner is Trading Pass code
 - c) **One Time Password**
 - d) One Time Pincode
7. A _____ card is basically a payment mechanism which allows the holder of the card to make purchase without any immediate cash payment
- a) ATM
 - b) **Credit**
 - c) Debit
 - d) Kishan Credit

8. Expansion of NEFT_____.

- a) **National Electronic Fund Transfer.**
- b) Neutral Electronic Fund Transfer.
- c) Nominal Electronic Fund Transfer.
- d) Natural Electronic Fund Transfer.

9. Expansion of EFT_____.

- a. **Electronic Fund Transfer**
- b. Economic Fund Transfer.
- c. European Fund Transfer
- d. Electric Fund Transfer.

10. RTGS system works _____ days in a year

- a. 365.
- b. 362**
- c. 300.
- d. 305.

Unit V

1. _____ is a technology that allows you to access your bank account from a mobile device.

- a. Home banking
- b. Mobile banking**
- c. Internet banking.
- d. Telephone Banking

2. A debit card holder makes payment for purchases_____.

- a. After 15 days
- b. After 20 days.
- c. After 30 days
- d. Immediately after purchase

3. The credit card offers _____.

- a. **. revolving credit for certain period.**
- b. payoff the entire amount of card usage.
- c. on-line recover of amount of card usage
- d. only amount.

4. The debit card offers _____.
a. revolving credit for certain period.
b. payoff the entire amount of card usage.
c. on-line recover of amount of card usage.
d. only amount.
5. Mobile banking offers the following.
a. Withdrawal of cash anywhere in India
b. Statement of account for a specific period.
c. Transfer of funds from one account to another account.
d. Balance enquiry.
6. E-cash means _____
a. to transfer money between different parties over a network.
b. to transfer cheque between different parties over a network.
c. to credit money between different parties over a network.
d. to credit cheque between different parties over a network.

a) **Operation of account through internet**
b) Opening of account through ATM
c) Opening of account through mobile banking
d) All the above
8. ATM can be used for _____
a) Cash withdrawal
b) Account enquiry
c) Statement of account
d) All of above
9. What is RuPay Debit Card?
a) Domestic debit card
b) Introduced by National Payments Corporation of India
c) Accepted at all ATMs & PoS machines
d) All of above

10. Can illiterate person be issued Debit card?

- a) No
- b) Yes
- c) Only in case of joint account
- d) Only in case he is head of family

Section B (5×2=10)

Answer any FIVE from the following in about 50 words each

Unit – I

1. Define Banking.
2. What is bank?
3. Define Bank.
4. Who is a customer?
5. Define customer.
6. Who is a banker?
7. Define Bank.
8. Who is a Minor?
9. What is the procedure to open account by a Married Women?
10. List few type of customers in bank.
11. What is the role of Reserve Bank of India?
12. What are the functions of RBI
13. Who is an Indigenous banker?
14. What is the role of Commercial Banks?
15. What is the role of Co-operative banks?
16. What is the role of Regional Rural Banks?
17. Expand NABARD.
18. What is the role of Industrial Development Banks
19. Expand IFC.
20. Expand ICICI.

Unit – II

1. What is Credit Instruments?
2. Define Negotiable Instruments.
3. What is a Promissory note?
4. Define Bills of Exchange.
5. Define Cheque.
6. What is Material alteration?
7. What is Crossing?
8. What is Endorsements?
9. What is Marking?
10. What is Bank Draft?
11. Who is a Paying Banker?
12. List out the Reasons for dishonouring cheques.
13. What is Holder in-due course?
14. What is Payment in-due course?
15. Who is a Collecting Banker?
16. List out the duties of a paying banker.
17. List out the responsibilities of a collecting banker.
18. List out the duties of a collecting banker.
19. List out the responsibilities of a paying banker.
20. List out the negligence of collecting banker.

Unit – III

1. What is e-banking?
2. What is Traditional banking?
3. List out the Electronic Delivery channels.
4. What are the E-banking transactions?
5. What is Electronic Cheque?
6. What is Mobile banking?
7. What is Real-Time Gross Settlement?
8. What is RTGS?

9. What is NEFT?
10. What is the online payment transaction?

Unit IV

1. What is ATM?
2. List out the features of ATM?
3. What are the types of Debit Cards?
4. What are the types of card?
5. Draft the steps to use ATM.
6. What is debit card?
7. What is PoS?
8. Draft the steps to use PoS.
9. What is CDM?
10. Draft the steps to use CDM.

Unit V

1. What is internet banking?
2. Define internet banking.
3. Draft the procedure to activate internet banking.
4. Draft the steps to access banking transactions using internet banking.
5. What is EFT?
6. What is ECS?
7. What is NEFT?
8. What is RTGS?
9. Draft the steps to access banking transactions using mobile banking.
10. List out few latest apps for mobile banking.

Section C (5 x 5 = 30)

Answer in about 200 words each choosing either (a) or (b) :

Unit I

1. Describe the rights of a banker.

2. State the special types of customers.
3. Discuss the Customer Relationship between banker and customer.
4. Discuss the Special Relationship between banker and customer.
5. Describe the Rights of a banker.
6. Describe the Duties of a banker.
7. Narrate the procedure to open account to Minor and Married Women.
8. Narrate the procedure to open account to Drunkard, Lunatics, and Illiterate persons.
9. Narrate the procedure to open account to Partnership firm.
10. Narrate the procedure to open account to Joint Stock Company.
11. Explain the functions of Commercial Bank.
12. Elucidate the objectives of Regional Rural Bank.
13. Discuss the functions of Reserve Bank of India.
14. Enumerate the Constitution and Management of RBI
15. Discuss the functions of Indigenous bankers.
16. Discuss the functions of Co-operative banks.
17. Discuss the functions of Regional Rural Banks.
18. Discuss the functions of NABARD
19. Discuss the functions of Industrial Development Banks.
20. Discuss the functions of IFC-IDBI-ICICI.

Unit II

1. Explain the kinds of endorsement.
2. What are essential characteristics of negotiable instruments?
3. What are features of Credit Instruments?
4. What are essential characteristics of Promissory notes?
5. What are essential characteristics of Bills of exchange?
6. What are essential characteristics of cheque?
7. What are essential characteristics of Material alteration?
8. What are essential characteristics of crossing?
9. What are types of crossing?
10. What are essential characteristics of Endorsements?

11. What is meant by holder in due course?
12. What are the features of Payment in due course?
13. What are the duties of Paying Banker?
14. What are the Precautions for honouring the cheques?
15. What are the Reasons for dishonouring cheques?
16. Describe Holder in-due course.
17. Describe Payment in-due course.
18. Describe Collecting Banker
19. What are the duties of Duties and Responsibilities of collecting banker?
20. Discuss the negligence of collecting banker.

Unit III

1. Distinguish between Traditional Banking Vs. E-banking.
1. Describe the types of Electronic delivery channel.
2. Discuss the Advantages of e-banking.
3. Discuss the Constraints of e-banking.
4. Describe the types of Electronic Delivery Channels.
5. Describe the types of E-banking transactions.
6. What are the features of Electronic Cheque?
7. What are the Advantages of Electronic Cheque?
8. What are the advantages of mobile banking?
9. What are the advantages of Real-Time Gross Settlement?

Unit IV

1. Explain the advantages of ATM.
2. Describe the origin of ATM.
3. Explain the types of card.
4. Elucidate the disadvantages of ATM
5. Discuss the growth of ATM.
6. Explain the advantages of PoS.
7. Describe the origin of PoS.

8. Elucidate the disadvantages of PoS.
9. Discuss the growth of PoS..
10. Explain the advantages of CDM.
11. Describe the origin of CDM.
12. Elucidate the disadvantages of CDM.
13. Discuss the growth of CDM.
14. Difference between CDM and ATM.

Unit V

1. Distinguish between RTGS and NEFT.
2. Describe the advantages of mobile banking.
3. Discuss the steps to access internet banking.
4. Discuss internet banking.
5. Difference between NEFT and RTGS.
6. Explain the advantages of internet banking.
7. Discuss the disadvantages of internet banking.
8. Discuss mobile banking.
9. Discuss how to transfer fund using mobile banking.
10. Explain the advantages of mobile banking.
11. Discuss the disadvantages of mobile banking.
12. Discuss latest payment apps for making payments.

Section D (3 x 10= 30)

Answer any THREE in about 500 words each:

Unit I

1. Discuss the relationship between banker and customer.
2. Describe the obligations of the banker.
3. Describe the rights of the banker.
4. Describe the duties of the banker.
5. Explain the types of customers.
6. Summarize the functions of RBI.

7. Discuss the role of commercial banks in the economic development of India.
8. List out the objectives of credit control measures adopted by the RBI.
9. Explain the functions of NABARD.
10. Explain the functions of Industrial Development Banks.

Unit II

1. Define crossing. Explain its kinds.
2. What is Endorsement? Explain its types.
3. Define Cheque. Explain the requisites of a valid cheque.
4. Difference between cheque and bill of exchange.
5. Draft about material alteration, marking and bank draft.
6. Discuss the precautions to be taken by the paying banker.
7. Discuss the statutory protection of a paying banker.
8. Discuss the duties of a collecting banker.
9. Explain the duties and responsibilities of a collecting banker.
10. Explain payment in due course and holder in due course.

Unit III

1. Enumerate the merits and demerits of e-banking.
2. Discuss the advantages and disadvantages of mobile banking.
3. Discuss the types of e-payment system.
4. Discuss the advantages and disadvantages of Electronic Cheque.
5. Discuss the advantages and disadvantages of Real-Time Gross Settlement.
6. Explain the Modern Trends in e-banking.
7. Discuss the advantages and disadvantages of internet banking.
8. Distinguish between Traditional banking Vs. E-banking.
9. Describe the types of Electronic delivery channel.
10. Discuss in detail about e-banking services.

Unit IV

1. Explain the advantages and disadvantages of PoS.
2. Elucidate the advantages and disadvantages of CDM.

3. Explain the advantages and disadvantages of ATM.
4. Discuss the growth of PoS, CDM and ATM in India
5. Discuss PoS.
6. Discuss CDM.
7. Discuss ATM.
8. Give your opinion about future of ATM technology.
9. Give your opinion about future of CDM technology.
10. Give your opinion about future of PoS technology.

Unit V

1. Distinguish between RTGS and NEFT.
2. Describe the advantages and disadvantages of mobile banking.
3. Describe the advantages and disadvantages of internet banking.
4. Discuss RTGS.
5. Discuss NEFT.
6. Discuss Mobile Banking.
7. Discuss Internet Banking.
8. Give your opinion about future e-banking services in India.
9. Discuss top payment apps.
10. Discuss the role of payment apps in today's life.

Section- B (Two marks)

Answer the following in 50 words:

Unit-I

1. What is investment?
2. Distinguish between Cum interest and Ex interest.
3. What is the journal entry for "Sale of Investments at cum interest price"?
4. What is Columnar Investment Account?
5. What are the various types of securities?
6. What is Rights issue?
7. How to make investment in Equity shares?
8. What do you mean by fixed income bearing securities?
9. What do you mean by floating income bearing securities?
10. What is Bonus Share?

Unit-II

1. What is voyage account?
2. Write note on passage money
3. What do you mean by primage?
4. What is incomplete voyage?
5. What do you mean by bunker cost?
6. What is Address Commission?
7. What is Freight Received In Advance?
8. What is unfinished voyage?
9. What do you mean by port charges?
10. What is stevedoring charges?

Unit-III

1. Explain slip system of posting.

2. Write short note on Rebate on bills discounted.
3. Draw a specimen form of profit and loss a/c. of a banking company
4. List out the items that will appear under schedule 9
5. State the items that will appear under the heading contingent liability.
6. Give the accounting treatment for Branch adjustment (Dr)
7. Give the accounting treatment for rebate on bills discounted.
8. What is meant by Rebate on Bills Discounted?
9. State the differences between Performing and Non Performing Assets.
10. State the Provisions regarding Non Performing Assets.

Unit –IV

1. Define Insurance
2. What is Reinsurance?
3. Write short note on Claims.
4. What is additional reserve?
5. Give accounting treatment for Reinsurance.
6. Give accounting treatment for Bonus in reduction of premium.
7. What is Commission on Reinsurance ceded?
8. What is called annuity?
9. What is the meaning of surrender value?
10. What is valuation of balance sheet?

Unit V

1. Discuss the concept of Social responsibility of business.
2. Define social cost.
3. Define Social benefit.
4. Define Social Balance sheet.

Unit- II

1. On 1st January 2020, the ship 'Sea Queen' started on voyage from Chennai to Mumbai. It reached back Chennai on 15th March 2020. Transactions are as follows
Freight outward Rs.85,900; Freight return Rs.15,000; Port charges Rs.45,100; Wages Rs.14,500; Fuel Rs.12,500; Brokerage Rs.5,000; Insurance for freight Rs.2,500; Insurance for ship Rs.12,000 p.a. Prepare voyage account.
2. Ganga started her voyage on 1.7.2020 and reached her destination on 31.7.2020. The other details were;

	Rs.
Freight earned	4,20,000
Primage on freight only 20%	
Address commission on freight, primage and passage money 10%	
Passage money	80,000
Fuel	1,50,000
Postage	50,000
Wages and salaries	1,35,000
Prepare voyage account.	

3. From the following information, prepare voyage account of a ship.
Freight received Rs 1,10,000, Freight received in advance Rs 20,000
Freight outstanding Rs 10,000 Address commission at 4%. Brokerage 2%
Primage at 10% was to be calculated. The original cost price of the ship was Rs 100,000.
Past depreciation was Rs 10,000 on it. Depreciation was to be charged 5% yearly by diminishing balance method. Other expenses of voyage were Rs 70,000.
The duration of the voyage was three months.
4. From the following information, prepare voyage account of a ship. The voyage last for a period of 2 months.
Freight received Rs 2,00,000, Freight received in advance Rs 20,000

Freight outstanding Rs 30,000 Address commission at 5%. Brokerage 2%
 Prime at 10% was to be calculated. The original cost price of the ship was Rs 100,000.
 Past depreciation was Rs 10,000 on it. Depreciation was to be charged 5% yearly by
 diminishing balance method. Other expenses of voyage were Rs 50,000.

5. Vikram, a ship commenced its voyage from Mumbai to Chennai on 1st Jan 2020 and returned back on 27th Feb 2020. From the following prepare voyage account.
 Freight outward journey Rs 42,950 Freight return journey Rs 7, 500, Port charges Rs 22,550, Wages Rs 7,250, Fuel Rs 6250, Brokerage Rs 2,500, Insurance for freight Rs 1250, and Insurance for ship Rs 6,000 per year.
6. On 1st January 2008, the ship 'Sea Queen' started on voyage from Chennai to Mumbai. It reached back Chennai on 15th March 2020. Transactions are as follows
 Freight outward Rs.90500; Freight return Rs.18, 000; Port charges Rs40, 500; Wages Rs.24, 500; Fuel Rs13, 800; Brokerage Rs.6, 000; Insurance for freight Rs 3,200 Insurance for ship Rs.10, 000 p.a. Prepare voyage account.
7. Pearl Ship commenced its voyage on 1st Nov 2020 from Mumbai to Chennai and back. The voyage was completed on 31st Dec 2020. The ship was insured for an annual premium of Rs 150,000. Other particulars are as follows:
 Freight earned outward Rs 6,00,000; Freight earned inward Rs 3,50,000; port dues Rs 25,000; bunker cost Rs 1,50,000; wages Rs 2,50,000, stores Rs 60,000 sundry expenses Rs 25,000 passage money received Rs 50,000, Depreciation (annual) Rs 4, 80,000; Address commission 5% on freight. prime 10% on freight. The manager is entitled to a commission of 5% on profit earned after charging such commission. Stores on hand on 31st Dec 2020 were Rs 20,000.
8. How will you calculate profit in case of incomplete voyage account?
9. Draw up a format for a Voyage Account.
10. Distinguish between a Profit and Loss account and a Voyage account

Unit-III

1. From the particulars, prepare profit and loss account of Safety Bank for the year ended 31st March 2012.

	(Rs'000)		(Rs'000)
Interest on Deposits	3,200	Discount on Bills Discounted	1,490
Commission (Cr)	100	Interest on Overdrafts	1,600
Interest on Loans	2,490	Interest on Cash Credits	2,320
Sundry Charges (Dr.)	100	Auditors' Fees	35
Rent and Taxes	200	Directors' Fees	16
Payment to employees	500	Bad Debts to be written off amounted to	300

2. Prepare Profit and Loss Account for the year ended 31st March, 2012 of Very Sound Bank Ltd. from the following particulars:

(a) Abnormal loss (b) Abnormal gain (c) **Normal loss** (d) Abnormal efficiency
3. The method of costing used in construction industries is _____.
(a) job costing (b) **contract costing** (c) process costing (d) unit costing
4. In contract costing _____ is the cost unit.
(a) tonne - kilometer (b) job (c) **contract** (d) process
5. The difference between the value of work certified and the payment made to the contractor is known as _____.
(a) work uncertified (b) cash received (c) **retention money** (d) advance money

6. Usually a contract account of an incomplete contract reveals _____.
 (a) gross profit (b) net profit (c) operating profit (d) **notional profit**
7. In process costing scrap value of normal loss is _____.
 (a) credited to P&L A/c (b) shown in the balance sheet
 (c) **credited to process A/c** (d) debited to process A/c
8. The method of costing used in chemical industry is _____.
 (a) job costing (b) contract costing (c) **process costing** (d) operating costing
9. The method of costing applicable to textile industry is _____.
 (a) job costing (b) contract costing (c) **process costing** (d) batch costing
10. Contract costing is the most appropriate method of costing for _____.
 (a) **construction industry** (b) banking industry
 (c) textile mills (d) cement industry

Section –B (2 marks each)

Answer in about 50 words each.

UNIT I COST ACCOUNTING AND UNIT COSTING:

1. Define costing and cost accounting.
2. State any two functions of cost accounting.
3. List any four objectives of cost accounting.
4. State any four advantages of cost accounting to management.
5. What are the limitations of cost accounting?
6. What is a cost unit?
7. Write a note on (a) cost centre (b) profit centre
8. State any four advantages of cost accounting to creditors.
9. How will you classify cost on the basis of nature or element?
10. Write a note on tenders and quotations.
11. Calculate Prime Cost and Factory Cost from the following details:

	Rs.
Direct material	10,000
Direct Labour	4,000
Direct expenses	500
Factory expenses	1,500
Administrative expenses	1,000

12. State the purpose of preparing a cost sheet.
13. State any two advantages of perpetual inventory system.

UNIT II - MATERIAL CONTROL

1. State any four advantages of material control.
2. What is stock reorder level?
3. Write a note on ABC analysis.
4. What is perpetual inventory system?
5. List the merits of FIFO method of material issues.

6. List the merits of LIFO method of material issues.
7. What are the advantages of Base stock method of material issues?
8. Write a note on EOQ.
9. What is 'bin card'?
10. What is time-keeping?
11. Material A is used as follows:

Maximum usage in a month 600 units

Minimum usage in a moth 400 units

Average usage in a month 450 units

Lead time: Maximum 6 months. Minimum 2 months

Reorder quantity: 1500 Units

Calculate Reorder level

UNIT III- LABOUR COST – COMPUTATION AND CONTROL:

1. What is labour turnover?
2. Write a note on : a) idle time b) Over time
3. What are the effects of labour turnover?
4. How is total earnings calculated under Halsey premium plan?
5. How is total earnings calculated under Rowan plan?
6. What are the merits of time rate system?
7. What are the merits of piece rate system?
8. What are non-monetary incentives? Give 2 examples.

UNIT IV - ACCOUNTING FOR OVERHEADS :

1. Define overhead.
2. Distinguish between fixed and variable overhead.
3. What is apportionment of overhead?
4. Write a note on absorption of overhead.
5. What are standing charges and machine expenses?
6. What is under absorption of overheads?
7. What is over absorption of overheads?
8. What is allocation of overheads?
9. Rate per hour Rs.1.50 per hour
 Time allowed for job 20 hours
 Time taken 15 hours
 Calculate the total earnings and effective rate of earning of the worker under the Halsey Plan.
10. Standard time = 30 hours
 Time taken = 20 hours
 Time rate = Rs. 1.50
 Calculate the earnings of the worker under Rowan Plan.
11. On the basis of the following information, calculate the earnings of X under straight piece rate system.
 Standard Production 10 units per hour
 Normal Time Rate Rs. 5 per hour

Production of X : 80 units in a day of 10 hours

UNIT V - CONTRACT COSTING AND PROCESS COSTING:

1. Write a note on contract costing.
2. Write a note on work-in-progress.
3. What is retention money?
4. What is certificate of work done?
5. What is cost plus contract?
6. Write a note on escalation clause.
7. What are the types of contract?
8. State two differences between job and contract costing.
9. List any two features of contract costing.
10. What is process costing?

Section –C (5 marks each)

Answer in about 200 words each.

UNIT I – COST ACCOUNTING AND UNIT COSTING:

1. Ascertain the profit as per financial books by preparing reconciliation statement .

	Rs.
Profit as per cost accounts	150300
Factory overhead under recovered in cost books	4000
Office overhead over recovered in costing books	1500
Depreciation shown excess in cost books	950
Interest received on investment	495
Receipt of income from share transfer	120

2. Give the proforma of a cost sheet.
 1. From the following information, prepare an estimate for Job No.150:

Direct materials consumed	Rs.1, 000
Direct wages paid	Rs.2, 000
Factory expenses	60% on wages
Office expenses	20% on factory cost

The tender includes a profit of 20% on selling price.

3. What is a cost sheet? What are its advantages?
4. A factory produces 200 units of a commodity. The cost of production is

	Rs.
Materials	20,000
Wages	10,000
Direct expenses	2,000

Factory overheads are 125% on wages, office overheads are 20% on works cost.

Expected profit is 25% on sales. Calculate the cost per unit.

5. From the following data prepare a reconciliation statement :

	Rs.
Profit as per cost accounts	1, 45,500
Works overheads under-recovered	9,500
Administrative overheads under-recovered	22,750
Selling overheads over-recovered	19,500
Overvaluation of opening stock in cost accounts	15,000
Overvaluation of closing stock in cost accounts	7,500
Interest earned during the year	3,750
Rent received during the year	27,000
Bad debts written off during year	9,000
Preliminary expenses written off during the year	18,000

6. During the year 2008, X Ltd., produced 50,000 units of a product. The following were the expenses:

Stock of raw materials on 1.1.2008	10,000
Stock of raw materials on 31.12.2008	20,000
Purchases	1, 60,000
Direct wages	75,000
Direct expenses	25,000
Factory expenses	37,500
Office expenses	62,500
Selling expenses	25,000

You are required to prepare a Cost sheet showing cost per unit and total cost at each stage.

7. What are the advantages of cost accounting?

8. The following particulars data relate to the manufacture of a standard product during the month of April 2007:

Raw materials consumed Rs. 20,000; Direct wages Rs. 12,000; Machine hours worked during the month 9500; Machine hour rate Rs. 2; Office overhead 20 % on works cost; Units produced 20,000; Selling overhead 50 paise per unit; Units sold 18,000 at Rs.5 each. You are required to prepare (a) a Cost sheet showing cost and profit per unit and (b) the profit for the period.

9. Reconcile the net profit between the cost and financial accounts.

- i. The net profit as per financial accounts Rs. 2,85,000
- ii. The net profit as per cost accounts Rs. 3,88,600
- iii. The following items were included in the financial books:
 - Director's fee (Dr.) Rs. 6,500
 - Bank interest (Cr.) Rs. 300
 - Income tax (Dr.) Rs. 83,500

- iv. Bad debts for Rs. 5,700 were written off in financial books only.
- v. Overheads in cost accounts absorbed were Rs.85,000 while the actuals were Rs.83,200.
- vi. A net loss of Rs. 10,000 on sale of machinery was dealt with in financial accounts.

UNIT II - MATERIAL COST CONTROL:

1. Enumerate the advantages of perpetual inventory system.

1. Material A is used as follows:

Maximum usage in a month 600units

Minimum usage in a moth 400units

Average usage in a month 450units

Lead time: Maximum 6 months. Minimum 2 months

Reorder quantity: 1500Units

Calculate:

i) Reorder level ii) Maximum level iii) Minimum level and iv) Average stock level.

2. From the particulars given below write up the stores ledger card:

2007

January 1	Opening stock	1,000 units at Rs.26 each
5	Purchased	5,00units at Rs. 24.50 each
7	Issued	750 units
10	Purchased	1,500 units at Rs. 24 each
12	Issued	1,100 units
15	Purchased	1,000 units at Rs. 25each
17	Issued	500 units
18	Issued	300 units
25	Purchased	1,500 units at Rs. 26 each
29	Issued	1,500 units

Adopt the FIFO method of issue and ascertain the value of the closing stock.

3. Explain the concept of ABC analysis as a technique of inventory control.

4. Following information relating to a type of material is available:

Annual Demand 2400 units

Unit Price Rs. 2.40

Ordering cost per order Rs.4.00

Storage cost 2 % p.a.

Interest rate 10 % p.a.

Lead Time Half month

Calculate Economic Order Quantity in respect of the particular raw material.

5. From the following particulars prepare the stores ledger account showing the pricing of materials issue, by adopting the FIFO method, with base stock of 400 units, out of opening stock.

2010 December

- 1 Opening stock 1000 units at Rs. 2 each
- 3 Purchased 800 units at Rs.2.10
- 5 Issued 800 units
- 12 Purchased 1600 units at Rs. 2.10 each
- 17 Issued 1500 units
- 20 Purchased 900 units at Rs. 2.50 each
- 25 Issued 600 units

6. The 'Received' side of the Stores ledger account shows the following particulars:

Jan. 1	opening balance	500 units @ Rs. 4
Jan. 5	Received from vendor	200 units @ Rs. 4.25
Jan. 12	Received from vendor	150 units @ Rs. 4.10
Jan. 20	Received from vendor	300 units @ Rs. 4.50
Jan. 25	Received from vendor	400 units @ Rs. 4

Issues of materials were as follows:

Jan. 4 – 200 units; Jan. 10 – 400 units; Jan. 15 – 100 units; Jan. 19 – 100 units;
Jan. 26 – 200 units; Jan. 30 – 250 units.

Issues are to be priced on the principle of 'First-in- First out'. Write out the Stores Ledger Account in respect of the materials for the month of January.

7. From the particulars given below write up the stores ledger card:

2007

January 1	Opening stock	500 units at Rs13 each
5	Purchased	250 units at Rs. 12.25 each
7	Issued	375 units
10	Purchased	750 units at Rs. 12 each
12	Issued	550 units
15	Purchased	500 units at Rs. 12.50 each
17	Issued	250 units
18	Issued	150 units
25	Purchased	750 units at Rs. 13 each
29	Issued	750 units

Adopt the LIFO method of issue and ascertain the value of the closing stock.

8. What is JIT Purchasing? What are its advantages?

9. About 50 items are required every day for a machine. A fixed cost of Rs. 50 per order is incurred for placing an order. The inventory carrying cost per item amounts to Re. 0.02 per day. The lead period is 32 days. Compute :

- i. Economic Ordering Quantity
- ii Re-order Level

UNIT III- LABOUR COST – COMPUTATION AND CONTROL:

1. Write a note on Overtime.
2. Write a note on Idle time.
3. Rate per hour =Rs.1.50 per hour
Time allowed for job =20 hours
Time taken =15 hours
Calculate the total earnings and effective rate of earning of the worker under the Halsey Plan. Also find out the effective rate of earning.
4. Standard output per day of 8 hours is 16 units. Actual output of a worker for 8 hours is 20 units. Rate per hour is Rs. 2.50. Calculate the wages payable to the worker according to the Emerson's Efficiency Plan.
5. Rate per hour = Rs.1 per hour
Time allowed for job = 30 hours
Time taken = 20 hours
Dearness allowance @ 50 paise per hour worked.
Calculate the total earnings of the worker under the Halsey Plan.
6. Standard time = 30 hours
Time taken = 20 hours
Time rate = Rs. 1.50
Calculate the earnings of the worker under Rowan Plan.
7. Compute the earnings of a worker under (i) Halsey plan and (ii) Rowan plan
Information given: Wage rate: Rs. 50 per hour
Dearness Allowance Re. 10 per hour
Standard hours: 80 hours
Actual hours: 50 hours
8. Calculate labour turnover from the following:
Total number of employees at the beginning of the month - 2010
Number of employees who are recruited during the month - 30
Number of employees who left during the month - 50
Total number of employees at the end of the month -1990.
9. From the following data, prepare a statement showing the cost per man day of 8 hours of engaging a particular type of labour.
 - i. Monthly basic salary plus D.A Rs. 1200 p.m.
 - ii. Leave salary 5% of (i)
 - iii. Employer's contribution to P.F. 8% of (i) and (ii)
 - iv. Employer's contribution to E.S.I. 2.5% of (i) and (ii).
 - v. Pro-rata expenditure on amenities to labour Rs.100 p.m.
 - vi. No. of working hours in a month 200
10. From the following particulars calculate the earning of the workers A and B under

Straight Piece rate system and Taylor's Differential piece rate system:

Standard time per unit – 30 seconds.

Normal time rate per hour – Rs. 2.40.

Differential piece rate to be applied:

80% of piece rate when below standard

120% of piece rate at or above standard

In a certain day of 8 hours, Worker A produces 800 units per day and B Produces 1000 units per day.

UNIT IV - ACCOUNTING FOR OVERHEADS:

1. In a factory, there are two service departments P and Q and three production departments A, B and C. In April, the departmental expenses were:

A	Rs. 6, 50,000	P	Rs. 1, 20,000
B	Rs. 6, 00,000	Q	Rs. 1, 00,000
C	Rs. 5, 00,000		

The service department expenses are allotted on a percentage basis as follows:

Service Department	Production Department			Service Department	
	A	B	C	P	Q
P	30%	40%	15%	-	15%
Q	40%	30%	25%	5%	-

Prepare a statement showing the distribution of the two service department expenses to three production departments under the Repeated Distribution method.

2. Calculate Machine hour rate from the following:

- Cost of machine Rs. 19,200
- Estimated scrap value Rs. 1,200
- Average repairs and maintenance charges per month Rs 150
- Standing charges allocated to machine per month Rs. 50
- Effective working life of machine 10,000 hours
- Running time per month 166 hours
- Power used by machine: 5 units per hour @ 19 paise per unit.

3. A company has three production departments and two service departments, and for a period the departmental distribution summary has the following totals:

	Rs.
Production Departments : P1 – Rs. 800; P2 – Rs. 700 and P3 – Rs. 500	2,000
Service departments : S1 – Rs. 234, S2 – Rs. 300	534
Total	<u>2,534</u>

The expenses of the service departments are charged out on a percentage basis as follows:

	P₁	P₂	P₃	S₁	S₂
Service Department S ₁	20%	40%	30%	-	10%
Service Department S ₂	40%	20%	20%	20%	-

Prepare a statement showing the apportionment of expenses of two service departments to production Departments by Repeated Distribution Method.

4. Jeffy Ltd. has three production departments 'A', 'B', 'C' and two services departments 'D' and 'E'. The following figures are extracted from the records of the company.

Particulars	Rs.
Rent and rates	5,000
Indirect wages	1,500
Depreciation of machinery	10,000
General lighting	600
Power	1,500
Sundries	10,000

Following further details are available:

	Total	A	B	C	D	E
Floor space in sq.ft.	10,000	2,000	2,500	3,000	200	500
Light points	60	10	15	20	10	5
Direct wages	10,000	3,000	2,000	3,000	1,500	500
H.P. of machines	150	60	30	50	10	-
Value of machinery(Rs.)	2,50,000	60,000	80,000	1,00,000	5,000	5,000

Apportion the cost to various departments on the most equitable basis by preparing a primary departmental distribution Summary.

5. Elucidate the various bases of apportionment of overheads to departments.
6. Explain any three methods of absorption of overheads.
7. (i) Explain Direct Re-distribution method.
(ii) In a factory the following particulars have been collected for three months' period ended on 31-3-2012.

Department	P₁	P₂	P₃	S₁	S₂
Expenses as per primary distribution summary	8,850	7,165	6,285	4,515	6,010

Apportion the expenses of service department S₂ in proportion of 3:3:4 and those of service department S₁ in the ratio of 3: 1 : 1 to P₁, P₂ and P₃ respectively.

8. How machine hour rate is computed?
9. Distinguish between Allocation, Apportionment and Absorption of overheads.
10. From the following particulars compute the machine hour rate.

	Rs.
Cost of the machine	11,000
Scrap value	680
Repairs charges	1,500

Standing charges for 4 weekly period 40
 Effective working life 10,000 hours.
 Power used: 6 units per hour at 5 paise per unit
 Hours worked in 4 weekly period: 120 hours

UNIT V - CONTRACT COSTING AND PROCESS COSTING:

1. How is WIP displayed in the Balance sheet till a contract is completed?
2. Give the format of the contract account.
3. How will you treat process losses in process costing.
4. Explain the features of process costing.
5. From the following particulars calculate i) The following information relates to a building contract for Rs. 10,00,000.

	1986 (Rs.)
Material issued	3,00,000
Direct wages	2,30,000
Direct expenses	22,000
Indirect expenses	6,000
Work certified	7,50,000
Work uncertified	8,000
Material at site	5,000
Plant issued	14,000
Cash received from contractor	6,00,000

The value of plant at the end of 1986 was Rs. 7,000.

Prepare contract account for the year 1986 taking into consideration such profit for transfer to profit and loss account as you think proper.

6. The following was the expenditure on a contract for Rs.12, 00,000 commenced in 1st April, 2010.

	Rs.
Materials	2,40,000
Wages	3,28,000
Plant	40,000
Overheads	17,200

Cash received on account of the contract up to 31st December was Rs. 4,80,000 being 80% of work certified. The value of materials in hand was Rs.20,000. The plant had undergone 20% depreciation.

Prepare contract account as on 31st December 2010.

7. The following particulars are related to contract undertaken by Ram constructions Ltd.

	Rs.
Material issued to site	3,36,000

Wages paid	3,40,000
Overheads apportioned	40,000
Plant at site	48,000
Work uncertified	20,000
Cash received from contractor Rs. 6, 00,000 (being 80% of work certified).	

Prepare a contract account.

8. A product passes through three distinct processes to completion. These processes are numbered respectively I, II and III. During the week ended 15th Jan 2001, 500 units are produced. The following information is obtained:

	Process I	Process II	Process III
	Rs.	Rs.	Rs.
Direct materials	3,500	1,600	1,500
Direct Labour	2,500	2,000	2,500

The overhead expenses for the period were Rs.1,400 apportioned to the processes on the basis of wages. No work in progress or process stocks existed at the beginning or at the end of the week. Prepare process accounts.

9. In Process B, 75 units of a commodity were transferred from Process A at a cost of Rs. 1,310. The additional expense incurred by the process were 190. 20% of the units entered are normally lost and sold @Rs.4 per unit. The output of the Process was 70 units. Prepare Process B Account and Abnormal Gain Account
10. Samson & Co. produces a product through two processes 'R' and 'S'. The following details pertaining to process 'R' for January 2007 are available.

Inputs	Rs.
Material (500 units)	10,000
Labour	8,000
Indirect expenses	7,000

Normal loss in the process is estimated at 5% of the input which possesses a scrap value of Rs. 31 per unit. Prepare the process account.

Section – D (10 marks each)

Answer in about 400 words each.

UNIT I – COST ACCOUNTING AND UNIT COSTING:

1. Distinguish between Cost accounting and Financial accounting.
2. Discuss the reasons for differences in profit revealed by cost and financial accounts.
3. Explain the steps to be taken while installing a costing system.
4. The following details have been obtained from the cost record of Raja Sekhar Ltd.

Stock of raw materials on 1.12.2010	75,000
Stock of raw materials on 31.12.2010	91,500

Direct wages	52,500
Indirect wages	2,750
Sales	2, 11,000
Work in progress 1.12.2010	28,000
Work in progress 31.12.2010	35,000
Purchases of raw materials	66,000
Factory rent, rates and power	15,000
Depreciation of plant and machinery	3,500
Expenses on purchases	1,500
Carriage outwards	2,500
Advertising	3,500
Office rent and taxes	2,500
Traveler's wages and commission	6,500
Stock of finished goods 1.12.2010	54,000
Stock of finished goods 31.12.2010	31,000

Prepare a Cost sheet giving the maximum possible break up of costs and profit

5. The accounts of a machine manufacturing company disclose the following information for six months ending 31st Dec 1982.

Materials used	1,50,000
Direct wages	1,20,000
Factory overheads	30,000
Administrative expenses	15,000

Prepare a cost sheet for the half year and calculate the price which the company should quote for the manufacture of a machine requiring materials valued at Rs.1250 and expenditure in productive wages Rs. 750 so that the price might yield a profit of 20% on the selling price.

6. The net profit of Prabha Manufacturing Company appeared at Rs.1,28,755 as per financial records for the year ending 31st December 1986. The cost books however showed a net profit of Rs.1,72,400 for the same period. A scrutiny of the figures from both the sets of accounts revealed the following facts.

Particulars	Rs.
Works overheads under-recovered in cost	3,120
Administrative overheads over-recovered in cost	1,700
Depreciation charged in financial accounts	11,200
Depreciation recovered in cost	12,500
Interest on investment not included in cost	8,000
Loss due to obsolescence charged in financial accounts	5,700
Income tax provided in financial accounts	40,300
Bank interest and transfer fee in financial books	750
Stores adjustments (credit in financial books)	475

Loss due to depreciation in values (charged in financial accounts) 6,750

Prepare a statement showing reconciliation between the figures of net profit shown in the financial books.

7. The following particulars have been extracted from the books of a manufacturing Company.

Stock of raw materials on 1.2.2010	47,000
Stock of raw materials on 31.12.2010	50,000
Materials purchased	2,08,000
Office salaries (drawing)	9,600
Counting house salaries	14,000
Carriage inwards	8,200
Carriage outwards	5,100
Cash discount allowed	3,400
Bad debts written off	4,700
Repairs to plant and machinery	10,600
Rent, rates, etc factory	3,000
Rent, rates etc office	1,600
Travelling expenses	3,100
Travelling commission	8,400
Productive wages	1,40,000
Depreciation plant and machinery	7,100
Depreciation office furniture	600
Directors fees	6,000
Gas and water charges - factory	1,500
Gas and water charges - office	3,00
General charges	5,000
Manager's salary	12,000

Out of 48 hours in a week, the time devoted by the manager to the factory to the office was on average 40 hours and 8 hours respectively, throughout the accounting year.

Prepare a cost sheet from the above particulars.

8. The net profit of A. Co. Ltd. appeared at Rs.60,652 as per financial records for the year ending 31st March 2001. The Cost Books, however, showed a net profit of Rs.86, 200 for the same period. A scrutiny of the figures from both the sets of accounts revealed the following facts:

	Rs.
Works overhead under-recovered in costs	1,560
Administrative overheads over-recovered in costs	850
Depreciation charged in financial accounts	5,600
Depreciation recovered in costs	6,250
Interest on investments not included in costs	4,000

Loss due to obsolescence charges in financial accounts	2,850
Income-tax provided in financial accounts	20,150
Bank interest and transfer fee credited in financial books	375
Stores adjustment (credit) in financial books	237
Value of opening stock in :Cost accounts	24,800
:Financial accounts	26,300
Value of closing stock in :Cost accounts	25,000
:Financial accounts	23,000
Interest charged in cost accounts	2,000
Goodwill written off	5,000
Loss on sale of furniture	600

Prepare a statement showing the reconciliation between the figure of net profit as per Cost Accounts and the figure of net profit as shown in the Financial Books.

9. The following is the summary of the trading and profit and loss account of Messrs Alpha Manufacturing Co. Ltd for the year ended 31st march 2002:

	Rs.		Rs.
To material consumed	27,40,000	By sales (1,20,000 units)	6,00,000
To wages	15,10,000	By finished stock(40,000 units)	1,60,000
To factory expenses	8,30,000	By work-in-progress:	
To administration expenses	3,82,400	materials	64,000
To selling& distribution expenses	4,50,000	wages	36,000
To preliminary expenses written off	40,000	factory expenses	20,000
To goodwill written off	20,000	By dividend received	18,000
To net profit	3,25,000		
	<u>62,98,000</u>		<u>62,98,000</u>

The company manufactures a standard unit.

In the cost accounts:

- Factory expenses have been recovered from production at 20% on prime cost
- Administration expenses at Rs.3 per unit on units produced
- Selling and distribution expenses at Rs.4 per units sold

You are required to prepare a statement of cost and profit in cost books of the company and to reconcile the profit disclosed with that shown in the financial accounts.

10. The following data relate to the manufacture of a product during the month of April 2004.

Raw materials consumed	Rs. 40,000
Direct wages	Rs.24,000
Machine hours worked	4,000
Machine hour rate	Rs. 2
Administrative overheads	5% of works cost

Selling overheads	Rs.0.75 per unit
Units produced and sold	2,000
Selling price per unit	Rs.40

You are required to prepare a cost sheet.

UNIT II – MATERIAL COST CONTROL:

1. The 'Received' side of the Stores ledger account shows the following particulars:

Feb. 1	opening balance	250 units @ Rs. 5
6	Received from vendor	100 units @ Rs. 5.50
13	Received from vendor	75 units @ Rs. 5.20
21	Received from vendor	150 units @ Rs. 5.40
25	Received from vendor	200 units @ Rs. 5

Issues of materials were as follows:

Feb. 4 – 100 units; Feb. 10 – 200 units; Feb. 15 – 50 units; Feb. 19 – 50 units;
Feb.28 – 125 units.

Issues are to be priced on the principle of 'Simple Average Price'. Write out the Stores Ledger Account in respect of the materials for the month of February.

2. Prepare a stores ledger account from the following details using LIFO method of pricing the issue of materials:

April 1	Opening balance	10,850 kg. @ Rs.130 per kg.
2	Purchased	20,000 kg. @Rs.134 per kg.
3	Issued	6,750 kg to production
5	Issued	8,500 kg to production
6	Received back	550 kg from production being surplus
7	Purchased	17,550 kg. @Rs.134 per kg.
8	Issued	11,250 kg to production
9	Physical verification revealed a loss of	250 kg
10	Issued	8,950 kg to production
12	Issued	6,300 kg to production
15	purchased	10,000 kg. @Rs.132 per kg

3. Two materials, X and Y are used as follows:

Minimum usage: 50 units per week each
Maximum usage: 150 units per week each
Normal usage: 100 units per week each
Ordering quantities: X – 600 units; and Y – 1,000 units
Delivery period: X – 4 to 6 weeks; Y – 2 to 4 weeks.
Calculate for each material

- (i) Minimum level, (ii) Maximum level (iii) Ordering level and
(iv) Average stock level.

4. Two materials, E and S are used as follows:

Minimum usage: 100 units per week each

Maximum usage: 300 units per week each
 Normal usage: 200 units per week each
 Ordering quantities: E – 1200 units; and S – 2,000 units
 Delivery period: E – 4 to 6 weeks; S – 2 to 4 weeks.
 Maximum Reorder period for emergency purchases E- 2 weeks; S – 3 weeks
 Calculate for each material

(j) Minimum level, (ii) Maximum level (iii) Ordering level and (iv) Danger level.

5. Draw a stores ledger card recording the following transactions under FIFO method.

2010 July

- 1 Opening stock 2,000 units at Rs.10 each
- 5 Received 1,000 units at Rs. 11 each.
- 6 Issued 500 units
- 10 Received 5,000 units at Rs. 12 each
- 12 Received back 50 units out of the issue made on 6th July
- 14 Issued 600 units
- 18 Returned to supplier 100 units out of the goods received on 5th July.
- 19 Received back 100 units out of the issue made on 14th July
- 20 Issued 150 units
- 25 Received 500 units at Rs. 14 each
- 28 Issued 300 units

The stock verification report reveals that there was a shortage of 10 units on 18th July and another shortage of 15 units on 26th July.

6. Laxmi and Co.has purchased and issued material D as under.

2010 May

- 1 Opening stock 2,000 units at Rs.5 each
- 3 Purchased 500 units at Rs. 6 each.
- 5 Purchased 700 units at Rs. 6.50 each
- 10 Issued 800 units
- 11 Purchased 300 units at Rs. 8 each
- 15 Purchased 200 units at Rs. 7 each
- 18 Issued 400 units.
- 25 Purchased 200 units at Rs. 9 each
- 28 Received 150 units at Rs. 8.5 each
- 30 Issued 200 units

Prepare Stores Ledger Account under Weighted Average Pricing method.

7. Describe any three methods of pricing material issues.

8. Describe any three methods of material control.

9. The following particulars were collected from a manufacturing unit for the year 2008:

Monthly demand 1,000 units
 Cost of placing an order Rs.100
 Annual carrying cost per unit Rs. 15

Normal usage	50 units per week
Minimum usage	25 units per week
Maximum usage	75 units per week
Reorder period	4 to 6 weeks

Calculate from the above particulars:

(i) Reorder quantity (ii) Reorder level (iii) Minimum level and Maximum level.

10. From the following particulars, prepare the stores ledger account under FIFO method and LIFO method.

1998 June

1	Stock of materials 200 units at Rs. 2.50 per unit
3	Purchased 300 units at Rs. 3 per unit
7	Purchased 500 units at Rs. 4 per unit
10	Issued 600 units
12	Purchased 400 units at Rs. 4 per unit
18	Issued 500 units
24	Purchased 400 units at Rs. 5 per unit
28	Issued 200 units

UNIT III- LABOUR COST – COMPUTATION AND CONTROL:

1. Calculate the normal and overtime wages payable to a workman from the following data:

Days	Hours worked
Monday	8 hrs
Tuesday	10 hrs
Wednesday	9 hrs
Thursday	11 hrs
Friday	9 hrs
Saturday	4 hrs
Total	51 hrs

Normally working 8 hours per day

Normal rate - Re. 1 per hour

Overtime rate- upto 9 hours in a day at single rate and over 9 hours in a day at double rate ; or upto 48 hours at single rate and over 48 hours at double rate whichever is more beneficial to the workmen.

2. From the following particulars, Calculate the earnings of a worker under:

- Time rate system
 - Piece wage system
 - Halsey plan and
 - Rowan plan
- Wage rate – Rs.2 per hour
Production per hour – 4 units

Dearness Allowance – Rs. 1 per hour
 Standard time fixed – 80 hours
 Actual time taken – 50 hours
 Production – 250 units

3. From the following data, prepare a statement showing the cost per man day of 8 hours of engaging a particular type of labour.

- (i) Monthly salary (Basic plus Dearness Allowance) Rs. 400 p.m.
- (ii) Leave salary 15% of Basic plus Dearness Allowance
- (iii) Employee's contribution to P.F 8% of salary items (i) and (ii)
- (iv) Employer's contribution to E.S.I. 5% of (i) and (ii)
- (v) Pro rata expenditure on amenities to labour Rs. 25 per head per month
- (vi) No. of working hours in a month 200.

4. From the following information, calculate the labour turnover rate under

- (i) Replacement method, (ii) Flux method and (iii) Separation method.
- Number of workers at the beginning of the year 3,800
- Number of workers at the end of the year 4,200

During the year 40 workers leave while 160 workers are discharged. 600 workers are recruited during the year, of these 150 workers are recruited because of leavers and the rest are engaged in accordance with an expansion scheme.

5. From the particulars given below, prepare labour cost per man-day of 8 hours:

- (a) Basic salary Rs. 2 per day
- (b) Dearness Allowance: 25 paise per every point over 100 cost of living index for working class. Current cost of living index is 700 points.
- (c) Leave salary 10% of (a) and (b)
- (d) Employers contribution to provident fund 8% of (a), (b) and (c)
- (e) Employers contribution to state insurance 2.5% of (a), (b) and (c)
- (f) Expenditure on amenities to labour Rs. 20 per head per mensem
- (g) Number of working days in a month 25 days of 8 hours each.

6. What is meant by overtime? How should overtime in cost accounts be treated?

7. What is idle time? Explain the causes leading to idle time and its treatment in cost accounts.

8. Explain the causes and effects of Labour Turnover.

9. Find out the labour cost per hour if a worker is paid Rs. 200 per month in addition to D.A of Rs. 50 per month. He is entitled to bonus @ 10% on wages. Employer's contribution is $8\frac{1}{3}\%$ of wages towards contributory provident fund and 1% towards E.S.I scheme. The employee's contribution towards E.S.I scheme is $\frac{1}{2}\%$. The worker is entitled to leave on full pay for $\frac{1}{20}$ of days worked. The employer maintains a canteen where subsidised tea and lunch are provided to workers and a monthly subsidy of Rs. 1,000 is provided to the canteen. The total number of the employees who take advantage of this canteen is 200. Normal idle time amounts to 20%. The average working days in a month are 25 of 8 hours

each.

10. Calculate the earnings of workers A ,B and C under straight piece rate system and Merricks multiple piece rate system from the following particulars:

Normal rate per hour Rs.1.80

Standard time per unit 1 minute

Output per day is as follows:

Worker A -384 units ; Worker B -450 units ; Worker C -552 units

Working hours per day are 8.

UNIT IV - ACCOUNTING FOR OVERHEADS:

1. Discuss the different methods of apportionment of overheads.
2. Explain the different methods of absorption of overheads.
3. Discuss the importance of Machine Hour Rate as a basis for absorption of factory overheads.
4. The following is the budget of superb engineering works for the year 1985.

Factory over heads Rs. 62,000

Direct labour hours Rs. 1,550,000

Direct labour Cost Rs. 98,000

Machine Hours 5,000

From these figures prepare the overhead absorption rates using the following methods.

(i) Direct Labour Hour (iii) Direct Labour Cost

(ii) Machine hour

Also, calculate the overhead amounts to be charged of Job No. 555 from the following data under the above mentioned methods..

Direct materials Rs. 45; Direct wages Rs. 50; Direct labour hours 40; Machine hours 3

5. Workout the machine hour rate for the following machine, whose scrap value is Nil:

Cost of the machine : Rs. 90,000

Freight and installation charges : Rs. 10,000

Working life : 10 years

Working hours : 2000 per year

Repair charges – 50% of the depreciation

Power -10 units per hour @ 10 paise per unit;Lubricating oil @ Rs. 2 per day of 8 hours;

Consumable stores @ Rs. 10 per day of 8 hours; Wages of operator @ Rs. 4 per day

6. The “Modern Company” is divided into four departments : P₁, P₂, P₃ are producing departments and S₁ is a service department. The actual costs for a period are as follows:

	Rs.		Rs.
Rent	1,000	Supervision	1,500
Repairs to plant	600	Fire insurance in respect of stock	500
Depreciation of plant	450	Power	900
Employer’s liability for	150	Light	120

insurance

The following information is available in respect of the four departments :

	Dept. P₁	Dept. P₂	Dept. P₃	Dept. S₁
Area (sq.metres)	1,500	1,100	900	500
Number of Employees	20	15	10	5
Total wages (Rs.)	6,000	4,000	3,000	2,000
Value of Plant (Rs.)	24,000	18,000	12,000	6,000
Value of Stock (Rs.)	15,000	9,000	6,000	--
H.P. of Plant	24	18	12	6

Apportion the costs to the various departments on the most equitable basis.

7. In a light engineering factory, the following particulars have been collected for the three monthly period ended 31-12-2009.

Particulars	Production departments			Service departments	
	A	B	C	D	E
Direct wages(Rs.)	2000	3000	4000	1000	2000
Direct materials(Rs.)	1000	2000	2000	1500	1500
Staff(Nos)	100	150	150	50	50
Electricity(Kwh)	4000	3000	2000	1000	1000
Lights points	10	16	4	6	4
Assets value (Rs.)	60000	40000	30000	10000	10000
Area occupied (Sq. mts.)	150	250	50	50	50

The expenses for the period were:

Rs.

Motive power - 550	Amenities to staff - 1500
Lighting power - 100	Repairs and maintenance - 3000
Stores overhead- 400	General overhead - 6000
Depreciation - 15000	Rent and taxes - 275

Apportion the expenses of service department E proportionate to direct wages and that to service departments D in the ratio of 5:3:2 to departments A, B and C respectively.

8. M Ltd. has production departments A, B and C and two service departments S1 and S2. Monthly expenses: Rent-5000; Indirect wages- 1500; Lighting-600; Depreciation-10000; Power-1500; Sundries-10000.

Additional information:

Particulars	Production departments	Service
--------------------	-------------------------------	----------------

	departments				
	A	B	C	S1	S2
Floor space	2000	2500	3000	2000	500
Light points	10	15	20	10	5
Wages(Rs.)	3000	2000	3000	1500	500
H.P of machines	60	30	50	10	-
Value of machines(Rs.)	60000	80000	100000	5000	5000
Working hours	6226	4028	4066	-	-

The expenses of S1 and S2 are allotted as follows:

	A	B	C	S1	S2
S1	20%	30%	40%	-	10%
S2	40%	20%	30%	10%	-

Calculate overhead charges recovery per hour.

9. You are supplied with the following information and are required to work out the secondary distribution of service departments overheads under simultaneous equation method.

	Production departments			Service departments	
	A	B	C	P	Q
Total overhead as per					
Primary distribution(Rs.)	7810	12,543	4547	4000	2600

Expenses of service departments P and Q are apportioned as under.

	A	B	C	P	Q
P	30%	40%	20%	-	10%
Q	10%	20%	50%	20%	-

10. P.H. Ltd. is a manufacturing company having three production departments A,B and C and two service departments X and Y. the following is the total of overheads as per primary distribution.

	Rs.
A	4100
B	2700
C	6200
X	4200
Y	5300

A technical assessment for apportionment of service departments is as under:

	A	B	C	X	Y
X	45%	15%	30%	-	10%
Y	60%	35%	-	5%	-

You are required to prepare secondary distribution summary under trial and error method and arrive at the overhead finally charged to each production department.

UNIT V - CONTRACT COSTING AND PROCESS COSTING:

1. The following details are available from the books of accounts of a contractor with respect to a particular construction work for the year ended 31st March-

Particulars	Rs.	Particulars	Rs.
Contract price	91,00,000	Materials returned to stores	14,840
Cash received from the contractee (90% of work certified)	71,90,000	Head office expenses apportioned	2,50,000
Materials sent to site	35,82,600	Cost of Work Uncertified On 31 st March:	3,17,000
Planning and Estimation of cost	3,50,000	Materials at site	85,400
Direct wages paid	32,62,700	Accrued Direct wages	78,120
Cost of plant installed at site	7,00,000	Accrued Direct expenses	9,310
Direct expenses	1,68,000	Value of plant (as revalued)	6,16,000
Establishment expenses	2,03,000		

Required: (i) Prepare the contract account for the year ended 31st March.

(ii) Show the relevant Balance sheet entries.

2. Explain the treatment of profit on incomplete contracts.
3. The following is the information relating to contract no.123.

	Rs.
Contract price	6,00,000
Wages	1,64,000
General expenses	8,600
Raw materials	1,20,000
Plant	20,000

As on date, cash received was Rs.2,40,000 being 80% of work certified. The value of materials remaining at site was Rs.10,000. Depreciate plant by 10%. Prepare contract account showing profit to be credited to P & L A/C.

4. Sakthi Construction Company undertook a contract for constructing a flyover for a total value of 24 lakhs on 1.1.2009. it was estimated that the contract would be completed by 31.7.2010. You are required to prepare a contract account for the year ending 31.12.2009.

	Rs.
Wages	6,00,000
Materials	3,00,000
Materials at site on 31.12.2009	40,000
Special plant	2,00,000
Overheads	1,20,000
Work certified	16,00,000

Depreciation at 10% per annum on plant.

Cash received is 80% of work certified. 8% of value of materials issued and 7% of wages may be taken to have been incurred for the portion of work completed but not yet certified. Overheads are charged as percentage of direct wages.

5. The product of a manufacturing concern passes through three processes. In march 1995, the cost of production was as given below.

	Process A	Process B	Process C
Raw material used(tons)	200	71	164
Cost per ton(Rs.)	100	300	50
Direct wages(Rs.)	8000	3490	2850
Overheads(Rs.)	2520	2400	3820
Sale of scrap per ton(Rs.)	80	60	120

The product of the three processes is dealt with as follows:

Sent to ware house for sale A-25% B-50% C-100%

Sent to next process A-75% B-50%

In each process, 6% of total weight is lost and 8% is scrap. Prepare process cost accounts.

6. A product passes through two processes and then to finished stock. The normal wastage of each processes is as follows:

Process A 3% and process B 5%.

The wastage of A was sold at Rs.5 per unit and that of process at Rs.10 per unit. 20,000 units were introduced into process A at the beginning of January 2007 at cost at Rs.40 per unit. Other expenses were as under:

	Process A	Process B
	Rs.	Rs.
Sundry materials	40,000	60,000
Wages	2,00,000	3,20,000
Manufacturing expenses	30,000	28,500

The output of process A was 19,000 units and that of process B is 18,200 units. Prepare the process account, normal loss account, abnormal loss account and abnormal gain account.

7. The product of a manufacturing concern passes through two processes 'A' and 'B' and then to finished stock. It is ascertained that in each process normally 5% of the total weight is lost and 10% is scrap which from processes A and B realizes Rs.80 per ton and Rs.200 per ton respectively.

The following are the figures relating to both the processes:

	Process A	Process B
Materials in tons	1000	70
Cost of materials per ton(Rs.)	125	200
Wages(Rs.)	28,000	10,000
Manufacturing expenses	8,000	5,250
Output(tons)	830	780

Prepare process cost accounts showing cost per ton of each process. There was no stock or work in process.

8. Suman industries produces a product which passes through two processes I and II and

then to finished stock. It is ascertained that in each process 5% of the total weight put in is lost and 10% is scrap which realizes Rs.5 per ton and Rs.15 per ton respectively in processes I and II. The following details are available.

	Process I	Process II
Materials consumed in tons	200	140
Cost of materials per ton Rs.	200	300
Wages Rs.	20000	15000
Manufacturing expenses Rs.	6000	5000

Prepare process accounts showing cost of the output of each process and cost per ton.

9.A product passes through three processes 'X','Y' and 'Z' to its completion. During September 2006, 5000 units of finished product were produced and the following expenses were incurred:

	Process X (Rs.)	Process Y (Rs.)	Process Z (Rs.)
Material	5000	10000	5000
Direct wages	25000	20000	15000
Direct expenses	2500	3000	5000

Indirect expenses amount Rs.30,000 which are to be apportioned to the processes on the basis of direct wages. Raw materials worth Rs.30,000 were issued to process X. Ignore the question of process stocks and prepare the process accounts, showing cost per unit in each process.

10.The product passes through three distinct processes to completion .They are known as A, B and C. From past experience it is ascertained that loss is incurred in each process as: ProcessA- 2%, ProcessB- 5% and Process C-10%.

In each case the % of loss is computed on the number of units entering the process concerned. The loss of each process possesses a scrap value .The loss of processes A, B and C is sold at Rs.5 per 100 units. The output of each process passes immediately to the next process and the finished units are passed from process C to stock.

	Process A	Process B	Process C
	Rs.	Rs.	Rs.
Materials consumed	6,000	4,000	2,000
Direct Labour	8,000	6,000	3,000
Manufacturing expenses	1,000	1,000	1,000

20,000 units have been issued to process A at a cost of Rs.10, 000. The output of each process has been as under:

Process A 19, 500; Process B- 18,800 Process C 16,000

There is no work in progress in any process. Prepare Process Accounts. Calculations should be made to the nearest rupee.

Semester V

Core – XI (Common Core) Human Resource Management - Code: 18UMCC51

Unit-I: Introduction

Human Resource Management: Meaning - Objectives - Nature and Scope - Importance – Functions - and Problems of HRM - Personnel Management Vs. HRM - Qualities and Qualifications of Human Resource Managers.

Unit-II: Human Resource Planning, Recruitment and Selection

Human Resource Planning: Meaning - Need and Importance - Objective - Problems - Process – Recruitment: Meaning - Factors Influencing Recruitment - Sources of Recruitment - Problems in Recruitment – Selection: Meaning - Factors Affecting Selection Decisions - Selection Policy - Steps in Selection.

Unit-III: Training and Development

Training: Need and Importance - Objective - Types - Steps in Training Programme – Methods of Training - Evaluation of Training Programmes – Development: Meaning - Concept and Essentials of Management Development Programmes.

Unit-IV: Transfer, Promotion & Compensation

Transfer: Objective - Transfer Policy - Promotion: Purpose - Promotion Policy – Demotion - Compensation: Objective – Principles.

Unit-V: Performance Appraisal

Performance Appraisal: Meaning - Need and Importance - Objective - Problems in Performance Appraisal - Factors Influencing Performance Appraisal – Methods of Performance Appraisal.

Text Book: Chitra, Atmaram, Naik, Human Resource Management, Ane Books Pvt., 2016.

Books for Reference:

1. Dr.C.B.Gupta, *Human Resource Management*, Sultan Chand & Sons, New Delhi, 2018.
2. C.P.Memoria, *Personnel Management*, Himalaya Publishing House, 2011

III B.Com V Semester

Core – XI (Common Core) Human Resource Management - Code: 21UMCC51

Question Bank

(For those who joined in June 2021)

Section - A (1 mark)

Choose the correct answer: Unit -I

1. HRM aims to maximize employees as well as organizational
a) **Effectiveness** b) Economy c) Efficiency d) Equality
2. Which one of the following is comes under the nature of HRM?
a) Past force **b) Pervasive force** c) Supervisor oriented c) Money oriented
3. _____ measures the effectiveness of human resource management by finding out the cost and value of human resources to the organisation.
a) Human Resource Audit b) Human Resource Health
c) Human Resource Research **d) Human Resource Accounting**
4. _____ aspects deals with working conditions and amenities in the organization.
a) Personal b) Professional **c) Welfare** d) Industrial relation
5. Which one of the following traditional approach of managing employees?
a) **Personal Management** b) Human Resource Management
c) Functional Management d) Ordinary Management
6. Human Resource Management is concerned with the _____ dimension in management.
a) People b) Money c) Manager d) Management
7. _____ refers to the learning opportunities designed to help employees grow.
a) Training **b) Development** c) Education d) All of the above
8. What is human factor?
a) Micro and macro issues of socioeconomic factor
b) Interrelated Physiological, Psychological and Socio-ethical aspects of humanbeing
c) The entire concept of human behaviour d) None of the above.
9. Job Analysis is a systematic procedure for securing and reporting information defining a _____.
a) Specific job b) specific product c) specific service d) all of these
10. What are the factors responsible for the growth of HRM?
a) Development of scientific management and awakened sense of social responsibility.
b) The problem of how the available human resource could effectively minimize the cost and maximise the production.
c) Technical factors, awakening amongst workers, attitude of the government, cultural and social system
d) All the above

Unit- II

11. _____ is the process of forecasting an organisations future demand for, and supply of the right type of people in the right number.
- a) **Human Resource Planning** b) Recruitments
c) Human Resource Management d) Human Capital Management
12. _____ is defined as the process through which potential job applicants are attracted by the available labor force.
- a) **Recruitment** b) Planning c) Production d) Returns
13. “ Selection process is a managerial decision –making process as to predict which job applicants will be successful if hired” – Who said these words?
- a) Harold Koontz **b) David and Robbins** c) Maslow d) Simon
14. Which one of the following is comes under the internal sources of recruitment?
- a) Placement Agencies b) Campus interviews
c) Walk in interviews **d) Retired Employees**
15. _____ is also called as a screening interview.
- a) Screening Applications b) Employment Tests
c) Preliminary Interview d) Employment Interview
16. Campus interview comes under the _____ sources of recruitment.
- a) Internal b) Traditional **c) Modern** d) None
17. Receiving applications is the _____ step in selection process.
- a) first **b) second** c) third d) Fourth

a) Recruitment b) **Performance Appraisal** c) Selection d) Feedback
49. The Performance Appraisal BARS stand for
a) Behavioral Attitude Ranking System b) **Behavioral Anchored Rating Scales**
c) Behavioral Aptitude Rating System d) Behavioral Aptitude Ranking System
50. Which performance appraisal system first developed by US General Electric Company?
a) Essay b) Critical incidents c) **360 degree appraisal** d) Forced choice

Section B (2 marks)

Answer the questions in about 50 words each:

Unit -I

1. What is Human Resource Management?
2. What do you mean by personal management?
3. What do you mean by operative functions?
4. What is human resource audit?
5. Mention the nature of HRM.
6. Define Human Resource Management.
7. What is pervasive force?
8. Mention the importance of HRM.
9. What do you mean by human resource accounting?
10. What is human resource audit?

Unit -II

11. What is selection?
12. What is human resource planning?
13. Define human resource planning.
14. Mention the importance of human resource planning.
15. What is Recruitment?
16. What are the internal factors affecting recruitment?
17. What do you mean by recruitment policy?
18. Mention the features of human resource planning.
19. What is selection process?
20. Define selection.

Unit -III

21. What is training?
22. What is job training?
23. Define training.
24. Mention the on- the job training method.
25. What do you mean by induction training?
26. What is craft training?
27. What is refresher training?
28. What is vestibule training?
29. What do you mean by apprenticeship training?
30. What is lecture method?

Unit -IV

31. What do you mean by promotion?
32. Mention the types of promotion.
33. What is vertical promotion?
34. What is up gradation promotion?
35. What do you mean by dry promotion?
36. What is productive transfer?
37. What is replacement transfer?
38. What is versatility transfer?
39. What is remedial transfer?
40. What is demotion?

Unit -V

41. What is performance appraisal?
42. Define performance appraisal.
43. What is forced choice method?
44. What do you mean by MBO?
45. What is critical incident method?
46. Mention the traditional method of performance appraisal.
47. What do you mean by paired comparison system?
48. What is check list method?
49. What do you mean by BARS?
50. What is 360 – degree appraisal?

Section C (5 marks)

Answer the questions in about 100 words each: Unit -I

1. Explain the nature of human resource management.
2. Enumerate the importance of human resource management.
3. Differentiate personal management and human resource management.
4. Describe the scope of human resource management.
5. Explain the managerial functions of HRM.
6. What are the problems involved in HRM?
7. Explain the qualities of HR manager.
8. Explain the scope of human resource management.
9. Elucidate the importance of HRM.
10. Enumerate the nature of HRM.

Unit -II

11. Explain the objectives of human resource planning.
12. What are the factors affecting selection process?
13. Explain the importance of Human Resource Planning.
14. What are the objectives of human resource planning?
15. What are the problems involves in the process of HRP?
16. Elucidate the selection Process.
17. Explain the process of human resource planning.
18. Enumerate the factors affecting the outcomes of selection.
19. Explain the objectives of HRP.
20. Factors affecting selection process- Discuss.

Unit -III

21. Explain the types of training.
22. How will you evaluate a training programme?
23. Elucidate the objectives of training.
24. Enumerate the importance of training.
25. Explain the types of training.
26. Enumerate the On- The – Job training.
27. Elucidate the Off- The – Job training.
28. Analyse the evaluation of training programme.
29. Explain the importance of human resource training.
30. Explain the objectives of human resource training.

Unit -IV

31. Explain the objectives of transfer.
32. What is promotion? Explain its types.
33. Explain the objectives of promotion.
34. Enumerate the reasons of transfer.
35. Compare the transfer and promotion.
36. Explain the types of transfer.
37. Enumerate the sound promotion policy.
38. Elucidate the sound transfer policy.
39. Explain the different types of promotion.

40. What is demotion? Analyse the causes of demotion.

Unit -V

41. Enumerate the objectives of performance appraisal.
42. Explain the importance of performance appraisal.
43. Enumerate the limitations of performance appraisal.
44. Analyse the problems of performance appraisal.
45. Evaluate the factors influencing performance appraisal.
46. Explain the objectives of performance appraisal.
47. List out the limitations of performance appraisal.
48. Elucidate the importance of performance appraisal.
49. Give detailed notes on advantages of performance appraisal
50. List out the purpose of Performance appraisal

Section D (10 marks)

Answer the questions in about 400 words each:

Unit -I

1. Analyse the functions of human resource management?
2. Enumerate the objectives of management.
3. Briefly explain the importance of HRM.
4. Explain the managerial and operative functions of HRM.
5. Explain the qualities of HR manager.
6. Elucidate the objectives of human resource management.
7. Differentiate personal management from human resource management.
8. Explain the importance of human resource management.
9. Enumerate the functions of human resource management.
10. State the scope of human resource management

Unit -II

11. Enumerate the sources of recruitment.
12. Analyse the importance and objectives of human resource planning.
13. Enumerate the problems involved in the process of human resource planning in HRM.
14. Enumerate the factors influencing recruitment.
15. Discuss the problems in recruitment.
16. Explain the various steps in selection process.
17. Analyse the influencing factors of recruitment.
18. Elucidate the sources of recruitment.
19. Briefly analyse the internal and external sources of recruitment.
20. Explain the various steps involved in selection.

Unit -III

21. Describe various methods of training.
22. Enumerate the objectives and importance of training.
23. Analyse the steps in training programme.
24. Explain the essentials of training programme.
25. Analyse the various methods of training.

26. Briefly analyse the essentials of Management Development Programme.
27. Enumerate the various training methods.
28. Explain the importance of training programme.
29. Compile the importance of training
30. State and explain the advantages of training

Unit -IV

31. Discuss the purpose and policy of promotion.
32. Enumerate the types and objectives of promotion.
33. Briefly analyse the sound promotion policy.
34. Explain the purpose and types of transfer.
35. Elucidate the sound transfer policy and its types.
36. Analyse about the demotion.
37. Demotion policy and Causes of demotion- Discuss.
38. Analyse the principles of compensation.
39. Briefly discuss about the principles and objectives about compensation.
40. Enumerate about demotion and its causes.

Unit -V

41. Evaluate the methods of performance appraisal.
42. Analyse the traditional and modern methods of performance appraisal.
43. Explain the traditional methods of performance appraisal.
44. Explain the influencing factors of performance appraisal.
45. Analyse the problems of performance appraisal.
46. Enumerate the importance and objectives of performance appraisal.
47. Briefly discuss about the importance of performance appraisal.
48. Elucidate the objectives of performance appraisal.
49. Discuss the advantages of performance appraisal
50. List out and explain about modern methods in performance appraisal.

 a. business b. salary c. house d. capital
50. Rent paid to a partner for using his building for business purposes of the firm is an allowable _____ in the firm.
 a. expenditure b. income c. loss d. profit

Section B (Two marks each)

Answer the following in about 50 words each:

UNIT I

51. Explain the term “clubbing of income”.
52. How the short term capital loss can be set off?
53. How do you tax a Minor’s income?
54. Explain the Benami transaction.
55. Mention the Income which can be clubbed.
56. Is minor child’s income clubbed with the income of parent?
57. What do you mean by Substantial Interest?
58. What do you mean by Speculation business?
59. How the long term capital loss can be set off?
60. What do you mean by Cash Credits?

UNIT II

61. Write any five items under section 80 C of Income Tax Act, 1961.
62. What is Total income?
63. What is Sec 80 D?

64. What do you mean by donation?
65. What deductions are given under Sec 80 CC?
66. Write the tax rate for the Assessment Year 2023-24?
67. What is slab rate?
68. What do you mean by surcharge?
69. What is the rate of Education Cess?
70. What is Gross Total Income?

UNIT III

71. What is Advance payment of tax?
72. What is Return of income?
73. Mention the types of returns.
74. Define Assessment.
75. What is TDS?
76. When do we file the return?
77. What is E- Filing?
78. Write the full form of PAN.
79. When do we submit the belated return?
80. What do you mean by Defective return?

UNIT IV

81. Who is an individual?
82. What is the rate of taxation for an individual?
83. How do you determine the tax liability of an individual?
84. Mention the exempted amount of taxation allowed to an individual.
85. What is the maximum deduction allowed to an individual?
86. Who is a Karta?
87. What is the rate of taxation for H.U.F?
88. Who is a coparcener?
89. Mention the maximum amount of deductions allowed for an H, U.F.
90. How do you determine the taxation of a H.U.F?

UNIT V

91. Who is a partner?
92. What is the rate of taxation for a partnership firm?
93. How do you determine the tax liability of a partnership firm?
94. Mention the exempted amount of taxation for a partnership firm.
95. What is the maximum deduction allowed to an individual?
96. What do you mean by illegal business?
97. What is book profit?
98. When do the partnership firms file the return?
99. What is the amount of remuneration to be allowed by firm as per Income Tax Act?
100. What is the amount of Interest to be allowed by firm as per income tax act:?

Section C (Five marks each)

UNIT I

101. Enumerate the provisions for clubbing of income of spouse and daughter- in –law including for the benefit of the same.
102. Explain the various deemed incomes.
103. How do you set off Capital losses and Business losses?
104. From the following information compute the gross total income of Girish

1. Girish instructed to the bank that interest on his fixed deposit receipt Rs. 50,000 for the year be credited to the saving bank account of Ram Lal, son of his brother.
 2. He gifted a flat to his wife on 1.4.2022. The income from house property (computed) for the previous year was Rs. 1,00,000.
 3. Cash gift received by minor daughter Stuti from a friend of Girish Rs. 40,000
 4. Income of minor married daughter Anita from deposit in a bank Rs. 25,000
 5. Minor son's income from a fixed deposit in a bank Rs. 800
105. What do you understand by aggregation of income?

UNIT II

106. What is tax holiday?
107. What is section 80C of the Income Tax Act?
108. From the following particulars in respect of Mr. Adarsh an author of books, find out the deduction allowable to him u/s 80C for A.Y 2023-24:

	₹
i. Life Insurance Premium (on his own life)	22,000
ii. Sum assured on the above policy	2,00,000
iii. Contribution to unrecognized provident fund	1,000
iv. Contribution to public provident fund	45,000
v. Subscription to National Savings Certificate (VIII issue)	8,000
vi. Accrued interest for one year completed N.S.C (VIII issue)	8,000
vii. Life Insurance premium (on his mother's life policy)	5,000
viii. Repayment of Bank Loan borrowed for construction of these house	21,000

109. Calculate the qualified amount under section 80C for the assessment year 2023-24 from the information given below :

- a) Life Insurance premium paid ₹ 20,000 on his own policy
- b) His own contribution to R.P.F ₹ 5,000 and employer's contribution to R.P.F ₹ 4,000
- c) Repayment of loan taken for construction of residential house ₹ 80,000 out of which ₹ 30,000 is interest.
- d) Purchased NSC of ₹ 10,000.
- e) Contribution to family Benefit fund ₹ 1,000.
- f) Accrued interest on NSC (VII issue) amounted to ₹ 1,000
- g) Life insurance premium paid by him on his brother's life policy was ₹ 5,000.

110. Following are the particulars of income of Shri Amarnath for the previous year 2022-23:

	₹
i. Income from Salary (Gross)	1,60,000
ii. Rental Income from House Property	36,000
iii. Profits of Business	1,20,000

During the previous year he paid ₹ 17,000 as premium on the insurance of the health of himself and wife. During the year the assessee claimed ₹ 1,500 for the illness of his wife, which were duly received from the insurance company. The unmarried disabled sister of Shri Amarnath is dependant wholly on him. Shri Amarnath spent ₹ 19,000 on her treatment and training during the previous year.

Compute the total income of Shri Amarnath for the assessment year 2023- 24

UNIT III

111. What is Self Assesement?
112. What is Reassessment?
113. Mr. D is an employee of a company of a company at Udaipur (Population exceeding 25 lakh). He would receive the following during financial year 2022-2023:

	₹
Salary	9,60,000
Dearness Allowance	2,40,000
Bonus	80,000

Children education allowance ₹ 150 p.m for one child.

Rent- free house- F.R.V ₹ 1,50,000.

His annual contribution to Provident Fund is ₹ 96,000

He has paid Life Insurance Premium of ₹ 12,000

Donation to Prime Minister's National Relief Fund ₹ 10,000

Compute his income from salary liable to deduction of tax at source and the amount of tax to be deducted

114. X's income under the head 'Salary' is completed at ₹ 6, 57,000. The contribution in Recognized Provident fund and Public is ₹ 50,000. He has paid Life Insurance Premium of ₹ 15,000 on a policy of ₹ 60,000 and purchased shares of eligible issue of capital ₹ 5,000. Compute the amount of tax to be deducted at source during the financial year 2022-23. He has informed to the employer that there is loss under the head 'Income from house Property' on account of interest payment in relation to self-occupied house ₹ 30,000.

115. During the financial year 2022-23 find out the tax to be deducted at source in the following cases, if the recipient is an individual and resident in India:

	₹
i. Income from interest on Securities (listed)	6,000
ii. Payment regarding lottery winnings	500
iii. Dividends from domestic company	40,000
iv. Winnings from a horse race	10,000
v. Winnings from another horse race	2,000
vi. Commission to lottery agent	15,000
vii. Insurance Commission	34,000

UNIT IV

116. The following are the incomes received by Mr. Kumar during the financial year 2022-2023

Directors' fees ₹ 2,000

Income from Agricultural Land in Pakistan ₹ 5,000

Ground rent received from Land in Mumbai ₹ 10,000

Interest on Post office savings Bank ₹ 1,250

Bank interest received (Gross) ₹ 15,000

Interest on deposits with Industrial Finance Corporation ₹ 500

Compute his total income.

117. Following are the details available in respect of Mrs. Maya relating to the previous year 2022- 2023

Long term capital gains (indexed) ₹ 2, 20,000

Interest on Bank deposits ₹ 10,000

Dividend from Co-operative Society ₹ 5,000

Life insurance premium paid ₹ 10,000

Contribution to public Provident Fund ₹ 10,000

Calculate tax payable by Mrs. Maya for the Assessment Year 2023-2024.

118. The following details are available in respect of Ashok relating to the previous Year 2022 -2023
Agricultural income ₹ 10,000: Non-agricultural income ₹ 3, 50,000: contribution to public provident fund ₹ 10,000. Compute tax payable by Ashok.

119. The following are the incomes of Mr. K during the year 2022 – 2023

Director's Fees ₹ 2,000
 Income from Agricultural Land in Pakistan ₹ 5,000
 Ground rent received from land in Mumbai ₹ 10,000
 Interest on post office saving bank ₹ 1,250
 Bank interest received (Gross) ₹ 15,000
 Interest on deposits with Industrial Finance Corporation ₹ 500
 Compute his total income.

120. State the rates of income tax for individuals.

UNIT V

121. X,Y and Z are partners of a firm with equal shares. The profit and loss account for the year ended 31.02.2022 shows a net profit of ₹ 2,80,000 after debiting ₹ 7,000 for interest paid to X at 20% ₹ 60,000 for a salary paid to Y and ₹ 44,000 for rent of the business premises paid to Z. Compute the book profit of the firm. The firm fulfils the conditions of section 184.

122. A,B, and C are partners in a firm with equal shares. The Profit & Loss Account of the Firm for the year ended 31st March, 2022 is as under:

	₹		₹
Interest on capital @ 12 %		Gross Profit	9,000
A	8,000	Loss: A	1,25,000
B	7,000	B	1,25,000
C	9,000	C	1,25,000
	24,000		
Salary			
A	1,20,000		
B	1,20,000		
C	1,20,000		
	<u>3,60,000</u>		
	<u>3,84,000</u>		<u>3,84,000</u>

Compute book profit and the total income of the firm for the A.Y. 2023-24. The firm fulfills the conditions of Sec.184.

123. The business income of a firm before charging the following is ₹ 2,20,000:

Remuneration to working partners as per deed	₹ 1,20,000
Brought forward business loss	1,50,000
Unabsorbed depreciation	50,000
Unabsorbed capital expenditure on scientific research	30,000

Compute the total income of the firm

124. A, B and C are partners in a firm in the ratio of 2 : 2 : 1, The following are the particulars of the income of the firm for the financial year on 31st March, 2022 :

1	Profit from business	2,10,000
2	Long-term capital gain	20,000
3	Bank interest	2,000

The business income of the firm is before making the deduction of the following expenses :

(i)	Remuneration payable to A, B and C as per partnership deed	2,16,000
(ii)	Unabsorbed depreciation	30,000
(iii)	Brought forward business loss	1,20,000

Compute the total income of the firm

125. A, B and C are members of an Association of Persons. They share profit or loss equally. During the previous year the income of AOP is ₹ 2, 20,000 and the income of A, B and C is ₹ 40,000, ₹ 1, 90,000 and ₹ 2, 00,000 respectively. Compute tax liability of AOP and A, B and C for the A. Y. 2023-24.

Section D (Ten marks each)

UNIT I

126. Enumerate the provisions for set off and carry forward and carry forward and set off.

127. The following particulars are of Shri Santosh's income for the previous year ending 31st March 2023

1. Income from house property (Loss)	Rs. 6,000
2. Interest on sundry loans (Income)	Rs. 3,000
3. Business income (Cloth)	Rs. 2,90,000
4. Share of loss from firm	Rs. 18,000
5. Speculation loss	Rs. 3,200
6. Dividend (Gross)	Rs. 5,000
7. Capital gains (short-term)	Rs. 1,500
8. Capital gains (long-term)	Rs. 6,000
9. Loss from small scale industry	Rs. 14,000
10. Income from agricultural land	Rs. 4,500

Set-off various losses from income and compute gross total income. Compute the amount which can be carried forward.

128. Mr. B. Rathi submits the following information relevant for the Assessment Year 2023-2024

	Income	Loss
Income from Salary	2,42,000	-
Income and Loss from House Property:		
House A	1,15,000	-
House B	-	3,30,000
Profit and Loss from Business		
Business A	2,28,000	-
Business B	-	-
Business C (Speculative)	11,000	-
Business D (Speculative)	-	23,000
Capital Gains and Loss		
Short-term Capital Gains	6,000	-
Short-term Capital Loss	-	28,000
Long-term Capital Gains	12,500	-
Income and Loss from Other Sources:		

Income from Card Games	13,000	-
Loss from Card Games	-	7,010
Loss on Maintenance of Race Horses	-	6,000
Interest on Securities	4,000	-

Compute the gross total income of Mr. Rathi for the Assessment Year 2023-24.

128. What are the provisions governing the set off of losses?

129. What are the provisions of Income Tax Act regarding the following?

- i) Cash credits ii) Unexplained money, etc. iii) Unexplained expenditure
iv) Amount borrowed or repaid on Hundi v) Unexplained investments.

130. What are the provisions of Income Tax Act regarding the following?

- i) Long term capital losses ii) Short term capital losses iii) Speculation losses
iv) Losses of lottery and card games. v) Loss of house property

UNIT II

131. What are charitable donations? What are the conditions for allowing deduction in respect of these donations?

132. Explain the deduction under section 80 G.

133. Who can claim deduction under sec 80 D and how much?

134. Who are eligible for deduction under section 80 GGA?

135. What re the deduction available for an individual?

UNIT III

136. What are the provision of income tax act in respect of income escaping assessment?

137. Under Section 139, who should sign the Income Tax Returns?

138. What are the payments on which tax is deducted at source?

139. What is meant by the expression 'Best Judgment Assessment'?

140. What do you understand by the term Permanent Account Number?

UNIT IV

141. Compute the tax payable for the A.Y.2023-2024 by an employee of a private company in Mumbai who was provided accommodation in a flat at concessional rate for ten months and in a hotel for two months

- i) Salary ₹ 5,00,000
ii) Bonus ₹ 76,000
iii) Free gas, electricity, water etc (Actual bills paid by company) ₹ 24,000
iv) a) Furnished flat provided to the employee for which actual rent paid by the company per annum ₹ 1,20,000
b) Hotel rent paid by employer (for two months) ₹ 50,000
c) Rent recovered from employee ₹ 10,000
d) Cost of furniture ₹ 1,20,000
v) Subscription to infrastructure bonds ₹ 6,000
vi) Life insurance Premium ₹ 5,000
vii) Subscription to NSC(VIII) Issue ₹ 20,000
viii) Contribution to recognised P.F. ₹ 36,000

142. From the following informations compute the gross tax liability of Mr. Ram for the assessment year 2023-2024:

1) Salary for 12 months	1,44,000
2) Interest on listed securities (gross)	3,000
3) Interest on Govt. Securities	5,000
4) Interest paid on loan taken to purchase Govt. securities	1,000
5) Income from house property (computed)	30,000
6) Longterm capital gain	50,000

7) Long term capital loss	- 10,000
8) Dividends : Income from an Indian Company (Gross)	4,000
Income from Mutual Fund (Gross)	<u>7,000</u>
9) Personal agricultural income	20,000
10) Brought forward agricultural loss	25,000
11) Paid insurance premium 13,000 on a policy of 60,000	
12) Paid donations to National Children's Fund	10,000
13) Contribution to unrecognised provident fund	3,000
14) Deposited in P.P.F.	30,000

143. From the following particulars of Sri Lakshmi Kanth, compute income for the assessment year 2023– 2024 ₹

(i) Gross salary (per annum)	1,80,000
(ii) Loss from self-occupied house	20,000
(iii) Rent from let out house	60,000
(iv) Interest payable on the loan taken for the let out house for the year	45,000
(iv) Interest on bank deposits	16,000
(v) Income from a cloth business	50,000
(vi) Loss from silver speculation	10,000
(vii) Profit from gold speculation	25,000
(viii) Gross winning from lotteries	12,000
(ix) Agricultural Indian income	15,000
(x) Agricultural foreign income	10,000

144. The following are the particulars of income of Smt. Manorama Devi:

- (i) She is getting a salary of ₹ 15,000 p.m. Her employer had provided her with an unfurnished accommodation in Delhi at ₹ 6,000 per annum, the fair rent of which is ₹ 30,000 per annum.
 - (ii) Her investments were:
 - (a) 10% Rajasthan Government Loan ₹ 50,000
 - (b) 10% Govt. Bonds ₹ 24,000
 - (c) ₹ 60,000 in 10% Fixed Deposit Account in a bank for 5 years
 - (iii) She owns a house which had been let at ₹ 2,000 p.m. but its fair rent is ₹ 2,250 p.m. Municipal taxes of ₹ 3,000 were paid by her. She spent ₹ 100 on collection of rent and paid ₹ 3,000 as interest on loan taken for renewing the house.
 - (iv) She earned a profit of ₹ 10,000 from speculation business.
 - (v) She received ₹ 900 as interest on Capital Investment Bonds.
- Smt. Manorama Devi claims that last year's carried forward speculation loss of ₹ 4,000 allowed being set-off this year.

Compute Smt. Manorama Devi's total income for the assessment year 2023-24.

145. Mrs. Raji furnishes the following details related to her salary income. Compute her taxable salary and qualifying amount U/S 88.

Salary ₹ 2,000 p.m. DA – 40% of salary. CCA – ₹ 200 p.m. HRA – ₹ 400 p.m. Rent paid by her ₹ 500 p.m.

Compensation received from previous employer for termination of services ₹ 6,000.

Contribution to PF ₹ 250. The same amount is contributed by her employer. Business tax ₹ 200. She owns a 16 HP car for official and personal use. She lives in Chennai.

UNIT V

146. From the following information compute the total income of the firm and tax payable by it for the assessment year 2023-24 :

	₹
(i) Profit from an industrial undertaking establishment in backward State in Feb.2014	40,000
(ii) Profit from business of Poultry breeding	30,000
(iii) Short-term capital gains	20,000
(iv) Long-term capital gains	40,000
(v) Interest from bank	6,000
(vi) Loss from house property ₹ 10,000 on account of interest on loan taken to construct the property	
(vii) Donation to approved Charitable Institution	15,000

147. The total income of a firm XYZ in which X, Y and Z, the partners share profits and losses in the ratio of 1 : 2 : 3, was as per P. & L. A/c ₹ 1, 31,800 for the previous year 2022-23. In computing the total income of ₹ 1, 31,800, the following have been debited to the P. L. A/c : Salaries of ₹ 1, 30,000 and ₹ 1, 20,000 to X and Y respectively.

Interest on capital calculated @ 20% of ₹ 3,500, ₹ 14,000 and ₹ 10,500 to X, Y and Z respectively. Bonus to Z ₹ 15,000.

Commission of ₹ 5,000, ₹ 12,500 and ₹ 17,500 to X, Y and Z respectively.

Z had borrowed capital for his investment in the firm and had paid interest of ₹ 7,500 separately to the lender.

Compute the total income of the firm and taxable income of the three partners in the firm. All are working partners. The firm fulfills the conditions of Sec. 184.

148. X, Y and Z are three equal partners in a firm of which Z is sleeping partner. The firm's P. & L. Account for the year ended 31st March, 2023 is given below:

Profit and Loss Account for the year ended 31.03.2023			
	₹		₹
Salaries	32,000	Gross Profit	2,32,000
Rent, Rates, etc.	10,000	Discount	8,800
Advertisement	12,000		
Bad Debts Reserve	4,800		
Depreciation	8,000		
Fire Insurance Premium	2,000		
Partner's Salaries :			
X	16,000		
Y	<u>12,000</u>	28,000	
Commission : X	8,000		
Y	<u>4,000</u>	12,000	
Int. on Capital @ 10%			
X	2,000		
Y	4,000		
Z	<u>6,000</u>	12,000	
Net Profit : X	40,000		
Y	40,000		
Z	<u>40,000</u>	<u>1,20,000</u>	

2,40,800

2,40,800

(1) Depreciation was excess debited by ₹ 2,000.

(2) Rent includes rent of Z's godown ₹ 2,400.

Compute book profit and firm's total income for the relevant A.Y. The firm fulfills the conditions of Sec. 184.

149. X, Y and Z are equal partners in a firm with X being a non-working partner. The Profit & Loss Account for the year ended 31st March, 2023 is as under:

	₹		₹
Rent	20,000	Gross Profit	4,05,000
Office Expenses	25,000	Discount	10,000
Salaries	1,00,000	Bad Debts Recovered	2,000
Advertisement	15,000	Bank Interest	3,000
Sales Tax	30,000		
Charity & Donations	5,000		
Bad Debts Reserve	10,000		
Bad Debts	15,000		
Sundry Expenses	20,000		
Dep. Allowed by the Dept.	25,000		
Interest on Capital : X	50,000		
Y	25,000		
Z	15,000		
Commission : X	15,000		
Y	10,000		
Z	5,000		
Net Profit	25,000		
	<u>4,20,000</u>		<u>4,20,000</u>

(i) Salaries include partner's salaries – Y ₹ 15,000 and Z ₹ 10,000.

(ii) Bad Debts admissible by the Department ₹ 12,500.

(iii) Furniture purchased by X for personal use ₹ 10,000 has been debited to sundry expenses.

(iv) Donation includes, donation to a local school ₹ 3,500; to a club ₹ 1,000 and to trade association ₹ 500.

(v) Capital Account of the partners at the beginning of the previous year as on 1.4.2015 were as follows :

X	₹ 2,00,000	
Y	₹ 1,00,000	
Z	₹ 1,00,000	₹ 4,00,000

(vi) Office expenses include bonus to partners :

X	₹ 1,000	
Y	₹ 2,500	
Z	₹ 1,500	₹ 5,000

Compute the profit from business and total income of the firm for relevant assessment year and also calculate the share of each partner in the firm. The firm does not fulfill the conditions of Sec.184.

150. A, B and C are the owners of a firm. They share profits or losses in the ratio of 5: 3: 2. The following particulars of the firm for the year ended 31.03.2023 are furnished :
- (i) The net profit as per P. & L. A/c was ₹ 44,000.
 - (ii) Salaries of ₹ 12,000 paid to B and commission on sales of ₹ 6,000 paid to C were debited to the accounts.
 - (iii) Interest on Capital ₹ 5,000, ₹ 4,000 and ₹ 3,000 paid to A, B and C respectively and interest of ₹ 8,000 paid to A on his loan were charged to the accounts. The rate of interest in both cases is 20%.
 - (iv) Depreciation debited to the accounts amounted to ₹ 10,000 but the admissible amount as per rules was ₹ 14,000.
 - (v) A long-term loan of ₹ 10,000 was taken during the year and expenses incurred for obtaining the loan amounted to ₹ 1,000. This sum was debited to the accounts. Interest on loan ₹ 800 is outstanding and not considered in the books.
 - (vi) The closing stock and opening stock of ₹ 8, 00,000 and ₹ 9, 00,000 respectively had both been valued at 10% under cost, though the market price in each case was higher than the actual cost. Compute the taxable income of the firm for the assessment year 2023-24. The firm fulfills the condition

 - a) 1936**
 - b) 1948
 - c) 1976
 - d) 1965
7. Minimum Wage Act?
 - a) 1936
 - b) 1948**
 - c) 1976
 - d) 1965
8. The maternity leave for women is of months?
 - a) 9 month
 - b) 6 months**
 - c) 10 months
 - d) 5 months
9. The industrial dispute relating to any matter specified in the third schedule of the industrial disputes act may also be referred to Labour court if the dispute is
 - (a) 100 workmen**
 - (b) 200 workmen
 - (c) 300 workmen
 - (d) 400 workmen
10. Wages represents _____ rates of pay.
 - a. Hourly**
 - b. Daily
 - c. Weekly
 - d. Monthly

Unit -IV

1. Law of contract is -
 - (a) not the whole law of agreements nor is it the whole law of obligations.**
 - (b) the whole law of agreements.
 - (c) the whole law of obligations.
 - (d) none of the above.
2. A contract creates -
 - (a) rights in personam.
 - (b) rights in rem.**
 - (c) only rights and no obligations.
 - (d) only obligations and no rights.

3. An agreement is a voidable contract when it is -
 (a) enforceable if certain conditions are fulfilled.
(b) enforceable by law at the option of the aggrieved party.
 (c) enforceable by both the parties. (d) not enforceable at all.
4. An agreement not enforceable by law is said to be -
(a) void. (b) voidable. (c) valid. (d) unenforceable. (e) illegal.
5. A contract - (a) may be void as originally entered into.
(b) may become void subsequent to its formation.
 (c) cannot become void under any circumstances. (d) may become void at the will of a party.
6. The transactions collateral to an illegal agreement are-
 (a) not affected in any manner. **(b) also tainted with illegality.**
 (c) voidable at the option of the plaintiff. (d) void.
7. A contract is -
 (a) a legal obligation. **(b) an agreement plus a legal obligation.**
 (c) consensus ad idem. (d) an agreement plus a legal object.
8. Which of the following result/results in an offer?
 (a) A declaration of intention. (b) An invitation to offer.
(c) An advertisement offering reward to anyone who finds the lost dog of the advertiser.
 (d) An offer made in a joke.
9. A specific offer can be accepted by -
 (a) any person. (b) any friend of offerer.
(c) the person to whom it is made. (d) any friend of offeree.
10. Flaw in capacity to contract may arise from -
 (a) Lack of free consent. (b) Lack of consideration.
(c) Minority. (d) Absence of legal formalities.

Unit -V

1. An agreement enforceable at law is _____.
 a) Agreement b) offer c) offer **d) contract**
2. Contract which is made by words spoken or written or both is called _____ contract
 a) Quasi **b) Express** c) Declaration d) Simple
3. Consideration in a contract _____.
 (a) Present (b) past (c) future **(d) may be past, present and future only**
4. The Sale of Goods Act is of _____.
 (a) **1930** (b) 1929 (c) 1932 (d) 1935
5. An unpaid seller has rights against _____.
 (a) Buyer only b) goods only c) government **d) Both (a) and (b)**
6. An offer must be _____ before it lapses.

- (a) Changed **b) accepted** c) countered d) destroyed
7. In a sale, the property in goods -
(a) is transferred to the buyer. (b) is yet to be transferred to the buyer,
(c) may be transferred at a future time. (d) is transferred when goods are delivered to the buyer.

(a) Possession. (b) ownership
(c) Ownership and possession both. (d) the subject-matter of contract of sale.
10. If a price is not determined by the parties in a contract of sale, the buyer is bound to pay -
(a) the price demanded by the seller. **(b) a reasonable price.**
(c) the price which the buyer thinks is reasonable.
(d) the price to be determined by a third independent person.

Section B (2 marks)

Answer the questions in about 50 words each:

Unit -I

1. Define the term Adult
2. Write notes on Competent Person
3. What is factory?
4. Define the term Young Person
5. Explain about Adolescent
6. What are the Hazardous Process?
7. Write notes on Relay and Shift
8. Explain about child
9. Mention the safety measures according to factories act, 1948
10. Write notes on canteen facility

Unit -II

1. Write notes on partial disablement
2. Who is dependent?
3. Who is employer?
4. Who is employee?
5. Write short notes on wages
6. What is Cost of living index number?
7. What do you mean by appropriate government?
8. Mention about the maternity benefit act
9. Explain the term Establishment

10. Write notes on Medical bonus

Unit -III

1. Define the term Lay off
2. Write notes on Lock out
3. Briefly explain about Retrenchment
4. Explain the term Strike
5. What is Dispute?
6. Write short notes on Compensation
7. Write about Industrial relation code 2020
8. Mention the reasons for strike
9. Why lock out is happening?
10. Mention the reasons for lay off

Unit -IV

1. Define the term contract.
2. Write notes on void agreement
3. What is void contract?
4. Explain about illegal agreement
5. What is express contract?
6. Write short notes on implied contract
7. What is Quasi contract?
8. Give examples of E- commerce contract
9. What do you mean by executed contract?
10. What is executory contract?

Unit -V

1. Define the term sale
2. What is agreement to sell?
3. Explain about hire purchase
4. What is guarantee ?
5. Explain the term warranty
6. What do you mean by unpaid seller?
7. Mentions about buyer
8. What are the repudiation?
9. Write short notes on re-sale
10. What do you mean by actual delivery?

Section - C (5 marks)

Answer the questions in about 100 words each:

Unit -I

1. Explain the following
 - a) Working hours
 - b) Employee
 - c) employer
2. Write notes for the following questions
 - a) Adult
 - b) Adolescent
 - c) Child
3. What do you mean by factory? Write examples
4. Discuss about safety measures provided in the factory
5. Compile the health benefits of factory
6. Give detailed notes about welfare measures according to factories act
7. Discuss the employment of young persons
8. What is occupational safety code? Mention.
9. Portray the factories act 1930
10. State the Advantages of health and safety conditions

Unit -II

1. Write notes on partial disablement
2. Who is dependent? State any 3 examples.
3. Who is employer and employee?
4. Write short notes on wages, salary.
5. What is Cost of living index number?
6. What do you mean by Appropriate government ?
7. Mention about the maternity benefit act
8. Explain the term Establishment
9. Write notes on Medical bonus
10. Who is inspectors?

Unit -III

1. State the difference between layoff and Lockout
2. Elucidate the term Retrenchment and also discuss principles of Retrenchment
3. State the difference between layoff and Retrenchment
4. Compile the compensation methods
5. Compile the Advantages of Layoff
6. List out the Disadvantages of layoff
7. State and explain the Types of lay off

8. Mention the Advantages of Lock out
9. Enumerate the Disadvantages of lock out
10. Recall the types of compensation

Unit -IV

1. What is the objective of contract?
2. What is the nature of law of contract?
3. Describe the essentials of a valid contract
4. Illustrate the difference between express and implied contract
5. Distinguish between executed and executory contract
6. State the difference between valid, void and voidable contracts
7. Write the difference between void agreements and void contracts
8. What is unilateral contract and quasi contract?
9. Compile the types of contract
10. Enumerate the different between express and implied contract

Unit -V

1. Define the term sale and write examples
2. What is agreement to sell?
3. Explain about hire purchase.
4. What are the legal rules for guarantee ?
5. Explain the term warranty
6. What do you mean by unpaid seller?
7. Mentions about any five duties of a buyer.
8. What are the repudiation?
9. Write short notes on re-sale.
10. What do you mean by actual delivery?

Section D (10 marks)

Answer the questions in about 400 words each:

Unit -I

1. Who are certifying surgeons ? What are their duties.
2. Describe the procedure of appointment of Inspector under the Factories Act, 1948. What are their duties and powers?
3. Recall the Annual Leave With Wages Section 79 Factory Act 1948
4. What is meant by Industry? Explain about health related provision of factory act 1948.
5. Discuss the provisions that Facilities the Welfare of Workers.
6. State the restrictions imposed by the factories act, 1948 on the employment and work of women in a factory.
7. State the object of the minimum wages act, 1948?
8. State the Inspectors are appointed for the purposes of the Minimum wages act?
9. Discuss the provisions that health related Facilities for the Welfare of Workers.

10. Give detailed notes on

- i. Adult
- ii. Adolescent
- iii. Competent person
- iv. Hazardous process
- v. Young person

Unit -II

- 1. What are the powers and duties of the inspectors appointed for the purposes of the maternity benefit act, 1961?
- 2. Elucidate the maternity benefit act.
- 3. Discuss the conditions of Continuous Service under Payment of Gratuity Act.
- 4. Enumerate the features of minimum wages act
- 5. State and explain about gratuity act and its features
- 6. Elucidate the maternity benefit act 1961.
- 7. Discuss the conditions of Continuous Service under Payment of Gratuity Act.
- 8. Give detailed notes on workmen compensation act 1923
- 9. State the importance of payment of bonus act 1965.
- 10. Compile the features of minimum wages act 1948.

Unit -III

- 1. State the difference between layoff and Lockout
- 2. Distinguish between condition and warranty
- 3. Elucidate the term Retrenchment and also discuss principles of Retrenchment
- 4. State the difference between layoff and Retrenchment
- 5. State the reasons for industrial disputes and its solutions
- 6. Distinguish between strike and retrenchment
- 7. Give detailed notes on lay off, lock out and retrenchment
- 8. Mention the compensation types
- 9. State and explain the industrial disputes
- 10. What is industrial relations code 2020?

Unit -IV

- 1. Enumerate the legal rules of offer
- 2. Elucidate the legal rules as to acceptance
- 3. What is revocation or lapse of offer?
- 4. Mention the legal rules as for consideration
- 5. What is consideration? Explain the essential of a consideration
- 6. Discuss the types of consideration
- 7. "A contract without consideration is void". Explain
- 8. What are the essential conditions necessary to convert a proposal into a promise?

9. Elucidate the types of contract
10. Enumerate the difference between offer and acceptance

Unit -V

1. State and explain the types of contract
2. Difference between warranty and guarantee
3. State and explain the Difference between sale and agreement to sell
4. Compile the duties of buyers
5. Enumerate the duties and rights of unpaid seller
6. List out and explain the difference between conditions and warranties
7. Sort the Essentials of a contract of sale.
8. Recall the Sale and hire purchase agreement.
9. Examine the implied conditions
10. Mention the implied warranties.

QUESTION BANK

Unit I Introduction to Management Accounting & Ratio Analysis

Section A 1 mark each

Choose the correct answer

1. Management Accounting is also known as _____.
a) Cost accounting b) Financial accounting c) Corporate accounting
d) Decision-making accounting.
2. The chief objective of management accounting is to serve _____.
a) public at large b) employees c) management d) government.
3. The primary objective of _____ ratio is to measure liquidity.
a) current ratio b) gross profit ratio c) net profit ratio d) operating ratio.
4. _____ ratio indicates the number of times the payables rotate in a year.
a) Creditors turnover b) Debtors velocity c) Debtors turnover d) Stock turnover.
5. Debt equity ratio is a measure of
a) short term solvency b) long term solvency
c) profitability d) efficiency
6. _____ ratio indicates the number of times the receivables rotate in a year.
a) Creditors turnover b) Debtors velocity c) Debtors turnover d) Stock turnover.
7. The standard for liquid ratio is
a) 2 : 1 b) 1 : 1 c) 0.5 : 1 d) 0.75 : 1
8. Which of the following is not a ratio?
a) 5 : 4 b) 2/3 c) 4 x 7 d) 8 times
9. Which of the following is not a measure of liquidity?
a) current ratio b) liquid ratio c) absolute ratio d) return on investment

Section B 2 marks each

1. Define management Accounting.
2. List any two limitations of management accounting.
3. Outline the significance of liquidity ratios.
4. How will you calculate : (a) Debt – Equity Ratio (b) Capital gearing Ratio
5. State two differences between cost accounting and management accounting.
6. Ramani Ltd. sells goods on cash as well as on credit. The following particulars are extracted from their books of accounts for 2011.

	Rs.		Rs.
Total sales	1,00,000	Total debtors on 31-12-'10	9,000
Cash sales (included above)	20,000	Bills receivable on 31-12-'10	2,000
Sales returns	7,000	Trade creditors on 31-12-'10	10,000
Provision for doubtful debts	1,000		

Calculate the average collection period.

7. Write any two differences between management accounting and financial accounting.
8. Write any two differences between management accounting and cost accounting.
9. List out the long term solvency ratios.
10. Mention the profitability ratios.

Section C 6 marks each

1. Briefly discuss the advantages of management accounting.
2. Write short notes on the scope of management accounting.
3. Enumerate the objectives of management accounting.
4. What are the functions of management accounting?
5. What are the advantages of ratio analysis?
6. Following are the details relating to the trading activities of Adam Ltd.

Stock Velocity	8 months
Debtors Velocity	3 months
Creditors Velocity	2 months
Gross Profit ratio	25%

Gross profit for the year is Rs.4,00,000; Bills Receivable Rs. 25000 and Bills Payable Rs.10,000. Closing stock of the year is Rs.10,000 more than the opening stock.

Calculate:

- i) Sales ii) Debtors iii) Creditors iv) Closing Stock

7. From the following details calculate:

- | | |
|---------------------------|---------------------|
| a) Gross profit ratio | b) Net profit ratio |
| c) Operating profit ratio | d) Operating ratio |

Trading and Profit & Loss Account

To Cost of sales	16,400	By Sales	21,000
To Gross Profit c/d	<u>3,600</u>	Less: Returns	<u>1,000</u> <u>20,000</u>
	<u>20,000</u>		<u>20,000</u>

To Selling exp.	700	By Income from	
To Financial exp.	200	investments	200
To Interest	100		
To Net Profit	<u>1,500</u>		
	<u>3,800</u>		<u>3800</u>

8. The following is the Balance sheet of a company as on 31st March.

Liabilities

Assets

	Rs		Rs
Share capital	2,00,000	Land and Buildings	1,40,000
P & L A/C	30,000	Plant and Machinery	3,50,000
General Reserve	40,000	Stock	2,00,000
12% Debentures	4,20,000	Sundry Debtors	1,00,000
Sundry Creditors	1,00,000	Bills Receivable	10,000
Bills payable	<u>50,000</u>	Cash at Bank	<u>40,000</u>
	<u>8,40,000</u>		<u>8,40,000</u>

Calculate:

- 1) Current ratio 2) Quick ratio 3) Debt-equity ratio
4) Proprietary ratio 5) Capital gearing ratio

9. From the following particulars pertaining to assets and liabilities of a company, calculate:

- (i) debt- equity ratio (ii) proprietary ratio (iii) capital gearing ratio
(iv) debt to total assets ratio

Liabilities	Rs	Assets	Rs
Equity Share Capital	2,50,000	Building	3,00,000
8% Preference Capital	1,00,000	Machinery	2,50,000
9% Debentures	2,00,000	Stock	1,20,000
Reserves	1,50,000	Debtors	1,00,000
Creditors	75,000	Cash at bank	27,500
Bank Overdraft	25,000	Prepaid Expenses	2,500
	<u>8,00,000</u>		<u>8,00,000</u>
	=====		=====

10. The following is the balance sheet of Antony & Co.

Liabilities	Rs.	Assets	Rs.
Share Capital	30,000	Fixed assets	10,000
Creditors	8,000	Cash	7,000
Bills Payable	2,000	Bills Receivable	2,000
Outstanding expense	3,500	Stock	17,500
		Prepaid expenses	500
	<u>43,500</u>		<u>43,500</u>

Calculate: a) Current Ratio b) Liquid Ratio

11. Bring out the importance of ratio analysis.

Section D 12 marks each

- Distinguish between Financial accounting and Management Accounting.
- Distinguish between Cost accounting and Management Accounting.
- Discuss the need and importance of Management Accounting.
- Discuss the limitations of ratio analysis.
- The following is the Balance sheet of a company as on 31st March.

Liabilities	Rs	Assets	Rs
Share capital	2,00,000	Land and Buildings	1,40,000
P & L A/C	30,000	Plant and Machinery	3,50,000
General Reserve	40,000	Stock	2,00,000
12% Debentures	4,20,000	Sundry Debtors	1,00,000
Sundry Creditors	1,00,000	Bills Receivable	10,000
Bills payable	<u>50,000</u>	Cash at Bank	<u>40,000</u>

8,40,000

8,40,000

Calculate:

- 1) Current ratio 2) Quick ratio 3) Debt-equity ratio
4) Proprietary ratio 5) Capital gearing ratio

6. From the following details, prepare a balance sheet:

- i) Stock Turnover Ratio - 6.
ii) Debtors velocity - 2 months
iii) Gross profit ratio - 20%
iv) Creditors velocity - 73 days
v) Capital turnover ratio (on cost of sales) - 2
vi) Fixed assets turnover ratio (on cost of sales) - 4

The gross profit was Rs. 60,000; Reserves and surplus amount to Rs. 20,000 ;
Closing stock was Rs. 5,000 in excess of opening stock.

7. From the following information, you are required to prepare the Trading, Profit & Loss

Account and Balance Sheet:

Net Current Assets	Rs.1,00,000
Paid up Capital	Rs. 3,00,000
Current Ratio	1.8 : 1
Liquid Ratio	1.35 : 1
Fixed Assets to shareholders equity	80%
Gross Profit Ratio	25%
Net Profit to paid up capital	20%
Stock Turnover Ratio	5
Debt Collection Period	36.5 days

8. Calculate liquidity ratios from the following information.

	Rs
Cash	5,000
Deposits in bank	7,000
Stock	8,000
Prepaid expenses	2,000
Debtors	5000
Bills receivable	3,000
Accrued income	15,000
Marketable securities (short term)	10,000
Advances given	5,000
Creditors	4,000
Bills payable	3,000
Bank overdraft	5,000
Outstanding expenses	6,000

Income received in advance	7,000
Provision for tax	10,000

9. Following are the details relating to the trading activities of Adam Ltd.

Stock Velocity	8 months
Debtors Velocity	3 months
Creditors Velocity	2 months
Gross Profit ratio	25%

Gross profit for the year is Rs.4,00,000; Bills Receivable Rs. 25000 and Bills Payable Rs.10,000. Closing stock of the year is Rs.10,000 more than the opening stock.

Calculate:

i) Sales ii) Debtors iii) Creditors iv) Closing Stock

Unit II Fund Flow Statement & Cash Flow Statement

Section A 1 mark each

Choose the correct answer

- Cash credit is an example of _____.
a) current asset b) current liability c) fixed asset d) long term liability
- An increase in current asset results in:
a) increase of liability b) decrease of working capital
c) increase of working capital d) No change in funds
- Redemption of preference shares results in _____ of funds.
a) inflow b) outflow c) transition d) exchange
- The term 'flow' means _____.
a) movement b) dropping c) falling d) going
- The difference of total current assets and the total current liabilities of a year is its
a) cost of capital b) working capital c) capital gain d) capital loss
- Pick the odd one out:
a) Sale of fixed asset b) Issue of shares c) Borrowing long term loans
d) Redemption of debentures
- Which of the following is not a source of fund?
a) Issue of shares for cash b) Sale of fixed asset for cash
c) Funds from operation d) Conversion of shares into stock
- According to the gross concept, the term fund refers to _____.
a) current assets b) fixed assets c) working capital d) cash
- The net inflow of working capital due to normal business activity is called _____.
a) CFO b) FFO c) CFS d) FFS
- Short term investments are _____.
a) current assets b) fixed assets c) intangible assets d) fictitious assets

Section B 2 marks each

- What is 'flow of funds'?
- List the advantages of fund flow analysis.

3. State any two limitations of fund flow analysis.
4. What is cash flow analysis?
5. Write any two advantages of cash flow analysis.
6. State any two limitations of cash flow analysis?
7. Name any four non-operating expenses debited to P/L A/C.
8. Name any four non-operating incomes credited to P/L A/C.
9. List some of the sources of funds.
10. State some of the uses of funds.

Section C 6 marks each

1. What is 'flow of funds'? What are the advantages of fund flow analysis?
2. What are the limitations of fund flow analysis?
3. Discuss the advantages of cash flow analysis.
4. What are the limitations of cash flow analysis?
5. The following are the summarised Balance sheets of Simon Ltd., as at 31st Dec.2013 and 31st Dec. 2014:

Liabilities	2013	2014	Assets	2013	2014
	(Rs.)	(Rs.)		(Rs.)	(Rs.)
Equity	1,00,000	1,00,000	Fixed asset	95,000	1,20,000
Preference shares	--	50,000	Investments	--	10,000
General Reserve	30,000	40,000	Stock	40,000	60,000
P&L A/C	25,000	70,000	Debtors	20,000	40,000
Creditors	20,000	10,000	B/R	5,000	2,000
Overdraft	3,000	---	Prepaid exp.	5,000	8,000
Bills Payable	---	2,000	Cash	20,000	10,000
Taxation provision	7,000	12,000	Advances	10,000	40,000
Proposed dividend	10,000	16,000			
	-----	-----		-----	-----
	1,95,000	3,00,000		1,95,000	3,00,000
	=====	=====		=====	=====

Prepare a statement showing changes in working capital.

6. From the following balance calculate funds from operations.

Liabilities	2005	2006	Assets	2005	2006
	Rs	Rs		Rs	Rs
Share capital	10000	15000	Buildings	10000	9500
Reserve	3000	3000	plant	8000	9000
P & L a/c	2000	2200	Stocks	7000	12000
6% Debentures	8000	8000	Investments	-	1000
Creditors	6500	5800	Good will	2000	1000
Provision for tax	500	1000	Debtors	3000	2500
	-----	-----		-----	-----
	30000	35000		30000	35000

Additional information:-

- i) During the year dividend of Rs 1500 was paid.
- ii) Depreciation written off on plant Rs 600.

iii) Profit on sale of plant Rs 200.

7. Calculate funds from operation from the following P&L A/C as on 31- 3-2014.

Profit & Loss A/c			
Particulars	Rs.	Particulars	Rs.
To Rent	10,000	By Gross Profit	9,86,000
To Salary	25,000		
To Depreciation	3,000		
To Discount on issue of shares	10,000		
To Goodwill written off	5,000		
To Preliminary exp. written off	6,000		
To Net Profit	<u>9,27,000</u>		
	<u>9,86,000</u>		<u>9,86,000</u>

8. From the following balance sheets of X Ltd., you are required to prepare a schedule of changes in working capital and a statement of flow of fund.

Particulars	31-12-2011 (Rs.)	31-12-2012(Rs.)
Assets		
Land and Building	50,000	50,000
Plant	24,000	34,000
Stock	9,000	7,000
Debtors	16,500	19,500
Cash at bank	<u>4,000</u>	<u>7,000</u>
Total	<u>1,03,500</u>	<u>1,19,500</u>
Liabilities		
Capital	80,000	85,000
Profit & Loss	14,500	24,500
Creditors	9,000	5,000
Mortgage	<u>---</u>	<u>5,000</u>
Total	<u>1,03,500</u>	<u>1,19,500</u>

9. Compute cash from operations from the following figures. Profit for the year 2006 is a sum of Rs.10,000 after providing for depreciation of Rs. 2,000.

Particulars	2005	2006
-------------	------	------

	(Rs.)	(Rs.)
Sundry Debtors	10,000	11,000
Provision for doubtful debts	1,000	1,200
Bills Receivable	4,000	3,000
Sundry Creditors	8,000	9,000
Inventories	5,000	8,000
Short term investments	10,000	12,000

10. From the statement of financial position of Mr. X is given below.

Liabilities	1.1.06	31.12.06	Assets	1.1.06	31.12.06
Creditors	29,000	25,000	Cash	40,000	30,000
Capital	7,39,000	6,15,000	stocks	8,000	13,000
			Debtors	20,000	17,000
			Fixed Assets	7,00,000	5,80,000
	<u>7,68,000</u>	<u>6,40,000</u>		<u>7,68,000</u>	<u>6,40,000</u>

There were no drawings and no purchase or sale of fixed assets during the year.

Prepare a Statement of Cash Flow.

11. Prepare a schedule showing changes in the working capital from the following information:

Assets	2007 (Rs)	2008 (Rs)
Cash in hand	1000	1000
Accrued Income	6000	5000
Accounts Receivable	13000	15000
Prepaid expenses	1000	3000
Short term advances	31000	30000
Goodwill	7000	10000
Long term investments	9000	12000
Liabilities		
Creditors	2000	1000
Short term loans	1500	5500
Outstanding expenses	2500	4500
Bank Overdraft	6000	3000
Provision for taxation	10000	15000
Proposed dividend	5000	4000
Debentures	90000	83000
Preference shares	60000	80000

12. Bring out the differences between funds flow statement and income statement.

13. How will you calculate funds from operation?

14. The balance sheets of Kanu Co. Ltd. at the end of the 1983 and 1984 are given below:

Liabilities	1983 Rs.	1984 Rs.	Assets	1983 Rs.	1984 Rs.
Accounts payable			Cash	20,000	10,000
Notes payable	20,000	25,000	Marketable securities	10,000	--
Other current liabilities	20,000	5,000	Inventory	60,000	1,00,000
6% Bonds	10,000	15,000	Receivables	30,000	40,000
Common Stock	--	30,000	Gross block	1,00,000	1,40,000
Retained earnings	50,000	50,000	Less: Accum depreciation	(40,000)	(55,000)
	80,000	1,10,000			
	1,80,000	2,35,000		1,80,000	2,35,000

You are required to prepare statement of changes in working capital.

15. Calculate funds from operations from the following P&L A/c.

Profit and Loss Account

Particulars	Rs.	Particulars	Rs.
To Expenses Paid	3,00,000	By Gross Profit	4,50,000
To Depreciation	70,000	By Gain on sale of land	60,000
To Loss of sale of machine	4,000		
To Discount	200		
To Goodwill	20,000		
To Net Profit	1,15,800		
	5,10,000		5,10,000

16. Differentiate between funds flow analysis and cash flow analysis.

17. Give the format of cash flow statement.

18. From the following information calculate cash flows from operating activities.

Particulars	Rs
Cash sales	50,000
Credit sales	1,50,000
Collections from debtors	1,40,000
Cash purchases	30,000
Credit Purchases	60,000
Payment to creditors	50,000
Wages paid	5,000
Salaries paid	10,000
Stationary expenses paid	2,000
Depreciation on buildings	5,000
Goodwill written off	10,000
Income tax paid	5,000

Section D 12 marks each

Answer the following in about 400 words each

1. Discuss the procedure for preparation of Fund Flow Statement.
2. Elaborate the merits and demerits of fund flow analysis.
3. Describe the merits and demerits of cash flow analysis.
4. Balance sheet of M/S Black and white as on 1-1-2014 and 31-12-2014 were as follows:

Liabilities	1-1-14	31-12-14	Assets	1-1-14	31-12-14
Creditors	40,000	44,000	Cash	10,000	7,000
Mr. Whites Loan	25,000	----	Debtors	30,000	50,000
Loan from. Bank	40,000	50,000	Stock	35,000	25,000
Capital	125000	153,000	Machinery	80,000	55,000
			Land	40,000	50,000
			Building	<u>35,000</u>	<u>60,000</u>
	<u>2,30,000</u>	<u>2,47,000</u>		<u>2,30,000</u>	<u>2,47,000</u>

During the year machine costing Rs. 10,000 (accumulated depreciation Rs 3000) was sold for Rs 5,000. The provision for depreciation against machinery as on 1.1.2014 was Rs25,000 and on 31.12.2014, Rs 40,000. Net profit for the year 2014 amounted to Rs 45,000.

You are required to prepare Fund Flow Statement.

5. Prepare the Statement of Changes in Working Capital and a Statement of Sources and Application of funds from the following data:

Balance Sheets

Liabilities	2010 Rs.	2011 Rs.	Assets	2010 Rs.	2011 Rs.
Equity capital	5,000	5,300	Cash	2,000	2,500
Long-term debt	1,400	1,300	Debtors	2,400	2,700
Profit & Loss a/c	2,800	3,700	Stock	3,100	3,200
Provision for depn.	2,100	2,500	Other current assets	800	700
Creditors	2,000	2,100	Fixed assets	5,000	5,800
	<u>13,300</u>	<u>14,900</u>		<u>13,300</u>	<u>14,900</u>

Additional Information:

- (i) Fixed assets Rs.1,200 were purchased for cash.
 - (ii) Fixed assets (cost RS.400 –Depreciation Rs.150) were sold at book value.
 - (iii) Depreciation for 1997 Rs.550 was debited to P&L a/c.
6. From the following balance sheets of XYZ Ltd., prepare a funds flow statement.

Liabilities	2005 Rs	2006 Rs	Assets	2005 Rs	2006 Rs
Equity Share capital	3,00,000	4,00,000	Goodwill	1,15,000	90,000
Pref. share capital			Buildings	2,00,000	1,70,000
General reserve	1,50,000	1,00,000	Plant	80,000	2,00,000
P&L A / c	40,000	70,000	Debtors	1,60,000	2,00,000

Proposed dividend	30,000	48,000			
Creditors			Stock	77,000	1,09,000
Bills payable	42,000	50,000	Bills receivable	20,000	30,000
Provision for taxation	55,000	83,000	Cash in hand	15,000	10,000
	20,000	16,000	Prel. Expenses	10,000	8,000
	40,000	50,000			
	6,77,000	8,17,000		6,77,000	8,17,000

Additional Information:

- 1) Depreciation: Plant: Rs. 10,000 and buildings Rs. 20,000 charged in 2006.
 - 2) An interim dividend of Rs. 20,000 has been paid in 2006.
 - 3) Income tax Rs. 35,000 was paid during 2006.
7. Explain the procedure for preparation of cash flow statement as per As 3 (revised)
8. The comparative Balance Sheet of Thiru Raj Sekhar for the two years were as follows:

Liabilities	1987 Rs	1988 Rs
Loan from wife	--	20,000
Bills payable	12,000	8,000
Creditors	25,000	52,000
Bank overdraft	43,000	60,000
Capital	66,000	34,000
	1,46,000	1,74,000
Assets:		
Cash	11,000	15,000
Debtors	40,000	35,000
Stock	25,000	30,000
Machinery	20,000	14,000
Buildings	50,000	80,000
	1,46,000	1,74,000

Additional information:

- i) Net loss for the year amounted to Rs. 13,000
- ii) During the year a machine costing Rs. 5,000 (accumulated depreciation Rs. 2,000) was sold for Rs. 2,500.
- iii) The provision for depreciation against machinery as on 31. 12. 87 was Rs. 6,000 and on 31. 12. 88 Rs. 7,000.

From the above information prepare cash flow statement.

9. The following shows the balance in condensed form of Pavitra Ltd. at the beginning as well as at the end of the year 1987:

Liabilities	1.1.87	31.12.87	Assets	1.1.87	31.12.87
Creditors	52,000	47,500	Cash & Bank	45,000	45,000
Outstanding exp	6,000	6,500	Debtors	38,500	26,500
8% Debentures	45,000	35,000	Investment	50,000	32,000
Depreciation fund	20,000	22,000	Prepaid Exp	500	1,000

Reserve for contingencies	30,000	30,000	Stock	41,000	53,000
P&L A/c	8,000	11,500	Land & Buildings	77,000	77,000
Share capital	1,15,000	1,15,000	Machinery	24,000	33,000
	2,76,000	2,67,500		2,76,000	2,67,500

The following information is also available:

- i) 10% dividend was paid in cash
- ii) Machinery costing Rs. 15,000 was purchased but old machinery costing Rs. 6,000 was sold for Rs. 2,000 on which accumulated depreciation was Rs. 3,000.
- iii) Rs. 10,000, 8% debentures were redeemed by purchase from open market at Rs. 96 for a debenture of Rs. 100.
- iv) Investments were sold at book value.

Prepare a cash flow statement.

UNIT III - MARGINAL COSTING

Section A 1 mark each

1. _____ is the difference between selling price and variable cost.
a) Profit b) Contribution c) Margin of safety d) P/V ratio
2. ----- is the difference between actual sales and breakeven sales.
a) Margin of Safety b) Contribution c) P/V ratio d) M/S
3. _____ expresses the relationship between contribution and sales.
a) M/S b) BEP c) P/V ratio d) GPR
4. Fixed cost + Profit = -----
a) Variable cost b) Contribution c) Selling price d) Marginal cost
5. CVP analysis is otherwise known as -----
a) Cost Variance Analysis b) Contribution Variance Analysis c) Cost Variance Planning Analysis d) Cost Volume Profit Analysis
6. At Break Even point, profit will be
a) High b) Low c) Zero d) Moderate
7. Sales Rs. 1,00,000; variable cost Rs.60,000. P/V ratio is equal to _____
a) 40% b) 60% c) 10% d) 100%
8. P/V ratio can be improved by _____.
a) increasing variable cost b) increasing fixed cost c) decreasing selling price
d) decreasing variable cost.
9. _____ is otherwise known as marginal cost.
a) Material cost b) fixed cost c) variable cost d) period cost
10. At ----- total revenue is equal to total cost
a) M/S b) BEP c) BUP d) ACP

Section B 2 marks each

1. What is marginal costing?
2. Mention any two features of marginal costing?
3. How is marginal costing classified?

4. Write any two merits of marginal costing.
5. Write any two demerits of marginal costing.
6. State the difference between absorption costing and marginal costing.
7. What are the limitations of Absorption Costing?
8. What is Contribution?
9. How will you calculate PV Ratio?
10. What is Break Even Analysis?

Section C 6 marks each

1. The following information is obtained from "A" Company Limited in a certain year.
 Sales – Rs. 2,00,000
 Variable cost – Rs. 1,20,000
 Fixed Cost – Rs. 60,000.
 Find the P/V Ratio, BEP and Margin of safety.
2. The sale of a product was 48,000 units in a year. The sale price was Rs. 20 per unit and the variable cost Rs. 12 per unit. The total fixed expenses amounted to Rs. 8,00,000. The management proposes to reduce the sale price by Rs. 2 per unit.
 Ascertain the present and revised P/V ratio. How many units should be sold at the revised price to maintain the existing profit?
3. The sales of a company are Rs. 5,00,000. Variable costs are Rs. 3,00,000 and fixed costs are Rs. 1,00,000. Calculate:
 - i) Profit volume ratio
 - ii) Break even profit
 - iii) Profit on sales of Rs. 6,00,000
 - iv) Sales needed to earn a profit of Rs. 1,20,000.
4. A T.V manufacturer incurs Rs.625 as cost to make a part and the same is available in the market for Rs. 575.

	Rs.
Materials	275
Labour	175
Variable expenses	50
Fixed expenses	<u>125</u>
	<u>625</u>

Should he make or buy the part?

5. You are given the following data for the year 2012 of a company.

Variable cost	-	Rs. 7,00,000
Fixed Cost	-	Rs. 4,00,000
Net Profit	-	Rs. 2,00,000
Sales	-	Rs.11,00,000

 Find :
 - i) BEP
 - ii) Profit when sales are Rs. 12,00,000
 - iii) Sales required to earn a profit of Rs. 2,00,000.
6. What is CVP Analysis? State the assumptions underlying it.

7. From the following particulars calculate (i) Contribution (ii) P/V ratio (iii) B.E.P in units and in Rupees (iv) What is the selling price per unit if the selling price is brought down to 25,000 units?

	Rs.
Fixed Expenses	1, 50,000
Variable cost per unit	10
Selling price per unit	15

8. An analysis of costs of Sullivan Manufacturing Company led to the following information:

Cost Elements	Variable Costs (Percentage of Sales)	Fixed Costs (Rs)
Direct Materials	32.8	
Direct Labour	28.4	
Factory Overheads	12.6	1,89,900
Distribution Expenses	4.1	58,400
General and Administrative Expenses	1.1	66,700

Budgeted sales for the next year are Rs. 18, 50,000.

You are required to determine:

- The break-even sales volume,
 - The profit at the budgeted sales volume,
 - The profit, if actual sales drop by 10 percent
9. A company producing 40,000 units of product X, working at 80% of capacity receives an order from foreign dealer for 10,000 units at Rs. 50 per unit although the local price is Rs. 90 per unit. The present cost structure is given as under:

	Rs.
Materials	20
Labour – Skilled (Fixed)	10
Unskilled	10
Variable overheads	10
Fixed overheads	20
	<hr/>
	<u>70 per unit</u>

- Advise the management whether to accept the order or not.
 - If there is temporary fall in demand, what should be the minimum price to be charged?
10. From the following data, calculate:

- P/ V ratio
 - Profit when sales are Rs.20,000
 - New Break-even point if selling price is reduced by 20%
- | | |
|----------------|-----------|
| Fixed expenses | Rs. 4,000 |
|----------------|-----------|

Break-even point

Rs.10,000

Section D 12 marks each

1. A company producing 40,000 units of product X, working at 80% of capacity receives an order from foreign dealer for 10,000 units at Rs. 50 per unit although the local price is Rs. 90 per unit. The present cost structure is given as under:

	Rs.
Materials	20
Labour – Skilled (Fixed)	10
Unskilled	10
Variable overheads	10
Fixed overheads	20
	<hr/>
	70 per unit

- i. Advise the management whether to accept the order or not.
ii. If there is temporary fall in demand, what should be the minimum price to be charged?
2. A Ltd. has a plant capacity adequate to provide 39,600 hours of machine use. The plant can produce all A type tools or all B type tools or a mixture of the two types. The following information is relevant.
- | Per Type | A | B |
|---------------------------|----|----|
| Selling price (Rs.) | 20 | 30 |
| Variable cost (Rs.) | 17 | 24 |
| Hours required to produce | 3 | 4 |
- Market conditions are such that not more than 4,000 A type tools and 3,000 B type tools can be sold in a year. Annual fixed costs are Rs.19,800.
Compute the product mix that will maximize the net income to the company and find that maximum net income.
3. What is CVP Analysis? State the assumptions underlying it.
4. A.G.Ltd., furnishes you the following information related to the year 2006.

	First half of the year	Second half of the year
	Rs.	Rs.
Sales	45,000	50,000
Total cost	40,000	43,000

Assuming that there is no change in prices and variable cost and that the fixed expenses are incurred equally in the two half year period, calculate for the year 2006.

- i. The profit volume ratio.

- ii. Fixed cost.
- iii. Break even sales and
- iv. Margin of Safety ratio.

5. Assuming that the cost structure and selling price remain the same in Periods I and II find out:

- i. Profit Volume Ratio
- ii. Fixed Cost
- iii. Break Even Point for sales
- iv. Profit when sales are of Rs.1, 00,000
- v. Sales required to earn a profit of Rs.20, 000
- vi. Margin of safety at a profit of Rs.15, 000
- vii. Variable cost in Period II

Period	Sales (Rs.)	Profit (Rs.)
I	1, 20,000	9,000
II	1, 40,000	13,000

6. Two businesses, Y Ltd. and Z Ltd. sell the same type of product in the same type of market. Their budgeted Profit and Loss accounts for the coming year are as follows:

	Y Ltd. Rs.	Z Ltd. Rs.
Sales	1,50,000	1,50,000
Less: Variable cost	1,20,000	1,00,000
Contribution	30,000	50,000
Less: Fixed cost	15,000	35,000
Budgeted profit	15,000	15,000

You are required to :

- i. Calculate the break even point of each business;
- ii. Calculate the sales volume at which each business will earn Rs.5000 profit.
- iii. Calculate at which sales volume both the firms will earn equal profits.
- iv. State which business is likely to earn greater profit in conditions of:
 - I. Heavy demand for the product
 - II. Low demand for the product and briefly give your reasons

7. From the following particulars, find out the most profitable sales mix:.

	X Rs.	Y Rs.
Materials	16	12
Wages	12	8
Variable expenses	18	12
Selling price	50	40
Fixed expenses Rs. 750		

Sales mix :

- (i) X -250 units and Y -250 units (ii) Y - 500 units (iii) X - 400 units and Y -100 units iv) X -150 units and Y 350 units

8. Discuss the practical applications of Marginal costing technique.
9. Explain the important concepts used in Marginal costing.
10. Cost data of a product is as follows:

	Rs.
Material	200
Labour	100
Variable expenses	50
Fixed expenses	<u>75</u>
Total cost	425
Profit	<u>100</u>
Selling price	<u>525</u>
Units produced and sold – 10,000	

- i. Find out the BEP

If the sales price is reduced by Rs. 25, how many more units must be produced and sold to realize the same profit as at present.

Unit IV Budgetary Control

Section A 1 mark each

Choose the correct answer

1. The word budget is derived from the _____ word.
a) Latin b) French c) Greek d) Chinese
2. _____ budgets are generally for one or two years and are in the form of monetary terms.
a) Short term b) Long term c) Current d) Master
3. _____ is the document which lays down the details of the budgeting organization and procedures.
a) Budget committee b) Budget manual c) Budget procedure d) Budget
4. Sales budget is a _____.
a) functional budget b) expenditure budget c) master budget d) fixed budget.
5. A budget which is prepared for the entire organisation is called _____ budget.
a) Short term b) Long term c) Current d) Master
6. The budget that can be prepared for different levels of activity is termed as _____ budget.
a) fixed b) flexible c) current d) master
7. Which of the following is an approximation or guess?
a) Budget b) Estimate c) Forecast d) Plan
8. The budget which is prepared for few months or weeks is called _____ budget.
a) Short term b) Long term c) Current d) Master
9. Which of the following is not a functional budget?
a) Flexible budget b) Purchase budget c) Sales budget d) Production budget
10. Pick the odd one out:

- a) Principal factor b) Key factor c) Budget factor d) Governing factor

Section B 2 marks each

1. Define 'Budget'.
2. Mention any two benefits of budgets.
3. Bring out the difference between budget and estimate.
4. What is a short term budget?
5. Write a note on master budget.
6. What are functional budgets?
7. State the advantage of preparing flexible budgets.
8. List a few cash receipts.
9. Mention some cash payments.
10. What is budgetary control?

Section C 6 marks each

1. Bring out the limitations of budgetary control.
2. From the following particulars, prepare a Production Budget of a Company for the year ended June 30, 2012.

Product	Sales (Units) (as per sales budgets)	Estimated Stock (units)	
		1 July 2011	30 June 2012
A	1,50,000	14,000	15,000
B	1,00,000	5,000	14,500
C	70,000	8,000	8,000

3. From the following figures prepare material purchase budget for January.

	A	B	C	D
Estimated stock 1 st January	16,000	6,000	24,000	2,000
Estimated stock 31 st Jan	20,000	8,000	28,000	4,000
Consumption	1,20,000	44,000	1,32,000	36,000
Standard price per unit (Rs.)	25	5	15	10

4. Bruce plans to sell 1,08,000 units of a product in January 2008, 1,20,000 units in February, 1,32,000 units in March, 1,56,000 units in April and 1,38,000 units in May. At the beginning of the current year, there are 18,000 units of the product in stock. At the end of each month, the company plans to have an inventory equal to one-sixth of the sales for the next month.
Prepare production budget for the period January to April 2008, showing how many units must be produced.

5. Prepare a flexible budget for overheads on the basis of the following data. Ascertain the overheads rates at 50%, 60 %, and 70% capacity.

Particulars	At 60% capacity (Rs)
-------------	----------------------

Variable overheads:	
Indirect material	6,000
Indirect labor	18,000
Semi – variable overheads:	
Electricity (40% fixed, 60% Variable)	30,000
Repairs (80% fixed, 20% Variable)	3,000
Fixed overheads:	
Depreciation	16,500
Insurance	4,500
Salaries	15,000
Total overheads	93,000
Estimated direct labour hours	1,86,000

6. Differentiate between fixed budget flexible budget.
7. A firm has a contract to supply 15,000 units of its only product during 2007.
The following were budgeted expenses and revenues.

Material	Rs. 10 per unit
Wages	Rs. 8 per unit
Work expenses (Fixed)	Rs. 50,000
Work expenses (Variable)	Rs. 6 per unit
General expenses (all Fixed)	Rs. 75,000

Profit is 20 % on sale price. Prepare a budget for 2007 showing the cost and profit.

8. From the following particulars, prepare a Sales Budget of ABC Ltd., for the year 2008 giving the sales for each quarter separately.

	Forecasted sales (units)	Selling price per unit (Rs)
I Quarter	1,000	10
II Quarter	1,200	11
III Quarter	1,100	10
IV Quarter	1,500	12

8. Draw material procurement budget (quantitative) from the following information:

Estimated sales of a product 40,000 units. Each unit of the product requires 3 units of material A and 5 units of material B.

Estimated opening balance at the commencement of the next year:

Finished Product	5,000	units
Material A	12,000	units
Material B	20,000	units

Materials on order

Material A	7,000	units
Material B	11,000	units

The desirable closing balance at the end of the next year:

Finished Product	7,000	units
Material A	15,000	units
Material B	25,000	units

Material on order

Material A	8,000	units
Material B	10,000	units

Section D 12 marks each

1. Explain the various types of budgets.
2. Prepare a cash budget of Raj & co for April, May and June 1999:

Month	Sales Rs	Purchases Rs	Wages Rs	Expenses Rs
January	80,000	45,000	20,000	5,000
February	80,000	40,000	18,000	6,000
March	75,000	42,000	22,000	6,000
April	90,000	50,000	24,000	7,000
May	85,000	45,000	20,000	6,000
June	80,000	35,000	18,000	5,000

Additional information:

- i) 10% of the purchase and 20% of sales are for cash.
 - ii) The average collection period of the company is $\frac{1}{2}$ month and the credit purchases are paid regularly after one month.
 - iii) Wages are paid half monthly .
 - iv) Expenses are paid after one month lag.
 - v) Cash balance on April 1,1999 may be assumed to be Rs. 15,000/-
3. For the production of 10,000 electric ovens, the following are the budgeted expenses:

	Rs. Per Unit
Direct material	60
Direct labour	30
Variable overhead	25
Fixed overhead (Rs. 1,50,000)	15
Variable expenses (direct)	5
Selling expenses (10% fixed) `	15
Administration expenses (Rs. 50,000 rigid for all levels of production)	5
Distribution expenses (20% fixed)	5
The total cost of sale per unit	160

Prepare a budget for the production of 6000, 7000, and 8,000 ovens, showing distinctly the marginal cost and the total cost.

4.A Company expects to have Rs. 37,500 cash in hand on 1st April, and requires you to prepare an estimate of cash position during the three months April, May and June. The following information is supplied to you:

Month	Sales Rs.	Purchases Rs.	Wages Rs.	Factory Exp. Rs.	Office Exp. Rs.	Selling Exp. Rs.
February	75,000	45,000	9000	7500	6000	4500
March	84,000	48,000	9750	8250	6000	4500
April	90,000	52,500	10500	9000	6000	5250
May	1,20,000	60,000	13500	11250	6000	6570
June	1,35,000	60,000	14250	14000	7000	7000

Other Information:

- Period of credit allowed by suppliers 2 months.
- 20% of sales is for cash and period of credit allowed to customers is one month.
- Delay in payment of all expenses - one month
- Income Tax of Rs. 57500 is due to be paid on June 15th.
- The company is to pay dividends to shareholders and bonus to workers of Rs. 15000 and Rs 22500 respectively in the month of April.
- Plant has been ordered to be received and paid in May. It will cost Rs. 1,20,000.

5.The expenses for budgeted production of 10,000 units in a factory are furnished below:

	per unit (Rs.)
Materials	70
Labour	25
Variable factory overhead	20
Fixed factory overhead (Rs. 1,00,000)	10
Variable expenses (Direct)	5
Selling expenses (10% fixed)	13
Distribution expenses (20% fixed)	7
Administration expenses (Rs. 50,000)	5
Total cost per unit (to make and sell)	<u>155</u>

Prepare a flexible budget for the production of 8000 and 12000 units showing clearly the variable and fixed cost.

Assume that administration expenses are fixed for all levels of production.

6. Prepare a flexible budget for overheads on the basis of the following data. Ascertain the overheads rates at 50%, 60 %, and 70% capacity.

Particulars	At 60% capacity (Rs)
Variable overheads:	
Indirect material	6,000
Indirect labour	18,000
Semi – variable overheads:	

Electricity (40% fixed, 60% Variable)	30,000
Repairs (80% fixed, 20% Variable)	3,000
Fixed overheads:	
Depreciation	16,500
Insurance	4,500
Salaries	15,000
Total overheads	93,000
Estimated direct labour hours	1,86,000

7. Differentiate between fixed budget flexible budget.

8. Sivan Ltd., wishes to prepare a cash budget from January. Prepare a cash budget for the first 6 months from the following estimated revenue and expenses.

Month	Total Sales Rs.	Material Rs.	Wages Rs.	Overheads	
				Production Rs.	Selling Rs.
January	40,000	40,000	8,000	6,400	1,600
February	44,000	28,000	8,800	6,600	1,800
March	56,000	28,000	9,200	6,800	1,800
April	72,000	44,000	9,200	7,000	2,000
May	60,000	40,000	8,000	6,400	1,800
June	80,000	50,000	10,000	7,200	2,400

Cash balance on 1st January was Rs. 20,000. A new machine is to be installed at Rs. 20,000 on credit to be paid by two equal installments in March and April. Sales commission at 5% on total sales is to be paid within a month following actual sales. Rs 20,000 being the amount of share 2nd call may be received in March. Share premium amounting to Rs. 4,000 is also obtainable with the 2nd call.

Period of credit allowed by suppliers - 2 months

Period of credit allowed to customers - 1 month

Delay in payment of overheads - 1 month

Delay in payment of wages - ½ month

Assume cash sales as 50 % of total sales.

9. The budgeted output of the factory specializing in the production of a single product of the optimum capacity of 6,000 units per annum amounts of Rs. 1,76,048 as follows:

	Rs.	Rs
Fixed cost		20,688
Variable cost:		
Power	1,440	
Repair etc	1,700	
Miscellaneous	540	
Direct materials	49,280	
Direct labor	1,02,400	1,55,360

Total		1,76,048
-------	--	----------

Taking notes of the possible impact on sales turnover by market trend, the company decides to have a flexible budget with the production target of 3,200 and 4,800 units (The actual quality proposed to be produced being left to a later date before commencement of budget period). Prepare the flexible budget for production levels at 50 % and 75%.

Assuming selling price per unit is maintained at Rs. 40 as at percent, indicate the effect on net profit. Administration, selling and distribution expenses continue at Rs. 3,600.

10. A company requires to calculate and present the budget for the next year from the following information:

Sales	Rs. 7,00,000
Direct material cost	40% of Sales
Direct wages 10 workers at	Rs. 200 per month
Factory overheads:	
Indirect labour:	
Works manager	Rs. 700 per month
Forman	Rs. 200 per month
Stores and spares	3% on sales
Depreciation on machinery	Rs. 10,000
Lights and power	Rs. 2,000
Other sundries	10% on direct wages
Administration selling and distribution	Rs. 14,000 per year
Repairs and maintenance	Rs. 7,000.

UNIT V - STANDARD COSTING

Section A 1 mark each

- _____ variance arises due to the difference between standard usage and actual usage of material.
a)Material yield b) Material usage c) Material Cost d) Material mix
- Labour efficiency variance is equal to labour mix variance and -----
a)Idle time Variance b) Labour Rate Variance c) Labour Cost Variance
d) Labour Yield Variance
- _____ variance is the difference between the standard cost of materials specified and the actual cost of materials used.
a)Material cost b) Material price c) Material usage d) Material yield
- Standard cost is a
a)Past cost b) future cost c) planned cost d) concurrent cost
- Which department is responsible for material usage variance?
a)Production b) Sales c) Finance d) Purchase
- Which department is responsible for Material price variance?
a) Sales b) Purchase c) Finance d) Accounting
18. Which department is responsible for Labour Rate variance?

- a) Production b) Sales c) Personnel d) Purchase
7. _____ variance arises due to the difference between the actual output and standard output.
- a) Material price b) Material usage c) Material yield d) Material mix
8. _____ variance arises due to the difference between budgeted and actual fixed overheads.
- a) Expenditure b) Volume c) Capacity d) Calendar
9. _____ is the deviation of actual cost from the standard cost.
- a) Profit b) Loss c) Variance d) Margin
10. _____ variance is the difference between recovered overheads and actual overheads.
- a) Overhead Cost b) Overhead Efficiency c) Overhead expenditure
d) Overhead Volume

Section B 2 marks each

1. What is Standard Costing?
2. List any 2 advantages of Standard Costing.
3. List any 2 limitations of Standard Costing.
4. What is meant by Standard Cost?
5. What is Variance Analysis?
6. Mention the different types of material variance.
7. What is idle time variance?
8. State the different types of overhead variance.
9. How will you calculate Material Cost Variance?
10. How will you calculate Material Price Variance?

Section C 6 marks each

1. The standard and actual labour force required for completing a job is given below:

	Standard		Actual	
	Hours	Rate (Rs.)	Hours	Rate (Rs.)
Men	45	50	48	55
Women	50	40	45	40

- Calculate : i) Labour cost variance ii) Labour rate variance
 iii) Labour efficiency variance.
2. State the advantages of standard costing.
3. Product X requires 20 kgs. of material at Rs. 4 per kg. The actual consumption of material for the manufacturing of product X came to 24 kgs.of material at Rs. 4.50 per kg. Calculate
 - i)Material cost variance ii) Material price variance and iii) Material usage variance

4. From the following particulars, calculate labour cost variance and labour rate variance.

Standard hours – 8,000 hours ; Standard rate – Rs. 2.25 per hour.

Actual hours – 8,500 hours; Actual rate – Rs.2.50 per hour.

5. The standard cost card gives the following information:

Labour rate - 50 paise per hour

Hours set per unit - 10 hours

Actual data are as follows:

Units produced - 500

Actual labour cost - Rs. 2400

Calculate labour variances.

6. From the following details calculate :

- i) Material Cost variance ii) Material Price variance and iii) Material usage variance

Standard output = 100 units

Standard material per unit = 3 kgs

Standard price per kg = 2

Actual output = 80 units

Actual price per kg = Rs. 2.50

Actual materials used = 250 kgs.

7. From the following, find out:

- i) Labour cost variance ii) Labour rate variance iii) Labour efficiency variance iv) Labour mix variance

	Standard cost			Actual cost		
	Time (Hrs)	Rate (Rs.)	Total (Rs.)	Time (Hrs)	Rate (Rs.)	Total (Rs.)
Children	10	6	60	5	8	40
Female	25	4	100	27	4	108
	35		160	35		148

8. With the help of following information, Calculate:

- i) Labour cost variance ii) Labour rate variance and iii) Labour efficiency variance

Standard hours: 40 hours @ Rs. 3 per hour

Actual hours : 50 hours @ Rs. 4 per hour

9. From the following calculate:

- i) Material cost variance ii) Material price variance and iii) Material usage variance

	Raw Material			Standard			Actual		
	Qty.	Rate	Amt.	Qty.	Rate	Amt.	Qty.	Rate	Amt.
A	1,000	2	2,000	1,500	1	1,500			
B	1,500	3	4,500	1,000	2	2,000			
	2,500		6,500	2,500		3,500			

10. From the following particulars compute:

i) MCV	ii)MPV	iii) MUV		
Material	Standard Mix		Actual Mix	
	Quantity	Price	Quantity	Price
	Kg	Rs.	Kg	Rs.
X	20	5	25	4.00
Y	16	4	13	4.50
Z	12	3	10	3.25

Section D 12 marks each

1. A contract job is scheduled to be completed in 30 weeks with a labour force of 75 skilled operatives, 45 semi-skilled operatives and 60 unskilled operatives. The standard weekly wages of each type of operatives are - skilled Rs.60, semi-skilled Rs.40 and unskilled Rs.30. The work is actually completed in 32weeks with a labour force of 70 skilled operatives, 30 semi-skilled operatives and 80 unskilled operatives with the weekly wage rates average for - skilled Rs.70, semi-skilled Rs.50 and unskilled Rs.20. Analyse the variances in labour cost due to various reasons.

2. AB Ltd. has established the following standard mix for producing 9 gallons of product A.

5 gallons of Material X at Rs. 7 per gallon

3 gallons of Material Y at Rs. 5 per gallon

2 gallons of Material Z at Rs. 2 per gallon

A standard loss of 10% of input is expected to occur. Actual input was under:

53,000 gallons of Material X at Rs. 7 per gallon

28,000 gallons of Material Y at Rs. 5.30 per gallon

19,000 gallons of Material Z at Rs. 2 per gallon

Actual output for a period was 92,000 gallons of product A. Compute all Material variances.

3. From the following records of Y Ltd. you are required to compute the material and labour variances.

1 tonne of material input yields a standard output of 1 lakh units.

Number of employees is 200.

The standard wage rate per employee per day is Rs. 6.

Standard price of material is Rs. 20 per Kg.

Actual quantity of material issued by production department 10 tonnes.

Actual price of material is Rs. 21 per Kg.

Actual output is 9 lakh units.

Actual wage rate per day is Rs. 6.50

Standard daily output per employee is 100 units.

Total number of days worked is 50.

Idle time paid for and included in the above is $\frac{1}{2}$ day.

4. S.V. Ltd.has furnished you the following data.

Budgeted

Actual

		July 1998
Number of working days	25	27
Production in units	20,000	22,000
Fixed overheads	Rs. 30,000	31,000

Budgeted fixed overhead rate is Re. 1.00 per hour. In July 1998 the actual hours worked were 31,500.

Calculate Overhead variances.

5. The standard cost of a chemical mixture is as follows:

8 tons of material A at Rs. 40 per ton

12 tons of material B at Rs. 60 per ton

Standard yield is 90% of input.

Actual cost for a period is as under:

12 tons of material A at Rs. 30 per ton.

20 tons of material A at Rs. 68 per ton.

Actual yield is 27 tons.

Compute all material variances.

6. The standard and actual labour force required for completing a job is given below:

	Standard		Actual	
	Hours	Rate (Rs.)	Hours	Rate (Rs.)
Men	800	3	600	2.5
Women	200	2	500	2

Calculate : i) Labour cost variance ii) Labour rate variance iii) Total Labour efficiency variance iv) Labour Mix variance v) Labour efficiency vi) Labour Sub-Efficiency variance

7. From the following particulars, calculate i) labour cost variance ii) Labour rate variance

iii) Labour total efficiency variance iv) Labour idle time variance and vi) Labour Efficiency variance.

Standard hours – 5,000 hours ; Standard wage rate – Rs. 4 per hour.

Actual hours – 6,000 hours; Actual wage rate – Rs.3.50 per hour.

Time lost on account of machinery breakdown 300 hours.

8. From the following data, calculate labour variances:

Budgeted labour for completing job X:

8 skilled workers at Rs. 10 per hour for 20 hours

12 unskilled workers at Rs. 8 per hour for 20 hours

Actual labour for completing job X:

12 skilled workers at Rs. 11 per hour for 20 hours

13 unskilled workers at Rs. 7 per hour for 20 hours

9. From the following particulars, calculate

- i) Material cost variance ii) Material price variance iii) Material usage variance and iv) Material Mix Variance

Material	Standard Quantity (kg)	Standard price Rs.	Actual quantity (kg)	Actual price Rs.
X	20	5	24	4.00
Y	16	4	14	4.50
Z	12	3	12	3.25
-----			-----	
	48		50	
-----			-----	

10. The standard and actual labour force required for completing a job is given below

	Standard		Actual	
	Time	Rate	Time	Rate
	(hours)	(Rs.)	(hours)	(Rs.)
Men	90	50	96	55
Women	100	40	90	40

Calculate : i) Labour cost variance ii) Labour rate variance iii) Labour efficiency variance and iv) Labour Mix Variance

ST.MARYS COLLEGE (AUTONOMOUS) THOOTHUKUDI-628001

III B.Com – Semester VI

Core IV

Logistics in Shipping Industries

Sub Code : 21UCOC64

QUESTION BANK

Section-A – One Mark

Choose the correct answer:

1. The word “Logistics” is derived from the ----- word “logistike”.
(a) Latin (b) English (c) **Greek** (d) American
2. The process of planning, implementing and controlling the efficient flow and storage of goods from one point to another is called-----.
(a) **Logistics** (b) Kinetics (c) Aeronautics (d) Nano
3. The definition of Logistics was given in the year
(a) 1991 (b) 1986 (c) 1996 (d) **1976**
4. Logistics Management provides customer satisfaction at the -----possible cost.
(a) Highest (b) **Lowest** (c) Same (d) No loss
5. Logistics excellence principle have been developed by _____
[a] Gene. R. Tyndall [b] Philip C. Alling [c] Alling [d] **Both a & b**
6. Logistics involves the integration of packing and_____
a) Information b) Transportation c) Warehousing d) All
7. Marketing Mix consists of Price, Product, Promotion and _____
a) Packing (b) Publicity (c) Physical distribution (d) Branding
8. Logistics adds _____ when inventory is correctly positioned.
a) Profit (b) Value (c) Benefit (d) Quality
9. The levels of logistics support required varies according to the stages of ____
a) Mix (b) Advertisement (c) PLC (d) JIT
10. ROA means
(a) Rate of assets (b) **Return on assets** (c) Rate on area (d) None

Unit-II

1. Place for a ship in a harbour is
a) Platform (b) Godown (c) **Berth** (d) Dock
2. Document made between a charterer and a ship owner is
a) Bill of lading (b) Shipping bill (c) **Charter party** (d) Demurrage
3. Space booked by shipper on a vessel is called as.....
a) Dead freight (b) Demurrage (c) Lighterage (d) deferred rebate
4. Place in a harbour where ships are loaded, unload or repaired is.....
a) Berth (b) Platform (c) **Dock** (d) Go down
5. Bulk carriers which can pass through the panama canal is.....
a) **“Panamax” ship** (b) “Suez” ship (c) “American” ship (d) “Cape of Good hope” Ship
6. Suez canal cut through narrow necks of land joining Africa and
a) Europe (b) Australia (c) Antarctica (d) America
7. “Cape of good hope” trunk route connects western Europe, Africa
a) Austria (b) Australia (c) Antarctica (d) India

8. Ferry vessels means

- a) **Passenger ships** b) Container Ships c) Military ships d) Tanker ships
9. Canal that link between European ports with Asia and Australia is
(a) Panama (b) Suez (c) Point of cape of good hope (d) None
10. The narrow necks of land joining continental areas are called
(a) Bridge (b) **Canals** (c) Terminals (d) None
11. The interlink ship services are made by.....
a) ULCC b) VLCC c) **NVOCC** d) Combi carriers
12. The name “draft” is given for -----.
(a) Depth of water (b) Bridge clearance (c) Port capacity (d) Vessel
13. The type of ocean service designed for only one type of cargo is -----.
(a) Liner (b) Tramp (c) both a & b (d) **none**
14. This ----- tonnage is measure as soon as it is built.
(a) **Dead weight** (b) Net (c) Gross (d) none
15. Another name given for floating parking garage ship is ----- ship.
(a) container (b) RO/RO (c) trot-on/trot-off (d) bulk
16. Crude carriers carrying more than 300,000 dwt is called -----.
(a) ULCC (b) VLCC (c) both a & b (d) none
17. The ----- is a fundamental international shipping document
(a) **Ocean bill of lading** (b) Airway bill (c) Bill of lading (d) All the above
18. Multi purpose bulk carriers is -----.
(c) **OBO** (b) RO/RO LASH (d) SD14
19. Larger the shipment ----- is the transportation cost per unit.
(a) Lesser (b) More (c) Same (d) Maximum
20. All purpose cargo carriers operating around the coast is called _____
[a] LASH [b] **Coasters** [c] Tankers [d] Tramp
21. An associations of ocean carriers for fixing identical rates is called _____
[a] Charter party [b] **Conference Line** [c] Independent Line [d] Liners

Unit – III

1. Coastal line of India is about
a) 7521km b) **5500km** c) 3000km d) 8000km
2. There areMajor ports in our country
a) 10 b) 11 c) 12 d) **13**
3. India is having.....minor ports
a) 139 b) **185** c) 184 d) 190
4. 12th Major port declared is.....
a) **Ennore** b) Goa c) Mannapad d) Tuticorin
5. The oldest Indian port is.....
a) Calcutta b) **Mumbai** c) Chennai d) Tuticorin
6. Ports at Andaman and Nicobar Islands are developed as per
a) Port Trust Act 1963 b) State Government c) Central section plan d) Central Government
7. Infra structural development as per private agencies at port are as percontract
a) **BOT** b) MTO c) RO-RO d) CAF
8. A request from a prospective importer is
a) Enquiry b) **Inquiry** c) Offer d) Invoice

9. The offer made by the exporter is in the form of
a) **proforma Invoice** b) Contract c) Inquiry d) order
10. Sailing information may be obtained from
a) News paper b) Magazines c) **Daily Shipping Intelligence** d) Any daily
11. Goods may be shipped out of India only after
a) Shipment Inspection b) Packing c) Marking d) **Customs Clearance**
12. Marine Insurance in India is undertaken by subsidiaries of
a) HDFC b) **GIC** c) LIC d) ICICI
13. IGM stands for _____
a) Import Grant Manifest b) **Import General Manifest**
c) Import Guaranteed Manuel d) Inland Grant Manuel
14. Import of restricted item requires an import license under _____
a) **Restricted List** b) Negative List c) License List d) Certified copy
15. Import of second hand capital goods shall not be transferred without the prior permission of the
a) Director General of Foreign Trade b) Director General of India
c) Director of Import d) **Director General of Import**

Unit –IV

1. Port dues include.
a) Berth dues b) Harbour dues c) Towage d) **All**
2. All work related to customs and Income tax will be carried by-----
a) Stevedores (b) **Customs House Agent**
(c) Freight Forwarder (d) None
3. Agents appointed by the shipping company to receive cargo and to load or to discharge Cargos from the ship are -----
(a) **Stevedores** (b) Customs House Agent
(c) Freight Forwarder (d) None
4. Forwarding can be defined as
a) Help forward b) Freight helpers c) Send forwards d) **All**
5. Forwarding commission may be.....
a) 5% b) 2.5% c) as Per Principal's agreement d) 10%
6. Commissioner of customs will issue licence to_____
a) **Stevedores** (b) **Customs House Agent**
(c) Freight Forwarder (d) Freight brokers
7. The intermediary role is played by
a) Shipping agents b) Freight Brokers c) Customs house Agent d) **All**
- 8) An Agent to market the principal liner service and book cargo from number of shippers is—
[a] Stevedores (b) Customs House Agent
(c) Freight Forwarder (d) **Liner Agents**
9. Basic Document for export is
a) B/L b) Shipping bill c) Invoice d) G.R. Form
10. Documentation can be completed by
a) Agents b) Exporters c) Any intermediaries d) **All**

Unit –V

1. Reefer is also known as ----- container.
(a) flat rack (b) open top (c) bulk (d) **refrigerated**

2. Shipping corporation of India is-----
(a)**Public Sector** (b) Private Sector (c) Foreign Company (d) None
3. Larger the shipment ----- is the transportation cost per unit.
(a) **Lesser** (b) More (c) Same (d) Maximum
4. Consolidation of cargo in full containers is
a) LCL b) **FCL** c) ICD d) CFS
5. CFS stands for.....
a) Container fuel station b) **container freight station** c) Container freight system
d) Concor Freight station
6. The capacity of containership is measured in terms of number of.....
a) **TEUs** b) LNG c) Tonnage d) Wharf.
7. Pune ICD is connected with _____ Port
A) **Mumbai** b) Chennai c) Tuticorin d) kaldia
8. CFSs are cargo _____ point
a) **aggregating** b) central c) diversified d) direct
9. FEU is the unit of measure for _____
a) **Forty Foot Equivalent Unit** b) Four Foot Equivalent Unit c) Forty Equivalent Unit d) Forty Feet equivalent unit
- 10 Insulated containers use _____ as the cooling medium
a) Ice b) **dry ice** c) ice cubes d) naphthalene balls
11. The intermediary role is played by _____
a) Shipping agents b) Freight Brokers c) Customs house Agent d) **All**
12. Bill of entry is an _____ document
a) Inward Clearance b) Outward c) **Loading** d) Duty drawback
- 13 Evergreen, sea land and Maersk are called.....
a) Liners b) Shipping Co c) NVOCC d) Brokers
14. CHAs are license holders as per Customs Act _____
a) 1930 b) 1960 c) **1962** d) 1961
15. Port in inland to facilitate handling and control of container & general cargo is called as
a) CFS b) **DRY PORT** c) LCL d) FCL

Section B (Two marks each)

Answer the following in about 50 words each:

Unit :I

1. Infer the term Logistics.
2. Outline the origin of the word Logistics.
3. Classify the three phases of Logistics.
4. Explain the mission of Logistics.
5. What is Order Processing?
6. What is Transportation in Logistics?
7. Information play an important role in Logistics –Discuss
8. Define Logistics.
9. Difference between Inbound and Outbound Logistics.

10. What is Process Logistics?

Unit :II

1. Summarize the concept of Tween Deck Vessels.
2. Relate the two canals which gained popularity in the ocean transportation with reason.
3. Compare RO/RO vessels with Train Ferry Vessels.
4. What is OBO Vessels?
5. Write the importance of Panama Canal.
6. Discuss the importance of Suez Canal.
7. What is the container ships
8. Discuss the importance of the North Atlantic Route.
9. Discuss the meaning of charter party.
10. What are types of charter party?

Unit III

1. Infer the term of Letter of Credit.
2. Summarize the differences between a major and a minor port.
3. Compare Clean Mates Receipt with Qualified Mates Receipt.
4. Discuss the reason of Inspection of goods before and after the arrival of goods to the port.
5. What is Certificate of Origin
6. What is a Proforma Invoice?
7. Explain about the Ennore port.
8. Who will issue the Mates Receipt and when?
9. Explain briefly about the minor ports in India.
10. Briefly explain the riverine port of India.

Unit :IV

1. State the qualifications to become a Custom House Agent.
2. Explain the role of intermediaries in Logistics.
3. Discuss the term Stevedoring.
4. Who is a Surveyor?
5. Who is a Freight Forwarder?
6. Who are the intermediaries in Logistics?
7. Who form the Dock Labour Gang?
8. Who are the Mazdoors?
9. Discuss the work of the Tindal.
10. Explain the services offered by the Liner Agents.

Unit V

1. Discuss the different types of Container.
2. What is meant by Leasing of Container?
3. What is meant by Marking of Container?
4. What is Multimodal Transportation?
5. What is Intermodal Transportation ?
6. Difference between ICD and CFS.

7. List out any two advantages of Containerisation.
8. List out any two constraints of Containerisation.
9. What is a Thermal Container?
10. What is an Insulated Container?

Section –C (Five marks)

Unit-I

1. Sketch out the function of Warehousing in Logistics.
2. Identify the function of Order Processing in Logistics.
3. Give a brief account on the objectives of Logistics Management.
4. Explain logistics' interface with marketing.
5. Explain in brief the nature and importance of Logistics Management.
6. Give a brief account on the various service benefits provided by Logistics.
7. Explain the various functions of Logistics Management.
8. Explain in brief the principles of logistics information.
9. Discuss the Transportation function in Logistics.
10. Explain the scope of Logistics.

Unit II

1. Choose any four shipping routes that serves importance and substantiate it.
2. Build up the concept of Conference System.
3. Discuss the Shipping routes.
4. Discuss the importance of Suez Canal.
5. Discuss the importance of Panama Canal
6. Explain the features of Bulk Carriers
7. Explain the features of Containers.
8. Explain the Origin of Conference Systems.
9. Differentiate between Liners and Tramp Vessels.
10. Discuss Independent Liners.

Unit III

1. Sketch out the functioning of any three major ports in India.
2. Identify the nature of Bill of Lading.
3. List out the working of Chennai Port
4. Discuss the infrastructure of the Mumbai Port.
5. Explain the difference between Minor and Major port.
6. Explain the Mates Receipt
7. Explain the Certificate of Origin.
8. Difference between Proforma Invoice and Commercial Invoice.
9. Explain the procedure of Exports.
10. Explain the documents involved in Exports.

Unit IV

1. Bring out the functions of the Dock Labour Gang in Stevedoring.
2. Describe the concept of the Custom House Agent.
3. Explain the role of Intermediaries in Logistics.
4. Explain the functions of Shipping Agents in Logistics.
5. Explain the services of Liners Agents.
6. Explain the services of Freight Brokers in Logistics.
7. Explain the services of Freight Forwarder in Logistics.
8. Explain the services of Custom House Agents.
9. Explain the services of Stevedores.
10. Explain the services offered by the Surveyors.

Unit V

1. Discuss the types of Containers.
2. Explain the Intermodal Transportation.
3. Explain the procedure of the Leasing of the Containers.
4. Explain the procedure of Marking of Containers.
5. Explain the procedure followed by the exporter in the ICD.
6. Explain the procedure followed by the importer in the ICD.
7. Explain CFS
8. Discuss the advantages of Containerization
9. Discuss the constraints of Containerization.
10. Explain ICD.

Section –D (Ten marks)

Unit-I

1. Describe the function of Warehousing in Logistics.
2. Describe the function of Order Processing in Logistics.
3. Give a brief account on the objectives of Logistics Management.
4. Explain logistics' interface with marketing.
5. Explain in brief the nature and importance of Logistics Management.
6. Give a brief account on the various service benefits provided by Logistics.
7. Explain the various functions of Logistics Management.
8. Explain in brief the principles of logistics information.
9. Discuss the Transportation function in Logistics.
10. Explain the scope of Logistics.

21. How do stories in an organization reflect its corporate culture?
22. Explain the role of 'heroes' in shaping corporate culture.

Unit IV

23. What is cultural change in an organization?
24. Mention two key elements involved in managing cultural change.
25. Why is leadership important in managing cultural change?
26. What is meant by the 'sustaining phase' in cultural change?
27. Describe one challenge in managing cultural change.
28. How can organizations overcome resistance to cultural change?
29. What is meant by 'culture fit' in organizational change?

Unit V

30. What are Deal & Kennedy's Corporate Tribes? Briefly explain one of the types.
31. Describe Handy's 'Power Culture'.
32. What is a 'Role Culture' according to Handy's typology?
33. What are the key features of a 'Task Culture'?
34. Explain the main characteristics of an 'Entrepreneurial Culture'.
35. How does Amarchand & Jayaraj's 'Person-Oriented Culture' differ from 'Growth Culture'?
36. Describe the 'Weak Culture' as defined by Amarchand & Jayaraj.

Section-C (Five Mark)

Unit I

1. Explain the concept of corporate culture and its importance in the modern organizational environment. Provide examples of how corporate culture can impact employee performance and organizational success.

2. Discuss the role of values in shaping corporate culture. How do shared values within an organization influence decision-making, leadership, and employee behavior?
3. What are the cultural variables that affect corporate culture? Explain the individual, social, national, and professional variables with examples of how each can impact organizational culture.
4. Explain Hofstede's dimensions of national culture and their relevance to international business. Discuss how differences in cultural dimensions can lead to challenges in managing a global workforce.
5. Describe the relationship between corporate culture and organizational performance. How can a strong or weak corporate culture impact an organization's competitive advantage?

Unit II

6. What are the key steps involved in creating a corporate culture? Discuss how organizations can establish and communicate their core values, mission, and vision to create a desired organizational culture.
7. Explain the process of operationalizing corporate values. How can an organization ensure that its values are effectively translated into everyday practices and behaviors? Provide examples.
8. Discuss the concept of employee socialization in corporate culture. How can organizations effectively socialize new employees to embrace and align with the company's culture?
9. Explain the importance of aligning corporate culture with business strategy. How can misalignment between culture and strategy hinder organizational success?
10. Describe the role of leadership in creating and sustaining corporate culture. How can leaders model desired behaviors and values to shape and reinforce organizational culture?

Unit III

11. Explain the concept of the cultural web in organizations. Discuss each of its key elements (organizational structure, rituals, routines, stories, symbols, heroes, power structures, and control systems) and how they collectively shape corporate culture.
12. How does Edgar Schein's model of organizational culture explain the layers of culture within an organization? Discuss the three levels: artifacts, espoused values, and basic underlying assumptions, with examples.
13. Discuss how stories and symbols act as tools to communicate and reinforce corporate culture. Provide examples of how successful companies use stories or symbols to shape their organizational identity.

14. What is the significance of rituals and routines in an organization? How do they help in maintaining and reinforcing the existing corporate culture?
15. Explain Hofstede's findings on cross-cultural dimensions. Discuss how understanding these dimensions can help multinational companies manage cultural differences in their global operations.

Unit IV

16. Explain the process of managing cultural change in an organization. Discuss the key elements of cultural change, including leadership involvement, communication strategies, and employee engagement.
17. What are the common challenges organizations face when trying to implement cultural change? How can these challenges be overcome to ensure the success of cultural transformation initiatives?
18. Discuss the concept of 'creating and sustaining corporate culture' in the context of cultural change. How can an organization ensure that cultural changes are long-lasting and embedded in its everyday practices?
19. Explain the role of leadership in managing cultural change. How can leaders communicate the need for change and inspire employees to embrace new cultural norms and behaviors?
20. What strategies can organizations use to overcome resistance to cultural change? Discuss how understanding employee concerns and fostering involvement can contribute to the successful implementation of cultural change.

Unit V

21. Discuss Deal & Kennedy's Corporate Tribes model. Explain the four types of corporate cultures in this model and provide examples of organizations that exhibit each type.
22. Explain Handy's typology of organizational culture. Discuss the key features of Power Culture, Role Culture, Task Culture, and Entrepreneurial Culture, and provide examples of organizations that fit each type.
23. What are the characteristics of a 'Task Culture' in Handy's typology? How does a Task Culture differ from a Power Culture, and what are its advantages and challenges?
24. Discuss Amarchand & Jayaraj's typology of corporate culture. Explain the different types of culture in this model (Growth, Person-Oriented, Mixed, and Weak) and how each type affects organizational behavior and performance.
25. Compare and contrast the 'Role Culture' and 'Entrepreneurial Culture' as described by Handy. What are the benefits and limitations of each type of culture in terms of organizational effectiveness and adaptability?

Section D (Eight Marks)

Unit –I

1. Define corporate culture. Why is it important for organizations?
2. Explain the role of values in shaping corporate culture. Provide examples of how values influence decision-making in organizations.
3. What is the scope of corporate culture? How does it impact the overall functioning of an organization?
4. Discuss the following cultural variables and their impact on corporate culture:
5. How do national cultures influence the corporate culture in multinational organizations? Provide examples.
6. Why is it essential for organizations to align their corporate culture with their business strategy?
7. Identify and explain the significance of the cultural dimensions proposed by Hofstede.
8. What are the challenges an organization might face when trying to align corporate culture with national culture?
9. Discuss the role of leadership in shaping and maintaining corporate culture.

Unit II

1. What steps are involved in creating a corporate culture from scratch?
2. Explain how an organization can establish its core values. What methods can be used to communicate these values effectively?
3. What does it mean to operationalize values in the context of corporate culture? How can values be translated into actions?
4. Describe the process of creating a vision for an organization. Why is a clear vision critical for the development of corporate culture?
5. What are the key elements in the socialization process of employees to a corporate culture?
6. How can organizations ensure that employees adhere to and embrace their corporate culture during the on boarding process?
7. What are the major barriers to establishing a strong corporate culture, and how can they be overcome?
8. How does organizational leadership influence the socialization of new employees?
9. Discuss how a company's corporate culture can evolve over time. What factors might drive such changes?

Unit III

1. Explain the concept of the cultural web in organizational theory. What are the different elements of the cultural web?
2. Describe the role of organizational structure in shaping corporate culture. How can the structure influence organizational behavior?
3. What is the significance of rituals and routines in an organization's culture? Provide examples of how rituals contribute to the cultural identity of a company.
4. How do stories and symbols reflect and reinforce corporate culture? Give examples of how organizations use stories and symbols.
5. Discuss the role of heroes in an organization. How do they help shape and reflect the company's corporate culture?
6. What is the significance of power structures in shaping an organization's corporate culture?
7. Explain how control systems (e.g., performance metrics, reporting structures) impact the overall corporate culture.
8. Discuss Edgar Schein's model of organizational culture. What are the three levels of culture in Schein's model?
9. What are Hofstede's findings on cross-cultural dimensions? How can they be used to understand cultural differences in global organizations?
10. How can an organization apply Hofstede's cultural dimensions to improve its cross-cultural management strategies?

Unit IV

1. Define cultural change in the context of organizational culture. What are the key drivers of cultural change?
2. What are the main elements that constitute cultural change? Discuss each of them.
3. Explain the process of managing cultural change in an organization. What steps should leaders follow to implement cultural change?
4. What are the potential challenges when managing cultural change in an organization, and how can they be overcome?
5. How can organizations sustain a new culture once cultural change has been implemented?
6. Discuss the role of leadership in managing cultural change. How does a leader influence the success or failure of cultural change initiatives?
7. Explain the concept of "culture fit." How can organizations assess whether employees align with the company's culture?
8. What are the ethical considerations involved in managing cultural change within an organization?
9. Discuss the impact of organizational culture on employee performance. How does cultural change influence employee behavior?

10. Provide examples of organizations that successfully managed cultural change. What strategies did they use?

Unit V

1. What are the key characteristics of Deal & Kennedy's Corporate Tribes model? Explain each type of corporate culture within this model.
2. Explain Handy's Typology of corporate culture. Describe the characteristics of each type: Power culture, Role culture, Task culture, and Entrepreneurial culture.
3. How does the power culture differ from the role culture? Discuss the strengths and weaknesses of both types.
4. What is the task culture in organizations, and how does it contribute to organizational effectiveness?
5. Discuss the concept of an entrepreneurial culture. What are the benefits and challenges of such a culture in modern organizations?
6. Explain the strategic culture in Handy's typology. How does this type of culture affect an organization's long-term goals?
7. What are Amarchand & Jayaraj's models of corporate culture? Describe the different types: Growth, Person-oriented, Mixed, and Weak culture.
8. Compare and contrast the growth culture and the person-oriented culture. Which is more suitable for a high-tech, rapidly growing firm?
9. How does a weak corporate culture affect an organization's performance? Provide examples of companies with weak cultures and the consequences.
10. In your opinion, which typology of corporate culture would be most suitable for a startup versus an established multinational corporation? Explain why.

- a)Capital b)Resource **c)Fund** d)Liquid assets

50. _____ are an important short-term money market instrument of borrowings by the Government.

- a)Commercial Bill **b) Treasury Bill** c)Collateral loan d)Certificate of deposit

Section – B

(2 marks each)

UNIT I

1. Write short notes on Corporate Finance.
2. What is Profit Maximization?
3. Write short notes on Capital Budgeting
4. Write any two functions of Corporate Finance.
5. Write any two features of Corporate Finance.
6. What is Profit Maximization?
7. What is Wealth Maximization?
8. Write any two responsibilities of corporate finance manager.
9. Write any two significances of Corporate Finance.
10. Write any two functions performed by Corporate Finance Manager.

UNIT-II

11. What is meant by financial planning?
12. What are the objects of financial planning.
13. What is fixed capital?
14. What is working capital?
15. Define the term capitalization.
16. What do you mean by over capitalization?
17. What are the causes of over capitalization?
18. What is under capitalization?
19. What are the causes of under capitalization?

20. Explain the effects of over capitalization.

UNIT-III

21. Write short notes on Capital Structure.

22. What is Leverage?

23. What are the types of Leverages?

24. What is Operating Leverage?

25. What is Financial Leverage?

26. What is Combined Leverage?

27. Write any factors determining Capital Structure.

28. Classify the Sources of Corporate finance.

29. What is Internal Financing?

30. Write short notes on Security Financing.

UNIT-IV

31. What is cost of capital?

32. What are the components of cost of capital?

33. What is average cost?

34. What is weighted average cost of capital?

35. What is marginal cost?

36. What is meant by working capital?

37. What do you understand by fixed working capital?

38. What do you mean by variable working capital?

39. What are the types of working capital.

40. What is working capital management?

UNIT-V

41. What is Financial market?

42. What is Organised Financial market?

43. What is Unorganised Financial market?

44. What is Securities Financial market?

45. Write short notes on Primary Financial market.

46. Write short notes on Secondary Financial market.

47. What is Treasury Bill market?

48. Writes short notes on Certificate of Deposit (CD).
49. What is Call Money market?
50. Write short notes on Long term Loan market.

Section –C
(6 marks each)

UNIT I

1. a. Explain the functions of Corporate Finance.
(OR)
b. Explain the Scope of Corporate Finance.
2. a. Explain the Nature of Corporate Finance.
(OR)
b. Explain the role of Finance Manager in managing Corporate Finance.
3. a. Describe briefly about the significance of Corporate Finance.
(OR)
b. Distinguish between Debenture and Share.
4. a. Explain the objectives of Corporate finance.
(OR)
b. Discuss the role of finance manager in the mobilization of funds.
5. a. Explain briefly about Profit maximization.
(OR)
b. Write about the features of Wealth maximization.
6. a. Write about the responsibilities of finance manager.
(OR)
b. Explain briefly the traditional approach of corporate finance functions.
7. a. Write briefly about the role of Corporate finance manager.
(OR)
b. Explain briefly about the modern approach of corporate finance functions
8. a. Discuss the features of Profit maximization.
(OR)
b. “Corporate finance in the modern approach can be broken down into four decisions” –discuss.
9. a. Explain briefly about Wealth maximization.

(OR)

b. “Financing decisions must relate to the optimum capital structure”- discuss.

10. a. Write the arguments in the criticism of profit maximization.

(OR)

b. “Finance is the life blood for starting any company” – discuss.

UNIT-II

11. a. Explain the importance of financial planning.

(OR)

b. State the factors affecting financial planning.

12. a. Explain briefly the characteristics of a sound financial plan.

(OR)

b. Discuss the scope of financial planning.

13. a. What is financial planning? Explain its objects.

(OR)

b. Explain the meaning and features of fixed capital.

14. a. Discuss the determinants of fixed capital

(OR)

b. Distinguish between fixed capital and working capital.

15. a. What are the characteristics of financial planning?

(OR)

b. List out the significance of financial planning.

16. a. What is Capitalization? Explain its types.

(OR)

b. Discuss the theories of capitalization.

17. a. What are the causes of over capitalization?

(OR)

b. What are the causes of under capitalization?

18. a. Explain the effects of over capitalization.

(OR)

b. Explain the effects of under capitalization.

19. a. What are the remedies of over capitalization?

(OR)

b. What are the remedies of under capitalization?

20. a. Explain the difference between over and under capitalization.

(OR)

b. What are the limitations of financial planning?

UNIT-III

21. a. Explain briefly the features of an appropriate Capital Structure.

(OR)

b. Explain briefly the types of leverages.

22. a. Explain briefly the factors determining Capital Structure.

(OR)

b. A firm has sales of Rs.1,50,000, Variable costs of Rs.90,000, Fixed costs of Rs.30,000 and long term loans of Rs.80,000 at 10% rate of interest. Calculate the i) Financial Leverage ii) Operating Leverage.

23. a. Distinguish between Capital structure and Financial structure.

(OR)

b. Find out degree of operating leverage from the following data:

Year	EBIT(in Rs.)	Sales (in units)
2005	40,000	20,000
2006	50,000	28,000

24. a. Explain briefly the patterns of Capital structure.

(OR)

b. From the following, calculate operating leverage:

No. of units produced and sold	- 30,000 units
Selling price per unit	- Rs.20
Variable cost per unit	- Rs. 10
Fixed cost per unit at current level of sales	- Rs.5

What will be the new operating leverage if the Variable cost is Rs.12

25. a. Classify the Leverages and explain it.

(OR)

b. The installed capacity of a factory is 600 units. Actual capacity used is 500 units. Selling price per unit is Rs.10. Variable cost is Rs.6 per unit.

Calculate the operating leverage in each of the following three situations:

1. When fixed costs are Rs.400
2. When fixed costs are Rs. 1,000
3. When fixed costs are Rs.1,200

26. a. Explain briefly the Security Financing of Corporate funds.

(OR)

b. A simplified income statement of Zenith Ltd. is given below. Calculate its degree of Operating leverage, degree of financial leverage.

Particulars	Rs.
Sales	10,50,000
(-) Variable Cost	7,67,000
Fixed Cost	75,000
EBIT	2,08,000
(-) Interest	1,10,000
Taxes (30%)	29,400
NET INCOME	68,600

27. a. Explain briefly about the Owners' Capital financing of funds.

(OR)

b. Martin Ltd. has the following capital structure:

Particulars	Rs.
25,000 Equity shares of Rs.10 each	2,50,000
2,000 , 9% Preference shares of Rs.100 each	2,00,000
3,000 , 10% Debentures of Rs.100 each	3,00,000
The Company's EBIT	1,25,000

Calculate the Financial leverage assuming that the company is in 40% tax bracket.

28. a. Explain in detail about the Long term sources of funds.

(OR)

b. A firm has sales of Rs.15,00,000, Variable costs of Rs.9,00,000, Fixed costs of Rs.3,00,000 and long term loans of Rs.8,00,000 at 8% rate of interest. Calculate the i) Financial Leverage ii) Operating Leverage.

29. a. Explain in brief about the Borrowed Capital financing of funds.

(OR)

b. From the following, calculate operating leverage:

No. of units produced and sold	- 60,000 units
Selling price per unit	- Rs.20
Variable cost per unit	- Rs. 10
Fixed cost per unit at current level of sales	- Rs.6

What will be the new operating leverage if the Variable cost is Rs.15

30. a. Briefly explain the Internal Financing of Corporate funds.

(OR)

b. What is Combined leverage? How is it measured?

UNIT-IV

31. a. Explain the types of cost of capital.

(OR)

b. Explain the components of cost of capital.

32. a. Discuss the importance of cost of capital.

(OR)

b. What is WACC? Explain the benefits of market value and book value approach.

33. a. Ganesh Ltd issued 2,000 9% Debentures of Rs.100 each at a premium of 10. The issue expenses are 3%. The tax rate is 40%. Calculate cost of debt before tax and after tax.

(OR)

b. Hadley Ltd. issued 6,000 10% Debentures of Rs.100 at a discount of 10%. The issue expenses are Rs.4,000. Assuming a tax rate of 50% calculate the before tax and after tax cost of debt.

34. a. Malaiya Ltd. Issued 60,000, 15% irredeemable preference shares of Rs.100 each. The issue expenses were Rs. 60,000. Determine the cost of preference capital if shares are issued at par, at a premium of 10% and at a discount of 5%.

(OR)

b. From the following capital structure of a company, calculate the average cost of capital.

Source	Rs
Equity Share Capital (10 shares)	4,00,00,000
12% Debentures	4,00,00,000
18% term loan	12,00,00,000
	20,00,00,000

The company has been paying 20% dividend per annum constantly. Compute average cost of capital at the current market price of share of Rs.100 is Rs.160.

35. a. Following information is available with regards to the capital structure of Edwards Ltd:

Particulars	Amount	After tax cost of capital
Debentures	12,00,000	5%
Preference share capital	4,00,000	10%
Equity share capital	8,00,000	15%
Retained earnings	16,00,000	12%

You are required to calculate weighted average cost of capital.

(OR)

b. The following is the capital structure of a firm:

Particulars	Amount	Cost of capital
11% Preference share capital	1,00,000	11%
Equity share capital	4,50,000	18%
Retained earnings	1,50,000	18%
16% Debt	3,00,000	8%

Calculate the weighted average cost of capital of the firm, based on the book value weights.

36. a. Discuss the significance of working capital in a firm

(OR)

b. Explain the sources of working capital.

37. a. What are the advantages of having adequate working capital in the firm?

(OR)

b. Explain the dangers of having excessive working capital in a firm.

38. a. Rose Ltd. is engaged in customer retailing. You are required to estimate its working capital requirements from the following data:

Projected annual sales	Rs. 9,00,000
Percentage of net profit to cost of sales	20%
Average credit allowed to debtors	1 month
Average credit allowed by creditors	2½ months
Average stock carrying (in terms of sales requirements)	2 months

Add 10% to allow for contingencies.

(OR)

b. Meraz Ltd. is engaged in large scale customer retailing. From the following information, you are required to forecast its working capital requirements for the year 2005-2006.

Projected annual sales	Rs. 65 Lakh
Percentage of net profit on cost of sales	20%
Average credit allowed to debtors	10 weeks
Average credit allowed by creditors	4 weeks
Average stock carrying (in terms of sales requirements)	8 weeks

Add 10% to computed figures to allow for contingencies.

39. a. Kamath Ltd. is engaged in customer retailing. You are required to forecast its working capital requirements from the following information

Projected annual sales	Rs. 6,50,000
Percentage of net profit on cost of sales	25%
Average credit allowed to debtors	10 weeks
Average credit allowed by creditors	4 weeks
Average stock carrying (in terms of sales requirements)	8 weeks

Add 20% to allow for contingencies.

(OR)

b. From the following estimates, calculate the average amount of working capital required:

(a) Average amount locked-up in stocks:

Stock of finished goods & W.I.P.	10,000
Stock of stores, materials, etc.	8,000

(b) Average credit given:

Local sales: 2 weeks credit	1,04,000
Sales outside the state: 6 weeks credit	3,12,000
Time available for payment:	
For purchases: 4 weeks	78,000
For wages: 2 weeks	2,60,000

Add 10% to allow for contingencies

40. a. Explain the concepts of working capital.

(OR)

b. Explain the types of working capital.

UNIT-V

41. a. What is financial market? Briefly explain its types.

(OR)

b. Write about the advantages of Call money market.

42. a. Write about the advantages of Treasury bill.

(OR)

b. Write about the advantages of Commercial papers.

43. a. Define Primary market. List out the functions of Primary market.

(OR)

b. Distinguish between Primary and Secondary market.

44. a. Define Secondary market. List out the functions of Secondary market.

(OR)

b. Distinguish between Capital and Money market.

45. a. Define Money market. List out the functions of Money market.

(OR)

b. Explain the objectives of Call Money market.

46. a. What is Treasury bill? Explain its objectives.

(OR)

b. Explain the functions of Securities market.

47. a. Describe the recent trends in primary market.

(OR)

b. Explain the functions of Commercial Bill market.

48. a. Describe the recent trends in secondary market.

(OR)

b. Explain the functions of Collateral Loan market.

49. a. Write the recent trends in capital market.

(OR)

b. Explain briefly the objectives of Commercial papers.

50. a. Write about the recent trends in money market.

(OR)

b. Explain briefly the objectives of Certificate of deposit.

Section – D

(12 marks each)

UNIT I

1. Explain the importance of Corporate Finance in detail.
2. Explain the nature and scope of emerging Corporate Finance in detail.
3. Enumerate in detail about the objectives of Corporate Finance.
4. Write in detail about the nature and scope of Corporate Finance.
5. Explain in detail about Profit maximization.
6. Write in detail about Wealth maximization.
7. Enumerate in detail about the role and responsibilities of financial manager.
8. Enumerate in detail about the characteristics of sound financial plan.
9. Write the arguments in the criticism of profit maximization.
10. “Finance is the life blood for starting any company” – discuss in detail.

UNIT-II

11. What is Financial Planning? Explain its scope.
12. Write in detail the factors of financial planning.

13. Explain the features and objectives of financial planning.
14. Explain in detail the essentials of a sound financial plan.
15. Write about the importance of financial planning in detail.
16. What is fixed capital? Explain the factors determining fixed capital.
17. What is working capital? Mention the factors determining working capital.
18. Write about Capitalization and its theories.
19. Write in detail the causes and effects of over capitalization.
20. Explain the causes and effects of under capitalization.

UNIT-III

21. Enumerate in detail about the types of Share Capital.
22. Explain in detail about the types of leverages.
23. Enumerate in detail about the financial leverage and its significance. How is the degree of financial leverage measured?
24. Enumerate in detail about the operating leverage and its significance. How is the degree of operating leverage measured?
25. Buddha Ltd. has a choice of the following three financial plans. You are required to ascertain the financial leverage in each case and interpret it.

Particulars	Plan I (In Rs.)	Plan II (In Rs.)	Plan III (In Rs.)
Equity share capital	6 lakh	5 lakh	2 lakh
10% debentures	4 lakh	5 lakh	8 lakh
EBIT	2.5 lakh	2.5 lakh	2.5 lakh

26. Peer Ltd. has sales of Rs.12 lakh. The variable cost is 50% of sales, while the fixed cost amounts to Rs.3,60,000. The amount of interest on long term debt is Rs.1,20,000. You are required to calculate the combined leverage and illustrate its impact if sales increases by 10%.
27. A company has sales of Rs.5,00,000, Variable costs of Rs.3,00,000, Fixed costs of Rs.1,00,000 and long term loans of Rs.4,00,000 at 10% rate of interest. Calculate the i) Financial Leverage ii) Operating Leverage iii) Combined leverage.
28. From the following projections given in respect of Olive Ltd., Calculate (a) Operating Leverage, (b) Financial Leverage, (c) Combined Leverage.

Output	3,00,000 units
Fixed cost	Rs.3,50,000
Unit variable cost	Re.1
Interest expenses	Rs.25,000
Unit selling price	Rs.3

29. Write in detail about Combined leverage? How is the degree of Combined leverage measured?

30. Explain in detail about the Business and financial risks.

UNIT-IV

31. What is cost of capital? What are the factors determining the cost of capital?

32. What is weighted average cost of capital? Explain the steps to compute WACC.

33. Sakthi Ltd. Issued 20,000 8% debentures of Rs. 100 each on 1st April 2009. The cost of issue was Rs. 50,000. The company's tax rate is 35%. Determine the cost of debentures (before as well as after tax) if they were issued, (a) at par; (b) at a premium of 10% (c) at a discount of 10%.

34. From the following capital structure of a company, calculate the overall cost of capital, using (a) book value weights and B) market value weights

Source	Book value	Market value
Equity Share Capital (10 shares)	45,000	90,000
Retained Earnings	15,000	
Preference Share Capital	10,000	10,000
Debentures	30,000	30,000

The after-tax cost of different sources of finance is as follows: Equity Share Capital: 14%; Retained Earnings: 13%; Preference Share Capital: 10%; Debentures: 5%.

35. A company was recently formed to manufacture a new product. It has the following capital structure:

(i) 9% Debentures	10,00,000
(ii) 7% Preference shares	4,00,000
(iii) Equity shares (48,000 shares)	16,00,000
(iv) Retained earnings	10,00,000
	40,00,000

The market price of equity share is Rs.80. A dividend of Rs. 8 per share is proposed. The company has marginal tax rate of 50% and shareholders individual tax rate is 25%. Compute after tax weighted average cost of capital of the company.

36. Explain in detail the sources of working capital.

37. Explain the types of working capital.

38. X Co. desires to purchase a business and has consulted you and one point on which you are asked to advise them is the average amount of working capital which will be required in the first year's working. You are given the following estimates and are instructed to add 10% to your computed figures to allow for contingencies.

(i) Average amount locked up in stocks	Rs.
Stock of finished goods	5,000
Stock of stores and materials	8,000
(ii) Average credit given:	
Inland sales-6 weeks	3,12,000
Export sales-1½ weeks	78,000
(iii) Lag in payment of wages and other outgoings:	
Wages-1½ weeks	2,60,000
Stores, materials etc.-1½ months	48,000
Rent, royalties etc.-6 months	10,000
Clerical staff salary- ½ month	62,400
Manager salary- ½ month	4,800
Miscellaneous expenses- 1½ months	48,000
(iv) Payment in advance:	
Sundry expenses (paid quarterly in advance)	8,000
(v) Undrawn profits on the average throughout the year	11,000

Set up your calculations for the average amount of working capital required.

39. From the following information, prepare a statement showing the estimated working capital requirements:

Budgeted sales – Rs. 2,60,000 p.a

Analysis of cost and profit of each unit

Raw materials Rs. 3

Labour	Rs. 4
Overheads	Rs. 2
Profit	Rs. 1
Selling price per unit	Rs. 10

It is estimated that

(a) Pending use, raw materials are carried in stock for three weeks and finished goods for two weeks.

(b) Factory processing will take 3 weeks.

(c) Suppliers will give five weeks credit and customers will require eight weeks credit.

It may be assumed that production and overheads accrue evenly throughout the year.

40. Cost sheet of a company provides the following particulars:

Elements of cost

Raw materials - 40%

Labour – 10%

Overheads – 30%

The following particulars are also available:

(i) Raw materials remain in stock for 6 weeks

(ii) Processing time: 4 weeks

(iii) Finished goods are in stock for 5 weeks

(iv) Period of credit allowed to debtors: 10 weeks

(v) Lag in payment of wages: 2 weeks

(vi) Period of credit allowed by creditors: 4 weeks

(vii) Selling price: Rs. 50 per unit

(viii) Production in units: 13,000 p.a.

Prepare an estimate of working capital.

UNIT-V

41. Enumerate in detail about the classification of Financial Markets.

42. Explain in detail about Organised Financial Markets for raising corporate funds.

43. Explain recent trends in Capital market in detail.

44. Enumerate in detail about Primary market.

45. Explain in detail about Secondary market.

46. Explain the recent trends in Money market in detail.
47. Explain in detail about the types of Financial Markets.
48. Enumerate in detail about the Financial markets in India.
49. Explain in detail about the short term borrowings of the Government.
50. Distinguish between Capital market and Money market.

SEMESTER – III

Core Skill Based - BANKING AND FINANCIAL SERVICES Sub Code: 21UCSB31
QUESTION BANK

Section A

Choose the correct answer:

Unit 1

1. _____ is a place or mechanism where funds or savings are transferred from one section to another section of financial system.
a) **Financial market** b) Financial Institution c) Financial instrument d) Financial Services
2. A _____ is place or mechanism which facilitates the transfer the resources from one entity to another.
a) Business b) **Market** c) Institution d) Finance system
3. _____ deals with the new issues of securities.
a) **Primary market** b) Secondary market c) Capital market d) Money market
4. Market for existing securities as known as _____.
a) Primary market b) **Secondary market** c) Capital market d) Money market
5. The survival of the secondary market depends upon the efficiency of _____.
a) **Primary market** b) Secondary market c) Capital market d) Money market
6. The function that facilitates the sale of securities from company to investors is called _____.
a) Guarantee b) **Distribution** c) Channelizing d) Mobilization
7. _____ aims at guaranteeing the subscription of the public issue.
a) **Underwriting** b) Distribution c) Guaranteeing d) Financial instrument
8. The union Government enacted the securities contracts regulation act in _____.
a) **1956** b) 1965 c) 1985 d) 1967
9. _____ is generally referred to the market for long term funds.
a) Money market b) **Capital market** c) Financial market d) Secondary market
10. _____ system acts as a nerve system of the country's economy.
a) Treasure b) Capital c) **Financial** d) Political
11. _____ is the low cost alternatives to bank loans.
a) Bill of exchange b) **Commercial paper** c) Legal documents d) Treasure bills
12. _____ promotes self employment and improves employment level among the country.
a) **Financial system** b) Financial market c) Financial intermediaries d) Financial position
13. _____ promotes self employment and improves employment level among the country.

- a) **Financial system** b) Financial market c) **Financial intermediaries** d) Financial position
14. Primary market instrument _____
a) IPO b) Right issue c) Debentures d) **Both a and b**
15. Secondary market is also known as _____
a) Primary market b) **Stock market** c) Money market d) Money instrument
16. _____ one of the safest money market instruments, are short term borrowing instruments of the central government.
a) Bill of exchange b) Commercial paper c) Legal documents d) **Treasury bills**
17. The _____ stock exchange is considered the oldest in the world.
a) Mumbai b) NSEc) **Amsterdam** d) ISE
18. _____ are the services offered by financial institutions in financial markets.
a) Financial market b) Financial Institution c) Financial instrument d) **Financial Services**
19. The regulations relating to both primary as well as secondary market is regulated by _____
a) SEBI b) Stock exchange c) **Both a & b** d) RBI
20. The survival of the secondary market depends upon the efficiency of the _____
a) Capital market b) **Primary market** c) Money market d) Source market

Unit 2

1. The first bank in India called the General bank of India was established in the _____
a) **1786** b) 1796 c) 1766 d) 1946
2. The word bank is derived from the word _____
a) Banco b) **Bancus** c) Banus d) Bankes
3. The _____ was the first bank to issue credit in India.
a) Canara bank b) **Andhra bank** c) Syndicate bank d) Indian bank
4. A bank is an institution which deals in _____
a) Credit b) Debit c) **Money** d) Transaction
5. Bank control the supply of money and _____
a) **Credit** b) Debit c) Money d) Transaction
6. Most banks operating in India are structured on the basis of _____
a) Unit banking b) Group banking c) Chain banking d) **Branch banking**
7. Automated Teller Machine can be classified into how many types _____
a) 4 b) **3** c) 5 d) 6
8. _____ of ATMs are placed in banking hall, hotels, airport, railway stations or any other crowded places.
a) **Lobby type** b) Wall type c) Drive in type d) Drive out type
9. _____ are those deposits which can be withdrawn at any time by means of cheques.
a) Fixed deposits b) **Current deposits** c) Savings deposits d) Withdrawal Slip
10. _____ is a system in which a bank operates in a specified area, which is smaller and

limited.

- a) **Unit banking** b) Group banking c) Chain banking d) Branch banking
11. Traditional banking use to offer mainly _____
- a) Acceptance of deposits b) Lending money c) **Both a & b** c) Diversification
12. _____ is a networking of branches, which enables customers to operate their accounts and avail banking from any branch of the bank.
- a) Banking networking b) **Core Banking solution** c) Infrasoftware solution d) Real time banking
13. _____ are ATM situated in a closed lobby room.
- a) **Wall type** b) Lobby type c) Drive in type d) Slot type
14. Type of ATM still not found in India but are found in western countries.
- a) Wall type b) Lobby type c) **Drive in type** d) Slot type
15. _____ pulls the card inserted and reader the magnetic strip.
- a) Screen reader b) **Card reader** c) Keyboard reader d) Dispenser
16. _____ contains the hard disc data of the ATM
- a) **CPU** b) RAM c) ROM d) Display unit
17. There are _____ types of electronic fund transfer system available to bank customer to remit funds to other bank account anywhere in India.
- a) **Three** b) Two c) Four d) Five
18. The _____ system is a funds transfer mechanism from one bank to another on real time and on gross basis.
- a) NEFT b) **RTGS** c) EFT d) IMPS
19. As per RBI the RTGS transfer the minimum amount should be above _____
- a) **2 lakhs** b) 4 lakhs c) 1 lakh d) 1.5 lakhs
20. _____ is an initiative of National Payments Corporation of India to transfer funds immediately from one account to another account within and across banks.
- a) NEFT b) RTGS c) EFT d) **IMPS**

Unit 3

1. Merchant banker deals with underwrite of _____ money market instruments.
- a) Long term b) **Short term** c) Medium term d) Existing
2. Merchant banking is a _____
- a) **Retail banking** b) Wholesale banking c) Financial banking d) Commercial banking
3. Merchant banks can play highly significant role in _____-
- a) **Mobilizing funds** b) Capital funds c) commercial funds d) Investment funds
4. Merchant banker take care of project management right from _____

10. _____ is considered a type of debt instrument.	

- a) **Venture capital funding** b) Preferred stock c) Corporate bonds d) Treasury bills

Unit – V

- What is a depository?
 - A place where goods are stored temporarily.
 - A financial institution that holds securities and other assets in electronic form.**
 - A government agency responsible for regulating the stock market.
 - A type of insurance company.
- Which of the following is not a type of depository?
 - Bank
 - Central Depository
 - Warehouse
 - Brokerage Firm**
- Which country established the first central depository?
 - United States
 - United Kingdom**
 - Japan
 - Switzerland
- What is the primary purpose of a depository?
 - To buy and sell stocks
 - To store physical commodities
 - To facilitate the trading and settlement of securities**
 - To provide loans to individuals
- Which entity regulates depository participants in India?
 - Securities and Exchange Board of India (SEBI)**
 - Reserve Bank of India (RBI)
 - Ministry of Finance
 - National Securities Depository Limited (NSDL)
- Which of the following is NOT a depository participant in India?
 - Stock Brokers
 - Banks
 - Clearing Corporations
 - Asset Management Companies (AMCs)**
- What is the minimum net worth required for a company to become a depository participant in India?
 - ₹1 crore
 - ₹10 lakhs
 - ₹50 lakhs
 - ₹5 crores**
- DP stands for:
 - Digital Portal
 - Depository Participant**
 - Direct Payment
 - Distributor Partner
- Which of the following is a responsibility of a depository participant?
 - Setting interest rates on loans
 - Issuing new securities
 - Executing trades on behalf of clients**
 - Auditing financial statements
- In which year were depository participants introduced in India?
 - 1987
 - 1990
 - 1996**
 - 2000

Unit – I (2 Marks)

Answer the following in 50 words each:

- What is marketable assets?
- What is non-marketable assets?
- What do you mean by capital market intermediaries?
- What do you mean by money market intermediaries?
- What is organized markets?
- What is unorganized markets?
- What is capital market?
- What is money market?
- Give an example for government securities market.
- What do you mean by call money market?

Unit- II

- What is stock exchange market?
- State any two powers of SEBI
- Write the full form for SEBI.

- 4.What do you mean by Bye- Laws?
- 5.State any one powers of central government.
- 6.Who is ruling authority of securities?
- 7.What are the major conditions to do trade in Stock exchange?
- 8.When did the SEBI came into existence?
- 9.What do you mean by short term securities?
- 10.What is meant by long term securities?

Unit – III

1. What is new issue market?
2. State any one example for new issue market.
3. What is primary market?
4. What is secondary market?
5. What is collection centres?
6. What do you mean by allotment of shares?
7. What is meant by Government securities?
8. What is meant by Statutory agencies?
9. What do you mean by allotment of shares?
10. Write any one intermediary for new issue market.

Unit – IV

- 1.What is capital market?
- 2.What is derivative market?
- 3.What is primary market?
- 4What is secondary market?
- 5.What is collection centres?
- 6.What do you mean by allotment of shares?
- 7.What is meant by Government securities?
8. What is meant by Statutory agencies?
- 9.What do you mean by allotment of shares?
- 10.Write any one intermediary for new issue market.

Unit – V

- 1.Define depository act.
- 2.Who are depository in India?
- 3.What do you mean by depository participant?
- 4.What is Collective Investment Scheme?
- 5.What is meant NSDL?
- 6.What do you mean by CDSL?
- 7.What is grant certificate?
8. What is the minimum paid up capital for being a depository participant?
- 9.When did the depository came into existence in India??
- 10.Write any one type of security.

Unit – I (5 Marks)

Answer the following either (a) or (b) in 150 words each

- 1 a).Briefly explain about the importance of capital market.

(or)

- b) Write short notes on (i) Call Money Market (ii) Commercial Bills Market.

2.a) Enumerate the instruments of Money market.

(or)

- b) Enumerate the instruments of capital market.

3.a) Write short notes on primary market.

(or)

- b) Write short notes on Secondary market.

Unit – II

1 a) Briefly Explain the role of SEBI.

(or)

- b) Explain about the Objectives of SEBI.

2.a) Enumerate the membership in stock exchange.

(or)

- b) Enumerate the powers of central government.

3.a) Write short notes on Bye laws of stock exchange market

(or)

- b) Write short notes on eligibility of stock exchange market.

Unit – III

1.a) Briefly Explain the New issue market.

(or)

- b) Explain the parties involved in the new issue market.

2 .a) Enumerate the role played by Government agencies in new issue market.

(or)

- b) Enumerate the role played by Statutory agencies in new issue market.

3.a) Write short notes on Collection centres.

(or)

- b) Write short notes on Placemnt issue in new issue market.

Unit – IV

1.a) Briefly Explain the needs of capital market.

(or)

b) Explain the functions of capital market.

2 .a) Enumerate the instruments of money market.

(or)

b) Enumerate the needs of money market.

3.a) Write short notes on features of money market.

(or)

b) Write short notes on Placement issue in new issue market.

Unit – V

1.a) Briefly Explain the importance of Depository .

(or)

b) Explain the participants of Depository .

2 .a) Enumerate the Dematerialization.

(or)

b) How will you open a Demat Account?

3.a) Write short notes on Collective Investment Scheme.

(or)

b) Briefly Explain about the application procedure of Collective Investment Scheme.

Unit- I (8 Marks)

Answer the following in 200 words each:

1. Briefly explain the money market.
2. Explain about the capital market.
3. Enumerate the participants involved in capital market.
4. Elucidate the participants involved in money market
5. Briefly explain about treasury bill market.

Unit - II

- 1.Briefly explain the Regulatory Act of SEBI .
- 2.Explain about the Recognition of stock exchange market.
- 3.Enumerate the Powers of SEBI.
- 4.Elucidate the Regulatory Framework of SEBI.
- 5.Briefly explain about the recognition of stock exchange market.

Unit - III

- 1.Briefly explain the Investors protection fund.

- 2.Explain about the Secondary market.
- 3.Enumerate the role of intermediaries in the secondary market.
- 4.Elucidate the Allotment of Shares.

Unit - IV

- 1.Briefly explain about the factoring
- 2.Explain about the Difference between the Capital Market and Money Market..
- 3.Enumerate the parties involved in factoring.
- 4.Elucidate the types of factoring.

Unit -V

- 1.Discuss the Depository Act 1996.
- 2.Explain about the Regulations of SEBI.
- 3.Enumerate the Conditions for Eligibility towards collective scheme.
- 4.Elucidate the Grant of Certificate.
5. Briefly Explain the terms and conditions of Collective Investment Scheme.

QUESTION BANK

B.Com. (Corporate Secretaryship)

Core 4 –Export Import Logistics

Sub. Code : 21UCCC64

Semester VI

(for those who joined in July 2021 and after)

Section-A

(ONE mark)

Choose the correct answer:

UNIT I

- 1.What is the primary objective of business logistics?
a) Maximizing profits
b) Minimizing costs
c) **Enhancing customer satisfaction**
d) Streamlining operations
2. Which of the following is a component of a logistical system?
a) Marketing department
b) Human resources department
c) **Procurement department**
d) Research and development department
- 3.Inbound logistics primarily deals with
a)Customer delivery b)**Material handling** c)Inventory management d)Marketing strategies
- 4.Outbound logistics involves the movement of goods
a) From production to the warehouse
b) **From the warehouse to the customer**
c) Within the production facility
d) From suppliers to the production facility
5. Which function of logistics focuses on demand forecasting and inventory planning?
a) Transportation management b) **Inventory management** c) Warehousing d) Packaging
- 6.The importance of logistics in business lies in its ability to
a) Increase costs
b) Reduce efficiency
c) **Enhance competitiveness**
d) Decrease customer satisfaction
- 7.Which principle of logistics emphasizes continuous improvement and adaptation?
a) Cost minimization b) Customer focus c) **Flexibility** d) Sustainability
- 8.What is a key characteristic of a well-functioning logistical system?
a) Rigidity b) Redundancy c) **Responsiveness** d) Inefficiency
- 9.Which of the following is NOT a function of logistics?
a) Procurement b) Production c) Distribution d) **Marketing**
- 10.The ultimate goal of logistics excellence is to
a) Maximize profits
b) Minimize customer satisfaction
c) **Optimize the flow of goods**
d) Reduce operational efficiency

UNIT II

- 1.Which type of charter involves hiring an entire vessel for a specific voyage or period?
a)Time charter b)**Voyage charter** c) Bareboat charter d) Slot charter
- 2.The Conference System in shipping refers to

- a) **A group of shipping companies collaborating on pricing and capacity**
 b) A legal document outlining the terms of a charter
 c) A type of ship designed for carrying bulk cargo
 d) A route regularly followed by vessels
3. Main characteristic of tramp vessels
 a) follow a fixed schedule and route **b) owned or chartered for a specific voyage**
 c) part of a liner service d) designed for carrying containers
4. General cargo vessels are typically used for transporting
 a) Bulk liquids **b) Packaged goods** c) Cars d) Containers
5. Which type of ship is specifically designed for carrying containers?
 a) Bulk carrier b) General cargo vessel **c) Container ship** d) Ro-Ro vessel
6. What is the current status of Indian shipping in terms of tonnage?
 a) Among the top 5 in the world **b) Among the top 10 in the world**
 c) Among the top 20 in the world d) Among the top 50 in the world
7. Which of the following is a problem faced by Indian shipping?
a) Lack of skilled workforce b) High level of technology adoption
 c) Excellent port infrastructure d) Strong government support
8. What is the main purpose of a charter party in shipping?
 a) **rights and responsibilities of the charterer and the shipowner**
 b) schedule the route of a vessel
 c) secure finance for a new ship
 d) regulate the size of a shipping vessel
9. Which type of ship is best suited for transporting large quantities of grain or ore?
 a) Container ship **b) Bulk carrier** c) General cargo vessel d) Tanker
10. Major advantage of liner vessels compared to tramp vessels?
 a) Lower cost b) flexibility in scheduling
c) guaranteed cargo volume d) Ability to carry a wider range of cargo types

UNIT - III

1. Clearing and Forwarding agents are also called as -----.
 a. **Customs House Agents** b. Service agents c. Risk Managers d. Controlling agents
2. The Captain of the ship issues a document called ----- as soon as the goods are loaded on board the vessel.
 a. Let export order b. Let ship order c. Carting order **d. Mate's Receipt**
3. For movement of goods by sea or air, customs permission for shipment of goods is given on a prescribed document known as -----.
 a. Let export order b. Let ship order **c. Shipping Bill** d. Mate's Receipt
4. The system of computerised processing of Shipping Bills to provide efficient customs clearance service to exporters is called -----
 a. **Indian Customs Electronic Data Inter-Change System** b. Certificate of Insurance
 c. Mate's Receipt d. Shipping order
5. ----- on the shipping bill indicates the completion of physical examination of goods.
 a. Let Ship Order **b. Let Export Order** c. Mate's Receipt d. Carting Order

6. ----- is the authorisation to the master of vessel to ship goods on board.
 a. **Let Ship Order** b. Let Export Order c. Mate's Receipt d. Carting Order
7. For movement of goods by road/rail, the prescribed document on which customs permission given is called -----.
 a. Let Ship Order b. Let Export Order c. Mate's Receipt d. **Bill of Export**
8. ----- is used when shipping bills are processed electronically in customs house.
 a. **SDF Form** b. GR Form c. Bill of Lading d. Carting Order
9. ----- is used when shipping bills are processed manually in customs house.
 a. SDF Form b. **GR Form** c. Bill of Lading d. Carting Order
10. Exporters have to obtain ----- from the Directorate of Foreign Trade, prior to filing for customs clearance of export goods.
 a. Let Ship Order b. Let Export Order
 c. **PAN based Business Identification Number** d. Carting Order

UNIT IV

1. What is the purpose of an Import Licensing?
 a) **To restrict the import of certain goods** b) To regulate the quality of imported goods
 c) To determine the customs duty on imports d) To promote the import of specific goods
2. Which of the following documents is NOT required for imports?
 a) Bill of Lading b) **Import License** c) Commercial Invoice d) Packing List
3. Purpose of Indian Customs Electronic Data Interchange Systems (ICES) for Import
 a) **To streamline import procedures**
 b) To monitor export activities
 c) To regulate import tariffs
 d) To facilitate communication between customs and importers
4. Which of the following is a step in the import clearance procedure?
 a) Export declaration b) **Payment of import duties**
 c) Issuance of import license d) Quality inspection of goods
5. What are the types of import procedures?
 a) **Direct and indirect import** b) Government and private import
 c) Commercial and non-commercial import d) General and specific import
6. Main purpose of import procedures and techniques
 a) To increase import tariffs b) **To facilitate the importation of goods**
 c) To discourage import activities d) To regulate the quality of imported goods
7. Role of a Bill of Lading in imports
 a) **contract of carriage** b) certifies the origin of the goods
 c) document of title to the goods d) customs duty on imports
8. What is the purpose of import documentation?
 a) To track the movement of imported goods
 b) **To verify the value and quantity of imported goods**
 c) To determine the customs duty on imports
 d) To regulate the quality of imported goods
9. What is the significance of import licensing?
 a) To promote fair trade practices b) **To regulate the import of goods**

- c) To determine the customs duty on imports d) To monitor export activities
10. Purpose of import clearance procedure?
- a) **To facilitate the importation of goods** b) To discourage import activities
- c) To determine the customs duty on imports d) To regulate the quality of imported goods

UNIT - V

1. The standardization of the pre-shipment export documents is done on the basis of the system, known as -----
 a. Shipping Bill b. **Aligned Documentation System** c. Export order d. Shipping order
2. ----- is the seller's bill for merchandise or goods sold by him.
 a. **Commercial Invoice** b. Bill of Exchange c. Proforma Invoice d. Consular Invoice
3. Shipping Bill is prescribed by ----- authority.
 a. Income Tax b. **Customs** c. Trade d. Foreign Exchange
4. The document required when goods are exported by sea, it is called -----.
 a. **Shipping Bill** b. Bill of Exchange c. Proforma Invoice d. Consular Invoice
5. ----- is required to be prepared for export of computer software.
 a. ARE-1 Form b. GR Form c. **Softex form** d. ARE-2 form
6. Main documents for claiming rebate in central excise duty are -----.
 a. **ARE-1 Form** b. GR Form c. SDF form d. ARE-2 form
7. ----- shipping bill is used for export of goods entitled to duty drawback.
 a. Free b. Dutiable c. Coastal d. **Drawback**
8. ----- is a receipt issued by an airline for the carriage of goods.
 a. **Airway Bill order** b. Carting order c. Shipping Bill d. Mate's Receipt
9. ----- is a document containing guarantee of a bank to make payment to the exporter.
 a. **Letter of Credit** b. Bill of Exchange c. Consular Invoice d. Mate's Receipt
10. The document issued by the shipping company or the agent acknowledging the receipt of cargo on board is called -----.
 a. Let export order b. Let ship order c. **Bill of Lading** d. Mate's Receipt

Section – B (Two Marks)

UNIT I

11. Define Logistics.
12. What are the primary objectives of business logistics?
13. Identify and explain three key components of a logistical system.
14. Differentiate between inbound and outbound logistics?
15. What are the primary functions of logistics within an organization?
16. Discuss the importance of logistics in improving customer satisfaction.
17. Name two principles of logistics excellence.
18. Explain the concept of a logistical mission.
19. How does effective management of inbound logistics contribute to cost reduction and operational efficiency?
20. Briefly discuss the significance of outbound logistics in ensuring timely delivery and customer satisfaction.

UNIT II

- 11.Explain the difference between time charter and voyage charter in shipping.
- 12.Describe the types of ships commonly used in shipping and their specific features.
- 13.Discuss the role of the Conference System in regulating shipping.
- 14.Define the term "charter party" and explain its importance in shipping contracts.
- 15.Differentiate tramp vessel and linear vessel.
- 16.Explain significance in the transportation of bulk cargo.
- 17.Describe the Indian shipping industry's current status.
- 18.Discuss the challenges faced by Indian shipping.
- 19.What are the main features of container ships,
- 20.Explain the concept of general cargo vessels and their role in transporting various types of goods.

UNIT - III

11. Write a short note on clearing and forwarding agents.
12. What are the services rendered by clearing and forwarding agents.
13. Define Exempted Units.
14. What are the ways in which an exporter can claim central excise clearance?
15. Write a note on Mate's receipt.
16. What is Bill of Lading?
17. Write a note on ICES.
18. Define Shipping Bill.
19. Write a note on Let Ship Order.
20. Write a note on Let Export Order.

UNIT IV

- 11.Explain the concept of import licensing and its importance.
- 12.Describe the documents required importation process.
- 13.Discuss the role of Indian Customs Electronic Data Interchange Systems (ICES) for Import in streamlining import procedures.
- 14.Explain the import procedures and techniques used in international trade.
- 15.Outline the steps involved in the import clearance procedure.
16. Explain import significance in the context of international trade.
- 17.Discuss the types of imports and their implications.
- 18.Describe the role of a Bill of Lading in imports and its importance
- 19.Explain the concept of import documentation and its importance.
- 20.Discuss the significance of import procedures and techniques in facilitating the importation of goods.

UNIT - V

11. What are the stages to set up an export firm?
12. Write a note on registration cum Membership Number.

13. What is the purpose of Business Identification Number?
14. Write a short note on Excise Control Code Number.
15. Define Negative List.
16. What is Aligned Documentation System?
17. Write a note on Airway Bill.
18. Write a short note on Bill of Entry.
19. What is Commercial Invoice?
20. Define of Letter of Credit.

Section-C (Five Marks)

Answer all questions choosing either (a) or (b) in 200 words each:

UNIT I

21a) Discuss the nature and concepts of logistics, highlighting its evolution and importance in modern business operations.

(Or)

b) Explain the objectives of business logistics and how they align with overall organizational goals.

22a) Identify and explain the components of a logistical system.

(or)

b) Discuss the significance of inbound logistics in supply chain management.

23a) Describe the functions of logistics within an organization.

(or)

b) Analyze the importance of outbound logistics in maintaining a competitive edge in the market.

24a) Evaluate the importance of logistics in today's globalized business environment enabling trade and economic growth.

(or)

b) Discuss principles of logistics excellence and their significance in achieving operational excellence and customer satisfaction.

25a) Explain the concept of a logistical mission in guiding logistical strategies.

(or)

b) Discuss the challenges and opportunities associated with global logistics management in today's interconnected world.

UNIT II

21.a Discuss the different types of charters used in shipping.

(or)

b. Explain the role of the Conference System in regulating shipping practices

22.a. Describe the advantages of vessels in shipping industry.

(or)

b. Analyze the types of ships commonly used in shipping goods.

23.a. Analyze the advantages and disadvantages of each vessel type for shipping companies.

(or)

- b. Evaluate the impact of conferences on shipping practices and market competition.
- 24.a. Discuss the operational characteristics of bulk carriers.
- (or)
- b. Analyze the role of container ships in modern shipping
- 25.a. Provide an overview of the Indian shipping industry's current status.
- (or)
- b) Discuss the major challenges facing the Indian shipping industry today.

UNIT – III

21. a. Explain the role of clearing and forwarding agents
- (or)
- b. Explain the optional services rendered by clearing and forwarding agents.
22. a. Write about the excise clearance procedure
- (or)
- b. Write briefly about the procedure for Excise clearance under Bond/Letter of Undertaking.
23. a. Write a note on the customs examination of cargo at Docks.
- (or)
- b. Explain the procedure involved in the procedure involved in the process of collecting Bill of Lading.
24. a. What are the Objectives of Customs clearance.
- (or)
- b. Explain the advantages to exporters/importers and department.
25. a. Discuss the differences in documentation and procedures between manual and computerised customs clearance.
- (or)
- b. Write the objectives of Indian Customs Electronic Data Inter-Change System.

UNIT IV

- 21.a.Discuss the types of import procedures and their relevance in international trade.
- (or)
- b.Explain the significance of import licensing in regulating the import of goods.
- 22.a.Describe the documents required importation process.
- (or)
- b.Discuss the role of Indian Customs Electronic Data Interchange Systems (ICES) for Import in improving import procedures.
- 23.a.Explain the steps involved in the import clearance procedure
- (or)
- b.Discuss the types of imports and their implications.
- 24.a.Discuss the role of import procedures and techniques in ensuring the smooth flow of goods across borders.
- (or)
- b.Explain the concept of import documentation and its importance.
- 25.a.Analyze the importance of import procedures and techniques in promoting international trade.
- (or)

- b. Discuss the significance of import licensing in regulating the import of goods.

UNIT –V

21. a. Write a note on the sales tax formalities for exports.
(or)
b. Under what conditions is the central excise levy applicable.
22. a. Write a note on Export Licensing.
(or)
b. Give a note on the Import Export Code Number?
23. a. What are the advantages of Aligned Documentation System?
(or)
b. Discuss the commercial documents required for export of goods.
24. a. What is consular invoice? Explain its significance.
(or)
b. What is Bill of Lading? Explain its Types.
25. a. Define Bill of Exchange. What are the types of Bill of Exchange.
(or)
b. Explain the regulatory documents related to inspection and excisable goods.

Section – D (Eight Marks)

Answer any FIVE questions in 400 words each:

UNIT I

26. Discuss the evolution and meaning of logistics in the context of modern business operations.
27. Define the concept of a logistical mission and its significance in guiding organizational logistics strategies.
28. Evaluate the role of each component in achieving logistical efficiency and effectiveness.
29. Compare and contrast inbound and outbound logistics, highlighting their key differences and similarities.
30. Explain the functions of logistics contributes to the overall logistical objectives and organizational performance.

UNIT II

26. Critically analyze the types of charter parties used in shipping with their advantages, disadvantages.
27. Explain the significance of containerization in modern shipping.
28. Discuss the concept of bulk carriers in shipping, analyzing their design, construction, and operation, and their role in transporting bulk commodities.
29. Evaluate the role of Indian shipping, considering its strengths, weaknesses, opportunities, and threats.
30. Analyze the challenges and opportunities in the Indian shipping industry

UNIT - III

26. Explain the services rendered by the clearing and forwarding agents.
27. Explain the procedure for central excise clearance under claim of Rebate.

28. Discuss the procedure for shipment of export cargo.
29. Explain the documents required in customs clearance of export shipment.
30. Detail the procedure to be followed for obtaining computerised customs clearance of export shipment by sea.

UNIT IV

26. Discuss the role of import licensing and import procedures in regulating international trade.
27. Discuss the role of Indian Customs Electronic Data Interchange Systems (ICES) for Import in improving import procedures.
28. Explain how a Bill of Lading serves as a contract of carriage and a document of title to the goods.
29. Explain the concept of import procedures and techniques in facilitating the importation of goods.
30. Explain the importance of accurate and complete import documentation for customs clearance and trade compliance.

UNIT - V

26. Describe the formalities and registrations with the different authorities before an exporter can accept export contract.
27. Explain the regulatory documents related to goods.
28. Discuss the regulatory documents related to shipment.
29. Write in detail the regulatory documents related to payment.
30. Explain the documents related to Foreign Exchange Regulations.

St. Mary's College (Autonomous) Thoothukudi
Department of Economics
Syllabus 2021-2022

SEMESTER- I			
CORE – I		MICRO ECONOMICS – I	
Code: 21UECC11	Hours / week :5	Hrs / Sem.: 75	Credits :4

Objectives:

- To develop the understanding of basic Micro economic concepts
- To equip the students with micro economic theories with graphic illustrations
- To develop the skills of analysis and application of the principles to the real -world problems

Course Outcomes

CO. No	Upon completion of this course, students will be able to	PSO's addressed	CL
CO 1	Describe and illustrate basic concepts such as Nature, Scope and Subject matter of Economics, The basics of Micro Economics and Macro Economics.	2, 4	Un
CO 2	identify and apply the important concepts and terminologies such as Utility analysis, law of demand and consumer surplus.	1,6	Ap
CO 3	To understand the application of indifference curves and describe consumer equilibrium with the help of law of equi-marginal utility.	4	Cr
CO 4	analyse the operation of the law of variable proportions and identify the three stages of production	6	Ap
CO 5	state the concept of total product, average product and marginal product; explain the nature and relationship of total, average and marginal product curves;	2, 1	Cr
CO 6	Describe the basic economic analysis and laws of production and consumer behaviour	7	An

SEMESTER- I			
CORE – I		MICRO ECONOMICS – I	
Code: 21UECC11	Hours / week :5	Hrs / Sem.: 75	Credits :4

Unit I -Introduction to the Concepts of Economics **15 hrs**

Definition: Adam Smith, Alfred Marshall, Lionel Robbins and Samuelson approaches – Nature and scope of Economics -Micro and Macro Economics – Basic Concepts and types of Goods and Utility

Unit II - Cardinal Utility Analysis **15 hrs**

Meaning of Cardinal Utility – Human Wants and Utility– Law of Diminishing Marginal utility– Law of Equi-Marginal Utility- Law of Demand – Illustration, Assumptions and determinants of Demand – Elasticity of Demand – Meaning, Types and Measurement –Consumer Surplus

Unit III - Ordinal Utility Analysis **15 hrs**

Meaning of Ordinal Utility – Indifference Curves – Properties – Diminishing Marginal Rate of Substitution– Consumer's Equilibrium – Price Effect, Income Effect and Substitution Effect

Unit IV - Factors of Production **15 hrs**

Meaning and Features: Land, Labour, Capital and Organisation – Production Function: Law of Variable Proportions and Laws of Returns to Scale – Economies and Diseconomies of Scale

Unit V - Cost and Revenue Analysis **15 hrs**

Cost Concepts – Short Run and Long Run Cost Curves - Concepts of Revenue – Revenue in different market conditions

Text Book: Pazhani, Micro Economics, 4th Edition, J.P.Publishers, Nagarcoil, 2019.

Books for Reference:

1. Maria John Kennedy, Microeconomics Theory, 3rd Edition, Prentice Hall Pvt Ltd, 2011.
2. Dominick Salvatore – Principles of Micro Economics, 5th Edition, Oxford University Press, New Delhi, 2009.
3. M.L.Seth, Micro Economics, 7th Revised Edition, Lakshmi Narain Agarwal Educational Publishers, Agra, Publication, 2001.
4. M.L.Jhingan, Micro Economic Theory, 7th Edition, Vrinda Publications, Delhi, 1998.
5. S.Sankaran - Economic Analysis, 3rd Edition, Margham Publications, Madras, 1991.

CORE – I MICRO ECONOMICS – I -21UECC11

Semester I– November 2021

(For those who joined in July 2021 and after)

QUESTION BANK

SECTION A

Choose the correct answer:

UNIT I

- Which one of the following definition of Economics is associated with the name of Lionel Robbins? (A) Welfare definition **(B) Scarcity definition** (C) Growth definition (D) Wealth definition
- Who considered Political Economy as “an enquiry into the nature and causes of the wealth of nations”? (A) **Adam Smith** (B) J.B.Say (C) Marshall (D) Keynes
- The author of wealth definition is: (a) Alfred Marshall b) Lionel Robbins c) **Adam Smith** d) Samuelson
- Who is called as the “Father of Economics”?
a) **Adam Smith** b) Alfred Marshall c) Lionel Robbins d) T.R.Malthus
- Utility can be measured in terms of _____
a) Units b) **Utils** c) Kilogram d) Liter
- Economics is a ----- a) positive science b) normative science c) **Both** d) none
- In economics, we make use of ----- a) deductive method b) inductive method c) **both** d) none
- River water is a case of _____
a) **Free Good** b) material good c) economic good d) perishable good
- ‘Utility can be measured in terms of money’ who said this?
a) Adam Smith b) **Alfred Marshall** c) J.R. Hicks d) J.M.Keynes
- Human wants are _____ which means it may repeat again and again
a) **Recurring** b) complementary c) competitive d) variable

UNIT II

- Cardinal Utility analysis says a) **Utility can be measured** b) Utility cannot be measured c) Utility can be compared d) Utility can neither be compared nor measured.
- The Law of diminishing Marginal Utility is also called as ----- a) **Goosen's First Law of Consumption** b) Law of Gravitation c) Law of tides d) Labour laws
- When total utility is maximum, marginal utility will be _____
a) **Zero** b) maximum c) Increasing d) Neutral
- Consumer's surplus is _____
a) Extra quantity bought b) bonus c) **difference between potential price and actual price** d) Extra price paid
- An indifference curve is also known as _____
a) **Satisfaction curve** b) MR curve c) AR curve d) TR curve.
- Indifference curve analysis is based on _____
a) **Ordinal system** b) Cardinal system c) Geometrical system d) Number system
- The main characteristics features of indifference curve is a) **Convex to the origin**
b) Concave to the origin c) Intersect each other d) upward sloping
- When a consumer is said to be in equilibrium, according to Hicks?

- a) **Budget line is tangent to the IC curve** b) Budget line cuts the IC curve c) Budget line is vertical
d) Budget line is horizontal
19. An indifference curve is always _____ to the origin
a) Concave b) vertical c) horizontal **d) convex**
20. Which one is not an assumption of IC Analysis? **a) Constant marginal utility** b) Given scale of preferences between X and Y c) Diminishing Marginal Rate of Substitution d) utility is comparable

UNIT III

21. _____ means desire supported by purchasing power & willingness to use it
a) Demand b) supply c) production d) exchange
22. Change in demand due to change in the price of another commodity is -----
a) Price demand b) income demand c) derived demand **d) cross demand**
23. The demand for producers' goods is -----
a) Price demand b) income demand **c) derived demand** d) cross demand.
24. The Law of Demand states that ----
a) when income raises demand rises **b) When price raises demand raises** **c) When price falls demand raises** d) when price falls demand falls
25. The change in the demand for X due to change in the price of Y is -----
a) Price elasticity b) Income elasticity **c) Cross elasticity** d) Unit elasticity
26. In _____ method the formula L/U is used to measure Elasticity of demand
a) Percentage method b) Total outlay method c) Arc method **d) Point Method**
27. Who introduced the total outlay method of measuring elasticity of demand?
a) Adam Smith **b) Marshall** c) J.R. Hicks d) T.R. Malthus
28. The Finance Minister has to select, commodities for which demand is _____ to impose taxes.
a) Elastic **b) Inelastic** c) Unitary d) Infinitely elastic
29. The effectiveness of price controls depends upon _____
a) Elasticity of demand b) Law of demand c) Marginal utility d) Consumer's Surplus
30. In the case of Giffen goods the demand curve will be _____
a) Horizontal b) Downward Sloping **c) Upward sloping** d) Vertical line

IV UNIT

31. _____ includes all gifts of nature like Water, Air, Sunlight, etc.
a) Land b) Capital c) Goods d) Services
32. The important characteristics of _____ are highly perishable, inseparable from its owners and differs from machine a) Land **b) Labourer** c) Capital d) Entrepreneur
33. _____ of labour depends upon education, working conditions and wages.
a) Efficiency b) Strength c) Efforts d) Health
34. Growth of _____ depends on the power to save and the will to save
a) Capital b) Economy c) Banks d) Markets
35. _____ is a factor of production which is the result of saving.
a) Labour b) Land **c) Capital** d) Organisation
36. Who is the key stone of the business arch?
a) Capitalist **b) Organizer** c) landlord d) Labourer
37. Which factor is having a backward sloping supply curve?
a) Land **b) Labour** c) Capital d) Organisation.
38. Who is the innovator in modern business?

- a) Landlord b) Labourer c) Capitalist **d) entrepreneur**
39. As land differs in fertility Labourer differs in _____
- a) Efficiency** b) Strength c) Efforts d) Health
40. _____ is the major function of an Entrepreneur in modern business
- a) Invention **b) Innovation** c) Hard work d) Investment

UNIT V

41. The Law of Variable proportions is also called as _____ **a) Law of Proportionality**
- b) Laws of Returns c) Law of Diminishing Returns d) Law of increasing returns
42. _____ of scale of production is the advantages enjoyed by the large scale production
- a) Economies** b) Diseconomies c) Localisation d) Mechanisation
43. _____ of production is one of the important factors which determine the volume and cost of production.
- a) Factors **b) Scale** c) Method d) Technique
44. In operation of the law of variable proportions, how many factors has to be varied -----
- a) One** b) Two c) Three d) Four
45. The Law of Variable proportions relates to _____ only
- a) Long run** b) Short run c) very short period d) very long period
46. Returns to scale is applicable to _____
- a) Short run b) Medium run **c) Long run** d) Secular period
47. The internal economies of large scale production are of _____ kinds
- a) 5** b) 4 c) 3 d) 2
48. The large scale concerns have great advantage in the matter of _____
- a) Management** b) Quality of the product c) free from labour problems d) market failure
49. Large scale firms may slowly turn into _____
- a) Competitive **b) monopoly** c) oligopoly d) duopoly
50. In operation of the law Returns to scale, how many factors has to be varied?
- a) One **b) Two** c) Three d) Four

Section B

Answer in about 50 words each:

UNIT I

- 1) What is the scarcity definition of Economics?
- 2) Mention the main divisions of economics.
- 3) Define the concept utility
- 4) Distinguish between cardinal utility and ordinal utility
- 5) State & explain free goods and economic goods.
- 6) What do you mean human wants?
- 7) Explain the scope of Economics
- 8) Mention the characteristics of economic laws.
- 9) What is the wealth definition of Economics?
- 10) What is the growth definition of Economics?

UNIT II

- 11) What is the Law of Diminishing Marginal Utility?
- 12) What are the exceptions of Law of Diminishing Marginal Utility
- 13) What are the criticisms of Law of Diminishing Marginal Utility

- 14) What are the importance of Law of Diminishing Marginal Utility
- 15) What do you mean by Consumer's Surplus
- 16) Explain the ordinal utility analysis
- 17) What do you mean by indifference schedule?
- 18) What is an indifference map?
- 19) Define consumer's equilibrium
- 20) What are the properties of indifference curve?

UNIT III

- 21) Define Demand
- 22) What are the various types of demand?
- 23) What is Law of Demand?
- 24) Write an individual demand schedule
- 25) Draw the exceptional demand curve
- 26) What do you mean by Elasticity of demand?
- 27) Write the formula to measure Elasticity of demand
- 28) Mention the various types of Elasticity of demand
- 29) Explain the concept Income Elasticity
- 30) What do you mean by cross elasticity?

UNIT IV

- 31) What are the four factors of production?
- 32) Define Land
- 33) Define Labour
- 34) Define Capital
- 35) What are various steps in capital formation?
- 36) Who is an Entrepreneur?
- 37) What is division of labour?
- 38) What are the various types of division of labour
- 39) What is Localisation
- 40) Explain the concept Decentralisation

UNIT V

- 41) Define production function
- 42) Give the definition of Law of Diminishing Returns
- 43) Define the Law of Increasing Returns
- 44) Define the Law of Constant Returns
- 45) Define the Law of Variable Proportions
- 46) What do you mean by Laws of Returns to Scale
- 47) What is the meaning of economies of scale of production?
- 48) Give a brief note on technical economies
- 49) What are the various economies of large scale production?
- 50) What are the various economies of small scale production?

Section C

Answer in about 200 words each

UNIT I

- 1) Explain Wealth definition of Economics with its criticisms
- 2) Critically examine Marshall's definition of Economics
- 3) Critically examine Scarcity definition
- 4) Explain the Growth definition
- 5) What is the scope of economics
- 6) Explain the main divisions of Economics
- 7) Explain the various kinds of utility
- 8) Explain the nature of Economic Laws
- 9) What are the classifications of human wants
- 10) Define goods and explain the various types of goods

UNIT II

- 11) Distinguish between cardinal utility and ordinal utility
- 12) Distinguish between Total Utility and Marginal Utility
- 13) Bring out the importance of the Law of Diminishing Marginal Utility
- 14) What are the criticisms of consumer's surplus
- 15) Explain the concept of consumer's surplus
- 16) Bring out the importance of consumer's surplus
- 17) What are properties of Indifference curve analysis
- 18) Explain consumer's equilibrium in indifference curve analysis
- 19) Explain marginal rate of substitution with table
- 20) Write a note about indifference curve, indifference map and budget line

UNIT III

- 21) Explain the various types of demand
- 22) Why do demand curve slope downwards?
- 23) What are the reasons for exceptional demand
- 24) What are the various conditions of demand?
- 25) Distinguish between expansion and contraction in demand and increase and decrease in demand
- 26) Explain the five kinds of price elasticity of demand
- 27) Explain the percentage method to measure the elasticity of demand with diagram
- 28) Explain income and cross elasticity of demand
- 29) Explain the importance of Elasticity of demand
- 30) What are the various factors determining the elasticity of demand

UNIT IV

- 31) What are the characteristics of land?
- 32) What are the characteristic features of labour?
- 33) What are the characteristics of capital?
- 34) What are the characteristics of entrepreneur?
- 35) What are the various forms of capital?
- 36) What are various functions of capital?
- 37) Explain the various functions of entrepreneur
- 38) What are the advantages of division of labour
- 39) Explain the advantages and disadvantages of localization
- 40) Write a note on division of labour

UNIT V

- 41) Explain the Law of Diminishing Returns
- 42) Explain the Law of Increasing returns with diagram
- 43) Diagrammatically explain the Law of Returns to Scale
- 44) Explain the economies of large scale production
- 45) Explain the diseconomies of large scale production
- 46) Examine the economies and diseconomies of small scale production

SECTION D

Answer in about 500 words each:

UNIT I

- 1) Critically examine the definitions of economics
- 2) Explain the deductive and inductive methods with their limitations
- 3) Explain the scope of Economics
- 4) Explain the nature of economic laws

UNIT II

- 5) Critically examine the Law of diminishing marginal Utility
- 6) Critically examine the concept of Consumer's surplus
- 7) Define consumer's surplus and explain its importance
- 8) Explain the consumer's equilibrium in indifference curve analysis

UNIT III

- 9) Explain Law of Demand with the determinants of demand
- 10) Define elasticity of demand and explain its uses
- 11) What are various methods to measure Elasticity of Demand?
- 12) Explain various kinds of price elasticity with diagrams

UNIT IV

- 13) What are the factors determining the efficiency of labour?
- 14) Who is an entrepreneur? What are the various functions of an entrepreneur?
- 15) What is division of labour? Explain its advantages and disadvantages.
- 16) What are the various factors determining the localisation of industries?

UNIT V

- 17) Critically examine the Law of Diminishing Returns. How far it is applicable for agriculture
- 18) Critically examine the Law of variable proportions
- 19) Explain the economies and diseconomies of large scale production

SEMESTER- I			
CORE II		INDIAN ECONOMY – I	
Code: 21UECC12	Hours / week :5	Hrs / Semester: 75	Credits :4

Objectives:

- Develop an in-depth understanding of the Indian economy
- Understanding and analysing Indian Economic Issues, developments and policies
- Able to understand the basic Indian Economic problems.

Course Outcomes

CO No.	Upon completion of this course, students will be able to	PSO's Addressed	CL
CO 1	understand the growth process in the Indian Economy since independence. various aspects of economic development. To comprehend the basic characteristics of economic development and economic growth.	1,2,7	Un

Syllabus
SEMESTER- I
CORE II – INDIAN ECONOMY – I Code: 21UECC12

Unit I - Economic Development since Independence

Meaning of Economic Development -- Determinants of Development, Indian Economy since Independence – Features of Indian Economy

Unit II - Resources and Development

Natural Resources: Land, Water, Forest, Mineral and Energy Resources- Natural resources and Economic Development

Unit III - Basic Problems of Indian Economy

Poverty: Meaning, Causes, Remedial Measures – Unemployment: Meaning, Causes and Remedial Measures-Deficit Balance of Payment -Inflation

Unit IV - Human Resources

Demographic features –Demographic Transition-Causes and measures of controlling population. Human Development Index (HDI) – Meaning and measurement.

Unit V - Agriculture

Agriculture – Role in the National Economy – Crop pattern – Causes for low productivity – Green Revolution- Later developments - Rural development Subsidy-

QUESTION BANK

SECTION A

Unit 1

1. India is a:

- (a) Developed country (b) Under developed Country (c) **Developing country** (d) Both A and B

2. The growth rate of Indian economy in 2012-13 is:

- (a) **6.9%** (b) 9% (c) 6.5% (d) 8.2%

3. Which sector is considered as the work horse of Indian economy?

- (a) Primary (b) Secondary (c) **Tertiary** (d) Both A and B

4. Scarcity of capital, technological backwardness and unemployment are generally found in

- a. Developed countries **b. Underdeveloped countries** c. Both d. **Developing country**

5. Economic development is characterized by ----

- a) Structural change in the economy b) Change in the occupational structure c) **Both a and b**
d) B only

6. What is the type of Indian economy?

- (a) Socialist (b) communist (c) Capitalist (d) **Mixed**

7. Which of the following about strategy of balanced growth is right?

- a. Simultaneous investment in all sectors** b. All sectors are independent. c. Both
d. agriculture sector

8. Capital formation in underdeveloped countries is a major bottleneck. The reason can be

- a. Small size of market with no incentive for investment b. Low level of income
c. Demonstration effect **d. All the above**

9. An underdeveloped economy is characterised by -----

- a. high per capita real income b. large proportion of labour force in the tertiary sector **c. state of deprivation of large proportion of population** d. all the above

10. Which of the following explains the term economic growth?

- a. Increase in per capita production b. Increase in per capita real income c. structural change in the economy **d. all the above are right**

11. Development economics focuses primarily on the poorest _____ of the world's population.

- a. 5 percent **b. two-thirds.** c. one-third. d. 28 percent.

12. Which of the following characteristics are most likely found in developing countries?

- a. high population growth rates. b. large number of people living in poverty. c. very traditional methods of agricultural production. **d. all of the above**

13. Which of the following could not be considered a major economic system?

- a. capitalism. b. communism. c. socialism. d. physical quality of life index.

14. Economic development refers to -----

- a. economic growth. b. **economic growth plus changes in output distribution and economic structure.** c. improvement in the well-being of the urban population. d. sustainable increases in Gross National Product.
15. Imitating labour standards from rich countries in LDCs may increase -----
a. equality. b. **poverty.** c. employment. d. human development.

UNIT II

- Which country is the largest oil producing country of the world?
(A) Saudi Arabia (B) Russia (C) **America** (D) India
- Fossil fuel and metallic minerals are:
(a) Renewable resource (b) Inexhaustible resources (c) **Non-renewable resources** (d) Exhaustible resources
- In our country the percentage of land under forest is about:
(a) 20% (b) **19%** (c) 25% (d) 30%
- Extensive planting of trees to increase cover is called -----
(a) **Afforestation** (b) Agroforestation (c) Deforestation (d) Social forestry
- The major cause for land degradation in our country is -----
(a) **Soil erosion** (b) Pollution of soil (c) Water-logging (d) Wind pollution
- Deforestation generally decreases
(a) **Rainfall** (b) Soil erosion (c) Draught (d) Global warming
- Carbon dioxide constitutes about 0.03% of the atmosphere -----
(a) **By volume** (b) By weight (c) By mass (d) By energy
- Which among the following is a sedimentary type of cycle?
(a) **Sulphur cycle** (b) Nitrogen cycle (c) Oxygen cycle (d) Carbon cycle
- Which Indian State is not the producer of Mica?
A. Jharkhand B. Andhra Pradesh C. Rajasthan D. **Tamil Nadu**
- Forest and wild life are ----
(a) **Renewable resource** (b) Non-renewable resources (c) Inexhaustible resources (d) Exhaustible resources
- Singhbhum is famous for -----
Coal **Iron** Copper Aluminium
- Which among the following is the oldest refinery of India?
A. Chennai **B. Digboi** C. Jamnagar D. Panipat
- Which of the following is found in the form of Monazite sand along the Kerala coast?
A. Chromite B. Uranium **C. Thorium** D. Graphite
- When was Oil and Natural Gas Commission established?
A. 1950 B. 1951 C. 1952 **D. 1956**
- Where is the Forest Reserve Institute of India located?
Dehradun Bhopal Lucknow Delhi

UNIT III

- The type unemployment more prominent in India -----
a. Seasonal b. Cyclical c. Structural d. Open.
- India's unemployment is estimated by -----

a. Finance Ministry b. RBI c. NSSO **d. ISO**

3. Which of the following programme was launched in the year of 2000?

(A) National Rural Employment Guarantee Act. (B) Prime Minister Rozgar Yojana (C) Swarna Jayanti Gram Swarozgar Yojana **(D) Pradhan Mantri Gramodaya Yojana.**

4. Who conducts the periodical sample survey for estimating the poverty line in India?

(A) National Survey Organisation **(B) National Sample Survey Organisation** (C) Sample Survey Organisation (D) National Service Organisation

5. Which scheme was started in 1993 to create self-employment opportunities for educated unemployed youth in rural areas and small towns?

(A) Prime Minister Rozgar Yojana (B) National Rural Employment Guarantee Act. (C) Rural Employment Generation Programme (D) Swarnajayanti Gram Swarozgar Yojana.

6. When there is high inflation in the economy, how will it affect the supply of money in the economy?

(a) No effect on the money supply (b) Supply of money decreases (c) **Supply of money increases** (d) None of the above

7. How inflation affects the price of the commodities?

(a) Price of the commodities decreases **(b) Price of the commodities increases** (c) No effect (d) First the price decreases later on increases

8. Which among the following is the method to estimate the poverty line in India?

(A) Investment method (B) Capital method (C) Human method **(D) Income method.**

9. Which of the following class will not be negatively affected by the higher inflation?

(a) The consumer class (b) The debtor class (c) Pensioner class **(d) Business class**

10. Which one of the Social groups is vulnerable to poverty?

(A) Scheduled caste (B) Urban casual labour (C) Rural Agricultural households (D) All of the above.

11. By which year governments are aiming to meet the Millennium Development Goals including halving the rate of global poverty?

(A) 2011 **(B) 2015** (C) 2045 (D) 2035

12. In calculating India's balance of payments position, we must:

a) Omit invisible items **b) Omit exports and imports of gold** c) Include expenditure by foreign tourists as imports d) Include long term loans abroad as debit

13. What is the average calories required in rural areas for measuring poverty?

(A) 2400 calories per person per day (B) 2100 calories per person per day (C) 2800 calories per person per day (D) 2900 calories per person per day

14. The balance of payment in unfavourable:

a) When value of export is greater than import **b) When value of import is greater than export** c) When value of imports and exports are equal d) Only when there is much greater difference between exports and imports

15. Inflation is the state in which

(a) The value of money decreases (b) The value of money increases (c) The value of the money increases first and then decreases (d) The value of money decreases first and increases later

UNIT IV

1. India's rank according to HDI in 2012 is -----
(a) 127 (b) 134 (c) **136** (d) 124
2. The annual growth rate of India's population according to 2011 census is:
(a) 1.9% (b) **1.76%** (c) 2% (d) 2.76%
3. According to 2011 census the rate of urbanisation in India is: (a) 72.2% (b) **31.16%**
(c) 32.5% (d) 45.2%
4. Among the Indian states which has the highest density? (a) Bengal (b) Punjab (c) Kerala (d) **Bihar**
5. The crude literacy rate in India according to 2011 census is:
(a) 64.83% (b) 82.14% (c) 65.46% (d) **74.04%**
6. The sex ratio of India in 2011 is -----
(a) 961 (b) **940** (c) 980 (d) 990
7. Which Union Territory is the densest populated region of the country?
(A) Lakshadweep (B) **Delhi** (C) Andaman-Nicobar Islands (D) Puducherry
8. Which state has the lowest women literacy rate in India (2001 census)?
(A) **Bihar** (B) Jharkhand (C) U. P. (D) Rajasthan
9. According to 2001 census, Indian Population was—
(A) 98.7 crore (B) 100.0 crore (C) **102.9 crore** (D) 105.7 crore
10. Which Union Territory ensured Lowest Population in 2001 census?
(A) Delhi (B) Chandigarh (C) Puducherry (D) **Lakshadweep**
11. Which one of the following states in India has focused more on human resource development?
(A) Punjab (B) Karnataka (C) **Kerala** (D) Tamil Nadu
12. The Department of Family planning was set up in -----
a. 1965 b. **1966** c. 1977 d. 1975
13. Which of the following is / are immediate objective of the population policy of 2020?
a. Meet the needs of contraception b. Meet the needs of health infrastructure c. Meet the needs of health personal d. **All the above**
14. Demography means -----
a. Study of earth b. **Study of population** c. Study of Morality d. Study of directions.

UNIT V

1. In which year New Agricultural strategy was introduced in India?
(a) 1960 (b) 1950 (c) **1966** (d) 1991
2. Which state of India has derived the maximum benefit from Green Revolution?
(a) Kerala (b) Maharashtra (c) U.P (d) **Punjab**
3. Land reform includes:
(a) New idea of irrigation (b) Fertilizers (c) New Seeds (d) **All of the above**
4. Which are kharif crop(s)?
(a) Maize (b) Cotton (c) Sugar Cane (d) **All of these**
5. Which is the main wheat production State of India?
(a) **Punjab** (b) Orissa (c) Goa (d) Tamilnadu
6. Indian Green Revolution is the most successful in—

- (A) Wheat and Potato (B) Jwar and Oil Seeds (C) **Wheat and Rice** (D) Tea and Coffee
7. Which is the Commercial Crop? (a) **Tea** (b) Rice (c) Wheat (d) Millet
8. India's Green revolution was most successful inProduction.
(a) **Wheat** (b) Rice (c) Maize (d) Cotton
9. As a result of Green Revolution, which food grains had a reduced percentage in total food grains production?
(A) Wheat (B) Rice (C) **Cereals and Pulses** (D) Millet
10. For which type of fertilizer India is fully dependent on imports?
(A) Nitrogen Fertilizer (B) Phosphetic Fertilizer (C) **Potash Fertilizer** (D) Organic Fertilizer
11. Which of the following is the commercial crop in India?
A. Mustard B. tobacco C. Jute **D. All of the above**
12. Which Indian state produces the largest quantity of pulses?
A. Maharashtra B. Uttar Pradesh **C. Madhya Pradesh** D. Rajasthan
13. In terms of geographical area India occupies what position in the world?
(a) Five (b) six (c) **seven** (d) three
14. What is the planned rate of Agriculture growth in the 12th Five Year Plan?
[A]3.5% [**B]4%** [C]5.5% [D]6% 4%

SECTION B

Answer in about 50 words each:

UNIT I

1. Define economic development
2. Define economic growth
3. Distinguish between economic growth and development
4. State any two features of Indian Economy
5. State the non-economic determinants of economic development
6. State the political determinants of development
7. State the social determinants of development
8. State the religious determinants of development

UNIT II

1. What are the sources of water?
2. What are the classifications of rivers in India?
3. State the various benefits of water
4. What are the potentialities of water?
5. Outline the forest policy 1952
6. What are the types of mineral resources?
7. Outline the new mineral policy
8. What are the sources of energy?
9. What are the advantages of energy resources?
10. Outline the energy policy
11. What are the uses of land?
12. What are the uses of water?
13. What are the sources of water?

14. What are the classification of minerals?

UNIT III

1. Define Poverty.
2. Define rural poverty
3. Define urban poverty
4. Define poverty line.
5. Define unemployment.
6. What is the main reason for poverty in India?
7. What are the causes of unemployment?
8. Define Balance of Payment
9. Define Deficit Balance of Payment
10. Define Surplus Balance of Payment
11. Define inflation
12. What are the merits of inflation?
13. What are the demerits of inflation?
14. What is creeping inflation

UNIT IV

1. Define the term population
2. What are the factors determining population growth?
3. What are the factors determining birth rate?
4. Define population explosion
5. Define Demographic Transition
6. What are the stages of population policy of Government of India?
7. Define Human Development Index
8. How to measure Human Development Index?

UNIT V

1. Define Green Revolution.
2. State any two features of Green Revolution
3. Define Cropping pattern
4. Give example for natural factors affecting cropping pattern?
5. Name the four cropping systems in India
6. What is meant by mono-cropping?
7. What is meant by mixed cropping?
8. State any two causes for low agricultural productivity
9. What is meant by new agricultural strategy?

SECTION C

UNIT I

1. What are the factors determining population growth?
2. Define Human Development Index and explain the measurement of Human Development Index
3. Explain the stages of Demographic Transition

4. What are the causes of growing population?
5. What are the measures of controlling population?
6. Explain the causes of population explosion.
7. Explain the theory of demographic transition.
8. Describe family planning programme during five-year plans.

UNIT II

1. State the various uses of land
2. What are the advantages of forest resources?
3. What are the classifications of rivers in India?
4. State the various benefits of water
5. What are the types of mineral resources?
6. Outline the new mineral policy
7. What are the sources of energy?
8. What are the advantages of energy resources?
9. Outline the energy policy
10. Outline the forest policy during five-year plans
11. Describe the importance of mineral resources
12. Explain the significance of energy resources

UNIT III

1. Distinguish between Rural and Urban poverty.
2. What are the estimates of unemployment?
3. What are the causes of poverty in India?
4. What are the causes of unemployment?
5. Examine the extent of poverty in India?
6. State Deficit Balance of Payment
7. What are the common causes of inflation?
8. what are the effects of inflation?
9. State the methods to control inflation

UNIT IV

1. What are the factors determining population growth?
2. Define Human Development Index and explain the measurement of Human Development Index
3. Explain the stages of Demographic Transition
4. What are the causes of growing population?
5. What are the measures of controlling population?
6. Explain the causes of population explosion.
7. Explain the theory of demographic transition.
8. Describe family planning programme during five-year plans.

UNIT V

1. What are the causes for low agricultural productivity?

2. Explain the cropping pattern of agriculture.
3. Describe the four cropping systems in India
4. Explain the various types of cropping system in India
5. What are the factors affecting cropping pattern?
6. What are the measures adopted by the Government for diversification of cropping pattern?
7. What are the main features of Green Revolution?
8. Explain the defects of Green Revolution

SECTION D

UNIT I

1. Explain the concept “economic development”
2. Differentiate Economic Growth and Development
3. State the determinants of development
4. Briefly explain Indian Economy since Independence
5. Examine the features of Indian economy

UNIT II

- 1) Explain natural resources for economic development
- 2) Elucidate the importance of land and soil resources
- 3) Describe the significance of water resources
- 4) Explain the importance of forest resources

UNIT III

1. Describe the various measures taken to solve unemployment problem in India?
2. Briefly explain the programs implemented to alleviate poverty.
3. Examine the causes of poverty
4. Examine the causes of unemployment
5. What are the common causes and effects of inflation?

UNIT IV

1. Explain the causes of population explosion.
2. Examine the steps to check rapid growth of population.
3. Explain the causes and measures of controlling population
4. Explain the theory of demographic transition.
5. Describe family planning programme during five-year plans.

UNIT V

1. Express in detail the role of agriculture in the national economy
2. Describe the factors affecting cropping pattern.
3. Discuss the impact of Green Revolution in the national economy
4. Evaluate the economic and social impact of Green Revolution in the national economy.

Syllabus

SEMESTER- I			
ALLIED I - STATISTICS –I			
Code:21UECA11	Hours / week :4	Hrs / Semester: 60	Credits :4

Objectives:

- Introduce students to basic statistical tools and techniques
- To apply statistical tools for economic problems.
- To make the students understand the significance of Statistics and to develop their research skills.

Course Outcome:

CO No.	Upon completion of this course, students will be able to	PSO's Addressed	CL
CO – 1	enhance knowledge on the concept of statistics and the ways of mobilizing data	4	Un
CO – 2	gain knowledge on the various methods of presenting data	4,6	Ev
CO – 3	use appropriate statistical methods in the analysis of simple datasets	1	An
CO – 4	use their conceptual knowledge of statistics and statistical computing skills to define problems related to statistics, and guide critical reasoning about research design, data production, and the interpretation of findings.	5,7	Un
CO – 5	demonstrate understanding of how to design experiments and surveys for efficiency.	3	An
CO – 6	demonstrate the ability to perform complex data management and analysis.	4, 5	Un
CO – 7	develop skills in presenting quantitative data using appropriate diagrams, tabulations and summaries	4,7	Un
CO – 8	construct and analyze graphical displays to summarize data.	4,7	Un

SEMESTER- I			
ALLIED-I - STATISTICS –I			
Code: 21UECA11	Hours / week :4	Hrs / Semester: 60	Credits :4

UNIT - I INTRODUCTION

Definitions of Statistics – Meaning – Scope – Functions - Importance– Limitations

UNIT – II STATISTICAL INVESTIGATION & SAMPLING

Sources of data – Methods of collecting primary and secondary data – Questionnaire– Census and Sampling: Methods of sampling

UNIT – III STATISTICAL PRESENTATION

Classification: Types - Tabulation: Rules, Parts of tabulation and Types of tables, Presentation of statistical data: Bar diagrams, Pie diagram-Graphs: Histogram, Frequency Polygon, Frequency Curve and Ogive Curves

UNIT – IV MEASURES OF CENTRAL TENDENCIES

Measures of Central Tendency: Meaning –Properties- Mean, Median, Mode, Geometric Mean and Harmonic Mean- Merits and Demerits

UNIT - V MEASURES OF DISPERSION

Measures of Dispersion: Meaning - Range, Quartile Deviation, Mean Deviation, Standard Deviation, Variance, Coefficient of variation, Lorenz Curve

Text Book: R.S.N. Pillai&Bhagavathi, Statistics: Theory and Practice, 7th Revised Edition, S. Chand, New Delhi, 2008.

Reference Books:

1. A.M. Gun, M.K.Gupta&B.Dasgupta, Fundamentals of Statistics, 9th Reprinted Edition, The World Press Pvt. Ltd., Kolkata, 2019.
2. S .P.Gupta, Elementary Statistical Methods, 18th Revised Edition, Sultan Chand & Sons, New Delhi, 2017.
3. S. P.Gupta, Statistical Methods, 42nd Revised Edition, Sultan Chand & Sons, New Delhi, 2012.

QUESTION BANK
I B.A. ECONOMICS
Allied – Statistics-I Sub. Code: 21UECA11
Semester I – November 2022

Section- A (1 mark)

Choose the Correct Answer:

UNIT I - Introduction

1. The word statistics is derived from _____
(a) Latin term 'STATUS' (c) German term 'STATISTIK'
(b) **Italian term 'STATISTA'** (d) Greek term 'STATIS'
2. The real giant in the development of the theory of statistics is
(a) Fisher (b) Gauss (c) **Bowley** (d) Dalton
- 3 Statistics deals with _____
(a) All relevant facts (c) Only numerical facts which are relevant to the enquiry
(b) **All facts which are numerically expressed** (d) facts and figures
4. Statistics can best be considered as _____
(a) an art (b) a science (c) **both art and science** (d) neither of these
5. According to _____ "Statistics may be called the science of counting".
(a) A.L. Bowley (b) **Boddington** (c) Seligman (d) Samuelson
6. "Statistics is the science of estimates and probabilities", whose definition is this?
(a) **A.L. Bowley** (b) Boddington (c) Fisher (d) Seligman
7. The most satisfactory definition of statistics was given by
(a) Secrist (b) **A.L. Bowley** (c) Boddington (d) Croxton
8. Statistics should be _____
(a) numerically expressed (c) collected for a pre-determined purpose
(b) aggregates of Facts (d) **All the above**
9. Statistics does not deal with _____
(a) **individuals** (b) qualitative aspects (c) micro aspects (d) macro aspects
10. Misuse of statistics is _____
(a) possible (b) not possible (c) **sometimes intentionally done to distort facts** (d) never seen
11. Statistics can be used as _____
(a) a singular noun (b) a plural noun (c) **both singular as well as plural noun** (d) individuals

UNIT II - Statistical Investigation & Sampling

1. Primary data as compared to secondary data are_____
 (a) less reliable (b) **more reliable** (c) equally reliable (d) comparably less
2. Data collected from 'The Economic Times' is an example of_____
 (a) Primary data (b) **Secondary data** (c) Unpublished data (d) published sources
3. Some of the sources of secondary data are
 (a) Reports and publications of Central and State Governments
 (b) Reports of commissions and committees
 (c) Reports of IMF, IBRD, WHO, ILO etc
 (d) **All the above**
4. Retail prices collected by the Ministry of Labour for preparing cost of living index numbers are _____ data
 (a) Primary (b) **Secondary** (c) Published (d) unpublished
5. Population census data used by a researcher is_____ data
 (a) Primary (b) **Secondary** (c) Unpublished (d) published
6. A sample is a study of _____ of the population.
 (a) **Part** (b) Whole group (c) either part or whole group (d) All
7. Find the odd out
 (a) Random sampling (b) non-random sampling (c) **Census** (d) cluster sampling
8. A population is the of limits under study.
 (a) part (b) **totality** (c) element (d) universal
9. Random sampling is also referred to as
 (a) **probability** (b) judgment (c) cluster sampling (d) systematic sampling
10. The methods used to select samples are
 (a) **random sampling** (b) non-random sampling (c) a & b (d) systematic sampling

UNIT III - Statistical Presentation

1. In chronological classification, data are classified on the basis of
 (a) attributes (b) class-interval (c) **time** (d) locality
2. The mid-point of a class is obtained by
 (a) adding upper and lower limits
 (b) deducting upper limit from lower limit
 (c) dividing the difference of upper and lower limits by 2
 (d) **adding the difference of upper and lower limits by 2**
3. Frequency distribution of two variables can be presented through a frequency table called
 (a) univariate (b) **bivariate** (c) grouped (d) one way

4. The heading of a row in a statistical table is known as
(a) **stub** (b) caption (c) title (d) table number
5. One dimensional diagrams are drawn on the basis of
(a) **length** (b) width (c) height (d) breath
6. In a two-dimensional diagram only _____ is considered.
(a) width (b) height (c) **both width and height** (d) column
7. A pie diagram is _____ dimensional.
(a) **one** (b) two (c) three (d) line
8. Ogive curves are
(a) frequency (b) **cumulative frequency** (c) cumulative Percentage of frequency (d) polygon
9. Cubes are _____ dimensional diagrams.
(a) one (b) **two** (c) three (d) four
10. Smoothed cumulative frequency curve is known as
(a) frequency polygon (b) frequency curve (c) **Ogive** (d) Histogram
11. A curve obtained by connecting the mid-points of a histogram is known as
(a) Frequency Polygon (b) **Frequency curve** (c) Ogiv (d) line
12. Histogram is useful to locate graphically the value of
(a) Mean (b) **Median** (c) Mode (d) G.M

UNIT IV Measures of Central Tendencies

1. The positional measure of central tendency is
(a) **Mean** (b) Median (c) GM (d) H.M
2. The sum of the deviation of individual observation is zero from
(a) **Mean** (b) Median (c) Mode (d) G.M
3. In a moderately asymmetrical distribution
(a) $AM < GM < HM$ (b) **$AM > GM > HM$** (c) $AM > GM < HM$ (d) All the above
4. For dealing with qualitative data the best average is
(a) Mean (b) Median (c) **Mode** (d) H.M
5. The sum of the deviations of a set of 'n' values from their arithmetic mean is
(a) **0** (b) 1 (c) -1 (d) infinite
6. In a series of values if one value is zero, GM is
(a) Positive (b) **Zero** (c) Indeterminate (d) one
7. Which measure of central tendency cannot be computed from 'open-end' classes
(a) Mean (b) **Median** (c) Mode (d) H.M
8. Median is _____
(a) The most frequent value (b) **middle most value** (c) Least frequent value (d) end value

9. The point of intersection of 'less than' and 'more than' Ogives
 (a) **median** (b) Mode (c) GM (d) AM
10. Which is always the best measure of central tendency?
 (a) **Mean** (b) Median (c) Mode (d) G.M

UNIT V- Measures of Dispersion

1. $Q_3 = \frac{\quad}{\quad}$ term.
 (a) $n/2$ (b) $(n+1)/2$ (c) **$(3n+1)/4$** (d) $(n+1)/4$
2. The variance is equal to
 (a) **σ^2** (b) $\sqrt{\sigma}$ (c) $1/\sigma$ (d) M
3. Which of the following is a relative measure of dispersion?
 (a) Variance (b) **coefficient of variance** (c) Standard of Deviation (d) M.D
4. If the mean and median are equal, you know that the
 (a) **Distribution is symmetrical** (c) Distribution is normal
 (b) Distribution is skewed (d) Mode is equal to **the median**
5. Range of 1,1,2,3,3 is
 (a) 0 (b) 1 (c) **2** (d) 3
6. If $\beta_2 = 3$ the distribution is called
 (a) Mesokurtic (b) Leptokurtic (c) Platykurtic (d) **normal curve**
7. In a symmetrical distribution the coefficient of skewness is
 (a) **Positive** (b) Negative (c) equal (d) Zero
8. The graphical presentation of dispersion is $\frac{\quad}{\quad}$ curve.
 (a) Frequency (b) **Lorenz** (c) Ogive (d) none
9. The quartile deviation includes the
 (a) First 50% (b) **Last 50%** (c) Central 50% (d) Middle
10. Median can never be equal to $\frac{\quad}{\quad}$ in a skewed distribution.
 (a) **Mean** (b) Mode (c) H.M (d) G.M

Section - B (2 Marks)

Answer in about 50 words

UNIT I

1. Define Statistics
2. State any two functions of statistics
3. Mention the limitations of statistics

4. Give the Crowther's definition of statistics
5. State any four features of Statistics
6. What is meant by Statistics?
7. State the relationship between statistics and commerce.
8. Define statistics in the words of Bowley
9. State the relationship between statistics and law
10. What is the important relationship between statistics and business?

UNIT II

1. What is meant by Primary data?
2. What is meant by Secondary data?
3. What do you mean by questionnaire?
4. Define Census.
5. What is meant by sampling?
6. State the meaning of stratified sampling?
7. Give any two examples of published sources.
8. State any two examples of unpublished sources.
9. State Direct personal interview method.
10. What is meant by cluster sampling?

UNIT III

1. What do you mean by one dimensional diagram?
2. Define Histogram
3. What is Pie diagram?
4. Define graph
5. Define tabulation
6. Define Classification
7. What is meant by one-way table?
8. State the example of bi-variate table
9. What is meant by caption?
10. State the meaning of frequency distribution

UNIT IV

1. What do you mean by measures of central tendency?
2. What do you mean by Arithmetic Mean?
3. State Median
4. What is Mode?
5. State the formula of Geometric Mean
6. What is meant by Harmonic Mean?
7. What is the formula for combined Arithmetic Mean?
8. State the merits of Mode
9. What are the merits of Mean?
10. State the importance of G.M

UNIT V

1. What is Range?
2. What is the formula for coefficient of range?
3. Define Quartile Deviation
4. What do mean by M.D?
5. What do mean by S.D?
6. Define Variance
7. Define Skewness
8. What do you by Moments?
9. What is meant by Platykurtic?
10. What is meant by Mesokurtic?

Section C (6 Marks)

Answer in about 200 words (Internal Choice) (a) or (b)

UNIT I

1. State the characteristics of statistics.
2. State the functions of statistics.
3. State the relationship between economics and statistics.
4. State the relationship between commerce and statistics.
5. State the limitations of statistics.

6. Define statistics in the words of Crowther.
7. What are the uses of statistics?
8. State the importance of statistics
9. Comment on the statement “Statistics is a science of counting”
10. Illustrate the uses of statistics in commerce and business

UNIT II

1. Distinguish between primary and secondary data.
2. What are the characteristics of a good questionnaire?
3. What are the merits of using a questionnaire?
4. State the precautions to be taken while using secondary data.
5. What are the published sources of secondary data?
6. State the merits of Census enumeration.
7. Write a note on : (a) the Law of Statistical Regularity (b) the Inertia of Large Numbers.
8. State the pre-requisites of a good questionnaire
9. What are the unpublished sources of secondary data?
10. Explain the rules for framing a good questionnaire.

UNIT III

1. State the different types of one dimensional diagram.
2. Distinguish between diagrams and graphs.
3. Use the following table to draw an Ogive curve

Wages (Rs):	10-20	20-30	30-40	40-50	50-60	60-70	70-80
No. of Persons:	12	18	35	42	50	45	20
4. From the following data, construct a frequency distribution table starting 10 – 20
 5, 27, 23, 32, 49, 19, 50 38, 37, 25, 30, 29, 42, 37, 18,
 12, 13, 9, 18, 27, 50, 32, 47, 48, 29, 30, 32, 37, 27, 41
5. State the rules for drawing a diagram.
6. Write a note on Pie diagram
7. Explain Histogram?
8. State the parts of a table
9. What is chronological classification?

UNIT IV

1. State the characteristics of a good average.
2. Which is the best measure of central tendency? Why?
3. Define mode and mention its merits.
- 4 Calculate mode from the following data: 61, 62, 63, 64, 64, 60, 65, 63, 64, 65, 66, 64, 60, 66, 59, 68, 67, 70.
5. Find the arithmetic mean of the following Frequency distribution:
Weight in Kg: 50 55 60 65 70
No. of men: 1520 25 30 10
6. State the merits of median.
7. Calculate arithmetic mean - X: 4 7 11 19 21 27 30.
8. There are two branches of a company, employing 100 and 80 persons respectively. If the arithmetic mean of the monthly salaries paid by the two companies is Rs. 275 and Rs. 225 respectively, find the arithmetic mean of the salaries of the employees of the companies as a whole.
9. Calculate the Harmonic Mean:

Family:	A	B	C	D	E	F	G	H
Income:	70	10	500	75	8	250	8	42

10. Find out **Geometric Mean**: 50, 71, 54, 82, 93

UNIT V

1. Calculate the M.D from Median: 8 15 53 49 19 62 7 15 95 77.
2. Find the range and its coefficient: 80 50 70 100 120 60.
3. What are the merits of mean deviation?
4. What are the differences between M.D and S.D?
5. Write about Mean Deviation.
6. Explain the uses of Range.
7. State the important merits of S.D
8. What are the merits and demerits of Skewness
9. What is Variance and its coefficient?
10. State the merits and demerits of Q.D

Section D (10 Marks)

Answer in about 400 words each:

UNIT I

1. Define statistics and explain its functions.
2. Discuss the scope of statistics.
3. Explain the characteristics of statistics.
4. Explain the most satisfactory definition of statistics.
5. Explain the importance of statistics in economics and commerce.
6. Explain the Horace Secrist's definition of statistics.
7. Discuss the various uses and limitations of statistics
8. Examine critically the important definitions of statistics, pointing out the one which you think the best.
9. Describe the statistics with other sciences
10. Explain the important features, uses and functions of statistics

UNIT II

1. Explain the various methods of collecting primary data.
2. What is a questionnaire? Explain the rules for framing a good questionnaire.
3. Prepare a model questionnaire for a socio-economic survey of farmers in a village
4. Distinguish between a census and sample survey.
5. Explain the different random sampling methods.
6. Explain the relative merits and demerits of various sampling.
7. Explain the various methods of collecting secondary data.
8. Describe the unpublished sources of secondary data?
9. Explain the published sources of secondary data
10. Discuss the methods of nonrandom sampling methods

UNIT III

1. State and explain different types of bar diagrams.
2. Draw a histogram and the frequency polygon for the distribution of marks of 150 students.

Marks (Rs.) :	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80
No. of Students:	10	21	28	43	31	14	2	1

3. Draw the ogives and locate median for the data given below:

Marks (Rs.) 0-10 10-20 20-30 30-40 40-50 50-60 60-70 70 -80

No.of Students 4 10 16 22 20 18 8 2

4. What is classification? Explain the types of classification.

5. Draw a Histogram

Mid value	15	25	35	45	55	65	75
Frequency	10	24	40	32	20	14	4

6. Draw a suitable diagram

Items	Expenditure
Food	65
Clothing	10
Housing	12
Fuel and lighting	5
Miscellaneous	8

7. What is frequency distribution and explain the types of it?

8. What are the various types of tables?

9. State the rules of tabulation and parts of a table

10. How to prepare a questionnaire? Explain the various rules of a questionnaire

UNIT IV

1. Find out Arithmetic mean from the following data:

Wages (Rs.): 1-10 11-20 21-30 31-40 41-50 51-60 61-70

Frequency: 4 16 60 100 40 6 4

2. Calculate the Geometric Mean from the following data.

X	13.0	18.5	20.5	22.0	23.0	24.0	25.0	26.0	28.0	7.5
F	8	10	14	6	7	3	4	2	1	5

3. Find the Median & Quartiles.

C.I	60-70	50-60	40-50	30-40	20-30
F	5	10	20	5	3

4. Calculate mean and median

C.I	130-134	135-139	140-144	145-149	150-154	155-159	160-164
F	5	15	28	24	17	10	1

5. Find Mode from the following frequency distribution:

Classes	15-25	25-35	35-45	45-55	55-65	65-75
Frequency	4	11	19	14	0	2

6. State and explain the empirical relationship between the averages

7. Frame a frequency table from the following data by taking 4 as class interval
(Inclusive method)

10 17 15 11 16 19 24 29 18 22 25 26 32 14 17 20 23 27 30 12
15 18 24 36 18 15 21 28 33 38 34 13 10 16 20 22 29 19 23 31

8. Calculate Harmonic Mean

X	6	7	8	9	10	11
F:	4	6	9	5	2	8

9. What is meant by measures of central tendency? Explain the important qualities of averages and its merits and demerits

10. Define median and mode and discuss how far they satisfy the requisites of a good average.

UNIT V

1. Find the standard deviation from the following data

Profits	5000-6000	4000-5000	3000-4000	2000-3000	1000-2000	0-1000
Firms	10	15	30	10	5	4

2. A sample size 15 has mean 3.4 and S.D. 3.0. Another sample size 2 has mean 4.7 and S.D.

4.0. If two samples are pooled together, find the combined mean and standard deviation.

3. In two factories A and B, the average weekly wages and the S.D. are as follows.

Factory	Average	S.D	No. of workers
A	34.5	5.3	476
B	28.5	4.5	524

(i) Which factory A or B pays out a large amount of weekly wages?

(ii) Which factory A or B has greater variability in individual wages?

4. Compute the Quartile Deviation from the following data.

C.I	0-40	41-80	81-120	121-160	161-200	201-240	241 - 280
F	394	461	391	334	169	113	148

5. Compute the quartile deviation from the following data:

C.I	0-40	41-80	81-120	121-160	161-200	201-240	241 & Above
F	394	461	391	334	169	113	148

6. Find the median and mean deviation from the following data.

C.I	0-10	10-20	20-30	30-40	40-50	50-60	60-70
F	7	12	18	25	16	14	8

7. Calculate Standard Deviation

Class	5-10	10-15	15-20	20-25	25-30	30-35
F	2	9	29	54	11	6

8. Calculate Co-efficient of Variation of the following data.

Profit	0 – 1000	1000 – 2000	2000 – 3000	3000 – 4000	4000 – 5000	5000 – 6000
Industries	4	6	10	30	15	10

9. Calculate Karl Pearson's Coefficient of Skewness from the following data

Age	20-30	30-40	40-50	50-60	60-70	70-80	80-90
F	3	61	132	153	140	51	2

10. Calculate Bowley's Coefficient of Skewness from the following data

Size	4-8	8-12	12-16	16-20	20-24	24-28	28-32	32-36	36-40
F	6	10	18	30	15	12	10	6	2

SEMESTER- I			
Skill Based Enhancements Course-I Professional English for Economics-I			
Course Code: 21UECA12	Hours / week :2	Hrs / Semester: 30	Credits :2

Objectives

- Enable them to understand the topics and vocabulary
- Develop their competence in the use of English with particular reference to the workplace situation.
- Enhance the creativity of the students, which will enable them to think of innovative ways to solve issues in the workplace.
- Develop their competence and competitiveness and thereby improve their employability skills.
- Help students with a research bent of mind develop their skills in writing reports and research proposals.
- To participate in uncritical conversations and prepare organised and deliver the work to the public

Course Outcomes

CO No.	Upon completion of discourse, students will be able to	PSO's addressed	CL
CO-1	understanding and applying new ideas in order to acquire employability/ self-employment	4,7	Un
CO-2	develop positive self-esteem and thereby communicate effectively	4,7	Ev
CO-3	use polite expressions in appropriate ways	1,7	An
CO-4	have a thorough knowledge and understanding of essential Economics vocabulary	5	Un
CO-5	understand short passages in written economics on everyday topics	3,7	An
CO-6	write about famous Economists	4,5	Un
CO-7	improvement of the writing skills in Economics	4	Un
CO-8	Expose themselves to technical, analytical and creative skills in Economics	4,7	Un

SEMESTER- I			
Skill Based Enhancement Course - I Professional English For Economics -I			
Course Code: 21UECA12	Hours / week :2	Hrs / Semester: 30	Credits :2

UNIT-I: Listening

6 Hrs

Listening: Listening comprehension and answering questions- (Economist- Adam Smith- Marshall- Robbins- Samuelson- Ricardo- Malthus- JM Keynes- Schumpeter- Karl Marx)

UNIT-II: Reading

5 Hrs

Reading: Comprehension passages (Reading passages on Agriculture- prospects and problems- Trends in Agricultural productivity- Green Revolution)

UNIT-III: Speaking

6 Hrs

Speaking; Small group discussions (Importance and Scope of Economics, Micro and Macro Economics, Importance of Foreign Trade and Economic Development)

UNIT-IV: Writing

5Hrs

Writing; Writing Recommendations (Problem and Solution on Population Explosion, Poverty and Unemployment, Indian economy and its present status, Urbanisation, Role of Indian women entrepreneurs)

UNIT-V: Vocabulary

8 Hrs

Vocabulary ;(Absolute advantage, Business cycle, Budget surplus, Budget deficit, Compliments, Cost, Consumer surplus, Competitive market, Capital, Diminishing marginal products, Deadweight loss, Diseconomies of scale, Equity, Efficiency, Exports, Equilibrium, Elasticity, Economic profits, Economies of scale, Fixed costs, Factors of production, Game Theory, Inflation, Imports, Inferior good, Import quota, Implicit costs, Law of demand, Law of supply, Lump sum tax, Lorenz curve, Monopoly, Market economy, Oligopoly, Opportunity cost, Phillips curve, Proportional tax, Progressive tax, profit, Production function, Price discrimination, Regressive tax, scarcity, Specialisation, Substitutes, Surplus, Shortage, Tariff, Variable cost, Welfare Economics)

Textbook: Ruddar Datt & Sundaram K.P.M, *Indian economy*, New Delhi, Sultan Chand, 71st Edition, 2017.

Books for reference:

1. *Communicative English (For Students of Arts and Science colleges) semester I*. Chennai: Tamil Nadu State Council for higher education (Transche), 2020
2. *Professional English for arts and Social Sciences-I*. Chennai: Tamil Nadu State Council for higher education. 4th Edition, 2020

B.A. Economics

SEC- Professional English for Economics I Sub. Code : 21UECPE1

Semester I November 2021

(for those who joined in July 2021 and after)

Section A

Unit 1

1. _____ is considered the father of Economics ..

a) Alfred Marshal **b) Adam Smith** c) Ricardo d) J.S.Mill

2. Welfare definition of Economics was given by _____.

a) Robbins b) Samuelson c) Ricardo **d) Alfred Marshal**

3. J.M Keynes attributed the great depression to _____.

a) lack of effective demand b) falling supply

c) inflationary pressures d) political instability

4. Which of the following economist gave the growth definition of Economics ?

a) Adam Smith b) Thomas R. Malthus

c) John Stuart Mill **d) Samuelson**

5. Which of the following economist gave the wealth definition of Economics.

Alfred Marshal **b) Adam Smith** c) Ricardo d) J.S.Mill

6. The Malthus's book Essay on Population was published in the year

a)1798 b) 1776 c) 1789 d) 1776

7.The optimum theory of population was developed by

a) Edwin Canon b) T.R.Malthus c) J.S.Mill d)J.M.Keynes

8. The Malthusian theory of population was expounded by

a) T.R. Malthus b) J.S.Mill c) **J.M.Keynes** d) David Ricardo

9. Scarcity definition of Economics was given by _____.

a) **Robbins** b) Samuelson c) Ricardo d) Alfred Marshal

10. _____ is the study of how humans make decisions in the face of scarcity.

a) **Economics** B) oligopoly C) monopolistic competition D) monopoly

11. _____ means that human wants for goods, services and resources exceed what is available.

a) **Scarcity** b) monopoly c) monopolistic competition d) oligopoly

Unit 2

1. Which of the following is the father of the Green Revolution in India?

a) **M.S.Swaminathan** b) Amartya Sen c) Manmohan Singh d) Y.V.Reddy

2. The main component of the Green Revolution was _____.

a) **High yield variety seeds** b) High yield cattles c) Strong political economy d) National security

3. The growth rate of agriculture in 2020-2021 is _____.

a) 3.4% b) **4.5%** c) 5.4% d) 6.5%

4. How much of India's population is engaged in Agricultural activities

a) **Two third** b). Half c). One third d). Almost all.

5. Agriculture is practised on small patches of land with the help of primitive tools like hoe, dao and digging sticks, and family/ community labour- what type of agriculture is this?

a). Intensive b) **Primitive subsistence** c) Extensive d) Plantation

6. What has been the main dependency of primitive farming?

a) **A. monsoon**, B. labour C. suitability of other environment D. technical

7. What are the features of primitive subsistence agriculture?

a). **Large amount of labour** b) When the soil fertility decreases, the farmers shift and clear a fresh patch of land c) Canals were used d) Use of fertilisers

8. Why is there enormous pressure on agricultural land

- a) Due to the law of inheritance and division of land
- b) Overpopulation**
- c) Small scale farmers are not able to earn livelihood
- d) Farmers of less land holdings are not able to afford the right techniques.

Unit 3

1. _____ is the exchange of capital, goods, and services across international borders or territories.

- a) International trade
- b) Domestic trade
- c) Internal trade
- d) Trade

2. _____ is known as the study of individual units?

- a) Macroeconomics
- b) Microeconomics**
- c) Income and Employment theory
- d) Development economics

3. What is the main cause of all economic problems?

- a) Abundance
- b) Convenience
- c) Scarcity**
- d) None of these

4. Study of aggregates is known as.

- a) Macroeconomics**
- b) Microeconomics
- c) Price theory
- d) Factor price determination

5. Foreign trade contributes and increases the world

- a) Population
- b) Inflation
- c) Economy**
- d) Trade Barriers

6. Free foreign trade maximizes world output through_____.

- a) Countries reducing various taxes imposed.
- b). Countries specializing in production of goods they are best suited for.**
- c). Perfect competition between countries and other special regions

- d) The diluting the international business laws & conditions between countries.

7. Trade between two or more than two countries is known as

- a) Internal Business
- b) Local Trade
- c) Foreign Trade**
- d) Unilateral Trade

8. Economic principles are also called

- a) Economic law
- b) Economic theory
- c) Economic model
- d) All of the above**

9. Everyone should study economics":

- a) Is a positive statement
- b) Is a normative statement**
- c) Is a true statement
- d) none of these

Unit 4

1. What is the nature of the Indian Economy?

- a) **Agrarian economy** b) Service Economy c) Industrial economy d) None of these

2). What is the nature of Indian Economy

- a). Socialistic economy b). Gandhian economy c). **Mixed Economy** d). Free economy

3). India opted for 'Mixed Economy' in :

- a). Framing of the Constitution b). Second Five Year Plan c). **Industrial Policy of 1948**

d). none of these

4). Mixed Economy' means :

- a). co-existence of small scale and large scale industries b). Co-existence of the rich and the poor

c). **co-existence of the private and public sector** d). assigning equal importance to both agriculture and heavy industries

5). Persons below the poverty line in India are classified as such based on whether :

a). **they are entitled to a minimum prescribed food basket** b). they get work for a prescribed minimum number of days in a year

c). they belong to agricultural labourer household and the scheduled caste/tribe

social group d). their daily wages fall below the prescribed minimum wages

6). Which Committee's recommendations are being followed for estimating Poverty Line in India?

a). Dutt Committee b). Chelliah Committee c). Chakravorty Committee d). **Lakdawala Committee**

7). Absolute Poverty means :

a). poverty in terms of absolute number of people b). **poverty in terms of the basic minimum calorie requirements** c). poverty in terms of the prevailing price level d). poverty in terms of the absolute level of unemployment

8). A serious effort to tackle the problem of poverty began with :

a). first plan b). third plan c). **fourth plan** d). sixth plan

9. What type of unemployment is found in India?

- a) Structural Unemployment b) Seasonal unemployment c) Disguise unemployment
d) All of the above

10. If a person is ready to work at the prevailing wage rate in the market, but he is unable to find the work, then what type of unemployment would it be called?

- a) Voluntary unemployment b) **Involuntary unemployment** c) Seasonal unemployment
d) None of the above

11. If new computers are being installed in a company and some employees are fired from the job due to lack of computer knowledge then what kind of unemployment would it be called?

- a) Disguised Unemployment b) **Structural unemployment** c) Hidden unemployment
d) Frictional unemployment

12. Cyclical and frictional unemployment are found in..... ?

- a) Less developed and developing countries both b) Developing countries c) **Developed countries** d) Less developed countries

13. Who are counted in the labour force of a country?

- a) The population of 18 to 60 years of age b) **The population of 15 to 65 years of age**
c) The population of 18 to 65 years of age d) Population of 21 to 62 years of age

14. Who developed the concept of disguised unemployment?

- a) John Keynes b) Amartya Sen c) **John Robinson** d) Alfred Marshall

Unit 5

1. A cost that does not change with an increase or decrease in the amount of goods or services produced or sold is termed as

- a) Variable cost **b) Fixed cost** c) Marginal cost d) Average cost

2. Profit is the reward for _____.

- a) Entrepreneur** b) Land c) Labour d) Capital

3. The rent theory of profit is associated with.

- a) F.A.Walker **b) J.B.Clark** c) Chapman d) Joseph A Schumpeter

4. Among the following who propounded the risk theory of profit.

- a) F.B.Hawley** b) F.B.Knight c) F.A.Walker d) J.B.Clark

5. Among the following who originated Innovation theory of profit.

a) **Joseph A Schumpeter** b) F.B.Hawley

c) F.B.Knight d) F.A.Walker

6. The liquidity preference theory was propounded by

a) **J.M.Keynes** b) Thomas R. Malthus

c) John Stuart Mill d) Samuelson

7. Rent is a payment for the use of

a) **Land** b) Labour c) Capital d) Organisation

8. The Ricardian theory rent is suitable for?

a) **Long period** b) Short period c) Medium period d) None

9. Oligopoly refers to a market situation in which there are.

a) few sellers b) **many sellers** c) one seller d) two sellers

11. The price of a commodity is determined by

a) **Demand and Supply** b) Demand and Utility c) Demand only d) Supply only

12. The law of diminishing marginal utility was first formulated by

a) **Gossen** b) Jevons c) Marshall d) Keynes

Section B

Unit 1

1. Write a short note on this personality

2. What is the contribution of this economist?

3. Comment on this personality.

4. write a short note on this personality

5. What is the contribution of this economist?

6.Comment on this personality.

7.Identify the personality

8.Identify the personality

Unit 2

1. With the help of following hints write about importance of agriculture
 - a) most of the people are engaged in agriculture
 - b) Agriculture is the backbone of Indian Economy
2. With the help of following hints define Green Revolution
 - a) Increase in agriculture productivity
 - b) High yielding variety of seeds
3. Comment on the trends in agriculture productivity
4. Write a short note on problems of agriculture using following key words
 - a) Instability due to monsoon
 - b) Land ownership
 - c) Cropping pattern
5. Give a brief picture of the characteristics of Agriculture
 - a) Traditional methods of cultivation
 - b) Subsistence farming
6. With the help of following hints define fragmentation of agriculture land
 - a) Excess population pressure
 - b) Division of land
7. Define the term agrarian economy

Unit 3

1. Define Economics.
2. Define Macro Economics
3. With the help of following hints write about importance and scope of economics
 - a) subject matter
 - b) science or art
 - c) positive or normative
4. Write a short note on Foreign trade
5. With the help of following hints write about importance of foreign trade in your own words.

a) Foreign exchange earning

b) market expansion

c) increase in investment

6. With the help of following hints write a short note on Foreign trade

a) Export

b) Import

Unit 4

1. In your opinion who is a women entrepreneur

2. Define Absolute poverty

3. What is disguised unemployment

4. What is mixed economy

5. What is poverty line

6. What is structural unemployment

7. Define agrarian economy

8. What is involuntary unemployment

Unit 5

1. Write the meaning of the terminology absolute advantage

2. In newspapers you might have noticed that India is having a budget deficit. What does it mean?

3. What is utility?

4. Define Monopoly.

5. What do you mean by demand

6. Write a short note on individual demand schedule

7. Define Labour

Section C

Unit 1

1. Discuss Malthusian Theory of Population .
2. Gave a brief note on wealth definition, Welfare definition and scarcity definition of Economics
3. Comment on the contribution of Schumpeter and Keynes
4. Discuss Karl Marx contribution
5. How do you evaluate the role of Adam Smith and Ricardo in classical economics
6. Briefly explain the contribution of Alfred Marshall and Lionel Robinsons.

Unit 2

1. What are all the problems that you have read and witnessed in the agriculture sector .
2. In your opinion, what are the impacts on the Green Revolution in your area. ?
3. Comment on the extent of the success of the Green Revolution by reading the following passage.
 - a) Green revolution refers to the introduction of High yielding variety (HYV) of seeds and increased use of fertilizer and irrigation methods. It took place during the 1960s especially 1965 onwards. It was aimed at providing increase in production to make India self-sufficient in food grains. The dramatic transformation in agriculture practices that involves the use of new methods of cultivation and inputs refers to as Green Revolution in India.
4. With the help of following hints write about impact of Green Revolution in your own words.
 - a) Spectacular increase in agriculture production
 - b) Improvement in productivity
 - c) Increase in Employment

Unit 3

1. For a Coastal district like Thoothukudi in your opinion, how the fishing villages can improve in foreign trade.
2. As a student of Economics in your opinion what can be done to make foreign trade as the backbone of the coastal community engaged in trade in marine resources
3. Briefly explain the scope of Economics. .

4. List out the difference between Micro Economics and Macro Economics

5. Write a short note on importance and scope of economics using following key points

a) Economics is positive and normative

b) Economics is a science as well as art

6. Identify the examples of macro economy in your village and write a short note on the macro economy.

Unit 4

1) Let us assume you are visiting a village. In that visit you are finding that the village community is poverty stricken. What measures will you suggest to improve their condition?

2) Comment on an Urban area that you visited. Describe the process of urbanization. .

3. In our society you might have come into contact with women entrepreneurs. Write about a short description about your favorite women entrepreneur ?

4. Suppose you belong to a society which is struck with educated unemployment. What you will do to overcome the current situation

5. In your economy how will you categorise disguised unemployment, structural unemployment and cyclical unemployment

Unit 5

1. Write a report on the local market near your residence.

2. In the economy you might have noticed different type of taxes, Explain the terminologies in one or two sentences

a) Progressive tax

b) Proportional tax

c) Advalorem duty

3. The factors of production are given in the table. Explain the process of production in your words.

Factors of Production

d)
4. What are the different types of Market?.

Section D

Unit 1

1. Explain the wealth, welfare and scarcity definitions of Money?
2. Discuss the contribution of Ricardo, Alfred Marshal and Lionnnel Robbnson
3. Discuss the contribution of Karl Marx, Schumpeter and Malthus

Unit 2

1. The challenges of agriculture are given in the table below. Explain each challenge in your words.

Declining holding size
Small holdings and productivity
Scarcity of Capital
Lack of Marketing facility
Problem of irrigation

2. With the help of following hits discuss about green revolution

- a) Agriculture productivity
- b) Self sufficiency in food grain
- c) High yielding variety of seeds
- d) Mechanisation of Agriculture
- e) Use of fertilisers, Chemicals and pesticides

Unit 3

1..Suppose you are in a village which is facing population explosion. What you will suggest to address the problem

2,You are visiting a town which is urbanised in a decade. How will you evaluate the process of urbanisation

3.In your opinion how can the government reduce the different types of unemployment

Unit 4

1..Read the the following passage and answer the questions below

One of the major problems the world is facing is the problem of the exponential growth of population. This problem is the greatest one. Most countries in the world are showing a steep rise in the population figures. World's resources are limited and so they cannot support a population beyond a certain limit. There has been news about the scarcity of food grains and the paucity of jobs mounting across the world. The number of human beings is multiplying at a steady rate. The world population has already crossed the six billion mark and it is expected to double in the next three or four decades.

Causes of Population Growth

The major cause of population growth is the decrease in death rate and rise in the life span of the average individual. Illiteracy is another cause of an increase in population.

Family planning, welfare programs, and policies have not fetched the desired result. The superstitious people mainly from rural places think that having a male child would give them prosperity and so there is a considerable pressure on the parents to produce children till a male child is born. Poverty is another main reason for this.

Impact Due to Population

The growth of the population has a major impact on the living standards of people. Overpopulation across the world may create more demand for freshwater supply and this has become a major issue because Earth has only 3% of freshwater.

The natural resources of Earth are getting depleted because of the exponential growth of population. There is a huge impact on the climatic conditions.

Some Major Effects of the High Population are as Follows

1. The rapidly growing population in the world has led to the problem of food scarcity and heavy pressure on land resources.
2. Generating employment opportunities in vastly populated countries is very difficult.
3. Development of infrastructural facilities is not able to cope up with the pace of a growing population.

Preventive Measures

The government and various NGOs should raise awareness about family planning and welfare. The health care centres in developing and under-developed countries should help the poor people with the free distribution of contraceptives and encourage the control of the number of children.

The governments of developing countries should come forward to empower women and improve the status of women and girls. People in rural places should be educated and modern amenities should be provided for recreation.

- a) Why is population a problem in the world?
- b) What are the causes of population growth?
- c) List out the impact of population growth?
- d) What are all the major effects of high population?
- e) Give an account of preventive measures of Population?

2. Read the passage given below and answer the following questions.

Unemployment

Unemployment can be defined as a state of worklessness for a person who is fit and willing to work at the current wage rate. It is a condition of involuntary and not voluntary idleness

1 Cyclical Unemployment Cyclical or demand deficient unemployment occurs when the economy is in need of low workforce. When there is an economy-wide decline in aggregate demand for goods and services, employment declines and unemployment correspondingly increases

2 Seasonal Unemployment This type of unemployment occurs in a particular time of the year or season and thus is known as seasonal unemployment. Seasonal unemployment is most common in industries like agriculture, tourism, hotel, catering etc.

.3 Structural Unemployment Structural unemployment arises when the qualification of a person is not sufficient to meet his job responsibilities. It arises due to long term change in the pattern of demand that changes the basic structure of the economy.

4 Frictional Unemployment Frictional unemployment occurs when a person is out of one job and is searching for another for different reasons such as seeking a better job, being fired from a current job, or having voluntarily quit a current job.

.5 Natural rate of unemployment The sum total of frictional and structural unemployment is referred as the natural rate of unemployment. Where as Disguised Unemployment is the unemployment which is not visible is said to be disguised unemployment. It occurs when a person doesn't contribute anything to the output even when visibly working. Thus their marginal productivity is zero.

CAUSES OF UNEMPLOYMENT IN INDIA

Slow Economic Growth During the planning period the trend rate of growth was considerably lower than the targeted rate. Therefore, jobs in adequate numbers were not created. Increase in Labor force There are two important factors that have caused an increase in the labor force which are as follows: (i) Rapid Population Growth:. (ii) Social Factors: Since Independence, education among women has changed their attitude toward employment. Many of them now compete with men for jobs in the labor market other causes are

rural-Urban Migration, Inappropriate Technology In India. The present educational system lacks the emphasis on the development of aptitude and technical qualifications required for various types of work among job seekers.

- a) Define unemployment
- b) What is Cyclical unemployment?
- c) Define disguised unemployment
- d) What is the difference between frictional unemployment and structural unemployment

e) List out some of the causes of unemployment in India?

3. India is having demographic dividend . In your opinion how can we use this demographic dividend to address unemployment

Unit 5

1. As an economics student comment on some of the economies of scale and diseconomies of scale existing in your place.
2. Explain factors of production and its features
3. Comment on the different forms of market.

SEMESTER- II			
CORE III		MICRO ECONOMICS -II	
Code: 21UECC21	Hours / week :5	Hrs / Semester: 75	Credits :4

Objectives:

- To understand the behaviour of a consumer, a producer, a factor owner.
- To understand the market structure.
- An Enhance decision making abilities among students to enable them to become productive and informed citizens.

Course Outcomes:

CO. No	Upon completion of this course, students will be able to	PSO's addressed	CL
CO 1	Identify and appraise various models of how markets are organized, and the price and output decisions for maximizing profit. Understand the difference between the firm and the industry; explain and illustrate the differences between the demand curve for a perfectly competitive firm and that for a perfectly competitive industry	1, 2	Ap
CO 2	Describe characteristics of monopolies and a monopolistically competitive industry. Calculate and graph a monopoly's and monopolistic firm's costs, revenues, profit and losses	2,4	Un
CO 3	Design and develop an appropriate wage structure for a firm	1,6	An
CO 4	To make the student understand different types of market and levels of competition prevailing in the market.	1,2	Un
CO 5	Analyse the relationship between inputs used in production and the resulting outputs and costs	1,5	Ev
CO 6	To have a better awareness regarding different Factor Pricing Rent, Wages, Interest, Profit.	6,8	Un

SEMESTER- II			
CORE III		MICRO ECONOMICS –II	
Code: 21UECC21	Hours / week :5	Hrs / Sem.: 75	Credits :4

UNIT I -MARKETSTRUCTURE 15 Hrs

Time Element — Equilibrium of the Firm and Industry – Perfect Competition – Price Output Determination

UNIT II- MONOPOLY AND MONOPOLISTIC MARKETS 15 Hrs

Meaning and features: Monopoly, Discriminating Monopoly and Price – Output Determination–Meaning and features of Monopolistic Competition – oligopoly & duopoly

UNIT III- FACTOR PRICING I 15 Hrs

Theories of Distribution - Wages: Meaning and Types of Wages – Theories of Wages: Subsistence Theory and Wage Fund Theory

UNIT IV - FACTOR PRICING II 15 Hrs

Concept of Rent – Ricardian Theory of Rent, Quasi Rent, Modern Theory of Rent – Concept of Interest: Classical Theory, Loanable Funds Theory and Keynes' Liquidity Preference Theory.

UNIT V- FACTOR PRICING III 15 Hrs

Concept of Profit – Gross Profit and Net Profit – Theories of Profit: Dynamic Theory, Innovation Theory and Uncertainty Bearing Theory.

Text Book: H.L.Ahuja, Modern Micro Economics, 19th Edition, S.Chand &Co Ltd, New Delhi, 2017.

Books for Reference:

1. Robert Pindyck & Daniel Rubinfeld, Micro Economics, 8th Edition, Pearson Education, U.K, 2017.
2. M.L.Jhingan, Micro Economic Theory, 7th Edition, Vrinda Publications, Delhi, 2014.
3. Dominick Salvatore, Principles of Micro Economics, 5th Edition, Oxford University Press, New Delhi, 2009.
4. S. Devairakkam, Micro Economics, 2nd Edition, D.S. R. Publications, Tirunelveli, 2001.
5. M.L.Seth, Micro Economics, 7th Revised Edition, Lakshmi Narain Agarwal Publication, 2001.

SECTION A (1 mark)

Choose the correct answer:

UNIT I

1. Which cost increases continuously with the increase in production?
a) Average cost b) marginal cost **c) variable cost** d) Fixed Cost
2. Private cost is also called _____
a) Internal cost b) social cost c) Explicit cost d) implicit cost
3. External cost is borne by _____
a) Firm **b) Consumers** c) Producer d) Seller.
4. Economic Cost is the addition of explicit cost and _____
a) Internal cost b) Social cost c) Explicit cost **d) implicit cost.**
5. Total cost in the short run is classified into fixed cost and _____.
a) Average cost b) marginal cost **c) variable cost** d) Fixed Cost
6. Which one of the following is a variable cost?
a) Cost of raw material b) Interest payment on past borrowing
c) Cost of equipment d) Payment of rent on building
7. In the short run, when the output of a firm increases, its average fixed cost:
a) Increases b) decreases **c) remains constant** d) will be Zero
8. Which of the following is known as planning curve?
a) Long run average cost curve b) Short run average cost curve
c) Fixed cost curve d) Marginal cost curve
9. Average cost is _____
a) S Shaped curve b) Vertical straight line **c) U-shaped curve** d) L shaped curve
10. Incremental revenue is equal to
a) Total Revenue **b) Marginal Revenue** c) Average Revenue d) Fixed Revenue
11. The shape of revenue curve under perfect competition is _____
a) Horizontal straight line b) Vertical straight line c) U-shaped curve d) L Shaped

12. AR curve under monopoly is
 a) Horizontal straight line b) vertical straight line
 c) U-shaped curve **d) downward sloping**
13. When the total revenue is maximum, MR will be
 a) Increasing b) decreasing c) remain constant **d) Zero.**
14. The addition made to total revenue is _____
 a) AR **b) MR** c) TR d) HR

UNIT II

15. Normal price is price likely to rule in the market in the
 a) Short period b) Long period **c) Market Period** d) Very short period
16. The equilibrium condition of a firm is
 a) **MC = MR** b) $MC < MR$ c) $MC > MR$ d) $AR = MR$
17. An essential features of perfect competition is
a) Only one price b) product differentiation c) Selling Cost d) Few sellers
18. Price discrimination is of _____ kinds.
 a) Two b) Three **c) Four** d) Five
19. The book “Theory of Monopolistic Competition” was written by
a) E.H. Chamberlin b) Mrs. Joan Robinson c) Marshall d) A.C. Pigou
20. When the demand for the product is perfectly elastic, the market is
a) Perfect competition b) Monopoly c) Oligopoly d) Duopoly
21. The concept of equilibrium is always explained with reference to
 a) Demand b) Supply **c) Price** d) Time.
22. In the market there are _____ forces.
a) Two b) three c) four d) five
23. Sole producer exists in _____
 a) Perfect competition **b) Monopoly** c) Oligopoly d) Duopoly
24. A monopolist will fix a higher price for his product when the demand for his product is
 a) Perfectly elastic **b) Perfectly inelastic** c) relatively elastic d) relatively inelastic
25. When MC is greater than MR the seller will _____
 a) Earn profit **b) Incur loss** c) No profit – no loss d) enter the market
26. Under imperfect competition revenue curves slopes
a) Downward b) Horizontal c) Vertical d) upward
27. Under perfect competition, long run equilibrium of a firm is achieved when
 a) $MC = MR$ b) $AC = MC = MR$ **c) $P = AC = MC = MR = AR$** d) $AR = MR$

28. Consumer's resistance may be one of the forms of checks on
 a) *Unfair monopoly* b) Competition c) Oligopoly d) monopolistic competition
29. One of the important features of monopolistic competition is
 a) Homogeneous product b) *product differentiation* c) few sellers d) Uniform price
29. Who introduced the concept of time element in the determination of value?
 a) *Alfred Marshall* b) J.M.Keynes c) J.B.Say d) Samuelson
30. The important features of monopolistic competition are
 a) Price discrimination b) *Selling Cost* c) Few sellers d) absence of competition
31. On the basis of control over raw materials, monopoly may be known as _____ monopoly. a)
Natural b) Social c) Legal d) Private
32. If the seller leaves no surplus to the buyers it is a case of _____ price discrimination a. *First degree*
 b) Second degree c) Third degree d) Fourth degree

UNIT III

33. What is to be distributed among the factors of production?
 a) National wealth b) *National Income* c) National debt d) National expenditure
34. Marginal productivity theory of distribution is also known as _____ theory of distribution a)
General b) Keynesian c) Marxian d) Ricardian
35. The remuneration for each factor is determined by its _____ productivity
 a) Average b) *marginal* c) total d) various
36. Marginal physical product is expressed in terms _____
 a) Money b) *units* c) goods d) factors
37. Marginal Revenue productivity is expressed in terms of _____
 a) *Money* b) units c) goods d) factors
38. The employer will stop the employment where _____
 a) *MRP = MC* b) $MRP > MC$ c) $MRP < MC$ d) $MRP = 0$
39. Marginal productivity theory assumes _____ factors
 a) *Homogeneous* b) Heterogeneous c) indivisible d) immovable
40. The demand for a factor of production is _____ demand
 a) Direct b) *derived* c) inelastic d) elastic
41. The supply of factors of production depends on _____ of factors
 a) *Price* b) quality c) quantity d) nature
42. According to _____ theory the price of a factor is determined by the demand and supply forces.
 a) Ricardian b) Marginal productivity c) *Modern* d) Ricardian

UNIT IV

43. “Rent is that part of the produce of the earth which is paid to the landlord for the use of the original and indestructible powers of the soil” – Name the economist.
a) Malthus **b) Ricardo** c) Marx d) Marshall
44. Who introduced the concept of ‘Quasi –rent’?
a) Malthus b) Ricardo **c) Marshall** d) Keynes
45. Income derived from machines and other appliances made by man is-----.
a) Economic rent **b) Quasi-rent** c) Transfer earnings d) Situation rent
46. When supply of a factor is inelastic, all earnings will be
a) Economic rent b) Quasi-rent **c) Transfer earnings** d) scarcity rent
47. Wage paid on the basis of the work done is
a) Money wage b) Real wage **c) Piece wage** d) Time wage
48. The subsistence theory was formulated by
a) Malthus b) Ricardo c) Adam Smith **d) Physiocrats**
49. The subsistence theory of wage is also called as _____
a) Wage fund b) Residual claimant **c) Iron Law of wage** d) Modern theory
49. The wage fund theory was given by _____
a) J.B.Say **b) J.S.Mill** c) J.M.Keynes d) T.R. Malthus
50. According to Wage fund theory wage is determined by dividing the _____ by number of Labourers.
a) Capital **b) Wage Fund** c) Population d) working hours

UNIT V

51. The payment made purely for the use of capital is
a) Gross interest **b) Net interest** c) simple interest d) compound interest
52. Interest is the price paid for the use of _____ -
a) Land b) labour **c) capital** d) resources
53. _____ funds are needed for consumption, investment and government expenditure
a) Mutual b) Equity **c) Loanable** d) Recurring
54. _____ is the main source of the supply of loanable funds
a) Savings b) Consumption c) Investment d) government
55. Liquidity preference theory was propounded by _____
a) T. R. Malthus **b) J.M. Keynes** c) J.B.Say d) Ricardo
56. Liquidity preference is the preference of the people to hold _____ in their hands
a) Assets b) Gold c) Bonds **d) Liquid cash**
57. According to Keynes there are _____ motives to hold liquid cash

- a) Two **b) Three** c) Four d) Five
58. _____ is an incentive mechanism for business investment
a) Finance b) Deposits **c) profit** d) Money
59. _____ is the price paid to the entrepreneurial services
a) Rent b) Interest c) Wages **d) Profit**
60. According to Prof. Schumpeter profit is the reward for _____
a) Invention **b) Innovation** c) Risk-bearing c) Uncertainty bearing
61. Innovation includes introducing new sources of _____
a) Raw materials b) resources c) wealth d) Finance
62. According to prof. Knight Profit is the reward for _____ bearing
a) Risk **b) Uncertainty** c) failure d) Loss
63. According to Prof. Clark profit arises in a _____ economy
a) Static **b) dynamic** c) political d) private
64. Just as rent is measured from no-rent lands, _____ is measured for superior entrepreneur.
a) Profit b) rent c) wages d) interest
65. _____ is the use of invention in business field
a) Innovation b) Advertisement c) marketing d) Production

Section B

Answer in about 50 words each:

UNIT I

1. What do you mean by cost?
2. Define explicit costs.
3. Which cost curve is parallel to ox-axis? Why?
4. What do you mean by implicit costs?
5. Define marginal cost.
6. Define Revenue.
7. What do you mean by marginal revenue?
8. Why is total fixed cost curve parallel to ox-axis?
9. Distinguish between total fixed cost and total variable cost.
10. Why is short run average cost curve 'U' shaped?
11. Explain diagrammatically the relationship between Average cost, Average variable cost and Average fixed cost.
12. Define marginal revenue. Explain the relationship between average and marginal revenue

UNIT II

13. What are main forms of market?
14. What do you mean by homogenous product?
15. How is price determined under perfect competition?
16. Name the three forms of imperfectly competitive market.
17. What is the common feature shared by perfect and monopolistic competition?
18. Define the monopoly market.
19. What is the relationship between AR curve and demand curve in a monopoly market?
20. What do you mean by price discrimination?
21. Under which market price discrimination is possible?
22. What are selling costs?
23. Explain any three features of monopoly.
24. How is the demand curve under monopolistic competition different from demand curve of a firm under perfect competition?
25. Why is a firm under perfect competition a price taker? Explain.
26. Explain three features of perfect competition.
27. Explain the characteristics of monopolistic competition.
28. Explain equilibrium price. How is it determined?
29. Mention the different types of price discrimination
30. What do you mean by product differentiation?
31. What do you mean by selling cost?
32. Mention any two types of monopoly
33. What are the advantages of monopoly?
34. What are the disadvantages of monopoly?
35. Explain any two methods to control monopoly

UNIT III

36. What is Marginal productivity?
37. What are the other names for Marginal Productivity theory?
38. What are the two classifications of Marginal Productivity?
39. Define Marginal physical productivity.
40. Define Marginal Revenue Productivity.
41. What are the assumptions of Marginal Productivity Theory?
42. Mention any two criticisms of Marginal Productivity Theory.
43. Explain the demand for a factor.
44. Explain the supply side of a factor.

45. Explain the price determination of a factor in modern theory.

UNIT IV

- 46. What is rent according to Ricardo?
- 47. What are the assumptions of Ricardian Theory?
- 48. Define situation rent and scarcity rent
- 49. What do you mean by 'Quasi Rent'?
- 50. What do you mean by transfer earnings?
- 51. Mention any two criticisms of Ricardian Theory of Rent?
- 52. How rent is determined in modern theory?
- 53. How quasi rent arises in Labour?
- 54. How quasi rent arises for capital?
- 55. How quasi rent arises in entrepreneur?
- 56. Define money wage and real wage
- 57. What are the various types of wages?
- 58. What do you mean by Wage fund?
- 59. Write the formula for wage fund.
- 60. Who is the residual claimant?
- 61. Mention the factors determining the real wage
- 62. What do you mean by subsistence level?
- 63. Give a note for standard of living.
- 64. What is Trade Union?
- 65. What are the two functions of Trade Union?

UNIT V

- 61. Define interest.
- 62. What do you mean by Gross interest and net interest?
- 63. What are the various items included in gross interest.
- 64. Define the concept loanable funds.
- 65. What are the components of demand for loanable funds?
- 66. What are the components of Supply of loanable funds?
- 67. What is Liquidity Preference?
- 68. What are the three motives for liquidity preference?
- 69. What is a liquidity trap?

70. Distinguish between Gross interest and net interest.
71. Define profit
72. Distinguish between gross profit and net profit
73. What are the components of gross profit?
74. Distinguish between risk and uncertainty
75. What do you mean by risk?
76. What is uncertainty?
77. Distinguish between static and dynamic economy.
78. What are the possible changes in a dynamic society?
79. Explain the various types of innovation in business.
80. Distinguish between invention and innovation

Section C

Answer in about 200 words each

UNIT I

1. Explain the relationship between AR and MR under perfect and imperfect competition
2. Explain the concepts Total Revenue, Marginal Revenue and Average Revenue.
3. Explain the different types of costs
4. Explain the concept of opportunity cost.
5. Explain the Fixed cost and Variable Cost
6. Explain the relationship between average cost and marginal cost
7. Write a note on short run cost curves
8. Write a note on long run cost curves
9. Explain the relationship between short run and long run cost curves.
10. Distinguish between Explicit cost and implicit cost

UNIT II

11. What are the features of perfect competition?
12. What are conditions for price and output determination?
13. What are the features of monopoly?
14. What are the various types of monopoly?
15. Explain the causes for the emergence of monopoly
16. Explain the advantages and disadvantages of monopoly

17. Explain the four types of price discrimination
18. What are the three degrees of monopoly power?
19. What are the features of monopolistic competition?
20. What are the various factors determining the product differentiation?

UNIT III

21. Distinguish between marginal physical and marginal revenue productivity
22. Give the diagrammatic representation of Marginal productivity theory
23. What are the various criticisms levelled against marginal productivity theory
24. Explain the modern theory of distribution
25. Explain the relationship between marginal productivity and marginal cost
26. Explain the marginal productivity theory of distribution

UNIT IV

27. Explain the Ricardian theory of rent with an example
28. What are the various criticisms levelled against the Ricardian Theory
29. How quasi rent arises in labour, capital and organisation
30. Explain the emergence of transfer earnings
31. Explain the modern theory of rent.
32. Explain the subsistence theory of wages with its criticisms
33. Distinguish between real wages and money wages
34. Explain the various types of wages
35. Explain the wage fund theory
36. Explain the marginal productivity theory of wages
37. Explain the standard of living theories of wages
38. Explain the different types of wages

UNIT V

39. Distinguish between gross interest and net interest
40. Explain the demand side and supply side of loanable funds
41. Give the diagrammatic explanation of demand for and supply of loanable funds
42. What are three motives for liquidity preference
43. Explain the concept 'Liquidity trap' with diagram
44. Distinguish between gross profit and net profit
45. Distinguish between normal profit and abnormal profit

46. Explain the risk bearing theory of profit
47. Explain the uncertainty bearing theory of profit
48. Examine the dynamic theory of profit
49. Explain the innovation theory of profit
50. Explain the marginal productivity theory of profit

SECTION D

Answer in about 500 words each:

UNIT I

1. Explain the concepts Total revenue, marginal revenue and average revenue
2. Explain the relationship between AR and MR in various markets
3. Explain in detail the different types of cost and their relationships
4. Explain the relationship between short run and long run cost curves
5. Explain the fixed cost and variable cost with diagram
6. Explain the relationship between average cost and marginal cost with diagram

UNIT II

7. Critically examine the time element in value determination
8. How price and output is determined under perfect competition
9. Explain the price and output determination under simple monopoly
10. Explain price and output determination in discriminating monopoly
11. Explain the causes for the emergence and types of monopoly
12. Explain the advantages and disadvantages of monopoly and the measures to control monopoly
13. How price and output is determined under monopolistic competition
14. Compare the features of perfect competition and monopolistic competition

UNIT III

15. Critically examine marginal productivity theory of distribution
16. Explain the modern theory of distribution with diagram

UNIT IV

17. Critically examine the Ricardian theory of Rent
18. Explain the term Quasi Rent and its emergence in other factors
19. Explain the concept transfer earnings in detail

20. Explain the modern theory of rent
21. Distinguish between real wages and money wages and explain the factors determining the real wages
22. Explain the marginal productivity theory of wages
23. Explain the role of trade unions in wage determination

UNIT V

24. Critically examine the loanable fund theory of interest
25. Critically examine the Liquidity preference theory of interest
26. Examine the marginal productivity theory of profit
27. Critically explain the dynamic theory of profit
28. Critically examine the uncertainty bearing theory of profit
29. Explain in detail the Innovation theory of profit
30. Explain the various theories of profit.

SEMESTER- II			
CORE IV		INDIAN ECONOMY – II	
Code: 21UECC22	Hours / week :5	Hrs / Semester: 75	Credits :4

Objectives:

- Develop an in-depth understanding of the Indian economy
- Understanding and analysing Indian Economic Issues, developments and policies.
- To enable students to have an understanding on the various issues of the Indian economy

Course Outcome:

CO No.	Upon completion of this course, students will be able to	PSO Addressed	C L
CO 1	To comprehend the significance, policies and growth of the industrial sector in India.	2,5	Re
CO 2	To enable the students to understand the challenges faced by the Micro, Small and Medium Enterprises.	4,8	Un
CO 3	Providing a solid introduction to transportation demand and various types or modes of transportation.	1,6	Ev
CO 4	To facilitate an understanding of the Balance of Payments. Explain the Foreign Direct Investment and Foreign Portfolio Investment. Evaluate WTO	1,2	An
CO 5	Students will be able to understand how planning can develop an economy. Evaluation of five -year plans.	4, 5,7	Un
CO 6	Students will get knowledge about IT and ITES in India.	1, 2	Ap

SYLLABUS

SEMESTER- II CORE IV – INDIAN ECONOMY – II Code: 21UECC22

UNIT I INDUSTRIES

Role of Industries in Economic Development - Cottage, Small Scale, MSME and Large-Scale Industries (Cotton, Iron & Steel and Cement) Industrial Policy-1991, 2001 & 2011

UNIT II PLANNING

Definition and Scope of Planning-Objectives of Planning in India-A brief resume of Five-year Plans in India – Recent Five-year Plan.

UNIT III TRANSPORT

Types of Transport - Importance (Railway, Roadways, Shipping and Civil Aviation

UNIT IV FOREIGN TRADE

Importance of Foreign Trade in Economic Development, Balance of Payments – Recent EXIM Policy- WTO and Indian Economy- Government Financial Support for foreign trade

UNIT V IT & ITES IN INDIA

Meaning – Structure – Role and Importance of IT & ITES in India- Recent Developments

Text Book:

Ruddar Datt and Sundharam K.P.M., *Indian Economy*, Sultan Chand, New Delhi, 2009

Books for Reference:

1. Uma Kapila, *Indian Economy, 9th Edition*, ISBN:8171887902, Published by Academic Foundation, 2010.
2. Ishwar.C.Dhingra -*The Indian Economy, Twenty first edition*, Sultan Chand, New Delhi, 2009. 2.

SEMESTER- II CORE IV – INDIAN ECONOMY – II Code: 21UECC22
QUESTION BANK
(for those who joined in July 2021 and after)

SECTION A

Choose the correct answer:

UNIT I

1. When the first industrial policy was introduced?
 (a) 1951 (b) 1991 (c) **1948** (d) 1956
2. How many industries are reserved for the public sector in the new Industrial policy 1991?
 (a) 60 (b) **8** (c) 10 (d) 12
3. One major proposal of New Industrial Policy (1991) was—
 (a) NRIs will not be allowed for capital investment in India (b) All types of industries have been made licence free (c) Import restrictions of technical know-how for one year (d) **Facility of direct foreign investment upto 51% in high priority industries**
4. The MSME sector in India has maintained a consistent growth rate of ----- per cent.
 (a) 5 (b) **10** (c) 15 (d) 20
5. When was the “Package for Promotion of Micro and Small Enterprises” announced?
 a) August 2005 **b) February 2007** c) March 2009 d) November 2010
6. SAIL was set up in ----- (a) 1980 (b) 1970 (c) **1974** (d) 1989
7. IISCO came under the control of : (a) RBI (b) **SAIL** (c) UTI (d) PNB
8. MARTP Act is related to (a) **Industry** (b) Service (c) Bank (d) Shipping
9. Small –scale industries contributed% towards total production of manufacturing:
 (a) 20.43 (b) **5.83** (c) 10.3 (d) 16.79
10. Indian Iron and Steel company was established in
 (a) 1919 (b) **1909** (c) 1976 (d) 1090
11. is known as the father of Iron and Steel Company in India.
 (a) **Jamshedji Tata** (b) Ratan Tata (c) Ambani (d) Mittal
12. Bockaro Steel plant was started during plan.
 (a) First (b) Second (c) Third (d) **Fourth**
13. Small scale industries contributed ----- percent towards total production of manufacturing.
 (a) 4.69 (b) **5.83** (c) 12.69 (d) 18.83

UNIT II

1. Indian Planning Commission was constituted in—
 (a) 1948 (b) 1949 (c) **1950** (d) 1951
2. Rolling Plan was made for the period—
 (a) 1971 to 1978 (b) 1980 to 1985 (c) **1978 to 1983** (d) 1992 to 1997
3. Plan expenditure in India is met by—

(a) **Internal debt and other resources** (b) Assistance from Aid India Club (c) Assistance from IMF (d) Assistance from OECD countries

4. The period of 11th plan is—

(A) 2005–10 (b) 2006–11 (c) **2007–12** (d) 2008–13

5. Which Indian plan ensured high growth rate as compared with targeted growth rate?

(a) Fifth Plan (b) Fourth Plan (c) Second Plan (d) **Eighth Plan**

6. The outlines of second five-year plan was made by—

(a) B. N. Gadgil (b) VKRV Rao (c) **P. C. Mahalanobis** (d) C. N. Vakil

7. NABARD was established in—

(a) Fourth Plan (b) Fifth Plan (c) **Sixth Plan** (d) Eighth Plan

8. The period of 12th plan in India was—

(a) 2002–2007 (b) 2007–2012 (c) **2012–2017** (d) 2013–2018

9) Indian Planning Commission drafted First Five-Year Plan in

a) March 1950 b) **July 1951** c) June 1955 d) January 1944

10) The Planning Commission was established in

a) 17 July 1949 b) **15 March 1950** c) 15 June 1934 d) 15 August 1945

11) The is the Chairman of the Planning Commission.

a) President b) **Prime Minister** c) Chief-Minister d) State Governor

12) _____ has first used the method of project evaluation for development plans in India.

a) Prof Mahalanobis b) Prof Rajc) **D. R. Gadgil** d) Dr. Ram Narayan.

13) Economic Planning is in -----

a) Union list b) State list d) **Concurrent list** d) Private List

UNIT III

1. Which five-year plan of India is called “Industry and Transport” plan?
(A) First Five Year Plan (B) **Second Five-year Plan** (C) Third Five Year Plan D) Fourth Five Year Plan

2. India has an extensive road network of 3.3 million kms. What is India’s rank in the world in Road Network? (A) First (B) **Second** (C) Third D) Fourth

3. The longest Highway in India runs from-----

A) Varanasi to Kanyakumari (NH 7) B) Delhi to Indo-Pak Border (NH 1) C) Panvel – Kochi (NH 17) D) Baharagora to Chennai (NH 5)

4. 1853 is a landmark in India’s Transport because of?

(A) First train (B) First cargo plane (C) First ship (D) First Bus

5. Indian Railway’s first set of solar plants with total capacity of the 5-megawatt peak (MWp) has been launched in which city?

a) Ahmadabad b) Kolkata c) **New Delhi** d) Lucknow

6. Who is responsible for the construction and maintenance of the National Highways?

a) State Government b) **Central Government** c) Federal Government d) National Government

7. What is the length of the total coastline of India?

(a) 7516.6 km. (b) 7562.3 km. (c) 7581.4 km. (d) 7596.2 km.

8. Which Indian state is having a longest coastline?

(a) **Gujarat** (b) Mumbai (c) Chennai (d) Delhi

9. Which among the following is the cheapest mode of transport in terms of fixed plus running costs?

- (A) Roadways (B) **Waterways** (C) Railways (D) Pipelines

10. Which among the following is characterized by Highest Fixed Cost & Lowest Running Cost?

- (A) Road Transport (B) Rail Transport (C) Air Transport (D) **Pipeline Transport**

11. The mascot of the merged Indian airline 'Air India' is—

- (a) Konark Chakra (b) The Centaur (c) The Maharaja (d) **Flying Swan with Konark Chakra**

12. When was International Airport Authority of India (IAAI) set up?

- a) 1960 b) **1972** c) 1985 d) 1986

13. When was the Airports Authority of India proposed?

- a) September 18, 1992 b) **April 1, 1995** c) June 1, 2004 d) March 31, 2005

UNIT IV

1. The main security guard of International Trade is—

- (a) IMF (b) World Bank (c) **WTO** (d) IFC

2. WTO prescribes export subsidies as:

- (a) Competition b) **Unfair competition** c) Monopolistic competition d) Exploitation

3. Export promotion is an:

- a) Inward looking strategy b) **Outward looking strategy** c) Fiscal strategy d) Political strategy

4. Since March 1973, the world, more or less, had a:

- a) Free floating exchange rate system b) Fixed exchange rate system c) **Managed floating exchange rate system** d) Adjustable peg system

5. Net National gains from trade are measurable function of:

- a) Volume of trade b) Relative prices in two countries c) Factor cost of commodities traded d) **Volume of trade credited and change in prices caused by trade**

6. Which economic argument for protection is given correct disequilibrium in the balance of payments of a country?

- a) terms of trade argument b) infant industry argument
c) **balance of payments argument** d) revenue argument.

7. Tariff is the levy on -----

- a) **commodity imported into a country** b) commodity exported to another country
c) domestically transported commodity d) levy on manufactured commodities.

8. Tariff is levied on the basis of physical unit of the import it is known as -----

- (a) **Specific duty** (b) Advalorem duty (c) Revenue duty (d) Compensatory duty

9. Current and capital accounts are examples of -----

- a) **autonomous transactions** b) accommodating transactions c) unilateral transactions
d) balance of trade

10. Balance of payment includes -----

- a) Invisible items b) **both visible and invisible items** c) visible items d) all the above

11. The balance of trade is also known as -----

- a) capital transfers b) gains from trade c) **the visible balance** d) current account

12. Import quota is :

- a) Tariff b) **Non-tariff trade barrier** c) Concession d) International obligation

UNIT V

1. Which city is the electronic capital of India?
(a) **Bangalore** (b) Chennai (c) Delhi (D) Mumbai
2. Which of the following industry is known as sun rising industry?
A. Dairy industry **B. Information Technology** C. Health and clinic D. Agriculture
3. In which year did IT Act came into force in India?
a) 1980 b) 1982 c) 1991 **d) 2000**
4. As per the latest data released by Internet Governance Forum (IGF), India stands at.....place in the list of largest internet users in the world.
(a) Second (b) **Fourth** (c) Sixth (d) Tenth
5. A new technology which provides the ability to create an artificial world and have people interact with it is called -----
a) Data Digitization b) GIS c) Payroll d) **Televirtuality**
6. 'Nextzone' an information technology SEZ is being established in which state?
a).Kerala b).Madhya Pradesh c).Gujarat **d).Maharashtra**
7. Which year did microcomputers developed?
a) 1975 b) 1982 c) 1991 d) 2000
8. Who designed the logo of Digital India?
a) Rana Bhowmick b) R K Baliga c) Sanjay K Jha d) Umang Bedi
9. Silicon Valley of India is located in
A. Dehradun **B. Bangalore** C. Hyderabad D. Srinagar
10. Number of operating computers on internet is ----- a) nearly 10 million b) nearly 20 million **c) more than 50 million** **d) 30 million**

SECTION– B

Answer in about 50 words each:

UNIT I

1. What is Industrial Policy?
2. What do mean by large scale industries?
3. Define tiny industry
4. What are cottage industries?
5. What do mean by small scale industries?
6. What are the features of the Industrial Policy 1991?
7. What are the features of the Industrial Policy 2001?
8. Name any two problems of cotton textile industry

UNIT II

1. What is Plan?
2. Define economic planning
3. Why to Plan?
4. What are the objectives of planning?
5. State the scope of planning
6. What are the objectives of eleventh plan?
7. What are the objectives of twelfth five-year plan?

UNIT III

1. What do you mean by transport?
2. What are the types of transport?
3. State the functions of transport
4. State the importance of railways
5. Specify the importance of road transport
6. What are the kinds of water transport?
7. What are the features of inland water transport?
8. What are the reasons for poor performance of inland water transport?
9. What are the salient factors of shipping transport?
10. Distinguish between the coastal and overseas shipping

UNIT IV

1. Define foreign trade
2. What are the categories of India's foreign trade?
3. Define balance of payment.
4. What is favourable balance of payment?
5. What is adverse balance of payment?
6. What are the classifications of balance of payment?
7. What are the uses of balance of payment?
8. What is EXIM Policy?
9. What is WTO?
10. What are the objectives of WTO?
11. What are the aims of export import policy?
12. Mention the uses of balance of payment

UNIT V

1. What is Information Technology sector?
2. Give some examples for the usage of Information Technology sector.
3. State the categories of Information Technology sector.
4. Write any four characteristics of IT and electronic industry of India.
5. State any two points of importance of Information Technology industry in India?

SECTION – C

Answer in about 200 words each

UNIT I

1. What are the objectives of Industrial Policy of 1991?
2. What are the objectives of Industrial Policy of 2001?
3. What are the problems of iron and steel industry?
4. Write a note on cottage industries
5. Explain the growth of cotton textile industry
6. Explain the growth of Cement industry
7. What are the problems of small-scale industries?

UNIT II

1. Explain the Scope of Planning
2. What are the major objectives of planning in India?

3. Specify the objectives of 12th Five Year Plan.
4. Explain the objectives of the Tenth Five Year Plan.
5. Explain the achievements of the Ninth Five Year Plan.
6. Explain the achievements of the Eleventh Five Year Plan.
 1. What are the objectives of planning?
 2. State the stages in planning
 3. State the pre-conditions of planning
 4. State the scope of planning
 5. What are the objectives of eleventh plan?
 6. What are the objectives of twelfth five-year plan?
 7. What are the strategic challenges of twelfth five-year plan?

UNIT III

- 1) State the importance of transport
- 2) State the importance of railways
- 3) Specify the importance of road transport
- 4) Specify the importance of marine transport
- 5) Write a note on coastal shipping
- 6) State the importance of air transport

UNIT IV

1. What are the objectives of WTO?
2. What are the aims of export import policy?
3. Mention the uses of balance of payment
4. State the objectives of recent EXIM Policy
5. Write about WTO and Indian Economy

UNIT V

1. Give a detail report on the structure of India's ITES industry
2. How is IT industry contributing in the field of employment and foreign exchange in India? Explain.
3. State and explain the role and importance of IT & ITES in India
4. Give a brief explanation about the recent developments of IT & ITES in India

SECTION – D

Answer in about 500 words each

UNIT I

1. What are the problems of cotton textile industry? Explain the measures taken by the Government.
2. Explain the role and importance of small-scale industries
3. Explain the role of industries in economic development.
4. What are the problems of iron and steel industry? Explain the measures taken by the Government.
5. What are the problems of small-scale industries? Explain the measures taken by the Government.
6. Discuss elaborately the various aspects of industrial policy of 1991.

UNIT II

1. Discuss the objectives and achievements of planning of India.
2. Explain the objectives and achievements of the Ninth Five Year Plan.
3. Give a brief explanation about the recent five-year plan
4. Discuss a brief resume of Five-year Plans in India
5. Explain the objectives and achievements of the Eleventh Five Year Plan
6. Describe the objectives and achievements of the Twelfth Five Year Plan

UNIT III

1. Explain the importance of transport
2. Explain the growth and achievements of railways during five-year plans
3. Describe the growth of road transport and its problems
4. Describe the growth of air transport and its problems
5. Discuss the growth of shipping in India and its shortcomings

UNIT IV

1. Explain the importance of foreign trade in economic development
2. Discuss the growth of foreign trade of India
3. Evaluate the balance of payments position in India during five-year plan period.
4. Give a detail report on the highlights of the present foreign trade policy.
5. Write an essay on WTO and Indian Economy

UNIT V

1. How is IT industry contributing in the field of employment and foreign exchange in India? Explain.
2. State and explain the role and importance of IT & ITES in India
3. Give a brief explanation about the recent developments of IT & ITES in India.

ST. MARY'S COLLEGE (AUTONOMOUS) THOOTHUKUDI

I B. A. Economics

Allied I – Statistics -II Sub Code: 21UECA21

QUESTION BANK

Semester II - April 2022

(For those who joined in July 2021 onwards)

Section A (1 Mark)

Choose the correct answer

UNIT-I

1. Correlation analysis is applied to determine
(a) **the degree to which the variables are related**
(b) the association of the variables
(c) the relationship of the causes and effect
(d) the multiple relationship
2. The coefficient of correlation
(a) has no limit (b) Varies between + or -1 (c) **can be less than 1**
(d) can be more than 1
3. The coefficient of correlation is independent of:
(a) change of scale only (b) change of origin only (c) **both a and b**
(d) change of degree only
4. The coefficient of correlation
(a) cannot be positive (b) cannot be negative (c) is always positive
(d) **can be either positive or negative**
5. The relationship between three or more variables is studied with the help of _____
correlation
(a) simple (b) partial (c) **multiple** (d) single
6. Correlation can be classified in the following ways
(a) positive and negative (b) simple, partial and multiple (c) **Both a & b**
(d) Positive and negative only
7. Correlation is perfectly positive when $r =$
(a) -1 (b) **+1** (c) 0 (d) -2

8. Under the concurrent deviation method, if the value of $c = 0$, the value of coefficient of correlation =
 (a) **0** (b) +1 (c) -1 (d) +2
9. The most practically used method of measuring correlation coefficient is
 (a) Karl Pearson's method (b) Rank correlation method
 (c) **Concurrent deviation method** (d) Graphical method
10. If the sum of the product of deviations x and y series from their mean is zero, the coefficient of correlation is
 (a) +1 (b) -1 (c) **0** (d) +2
11. In the partial correlation all the given variables are analysed simultaneously
 (a) True (b) **False** (c) Can't say (d) Partially true

UNIT-II

1. There will be one regression line in case of two variables if
 (a) $r = 0$ (b) $r = +1$ (c) $r = -1$ (d) **$r = +1$ or -1**
2. When one regression coefficient is negative the other would be
 (a) **negative** (b) positive (c) zero (d) unpredictable
3. When one regression coefficient is positive the other would be
 (a) **positive** (b) negative (c) zero (d) unidentifiable
4. The purpose of regression is to study
 (a) dependence between X and Y (b) cause and effect relationship
 (c) **Both a & b** (d) to find the known values of variables
5. The sign of regression coefficient is _____ as that of correlation coefficient
 (a) **same** (b) constant (c) not equal (d) varying
6. When the correlation coefficient $r = +1$ or -1 , then the two regression lines will
 (a) perpendicular to each other (b) **coincide** (c) parallel to each other
 (d) be adjacent to each other.
7. If one regression coefficient is greater than unity, then the other must be
 (a) greater than unity (b) **less than unity** (c) equal to unity (d) unpredictable
8. When $b_{xy} = 0.8$ and $b_{yx} = 0.8$ the value of correlation coefficient will be
 (a) +1 (b) 0.64 (c) **0.8** (d) 0.1

9. Given the regression Coefficients, we can find
 (a) **r** (b) S.D (c) C.V (d) S.D only
10. The term regression was first used by
 (a) **Sir Francis Galton** (b) Karl Pearson (c) Spearman (d) Bowley
11. The farther the regression lines cut each other
 (a) the greater will be the degree of correlation
 (b) **the lesser will be the degree of correlation**
 (c) correlation will be zero
 (d) correlation will be negative
12. We can find 'r' by using
 (a) $\sqrt{b_{xy}}$ (b) $\sqrt{b_{yx}}$ (c) $\sqrt{b_{xy} \cdot b_{yx}}$ (d) b_{xy}

UNIT- III

1. Which is the ideal index number?
 (a) **Fisher's** (b) Laspeyre's (c) Paache's (d) Bowley's
2. Which average is best in the construction of index number?
 (a) Arithmetic mean (b) **Geometric mean** (c) Median (d) Mode
3. Paache index is based on Lapeyre's
 (a) base year quantities (b) **Current year quantities** (c) Factor price
 (d) previous year's price
4. There are basically _____ kinds of index numbers.
 (a) Two (b) **three** (c) four (d) six
5. Fisher's index is
 (a) the median of Lapeyre's and Paasche's index
 (b) **Arithmetic mean of Lapeyre's and Paasche's index**
 (c) geometric mean of Lapeyre's and Paasche's index
 (d) Mode of Laspeyre's and Paasche's
6. Time reversal test is satisfied when
 (a) $p_{01} \times p_{10} = 0$ (b) **$p_{01} \times p_{10} = 1$** (c) $p_{01} \times p_{10} > 1$ (d) $p_{01} - p_{10} = 1$
7. Factors reversal test is satisfied when
 (a) $p_{01} \times p_{10} = 0$ (b) **$p_{01} \times Q_{01} = \frac{\sum p_1 q_1}{\sum p_0 q_0}$** (c) $p_{01} \times p_{10}$

8. Ideal index is given by
(a) **Irving Fisher** (b) A.L Bowley (c) Laspeyre (d) Kelly
9. Index numbers are called _____ to measure changes in economic activities
(a) **economic barometers** (b) averages (c) skewnessness (d) median
10. _____ test is satisfied by both fisher's and kelly's formulae
(a) Time reversal (b) **factor reversal** (c) circular (d) Modular
11. The base year selected for the construction of index numbers should be
(a) **Normal** (b) abnormal period (c) period of frequent fluctuations
(d) period with cyclical fluctuations
12. To prepare consumer price index numbers we have to get price quotations from
(a) wholesalers (b) **retailers** (c) both a and b (d) consumers

UNIT-IV

1. A time series contain which of the following components
(a) Secular trend (b) Seasonal variations (c) **a & b only** (d) Structural changes
2. A time series of annual data can contain
(a) Secular trend (b) **Seasonal variations** (c) cyclical variations
(d) long term variation
3. Secular trend represents
(a) **Long terms variations** (b) Seasonal variations (c) Cyclical variation
(d) short term variations
4. Business ups and downs are called
(a) Regular variations (b) Seasonal variations (c) **Cyclical movements**
(d) short term variations
5. Trends refers to a long-term tendency to
(a) decrease only (b) increase only (c) **either increase or decrease**
(d) be neutral only
6. The most important factor causing seasonal variations are
(a) Growth of population (b) technological changes
(c) **weather and social customs** (d) infrastructural changes

7. The trend is linear if the growth rate is
(a) positive **(b) constant** (c) negative (d) very high
8. Seasonal variations repeat during a period of
(a) **1 year** (b) 5 years (c) 7 years (d) 10 years
9. In the least square linear trend equation $Y = a + bx$, if 'b' is positive it indicates
(a) declining trend **(b) rising trend** (c) no trend at all (d) medium trend
10. Cyclical fluctuations are caused by
(a) strikes and lockouts (b) floods (c) wars **(d) Business ups and downs**
11. It is the simple device to estimate trend values by smoothening a time series.
(a) Graphical method **(b) Moving average method** (c) least square method
(d) Semi-average method
12. Sales of textile firm during Deepavali reveals _____ variations
(a) Irregular (b) Cyclical **(c) Seasonal** (d) Infrastructural
13. Cyclical movements are due to
(a) Short-term variations (b) Long-term variations **(c) Trade cycles**
(d) mid-term variations

Unit -V

1. When the chance of occurrence of each event is the same, such events are called
(a) Compound events (c) Independent events
(b) **Equally likely events** (d) Variable events
2. When two events occur simultaneously, they are
(a) Compound events (c) **Independent events**
(b) Equally likely events (d) Similar events
3. If an event is certain to happen, the probability of the event will be
(a) **+1** (b) -1 (c) 0 (d) 1/2
4. If an event cannot happen, the probability of the event will be
(a) +1 (b) -1 (c) **0** (d) -2
5. The chance of occurrence of an event lies between
(a) 0 and 1 (b) **-1 and +1** (c) 1 and 100 (d) 1 and 10
6. What is the probability of getting the number 5 in throwing a die?
(a) **1/6** (b) 2/6 (c) 3/6 (d) 4/6
7. A card is drawn at random from a standard pack of 52 playing cards. What is the probability that the card is either a jack or a queen?
(a) 1/52 (b) **2/13** (c) 1/13 (d) 2/52

8. Who discovered Binomial distribution?
(a) Gauss (b) **Bernoulli** (c) Fisher (d) Bowley
9. Normal distribution was first discovered by
(a) Gauss (b) Bernoulli (c) **De Moivre** (d) Samuelson
10. In a normal distribution β_2 is
(a) 0 (b) 2 (c) **3** (d) 4
11. In a binomial distribution mean is 10 and S.D is 2, q will be
(a) 1 (b) **0.4** (c) 0.8 (d) 10

Section B (2 Marks)

Answer in about 50 words

UNIT-I

1. What is correlation?
2. Mention the different types of correlation.
3. Differentiate linear and non-linear correlation.
4. What is simple correlation?
5. What is multiple correlation?
6. What is partial correlation?
7. What is positive correlation?
8. What is negative correlation?
9. What is a scatter diagram?
10. What is rank correlation?

UNIT-II

1. What is regression?
2. What are regression lines? Mention their equations.
3. What are regression equations?
4. Give the formula for regression equation of x on y
5. Write the formula for finding regression equation of y on x
6. Write any two differences between correlation and regression.
7. Mention any two uses of regression analysis.
8. Give the inter-relationship between correlation and regression.
9. List any two properties of regression coefficients.
10. What is meant by regression coefficients?

UNIT-III

1. Define Index numbers
2. Mention any two characteristics of index numbers.
3. List out any two uses of index numbers.
4. Mention the types of index numbers.

5. What is price index?
6. What is quantity index?
7. What is value index?
8. How is selection of commodity a problem in construction of index numbers?
9. Explain the problem of “Selection of base” in construction of index numbers.
10. Give the formula of calculating unweighted index number through simple aggregate method.
11. Write down the formula for estimating unweighted index numbers by average of the price relatives method.
12. List out the methods for calculating weighted index numbers.
13. How will you find out weighted index number through Laspeyre’s method.
14. Write down the formula for calculating weighted index number through Paaschel’s method.
15. Give the formula for calculating index numbers through Fisher’s Ideal method.
16. What is the condition to test an ideal index number through time reversal test.
17. Explain the factor reversal test for an ideal index number.
18. What is fixed base index?
19. What is chain base index?
20. State any two problems involved in the construction of index numbers.

Unit IV

1. What is meant by time series?
2. List any two uses of time series.
3. What are the components of time series?
4. What is trend?
5. What is secular trend?
6. What is seasonal variation?
7. What are cyclical movements?
8. What is meant by recession and depression?
9. What are irregular variations?
10. Mention the methods of measuring trend in time series.

UNIT-V

1. What is probability?
2. Give any two uses of probability.
3. What is an event in probability?
4. Differentiate simple and compound events.
5. What are mutually exclusive events? Give example.
6. What are equally likely events. Give an example.
7. Differentiate independent events and dependent events.

8. From a pack of cards, a card is drawn. What is the probability that the drawn card is a Jack or a King?
9. What is the probability of getting a total 7 points in a single throw of 2 dice?
10. What is normal distribution?
11. What is Binomial distribution?
12. What is Poisson distribution?

Section C (5 Marks)

Answer the following in 200 words. (Internal Choice)

UNIT-I

1. Explain the importance of correlation.
2. Explain the different types of correlation.
3. What are the properties of correlation coefficient?
4. Explain the steps involved in calculating correlation using rank correlation method.
5. Explain the concurrent deviation method of calculating correlation.
6. Distinguish between coefficient of correlation and coefficient of variation.
7. Find the correlation co-efficient for the following data
 X: 40, 40, 45, 50, 55, 55, 55, 50, 50, 40
 Y: 11, 13, 14, 16, 16, 15, 15, 14, 13, 13
8. Find out r from the following data
 X: 3, 5, 7, 2, 10
 Y: 3, 4, 6, 3, 7
9. Find out rank correlation from the following data
 R_1 : 3, 1, 2, 4, 5
 R_2 : 1, 2, 4, 3, 5
10. Calculate the correlation coefficient from the following data
 X: 1, 2, 3, 4, 5
 Y: 6, 8, 11, 8, 12
11. Explain positive and negative correlation.

UNIT-II

1. From the following equations, calculate X and Y
 $20x - 9y = 107$; $4x - 5y = -33$
2. Given $X = 65$; $Y = 67$; $\sigma_x = 2.5$; $\sigma_y = 3.5$ and $r = 0.8$ obtain the value of x when $y = 70$
3. Give the properties of regression coefficients.
4. What are the uses of regression analysis?
5. Calculate the two regression equations of X on Y and Y on X from the data given below, taking deviations from actual means of X and Y

Price(Rs.)	:	10	12	13	12	16	15
Amount demanded	:	40	38	43	45	37	43

6. From the following data calculate

(i) Correlation Coefficient

(ii) Standard Deviation of Y (σ_y)

$$b_{xy}=0.85Y$$

$$b_{yx}=0.89X$$

$$\sigma_x=3$$

7. Given the following data, calculate the expected value of Y when X=12

	x	Y
Average	7.6	14.8
Standard deviation	3.6	2.5
r=0.99		

8. In a correlation analysis, between production and price of a commodity the following constants were obtained:

	Production Index	Price Index
Arithmetic mean	110	98
Standard deviation	12	5
r between production and price	-0.4	

Write down the regression equation of price on production and calculate the price index when the production index is 116

9. Given the following data, estimate the marks in Mathematics obtained by a student who has scored 60 marks in English

Mean of Marks in Mathematics 80

Mean of Marks in English 50

S.D of Marks in Mathematics 15

S.D of Marks in English 10

Coefficient of correlation 0.4

10. The following table gives the age of cars of certain make and annual maintenance costs.

Obtain the regression equation for costs related to age:

Age of cars in years : 2 4 6 8

Maintenance cost in Rs. hundreds : 10 20 25 30

UNIT-III

1. Explain the uses of index numbers
2. Explain the different types of index numbers.
3. Why Fisher's index number is called an ideal index number?
4. What are the problems involved in the construction of index numbers?
5. Differentiate between fixed base and chain base index.
6. Explain the steps involved in converting fixed base index to chain base index.
7. Explain the procedure of converting chain base index to fixed base index.
8. Differentiate between fixed base and chain base.
9. Compute a price index for the following data by average of price relatives method.

Commodity	A	B	C	D	E	F
Price in 2019 (In Rs.)	20	30	10	25	40	50
Price in 2020 (In Rs.)	25	30	15	35	45	55

10. Compute the chain base index numbers from the following data.

Year	1976	1977	1978	1979	1980
Price	20	16	28	35	21

11. From the chain base index numbers given below construct the fixed base index numbers

Year	:	1995	1996	1997	1998	1999
Chain Indices	:	90	105	102	95	99

12. Construct an index number by using simple aggregative method category

Category	Price (2014)	Price (2015)
A	5	7
B	4	6
C	8	9
D	11	21

UNIT-IV

1. Explain the various methods of measuring trend.
2. What is the importance of time series?
3. Explain the least square method of measuring trend.

4. Differentiate between seasonal, cyclical and random variations.
5. Calculate 3 yearly moving average for the following time series.
 Year : 1993 1994 1995 1996 1997 1998 1999
 Profit (Rs. '000) : 24 26 27 30 32 33 36
6. Calculate 5 yearly moving average from the following data.

Year	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000
Sales	40	35	45	45	50	49	45	52	50	55

UNIT-V

1. State the properties of Binomial distribution.
2. State the properties of Poisson distribution.
3. State the properties of Normal distribution.
4. List out the uses of normal distribution.
5. In a bag there are 5 white, 7 black and 8 red balls. Find the probability that the ball taken is (a) a white ball (b) a black ball (c) a red ball
6. What is the chance that a non-leap year selected at random, will contain 53 Sundays?
7. Eight coins are tossed at a time 256 times. Find the expected frequencies for the number of head.
8. A man has 6 friends. In how many ways can he invite one or more of them to a dinner?
9. Two cards are drawn from a pack of cards at random. What is the probability that it will be (a) a diamond and a heart (b) a king and a queen (c) two kings
10. A bag contains 7 red, 12 white and 4 green balls. What is the probability that:
 (a) 3 balls drawn are all white
 (b) 3 balls drawn are one of each colour?

Section D (10 Marks)

Answer in about 400 words

UNIT-I

1. Calculate Karl Pearson's coefficient of correlation from the following data

Wages	100	101	102	102	100	99	97	98	96	95
Cost of Living	98	99	99	97	95	92	95	94	90	91

2. Find the correlation coefficient between the marks obtained in HSS and B.A from the following data
 Marks in HSS (X): 50 45 60 75 40
 Marks in B.A (Y): 55 50 55 45 80

3. Calculate the coefficient of correlation between x and y from the following data
 X: 1 2 3 4 5 6 7
 Y: 2 4 5 3 8 6 7
4. Explain the different methods of measuring correlation.
5. Calculate the rank coefficient of correlation for the following data:
 X: 80 78 75 75 68 67 60 59
 Y: 12 13 14 14 14 16 15 17
6. What is a scatter diagram? Explain with diagram and also explain its uses
7. Calculate coefficient of correlation by concurrent deviation from the following data:
 X: 30 40 50 50 20 10 60 70 40
 Y: 90 70 80 100 100 60 75 85 95

Unit II

1. Differentiate between correlation and regression.
2. Determine the equation of a straight line which best fits the data
 X : 10 12 13 16 17 20 25
 Y : 10 22 24 27 29 33 37
3. From the following regression equations find the mean values of X and Y series. Given that the variance of X=9
 $8X-10Y=-66$
 $40X-18Y=214$
 Find the following:
 - a. Average values of X and Y
 - b. Correlation Coefficient between the two variable
 - c. Standard Deviation of Y
4. Obtain the lines of regression from the following data:
 X : 1 2 3 4 5 6 7 8 9
 Y : 9 8 10 12 11 13 14 16 15
 Obtain x when y=6.2
5. Calculate correlation coefficient and regression coefficient for the following data:
 X : 2 4 6 8 10 12 14
 Y : 4 2 5 10 4 11 12
6. Calculate the coefficient of correlation and obtain the lines of regression for the following data:
 X : 1 2 3 4 5 6 7
 Y : 9 8 10 12 11 13 14
 Obtain an estimate of Y which should correspond to the average X = 6.2

Unit III

1. What is Fisher's Ideal Index? Show that it satisfies both the time reversal and factor reversal tests.
2. Calculate current year price index by using Laspeyre's , Paasche's and Fisher's formula

	Base year		Current year	
Commodity	Price (Rs.)	Quantity	Price (Rs.)	Quantity
A	1	10	1.5	8
B	5	12	6	10
C	8	5	10	2

3. Explain the uses and limitations of index numbers.
4. Calculate Fisher's index using the data and check whether it satisfies the time reversal test.

Commodity	1998		1999	
	Price	Quantity	Price	Quantity
X	32	50	30	50
Y	30	35	25	40
Z	16	55	18	50

5. With the help of the following data prove that Fisher's Ideal Index satisfies both the time reversal test and factor reversal test.

Commodity	2006		2007	
	Price	Value	Price	Value
A	5	50	6	72
B	7	84	10	80
C	10	80	12	96
D	4	20	5	30
E	8	56	8	64

UNIT-IV

1. Explain the various components of time series.
2. What is trend? What are the methods used to measure it?
3. What are seasonal variations? Explain the various methods of measuring it.
4. Fit a straight-line trend by the method of least squares to the following data:
Year : 2000 2001 2002 2003 2004 2005 2006
Sales ('000 units) : 48 50 58 52 45 41 49
5. Find the trend values of the given time series using the method of least squares:
Year : 2012 2013 2014 2015 2016 2017 2018
Output : 60 72 75 65 80 85 95

UNIT-V

1. Two cards are drawn from a pack of cards at random. What is the probability that it will be
 - (a) A diamond and a heart
 - (b) A king and a queen
 - (c) Two kings
2. Tickets are numbered from 1 to 100. They are well shuffled and a ticket is drawn at random. What is the probability that the drawn ticket has:
 - (a) An even number
 - (b) A number 5 or a multiple of 5
 - (c) A number which is greater than 75
 - (d) A number which is a square
3. A ball is drawn at random from a box containing 6 red balls, 4 white balls and 5 blue balls. Determine the probability that it is:
 - (i) Red (ii) White (iii) Blue (iv) Not Red (v) Red or White
4. A coin is tossed 5 times. Obtain
 - (a) The various probabilities
 - (b) The probability of getting 2 or more heads
 - (c) Draw the probability distribution
5. Two dice are thrown. Find the probability that
 - (a) The total on the numbers on the dice is 8
 - (b) The first die shows 6
 - (c) The total of the numbers on the dice is greater than 8
 - (d) The total of the numbers on the dice is 13
 - (e) Both the dice show the same number

SEMESTER- II			
Skill Based Enhancements Course - II Professional English for Economics - II			
Course Code: 21UECA22	Hours / week :2	Hrs / Semester: 30	Credits :2

Objectives:

- Enable them to understand the topics and vocabulary
- Develop their competence in the use of English with particular reference to the workplace situation.
- Enhance the creativity of the students, which will enable them to think of innovative ways to solve issues in the workplace.
- Develop their competence and competitiveness and thereby improve their employability skills.
- Help students with a research bent of mind develop their skills in writing reports and research proposals.
- To participate in uncritical conversations and prepare organised and deliver the work to the public

Course Outcomes

CO No.	Upon completion of discourse, students will be able to	PSO's addressed	CL
CO - 1	understanding and applying new ideas in order to to acquire employability/ self-employment	4,7	Un
CO - 2	develop positive self-esteem and thereby communicate effectively	4,6	Ev
CO - 3	use polite expressions in appropriate ways	1	An
CO - 4	knowledge and understanding of essential Economics vocabulary	5,7	Un
CO - 5	ability to understand short passages in written economics on everyday topics	3,6	An
CO - 6	ability to write about famous Economists	4,5	Un
CO - 7	improvement of the writing skills in Economics	4,7	Un
CO - 8	ability to expose technical, analytical and creative skills in Economics	4,7	Un

SEMESTER- II			
Skill Based Enhancements Course - II Professional English For Economics - II			
Course Code: 21UECA22	Hours / week :2	Hrs / Semester: 30	Credits :2

UNIT- I: Listening

6 Hrs

Listening: Listening comprehension and answering questions-(Economic events -Census of India, latest Union budget, Five year plans, Centre and State Financial Relations in India, Banking- Insurance- Health Infrastructure- Educational Infrastructure- IT sector

UNIT –II: Reading

6 Hrs

Reading: comprehension passages (Reading passages on Composition and direction of foreign trade- Importance of foreign trade and economic development- Balance of payments

UNIT- III: Speaking

5 Hrs

Speaking: Small group discussions (Importance of Industries, Large Scale Industries and Small scale, MSME and Cottage industries)

UNIT – IV: Writing

5 Hrs

Writing: Writing Recommendations (Using internet as a Resource, Benefits of Digital Marketing, Challenges of Cashless Economy, Retail Vs wholesale, Online shopping Vs Traditional shopping.

UNIT –V: Vocabulary

8 Hrs

Vocabulary: (Average revenue, Bank rate, Barter exchange, Base year, Bonds. Budget surplus, Comparative advantage, Returns to scale, Collusion, Cartel, Depreciation, Devaluation, Monetary Policy. REPO rate., CRR, SLR, Bank rate, Fiscal policy, Fiscal Deficit ,Balance of payments(BOP), balance of trade(BOT), Carbon tax, Depression, FDI, Free Trade Agreement, GDP, GNP, NDP, NNP, SEZ, Labour, Land, Personal income, Private income, Profit ,Value added, Wage, Wholesale Price I(WPI) Index, Equity, Externality, Laffer curve, Marginal cost. Marginal revenue, Marginal product, Marginal tax rate, Microeconomics, Macroeconomics, Producer surplus, Pigouvian tax, Supply Side Economics, Sunk cost

Textbook: Ruddar Dutt, Ashwani Mahajan & K.P.M. Sundharam, *Indian Economy*, New Delhi, Sultan Chand, 71st Edition, 2015.

Books for reference:

1. *Communicative English (For Students of Arts and Science colleges) semester I*. Chennai: Tamil Nadu State Council for higher education (Transche), First Edition, 2020
2. *Professional English for arts and Social Sciences-I*. Chennai: Tamil Nadu State Council for higher Education, First Edition, 2020
3. Pazhani, *Microeconomics*, Nagercoil, J.P. Publishers, First Edition, 2019.

7. M .L Seth, *Principles of Economics*, Agra, UP, Lakshmi Narain Agarwal Publication, 4th Edition, 1997.

ST.MARY'S COLLEGE (Autonomous) – THOOTHUKUDI

B.A. Economics

SEC-Professional English for Economics II Sub. Code : 21UECPE2

Semester I November 2021

(for those who joined in July 2021 and after)

Section A

Unit 1

1.Union budget introduced which of the following to develop infrastructure

a) **PM GATISKATI** b) Kisan Drones c) dumping d) Technopark

2. -----was the duration of 11th Five year plan

a) **2007-2012** b) 2012-2017 c) 2002-2007 d) 1997-2002

3. 2011 census covered how many states

a) **35** b) 45 c) 55 d) 40

4. Which state has the largest rural population?

a) Punjab b) Goa c) Uttarpradesh d) Madya Pradesh

5.-----are considered the two most important factors for country's economic growth and overall stability.

a).**Finance and Management of risk** b)Civil war and political instability c) exchange rate fluctuations and internal price instability d)social unrest and political impact

6.The first bank established exclusively by Indians is-----

a. **Allahabad Bank** b South Indian Bank c. State Bank of India d bank of Madras

7. The first bank in India was set up in 1786 was-----

a. bank of Hindustan b. Bank of Bombay c. Bank of Madras d. Bank of Cochin

8. liberalisation was carried out in which face of the banking sector transformation

a. immature phase b. premature phase c. mature phase **d. innovation phase**

9. which insurance Amendment Act Changed the percentage of ownership from 29 % to 49%

a. **Insurance Amendment Act 2015** b. insurance Amendment Act 2017 c. insurance Amendment Act 2018.d. insurance Amendment Act 2019

10. In India the banking sector and Insurance sector is perfectly regulated by

a. **RBI and IRDA** b. RBI and SBI c. RDA and NABARD d. Government

Unit 2

1. Composition of foreign trade means-----

a)Exporting and importing B) Foreign investment C) Domestic transactions D) Trade among states

2. Composition of imports means-----

a)**goods that we are buying from other countries.** B) goods that we are selling to other countries. C) Buying and selling n a foreign country d) Buying and selling in a domestic economy

3. Prior to Independence which country hold the first position in our foreign trade ?

a)UK b) France c) Germany d) Canada

4. Which of the following is not an importance of foreign trade

a) Foreign Exchange Earning b) Increase in Investment c) Foreign Investment **d) increased unemployment**

5. Which of the following is an importance of foreign trade

a) Foreign Exchange Earning b) Increase in Investment c) Foreign Investment d) All of these

6. The difference in value between imports and exports is referred to as-----

a) **balance of trade** b) balance of profit c) surplus fund d) Deficit fund

7. In a country if imports exceed exports the country is said to have ----- .

a) **adverse balance of trade** b) favourable balance of trade. C) Balanced trade d) Surplus trade

8. In a country if exports exceed imports the country is said to have ----- .

a) adverse balance of trade b) **favourable balance of trade** C) Balanced trade d) Surplus trade

9. Balance of Payments is an accounting statement that records monetary transactions between _____.

a)**Residents of a nation and the rest of the world** b)Non-residents and the rest of the world c)Residents of a nation and non-residents d)None of the above

10. The components of a Balance of Payment account are _____.

a)Capital Account b)Current Account c)**Both a and b** d)None of the above

Unit 3

1. In major countries like _____ and -----cottage industries play a very important role in national economy.

a) **Japan and Switzerland** b) UK and USA c) USA and Japan d) UAE and Saudi Arabia

2. In small scale industries it is not the craftsmanship or the manual power which counts, but it is ----- which gets preference.

a) **machine and technical knowhow** b) Foreign trade c) Foreign labour d) Foreign trade

3. Among the following which one is a kind of industry which is set up by few individuals with their own capital?

a) **Private Sector Industries** b) Small Scale Industries c) Large Scale Industries d) Cottage Industries

4. Which industries are the nerve centre of a nation?

a) Private Sector Industries b) Small Scale Industries c) **Large Scale Industries** d) Cottage Industries

5. The profit or loss in running which type of industries is borne by the society as a whole.

a) **Public Sector Industries** b) Small Scale Industries c) Large Scale Industries d) Cottage Industries

6. -----is a type of industry in which capital and control is neither exclusively in the hands of the state nor that of the private individuals, but in it, both the state and the private individuals combine together

a) **Joint Sector Industry** b) Small Scale Industries c) Large Scale Industries d) Cottage Industries

7. ----- are referred to as those industries that are having huge infrastructure, raw material, high manpower requirements and large capital requirements

a) Joint Sector Industry b) Small Scale Industries c) **Large Scale Industries** d) Cottage Industries

8. Among the following which one is not a large scale industry?

a) Iron and Steel Industry b) Automobile Industry c) Textile Industry d) **Handloom Industry**

9. -----are enterprise, where the investment in Plant and Machinery or Equipment does not exceed one crore rupees and turnover does not exceed five crore rupees.

a) **a micro enterprise** b) a small enterprise c) a medium enterprise d) Public sector enterprise

10. ----- is a form of unorganised industry in which people are engaged in craftsmanship works such as handicraft, pottery, knitting, handloom, etc.

a) **Cottage Industry** b) Joint Sector Industry c) Small Scale Industries d) Private Sector Industries

Unit 4

1. -----is a worldwide spread computer network.

a) **Internet** b) e commerce c) trade through apps d) None of these

2. ----- is when any product is promoted through a minimum of one form of electronic media. This form of marketing is vastly different from traditional marketing.

a) **Digital marketing** b) Whole sale marketing c) Retail marketing d) marketing through advertisement.

3. Which one of the following is not a challenge of cashless economy?

a) Poverty b) Lack of other payment options c) Difficulty to pay the Senior Citizen d) Education

4. Which one of the following is a challenge of cashless economy?

a) Poverty b) Lack of other payment options c) Difficulty to pay the Senior Citizen d) All of these.

5. -----is selling of goods in bulk to the retailers and businesses at cheaper rates.

a) **Wholesale selling** b) Retail selling c) e commerce d) digital marketing

6. ----- is a shopping process, wherein consumers purchase their desired products and brands by visiting a store. It can be any local stores nearby, or a big departmental store, like Big Bazaar, Spencer, and others.

a) **Traditional Shopping** b) Online Shopping c) Retail selling d) Whole sale selling

7. -----is a shopping process, whereby customers directly purchase their favorite brands from a seller in actual time without the interference of any middleman

a) Traditional Shopping b) **Online Shopping** c) Retail selling d) Whole sale selling

8. Which of the following is the correct depiction of Digital Marketing?

a.) E-mail Marketing b) Social Media Marketing c) Web Marketing d) **All of the above**

9. Which of the following is incorrect about digital marketing?

- a.) Digital marketing can only be done offline b) **Digital marketing cannot be done offline.**
- c) Digital marketing requires electronic devices for promoting goods and services. d) In general, digital marketing can be understood as online marketing, web marketing, and e-mail marketing.

10. What is the name of the process in which marketing is achieved by incorporating tools, techniques, electronic devices, technologies, or systems?

- a) Internet Marketing b) Direct Marketing c) **Electronic Marketing** d) Interactive Marketing

Unit 5

1. ----- refers to the amount of money earned per individual unit or user.

- a) **Average Revenue** b) Total Revenue c) Marginal Revenue d) Average cost

2. Which rate is the interest rate a nation's central bank charges other domestic banks to borrow funds.

- a) **Bank rate** b) Lending rate c) Repo rate d) Reverse Repo Rate

3. ----- is an act of trading goods or services between two or more parties without the use of money

- a) **Barter** b) Digital marketing c) Electronic marketing d) E commerce

3. Which of the following is a fixed income instrument.

- a) **Bond** b) Shares c) Equity d) Debentures

4. ----- is an economy's ability to produce a particular good or service at a lower opportunity cost than its trading partners.

- a) **Comparative Advantage** b) Absolute advantage c) Factor endowment d) Factor price equilisation

5. ----- refers to the proportionality of changes in output after the amounts of all inputs in production have been changed by the same factor.

a) **Returns to scale** b) collusion c) Economies of scale d) Dis economies of scale

6. Which of the following is a formal agreement among firms in an oligopolistic industry.

a) **Cartel** b) Collusion c) perfect competition d) Monopoly

7. Which of the following is a deliberate downward adjustment of a country's currency value

a) **Devaluation** b) Depreciation c) Inflation d) Stagflation

8. ----- Is the percentage of a bank's total deposits that it needs to maintain as liquid cash.

a) **Cash Reserve Ratio** b) Statutory Liquidity Ratio c) Bank rate d) Repo rate

9. ----- refers to the minimum reserve requirement that needs to be maintained by commercial banks in the nation.

a) Cash Reserve Ratio b) **Statutory Liquidity Ratio** c) Bank rate d) Repo rate

10. ----- is the value of a nation's finished domestic goods and services during a specific time period.

a) Gross domestic product (GDP) b) gross national product (GNP) c) Net domestic product d) Net national product

Section B

Unit 1

1. Write a short note on the census of India
2. Define density of population
3. Define Sex Ratio
4. What is economic planning?
5. What are all the primary six levels of education system in India?
6. Comment on this personality.
7. Define Non Performing Assets.

Unit 2

1. What is composition of trade
2. What you mean by composition of imports
3. Comment on the trends in export
4. Give some of the major items of our import
5. Give some of the major items of our export
6. Define balance of trade
7. What is favourable balance of trade?
8. What is adverse balance of trade?

Unit 3

1. Write a short note on micro enterprises
2. Define a small enterprise
3. Write a short note on medium enterprises
4. Write a short note on the importance of cottage industry
5. Mention about the some of the large scale industries in India
6. Mention any three advantages of large scale industries

Unit 4

1. Define internet
2. Define e-commerce
3. What is digital marketing?
4. Write a short note on the role of advertising in marketing
- 5 Write a short note on cashless economy

6. What is wholesale selling?
7. What is retail selling?
8. What is traditional shopping?
9. What is online shopping?

Unit 5

1. What is sunk cost?
2. Write a short note on supply side economics
3. Define Pigouvian tax
4. Define Producer surplus.
5. What is macroeconomics?
6. What is micro economics?
7. Define Laffer curve
8. What is wage?

Section C

Unit 1

1. Comment on the major Economic Events in India in your own words.
2. Give a brief note on the five year plans in India
3. Comment on the financial relation between centre and states.
4. Discuss about the insurance sector of India
5. Critically evaluate the banking sector and its challenges
6. Briefly explain the health infrastructure in India
7. Briefly explain the educational infrastructure in India

8. Describe the major developments and government initiatives in the Indian IT and TES sector.

Unit 2

Read the following passage and answer the following questions in about 50 words each.

DIRECTION OF FOREIGN TRADE:

Direction of foreign trade means the countries to which India exports its goods and the countries from which it imports. Thus direction consists of destination of our exports and sources of our imports. Prior to our Independence when we were under British rule, much of our trade was done with Britain. Therefore, UK used to hold the first position in our foreign trade. However, after Independence, new trade relationships were established. Now USA has emerged as our most important trading partner followed by Germany, Japan and UK, We are also making efforts to increase our exports to other countries also. Let us study in details, the direction of India's exports and imports. (a) Direction of India's Imports Direction of imports means the countries from which we import goods. Before Independence most of our imports were from Britain, After Independence, we are now importing goods from other countries such as USA, Germany, France, Japan etc. India's share in world exports was 1.85 percent in 1950 and it went on declining till 1980. However, it does not mean that India's total exports declined during this period. It only shows that the rate of growth of world exports was higher than India's rate of growth of exports during this period. After 1980 India's share in world exports has been increasing.

India's share in world imports have been declining since 1950 except for the year 1980 when it increased. Once again, it does not indicate that our total imports have declined. It only indicates that the growth rate of world imports was faster than the rate of growth of our imports.

(1) India's share in world trade had been declining till 1980. It only indicates that the growth of India's world trade was slower than the growth of world trade. Since 1980, India's share in world trade has been increasing.

(ii) India's share of imports has been higher than its share of exports in the world trade,

India's share in world trade is very small (only 0.61 percent). It indicates that there is a great scope for increasing our share in world trade

- a. What is direction of foreign trade?
 - b. What you mean by direction of imports?
 - c. Comment on India's exports after independence
 - d. Comment on India's share in world trade
2. How Foreign trade ensures price stability
 3. What is the role of specialization in foreign trade?
 4. How foreign trade removes monopolies?

Unit 3

Read the passage given below and answer the following questions

In every country, industries are given encouragement so that these flourish and national needs and necessities are met from within the country.

(1) Cottage Industries:

These are the industries in which not much capital or space is required. Usually a craftsman or few of them combine together work at their residence or with small accommodation which they manage to get on rent or have their own. The members of the family assist the craftsman in his work. Once the goods have been produced, the craftsman himself manages to sell them to his self- created customers.

In some advanced countries of the world, like Japan and Switzerland, cottage industries play a very important role in national economy. The greatest advantage of cottage industries is that manpower is not wasted and the people engage themselves in these industries usually in their spare time.

(2) Small Scale Industries:

'Small' scale industry is a comparative and relative term. But usually such an industry is an individual's adventure. A person with some capital starts the industry and employs people to

work under him. In small scale industries it is not the craftsmanship or the manual power which counts, but it is machine and technical knowhow which gets preference.

(3) Private Sector Industries:

Then comes private sector industry. It is a kind of industry which is set up by few individuals with their own capital. They manufacture such commodities, which according to them, will be readily accepted by the society and through which they will get maximum profit. In such an industry profit or loss is that of the individual or individuals who have set up the industry. Such an industry has considerable freedom in the personnel policy.

(4) Large Scale Industries:

Large scale industries are the nerve centre of a nation. These industries need large capital, machine and space. In it there is great respect for technical experts. There is clear division of labour and each one is required to confine oneself to a particular job allotted to him. Similarly whole industry works under a well organised system. The contacts between the management and the employees are impersonal rather than personal. Large scale industries are usually faced with problems of employer-employee relations.

(5) Public Sector Industry:

But today many states feel that private sector industries do not take social needs into consideration. It is also felt that these industries exploit their employees to the maximum. Accordingly in very many states of the world the states themselves have set up important industries. The money needed in setting up such industries is spent by the state. The profit or loss in running such industries is borne by the society as a whole.

(6) Joint Sector Industry:

It is a type of industry in which capital and control is neither exclusively in the hands of the state nor that of the private individuals, but in it, both the state and the private individuals combine together. In such an industry usually the share capital and investment of state is more than that of the private individuals thereby giving the former a weightage or an upper hand over the later.

These are some of the important types of industries in every society. But the greatest need for every new industry is that it should be given sufficient protection so that it is in a position to face

competition from the outside world. In case no protection is given, the result will be that it will not survive competition from more developed countries and be killed in its infancy.

- a) Define cottage industries?
 - b) What you mean by small scale industry?
 - c) What is the role of large scale industries for the development of a country?
 - d) Define joint industries
 - e) What is the difference between private sector and public sector industry?
2. As a student of Economics in your opinion what is the role of MSMEs in economic development?
 3. As a student of Economics in your opinion what is the role of Small Scale industries in economic development?

Unit 4

1. What are all the challenges of cashless economy..
2. In our society you might have come into contact with whole sale marketing and retail marketing. Compare and contrast between whole sale marketing and retail marketing.
3. Suppose you belong to a society which is people are doing online shopping. In your opinion what are all the advantages of online shopping.
4. Explain digital marketing and advantages of digital marketing.

Unit 5

1. Explain the national income terminologies such as GDP,GNP,NDP AND NNP.
2. Compare and contrast micro economics and macro economics
3. Explain different rates such as bank rate, cash reserve ratio and Statutory Liquidity ratio

Section D

Unit 1

1. The major components of census are given in the table below. Explain the census of India 2011 in your own words.

Administrative units
Population
Density of Population
Sex Ratio

2. Discuss about the latest union budget 2022.

3. Discuss about the economic planning in India

4. Explain the Health infrastructure and Education infrastructure in India.

Unit 2

1. The composition of imports are given in the table. Briefly explain the composition of imports?

Food and allied products
Fuel-Coal and POL
Fertilizers
Capital Goods
Paper boards manufactures and printers

2. With the help of following hits discuss about the composition of exports

- a) Agriculture and allied products
- b) Ores and minerals
- c) Manufactured goods
- d) Crude and petroleum products.

3 .With the help of following hits discuss about the importance of Foreign trade in Economic development

- a) Foreign exchange earning
- b) Market expansion
- c) Investment
- d) Employment
- e) Dissemination of knowledge
- f) Agricultural products and consumer goods

Unit 3

1. The role of industries are given in the table below. Explain the importance of industries in India

Number of Units
Employment Generation
Investment
Contribution to Exports
Mobilization of Capital and Entrepreneurial Skill

2 .Suppose you are in a village and cottage industry is the backbone of that village. Critically evaluate the role of cottage industry in development of village economy.

3. In your opinion what are all the advantages of large scale industries

Unit 4

2. Read the passage given below and answer the following questions.

Digital marketing is when any product is promoted through a minimum of one form of Electronic media. This form of marketing is vastly different from traditional marketing. Digital Marketing consists of various methods and channels that allow any organization or company to have and study this form of marketing to find out what works for them and what does not.

The core of this sort of marketing is the internet. The internet, as it is, is a potent tool to help us achieve a lot. It helps in marketing as well as it assists sellers in promoting their products across the across. Advertisements on various forms of social media and other sites, emails, and YouTube can be used by organizations to sell their products

Advantages of Digital Marketing.

- With the help of Digital Marketing, you can easily cover a large number of potential customers. Above all, the digital nature of marketing will enable you to target more at the same time. The advertising is always direct. Therefore, it helps to build a huge awareness among people about a brand or service.· Digital Marketing helps the business owners to target a specific group of customers. In fact, with the help of targeted email, they can address people with different taste and preference.

- Digital Marketing gives the companies an opportunity to expand their advertisement campaign beyond their geographical boundaries. In fact, companies could reach different countries without actually putting a step into that land.

- Digital Marketing also gives the edge to the customers to directly contact the company without any hassle. Above all, now the customers could instantly contact the manufacturer with the help of internet services. This has been establishing a good bond of trust among the customer and the company.

- You can shop online. Gone are the days when the customers had to visit a store to buy the product. Presently, with the help of online retailer store, it is easy to grab the product just at

one tap. Therefore, the companies are able to expand their businesses through online retailers as well. Ultimately, you are getting a 24 x 7 working business model to work.

- a) Why is digital marketing?
- b) What is the role of internet in digital marketing?
- c) How digital marketing helping the customer?
- d) How digital marketing helping the companies?
- e) Give an account of the role of advertising in digital marketing?

2. As an economics student compare and contrast traditional shopping versus online shopping?

Unit 5

1. Some terminologies are give below. Briefly explain these terminologies

Personal Income
Private Income
Profit
Value added

2 Some terminologies are given below. Briefly explain these terminologies

Whole sale price index
Foreign direct investment
Foreign trade agreement
Depression
Carbon tax

SEMESTER- III			
Core – V		MACRO ECONOMICS – I	
Course Code: 21UECC31	Hours / week :6	Hours / Sem.: 90	Credits :6

Objectives:

- To develop the understanding of basic Macro concepts
- To promote critical thinking skills and to analyse impacts of policy actions and to evaluate the advantages and disadvantages of different policies.

Course Outcomes:

CO No.	Upon completion of this course, students will be able to	PSO's Addressed	CL
CO - 1	Understand the concepts of Macro Economics and its interrelations with Microeconomics	2, 4	Un
CO - 2	Compares calculation methods of national income	4,6	Ap
CO - 3	Describe the relationships among GDP, net domestic product, national income, personal income and disposable income	2,4	Ev
CO - 4	Categorizes unemployment by types	4,7	Un
CO - 5	Identify the strengths and weaknesses of the Keynesian and classical model.	2, 3, 5,6	Cr
CO - 6	Construct and graph the consumption function	4	Un
CO – 7	Explain what would cause the consumption function to grow steeper or flatter or to shift up or down	4,5	An

SEMESTER- III			
Core – V		MACRO ECONOMICS – I	
Course Code: 21UECC31	Hours / week :6	Hours / Sem.: 90	Credits :6

UNIT-I: Nature and Scope of Macro Economics **20 Hrs**

Macro Economics – Meaning - Definition - Importance and limitations – National Income – Concepts – Methods of measuring national income – Difficulties- Importance of National Income Analysis – National Income Accounting – Circular flow of Income in two, three and four sector Models.

UNIT-II: Classical Theory of Employment **20 Hrs**

Classical Theory of Employment – Say’s Law of Market – Fisher’s Quantity theory- John Maynard Keynes’ criticism of classical theory

UNIT-III: Keynesian Theory of Employment **15 Hrs**

Keynesian theory of Employment and Output – Aggregate Demand & Aggregate Supply –Effective Demand - comparison and contrast between Classical and Keynesian contributions

UNIT-IV: Consumption Function **15 Hrs**

Consumption Function – Meaning – Definition - Attributes – Keynesian Consumption Function – Factors stimulating and influencing Consumption function.

UNIT-V: Inflation and Unemployment **15 Hrs**

Inflation – Meaning –Types-Causes -Measures to control Inflation –Deflation and Stagflation – Meaning – Unemployment: Meaning –Types- Employment guarantee programmes.

Text Book:

5. R.Cauvery, Dr.U.K.Sudha Nayak, Dr.M. Girija & Dr. R. Meenakshi. *Macro Economics*. New Delhi: S.Chand& Company Ltd. 3rd edition 2002.

ST. MARY'S COLLEGE (Autonomous) THOOTHUKUDI

II B. A. Economics

Core I – Macro Economics Sub Code: 21UECC31

Semester III Nov 2022

(For those who joined in July 2021 onwards)

QUESTION BANK

SECTION -A (1 Mark)

Choose the correct answer

UNIT -I

1. Which of the following is NOT a topic studied in Macroeconomics?
(a) gross domestic product (c) **the price of IBM computers**
(b) the unemployment rate (d) the inflation rate
2. Which of the following is a topic studied in Macroeconomics?
(a) **gross domestic product** (b) the wage of auto workers
(c) the price of IBM computers (d) the amount of pizza produced
3. Macro Economics is also called as
(a) **Income theory** b) Price theory c) Partial equilibrium analysis d) None.
4. The word 'Macro' was coined by
(a) Keynes (b) Marshall (c) Adam Smith (d) **Ragnar Frisch.**
5. The word 'Macro' was derived from a _____ word 'Makros'
(a) **Greek** (b) Latin (c) English (d) Tamil.
6. Who is considered as the father of modern macroeconomics?
(a) Ragner Frisch (b) Adam smith (c) **J M Keynes** (d) Milton Friedman
7. Disposable income =
(a) **Personal income – Direct Taxes** (c) PI-Indirect Taxes
(b) GNP- Depreciation (d) None.
8. Product method is also called as
(a) Output method (b) Census method (c) Inventory method (d) **All the above**
9. What are the methods used to compute national income.
(a) Product method (b) Income method (c) Expenditure method (d) **All the above**
10. When we deduct direct taxes from personal income we get
(a) **Disposable income** b) Per capita income c) National Income d) None.

UNIT-II

11. Supply creates its own demand. Who gave this law?
(a) **J.B. Say** (b) J.S Mill (c) Keynes (d) Ricardo
12. Who is the author of the book "General Theory of Employment, Interest and money"?
(a) A.C. Pigou (b) Malthus (c) **J.M. Keynes** (d) Marshall

13. Which of the following is true for classical theory of employment?
 - (a) State of full employment in the economy
 - (b) No possibility of over production or under production in the economy
 - (c) **Both (a) & (b)**
 - (d) Nothing is true
14. Which is the determining factor for investment?
 - (a) Marginal efficiency of capital
 - (b) Interest rate
 - (c) **Both (a) & (b)**
 - (d) Can't be determined
15. The relation between consumption & savings are
 - (a) **Inverse**
 - (b) Direct
 - (c) Both inverse and direct
 - (d) Neither inverse nor direct
16. According to Classical economists, there is _____ in the economy.
 - (a) **Full employment**
 - (b) under employment
 - (c) less than full employment
 - (d) over employment
17. According to Classical Economists savings-investment equality is brought about by
 - (a) change in income
 - (b) **change in rate of interest**
 - (c) change in money supply
 - (d) change in demand
18. The relation between value of money and price level is _____
 - (a) **Inverse**
 - (b) direct
 - (c) neutral
 - (d) can't be determined
19. The value of money means _____ for money.
 - (a) Demand
 - (b) supply
 - (c) interest rate
 - (d) **purchasing power**
20. Fisher's Quantity Theory of money states that the _____ is the main determinant of the price level or the value of money.
 - (a) Demand for goods
 - (b) supply of goods
 - (c) Interest rate
 - (d) **quantity of money**

Unit-III

21. On which factor Keynesian theory of employment depends?
 - (a) **Effective demand**
 - (b) Income
 - (c) Production efficiency
 - (d) Price
22. Which is the determining factor for investment?
 - (a) MEC
 - (b) Interest rate
 - (c) **Both (a) & (b)**
 - (d) Population
23. According to Keynes, investment implies _____
 - (a) Financial Investment
 - (b) Real Investment
 - (c) **Both (a) & (b)**
 - (d) Stagnant Population
24. Which of the following is a real investment?
 - (a) Purchasing of share
 - (b) **Construction of buildings**
 - (c) Opening deposit account in the bank
 - (d) Purchase of old factory
25. The main component of aggregate demand is _____
 - (a) Individual consumption
 - (b) Public consumption
 - (c) Investment
 - (d) **All of these**

26. Which of the following is the determining factor of equilibrium income in Keynesian view point?
 (a) Aggregate demand (b) Aggregate supply (c) **Both (a) & (b)** (d) Population
27. In Keynesian view point, the equilibrium level of income and employment in the economy will be established when _____
 (a) $AD > AS$ (b) $AS < AD$ (c) **$AD = AS$** (d) Can't be determined
28. According to saving – investment view point, income employment equilibrium will be determined at a point where _____
 (a) $S > I$ (b) $I > S$ (c) **$S = I$** (d) $S = 0$
29. Keynes Theory is associated with _____
 (a) Effective demand (b) Propensity to consume (c) Propensity to save (d) **All**
30. Which is the measure to correct excess demand?
 (a) Deficit financing (c) Increase in public expenditure
 (b) Reduction in taxes (d) **Increase in public debt**
31. According to Keynes, unemployment is due to lack of _____
 (a) Capital formation (b) public expenditure (c) sales (d) **Effective demand**

Unit-IV

32. An increase in marginal propensity to consume will
 (a) **Lead to the consumption function becoming steeper**
 (b) Shift the consumption function upwards.
 (c) Shift the consumption function downwards.
 (d) Shift the savings function upwards.
33. If the Keynesian consumption function is, $C = 10 + .8Y$, if income is Rs 1000/- what is total consumption.
 (a) Rs .8/- (b) Rs 800/- (c) **Rs 810/-** (d) Rs .81/-
34. An increase in consumption at any given level of income will lead to
 (a) **Higher aggregate demand** (c) A fall in taxation revenue
 (b) An increase in exports (d) A decrease in import spending.
35. The marginal propensity to consume is equal to
 (a) Total spending/Total consumption
 (b) Total consumption/ Total income
 (c) **Change in consumption/ Change in income**
 (d) Change in consumption/ Change in savings.
36. In the simple Keynesian model consumption is a function of
 (a) Rate of interest (b) **Level of income** (c) Price level (d) Saving
37. An increase in investment is caused by
 (a) **Lower interest rates**
 (b) Expectations of lower national income
 (c) A decrease in the marginal propensity to consume
 (d) An increase in withdrawals

38. An increase in interest rates
 (a) is likely to reduce savings
 (b) is likely to reduce external value of currency
 (c) Leads to a shift in the MEC schedule
(d) Leads to a movement along MEC schedule.
39. Which of the following are not characteristics of Keynesian consumption function?
 (a) The main influence on consumption in the short run is current disposable income
 (b) The marginal propensity to consume is less than one
 (c) The average propensity to consume decreases as income increases
(d) The average propensity to consume increases as income increases
40. An increase in investment is most likely to be caused by
(a) Lower interest rates (c) A decrease in the marginal propensity to consume
 (b) Expectations of lower national incomes (d) An increase in withdrawals
41. The average propensity to consume is measured by
(a) C/Y (b) $C=Y$ (c) Y/C (d) $C+Y$
42. With increase in investment, MEC _____
 (a) Rises (b) **falls** (c) remains constant (d) can't be determined
43. $APC + APS =$ _____
 (a) ∞ (b) 0 (c) 1 (d) **2**
44. $MPC = MPS =$ _____
 (a) -1 (b) 2 (c) **1** (d) 0
45. Which of the following is true?
 (a) $MPC + MPS = 0$ (b) $MPC + MPS < 1$ (c) **$MPC + MPS = 1$** (d) $MPC + MPS > 1$

UNIT-V

46. An increase in the overall price level is known as
 (a) deflation. (b) recession. (c) **inflation.** (d) stagflation
47. Inflation is a/an
 (a) decrease in the overall price level
 (b) decrease in the overall level of economic activity
(c) increase in the overall price level.
 (d) increase in the overall level of economic activity
48. Deflation occurs when
(a) the average price level declines
 (b) economic activity declines.
 (c) the economic growth rate declines.
 (d) the unemployment rate declines.
49. A period of very rapid increase in the overall price level is known as
 (a) stagnation. (b) **hyperinflation.** (c) stagflation. (d) depression.

50. Unemployment means that
- (a) **at the going wage rate, there are people who want to work but cannot find work**
 - (b) people are not willing to work at the going wage rate
 - (c) there are some people who will not work at the going wage rate
 - (d) there is excess demand in the labor market.
51. Which type of unemployment has the marginal productivity of the workers as zero?
- (a) **Disguised Unemployment**
 - (b) Involuntary unemployment
 - (c) Seasonal unemployment
 - (d) Structural Unemployment
52. If the labor force is 50 million and 48 million are employed then the unemployment rate is
- (a) 2%
 - (b) **4%**
 - (c) 5%
 - (d) 52%
53. What is the cause of inflation
- (a) If money supply increases
 - (b) If the production rate falls
 - (c) **If money supply increases and production falls**
 - (d) Both money supply and production decreases
54. Who will suffer most from inflation?
- (a) **Creditors**
 - (b) Government pensioners.
 - (c) debtors
 - (d) merchants
55. Which of the following case implies stagflation?
- (a) Rising budget deficit
 - (b) **Recession plus inflation**
 - (c) Increase in wages and unemployment
 - (d) galloping inflation

Section - B (2 Marks)

Answer in 50 words

UNIT -I

1. Define Macro Economics
2. Define National Income
3. Define GDP
4. Define GNP
5. Define NNP
6. Define PI
7. Define DI
8. Define PCI
9. What is Expenditure method?
10. What is Income method?

UNIT-II

11. List out any two assumptions of classical theory of employment.
12. State “Say’s Law of Market”
13. What is meant by “Supply creates its own demand” according to the classical theory?
14. What brings equality between savings and investments?

15. Recall perfect competition.
16. What is full employment?
17. What is meant by value of money?
18. State the equation of Fisher's quantity theory.
19. State any two assumptions of Fisher's Quantity theory.
20. Mention any two criticisms of the classical theory mentioned by J.M Keynes.

UNIT-III

21. What is meant by employment?
22. What do you mean by aggregate demand?
23. Recall aggregate supply.
24. Explain effective demand.
25. List out any two importance of effective demand.
26. Mention any two criticism of Keynes theory of effective demand.

UNIT -IV

27. What do you mean by consumption function?
28. What do you mean by consumption schedule?
29. Define autonomous consumption
30. Define induced consumption
31. Define the term Average Propensity to Consume
32. Define the term Marginal Propensity to Consume

UNIT -V

33. Define inflation
34. What is creeping inflation?
35. What is chronic inflation?
36. What is hyperinflation?
37. What is walking inflation?
38. What is running inflation?
39. What is galloping inflation?
40. Define Deflation
41. Define Stagflation
42. Define the term unemployment

SECTION - C (5 Marks)

Answer in 200 words

UNIT – I

1. Distinguish between micro and macro economics
2. Distinguish between GNP and NNP
3. Bring out the importance of national income
4. Bring out the limitations of national income
5. State the concepts used in national income
6. Write a note on Value added method
7. Mention the various methods of measuring national income
8. Mention the difficulties of national income
9. State briefly the importance of national income analysis
10. Write a note on National Income Accounting

UNIT -II

11. Discuss “Supply creates its own demand”
12. Explain the assumption of classical theory of employment.
13. Discuss J. M Keynes criticism of classical theory.
14. Explain the relationship between value of money and price level.
15. State and explain Fisher’s quantity theory of money.
16. List out all the assumption of Fisher’s quantity theory.

UNIT-III

17. Distinguish between aggregate demand and aggregate supply.
18. Discuss J. M Keynes effective demand.
19. Explain the determination of level of employment and income according to Keynes.
20. Mention the criticisms of theory of employment and output.

UNIT-IV

21. What are the attributes of consumption function?
22. State briefly the Keynesian Consumption Function
23. Bring out the factors stimulating and influencing consumption function.
24. Write a note on Average Propensity to Consume
25. Write a note on Marginal Propensity to Save
26. What are the objective factors influencing consumption function?
27. What are the subjective factors influencing consumption function?

UNIT-V

28. Distinguish between inflation and deflation
29. What are the types of inflation?
30. Bring out the causes of inflation
31. State briefly the measures to control inflation
32. Distinguish between deflation and stagflation
33. What are the types of deflation?
34. Bring out the causes of deflation
35. State briefly the measures to control deflation
36. Mention the various types of unemployment
37. Mention the various employment guarantee programmes.

SECTION - D (10 Marks)

Answer in 400 words

UNIT -I

1. Analyse the importance of national income
2. Describe the concepts used in national income
3. Examine the various methods of measuring national income
4. Analyse the importance of national income analysis
5. Write an essay about National Income Accounting
6. Examine the Circular flow of Income in two sector Models
7. Discuss elaborately the Circular flow of Income in three sector Models
8. Explain briefly about the Circular flow of Income in four sector Models.

UNIT- II

9. Explain the classical theory of employment
10. Critically examine the Fisher's quantity theory of money.
11. Examine J.M Keynes criticism of classical theory.

UNIT- III

12. Critically examine Keynesian theory of employment and output.
13. Compare and contrast between classical theory and Keynesian theory of employment and output.

UNIT -IV

14. Write an essay about the attributes of consumption function.
15. Analyse the Keynesian Consumption Function
16. Discuss elaborately the factors stimulating and influencing consumption function.

17. Describe the objective factors influencing consumption function.
18. Describe the subjective factors influencing consumption function.

UNIT-V

19. Discuss elaborately the various types of inflation.
20. Examine the causes of inflation
21. Analyse the various measures to control inflation
22. Discuss elaborately the various types of deflation.
23. Examine the causes of deflation
24. Analyse the various measures to control deflation
25. Discuss elaborately the various types of unemployment
26. Describe the various employment guarantee programmes

SEMESTER- III			
Allied -III		MATHEMATICAL METHODS- I	
Course Code: 21UECA31	Hours / week :4	Hrs / Sem.: 60	Credits :4

Objectives:

- To develop the technical skills of students and faculty, together engaging in research, teaching, and learning
- To get an advanced knowledge in diverse areas of mathematics
- To discover, mentor, and nurture mathematically inclined students, and provide them a supportive environment that fosters intellectual growth.

Course Outcome:

CO No.	Upon completion of this course, students will be able to	PSO's Addressed	CL
CO - 1	know and apply the skills of commercial arithmetic in business life.	2,4, 7	Un
CO - 2	apply the basic concepts of equations in economics.	5,6	Ap
CO - 3	acquire knowledge about the linkage between mathematical techniques and economics.	5, 6	Ap
CO - 4	use knowledge of content and mathematical procedures to solve problems and make connections between the different areas of mathematics.	5, 7	Un
CO - 5	Demonstrate the use of mathematical reasoning by justifying and generalizing patterns and Relationships	4,5	Un
CO - 6	Apply the Fundamental Theorem of Analytical Geometry	2,5,6	Ap
CO - 7	Explain and apply basic concepts of sets,	4	U

SEMESTER- III			
Allied - III MATHEMATICAL METHODS- I			
Course Code: 21UECA31	Hours / week :4	Hrs / Sem.: 60	Credits :4

UNIT-I: Set Theory **10 Hrs**

Meaning of Mathematical Methods in Economics-Importance - Functions and their Properties- Notations of Set - Types of set - Venn diagram - Laws of Set - Operations in Set - Application in Economics.

UNIT-II: Straight Line **15 Hrs**

Slope – Intercept - Equations of Straight Line - Parallel Lines - Perpendicular lines - Point of intersection of two lines - Application of straight lines in Economics: Supply line - Demand line - Determinants of equilibrium price and quantity and elasticity of demand

UNIT-III: Differentiation **15 Hrs**

Process and Rules of Differentiation - Differentiation in polynomials x^n , $(ax+b)^2$; $\log x$, e^x , differential coefficient of sum, difference, product, quotient and power - Successive differentiation - Partial derivative - Given $U=f(x,y)$ and $U=f(x,y,z)$ - Higher order partial derivatives – Maxima and Minima with single variable.

UNIT-IV: Application of Differentiation in Economics **10 Hrs**

Marginal utility, cost and revenue curve applications - Marginal Revenue (MR) and Marginal Cost (MC) –Point of Inflection - Revenue maximization and Cost minimization.

UNIT-V: Integral Calculus and its Applications in Economics **10 Hrs**

Rules of Integration – Definite& Indefinite integrals – Application in Economics – Total Revenue and Cost Concepts, Consumer's surplus and Producer's surplus.

Semester III November 2022

(for those who joined in July 2021 and after)

UNIT 1

Section A

1. _____ is an ordered collection of objects.
a) Function b) Relation c) Set d) Proposition
2. The set O of odd positive integers less than 10 can be expressed by _____
a) {1, 3, 5, 7, 9} b) {1, 5, 7, 9, 11} c) {1, 2, 3} d) {1, 2, 5, 9}
3. Power set of empty set has exactly _____ subset.
a) One b) Three c) Two d) Zero
4. The set of positive integers is _____
a) Finite b) Empty c) Infinite d) Subset
5. Which of the following sets are null sets?
a) {0} b) { } c) Both (b) & (c) d) \emptyset
6. Number of subsets of a set of order three is
a) 9 b) 6 c) 8 d) 3
7. The number of elements in the power set of the set { {a, b}, c } is
a) 4 b) 8 c) 3 d) 7
8. Which of the following two sets are equal?
a) $A = \{1, 2\}$ and $B = \{1, 2, 3\}$ b) $A = \{1, 2, 3\}$ and $B = \{2, 1, 3\}$ c) $A = \{1, 2, 4\}$ and $B = \{1, 2, 3\}$ d) $A = \{1, 2\}$ and $B = \{1\}$
9. If x is a set and the set contains an integer which is neither positive nor negative then the set x is _____.
a) Set is non-empty b) Set is finite c) Set is non-empty and finite d) Set is empty
10. Empty set is a _____.
a) Infinite set b) Unknown set c) Universal set d) Finite set

Section B

1. Define Set.
2. Define Elements of a set.
3. What is Venn diagram?
4. Let A be the set of positive integers, B be the set of positive real numbers, C be the set of odd integers. Find $A \cap B$, $B \cap C$ and $B \cup C$.
5. Represent the set of even numbers between 1 and 30 not divisible by 6 in Tabular form
6. Represent the set of vowels in the word "Mathematics".
7. Define Finite Sets
8. Write a short note on Subsets
9. Define Null Set
10. Write a short note on Universal Set

Section C

1. List out the functions and properties of mathematical methods
2. Discuss the importance of Mathematical Methods in economics?
3. Explain the different methods of denoting a set?
4. Rewrite the set using Tabular form and Set Builder form.
5. A is a set of numbers 2, 4, 6, 8, 10 and 12.
6. Given a set $S = \{7, 8, 9\}$, how many ordered pairs can be manufactured from S
7. If $A = \{1, 2, 3\}$ and $B = \{4, 5\}$ find i) $A \times B$ ii) $B \times A$
8. State in words and then write in tabular form:
 $A = \{x/x^2 = 4\}$ $B = \{x/x - 2 = 5\}$ $C = \{x/x \text{ is a positive, } x \text{ is negative}\}$
9. If we have two sets $A = \{3, 4, 5, 6, 7\}$ and $B = \{7, 8, 9\}$ How many ordered pairs exist?
10. Find $A \times B$ and $B \times A$ Where $A = \{1, 3, 4, 5\}$ $B = \{a, b, c, d\}$.

Section D

1. Explain the different types of sets?
2. If $A = \{1, 2, 3, 4\}$ and $B = \{1, 3, 4, 5, 6\}$ then find out $A \cap B$, $A \cup B$ and $A - B$.
3. If $A = \{1, 2, 3\}$ and $B = \{a, b, c\}$. Find a) $A \times B$. b) $B \times A$ c) $A \cup B$.
4. If $A = \{1, 2, 3\}$, $B = \{1, 3, 4, 5\}$ and $C = \{2, 4, 5, 6\}$, verify the identity
a) $(A \cup B) \cup C = A \cup (B \cup C)$ b) $(A \cap B) \cap C = A \cap (B \cap C)$
c) $A \cap (B \cup C) = (A \cap B) \cup (A \cap C)$ d) $A \cup (B \cap C) = (A \cup B) \cap (A \cup C)$
5. Let $A = \{a, b, c, d, e, f\}$ $B = \{c, d, e\}$ and $C = \{a, e\}$. Let U be the Universal set of all English Alphabetical, verify
a) $(A \cup B)' = (A' \cap B')$ b) $(A \cap B)' = A' \cup B'$ c) $(B \cup C)' = (B' \cap C')$
d) $A - (B \cup C) = (A - B) \cap (A - C)$
6. Let $A = \{1, 2, 3, 4\}$, $B = \{2, 4, 6, 8\}$ and $C = \{3, 4, 5, 6\}$ Verify that
a) $(A \cup B) = (B \cup A)$ b) $(A \cap B) = (B \cap A)$ c) $(A \cup B) \cup C = A \cup (B \cup C)$
d) $(A \cap B) \cap C = A \cap (B \cap C)$
7. Let $U = \{1, 2, 3, 4, \dots, 8, 9\}$, $A = \{1, 2, 3, 4\}$ $B = \{2, 4, 6, 8\}$, and $C = \{3, 4, 5, 6\}$ Find
a) A' b) B' c) $(A \cup B)'$ d) $(A \cap B)'$ e) $(A')'$
8. Let $U = \{a, b, c, d, e\}$, $A = \{a, b, d\}$ and $B = \{b, d, e\}$. Find
a) $(A \cup B)$ b) $(A \cap B)$ c) $B' - A'$ d) $(A \cap B)'$ e) $A - B$

9. Let $A=\{1,2,3,4\}$ $B=\{2,4,6,8\}$ $C=\{3,4,5,6\}$ Find
 a) $(A \cup B)$ b) $(B \cap C)$ c) $(A \cup C)$ d) $(B \cup C)$ e) $(A \cup B) \cup C$ f) $A \cup (B \cup C)$
10. If $A=\{4,5,7,9,10\}$, $B=\{7,11,13,15\}$ and $C=\{4,7,11,17,19\}$. Verify that,
 a) $A-(B \cup C)$ b) $(A-B) \cap (A-C)$ c) $A \cap (B \cup C)$
11. Let $A=\{a,b,c,d,e,f\}$ $B=\{a,b,d,h\}$ $C=\{b,c,e\}$ Find
 a) $(A \cup B)$ b) $(B \cap C)$ c) $(A \cup C)$ d) $(B \cup C)$ e) $(A \cup B) \cup C$ f) $A \cup (B \cup C)$

Unit 2

Section A

- In a linear function, the degree of the function is _____.
 a) zero b) three c) two d) one
- Joining any two points with a minimum distance is called a _____.
 a) Point b) straight line c) ordinate d) axis
- The perpendicular distance from the y-axis to the point is called _____.
 a) Radius vector b) Abscissa c) Ordinate d) Slope
- The perpendicular distance from the x-axis to be point is called _____.
 a) Slope b) Ordinate c) Abscissa d) Radius vector
- If the equation of the straight line is $y = 3x-4$, then the slope (m) is _____.
 a) 4 b) 3 c) $-3/4$ d) -4
- The y intercept (c) of the straight-line $y = 3x+5$ is _____.
 a) -5 b) -3 c) $5/3$ d) 5
- Two straight lines are perpendicular when the angle between them is _____.
 a) 60° b) 180° c) 30° d) 90°
- The equation $y = mx+c$ of a straight line is _____function
 a) quadratic b) linear c) non-linear d) cubic
- If in a given equation $c_1 = c_2$ and $m_1 = m_2$, then the lines are called _____lines
 a) Collinear b) Identical c) Perpendicular d) Parallel
- The formula used to find the slope of a straight line is _____.
 a) $m=(x_2 - y_2)$ b) $y = mc + x$ c) $y = mx + c$ d) $(y_2 - x_2)$

Section B

- What is meant by abscissa?
- Define co-ordinate of a point?
- What do you mean by radius vector?
- Explain the term “gradient”.
- Define collinear points
- What do you mean by perpendicular lines?
- What is meant by identical lines?
- Define break-even point
- What is meant by parallel lines?
- Write down the equation of a straight line in two intercept form.

Section C

1. What are the types of straight lines
2. Explain the relationship between the equations of two parallel lines
3. Illustrate the application of straight lines in Economics
4. What is the equation of a line having equal intercepts on the axes?
5. What are the different forms of a straight line
6. What is the equation of the straight line which makes intercept $a, 3a$ on the coordinate axis and passed through the point $(3, -4)$
7. A manufacturer can sell "x" item per month at a price $p = 400 + 2x$ rupees. Producing 'X' items costs the manufacturer y rupees where $y = 1000 - 2x$. Find equilibrium price and output.
8. It costs a firm Rs.6500 to process 300 orders and Rs.10,000 to process 500 orders. Find the cost of processing 100 orders.
9. Find the equation of a straight line which passes through $(3, 4)$ and whose slope is 6.
10. If the straight lines $6x - 7y = 13$ and $7x + 6y = 1$ and having slope 6.

Section D

1. Find the equation of the line which passes through $(1, 4)$ and which is perpendicular to the line joining $(2, 3)$ and $(4, 7)$. Also find the x and y intercepts
2. Find the x and y intercepts made by the line $3x + 5y - 8 = 0$
3. Suppose the cost in dollar of producing x transistor pocket radio is approximated by the linear function $C(x) = 14x + 120$. A) Find the cost of producing 10 radios. B) What is the variable cost per radio? C) What is the cost of producing the 12th radio & 15th radio.
4. Find the point of intersection of the lines $x + 3y + 2 = 0$ and $2x - 3y - 3 = 0$ and hence find the equation of the line passing through the point $(3, 5)$ and the point of intersection of the two lines.
5. Find the equilibrium price if $Q_d = 160 - 10p$ is the demand function and $Q_s = 10 + 4p$ is the supply function
6. Find the point of intersection of the straight line $2x - 4y + 5 = 0$ and $2x + y = 5$. Also draw the straight line in a graph and plot the point of intersection in a graph.
7. Find the point of intersection of the lines $2x - 4y + 5 = 0$ and $2x + y = 5$. Also find the distance between the point of intersection and $(2, 5)$
8. Find the equation of the straight line passing through the point $(3, 5)$ with slope $m = 8$.
9. Find the point of intersection of the straight line $2x + 3y - 5 = 0$ and the straight line joining the points $(1, 2)$ and $(-2, 4)$
10. Draw a graph for the line $y = 2x + 3$.

UNIT 3

Section A

1. The derivative is defined as -----
a) dy/dx b) $f(x)=Y$ c) $f(x,y)=Z.U$ d) None
2. ----- is the process of finding the rate at which a variable quantity is hanging.
a) Differentiation b) Integration c) Linear equation d) Set operation
3. The process of obtaining the derivative is called -----
a) Differentiation b) Integration c) Linear equation d) Set operation
4. If y be a continuous and single valued function of X . Then an increase in the value of x will produce a corresponding increase or decrease in the -----
a) value of y b) value of constant c) Value of a variable d) None
5. If $y=x^{10}$ Find dy/dx .
6. If $y=x^{-7}$ Find dy/dx
7. The derivative of a constant is-----
a) Zero b) One c) Two d) Three
8. The derivative of the product of a constant and a function is equal to the ----- of that constant and the derivative of that function
a) Sum b) Difference c) Product d) Division
9. If $y=mx+c$, where “ m ” and “ c ” are constants then dy/dx is -----
a) m b) c c) zero d) one
10. The derivative of a sum of two function is simply equal to the ----- of the separate derivatives
a) Sum b) Difference c) Product d) Division

Section B

1. Define Differentiation
2. What do you mean by partial derivatives
3. What is meant by total differentiation
4. What are the two conditions that the given function $y=f(x)$ to be minimum
5. State the two conditions for a function $y=f(x)$ to be maximum.
6. For the following find dy/dx .
7. $Y=u(x) v(x)$
8. $Y= u(x)/v(x)$
9. If $z=x^3+y^3+2xy$, then find dy/dx
10. If $y=10x^{12}$ Find dy/dx
11. Write a short note on product rule
12. If $y=(x^2+5x+2)^5$, then find $\delta^2 z / \delta x^2 + \delta^2 z / \delta y^2$

Section C

1. Explain the various rules of derivatives with examples.
2. List out the conditions for maxima and minima
3. What are the four possible partial derivatives?
4. Describe the application of partial derivatives in economics
5. Given the cost function $y=3x^3 + 2x^2 + 5x$, find the average cost function and marginal cost function. Also find the marginal cost at $x=2$.
6. Investigate the maxima and minima of the function $y=3x^4-10x^3+6x^2+5$
7. Find the maximum and minimum values for the function $y=2x^3$
8. Find partial derivatives of the function $u=x^2+2y^3$
9. Find the total differential of $z=(2x^2+3y^2)(x^2-y^2)$
10. Find dy/dx for the following

$$Y = \frac{1+x^2}{1-x^2}$$

Section D

1. Explain the uses of optimization technique in economics.
2. Find the maximum value for the function $y=4+6x-2x^2$
3. Explain the rules of differentiation
Find $\delta^2 z / \delta x^2, \delta^2 z / \delta y^2$ for $z = \frac{x^3+y^3}{x^2+y^2}$
4. A firm has the following total cost function and demand function
 - a. $C=1/3Q^3 - 7Q^2 + 111Q + 50, Q=100-P$.
5. Find the maximum profit of the firm.
 - a. Prove that $\delta^2 z / \delta x \delta y = \delta^2 z / \delta y \delta x$, If $z = \frac{x+4}{2x+5y}$
6. Find the maximum and minimum values for the function $y=2x^3+3x^2-36x+10$
7. Find the maximum and minimum values for the function $y=x^3-3x+1$.
8. Verify that $z=x^2+2xy+y^2$ is a homogenous function and verify the Euler's theorem.
9. If $z=3x^2+2xy+4y+3x+5y$, then prove that $\delta^2 z / \delta x \delta y = \delta^2 z / \delta y \delta x$
10. Find the maxima and minima for the function $Z=10x+20y-x^2-y^2$

Unit 4

Section A

1. ----- is the rate of change of total cost with change in quantity produced.
a) Marginal cost B) Marginal revenue c) Average cost d) Total fixed cost
2. ----- is the addition to the total utility caused by an increase of one unit in the rate of consumption or by an increase of one unit in the stock of good possessed.
a) Marginal utility b) Total utility c) Average utility d) Optimum utility
3. The amount of satisfaction derived the consumption or possession of a good:
a) Total utility b) Marginal utility c) Average utility d) Optimum utility
4. For maximisation of utilities or maximisation of satisfaction, the marginal utility divided by price must be----- for all commodities.
a) zero b) same c) one d) two
5. ----- explains the relationship between the costs incurred in production and the output of a commodity
a) Cost function b) Revenue function c) Consumer surplus d) Consumer equilibrium
6. ----- is the sum of expenditures incurred by a firm in producing a given level of output
a) Total cost b) Average cost c) Marginal cost d) None
7. If 'x' is the quantity produced by a firm at Total cost 'c', then the total cost function is--

a) $C=f(x)$ b) $R=f(y)$ c) $CY=f(cx)$ d) $c=f'(x)$
8. Which of the following is obtained by dividing the total cost (TC) by the quantity Produced.
a) Marginal cost b) Average cost c) Equilibrium d) Revenue
- 9 ----- do not vary with output in the short run but it may vary in the long run.
a) Fixed cost b) Average cost c) Marginal cost d) Variable cost
11. ----- Rise when output expands and fall when output contracts.
a) Fixed cost b) Average cost c) Marginal cost d) Variable cost

Section B

1. Define Marginal Utility
2. Define total utility
3. Write a short note on Average utility
4. Write a short note on Marginal cost function
5. Define cost function
6. Write a short note on average cost function
7. Define Marginal revenue function
8. Write a short note on Revenue

9. Define Average revenue
10. Write a short note on point of inflection

Section C

1. Explain Revenue functions and relationship between Revenue curves?
2. Explain the relationship between Average and Marginal cost curves?
3. Discuss the cost functions?
4. Discuss the Fixed costs and Variable cost
5. Describe the behavior and relationship of different costs in the short run
6. Find the marginal cost for the total cost function $C=3x^4-4x^3+2x^2-9x$
7. Compute Average cost and Marginal cost for the Total cost
 $C=8x^3+3x^2-6x+3$
8. Given the Revenue Function $R=80Q-2Q^2-15$, Find out the Average and Marginal Revenue function
9. Find R, AR and MR for the demand function $q=100-2p$, where q is quantity demanded and p is price
10. Given the demand curve $P=16-D^2$, Find the total revenue curve and marginal revenue curve when $D=1$.

Section D

1. Analyze the cost functions and cost curves
2. The total factory cost (y) of making x units of a product is given by $y=5x+300$ and 75 units are made find
3. Fixed cost ii) Variable cost iii) Total Cost iv) Variable cost per unit v) Average cost per unit
4. The Total Cost Function is $C=1/3Q^3+6Q^2+12Q$ Find AC and MC
5. Given the total cost function $C=50-2Q+7Q^2+Q^3$
6. Given the total cost function $C=1/3Q^3-3Q^2+9Q$, Find Q when Average Cost is minimum. Find also the Marginal Cost at the level of Q .
7. Let the demand function for a commodity be $P=10-2D$, where P is the price and D is the quantity demanded. Find AR and MR
8. Find AR and MR for the function $R=100x-x^2-x^3$
9. Find R, AR, MR for the Demand function $P=1/q^4+32$, where P is the price and q is the quantity demanded.

10. Given the Revenue Function $R=30+15q-17q^2$, calculate Marginal and Average Revenue Functions
11. Find AR and MR for the following function $X=2p-p^2$

UNIT 5

Section A

1. In calculus ,the reverse or inverse process of Differentiation is called;
 - a) Indefinite Integration b) Polynomial c) Cartesian product d) Matrix calculation
- 2.----- is to finding the function whose Derivative or Differential is given.
 - a) Integration b) Second order differentiation c) Successive differentiation d) Partial differentiation
3. If the marginal utility function is $2q$, then the Total Utility Function is -----
 - a) q^2 b) q c) q^3 d) q^4
4. If the Differential co-efficient of $F(x)$ with respect to x is $f(x)$, then an integral of $f(x)$ with respect to x is-----
 - a) $F(x)$ b) $F(x,y)$ c) $f(X)$ d) $f(x,y)$
5. If a function is multiplied by a constant, the integral of that function is also multiplied by that -----
 - a) Same constant b) Variable c) function d) First derivative
6. $\int \cos x \, dx$ is -----
 - a) $-\cos x$ b) $\sin x$ c) $\tan x$ d) $\cot x$
7. $\int \operatorname{cosec} x \cot x \, dx$ is -----
 - a) $-\operatorname{cosec} x$ b) $\sec x$ c) $\sin x$ d) $-\cot x$
- 8.----- is the integral of Marginal Cost.
 - a) Total Cost b) Total Revenue c) Average cost d) Fixed cost
9. The integral of Marginal Revenue is termed as;
 - a) Total Revenue b) Average Revenue c) Normal profit d) Total cost
10. The difference between the price that a consumer is willing to pay for a commodity rather than go without it and the actual price he pays for the commodity.
 - a) Consumer's surplus b) Producer's surplus c) Equilibrium price d) Inflation

Section B

1. What do you mean by integration?
2. Define definite integral
3. What is meant by indefinite integral?
4. Find $\int (x^2 + 3x + 2) dx$.
5. Find the value $\int_1^2 (3x^2 + 2x + 5) dx$.
6. Find the value of $\int_0^2 (6x^2 + 4x + 1) dx$.

7. Find $\int (3x^2 + 2x + 5)dx$.
8. Find $\int (x^3 - x + 1)dx$.
9. Write a short note on Integral of Sum or Difference
10. Write a short note on Integration by substitution

Section C

1. What are the rules of integration?
2. What are the properties of indefinite integrals?
3. What are the properties of definite integrals?
4. Write down the application of integration in Economics?
5. Evaluate $\int (1 + x + x^2)dx$.
6. If the marginal cost function is $f(q) = 2 + 3\sqrt{q} + 5/\sqrt{q}$ then find the cost function
7. Marginal propensity to consume function is given, $C = 0.5 - 0.01y$ where C is consumption and y is disposable income. Find the total consumption function.
8. Given the marginal cost function $f(x)$ find the total cost function when fixed cost is 100 and $f(x) = 2x^2 + 5x + 10$; x being output.
9. If $MR = 9 - x^2$, find the maximum total revenue. Also find the total and average revenue and demand.
10. Evaluate $\int 5^{7x} dx$

Section D

1. Demand and Supply function are $P_d = 16 - x^2$ and $P_s = 4 + x$. Find out consumer's surplus and producer's surplus.
2. Demand and Supply laws are $P_d = 36 - x^2$ and $P_s = 11 - 10x$. Determine consumer's surplus and producer's surplus.
3. Given the marginal cost function $f^1(x) = 2x + x + x^2$, find the total cost function.
 - i. Evaluate $\int_1^3 (4x^2 + x - 3) dx$.
4. State the properties of definite integrals.
 - i. Evaluate $\int_1^3 (1 + x - x^2) dx$.
5. Evaluate $\int x^5 (8x^6 + 7)^{15} dx$
6. Integrate $\int_1^2 (x^3 - 2x - 3) dx$.
7. Compute Total, Average and Average Variable Costs for Marginal cost function $C'' = 4 + 7x - 5x^2$, if the total fixed cost is 40.
8. The marginal cost function is $(1 + 2x + 6x^2)$, where x is the output. Find the total and average cost function, if the fixed cost is 70.
9. Compute Total Cost for the Marginal Cost function $C' = 2 + 6x - 4x^2$, if total fixed cost is 50.
10. Determine the total revenue and demand functions, if $MR = 3x - 2x^3$.

SYLLABUS
II B.A. ECONOMICS - SEMESTER-III
CORE SKILL BASED - TOURISM ECONOMICS-I **COURSE CODE: 21UECS31**

UNIT-I: Basic Concepts of Tourism:

Meaning- Definition - Concepts and Types of Tourism- Tourism and economic development-Importance of tourism-Sustainable Tourism.

UNIT-II: Tourism Product and Tourism Marketing

Tourism products: Attractions, Availability, Accessibility and Amenities – Tourism Marketing – Various types of tourism marketing in India - Impact of Information Technology in tourism development.

UNIT-III: Tourism Services

Hotels - Motels - Resorts - Boating Clubs - Conducted /Organized Tours – Package Tour - Insurance - Guides - Tour Operators - Tour Promoters - Medical Tourism and its importance.

UNIT-IV: Performance of Tourism

Tourism status in global and national-Socio, Economic, Cultural and Political Impacts of tourism development in India - Programmes in Tourism Development –Infrastructure Development Programme–Integrated Development of Tourism Circuits, Product infrastructure and Destination Development.

UNIT-V: Tourism Organizations:

Role and Functions: United Nations World Tourism Organizations (WTO), PacificAsia Travel Association (PATA), World Tourism and Travel Council (WTTC), International Hotel Association (IHA),Ministry of Tourism, Government of India, Indian Tourism Development Corporation (ITDC) and Federation of Hotel and Restaurants Association of India(FHRAI)

TextBook: Sunetra Roday, Archana Biwal & Vandana Joshi. *Tourism: Operations and Management*. USA: Oxford University Press. Illustrated edition 2009.

Books for Reference:

1. D. Leslie & J. Holland. *Tour Operators & Operations: Development, Management and Responsibility*. U.K: CAB International Publishers. 1st edition 2017.
2. Geetanjali. *Tourism Policy and Planning*. Jaipur: ABD Publishers. 1st edition 2010.
3. Manish Ratti. *Tourism Planning and Development*. New Delhi: Rajat Publications. 1st edition, 2008.
4. R. Shantha Kumar, . *Factson Tourism*. Chennai: Shantha Publishers. 1st edition 1996.

QUESTION BANK
II B.A. ECONOMICS - SEMESTER- III
CORE SKILL BASED – TOURISM ECONOMICS – I - 21UECS31

Multiple Choice Questions: (1 Mark)

Unit I- Basic Concepts of Tourism:

1. What percentage of the world's employment tourism supports?
a) 4% **b) 10%** c) 12% 15%
2. What is the maximum length of stay for someone to still be classified as a tourist?
a) Two months b) One month **c) One year** d) Two years
3. The word tourist first appeared in the _____ language in the year 1800.
a) English b) Latin c) French d) Arabic
4. The word tourist first appeared in the English language in the year _____.
a) 1700 b) 1750 **c) 1800** d) 1850
5. Which one of the following is the activities of people traveling to and staying in places outside their usual environment for leisure?
a) Tourism b) Ticket c) Visa d) Passport
6. Tourism in real sense is essentially a _____ activity.
a) Dim b) Horrible c) Gloomy **d) Pleasure**
7. Tourism is a _____ industry.
a) Static **b) Dynamic** c) Unchangeable d) Standing
8. The world famous of _____ in India are visited by tourists because of its architecture and painting.
a) Cubbon Park b) Arignar Anna Park c) Gateway of India **d) Ajanta and Ellora Caves**
9. Which one of the following is comes under the category of historical factor?
a) Natural park **b) TajMahal** c) Marine drive d) Beach Scenery
10. _____ place is well-known for their religious significance. a) Great wall of China
b) Egyptian Pyramid **c) Jerusalem in Israel** d) Grand Canyon National park

Unit II: Tourism Product & Tourism Marketing:

1. Which one of the following is not comes under the components of tourism?
a) Attraction **b) Ability** c) Amenities d) Accommodation

2. _____ accommodation refers to the services provided by the hotel.
 a) **Serviced** b) Supplementary c) Self catering d) Complementary
3. _____ is one of the components of tourism.
 a) **Attraction** b) Ability c) Enthusiasm d) Earning
4. Attraction places made by nature is called _____ attraction.
 a) Manmade **b) Natural** c) Unusual d) Artificial
5. Which one of the following is comes under the manmade attraction of tourism?
 a) Water resources b) Wild Life c) Climate **d) Swimming Pool**
6. “Marketing is a social and managerial process by which consumers obtain what they need....” Who said these words?
 a) Thomas Cook **b) Kotler** c) Mathieson d) Wall

4. A person's environment is made up of all that is, directly or indirectly associated with the _____ conditions. a) Consumption b) Production c) Saving **d) Living**
5. Formation of Airport Authority of India (AAI)
a) 1902 b) 1990 c) 1996 **d) 1995**
6. The Wright Brothers Invented the Aero Plane in.....
a) 1927 **b) 1903** c) 1873 d) 1829
7. Which of the following railway is not recognised by UNESCO World heritage Site?
a) Darjeeling Himalayan Railway b) Nilgiri Mountain Railway
c) Kalka-Shimla Railway **d) North-Eastern Railway**
8. The Ministry of Tourism has allocated a budget of INR 2189.22 crore for _____.
a) 2019-20 b) 2018-19 c) 2017-18 d) 2016-17.
9. The Ministry of Tourism organizes International Day of Yoga on _____.
a) 21st January 2018 b) 21st March 2018 c) 21st May 2018 **d) 21st June 2018.**
10. The Ministry of Tourism is give the _____ cleanliness award.
a) Travvy Awards **b) Swachhta Award** c) Travel Technology Awards d) Culinary Awards

Unit V: Tourism Organisations:

1. _____ is the largest travel promotional organization in the world.
a) IMF b) WTO c) WHO **d) PATA**
2. Pacific Asia Travel Association was established in _____ in Hawaii.
a) 1940 b) 1948 **c) 1951** d) 1960
3. In 1953 the headquarters of PATA were moved from Hawaii to _____.
a) **San Francisco** b) Jamaica c) China d) India

4. PATA first conference was held on
a) January 1951 b) December 1951 c) **January 1952** d) December 1952
5. PATA has _____ types of membership
a) five b) **four** c) three d) two
6. PATA board of director meets every _____ at its headquarter.
a) Day b) Week c) **Month** d) Year
7. International and Hotel and Restaurant Association established in _____.
a) 1935 b) **1947** c) 1950 d) 1953
8. _____ was formed in 1991.
a) **The World Travel & Tourism Council (WTTC)**
b) International and Hotel and Restaurant Association (IHRA)
c) India Tourism Development Corporation (ITDC)
d) World Travel Organisation (WTO)
9. India Tourism Development Corporation (ITDC) came into existence in
a) 1950 b) 1956 c) 1960 d) **1966**
10. The administrative head of the Ministry of Tourism is a) President of Tourism
b) **Secretary of Tourism** c) Board of Director of Tourism d) Chairman of Tourism

Section – B Section –B (2Marks)

Answer in about 50 words each:

Unit I- Basic Concepts of Tourism:

1. State tourism.
2. Define tourism.
3. State adventure tour.
4. List the types of tourism.
5. State medical tour.
6. Recognize sustainable tourism.
7. State pilgrimage tour.
8. Recognize education tour.
9. State tourism development.
10. State study tour.

Unit II: Tourism Product & Tourism Marketing:

1. State amenities.
2. Recognize attraction.
3. List out the man made attraction.
4. State accessibility.
4. Recognize tourism accommodation.
5. State scenic attraction.
6. List the components of tourism.
7. State information technology in tourism.
8. State tourism marketing.
9. List the types of tourism marketing.
10. State man made attraction.

Unit III: Tourism Services:

1. State hotels.
2. Recognize motels.
3. State Resorts.
4. Identify the tour insurance.
5. Recognize tour operator.
6. State tour promoter.
7. State medical tourism.
8. State boating clubs.
9. Recognize package tour.
10. State three star hotel.

Unit IV: Performance of Tourism:

1. List the social impact of tourism.
2. State national tourism.
3. Report the Ministry of Tourism.
4. Identify the Swachhta Award.
4. Recognize International Travel Fairs and Exhibitions.
5. Identify the Integrated Development of Tourism.
6. State the political impacts of tourism.

7. Identify the economic impact of tourism.
8. State the global tourism status.
9. State tourism Infrastructure.
10. List the types of transport.

Unit V: Tourism Organisations:

1. State PATA.
2. List out the important objectives of PATA.
3. Identify the functions of PATA.
4. Report the roles of PATA?
5. State the WTTC.
6. Report ITDC.
7. Recognize IHRA.
8. State FHRAI.
9. List the objectives of WTO.
10. List the PATA researches.

Section – C (5 Marks)

Answer in about 200 words:

Unit I- Basic Concepts of Tourism:

1. Execute the importance of tourism.
2. Examine the nature of tourism.
3. Interpret the importance of tourism.
4. Demonstrate any five types of tourism.
5. Organise the growth of tourism.
6. Execute the importance of tourism.
7. Interpret the nature of tourism.
8. Examine the importance of tourism.
9. Demonstrate the nature of tourism.
10. Organise any five types of tourism.

Unit II: Tourism Product and Tourism Marketing:

1. Execute the basic components of tourism.
2. Organise the types of tourism market.

3. Execute the nature of tourism
4. Demonstrate the role of information technology in tourism.
5. Organise tourism marketing.
6. Examine the components of tourism.
7. Interpret the components of tourism.
8. Examine the types of tourism market.
9. Demonstrate the nature of tourism.
10. Organise the types of tourism market.

Unit III: Tourism Services:

1. Execute the Indian hotels on the basis of size and star.
2. Examine the types of tour packages.
3. Interpret tour promoters.
4. Demonstrate the types of tour packages.
5. Organise the types of tour operator.
6. Examine tour guide.
7. Demonstrate types of travel insurance.
8. Examine any five importance of medical tourism.
9. Interpret the types of tour packages.
10. Execute the tour guide.

Unit IV: Performance of Tourism:

1. Examine the social impacts in tourism development.
2. Organise the cultural impacts in tourism development.
3. Execute the environmental impacts in tourism development.
4. Demonstrate the Economic impacts of tourism development in India.
5. Execute the economic impacts of tourism development in India.
6. Demonstrate the political impacts of tourism development.
7. Interpret the social impacts of tourism development in India.
8. Examine Ministry of Tourism.
9. Organise the objectives of Swadesh Darshan Scheme.
10. Examine the aim of Swadesh Darshan Scheme.
11. Demonstrate the role of transport infrastructure in tourism development.

12. Execute the Ministry of Tourism.

Unit V: Tourism Organisations:

1. Examine the role of Pacific Asia Travel Association (PATA).
2. Recognize the functions of PATA.
3. Interpret the membership of PATA.
4. Organise the Programmes provided by the PATA to Tourism development.
5. Examine the role and functions of PATA.
6. Recognize the functions of World Tourism Organisation(WTO).
7. Execute the role and contribution of WTO.
8. Examine World Travel and Tourism Council (WTTC).
9. Recognize the India Tourism Development Corporation (ITDC).
10. Interpret the functions of PATA.

Section– D (10 Marks)

Answer in about 400 words each:

Unit I- Basic Concepts of Tourism:

1. Design the nature and importance of tourism.
2. Investigate the types of tourism.
3. Formulate the sustainable tourism.
4. Construct the principles of sustainable tourism.
5. Investigate travel and tourism industry in India.
6. Design the importance of tourism.
7. Construct tourism and economic development in India.
8. Design the types of tourism.
9. Investigate the importance of tourism.
10. Formulate the types of tourism.

Unit II: Tourism Product and Tourism Marketing:

1. Design tourism marketing.
2. Investigate the types of tourism market.
3. Formulate the role of information technology in tourism.
4. Construct the impact of information technology in tourism.
5. Formulate tourism marketing.

6. Construct the tourism market segmentation.
7. Design the types of tourism market segmentation.
8. Formulate the history of tourism marketing.
9. Execute the tourism market segmentation.
10. Investigate the tourism market.

Unit III: Tourism Services:

1. Formulate the classification of hotels.
2. Design the Indian hotels on the basis of size and star.
3. Investigate the hotels on the basis of star and location.
4. Construct the types of tour packages.
5. Execute the types of travel insurance.
6. Assemble the types of tour operator.
7. Design tour guide.
8. Investigate the importance of medical tourism.
9. Construct travel insurance.

11. Explain the four elements in Economic development

Unit 4

1. What are the causes of vicious circle of poverty?
2. Point out the features of poverty?
3. How poverty estimated in India?
4. What is inequality in economics?
5. What is poverty gap method?
6. Discuss the major causes of Poverty in India
7. Discuss recent poverty eradication programmes
8. Distinguish between Absolute Poverty and Relative Poverty

Unit 5

1. Explain the types of unemployment
2. Explain full employment and Unemployment
3. List out the difference between Structural unemployment and Cyclical Unemployment
4. Discuss Disguised unemployment and Seasonal Unemployment
5. Elaborate Voluntary and Involuntary unemployment
6. Discuss Technological unemployment and Frictional Unemployment
7. Explain the causes of unemployment
8. Explain the different types of involuntary unemployment?
9. Discuss recent employment generation schemes?

Section D

Unit I

1. Explain the difference between Micro economics and Macro economics.
2. List out and explain the basic concept in economics.
3. Write the nature and scope of economics.
4. What is an economic system and what are its types?

5. Explain the different types of goods.
6. Discuss the Various Definitions of Economics

Unit 2

1. Describe Methods of National Income Estimation
2. What is National Income and explain the difficulties in National Income estimation.
3. Discuss the difficulties and precautions need to be taken in National Income Estimation?
4. Illustrate the difference between GDP and NDP and GNP and NNP?

Unit 3

1. Define Economic development. List out the features of Economic Development
2. Define Economic Growth. List out the features of Economic Growth
3. Differentiate between Economic Growth and Economic Development?
4. Explain the need and scope of Economic Development and Economic Growth
5. Define economic development. Distinguish between development and growth.
6. Explain the importance of technology as a factor in economic growth.
7. Explain the Impediments to development

Unit 4

1. What are the main causes of women's poverty?
2. Explain all the causes of poverty in India?
3. How poverty line is estimated in India?
4. Mention all the important anti-poverty measures undertaken by Government
5. Define vicious circle of poverty? Point out its solutions?
6. Examine the methods of measurement of poverty?
7. .Explain the main causes of poverty in underdeveloped countries?

Unit 5

1. Explain the types of unemployment
2. Discuss the causes of unemployment
3. Describe the voluntary and involuntary unemployment
4. Comment on the unemployment of India
5. Explain the measures to remove the unemployment
6. List out some of the employment guarantee schemes in India

SEMESTER- IV			
Core – VI		MACRO ECONOMICS – II	
Course Code: 21UECC41	Hours / week :6	Hrs / Sem.: 90	Credits :6

Objectives:

- It also introduces the students to various theoretical issues related to an open economy.
- Understand the Fiscal policy operations, its tools, and its advantages and drawbacks.
- To enable the students to have basic knowledge on macro-economic theories and policies

Course Outcomes:

CO No.	Upon completion of this course, students will be able to	PSO's Addressed	CL
CO - 1	know the multiplier and identify the leakages of multiplier	5	Un
CO - 2	understand the acceleration principles	2,4	Un
CO - 3	Analyze different phases of trade cycle, demonstrate various trade cycle theories, understand the impact of cyclical fluctuation on the growth of business, and lay policies to control trade cycle.	5, 7	An
CO - 4	Describe the business cycle and its primary phases	2,4	Ev
CO - 5	Compare and contrast the circumstances under which it makes sense to apply the Keynesian and Neoclassical perspectives	4,6	Ap
CO - 6	Compare and contrast expansionary and contractionary fiscal policies.	4,7	Cr
CO - 7	Identify appropriate macro policy options in response to the state of the economy.	4	An
CO - 8	Describe the role of financial markets play in an economy.	4,5	Ev

SEMESTER- IV			
Core - VI	MACRO ECONOMICS – II		
Course Code: word	Hours / week :6	Hours / Sem.: 90	Credits :6

UNIT-I: Investment Function **15 Hrs**

Meaning – Definition – Induced and autonomous investment – Determinants of Investment
– MEC and Rate of interest – Factors other than the Interest rate affecting Inducement to Invest

UNIT-II: Multiplier and Accelerator **20 Hrs**

The concept of Multiplier – Employment and Investment Multiplier – Limitations and Importance of Multiplier - Leakages – Principles of Acceleration –Interaction between Multiplier and Accelerator (Super Multiplier).

UNIT-III: General Equilibrium **20 Hrs**

General Equilibrium- Equilibrium of Commodity Market (IS) and Money Market (LM)
– Simultaneous equilibrium of Commodity and Money Market (IS & LM) changes in General equilibrium (Shifts in IS and LM functions)

UNIT-IV: Trade Cycle **15 Hrs**

Definition and Phases of Trade Cycle – Control of Trade Cycle – Monetary and Non-Monetary theories of Trade Cycle

UNIT-V: Macro Economic Policies **20 Hrs**

Monetary Policy - Objectives – Instruments –Effectiveness of Monetary Policy -
Fiscal Policy - Objectives - Instruments - Monetary and Fiscal Policy Mix

Text Book:

M.Maria John Kennedy. *Macro Economics*. New Delhi: PHI Learning PVT Ltd. 1st edition 2011.

Books for Reference:

1. Dr.D. Amutha. *Fundamentals of Macroeconomics*. New Delhi: Manglam publications. 1st edition 2019.
2. A.L. Ahuja. *Macro Economic Theory and Policy*. New Delhi: S. Chand & Company Ltd. 20th edition 2019.
3. Hubbard R. Glenn & O'Brien Anthony P. U.K: Pearson Publications. 5th edition 2017.
4. Jhingan, M. L. *Macro Economic Theory*. New Delhi: Vrinda Publications (P) Ltd. 12th edition 2014.

ST. MARY'S COLLEGE (Autonomous) THOOTHUKUDI

II B. A. Economics

Core I – Macro Economics Sub Code: 21UECC41

Semester IV April 2023

(For those who joined in July 2021 onwards)

QUESTION BANK

SECTION -A (1 Mark)

Choose the correct answer

UNIT -I

1. _____ is that investment which is independent of level of income and interest rate.
(a) Induced Investment (c) **Autonomous Investment**
(b) Gross Investment (d) Capital Investment
2. Lower cost will enable the investors to increase _____.
(a) interest rate (b) **investment** (c) wages (d) rent
3. _____ is a broad term that can be described as anything that confers value or benefit to its owners.
(a) profit (b) wages (c) **capital** (d) Investment
4. Expenditure on producer goods is known as _____.
(a) Sales (b) wages (c) revenue (d) **investment**
5. The rate of _____ expected from an extra unit of a capital asset is known as marginal efficiency of capital.
(a) **Profit** (b) sales (c) interest (d) demand
6. The rate of _____ is also called as cost of investing.
(a) Surplus (b) deficit (c) profit (d) **interest**
7. A high rate of _____ can have a favourable effect on investment.
(a) **Inflation** (b) deflation (c) interest rate (d) wages
8. The term _____ denotes the earning power of the capital employed.
(a) Labour (b) **efficiency of capital** (c) equality (d) capital
9. _____ costs will enable investors to increase investments.
(a) **Lower** (b) higher (c) constant (d) equal
10. Changes in _____ influence the volume of investment.
(a) Labour (b) wages (c) **demand** (d) supply

UNIT -II

1. The multiplier accelerator model assumes investments depends on _____
(a) **expected future profits** (c) sales
(b) Interest rates (d) stocks
2. The maximum value of multiplier is when the value of MPC is _____
(a) Infinity, zero (b) **infinity, one** (c) one, infinity (d) zero, infinity
3. When $MPC = MPS$ then, the value of multiplier is _____
(a) Infinity (b) one (c) equal to MPC (d) **two**
4. Multiplier is _____ related to MPC
(a) **directly** (b) negatively (c) indirectly (d) rarely
5. When economy decides to save the whole of its additional income, then the value of investment multiplier will be _____
(a) Indeterminate (b) **one** (c) zero (d) infinite
6. A part of higher income which is saved and does not add to the income stream is called _____
(a) Savings (b) investments (c) **leakages** (d) stocks
7. Who made a strong case for public investment in order to increase the level of economy activity?
(a) Marshall (b) Hicks (c) Samuelson (d) **Keynes**
8. The concept of employment multiplier was introduced by _____
(a) **R. F Khan** (b) Marshall (c) Samuelson (d) J.R Hicks
9. The theory of accelerator and the theory of multiplier are the two sides of the theory of fluctuation, just as the theory of demand and the theory of supply are the two sides of value." Whose words are these?
(a) Keynes (b) Marshall (c) **J.R. Hicks** (d) J.M Clark
10. If $MPC = 1$, the value of multiplier is _____
(a) 0 (b) 1 (c) between 0 and 1 (d) **infinity**

UNIT -III

1. The product market equilibrium is also called as _____ equilibrium.
(a) Pure sector (b) **Real sector** (c) main sector (d) classical sector
2. The slope of IS Curve is _____
(a) Positive (b) **negative** (c) parallel (d) vertical
3. The speculative demand for money is a _____ function of rate of interest.
(a) Increasing (b) **decreasing** (c) constant (d) immovable
4. The transaction demand for money is the direct function of _____
(a) **Level of income** (b) purchases (c) capital (d) investment
5. The _____ diagrammatic framework is known IS-LM model.
(a) Harrod Domar (b) Samuelson (c) Robinson (d) **Hicks Hansen**

6. In the IS–LM model under the usual conditions in a closed economy, an increase in government spending increases the interest rate and crowds out _____.
 (a) Prices (b) **investments** (c) money supply (d) taxes
7. If the demand for real money balances does not depend on the interest rate, then the LM curve _____.
 (a) Slopes up to the right (c) slopes down to the right
 (b) is horizontal (d) **is vertical**
8. In the IS–LM model, a decrease in the interest rate would be the result of _____.
 (a) **Increase in money supply** (c) decrease in money supply
 (b) Increase in government purchases (d) increase in money demand
9. A decrease in the price level shifts the LM curve to the right, and the aggregate demand curve _____.
 (a) shift to the right (c) shift to the left
 (b) **does not shift** (d) shift upwards
10. If the central bank follows an expansionary monetary policy, this will _____.
 (a) Shift the LM curve to the left (c) shift IS curve to the right
 (b) **Shift the LM curve to the right** (d) shift IS curve to the left

UNIT-IV

1. The term business cycle refers to –
 (a) **fluctuations in aggregate economic activity over time.**
 (b) ups and down in the production of goods
 (c) increasing unemployment
 (d) declining savings
2. Expansion phase all but one of the following characteristics.
 (a) Increase in national output (c) **Excess production capacity of industries**
 (b) Increase in consumer spending (d) Expansion of bank credit
3. Which one of the following is not the characteristic of business cycle?
 (a) They are recurrent (c) **They have uniform causes**
 (b) They are not at regular intervals (d) They are variant
4. The turning points of the business cycle are
 (a) Expansion and Peak (c) Contraction and Trough
 (b) Peak and Contraction (d) **Peak and Trough**
5. According to _____ trade cycles occur due to onset of innovations
 (a) Hawtrey (b) Adam Smith (c) JM Keynes (d) **Schumpeter**
6. When aggregate economic activity is increasing, the economy is said to be in _____.
 (a) **an expansion.** (b) a contraction. (c) a peak (d) a turning point
7. _____ is of the view that fluctuations in economic activities are because of fluctuations in aggregate effect demand.
 (a) **Keynes** (b) Schumpeter (c) Nicholas Kaldor (d) Joan Robinson
8. According to _____ a trade cycles is a purely monetary phenomena
 (a) Keynes (b) **Hawtrey** (c) Schumpeter (d) Nicholas Kaldor

9. Optimistic and pessimistic mood of the business community also affects the economic activities is the view of _____
 (a) Hawtrey (b) Schumpeter (c) **Pigou** (d) Keyens
10. Business cycles appear due to present fluctuations in prices affecting the output and employment in future is _____
 (a) **Cobweb theory by Nicholas Kaldor** (c) Cobweb theory by J.M. Keyens
 (b) Ordinal theory by Allen & Hicks (d) Ordinal theory by Hicks

UNIT-V

1. Which agency has the foremost role in regulation of banking sector in India?
 (a) **Reserve Bank of India** (c) Union Ministry of Finance
 (b) Union Finance Commission (d) Union Ministry of Commerce
2. Which of the following agencies is responsible for formulating the Fiscal Policy in India?
 (a) Securities and Exchange Board of India (SEBI)
 (b) Reserve Bank of India
 (c) **Ministry of Finance, Government of India**
 (d) National Bank for Agricultural and Rural Development (NABARD)
3. Which of the following is the definition of a budget deficit?
 (a) Excess of the total expenditure over the total receipts minus interest payments and borrowings
 (b) Excess of the total expenditure over the total receipts minus borrowings
 (c) Excess of the revenue expenditure over the revenue receipts
 (d) **Excess of the total expenditure over the total receipts**
4. Which of the following steps under the fiscal policy is an example for stabilising the economy?
 (a) **Making payments towards unemployment insurance benefits**
 (b) Making payments towards pensions for retired military personnel
 (c) Allocating more capital for spending on construction of national highways
 (d) Decreasing the supply of money within the economy
5. Bank rate is the rate at which the Reserve Bank of India provides loans to _____
 (a) Public sector undertakings (c) Private Corporate sector
 (b) **Commercial banks** (d) Non-banking financial institutions
6. When the supply of money increases and the demand for money reduces, there will be
 (a) a fall in the level of prices (c) an increase in the rate of interest
 (b) **a decrease in the rate of interest** (d) a fall in the level of demand
7. Which one of the following is not an instrument of selective credit control in India?
 (a) Regulation of consumer credit (c) Margin requirements
 (b) Rationing of credit (d) **Reserve ratios**
8. Which of the following guidelines by the RBI doesn't hamper the profitability of commercial banks in India?
 (a) Cash Reserve Ratio (c) Margin Requirements
 (b) Statutory Liquidity Ratio (d) **Bank Rate**

9. Lending of which of the following sectors is not a part of priority sector lending?
(a) Small Scale Industry (c) Allied activities to agriculture
(b) Lending for the poor (d) **Iron and steel industry**
10. Monetary policy is more effective if the LM curve is _____
(a) **Steeper** (b) parallel (c) horizontal (d) flatter

SECTION - B (2 Marks)

Answer in 50 words

UNIT -I

1. Recall investment.
2. Describe capital.
3. State the three elements of investment.
4. Define marginal efficiency of capital.
5. Distinguish gross and net investment.
6. Write about 'Cost of investing'
7. Discuss about inflation.
8. Tell about deflation.
9. State the different types of investment.
10. Explain replacement investment.
11. Recall propensity to consume.
12. Write about public expenditure.

UNIT -II

1. Define multiplier.
2. State accelerator.
3. Describe investment multiplier.
4. Discuss about leakages.
5. Write about employment multiplier.
6. State any two importance of multiplier.
7. Explain super multiplier.
8. Write about disinvestment.
9. Describe public investment.
10. State any two limitations of accelerator.

UNIT -III

1. Recall IS-LM model.
2. Explain about IS schedule.
3. Describe money market equilibrium.
4. Explain real sector equilibrium.

5. Discuss about transactions demand for money.
6. Explain about speculative demand for money.
7. Write about LM curve.
8. Recall general equilibrium of product and money market.
9. Write about IS function.
10. Discuss about LM function.

UNIT -IV

1. Define trade cycle
2. State the different phases of trade cycle.
3. State the features of a trade cycle
4. Recall the various measures to overcome trade cycle.
5. Distinguish boom and depression period of trade cycle.
6. Write about cyclical fluctuations.
7. Recall recovery phase of trade cycle.
8. Write about recession.
9. Write about prosperity phase of trade cycle.
10. Show how monetary policy helps to control trade cycle.

UNIT -V

1. Define monetary policy.
2. Write about fiscal policy.
3. State the instruments of monetary policy.
4. State the instruments of fiscal policy.
5. State the selective credit control measures of credit control.
6. Recall expansionary monetary policy.
7. Describe contractionary monetary policy.
8. Define tax.
9. Write about government expenditure.
10. State any two objectives of monetary policy.

SECTION - C (5 Marks)

Answer in 200 words

UNIT – I

1. Distinguish between induced and autonomous investment.
2. Outline the different types of investment.
3. Compare gross investment and net investment.
4. Classify the different types of investment
5. Present the short run factors affecting marginal efficiency of capital.
6. Examine the determinants of investment.

UNIT – II

1. Differentiate employment multiplier and investment multiplier.
2. Present the importance of multiplier.
3. Show the limitations of multiplier.
4. Explain various forms of leakages.
5. Explain the principle of acceleration.
6. Outline the multiplier principle.

UNIT – III

1. Present the derivation of IS curve.
2. Show the derivation of LM curve.
3. Discuss about commodity market with the help of suitable diagrams.
4. Explain money market equilibrium with suitable diagrams.
5. Differentiate product market and money market.
6. Show the shifts in IS curve.
7. Show the shifts in LM curve.
8. Explain the slope of IS curve.
7. Explain the slope of LM curve.

UNIT – IV

1. Explain how to control trade cycle.
2. Discuss briefly Climatic Theory of trade cycle.
3. Explain various measures to overcome trade cycle.
4. Discuss briefly Psychological Theory of trade cycle.
5. Discuss briefly Overinvestment Theory of trade cycle.
6. Write a note on Over-Saving or Under Consumption Theory of trade cycle.

UNIT – V

1. Explain the objectives of monetary policy.
2. Discuss the quantitative instruments of monetary policy.
3. Present the objectives of fiscal policy.
4. Explain the instruments of fiscal policy.
5. Differentiate monetary and fiscal policy.

SECTION - D (10 Marks)

Answer in 400 words

UNIT -I

1. Present the various types of investment.
2. Explain the various determinants of investment.
3. Discuss the factors affecting marginal efficiency of capital.
4. Explain the factors other than interest rate affecting inducement to invest.

UNIT -II

1. Explain the different types of multiplier.
2. Discuss the importance and limitations of multiplier.
3. Explain the multiplier effect with a suitable diagram.
4. Discuss the principle of acceleration with a suitable diagram.
5. Explain the interaction between multiplier and accelerator.
6. Discuss about super multiplier.

UNIT -III

1. Explain the IS-LM model with suitable diagrams.
2. Discuss the general equilibrium of product and money market.
3. Explain the derivation of IS function, its slope and shifts.
4. Explain the derivation of LM function, its slope and shifts.
5. Discuss the simultaneous equilibrium of commodity and money market.
6. Explain the changes and shifts in general equilibrium of IS and LM functions.

UNIT -IV

1. Critically examine Hawtrey's Monetary Theory of Trade Cycle.
2. Critically examine Hayak's Over-Investment Theory of Trade Cycle.
3. Critically examine Keynes' Theory of Trade Cycle.
4. Critically examine Schumpeter's Innovation Theory of Trade Cycle

UNIT -V

1. Explain the objectives of monetary policy.
2. Discuss the various instruments of monetary policy.
3. Evaluate the effectiveness of monetary policy.
4. Explain the objectives and instruments of fiscal policy.
5. Discuss about monetary and fiscal policy mix.

SEMESTER- IV			
Allied -IV		MATHEMATICAL METHODS- II	
Course Code: 21UECA41	Hours / week :4	Hrs / Sem.: 60	Credits :4

Objectives:

- To mould the students to acquire skills required for strengthening Mathematics.
- Provide platform to acquire abilities to evaluate problems using analytical/ numerical/ graphical techniques.
- Provide a back ground for relating mathematical techniques to solve real life problems.

Course Outcome:

CO No.	Upon completion of this course, students will be able to	PSO's Addressed	CL
CO - 1	Understand the foundations of mathematics	4	Un
CO - 2	Use equations, formulae, and mathematical expressions and relationships in a variety of contexts.	2,4,5	Un
CO - 3	Analyse and demonstrate mathematical skills required in mathematically intensive areas in Economics and business.	4,5,7	An
CO - 4	Apply the knowledge in mathematics(Matrices, Calculus)in solving business problems.	4,6	Ap
CO - 5	acquire an introduction to apply a range of mathematical techniques to economic problems.	5,6	Ap
CO - 6	learn and understand the application of integration in economics.	1,4	Un
CO - 7	acquire lifelong skills to understand current economics and to investigate economic models using mathematical techniques.	1,4,6	Un,Ap

SEMESTER- IV			
Allied -IV		MATHEMATICAL METHODS- II	
Course Code: 21UECA41	Hours / week :4	Hrs / Sem.: 60	Credits :4

UNIT-I: Ratio, Proportion, Relations and Functions

10 Hrs

Ratio – Proportion – Relations - Progression – Arithmetic progression – Geometric progression, Functions – types of functions – Application in Economics

UNIT-II: Matrix - I

10 Hrs

Matrix - Meaning and types - Operation of matrix: addition, subtraction, multiplication, division – Determinant – Properties of determinant

UNIT-III: Matrix - II

15 Hrs

Rank of matrix - trace of matrix - inverse: properties of inverse – solution to linear equations - Cramer's rule – Inverse method – Applications in Economics: input - output analysis (introduction and concepts alone)

UNIT-IV: Linear Programming

10 Hrs

Meaning - Basic concepts – Graphical solution to linear programming problem (only two variables) – Dual Method.

UNIT-V: Introduction to Game Theory

15 Hrs

Meaning – Concepts – Significance – Types: Pure and Mixed Strategy games – Applications and Limitations of game theory

Text Book:

Sundaresan V. and S.D. Jeyseelan. *An Introduction to Business Mathematics*. New Delhi: Sulthan chand (G/L) & Company Ltd. Revised edition 2018

Question Bank

II B.A. Economics

Allied IV-Mathematical Methods-II Sub.Code: 21UECA41

Semester IV November 2022

(for those who joined in July 2021 and after)

UNIT 1

Section A

1. A function which is not algebraic, is called a -----
a. transcendental function. b. Explicit function c. Implicit function d. Single function
2. A function $f(x)$ is said to be a single valued function if to each value of x there is one and only one value of -----
a. Y b. XY^2 c. X^2 d. constant
3. Find the ratio between 256 and 1614.
a. 64:41 b) 10:1 c) 5:6 d) 18:78
3. A Geometric Progression is a sequence in which successive terms are increased or decreased by a constant ratio. This constant ratio is called the
a. Common ratio b. Common difference c. Variable d. Constant
4. When the changes in the values of the variable bear a constant ratio, the function is said to be -----
a. linear b. Non linear c. Parabolic function d. power function
5. Function is a special case of -----
a. Relation b. Correlation c. Regression d. Differentiation
6. Polynomial function of degree one is termed as
a. Linear Function b. Quadratic function c. Cubic Function d. power function
7. Polynomial function of degree two is termed as
a. Constant function b. **Quadratic function** c. Logarithmic function d. Rational function
8. The numbers in a sequence are termed as
a. Terms b. Variable c. Constant d. Subset
9. A set of numbers written successively according to a definite rule is called

a. **Progression** b. Matrix c. Function d. Ratio

10. In an Arithmetic Progression successive terms are increased or decreased by a constant number. This constant number is called

a. **Common Difference** b. Term c. n^{th} term d. Constant Ratio

Unit 2

Section A

1. The numbers in horizontal lines in a Matrix are called-----

a. **Rows** b. Columns c. Dimension d. Diagonal

2. The numbers in vertical lines in a Matrix are called-----

a. **Columns** b. Order c. Minor d. sub matrix

3. A square matrix, in which all the diagonal elements are one and all the non-diagonal elements are 0, is called -----

a. **Identity matrix** b. Sub Matrix c. Equal matrix d. Singular matrix

4. If the number of rows of a Matrix is equal to the number of its columns, then that Matrix is called -----

a. **Square matrix** b. Diagonal matrix c. Nilpotent Matrix d. Symmetric Matrix

5. The sum of diagonal elements of a Square Matrix is called the -----

a. **Trace of Matrix** b. Minor c. Adjoint d. Inverse

6. The determinant obtained by omitting the row and column containing a particular element is called as the ----- of that element.

A **Minor** b. Transpose c. Trance d. Inverse

7. Determinant of the product of Matrices is equal to the product of the individual -----

a. **Determinants** b. Minors c. sub matrices d. Null matrix

8. If one row of a matrix is multiple of another row, the value of the determinant will be -----

a. **Zero** b. One c. Two d. Three

9. If A and B are square matrices and $AB=BA$, then A and B are called -----

a. **Commutative** b. Anti- Commutative c. Orthogonal Matrix d. Hermitian Matrix

10. The signed Minors are called -----

A, **Cofactor** b. Adjoint c. Determinant d. Inverse

UNIT 3

Section A

1. The ----- of a Matrix A is defined as the maximum number of linearly independent rows (or columns) in Matrix

a) **Rank** b) Minor c) Adjoint d) Trace

2----- is the number of Non-zero vectors.

a) Determinant b) Transpose c) **Rank** d) Trace

3. The rank of a "Null Matrix" is

a) **Zero** b) One c) Three d) Four

4. Rank of a Matrix is denoted by?

a) **$r(A)$** b) R c) RA^{-1} d) $|R|$

5. The sum of diagonal elements of a Square Matrix $A(a_{11} + a_{22} + \dots a_{nn})$ is called the -----

a) **Trace of A** b) Rank c) Transpose d) Determinant

6. The Trace is defined only for -----

a) **Square Matrix** b) Singular Matrix c) Non- Singular Matrix d) Fourth order Matrix

7. One Matrix is the inverse of the another Matrix if and only if their product is the ----

a) **Identity Matrix** b) Null Matrix c) Singular Matrix d) Scalar Matrix

8. Inverse of a Matrix is also called -----

a) **Reciprocal Matrix** b) Adjoint Matrix c) Minor d) Co Factor Matrix

9. Which of the following is a rule using determinant to solve a system of Linear Equations.

a) **Cramer's Rule** b) Simplex method c) Dual problem solving method d) Inverse method

10. The Input-Output Analysis was first propounded by whom?

a) **Wassily W. Leontief** b) J.M.Keynes c) Alfred Marshall d) David Ricardo

11. Input- Output analysis is a novel quantitative technique to study which of the following?

a) **Inter-industry relations** b) International trade c) Total cost and Revenue d) Rank

Unit 4

Section A

1. Who developed Linear Programming technique?

a) **George B. Dantzig** b) T.C.Koopmans c) R. Dorfman d) Cooper

2. The reverse of the primal problem is called the -----

a) **Dual problem** b) Objective function c) Constraints d) Optimal solution

3. Linear Programming is also known as -----

a) **Mathematical Programming** b) Input Output analysis c) Transaction Matrix table
d. Dynamic model

4. Who among the following is the inventor of the first successful general computational technique, the Simplex Method in Linear Programming
a) **B.Dantzig** b) Koopmans c) R.Dorfman d) Kantorovich
5. Linear Programming was first formulated by the Russian Mathematician -----
a) **L.V. Kantorovich** b) W.W.Kooper c) R.Dorfman d) B.Dantzig
6. Linear Programming is concerned with the determination of -----
a) **Optimal solution** b) Problems c) Hypothesis d) Constraints
7. The linear function which is to be maximised in Linear Programming is called---
a) **Objective Function** b) Constraints c) Homogenous function d) Non homogenous function
8. Every maximisation problem has its -----
a) **Dual problem** b) Primal problem c) Non primal problem c) variables
9. If the primal problem in linear programming is maximisation then the dual problem pertains to -----
a) **Minimisation** b) Optimisation c) Linear inequalities d) Activity analysis
10. The limitations pertaining to certain conditions of the problem is termed as
a) **Constraints** b) Non constraints c) Errors d) Homogenous conditions

UNIT 5

Section A

1. ----- is a theoretical framework for conceiving social situations among competing players.
a) Game theory b) Permutation c) Combination d) crammers rule
2. Who among the following is considered as father of game theory
a) Lloyd S. Shapley b) John Neumann c) Oskar Morgenstern d) Emile Borel
3. Game models are classified by the-----
a) size of payoff b) **sum of all payoffs** c) nature of strategies involved d) Saddle points

4. Each player should follow the same strategy regardless of the other player's strategy in which of the following games?

a) Constant strategy b) Mixed strategy c) **Pure strategy** d) Dominance strategy

5. Consider following two-person game, and determine the saddle point if it exists.

	Y_1	Y_2
X_1	4	6
X_2	5	-3

a) X_2Y_2 b) X_1Y_2 c) X_1Y_1 d) **There is no saddle point**

6. In a mixed strategy, each player should optimize the

a) **maximum payoff** b) lower value of the game c) minimum loss d) Maximum loss

7. Consider the following two-person game. What strategy will Y play?

	Y_1	Y_2
X_1	52	37
X_2	26	18

a) X_1 b) X_2 c) Y_2 d) **Y_1**

8. Which one of the following is a part of every game theory model?

a) Players b) Payoffs c) **Probabilities** d) Strategies

9. In game theory, a choice that is optimal for a firm no matter what its competitors do is referred to as

a) **the dominant strategy.** b) the game-winning choice c) super optimal d) gonzo selection.

10. Game theory is concerned with

a) predicting the results of bets placed on games like roulette. b) **the choice of an optimal strategy in conflict situations** c) utility maximization by firms in perfectly competitive markets d) establish a credible deterrent to the entry of competing firms.

UNIT 1

Section B

1. What is a ratio
2. What is a compound ratio
3. What is a continued proportion
4. Define Proportion
5. Write a short note on antecedent and consequent

6. Define function
7. Distinguish between a relation and a function
8. Define implicit and explicit function
9. Define Linear and Non-linear function
10. Define parabolic function
11. Define logarithmic function

Unit 2

Section B

1. Define Matrix.
2. What is an Element?
3. What is Order of a Matrix?
4. Write a short note on row matrix
5. Define Scalar Matrix
6. Write a short note on Idempotent Matrix
7. Describe Nilpotent Matrix
8. Describe Diagonal Matrix
9. Define Square Matrix
10. Write a short note on Singular Matrix

UNIT 3

Section B

1. Define Inverse of Matrix.
2. Write a short note on Rank of a Matrix
3. Describe Trace of a Matrix
4. Define Inverse of a Matrix
5. Mention any three properties of Inverse
6. Write a short note on Cramer's rule
7. Describe meaning of Input- Output Analysis
8. Describe Transaction Matrix
9. Write a short note on Input Coefficients
10. Write a short note on Open Model of Input-Output model

Unit 4

Section B

1. What do you mean by constraints?
2. Define Optimal solution
3. Write a short note on objective function
4. Define Primal problem

5. What is Dual Problem
6. Define Linear programming
7. Write a short note on Non-negative restrictions
8. Define solution in linear programming
9. Define the term basic matrix
10. Write a short note on Basic Vectors

UNIT 5

Section B

1. Write a short note on game theory?
2. Define saddle point
3. Write a short note on dominant strategy
4. Define the term maximum payoff
5. Define the term minimum payoffs
6. Write a short note on optimal strategy
7. Write a short note on probabilities
8. Define Pure strategy
9. Define mixed strategy

UNIT 1

Section C

1. Differentiate homogenous function from non-homogenous function
2. A firm produced 600 units in the third year of the existence and 700 units in the seventh year Assuming that it grows in A.P. Find i) its production in the first year ii) its production in the fifth year and iii) its total production in the first five years.
3. What is a function? Write down the applications of functions in Economics
4. The 54th term and 4th term of an A.P are 125 and 0 respectively. Find the 25th term and the sum of the 40 items.
5. Explain the properties of Ratio
6. Explain the rules of proportion
7. What are the various types of functions encountered in Economics

Unit 2

Section C

1. Explain properties of Matrix Addition and Matrix Multiplication
2. If $A = \begin{bmatrix} 3 & 1 \\ -1 & 2 \end{bmatrix}$ show that $A^2 - 5A + 7I = 0$
3. What is Determinant? Write down the properties of Determinant?

- 1 2 -3 4 -3 2 6 2 1
4. If $A = \begin{bmatrix} 4 & -5 & 6 \\ 7 & 8 & -9 \end{bmatrix}$ $B = \begin{bmatrix} 1 & 6 & -4 \\ -7 & -1 & 3 \end{bmatrix}$ and $C = \begin{bmatrix} 4 & 0 & 7 \\ 2 & 1 & 6 \end{bmatrix}$
5. Show that $A + (B + C) = (A + B) + C$
 If $A = \begin{bmatrix} 5 & 4 \\ -1 & 7 \end{bmatrix}$ $B = \begin{bmatrix} 7 & 0 \\ 8 & 4 \end{bmatrix}$ and $C = \begin{bmatrix} 1 & 9 \\ 5 & 4 \end{bmatrix}$ Verify that $(A + B) - C = A + (B - C)$
6. Explain determinant of first order, second order and third order matrix?
7. Verify whether $AB = BA$ for the matrices
 $A = \begin{bmatrix} 2 & 1 & 0 \\ 1 & -1 & 2 \\ 0 & 1 & 3 \end{bmatrix}$ and $B = \begin{bmatrix} 1 & 2 & -1 \\ -2 & 0 & 1 \\ 1 & 1 & 2 \end{bmatrix}$
8. If $A = \begin{bmatrix} 4 & 5 & 6 \\ 7 & 8 & 9 \end{bmatrix}$ find $|A|$

UNIT 3

Section C

- Solve the following set of Linear Simultaneous Equations.
 $2x_1 + 3x_2 = 5$
 $11x_1 - 5x_2 = 6$
- Explain the properties of Trace?
- Find the rank of Matrix $A = \begin{bmatrix} 1 & 4 & 0 \\ 2 & 5 & 0 \\ 3 & 6 & 0 \end{bmatrix}$
- Find the Inverse by using Matrix $A = \begin{bmatrix} 3 & 1 \\ -1 & 2 \end{bmatrix}$
- Explain the steps to compute Inverse Matrix
- Analyze the properties of Inverse
- Find the Cofactor for the Matrix $A = \begin{bmatrix} 1 & 1 & -3 \\ 2 & 5 & 1 \\ 1 & 3 & 2 \end{bmatrix}$
- Explain the Matrix Inversion technique to solve a system of linear equations.
- Find the Inverse of $A = \begin{bmatrix} 4 & 0 & 2 \\ 2 & 10 & 2 \\ 3 & 9 & 1 \end{bmatrix}$

Unit 4

Section C

- Explain the graphical method of linear programming problem.
- Explain the dual method in linear programming
- Discuss the Simplex method in linear programming
- Solve Graphically Maximize $Z = 8x_1 + 10x_2$,
 Subject to $3x_1 + 2x_2 \leq 200$, $6x_1 + 7x_2 \leq 300$, $x_1, x_2 \geq 0$.

5. A manufacturer produces two types of commodities A and B. Both products are processed on two different machines, namely, P and Q. Each unit of the commodity A requires 3 hours of machine P and 6 hours in machine Q, whereas each unit of the commodity B requires 2 hours of machine P and 7 hours of machine Q. The manufacturer has 4 machines of P and 5 machines of Q. The machine P works for 50 hours a week and the machine Q works for 60 hours a week. The manufacturer receives Rs8 as profit per unit of commodity A and Rs10 from commodity B. How should the manufacturer allocate his production capacity to two types of commodities in order to obtain maximum profit in a week?
6. Use Simplex Method to show that there is an unbounded solution to the following L.P.P. Maximize $Z = X_1 + 5X_2$
 Subject to $X_1 - X_2 \leq 1$
 $2X_1 - X_2 \leq 5$
 $X_1, X_2 \geq 0$

UNIT 5

Section C

1. Explain the types of strategies of Game Theory
2. Explain saddle point and Optimum strategy
3. Distinguish between Minimum payoffs and Maximum payoffs
4. Discuss dominant strategy in dominant strategy
5. Explain pure strategy and mixed strategy
6. Mention the applications of game theory
7. Mention the limitations of game theory

UNIT 1

Section D

1. Explain the types of functions?
2. Find three numbers in G.P. whose sum is 14 and product is 64.
3. A precious stone worth Rs.7800 is accidentally dropped and broken into three pieces, the weights, of which are in the ratio of 5:7:8. The loss of the stone is proportional to the square of its weights. Calculate the loss, if any, incurred by the breakage.
4. The length and breadth of a rectangle are increased in the ratio 6:5 and 9:8 respectively. By what ratio is the area increased?
5. The adulterated milk of 40 litres contains $12\frac{1}{2}$ litres of pure milk. Find the ratio of pure milk to water in the mixture.

Unit 2

Section D

1. Explain the types of Matrices?

$$\begin{matrix} 8 & 1 & 9 & 1 & -2 & 3 & 4 & -3 & 1 \end{matrix}$$

2. Given $A = \begin{bmatrix} -9 & 9 & 9 \\ 6 & -3 & 9 \end{bmatrix}$ $B = \begin{bmatrix} 5 & 6 & -4 \\ 7 & -9 & 8 \end{bmatrix}$ and $C = \begin{bmatrix} 6 & 2 & -1 \\ 0 & -4 & 3 \end{bmatrix}$

Show that i) $A(B+C) = AB+AC$

ii) $(A+B)C = AC+BC$

3. If $A = \begin{bmatrix} 2 & 2 & 1 & 4 \\ 8 & 7 & 1 & 6 \\ 1 & 8 & 6 & 6 \\ 9 & 9 & 0 & 9 \end{bmatrix}$ Find $|A|$

4. Find B, if $-A+2B=6C$, where

$$A = \begin{bmatrix} 1 & 2 & -1 \\ 3 & 0 & 1 \\ 1 & 1 & 1 \end{bmatrix} \text{ and } C = \begin{bmatrix} 2 & -1 & 7 \\ 3 & 0 & 0 \\ 4 & -1 & -5 \end{bmatrix}$$

5. Given $A = \begin{bmatrix} 4 & -5 & 6 \\ 7 & 8 & -9 \end{bmatrix}$ $B = \begin{bmatrix} 7 & 0 \\ -9 & 2 \end{bmatrix}$ and $C = \begin{bmatrix} 1 & 2 & 3 & 4 \\ 2 & 0 & -5 & 6 \end{bmatrix}$

Verify $A(BC) = (AB)C$

6. Explain determinants and properties of determinants?

UNIT 3

Section D

1. Solve the following Linear Equations by using Cramer's Rule

$$X + Y - Z + 2 = 0$$

$$X - 2Y + Z - 3 = 0$$

$$2X - Y - 3Z + 1 = 0$$

2. Explain Input –Output Analysis and the types of Input- Output Model.

3. Find the rank of a Matrix $A = \begin{bmatrix} 6 & 0 & 2 & 4 \\ 3 & 1 & 0 & 2 \\ 4 & 1 & 2 & 2 \\ 2 & 2 & 2 & 2 \end{bmatrix}$

4. Explain the steps or formula for the determination of Adjoint Matrix and Inverse of a Matrix.

5. Find the Inverse of the Matrix $A = \begin{bmatrix} 2 & -2 & 3 \\ 1 & 0 & -3 \\ 3 & 4 & 0 \end{bmatrix}$

6. Verify $(AB)^T = B^T A^T$, where $A = \begin{bmatrix} 2 & 1 & -4 \\ 0 & 3 & 1 \\ -1 & 5 & 6 \end{bmatrix}$ and $B = \begin{bmatrix} 5 & -3 & 2 \\ 8 & 7 & 0 \\ -2 & 1 & -6 \end{bmatrix}$
7. Solve equations using Matrix Inversion technique
- $$\begin{aligned} 2x - 4y + 3z &= 3 \\ 4x - 6y + 5z &= 2 \\ -2x + y - z &= 1 \end{aligned}$$
8. Explain the Input-Output Analysis

Unit 4

Section D

1. A manufacturer of furniture makes two commodities, chairs and tables. Processing of these products is done on two machines A and B. One chair requires 2 hours on machine A and 2 hours on machine B. One table requires 5 hours on machine A and 2 hours on machine B. There are 18 hours of time per day available on machine A and 30 hours on machine B. Profit gained by the manufacturer from a chair and a table is Rs.2 and Rs.10 respectively. What should be the daily production of each of the two products, so as to get maximum profit?
2. Explain the graphical method and dual method of linear programming problem.
3. Define Linear Programming and explain the basic concepts of linear programming
4. Maximize $Z = 300x + 200y$
Subject to $5x + 2y \leq 180$
 $x + y \leq 45$
 $x \geq 0, y \geq 0$
5. Using Simplex method solve the following L.P.P
Maximize $Z = 10x_1 + x_2 + 2x_3 + 0x_4 + 0x_5$
Subject to $x_1 + x_2 - 2x_3 + x_4 = 10$
 $4x_1 + x_2 + x_3 + x_5 = 20$
 $x_1, x_2, x_3, x_4, x_5 \geq 0$

UNIT 5

Section D

1. Two player A and B match coins. If the coins match, then A wins two units of value, if the coin do not match, then B win 2 units of value. Determine the optimum strategies for the players and the value of the game
2. Examine the applications and limitations of game theory
3. Analyse the types of strategies in game theory
4. Outline the significance of game theory

SYLLABUS
II B.A. ECONOMICS - SEMESTER-IV
CORE SKILL BASED - TOURISM ECONOMICS-II **COURSE CODE: 21UECS41**

Unit –I: Travel Agency

Travel Agents, Tour operators, Function of a travel agent – Travel information, Ticketing, Tour packages, and Type of Package, Tours and excursion -Travel agency commission How to setup a travel agency-Modern mobile application towards in Tourism.

Unit -II: Personality developments of Travel Agent, Tour Operator, Guide

Introduction: Meaning of Personality, Personality Factors- external, internal. Effective or winning personality, developing a selling personality

Unit – III: Guiding concept

Meaning, Concepts &Types of Guides: Conceptual meaning of Tourist Guide, duties and responsibilities. How guides are appointed in tour.

Unit - IV: Tourism Development

Development of tourism in India - New Policy on Tourism Management strategy- Global and Indian status of Tourism Industry - International Agencies.

Unit-V: Indian Art & Architecture

Indian Art and Sculptures, Archaeological sites – Monuments – Ancient Temples of India – Forts - Palaces and Museums – Buddhist heritage sites of India, Islamic Art Architecture - UNESCO, World Heritage Sites in India, conservation & Management.

Text Book: A.K.Bhatia, Tourism Development-Principles & Practices, 4th Revised Edition, Sterling Publishers Pvt., Ltd, Uttar Pradesh, 2020.

Books for Reference:

- 1.S. Subramania Pillai. *Tourism in Tamil Nadu- Growth and Development*. India: MJP Publishers. 1st edition 2021.
2. Rajat Gupta, Nishant Singh, Ishita Kirar& Mahesh Kumar Bairwa. *Hospitality and Tourism*. New Delhi: Vikas Publishing House Pvt, Ltd. 1st edition 2015.
3. Satish Chandra Nigam,. *Eco Tourism and Sustainable Development*. New Delhi: Rajat Publications. 1st edition 2008.
4. Biswanath Ghosh. *Tourism & Travel Management*. New Delhi: Vikas Publishing House Pvt, Ltd. 2nd edition 2000.

QUESTION BANK
II B.A. ECONOMICS - SEMESTER- III
CORE SKILL BASED – TOURISM ECONOMICS – II- 21UECS41

Multiple Choice Questions: (1 Mark)

Unit I:- Travel Agency

1. Who is known as the Father of the Travel Agency Business?
a. Thomas Cook b. Jeena and Co. c. Lee and Muirhead d. Cox and kings
2. A wholesaler who sells package tours is called a _____.
a. Travel Agent b. Travel agency **c. Tour operator** d. Customer
3. A concept in which customer choose their holiday from brochures on racks and then book it from counter.
a. Holiday super market concept b. Holiday service market concept
c. Holiday super market contract d. Holiday service market contract
4. CRS stands for
a. Customer Reservation system b. Consumer Reservation system
c. Computer Reservation system d. Computer Reservation software
5. Which of the following is not a activity of Travel Agency?
a. ticketing b. documentation c. insurance **d. planning**
6. Itinerary is also known as
a. Tour Plan b. Tour Product c. Travel Facilities d. Tour services
7. Tickets should be written in ----
a. small b. running **c. block** d. booking
8. The first travel agency started in _____
a. 1931 b. 1846 c. 1872 **d. 1845**
9. Travel Agents Association of India (TAAI) was incorporated during
a. 1951 b. 1940 c. 1947 d. 1949
10. Wholesaler in the parlance of Tourism Industry is
a. Airline **b. Tour operator** c. Hotel d. Travel Agency

Unit II: Personality developments of Travel Agent, Tour Operator, Guide

1. _____ is the internal quality of tour operator. **a) Knowledgeable and passionate**
b) Driving safe & responsible c) Raising awareness d) Ensuring animal welfare
2. _____ is the external quality of tour operator.
a) Trained & qualified b) Outgoing & engaging
c) Organizing & punctual **d) Treating local community respectfully**
3. A quality tour guide should show _____ knowledge
a) wayward **b) accurate** c) general d) vague
4. Which one of the following comes under the winning personality of travel agent?
a) haphazard b) system less c) plan less **d) natural explorer**
5. Which one of the following comes under the selling personality of tourist guide?
a) stand still **b) use listening capacity** c) abstain d) dormant
6. Tour guide should have a personality of
a. lack of self confidence b. unable to make decision
c. good communication skill d. Unpleasant & Unfriendly manner
7. The process of monitoring performance, comparing it with goals and correcting any significant deviations is known as a. organizing b. planning **c. controlling** d. leading
8. Feedback can be used as
a. creating micro barrier **b. evaluating effectiveness of communication**
c. carrying out instructions d. analysing the decoder.
9. Which of the following is considered as a challenge faced by destination marketer?
a. limited budgets b. politics c. external environment **d. all of the above**
10. Which one of the following comes under the internal personality of tourist guide?
a. protecting natural resources b. driving safe
c. organised & punctual d. ensuring animal welfare

Unit – III: Guiding concept

1. A tourist guide is _____ a. An unofficial ambassador of his country
b. An encyclopedia c. Trained & experienced person **d. All the above**
2. Approval for 'A' class tourist guide is given by **a. Government of India**
b. Department of Archaeology c. State Government d. None of these

3. The tourist who have particularized knowledge in any area is known as _____.
a. General guide **b. Specialized guide** c. Escort d. None
4. The tourist guide who stationed at the monuments is categorized as _____.
a. A class tourist guide b. B class tourist guide
c. Both A & B class Guide **d. Both B & C class guide**
5. Number of years travel agency should be in operation before getting approval of DPT
a. One **b. Two** c. Three d. Five
6. When a travel agency provides the service of a well educated, trained tour manager during the course of travel, it is known as
a. Escorted tour b. Hosted tour c. Inclusive tour d. Incentive tour
7. Motivational programme provided for the employees of an organisation is known as _____.
a. Hosted tour b. Incentive tour **c. Inclusive tour** d. Escorted tour
8. How many tour guides are there in India?
a. around 2350 **b. around 3500** c. around 4600 d. around 5200
9. In which year, the Ministry of Tourism launched a campaign titled “Atithi Devo Bhava”?
a) 2009 b) 2018 c) 2019 d) 2022
10. The basic purpose of any tourism policy is to _____ tourism activity.
a. divert b. destroy c. pull down **d. host**

Unit IV: Tourism Development:

1. In which year the Govt. of India introduced National Action Plan?
a. 1982 b. 1988 **c. 1992** d. 2002
2. India introduced first Tourism policy in
a. 1972 **b. 1982** c. 1992 d. 1962
3. In which five year plan tourism development was first included?
a. Ninth five year plan b. Fifth five year plan
c. First five year plan **d. Second five year plan**
4. Planning for tourism ensures
a. Benefits will flow to a destination b. Negative impacts will increase
c. Conflict between residents and tourist will increase d. Tourism will be disadvantaged
5. The national tourism policy, 2002 of India aims that tourism can be used as a
a. stagnant tool b. inert tool **c. development tool** d. torpid tool

6. _____ is the largest travel promotional organization in the world.
a) IMF b) WTO c) WHO **d) PATA**
7. The headquarter of UNWTO is situated at _____.
a. Paris b. London c. New York **d. Madrid**
8. Where is the headquarter of World Travel and Tourism Council (WTTC)?
a. Brussels b. Madrid c. Amsterdam **d. London**
9. In 1953 the headquarters of PATA were moved from Hawaii to _____.
a) **San Francisco** b)Jamaica c) China d) India
10. PATA first conference was held on
a) January 1951 b) December 1951 c) **January 1952** d) December 1952

Unit-V: Indian Art & Architecture

1. Which of the following countries is not one of the top 5 tourism generators?
a. USA b. Germany c. France d. Fiji
2. ----- is the matrix of civilisation
a. architecture b. economy c. religion d. Philosophy
3. A tour package that includes Delhi-Agra-Jaipur is called ----
a. Royal Orient b. Golden chariot c. Golden Triangle d. None of these
4. The famous iron pillar at Mehruili belonged to -----age.
a. Maurya b. Gupta c. Pandya d. Sungas
5. ----- was the Mughal emperor encouraged the miniature paintings
a. Jahangir b. Akbar c. Humayon d. Aurangzeb
6. Which is the most expensive type of tourism
a. Green Tourism b. Cruise Tourism c. Space Tourism d. Wedding Tourism
6. Varanasi is popularly known as
a. Gateway to salvation b. Gateway of India c. Greatest temple of India d. None of these
7. Varanasi lies in the bank of which river
a. Yamuna b. Ganga c. Brahmaputhra d. Cauvery
8. Sanchi stupa is located in ----
a. Madhura b. Bhopal c. Bodhgaya d. None of these
9. ----- temple was considered as the crown of Pallava architecture?
a. Kailasanatha b. Chennakesava c. Vaikunda Perumal d. sea shore

10. The Nazareth National Park was established in ----
a. 1960 b. 1955 c. 1965 d. 1947

Section – B Section –B (2Marks)

Answer in about 50 words each:

Unit I:- Travel Agency

1. State travel agency.
2. State tour operators.
3. List out the functions of travel agent.
4. Write a short note on ticketing.
5. State the tour packages.
6. Write down the concept of tour packages.
7. State escorted tour.
8. Write a short note on Independent tour.
9. State incentives tour.
10. State hosted tour.

Unit II: Personality developments of Travel Agent, Tour Operator, Guide:

1. State travel agent.
2. State tour guide.
3. How would you describe about tourist communication skill?
4. Summarize the approved guides.
5. What do you recall unapproved guide?
6. List out the internal personality factors.
7. How would you describe the selling personality of tour guide?
8. List out the winning personality of tour guide.
9. List the external personality factors.
10. State unapproved guide.

Unit – III: Guiding concept

1. List out the categories of tourist guide.
2. State ‘A’ class tourist guide.
3. What do you recall about ‘B’ class tourist guide?
4. Summarize ‘C’ class tourist guide.

5. Write a short note on heritage tour.
6. Summarize adventure guide.
7. How would you describe the cuisine guide?
8. State cultural guide.
9. Summarize history guide.
10. State Archeological guide.

Unit - IV: Tourism Development

1. Define tourism policy.
2. State the objectives of National Tourism Policy 1982.
3. State the concept of National Tourism Policy 1982.
4. Write a short note on National tourism policy 2022.
5. How would you describe tourism policy 2002?
6. List out the functions of PATA.
7. Extend WTTC.
8. State PATA.
9. List out the important objectives of PATA.
10. List out the objectives of WTO.

Unit-V: Indian Art & Architecture

1. State the various Indian Art and Sculptures
2. Mention the various Archaeological sites.
3. Write down the concept of Monuments.
4. Write the concept of Forts.
5. Write a short note on Taj Mahal
6. Describe the major feature of Buland Darwaza
7. Write a short note on Bagh Caves
8. Describe Nagara style temple architecture
9. Describe Dravidian style temple architecture

Section – C (5 Marks)

Unit I-: Travel Agency

1. Differentiate tour from excursion.
2. Analyse travel agents and tour operators.

3. Analyse the basics of ticketing.
4. Compile the types of tour packages.
5. How would you show your understanding about the types of tour packages in India?
6. Compile the similarities of tour and excursion.
7. Analyse the concept of travel agency in India.
8. Appraise the requirement for set up travel agency.
9. Analyse the types of tour packages.
10. Compile the basics of ticketing.

Unit -II: Personality developments of Travel Agent, Tour Operator, Guide

1. Appraise the winning personality of travel agent.
2. Compile the internal personality of tour guide.
3. Appraise the external personality of tour guide.
4. Analyse the winning personality of travel agent.
5. Compile the selling personality of tour guide.
6. Appraise the characteristics of a tourist guide.
7. Analyse the selling personality of travel agency.
8. How can you identify the recognition of tourist guide?
9. Analyse the characteristics of a tourist guide.
10. Compile the characteristics of a tourist guide.

Unit – III: Guiding concept

1. Compile the role of tour guide.
2. Analyse the training of tourist guide.
3. Appraise the category of tourist guide.
4. Compile the types of tourist guide.
5. Analyse the role of tour guide.
6. Compile the training of tourist guide.
7. Analyse the category of tourist guide.
8. Appraise the types of tourist guide.
9. Appraise the role of tourist guide.
10. Compile the training of tourist guide.

Unit - IV: Tourism Development

1. Analyse the general objectives of tourism policy.
2. Compile the tourism Policy 2002
3. Analyse the Tourism policy 1981.
4. Present the status of Indian tourism industry.
5. Compile the National Tourism Policy 2022.
6. Analyze the functions of PATA.
7. Appraise the functions of UNWTO.
8. Recognize the functions of World Tourism Organisation(WTO).
9. Examine World Travel and Tourism Council (WTTC).
10. Interpret the functions of PATA.

Unit-V: Indian Art & Architecture

- 1) Mention the important archaeological sites in India
- 2) Examine the architectural style of Hoysalas
- 3) Analyse the Sculptural art under Vijayanagar reign
- 4) Analyse the role of World Heritage Sites in India
- 5) Analyse the principal elements of Islamic Architecture
- 6) Explain the role of UNESCO in tourism development.
- 7) Describe the Buddhist heritage sites of India.
- 8) Examine the role of conservation & Management of tourism in India.

Section– D (10 Marks)

Answer in about 400 words each:

Unit I:- Travel Agency:

1. Explain the functions of Travel agency.
2. Explain about Ticketing.
3. Analyse the concept of tour packages.
4. Explain about modern mobile application in tourism.
5. Analyse the travel agency in India.
6. Appraise the requirement for set up travel agency.
7. How the travel agency set up commission?
8. Explain the types of tour packages.

9. Construct the functions of travel agent.
10. Construct the step to set up travel agency.

Unit -II: Personality developments of Travel Agent, Tour Operator, Guide

1. Construct the types of tourist guides.
2. Develop the personalities of tour guides.
3. Formulate the recognition of tour guides.
4. Explain the winning personality of travel agent.
5. Analyse the winning personality of travel agent.
6. Explain the selling personality of tour guide.
7. Analyse the selling personality of travel agency.
8. How can you identify the recognition of tourist guide?
9. Analyse the characteristics of a tourist guide.
10. Enumerate the characteristics of a tourist guide.

Unit – III: Guiding concept

1. Explain the category of tourist guide.
2. Analyse the types of tourist guide.
3. Enumerate the role of tourist guide.
4. Explain the training of tourist guide.
5. Explain the role of tour guide.
6. Analyse the training of tourist guide.
7. Explain the types of tourist guide.
8. Analyse the category of tourist guide.
9. Explain the role of tour guide.
10. Explain the training of tourist guide.

Unit - IV: Tourism Development:

1. Analyze the functions of PATA.
2. Analyse the Tourism policy 1981.
3. Explain the tourism Policy 2002.
4. Explain the general objectives of tourism policy.
5. Compile the National Tourism Policy 2022.
6. Critique the role and functions of Pacific Asia Travel Association (PATA).

7. Compile the functions and membership of PATA.
8. Analyse the functions of WTO.
9. Appraise the role and contribution of WTO.
10. Analyse the functions and contribution of UNWTO.

Unit-V: Indian Art & Architecture

1. Explain the various Indian Art and Sculptures
2. Analyse the Ancient Temples of India
3. Illustrate the Islamic Art & Architecture
4. Enumerate the salient features of Buddhist architecture in Buddhist heritage sites?
5. Explain the major World Heritage Sites in India
6. Outline the importance of conservation & Management of tourism in India

SEMESTER- IV			
Non Major Elective Economics for Competitive Examinations – II			
Course Code: 21UECN41	Hours / week :2	Hrs / Semester: 30	Credits :2

Objectives:

- This course is designed to make the undergraduate students of other disciplines aware of the basic ideas and concepts in economics.
- To make students understand economic ideas and its implications in real time life situation.

Course Outcome:

CO No.	Upon completion of this course, students will be able to	PSO's addressed	CL
CO - 1	Explain the types of public debt and how debt is repaid	2,4, 5	Un
CO - 2	Describe the process of credit creation of a commercial bank, describe the balance sheet of a commercial bank, explain the functions of commercial bank	1,3,5	An
CO - 3	Explain the main objective of monetary policy in under developed countries	4,5	An
CO - 4	Explain the functions and constituents of financial system, explain money market, capital market and stock market	1,4,5	An
CO – 5	Explain the different concepts of terms of trade	4,5	An
CO – 6	Explain the structure of BOP, disequilibrium in BOP, causes of disequilibrium	5, 7	Ap
CO – 7	Explain the objectives of IMF and IBRD	4,5	An

SEMESTER- IV			
Non Major Elective	Economics for Competitive Examinations – II		
Course Code: 21UECN41	Hours / week :2	Hrs / Semester: 30	Credits :2

UNIT-I: Public Finance **7 Hrs**

Meaning – Definition – Scope of Public Finance – Public Revenue – Public Expenditure
Causes of increasing Public expenditure in India-Union Budget and its Importance.

UNIT-II: Reserve Bank of India **7Hrs**

Origin of Reserve Bank of India – Functions of Reserve Bank of India – Monetary Policy
Control of Credit – Relationship between RBI and Commercial Banks.

UNIT-III: Inflation& Deflation **5 Hrs**

Meaning - Definition – Types – Causes and Effects of Inflation – Controlling Measures
–Deflation – Effects of Deflation

UNIT-IV: Centre-State Financial Relations **5 Hrs**

Decentralization of power between centre and state-Centre-State Financial relations– Panchayat Raj
System and its Importance- 73rd and 74th Amendments

UNIT-V: International Trade **6 Hrs**

Meaning - Definition – Difference between Internal and External Trade – Balance of Payment –
Functions of WTO and IMF

Question Bank-Semester III

(for those who joined in July 2021 and after)

UNIT-I: Public Finance

1. The most important source of revenue to the states is
 - a) **Sales tax** b) Service tax c) Excise duty d) None of these
2. Scope of public finance includes :
 - (a) Public revenue (b) Public debt (c) Public expenditure **(d) All of these**
3. Public Authorities Include:
 - (a) Central Government (b) State Government (c) Local Government **(d) All of these**
4. Which of the following is the major source of revenue in India:
 - (a) Direct tax (b) Capital Levy (c) Grants in aid **(d) Indirect tax**
5. Who is the father of Public Finance:
 - (a) Dalton** (b) Pigou (c) Smith (d) Musgrave
6. Budget is termed as
 - a) Annual Financial Statement** b) Government receipt c) Government expenditure
 - d) Loans and grants
7. The tax levied by the union government on income of individuals is known as
 - a. Personal income tax** b. Interest tax c. Wealth tax d. Corporation tax
8. The tax on net income of companies is
 - a. Personal income tax b. Interest tax c. Wealth tax **d. Corporation tax**
9. Which is the main objective of a tax:
 - (a) Increase in consumption (b) increase in production (c) **Raising public revenue** (d) reduction in capital formation
10. The burden of direct taxes is borne by :
 - (a) Rich person (b) poor person (c) **on whom it is levied** (d) none of these

UNIT-II

SECTION A

1. The Reserve Bank of India was established on
A. **1-4-1935** b. 1-4-1947 c. 15-7-1947 d. 1-1-1949
2. The central office of the Reserve Bank of India is located in
a. **Mumbai** b. New Delhi c. Calcutta d. Chennai
3. The Reserve Bank of India was nationalised on
a. **1-1-1949** b. 1-4-1949 c. 1-4-1950 d. 1-1-1935
4. The number of quantitative credit control method is
a. **3** b. 7 c. 8. d. 9
5. Bank rate policy tries to control the volume of credit in the country through changes in the
A. **Bank rate** b. rate of interest c. cash reserve ratio d. Statutory liquidity ratio
6. During the period of Inflation, the bank rate is ----- by the central bank.
a. **Raised** b. lowered c. kept unaltered d. diminished at an increasing rate
7. During the period of deflation, the bank rate is -----by the central bank.
A . **Raised** b. **lowered** c. kept unaltered d. diminished at an increasing rate
8. During period of inflation, the central bank -----first class bills and securities in the money market.
a. **Sells** b. buys c. sells and buys d. keeps unaltered
9. During the period of deflation, the central bank -----first class bills and securities in the money market.
a. **Buys** b. sells c. lowers d. keeps unaltered
10. During the periods of deflation , the central bank -----the cash reserve ratio
a. **Lowers** b. raises c. keeps unaltered d. first raises and then lowers

UNIT-III

SECTION A

- 1..Inflation refers to a general
a) rise in the price level b) fall in the price level c) rise in the value of money d) rise in the purchasing power of money
2. " Too much money chasing too few goods". This definition of inflation was given by
a) Dalton and Coulbour b) Hansen c) Crowther d)J.M.Keynes
3. Inflation that arises due to deficit financing is known as-----
a) deficit induced inflation b) currency inflation c) gold inflation d)cost push inflation
4. When savings during a war period comes into circulation,the inflation is known as
a) latent inflation b) suppressed inflation c) creeping inflation d) running inflation
5. Deflation refers to a general

- a) fall in price level b) fall in the value of money c) fall in the purchasing power of money
d) rise in price level

1. Which of the following concepts is the opposite of inflation?

- a. **Deflation** b. Stagflation c. Recession d. None of the above

2. A government resorts to _____ to reduce inflation.

- a. **Cuts in government spending** b. Increase in government expenditure

c. Reduction in repo rate d. None of the above

3. When the price levels of goods and services are falling continuously, this phenomenon is called _____.

- a. **Deflation** b. Stagflation c. Inflation d. None of the above

4. If too much money is chasing too few goods, the resulting inflation is known as _____.

- a. Stagflation b. Cost-push inflation c. **Demand-pull inflation** d. None of the above

10. _____ is an effective method to control inflation in the economy.

- b. **Cash reserve ratio** b. Selective control of credit c. Bank rate policy

d. None of the above

UNIT-IV

SECTION A

1. A system of government in which power is divided between a central authority and various constituent unit of the country is called

- a. **Federalism** (b) Communal-ism (c) Socialism (d) Democracy

2. Major step towards decentralisation in India was taken up in

- (a) **1992** (b) 1993 (c) 1991 (d) 1990

3. When power is taken away from state governments and is given to local government, it is called

- a. **Decentralisation** (b) Centralisation (c) Panchayat Samiti (d) Federalism

4. The number of seats reserved for women in the panchayats and municipalities is

- (a) one-fourth (b) **one-third** (c) half (d) one-fifth

5. In India's federal system, the state governments have the power to legislate on all those subjects which are included in the:

- (a) Union list (b) **State list** (c) Concurrent list (d) Residuary subjects

6. The system of Panchayati Raj involves:

- (a) Village, State and Union levels (b) Village, District and State levels (c) Village and State levels (d) **Village, Block and District levels**
7. Financial distribution between the union and state takes place on the basis of the recommendation of which of the following?
- a) National Development Council b) Inter state council c) Planning Commission d) **Finance Commission**
8. The recommendation of Sarkaria Commission relates to
- a) Distribution of revenue b) duties of centre c) Panchayati Raj d) Centre- state relations
9. By which of the following amendment act of constitution Panchayati Raj system got its constitutional status
- a) 71st amendment act b) 72nd amendment act c) **73rd amendment act** d) 74th amendment act
10. Which of the following constitutional amendment gave a constitutional status to urban bodies
- a) 71st amendment act b) 72nd amendment act c) 73rd amendment act d) **74th amendment act**

UNIT-V

SECTION A

1. International trade can be regarded as a special case of inter regional trade who said it
- a. Kindleberger b) J.S. Mill c) Ricardo d) **Batell Ohlin**
2. International immobility of factors of production results into
- a. regional differences b. different monetary systems c. **costs and price variations** d. different legal systems
3. By pushing forward the scope of territorial division of labour and international trade contributes directly towards
- a. improvement in the process of production b. increase in the flow of foreign capital c. **more efficient employment of the productive forces of the world** d. protection of economic interests of trading countries
4. The basis of trade between countries lies in the
- a) Difference in monetary standard b) Difference in political system
- c) **Difference in resource endowment** d) None of the above
5. One similarity between international trade and inter-regional trade is that in general both must overcome
- a) The difference in language b) Tariffs c) **Distance or space** d) The difference in currencies

6. The basis of trade between countries lies in the

- a) The difference in factor endowment b) The difference in money standard c) Difference in political system **d) All of the above**

7. Trade among different regions within the same country is known as

- a) International trade **b) Interregional trade** c) Bilateral trade d) Trilateral trade

8. The main objective of international trade is

- a) To maximize production** b) To remove political bondage c) To establish world bank d) To remove poverty

9. Nations conduct international trade because:

- (a) Some nations prefer to produce one thing while others produce other things. **(b) Resources are not equally distributed among all trading nations.** (c) Trade enhances opportunities to accumulate profits. (d) Interest rates are not identical in all trading nations

10. Which of the following is not a benefit of international trade?

- (a) High wage levels for all domestic workers** (b) Lower domestic prices
(c) Development of more efficient methods and new products. (d) A greater range of consumption choices.

Balance of Payments is an accounting statement that records monetary transactions between _____.

a) Residents of a nation and the rest of the world b) Non-residents and the rest of the world

c) Residents of a nation and non-residents d) None of the above

The components of a Balance of Payment account are _____.

a) Capital Account b) Current Account **c) Both a and b** d) None of the above

13. When did the World Trade Organisation come into effect?

(a) March 6, 1996 (b) April 8, 1994 (c) February 5, 1994 (d) **January 1, 1995**

14. Which among these is the headquarter of the WTO

(a) Austria (b) Geneva (c) New York (d) Washington DC

15. What is the main role of the IMF?

- a) To ensure a stable exchange rate regime and provide emergency assistance to countries facing crises in balance of payments. b) To be a forum for trade and liberalization.
c) To assist countries in development. d) To facilitate private investment around the world.

UNIT-I

SECTION B

1. Define public revenue
2. What is public finance?
3. Write a short note on the importance of public finance
4. Write a short note on the public expenditure
5. What is budget?
6. Define Customs duty
7. Define Tax
8. Mention non tax revenue
9. Mention any three features of tax

UNIT-II

SECTION B

1. Define statutory liquidity ratio (SLR). .
2. Define Cash Reserve Ratio
3. What are open market operations?
4. What is margin requirement?
5. What do you mean as Banker's Bank?
6. Define 'bank rate'.

UNIT-III

SECTION B

1. Define Inflation
2. Define Deflation
3. Write a short note on cost push inflation
4. Write a short note on credit inflation
5. What is Currency Inflation?
6. What do you mean by running inflation?
7. Define Latent inflation
8. Define creeping inflation
9. Define demand –pull inflation

10. Define hyper inflation

UNIT-IV

SECTION B

1. Define Finance commission
2. Write a short note on sarkaria commission
3. Define Federalism
4. Write a short note on Panchayati Raj system
5. Define the term amendment
6. Describe 73rd amendment act
7. Write a short note on 74th amendment act
8. What is decentralisation of power
9. What is state list
10. What is union list

UNIT-V

SECTION B

1. Define trade
2. What is external trade
3. What is internal trade
4. Define free trade
5. Mention any three advantages of free trade
6. Mention any three disadvantages of free trade
7. Mention any three importance of WTO
8. Mention the main aim of IMF
9. Define balance of payment
10. Define balance of trade

UNIT-I

SECTION C

1. Mention some of the features of recent Union Budget?
2. Explain the importance of Union Budget
3. Describe the importance of Public Expenditure?
4. Discuss the meaning and importance of Public Finance
5. Discuss the sources of public revenue
6. Describe the causes for the recent growth of Public expenditure

UNIT-II

SECTION C

5. Mention the functions of Reserve Bank of India.
6. Explain the origin of Reserve Bank of India
7. Outline the features of monetary policy?
8. Discuss the quantitative credit control measures of central bank
9. Discuss the qualitative credit control measures of central bank

UNIT-III

SECTION C

1. Mention the causes of Inflation in India.
2. Explain the effect of Inflation
3. Discuss the effect of Deflation
4. Explain how inflationary tendencies can be contained in the economy through bank rate policy
5. Explain how inflationary tendencies can be contained in the economy through open market operations
6. Explain how inflationary tendencies can be contained in the economy through variable cash reserve ratio
7. Explain how inflation can be controlled through fiscal policy

UNIT-IV

SECTION C

1. Describe the financial relationship between Centre and State
2. Explain Panchayati Raj System
3. Outline the importance of Panchayati Raj System
4. Discuss 73rd Amendment Act
5. Discuss 74th Amendment Act

UNIT-V

SECTION C

1. Describe International trade or external trade
2. Explain the benefits of International Trade
3. Discuss the salient features of Internal trade
4. Discuss trade and its advantages
5. Discuss the difference between balance of payment and balance of trade
6. Discuss the structure of balance of payment

UNIT-I

SECTION D

1. Explain Public Revenue and various sources of public revenue?
2. Explain Public Expenditure and the causes for the recent growth of Public Expenditure?
3. Outline the scope of public finance
4. Explain public revenue and public expenditure

UNIT-II

SECTION D

1. Explain the monetary policy of Reserve Bank of India
2. Explain the credit control measures of Reserve Bank of India
3. Describe the relationship between Reserve Bank of India and Commercial Bank
4. Explain the origin and functions of RBI?

UNIT-III

SECTION D

1. Explain the measures to control Inflation
2. Discuss the types of Inflation
3. Explain the causes for inflation and its effect on the various sectors?
4. Explain the features of deflation and the effect of deflation

UNIT-IV

SECTION D

1. Explain the Panchayat Raj System and its Importance
2. Explain the decentralization of power between centre and states.
3. Explain 73rd and 74th Amendment Act
4. Discuss the Panchayati Raj system and describe its importance

UNIT-V

SECTION D

1. Distinguish between Internal Trade and External Trade?
2. What do you understand by balance of payments and explain its components?
3. Explain the functions of WTO
4. Mention the functions of IMF
5. Distinguish between WTO and IMF

SYLLABUS
SEMESTER V

Core-X – INTERNATIONAL ECONOMICS Course Code:21UECC53

UNIT-I: Concept of International Trade and Classical Theories

Nature of International Trade – Internal and International Trade – Classical theory of International trade: Adam Smith's Absolute Advantage Theory – Ricardo's Comparative Cost Theory– Mill's Theory of Reciprocal Demand.

UNIT-II: Modern Version of Theories of International Trade:

Haberler's Opportunity Cost Theory–Heckscher–Ohlin Theory of Factor Endowment – Marshall-Edgeworth Offer Curves – Gains from international trade – The Terms of Trade: Concepts and Measurement.

UNIT-III: Exchange Rate Control:

Exchange Rate: Definition – Types of Exchange Rate: Fixed Vs Flexible Exchange Rate – Theories of Foreign Exchange Rate: The Mint-Parity Theory–The Purchasing Power Parity Theory–Balance of payment Theory.

UNIT-IV: Balance of Trade and Balance of Payments:

Balance of Trade – Balance of Payments – Current Account - Capital Account –Visible and Invisible – Causes for Disequilibrium in Balance of Payments – Methods of correcting the disequilibrium – Devaluation of Currency–Convertibility of Currency: Partial Account and Full Account

UNIT-V: International Economic Institutions:

Free Trade vs Protection – Tariffs – Quotas – International Economic Institutions: IMF, IBRD, WTO & UNCTAD – Trade blocs: EU, OPEC, SAARC, ASEAN, BRICS, STEC and RCEP.

Text Book: Devairakkam. *International Economics*, Tirunelveli, D.S.R.Publications. Third Edition, 2001

QUESTION BANK

CORE - INTERNATIONAL ECONOMICS Sub. Code: 21UECC53

III B.A. ECONOMICS - SEMESTER V

Section – A (1 Mark)

Choose the correct answer:

UNIT – I : Concept of International Trade and Classical Theories:

1. International trade contributes and increases the world _____.
a) Population b) Inflation c) **Economy** d) Trade Barriers
2. Trade between two or more than two countries is known as _____.
a) Internal Business b) External Trade c) **International Trade** d) Unilateral Trade
3. Internal and international trade differs in terms of _____.
a) Geographical and climatic conditions b) Mobility of factors of production
c) Factor endowment d) **All of these**
4. _____ refers to the tax imposed on imports.
a) Imported Tax b) **Tariffs** c) Subsidies d) Import Quotas
5. _____ happens when Exports are more than imports.
a) Trade barrier b) Trade deficit c) **Trade surplus** d) Trade contract
6. Theory of absolute advantage is propagated by _____.
a) Philip Kotler b) **Adam Smith** c) Peter Drucker d) David Ricardo
7. Theory of comparative advantage was given by _____.
a) Philip Kotler b) Adam Smith c) Peter Drucker d) **David Ricardo**
8. International trade is based on the idea that:
a. Exports should exceed imports
b. Imports should exceed exports
c. Resources are more mobile internationally than are goods
d. **Resources are less mobile internationally than are goods**
9. According to Ricardo, international trade is useful under _____.
a) Absolute cost b) **comparative cost** c) equal difference in cost d) Zero cost

10. International trade is based on the idea that: a) Exports should exceed imports
b) Imports should exceed exports c) Resources are more mobile internationally than are goods
d) Resources are less mobile internationally than are goods
11. Ricardian theory assumes perfect mobility of labour _____
a) Within the country b) between the countries
c) both within and between the countries d) none of these
12. A reciprocal demand is _____
a) Mutual demand of two countries to each other's good b) Mutual supply
c) Price of export and import d) Derived demand
13. _____ refers to purchase of goods from a foreign country.
a) Foreign Trade b) Export Trade **c) Import Trade** d) EXIM Trade
14. Labour is the only factor of production according to the _____ theory of international trade.
a) Classical theory b) Modern theory c) None of these d) All of these
15. Trade between two countries can be useful if cost ratios of goods are:
a) Undetermined b) Decreasing c) Equal **d) Different**
16. Which of the following is international trade? **a) Trade between countries**
b) Trade between regions c) Trade between provinces d) Both (b) and (c)
17. International trade is based on the idea that: a) Exports should exceed imports
b) Imports should exceed exports c) Resources are more mobile internationally than are goods
d) Resources are less mobile internationally than are goods

UNIT – II: Modern Version of Theories of International Trade:

1. _____ suggests that each country should specialize in producing only those goods which it can produce efficiently. **a) Theory of mercantilism b) Theory of absolute advantage**
c) Product Life Cycle Theory d) Heckscher Ohlin Theory
2. Money cost is considered by **a. Modern theory of trade** b. Comparative cost advantage
c. New Trade theory d. Factor equalization theorem
3. Factor abundance is considered to be part of international trade
a) Heckscher Ohlin theory of international trade b) Comparative cost advantage theory
c) New Trade theory d) Factor Equalization theorem
4. The first classical theory of International Trade is given by.....
a) Keynes **b) Adam Smith** c) Friedman d) Heckscher-Ohlin

5. In classical theory of International Trade, the exchange of goods and services takes on the basis of system?
a) Barter b) Money c) Labour d) capital
6. If capital is available in large proportion and labour is less, then the economy is known as
a) Capital Intensive b) Labour Intensive c) **Technology** Intensive d) Both a. and b.
7. In Heckscher-Ohlin theory, what is assumed to be same across the countries?
 a) Transportation cost **b) Technology** c) Labour d) Capital
8. Factor endowment theory is also known as-----
a) Heckscher-Ohlin Theory b) Limit pricing theory
 c) Labour theory of value d) Opportunity cost theory
9. Factor proportion theory is also known as the-----
 a) Comparative advantage theory. b) laissez faire theorem.
c) Heckscher-Ohlin theorem d) product cycle model
10. According to Heckscher and Ohlin, basic cause of international trade is:
a) Difference in factor endowments b) Difference in markets
 c) Difference in political systems d) Difference in ideology
11. An offer curve differs from _____.
 a) usual demand curve b) usual supply curve
c) usual demand and supply curves d) none of the above
12. The concept of gross barter terms of trade was introduced by _____.
a) Frank Taussig b) Alfred Marshall c) Francis Edgeworth d) John S. Mill
13. The concept of income terms of trade was introduced by _____.
 a) Frank W. Taussig **b) Graeme S. Dorrance** c) David Ricardo d) Francis Edgeworth
14. The concept of offer curves was introduced by _____.
 a) Frank W. Taussig and John S. Mill b) Adam Smith and David Ricardo
 c) John S. Mill and John M. Keynes **d) A. Marshall and F. Edgeworth**
15. Utility terms of trade was introduced by _____.
a) Jacob Viner b) Adam Smith c) J. S. Mill d) Frank Taussig

UNIT-III: Exchange Rate Control:

1. Flexible exchange rate system creates _____.
 a) Confidence **b) Uncertainty** c) Full employment d) Unemployment

2. PPP Theory considers that goods in different countries are _____.
a) Identical b) differential c) superior d) non of the above
3. PPP Theory ignores capital flows on account of _____.
 a) trade account b) current account **c) capital account** d) none of the above
4. There is a _____ relationship between demand for foreign currency and the exchange rate.
 a) positive b) direct c) straight **d) inverse**
5. There is a _____ relationship between supply of foreign currency and the exchange rate.
a) direct b) inverse c) negative d) indirect
6. Under managed float, the central bank of a nation intervenes to _____ foreign currency.
 a) only purchase b) only sale **c)) purchase and sell** d) none of the above
7. Under flexible exchange rate system, the exchange rate is determined by _____.
 a) central bank **b) market forces** c) commercial banks d) none of the above
8. Under IMF, the exchange rate system was _____.
 a) currency board system **b) gold standard** c) dollarization d) none of the above
9. Flexible exchange rate system is also known as
 a) Pegging exchange rate system **b) Floating exchange rate system**
 c) Dirty floating d) Both (b) and (c)
10. Managed floating is also known as
 a) Pegging exchange rate system b) Floating exchange rate system
c) Dirty floating d) All of the above
11. Mint Parity Theory is suitable for _____.
a) Gold Standard b) Paper Standard c) Flexible System d) None of these
12. Purchasing Power Parity theory is related with _____.
 a) Interest rate b) Bank rate c) Wage rate **d) Exchange rate**
13. Devaluation takes place under which system?
a) Fixed exchange rate system b) Flexible exchange rate system
 c) Managed floating exchange rate system d) None of the above

UNIT-IV: Balance of Trade and Balance of Payments:

1. The official reserve asset account forms a part of capital account in all the countries except
a) U.K. & U. S. A. b) U. K. & Japan c) U.S.A. & Japan d) U.S.A. & U.S.S.R.

2. Balance of payment includes-----
- a) Invisible items b) **both visible and invisible items** c) visible items d) all the above
3. The major cause of deficits in balance of payments in India has been
- a) Heavy external assistance b) **Trade deficits**
c) Heavy drawings from the IMF d) All of the above.
4. BOP includes _____.
- a) Current account b) Capital Account c) Official Reserve account d) **All the above**
5. If debit balance in the balance of payment accounts is greater than the credit balance it leads to _____.
- a) balance of payments surplus b) **balance of payment deficit**
c) chronic disequilibrium in balance of payment d) equilibrium in balance of payment
6. BOP stands for _____.
- a) Bank of Payments b) Barrier of Payments c) Bill of Payments d) **Balance of Payments**
7. The _____ is composed of capital account and current account.
- a) Bill of credit b) Barrier of Payments c) **Balance of Payments** d) Bill of Payments
8. The double entry accounting system is: a) An accounting system that is useful for small business b) An accounting system involving all the interested parties of accounting information c) An accounting system in which transactions are recorded from a single aspect
d) **An accounting system in which business transactions are recorded from dual aspects**
9. Devaluation of Currency is done so as to _____.
- a) Encourage the imports b) **Encourage the exports**
c) Encourage both exports & imports d) Discourage both the exports & imports
10. The decrease in the value of domestic currency in relation to foreign currency due to fluctuations in the foreign exchange rate is
- a) Devaluation b) Appreciation c) **Depreciation** d) None of the above
11. The increase in the value of domestic currency in relation to foreign currency due to fluctuations in foreign exchange rate is called
- a) Depreciation b) Devaluation c) **Appreciation** d) Revaluation
12. The decrease in the value of foreign exchange rate which is done intentionally by the Government is called
- a) **Devaluation** b) Appreciation c) Depreciation d) Revaluation

UNIT-V: International Economic Institutions:

1. IBRD stands for _____.
 - a) International Board for Research and Development
 - b) International Bank for Reconstruction and Development**
 - c) International Bank for Research Development
 - d) International Barrier For Reconstruction and Development
2. IBRD also known as _____.
 - a) World Bank**
 - b) Exim Bank
 - c) International Monetary fund
 - d) International Bank
3. The full form of UNCTAD is _____.
 - a) United Nations Conference on Tariff and Duties
 - b) United Nations Committee on Trade and Development
 - c) United Nations Conference on Trade and Development**
 - d) United Nations Council on Tariff and Development
4. The abbreviation SAARC stands for _____.
 - a) South American Association for Regional Cooperation
 - b) South African Association for Regional Cooperation
 - c) South ASEAN Association for Regional Cooperation
 - d) South Asian Association for Regional Cooperation**
5. _____ was replaced by WTO on January 1, 1995.
 - a) NAFTA
 - b) GATT**
 - c) IMF
 - d) IRDB
6. ASEAN stands for _____.
 - a) The Association of Southeast American Nations
 - b) The Agreement of Southeast American Nations
 - c) The Agreement of Southeast Asian Nations
 - d) The Association of Southeast Asian Nations**
7. Which of the following lends long term loans?
 - a) I.M.F
 - b) I.B.R.D**
 - c) Central Bank
 - d) Commercial Banks
8. The IMF started its functioning in the year
 - a) 1948**
 - b) 1944
 - c) 1952
 - d) 1947
9. The structure of World Bank is
 - Two-tier**
 - b) Three-tier
 - c) Four-tier
 - d) Single tier
10. The World Bank was established in the year
 - a) 1925
 - b) 1935
 - c) 1945**
 - d) 1955

Section – B (2 Marks)

Answer the following questions in about 50 words each:

UNIT – I : Concept of International Trade and Classical Theories:

1. Define international trade.

2. Explain internal trade.
3. Write a note on trade.
4. Write a note on dumping.
5. Write a short note on classical theory.
6. Explain international trade.
7. Define comparative cost theory.
8. Explain the factor-price equalization theory.
9. Explain the term free trade.
10. Write a note on laissez faire policy.

UNIT – II: Modern Version of Theories of International Trade:

1. Explain classical theory.
2. Write a note on comparative cost theory.
3. Explain the factor-price equalization theory.
4. Write a note on potential gain.
5. Write a note on terms of trade.
6. Explain the assumption of factor-price equalization theory.
7. Write a short note of classical theory.
8. Define the actual gain.
9. Explain the offer curves.
10. Explain income terms of trade.

UNIT-III: Exchange Rate Control:

1. Write a note on exchange rate.
2. Define fixed exchange rate.
3. Explain flexible exchange rate.
4. Write a note on floating exchange rate.
5. Write a note on purchasing power parity theory.
6. Explain balance of payment.
7. Define flexible exchange rate.
8. Write a note on balance of payment.
9. Define exchange rate.
10. Explain floating exchange rate.

UNIT-IV:Balanceof TradeandBalanceofPayments:

1. Write a short note on balance of trade.
2. Define balance of payment.
3. Define current account.
4. Explain capital account.
5. Write a short note on currency convertible.
6. Explain partial account.
7. Define full account.
8. Write a short note on official reserves assets account.
9. Explain the partial convertibility Currency.
10. Define full convertibility of currency.

UNIT-V:InternationalEconomicInstitutions:

1. Define free trade.
2. Write a short note on protection.
3. Define tariff.
4. Explain the term quotas.
5. DefineIMF.
6. Write a note onWorld Bank.
7. Explain the term 'IMF'.
8. Write a note onIBRD.
9. Explain the term 'UNCTAD'.
10. Write a short note on ASEAN.
11. Explain the term 'SAARC'.
12. DefineBRICS.
13. Write a short note onRCEP.[K₁

Section -C (5 Marks)

Answer the following questions in about 200 words each:

UNIT – I : Concept of International Trade and Classical Theories:

1. Distinguishbetweeninternalandinternationaltrade.

2. Explain the advantages of international trade.
3. Show the disadvantages of international trade.
4. Examine the nature of international trade.
5. Explain the importance of international trade.
6. Examine the absolute differences in costs.
7. Show the advantages of international trade.
8. Examine the importance of international trade.
9. Critically examine the classical Theory.
10. Show the advantages of classical theory.

UNIT – II: Modern Version of Theories of International Trade:

1. Examine the types of terms of trade.
2. Critically examine the Haberler's Opportunity Cost Theory.
3. Explain the Heckscher–Ohlin Theory of Factor Endowment.
4. Analyse the Marshall-Edgeworth Offer Curves.
5. Analyse the types of terms of trade.
6. Explain the measurement of terms of trade.
7. Analyse the gains from international trade.
8. Explain the Haberler's Opportunity Cost Theory.
9. Forecast Marshall-Edgeworth Offer Curves.
10. Analyse the Haberler's Opportunity Cost Theory.

UNIT-III: Exchange Rate Control:

1. Classify the causes for the fluctuations in the rate of exchange.
2. Explain the advantages of fixed exchange rate.
3. Show the disadvantages of fixed exchange rate.
4. Explain the merits of fixed exchange rate.
5. Analyse the causes for the fluctuations in the rate of exchange.
6. Explain the balance of payment theory of exchange.
7. Forecast the demerits of fixed exchange rate.
8. Examine the merits of flexible exchange rate.
9. Analyse the demerits of flexible exchange rate.

10. Explain the balance of payment theory of exchange.

UNIT-IV: Balance of Trade and Balance of Payments:

1. Distinguish between balance of trade and balance of payments.
2. Explain the structure of balance of payments.
3. Examine the types of balance of payments.
4. Forecast the types of balance of trade.
5. Examine the methods of correcting disequilibrium in the balance of payments.
6. Analyse the causes for adverse balance of payments.
7. Analyse the double entry book keeping system.
8. Explain the convertibility of currency.
9. Analyse the types of balance of trade.
10. Examine the structure of balance of payments.

UNIT-V: International Economic Institutions:

1. Explain free trade.
2. Analyse the advantages of protection.
3. Examine the objectives of IBRD.
4. Analyse the functions of IMF.
5. Forecast the functions of World Bank.
6. Explain the structure of World Bank.
7. Analyse the recent status of SAARC.
8. Explain the aims of UNCTAD.
9. Examine the history of OPEC.
10. Analyse the purpose of ASEAN.
11. Examine the functions and pillars of BRICS.

Section -D (10 Marks)

Answer the following questions in about 400 words each:

UNIT – I : Concept of International Trade and Classical Theories:

1. Evaluate the differences between internal and international trade.
2. Combine the importance of international trade.
3. Estimate the classical theory of international trade.
4. Evaluate Adam Smith's absolute advantage theory of international trade.

5. Evaluate Ricardo's Comparative Cost Theory of international trade.
6. Critically evaluate the Mill's theory of international trade.
7. Combine the Classical theory of International Trade.
8. Evaluate the Ricardo's Comparative Cost Theory of international trade.
9. Develop the Mill's theory of international trade.
10. Evaluate the importance of international trade.

UNIT – II: Modern Version of Theories of International Trade:

1. Evaluate the types of terms of trade.
2. Critically evaluate the Haberler's Opportunity Cost Theory.
3. Estimate the Heckscher–Ohlin Theory of Factor Endowment.
4. Formulate the gains from international trade.
5. Develop the Haberler's Opportunity Cost Theory.
6. Estimate Marshall-Edgeworth Offer Curves.
7. Combine the Haberler's Opportunity Cost Theory.

UNIT-III: Exchange Rate Control:

1. Critically evaluate the causes for the fluctuations in the rate of exchange.
2. Combine the advantages and disadvantages of fixed exchange rate.
3. Analyse the merits and demerits of fixed exchange rate.
4. Analyse the causes for the fluctuations in the rate of exchange.
5. Examine the merits and demerits of flexible exchange rate.
6. Formulate the balance of payment theory of exchange.
7. Analyse the Purchasing Power Parity Theory.
8. Critically evaluate the Mint-Parity Theory.

UNIT-IV: Balance of Trade and Balance of Payments:

1. Combine the methods of correcting disequilibrium in the balance of payments.
2. Distinguish between balance of trade and balance of payments.
3. Formulate the structure of balance of payments.

4. Analyse the causes of disequilibrium in the balance of payments.
5. Analyse the methods of correcting disequilibrium.
6. Examine the convertibility of currency.
7. Analyse the methods of correcting disequilibrium in the balance of payments.

UNIT-V: International Economic Institutions:

1. Analyse advantages and disadvantages of free trade.
2. Analyse the advantages of protection.
3. Formulate the structure of IBRD.
4. Analyse the objectives and functions of IMF.
5. Evaluate the recent status of SAARC.
6. Analyse the structure of World Bank.
7. Evaluate the functions of UNCTAD.
8. Estimate the history of OPEC.
9. Formulate the functions of ASEAN.
10. Examine the structure and functions of BRICS.

Semester V
Core – XI (Common Core) Human Resource Management - Code: 21UMCC51

Unit-I: Introduction

Human Resource Management: Meaning - Objectives - Nature and Scope - Importance – Functions - and Problems of HRM - Personnel Management Vs. HRM - Qualities and Qualifications of Human Resource Managers.

Unit-II: Human Resource Planning, Recruitment and Selection

Human Resource Planning: Meaning - Need and Importance - Objective - Problems - Process – Recruitment: Meaning - Factors Influencing Recruitment - Sources of Recruitment - Problems in Recruitment – Selection: Meaning - Factors Affecting Selection Decisions - Selection Policy - Steps in Selection.

Unit-III: Training and Development

Training: Need and Importance - Objective - Types - Steps in Training Programme – Methods of Training - Evaluation of Training Programmes – Development: Meaning - Concept and Essentials of Management Development Programmes.

Unit-IV: Transfer, Promotion & Compensation

Transfer: Objective - Transfer Policy - Promotion: Purpose - Promotion Policy – Demotion - Compensation: Objective – Principles.

Unit-V: Performance Appraisal

Performance Appraisal: Meaning - Need and Importance - Objective - Problems in Performance Appraisal - Factors Influencing Performance Appraisal – Methods of Performance Appraisal.

Text Book: Chitra, Atmaram, Naik, Human Resource Management, Ane Books Pvt., 2016.

a) Placement Agencies b) Campus interviews c) Walk in interviews **d) Retired Employees**

5. _____ is also called as a screening interview. a) Screening Applications

b) Employment Tests **c) Preliminary Interview** d) Employment Interview

6. Campus interview comes under the _____ sources of recruitment.

a) Internal b) Traditional **c) Modern** d) None

7. Receiving applications is the _____ step in selection process.

- a) first **b) second** c) third d) Fourth
8. Which of the external factor affecting recruitment?
a) **Supply and Demand** b) Size of the firm c) Cost d) Growth and expansion of the firm
9. _____ factor affecting the outcomes of selection.
a) finance b) money c) management **d) geographical location of the candidate**
- 10) Which one of the following factor affects the recruitment policy?
a) good training **b) need of the organisation** c) no. of workers d) leisure time

Unit- III

1. Upgrading promotion is other called _____ promotion.
a) Dry b) Vertical **c) Horizontal** d) Ordinary
2. The cooperative training type in which the job training is combined with instructions from college classes is classified as
a) **Internships** b) Apprenticeship c) Distance training d) School – to work transition
3. _____ training is the act of introducing a new employee to other employees.
a) Craft **b) Induction** c) Role playing d) Learner
4. Which of the following helps in controlling and correcting the training programme?
a) Seniority b) Profit c) Employee satisfaction **d) Evaluation**
5. Which of the following is a benefit of employee training?
a) Elimination of fits **b) Remove fear of the employees'**
c) Provides a good climate for learning, growth and co-ordination d) High supervision
6. The cooperative training type in which the job training is combined with instructions from college classes is classified as
a) **internships** b) apprentice training c) school-to-work transition d) distance training
7. _____ can involve the changing of skills, knowledge, attitudes or behaviour.
a) Supervision b) Manager **c) Training** d) Selection
- 8) Training reduces the _____ time.
a) Teaching **b) learning** c) working d) None
- 9) _____ training is also known as orientation.
a) Job b) craft c) Deduction **d) Induction**
- 10) _____ type of training is given to the workers in handling of machines, equipments and materials.

a) **Job** b) Refresher b) craft c) Promotion

11) Apprenticeship type of method followed in _____ training.

a) Induction b) Refresher **c) Craft** d) Deduction

12) Which of these is an off - the - job training method?

a) Lecture method b) Job rotation c) Orientation training d) Coaching

Unit- IV

1. Under this type of promotion, the employee is concerned promotions with in grade.

a) Vertical **b) Upgrading** c) Dry d) Downgrading

2. Which one of the following is comes under the causes of demotion? **a) Wrong**

promotion b) higher performance c) Good communication d) Familiar to technology

3. _____ is defined as downgrading an employee by reducing his salary decrease his responsibility and authority and status.

a) Transfer b) Promotion **c) Demotion** d) None of these

a) Price b) Quality **c) Customer** d) Producer
- 11) _____ is to identify the strength and weaknesses of employees to place right men on right job. a) Recruitment **b) Performance Appraisal** c) Selection d) Feedback

- 12) The Performance Appraisal BARS stand for
a) Behavioral Attitude Ranking System b) **Behavioral Anchored Rating Scales**
c) Behavioral Aptitude Rating System d) Behavioral Aptitude Ranking System
- 13) Which performance appraisal system first developed by US General Electric Company?
a) Essay b) Critical incidents c) **360 degree appraisal** d) Forced choice
- 14) J.P.Guilford developed the method of_____.
a) **Forced- choice** b) Personal biases c) Stereo typing d) Ranking
- 15) Traditional method of performance appraisal does not include
a) Checklist b) Graphic Scale c) Field review d) **Cost accounting**

Section B

Answer the questions in about 50 words each:

Unit -I

1. What is Human Resource Management?
2. What do you mean by personal management?
3. What do you mean by operative functions?
4. What is human resource audit?
5. Mention the nature of HRM.
6. Define Human Resource Management.
7. What is pervasive force?
8. Mention the importance of HRM.
9. What do you mean by human resource accounting?
10. What is human resource audit?

Unit -II

1. What is selection?
2. What is human resource planning?
3. Define human resource planning.
4. Mention the importance of human resource planning.
5. What is Recruitment?

6. What are the internal factors affecting recruitment?
7. What do you mean by recruitment policy?
8. Mention the features of human resource planning.
9. What is selection process?
10. Define selection.

Unit -III

1. What is training?
2. What is job training?
3. Define training.
4. Mention the on- the job training method.
5. What do you mean by induction training?
6. What is craft training?
7. What is refresher training?
8. What is vestibule training?
9. What do you mean by apprenticeship training?
10. What is lecture method?

Unit -IV

1. What do you mean by promotion?
2. What is demotion?
3. Mention the types of promotion.
4. What is vertical promotion?
5. What is upgradation promotion?
6. What do you mean by dry promotion?
7. What is productive transfer?
8. What is replacement transfer?
9. What is versatility transfer?
10. What is remedial transfer?
11. What is promotion?
12. What is demotion?

Unit -V

1. What is performance appraisal?

2. Define performance appraisal.
3. What is similarity error?
4. What do you mean by Halo effect?
5. What is recency effect?
6. Mention the traditional method of performance appraisal.
7. Define merit rating.
8. What do you mean by paired comparison system?
9. What is grading method?
10. What is check list method?
11. What do you mean by BARS?
12. What is 360 – degree appraisal?

Section C

Answer the questions in about 100 words each:

Unit -I

1. Explain the nature of human resource management.
2. Enumerate the importance of human resource management.
3. Differentiate personal management and human resource management.
4. Describe the scope of human resource management.
5. Explain the managerial functions of HRM.
6. What are the problems involved in HRM?
7. Explain the qualities of HR manager.
8. Explain the scope of human resource management.
9. Elucidate the importance of HRM.
10. Enumerate the nature of HRM.

Unit -II

1. Explain the objectives of human resource planning.
2. What are the factors affecting selection process?
3. Explain the importance of Human Resource Planning.
4. What are the objectives of human resource planning?
5. What are the problems involves in the process of HRP?
6. Elucidate the selection Process.

7. Explain the process of human resource planning.
8. Enumerate the factors affecting the outcomes of selection.
9. Explain the objectives of HRP.
10. Factors affecting selection process- Discuss.

Unit -III

1. Explain the types of training.
2. How will you evaluate a training programme?
3. Elucidate the objectives of training.
4. Enumerate the importance of training.
5. Explain the types of training.
6. Enumerate the On- The – Job training.
7. Elucidate the Off- The – Job training.
8. Analyse the evaluation of training programme.
9. Explain the importance of human resource training.
10. Explain the objectives of human resource training.

Unit -IV

1. Explain the objectives of transfer.
2. What is promotion? Explain its types.
3. Explain the objectives of promotion.
4. Enumerate the reasons of transfer.
5. Compare the transfer and promotion.
6. Explain the types of transfer.
7. Enumerate the sound promotion policy.
8. Elucidate the sound transfer policy.
9. Explain the different types of promotion.
10. What is demotion? Analyse the causes of demotion.

Unit -V

1. Enumerate the objectives of performance appraisal.
2. Explain the importance of performance appraisal.
3. Enumerate the limitations of performance appraisal.
4. Analyse the problems of performance appraisal.

5. Evaluate the factors influencing performance appraisal.
6. Explain the objectives of performance appraisal.
7. List out the limitations of performance appraisal.
8. Elucidate the importance of performance appraisal.

Section D

Answer the questions in about 400 words each:

Unit -I

1. Analyse the functions of human resource management?
2. Enumerate the objectives of management.
3. Briefly explain the importance of HRM.
4. Explain the managerial and operative functions of HRM.
5. Explain the qualities of HR manager.
6. Elucidate the objectives of human resource management.
7. Differentiate personal management from human resource management.
8. Explain the importance of human resource management.

Unit -II

1. Enumerate the sources of recruitment.
2. Analyse the importance and objectives of human resource planning.
3. Enumerate the problems involved in the process of human resource planning in HRM.
4. Enumerate the factors influencing recruitment.
5. Discuss the steps of selection process.
6. Explain the various steps in selection process.
7. Analyse the influencing factors of recruitment.
8. Elucidate the sources of recruitment.
9. Briefly analyse the internal and external sources of recruitment.
10. Explain the various steps involved in selection.

Unit -III

1. Describe various methods of training.
2. Enumerate the objectives and importance of training.
3. Analyse the steps in training programme.

4. Explain the essentials of training programme.
5. Analyse the various methods of training.
6. Briefly analyse the essentials of Management Development Programme.
7. Enumerate the various training methods.
8. Explain the importance of training programme.

Unit -IV

1. Discuss the purpose and policy of promotion.
2. Enumerate the types and objectives of promotion.
3. Briefly analyse the sound promotion policy.
4. Explain the purpose and types of transfer.
5. Elucidate the sound transfer policy and its types.
6. Analyse about the demotion.
7. Demotion policy and Causes of demotion- Discuss.
8. Analyse the principles of compensation.
9. Briefly discuss about the principles and objectives about compensation.
10. Enumerate about demotion and its causes.

Unit -V

1. Evaluate the methods of performance appraisal.
2. Analyse the traditional and modern methods of performance appraisal.
3. Explain the traditional methods of performance appraisal.
4. Explain the influencing factors of performance appraisal.
5. Analyse the problems of performance appraisal.
6. Enumerate the importance and objectives of performance appraisal.
7. Briefly discuss about the importance of performance appraisal.
8. Elucidate the objectives of performance appraisal.

Semester- V
Core -I FISCAL ECONOMICS -I Course Code: 21UECC51

UNIT-I: Introduction

Definition and importance of Public Finance – Private Finance and Public Finance –comparison – Principles of Maximum social advantage.

UNIT-II: Public Expenditure

Classification of Public Expenditure –Reasons for the growth of Public expenditure in recent times (general) – Effects of public expenditure on production – On distribution – other effects.

UNIT-III: Public Revenue

Sources of Revenue State and Centre - Characteristics of Taxation - Canons of taxation. Objectives of taxation with special reference to India – Ability to pay theory of taxation

UNIT-IV: Kinds of Taxation

Direct and Indirect taxes – Progressive, Proportional and Regressive taxation -Merits and Demerits –Effects of Taxation – On Production – On Distribution – Other effects – Value Added Tax – Meaning – Forms of VAT – Merits and Demerits of VAT –GST.

UNIT-V: Taxable Capacity & Burden of Taxation

Absolute taxable capacity and Relative taxable Capacity – Factors determining taxable capacity – India's taxable capacity – Tax evasion and Tax avoidance – Tax evasion in India

SECTION A (1 mark)
Choose the correct answer:

Unit 1

1. "The best system of public finance is that which secures the maximum social advantage from the operations which it conducts" is the dictum of -----
A) Adam Smith B) Dalton C) J.B. Say D) Marshall
2. Fiscal policy is the policy of:
a) RBI b) NABARD c) **Government** d) All the above
3. The basic principle of public finance is:
a) Maximum Social Advantage b) welfare of the Govt. c) welfare of the Individual d) all of the above
4. The doctrine of Maximum Social Advantage is given by -----
(a) Dalton (b) J.M. Keynes (c) Shirras (d) Pigou
5. Public Finance deals with -----
(a) Public revenue (b) Public expenditure (c) Public debt (d) **all the above**
6. The principle of Maximum Social Advantage is concerned with ----- only.
a) Taxation b) Public Expenditure c) Public Debt **d) All the above**
7. The basic principle of public finance is:
a) Maximum Social Advantage b) welfare of the Govt. c) welfare of the Individual d) all of the above
8. The ideal system of public finance is one where the net benefit is -----
(A) Maximum(B) Minimum (C) Zero (D) Infinity
9. The principle of Maximum Social Advantage have been suggested by
(a) Pigou **(b) Dalton** (c) Musgrave (d) Adam Smith
10. Who is the father of Public Finance?
(a) Dalton (b) Pigou (c) Smith (d) Musgrave

Unit II

1. Roscher classified Public Expenditure into _____ classes.
a) 2 **b) 3** c) 4 d) 5

2. The canons of public expenditure have been enumerated by -----

- a) **Findlay Shirras** b) Dalton c) a & b d) J.K. Milton

3. Cohn and Plehn classified Public Expenditure on the basis of -----

- a) Revenue b) **Benefit** c) Grants d) Income

4. Nicholson classifies public expenditure on the basis of -----

- a) Sales b) income c) property d) **revenue**

5. Public expenditure transfers ----- from the Government to individuals & institution.

- a) Revenue b) Benefit c) Grants d) **purchasing power**

6. Adam Smith classifies the public expenditure into _____ categories.

- (a) **3** (b) 4 (c) 2 (d) 5

7. Dalton classified public expenditure into -----

- (a) 3 (b) 4 (c) **2** (d) 5

8. Nicholson classified public expenditure into -----

- (a) 3 (b) **4** (c) 2 (d) 5

9. The controlling authority of Government expenditure is -----

- a) RBI b) Planning Commission c) **Ministry of Finance** d) Finance Commission

10. Public Expenditure increases -----

- (a) interest rate (b) **employment** (c) exports (d) imports

Unit III

1. Public Revenue means the ----- of a public authority.

- (a) **revenue** b) expenditure (c) debt (d) Budget

2. A ----- is a compulsory contribution.

- a) Sales b) income c) property d) **tax**

3. "The income of the Government through all sources" is known as -----

- a. Public Expenditure b. **Public Revenue** c. Budget d. Production

4. All incomes come under -----

- (a) **Revenue receipt** (b) capital receipt (c) both a & b (d) public debt

5. In the following which is the characteristic of a tax

- (a) **Compulsory** (b) optional (c) forced (d) nationality

6. Which is the main objective of a tax:

- (a) Increase in consumption (b) increase in production (c) **Raising public revenue** (d) reduction in capital formation

7. Among the following canons of taxation which one has been given by Adam Smith:
 (a) Canon of Uniformity **(b) Canon of productivity** (c) canon of diversity (d) canon of equity
8. Adam Smith's canons of taxation are -----
 a) Three **b) four** c) five d) six
9. Prevention of extravagance refers to the canons of -----.
 a) elasticity **b) economy** c) certainty d) equity
10. Special Assessment means:
(a) A tax on special benefits (b) General tax on all people (c) A periodical tax (d) Gift tax

Unit IV

1. A tax levied at 5 percent on the first Rs. 10,000 of income, 10 percent on the next Rs 20,000 and 12 percent on the next Rs 30,000 would be:
a) Progressive b) Degressive c) Regressive d) Proportional
2. GST is a consumption of goods and service tax based on ----
 A) Development B) Dividend C) Destiny **D) Destination**
3. Direct taxes have the element of :
 (a) Evasion (b) convenient **(c) progressive** (d) economy
4. In proportional tax system, the rates of tax remain:
(a) Constant (B) increasing (c) decreasing (d) zero
5. The Indian tax system is:
 (a) Proportional (b) Progressive **(c) Regressive** (d) Degressive
6. Which of the following is the major source of revenue in India?
 (a) Direct tax (b) Capital Levy (c) Grants in aid **(d) Indirect tax**
7. A tax that can be shifted is called:
 A) Direct tax B) Progressive tax **C) Indirect tax** D) None
8. The VAT was first introduced in:
 A) India B) Britain C) USA **D) France**
9. The burden of direct taxes is borne by :
 (a) Rich person (b) poor person **(c) on whom it is levied** (d) none of these
10. Indirect taxes have an element of :
(a) Equitable (b) certainty (c) economical (d) encourage honesty

Unit V

1. The direct violation of tax law is called:

a) **Tax evasion** b) Tax avoidance c) Tax Rebate d) None of these

2. Incidence of a tax refers to the-----burden of tax:

A) Initial **B) Ultimate** C) Intermediate D) None

3. Tax avoidance is:

A) Illegitimate **B) Legitimate** C) Punishable D) None

4. The final resting place of the burden of tax is called:

a) Tax avoidance b) Tax evasion c) Impact **d) Incidence**

5. Taxable capacity depends upon -----

a) income b) expenditure c) sacrifice d) demand

6. A fraudulent effort by a tax payer to escape a legal tax obligation is called:

A) Tax avoidance **B) Tax evasion** C) Tax cascading D) None

7. When the demand for a commodity is inelastic, the incidence of taxation will be on:

A) Buyers B) Sellers C) Producers D) Stockists

8. What does the taxable capacity depend on?

a) income b) expenditure c) sacrifice d) demand

9. How is taxable capacity measured?

a) income b) expenditure c) sacrifice d) demand

10. Tax evasion is -----, tax avoidance is a legal.

a) lawful b) legitimate c) licit **d) illegal**

Section B (2 marks)

Answer in about 50 words each:

UNIT I

- 1) Define private finance
- 2) Define public finance
- 3) Distinguish between public finance & private finance
- 4) Recall the similarities of public finance and private finance
- 5) Recall the Principle of Maximum Social Advantage.
- 6) Recall the advantages of public finance
- 7) Recall the importance of Public Finance

UNIT II

- 1) Define public expenditure
- 2) Define private expenditure
- 3) Recall the effects of public expenditure on production
- 4) Recall the effects of public expenditure on distribution
- 5) Define Mehta's classification of public expenditure
- 6) Define Shiras' classification of public expenditure

- 7) Distinguish between public expenditure & private expenditure
- 8) Recall the similarities of public expenditure and private expenditure
- 9) Recall any four reasons for the growth of Public expenditure

UNIT III

1. Define Public Revenue
2. Recall the characteristics of a good tax system
3. Recall the sources of public revenue
4. Define tax
5. Recall the objectives of taxation
6. Recall the Ability to pay theory of taxation

UNIT-IV

1. Recall direct tax
2. Recall indirect taxation
3. Define proportional taxes
4. Recall progressive tax
5. Define Regressive taxation
6. Define VAT
7. Define GST

UNIT-V

1. Recall absolute taxable capacity
2. Recall relative taxable capacity
3. Distinguish between absolute and relative taxable capacity
4. Recall the factors determining taxable capacity
5. Define tax evasion.
6. Define tax avoidance
7. Distinguish between tax evasion and tax avoidance

Section C (6 marks)

Answer in about 200 words each

UNIT I

- 1) Analyse the importance of Public Finance
- 2) Describe the disadvantages of the principles of Maximum Social Advantage
- 3) Distinguish between public finance & private finance
- 4) Describe Public Finance and Private Finance
- 5) Discuss the similarities of Public finance and Private finance
- 6) Outline the principles of Maximum Social Advantage

UNIT II

1. Outline Mehta's classification of public expenditure
2. Differentiate between public expenditure & private expenditure
3. Outline Shiras' classification of public expenditure
4. Explain the effects of public expenditure on consumption
5. Outline the causes for the growth of public expenditure in recent times
6. Explain any six classification of public expenditure.
7. Explain the effects of public expenditure on production
8. Explain any four classifications of Public Expenditure.
9. Explain the effects of public expenditure on distribution

UNIT III

1. Outline the characteristics of a good tax system
2. Outline the objectives of taxation.
3. Explain Adam smith's cannons of taxation
4. Outline the sources of tax revenue
5. Explain the sources of non –tax revenue
6. Outline the sources of revenue of the central government
7. Evaluate the sources of revenue of the state government
8. Examine the ability to pay theory of taxation

UNIT-IV

1. Outline the merits of indirect taxation
2. Discuss the demerits of direct taxation
3. Outline the merits of progressive taxes
4. Explain the merits of indirect tax system
5. Discuss the demerits of indirect tax system
6. Outline the merits of proportional taxes
7. Write the merits and demerits of Regressive taxation
8. Explain the effects of public expenditure on production
9. Write the effects of taxation on distribution
10. Write the merits and demerits of VAT
11. Write the forms of VAT
12. Write the merits and demerits of GST

UNIT-V

1. Distinguish between absolute and relative taxable capacity
2. Explain the factors determining taxable capacity
3. Outline India's taxable capacity
4. Distinguish between tax evasion and tax avoidance
5. Explain the effects of Tax evasion in India

SECTION D (12 marks)**Answer in about 500 words each:****UNIT I**

1. Analyse the importance of Public Finance
2. Distinguish between public finance & private finance
3. Critically examine the principles of Maximum Social Advantage

UNIT II

1. Examine the classification of public expenditure
2. Explain the effects of public expenditure
3. Discuss the causes for the growth of public expenditure in recent times.

UNIT III

9. Explain the characteristics of a good tax system
10. Explain the objectives of taxation
11. Enlighten Adam smith's cannons of taxation
12. Clarify the sources of tax revenue
13. Explain the sources of non –tax revenue

14. Evaluate the sources of revenue of the central government
15. Examine the sources of revenue of the state government
16. Critically examine the ability to pay theory of taxation

UNIT-IV

- 1) Discuss the merits and demerits of direct taxation
- 2) Explain the merits and demerits of indirect tax system
- 3) Discuss the merits and demerits of proportional taxes
- 4) Write the merits and demerits of progressive taxation
- 5) Explain the effects of taxation
- 6) Discuss the merits and demerits of VAT
- 7) Discuss the merits and demerits of GST

UNIT-V

- 1) State and explain the factors determining taxable capacity
- 2) Evaluate India's taxable capacity
- 3) Explain the effects of Tax evasion in India

Semester- V

Core-IX MONEY AND BANKING -I Course Code: 21UECC52

UNIT-I: Money

Barter – Meaning and disadvantages – Evolution of money – kinds of money – Functions of money – Qualities of good money material - Advantages and disadvantages of money - Role of Money in Capitalistic and Socialistic economy

UNIT-II: Monetary Standards

Meaning and types of monetary standards – Gold standard and its working – Causes for the downfall of the Gold Standard – Bimetallism – Silver Standard

UNIT-III: Paper Currency Standard

Meaning- advantage of paper currency standard- Principles and methods of note issue – History of Indian currency system – Current monetary system in India – Internal and external features of India's current monetary system-Digital Currency

UNIT-IV: Demand for and Supply of Money

Supply of Money: Meaning – determinants of money supply – Value of Money – Velocity of Money – Factors governing velocity of circulation of Money-Demand for Money: Meaning – Quantity theory of money- Fisher's Transaction version – Cambridge Economists' cash balance version – Friedman's theory of demand for money.

UNIT-V: Theory of Money and Prices

Keynesian theory of money and prices – Gurley and Shaw's thesis on liquidity of money – Radcliffe - Sayers thesis – Tobin and Shaw's theory - Patinkin's monetary theory - Phillips Curve

QUESTION BANK
III B.A. ECONOMICS
Core-II MONEY AND BANKING -I Course Code: 21UECC52
Semester V (UG) – NOVEMBER 2023
(For those who joined in July 2020 and after)

SECTION A (1 mark)
Choose the correct answer:

Unit 1

1. The system, wherein trade can be carried out through the exchange of goods and services is called the: –
a) Barter system b) Monetary system c) Goods system d) None of the above

2. The exchange of goods for goods is:
a) banker of option b) bills of exchange **c) barter** d) currency

3. What are the necessary conditions of Barter System?
(a) Limited Needs (b) Limited Exchange Area (c) Economically Backward Society (d) All the above

- 4) Which of the following factors causes the barter system to be inefficient?
a) the cost associated with information search is too low. b) its cost of transaction is too low. c) it requires a double coincidence of wants. d) it requires high liquidity.

5. Which is the correct order of money evolution?
(a) Commodity Money, Paper Money, Metal Money (b) Commodity Money, Metal Money, Paper Money, Credit Money (c) Credit Money, Metal Money, Paper Money (d) None of the above

6. Aman, a vegetable seller, exchanged 4 apples with Rahul, a cloth dealer for 1 meter of cloth. This is an example of: –
a) Barter system b) Monetary system c) Goods system d) None of the above

7. “Money is what money does.” Who said it?
(a) Hartley Withers (b) Hawtrey (c) Thomas (d) Keynes

8. Which of the following, solves the problem of “Double coincidence of wants”?
a) Goods b) Banks c) Money d) All of the above

9. Which is not the function of money?
(a) Make demand and supply equal (b) Store of value (c) Medium of exchange (d) Measure of value

10. Which among the following is considered to be the most liquid asset?
(a) Gold (b) Money (c) Land (d) Treasury bonds

Unit II

1. An essential characteristic of Gold Standard is :
 a. Circulation of full-bodied gold coins b. Convertibility of currency into gold c. 100% gold reserves for money into circulation **d. The value of principal currency defined in terms of gold.**
2. When the money in circulation is defined in terms of a foreign, currency which is based on gold standard, it is a case of:
 a. Gold Bullion Standard **b. Gold Exchange Standard** c. Gold Reserve Standard d. Gold Parity Standard.
3. Exchange equalisation funds were established under which form Gold Standard?
 a. Gold Exchange Standard b. Gold Billion Standard **c. Gold Reserve Standard** d. Gold Parity Standard.
4. Which country was the first to abandon the gold standard?
(a) Great Britain (b) The UK (c) UAE (d) France
5. Bimetallism existed up to:
 a. 1873 b. 1803 **c. 1900** d. 1930.
6. Which of the following is not a characteristic of Bimetallism?
 a. Circulation of gold and silver coins together b. Coins are unlimited legal tender **c. The ratio between the gold and silver coins is fixed by market rate** d. Both coins have equality intrinsic value between face value and intrinsic value
7. US abandoned the Gold Standard in the year
 a) 1931 **b) 1933** c) 1945 d) 1929
8. Which year Gold Standard was introduced?
 a) 1875 **b) 1876** c) 1877 d) 1878
9. Who introduced the silver standard?
(a) The United States b) The UK (c) UAE (d) France
10. When did the silver standard introduced?
(a) 1785 (b) 1981 (c) 1991 (d) 2001

Unit III

1. Which property the paper money does not possess?
 (a) acceptability (b) Divisibility **(c) Durability** (d) Portability
2. Paper money is called fiat money because
(a) It is issued with authority of government (b) It is convertible into gold (c) It can be easily printed (d) It is light weight
3. Which of the following is not a characteristic of Standard Coin?

a. Principal coin of the country b. Face value is equal to intrinsic value c. Free coinage **d. Limited legal tender**

4. Which of the following types of Paper Money is presently in circulation?

a. Representative b. Convertible **c. Inconvertible** d. Fiat.

5. Which is a part of liquid money?

a. Cash b. Building c. Goods d. None of these.

6. Indian Monetary System is based on _____

(a) paper standard (b) metallic standard (c) gold standard (d) credit money standard

7. Which of the following statements is true about the Indian monetary system?

(a) paper standard (b) metallic standard (c) gold standard (d) credit money standard

8. Which is a digital currency?

a. Debit Card b. Dollar c. Pound **d. Bitcoin**

9. Why Paper money is called fiat money?

a) It is issued with authority of government (b) It is convertible into gold (c) It can be easily printed (d) It is light weight

10. What is a digital rupee?

a) cryptocurrency **b) Digital form of legal tender** c) Bonds d) SIP

Unit IV

1. By supply of money, we mean:

(a) Money deposited in bank (b) Money available with the public (c) Deposits with post office savings bank **(d) All of these**

2. Money supply is which _____ concept?

a) Stock b) Flow c) Monetary d) None of the above

3. Value of money and supply of money are related:

A. Inversely B. Directly C. Govt. law D. Are not related

4. Value of money means:

A. Gold purchased by money **B. General purchasing power of money** C. Importance of money D. Demand for money

5. In the equation $PY = MV$ showing quantity theory of money. Y represents:

A. Year of measurement of national income **B. National income** C. Tax revenue of the govt. D. (a) and (c) of above

6. The quantity theory of money is a theory of -----

(a) how the money supply is determined. (b) how interest rates are determined. (c) **how the nominal value of aggregate income is determined.** (d) all of the above.

7. If the money supply is 500 and nominal income is 3,000, the velocity of money is -----
(a) 60. (b) **6.** (c) 1/6. (d) undefined.

8. Robertson's version of the Cambridge equation is

(a) **$P=M/KT$** (b) $P=KR/M$ (c) $MV=PT$ (d) $M=KP/Y$

9. Pigou's version of Cambridge equation is

(a) $P=M/KT$ (b) **$P=KR/M$** (c) $MV=PT$ (d) $M=KP/Y$

10. In Irving Fisher's quantity theory of money, velocity was determined by -----

(a) interest rates. (b) real GDP. (c) **the institutions in an economy that affect individuals' transactions.** (d) the price level.

Unit V

1. Instead of relying on the price mechanism to match the supply and demand for goods, the Keynesian approach assumes...

a) the real money supply adjusts, changing interest rates to bring about the match between output and demand. (b) **output adjusts to demand.** c) exogenous disturbances induce spending multiplier effects. d) collective bargaining adjusts the real wage to bring about full-employment.

2. The Keynesian assumption is a convenient analytical short cut and turns out to be a rather accurate description of the reality. What does it assume?

(a) **Constant prices** b) Firms cannot reduce fix costs c) Output is predetermined d) The interest rate stimulates growth

3. Liquidity approach is also known-----

a) Tobin and Shaw approach b) Patinkin approach (c) **Rad Cliffe approach** d) Gurley and Shaw approach

4. -----in his work criticises the dichotomisation of goods and money markets.

a) Tobin (b) **Patinkin** c) Rad Cliffe d) Gurley and Shaw

5. Real Balance Effect was coined by -----

a) Baumol (b) **Patinkin** c) Rad Cliffe d) Gurley and Shaw

6. Real balance effect means integration of goods and -----

(a) **money markets** b) derivative markets c) capital markets d) currency markets

7. Phillip's curve shows the relationship between the rate of -----

(a) Unemployment and output growth (b) **Unemployment and increase in money wages** (c) Employment and inflation (d) All of the above

8. According to Phillips curve unemployment will return to the natural rate when: -----

(a) Nominal wages are equal to expected wages **(b) Real wages are back at equilibrium level**
 (c) Nominal wages are growing faster than inflation (d) Inflation is higher than the growth of nominal wages

9. ----- highlighted the substitution relationship among various factors, such as currency, demand deposits, time deposits, and saving bank deposits.

a) Tobin b) Patinkin c) Radcliffe **d) Gurley and Shaw**

10. The “original” Phillips curve is a relation that captures a trade-off between -----

a) inflation and unemployment b) accelerating inflation and unemployment c) inflation and price levels d) output and accelerating unemployment

Section B (2 marks)

Answer in about 50 words each:

UNIT-I

1. Define Barter system
2. Define money
3. List out the kinds of money
4. Recall any two functions of money
5. Recall any two qualities of good money material
6. Recall any two advantages of money
7. Recall any two disadvantages of money

UNIT-II

- 1) Define monetary standard
- 2) Recall the types of monetary standards
- 3) Define Gold standard
- 4) Define Bimetallism
- 5) Define Silver Standard

UNIT-III

1. Recall any two advantages of paper currency standard
2. Recall any two principles of note issue
3. Recall any two methods of note issue
4. Describe Digital Currency.

UNIT-IV

- 1) Describe Supply of Money
- 2) Describe Value of Money
- 3) Describe Velocity of Money
- 4) Recall any two factors governing velocity of circulation of Money
- 5) Describe Demand for Money
- 6) Describe Quantity theory of money.

UNIT-V

- 1) Describe Keynesian theory of money
- 2) Describe Tobin and Shaw's theory.
- 3) Describe Patinkin's monetary theory.
- 4) Describe Phillips Curve.

Section C (6 marks)
Answer in about 200 words each

UNIT-I

- 1) Explain the disadvantages of Barter system
- 2) Outline the Evolution of money
- 3) Outline the kinds of money.
- 4) Outline the functions of money
- 5) Outline the qualities of good money material
- 6) Outline the advantages of money
- 7) Outline the disadvantages of money
- 8) Discuss the role of money in Capitalistic economy
- 9) Discuss the role of money in Socialistic economy

UNIT-II

- 1) Discuss the types of monetary standards.
- 2) Discuss the working of gold standard
- 3) Discuss the Causes for the downfall of the Gold Standard
- 4) Show the features of Bimetallism
- 5) Show the features of Silver Standard

UNIT-III

- 1) Show the advantage of paper currency standard
- 2) Show the Principles of note issue
- 3) Outline the methods of note issue
- 4) Show the History of Indian currency system
- 5) Outline the Current monetary system in India
- 6) Outline the Internal and external features of India's current monetary system
- 7) Outline the disadvantages of Digital Currency

UNIT-IV

- 1) Outline the determinants of money supply
- 2) Outline the features of Value of Money
- 3) Outline the features of Velocity of Money
- 4) Explain the factors governing velocity of circulation of Money
- 5) Outline the features of Demand for Money
- 6) Outline the features of Quantity theory of money
- 7) Outline the features of Friedman's theory of demand for money.

UNIT-V

- 1) Outline the Keynesian theory of money and prices
- 2) Discuss Gurley and Shaw's thesis on liquidity of money
- 3) Discuss Tobin and Shaw's theory
- 4) Discuss Patinkin's monetary theory
- 5) Describe Phillips Curve

SECTION D (12 marks)
Answer in about 500 words each:

UNIT-I

- 1) Explain the disadvantages of Barter system
- 2) Examine the Evolution of money

- 3) Explain the kinds of money
- 4) Describe the functions of money
- 5) Clarify the qualities of good money material
- 6) Elucidate the advantages and disadvantages of money
- 7) Discuss the role of money in a Capitalistic economy
- 8) Describe the role of money in a Socialistic economy

UNIT-II

- 1) Deliberate types of monetary standards
- 2) Describe the working of gold standard
- 3) Examine the causes for the downfall of the Gold Standard
- 4) Discuss the functions of Bimetallism
- 5) Describe the functions of Silver Standard

UNIT-III

- 1) Explain the advantage of paper currency standard
- 2) Clarify the Principles of note issue
- 3) Examine the methods of note issue
- 4) Describe the history of Indian currency system
- 5) Describe the functions of current monetary system in India
- 6) Explain the internal and external features of India's current monetary system
- 7) Analyse the advantages and disadvantages of Digital Currency

UNIT-IV

- 1) Explain the determinants of money supply
- 2) Describe the functions of Value of Money
- 3) Describe the functions of Velocity of Money
- 4) Explain the factors governing velocity of circulation of Money
- 5) Discuss the functions of Demand for Money
- 6) Describe the functions of Quantity theory of money
- 7) Examine Friedman's theory of demand for money.

UNIT-V

- 1) Describe Keynesian theory of money and prices
- 2) Discuss Gurley and Shaw's thesis on liquidity of money
- 3) Examine Tobin and Shaw's theory of money
- 4) Explain the Patinkin's monetary theory of money
- 5) Examine the importance of Phillips Curve

Semester- V			
Core Elective		ECONOMICS OF WASTE MANAGEMENT	
Course Code: 21UECE51	Hours / week: 5	Hours / Semester: 75	Credits :4

Objectives:

1. To characterize the waste and apply the knowledge of laws for municipal solid waste management for handling of biomedical wastes and for handling of plastic wastes.
2. To apply the knowledge for effective solid waste collection systems for waste collection route optimization and for processing of solid waste.
3. To design composting systems, maintain and operate the aerobic and anaerobic composting process for effective organic waste recycling.
4. To manage construction and operations of landfill facilities, energy recovery systems and management of leachate systems.

Course Outcome

CO. No.	Upon completion of this course. students will be able to	PSO addressed	CL
CO -1	Describe the components of solid waste management and the laws governing it	1	Un
CO -2	Discuss the solid waste collection systems. route optimization techniques and processing of solid wastes	3	Un
CO -3	Outline the design, operation and maintenance of different methods of treatment	5	Ap
CO -4	Explain the operation and maintenance of sanitary landfill	1	Un
CO -5	Examine the operation and maintenance of Incineration	3	Un
CO -6	Conclude the recent trends in reuse of solid waste	1	Un

Semester- V			
Core Elective	ECONOMICS OF WASTE MANAGEMENT		
Course Code: 21UECE51	Hours / week: 5	Hours / Semester: 75	Credits :4

UNIT-I: Municipal Solid Waste Management **15 Hrs**

Composition and Quality of the Generated Municipal Solid Waste- Collection &Transportation of Municipal Solid Waste – Separation for Recycling and Reuse of Plastics, Paperand Glass from the Municipal Solid Waste (MSW).

UNIT-II: Industrial Waste management **15Hrs**

Classification of Industrial Solid Waste and Extent of Generation of Industrial Waste in India- Storage – Transportation and Disposal of Industrial Solid Wastes

UNIT-III: Biomedical Waste Management **15 Hrs**

Biomedical Wastes and their Impacts on Human Health and Environment – Legislative Laws on Management of Biomedical Wastes in India – Colour Coding of Biomedical Wastes andtheir collection in Different Coloured Bins or Bags-Collection of Sharp Wastes- Labelling and Identification of Biomedical Wastes- Storage of Biomedical Waste-Transportation of Biomedical Wastes to the Treatment and Disposal Sites- Treatment and Disposal of Biomedical Wastes.

UNIT-IV: Radioactive Waste Management **15Hrs**

Radioactive Isotopes or Radionuclides- Nuclear Fission and Generation of Nuclear Power- Radioactive Disintegration and Radioactive Radiations – Impact of Radioactivity on Biological Environment – Sources of Radioactivity in the Environment – Classification of Radioactive Wastesand their Disposal

UNIT-V: E – Waste Management **15 Hrs**

Definition of E –Waste – Classification of E-Waste- Adverse Health Environmental Impacts of E-Waste and Its Improper Disposal – Menace of E-Waste in India

Text book: *Manual on Municipal Solid waste Management*. New Delhi: CPHEEO. Ministry ofUrban Development. Govt. Of. India. 2000.

ST. MARY'S COLLEGE (Autonomous) – THOOTHUKUDI
III B.A. Economics
Core Elective -Economics of Waste Management -21UECE51
Semester V- November 2023
(for those who joined in July 2023 and after)

Time: 3 hours

Max: 75 marks

Section A (10 x 1 = 10 Marks)

Choose the correct answer:

UNIT I

1. MSW refers to _____
a) Manageable solid b) mini solid waste c) Micro sociable waste d) **Municipal solid waste**
2. _____ refers to trash that has not been segregated
a) **Residual waste** b) Micro level waste c) Medical waste d) Industrial waste
3. According to the 2023 state of India's environment report the country generates around _____ tones of municipal solid waste
a) 190,000 b) 200,000 c) **150,000** d) 800,000
4. Food and Kitchen waste green waste consenter _____ waste
a) Ratio active b) **Bio degradable** c) non-bio degradable d) Hazards
5. _____ waste is waste that is nether chemically nor biologically reactive and will not or only slowly degrade
a) Toxic waste b) Hazards waste c) **Inert waste** d) Electric and electronic waste
6. _____ is the combustion of waste in the presence of oxygen
a) Demolition b) Recycling c) Landfills d) **Incineration**
7. In this method thermal processing is in complete absence of oxygen or with less around of air
a) **Pyrolysis and gasification** b) Open dumping c) Recycling d) Compassion
8. _____ biological process in which biodegradable solid waste are allowed to decompose in the presence of a mixture organism like fungi and bacteria
a) Pyrolysis b) **Composting** c) Incineration d) Recycling
9. The process of crushing and grinding of municipal solid waste refuse is known as
a) **Pulverization** b) Shredding c) collection d) Solid waste separation
10. Which of the following solid waste describes the term municipal solid waste?
a) Toxic b) Hazardous c) Non-toxic d) **Non-hazardous**

11. Why is it difficult to recycle plastics?

- a) It is very hard
- b) It comes in different sizes
- c) It is adhesive
- d) **It contains different types of polymer resins**

12. Which of the following is one of the best solutions to get rid of non-biodegradable waste?

- a) **Recycling**
- b) Burying waste
- c) Burning waste
- d) Land filling

13. Which of the following is done on an individual level?

- a) Burning
- b) Disposal
- c) Recycling
- d) **Source reduction**

14. Why is recycled paper banned for use in food containers?

- a) Because it creates a lot of spaces
- b) **Because it creates contamination**
- c) Because paper can be used only one times
- d) Because paper is very thick and can't cover the food containers

UNIT II

1. _____ is material that contains chemicals or materials that can be harmful if released in to environment

- a) Residual waste
- b) **Hazardous waste**
- c) Municipal waste
- d) Temporary waste

2. SPCBs refers to _____

- a) Secular pollution control board
- b) Social pollution control board
- c) **State pollution control board**
- d) Social pollution central board

3. In this process the segregated waste undergoes biodegradation in presence of methanogenic bacteria and under anaerobic conditions

- a) Thermal conversion
- b) Electro chemical conversion
- c) **Anaerobic digestion**
- d) Combustion

4. Which of the following produces fly ash?

- a) Steam power plant
- b) **Thermal power plant**
- c) Steel power plant
- d) Nuclear power plant

5. Which among the following do not produce mud and tailings?

- a) **Steel plants**
- b) Aluminum manufacturing industries
- c) Zinc manufacturing industries
- d) Copper manufacturing industries

6. Pick out the method employed for destroying large amounts of industrial wastes

- a) Burning them along with garbage in open bins
- b) Dumping them in landfills
- c) Transferring them to other industries
- d) **Controlled incineration**

7. What the name for fuel obtained from plastic waste?
 a) White fuel b) Black fuel c) **Green fuel** d) yellow fuel
8. Which type of waste is classified as hazardous?
 a) **Chemical** b) Household c) Commercial d) Agricultural
9. Which of the following is not the major generators of industrial wastes
 a) Thermal power plant b) Integrated iron and steel mills
 c) Non-ferrous industries d) **Food industries**
10. Which of the following is not characteristic of hazardous waste?
 a) Ignitability b) **Bio degradability** c) Reactivity d) Toxicity

UNIT III

1. _____ waste is any waste containing infections or potentially infections materials
 a) Biodegradable b) Agricultural c) Recyclable d) **Biomedical**
2. Which of the following is not part of biomedical waste?
 a) Infectious waste b) Genotoxic waste c) Pathological waste d) **Agricultural waste**
3. Which colour category includes waste like sharps contaminated and discarded metal sharps
 a) Yellow b) Blue c) Red d) **White**
4. Which of the following comes under wet waste
 a) Newspaper and card boxes b) Plastic water bottles
 c) **Organic food waste** d) Aluminum cans
5. The world Health Organization has categorized biomedical in to _____ categories
 a) Three b) Four c) six d) **Eight**
6. Body parts of humans or animal including tissues fluids or blood are part of _____ waste
 a) Genotoxic b) Pharmaceutical c) **Pathological** d) Chemical
7. As per BMWM rules 2016, the Health Care Facility (HCF) should ensure disposal of human and animal anatomical waste, solid waste and bio technology waste within _____
 a) 24 hrs b) **48 hrs** c) 1-month d) 2 months
8. Which of the following is not a biomedical waste?
 a) Animal waste b) Microbiological waste c) Chemical waste d) **Domestic waste**
9. Which of the following is not a waste treatment method for biomedical waste?
 a) Incineration b) Chemical disinfecting c) Autoclaving d) **Sieving**

10. Cytotoxic should be placed in which container?

- a) Yellow container b) Grey container c) **Red container** d) White container

UNIT IV

1. Which was the first nuclear power plant in India?

- a) **Tarapur** b) Kalpakkam c) Kaiga d) Kokrapur

2. What is the current installed generation capacity of nuclear power plants in India (As on 31.05.2023)

- a) 4,780 MW b) **6,780 MW** c) 8,780 MW d) 10,780 MW

3. Where is the nuclear power plant in Rajasthan located?

- a) Kudankulam b) Kakrapur c) Kaiga d) **Rawatbhata**

4. Which is the largest nuclear power plant in India?

- a) Tarapur b) **Kudankulam** c) Kalpakkam d) Kaiga

5. Which fuel is used in Indian nuclear power plant?

- a) Coal b) Natural gas c) **Uranium** d) Petroleum

6. What is the most common natural source of radiation in India?

- a) **Uranium and thorium** b) Smoke and dust c) X-rays d) Buildings

7. Atom bomb is based on the principle of _____

- a) Nuclear fusion b) **Nuclear fission** c) Radioactivity d) bioactivity

8. The main source of energy in sun is _____

- a) **Nuclear fusion** b) Nuclear fission c) Chemical reaction d) Mechanical Energy

9. Which of the following problem occurs due to the use of nuclear energy

- a) Formation of compost b) Formation of Gober gas
c) **Accidental leakage** d) Generation of electricity

10. Which of the following element is most hazardous to human?

- a) Phosphorus b) Sulphur c) Carbon d) **Uranium**

UNIT V

1. Which of the following has maximum share in E-waste?

- a) Medical equipment b) Solar waste c) **Computer waste** d) Telephone waste

2. What does e-waste stand for?

- a) Environment waste b) **Electronic waste** c) Equipment waste d) Easy waste

3. Which health hazards can be caused by E-waste?
a) Lung cancer b) DNA damage c) Brain damage d) **All of the above**
4. Which country produces the most e-waste per year?
a) India b) **China** c) USA d) France
5. Which of the following elements is the cause of e-waste?
a) **Lead and cadmium** b) Silver c) Sodium d) Iron
6. Which of the following is not classification of e-waste?
a) Large applications b) Small applications c) IT and Telecommunications equipment
d) **Medical Equipment's**
7. Which of the following is not a method of handling e-waste?
a) Land filling b) Incineration c) Reuse d) **Composting**
8. Which of the following is a sustainable method of e-waste management?
a) Dumping e-waste in landfills b) Burning e-waste in incinerations
c) **Reusing and recycling e-waste** d) Exporting e-waste to developing countries
9. Which is the most common hazardous substance found in e-waste?
a) Carbon di oxide b) **Lead** c) Nitrogen d) Oxygen
10. Which hazardous pollutant is released from batteries?
a) Arsenic b) Barium c) Cobalt d) **Cadmium**
11. What hazardous pollutant is released from current boards?
a) Arsenic b) Barium c) **Lead** d) Copper
12. Which hazardous pollutant is released from calculators?
a) Lithium b) **Mercury** c) Lead d) copper

Section B (5x 2 = 10 Marks)

Answer in about 50 words

Unit I

1. Define Municipal Solid Waste.
2. Describe residue waste.
3. Write about agricultural waste.
4. Explain sludge.

5. List out the categories of solid waste.
6. Describe recyclable waste.
7. Show the components of solid waste.
8. Explain MSW.
9. Tell about inert waste and quote its example.
10. Describe composite waste.
11. Distinguish between domestic and non-domestic waste.
12. Differentiate dry waste and wet waste.
13. Recall segregation of municipal solid waste.
14. Name some municipal solid waste management techniques.
15. Quote some sources of solid waste.
16. Differentiate between centralized and decentralized method of solid waste management.
17. Tell about Pyrolysis and gasification method of treatment of solid waste management.
18. Distinguish between landfills and open dumping.
19. Recall incineration.
20. Describe composting.
21. Name the mantra of waste minimization.
22. List out the principles of solid waste management.

Unit- II

1. Recall environmental pollution.
2. Define industrialization.
3. Tell about industrial waste.
4. List out the sources of industrial solid waste.
5. Show the types of industrial waste.
6. Distinguish between hazardous and non-hazardous waste.
7. Describe incineration.
8. Recall anaerobic digestion/bio methanation method of treatment of industrial solid waste.
9. Describe gasification.
10. Explain combustion.

Unit-III

1. Define biomedical waste.
2. List out the different types of biomedical waste.
3. Describe infectious waste.
4. Recall Pathological Waste.
5. Write about Pharmaceutical Waste.
6. Discuss about genotoxic waste.
7. Explain chemical disinfection.
8. Discuss about wet thermal treatment.
9. Define occupational health hazards.
10. Name some diseases caused due to exposure to biomedical waste.

Unit-IV

1. Define radioactive isotope.
2. Recall nuclear fission.
3. Write about nuclear power.
4. Explain nuclear waste.
5. Discuss about nuclear reactor.
6. Name some nuclear power plants in India.
7. Tell about radioactive disintegration.
8. Explain nuclear radiation.
9. Explain radioactivity.
10. Discuss radioactive pollution.
11. List out the sources of radioactive pollution.
12. Explain terrestrial radiation.
13. Discuss about internal radiation.
14. Explain radiation therapy.
15. Discuss about nuclear accidents.
16. Name some diseases caused due to radioactive pollution.
17. Explain soil infertility.

Unit-V

1. Define E-waste.
2. Sequence the categories of E-waste.
3. Name some common E-waste items.
4. List out some disposal methods of E-waste.
5. Quote some harmful effects of E-waste.
6. Mention some hazardous E-waste items.
7. Name some hazardous pollutants released from E-wastes.
8. Mention the hazardous pollutant released from batteries.
9. Mention the hazardous pollutant released from calculators.
10. Quote the sustainable method of E-waste management.

Section – C (5x5=25 Marks)

Answer the questions in about 200 words

1. Compile your views on municipal solid waste.
2. Examine the generation of municipal solid waste.
3. Differentiate between primary collection and secondary collection of solid waste.
4. Present the types of solid waste.
5. Show diagrammatically, the components of municipal solid waste.
6. Differentiate biodegradable and non-biodegradable waste.
7. Examine the segregation of municipal solid waste.
8. Appraise the principles of solid waste management.
9. Compile information on processing and management of municipal solid waste.
10. Appraise the solid waste management scenario in India.

Unit II

1. Analyse the sources and quality of industrial solid waste in India.
2. Categorise the types of industrial solid waste.
3. Compile the description of important industrial solid waste.
4. Examine the process of collection of industrial waste.
5. Outline the transportation of industrial hazardous waste.

Unit III

1. Classify the types of biomedical waste.
2. Categorise biomedical waste on the basis of color coding.
3. Examine the impact of biomedical waste on environment.
4. Analyse the impact of improper biomedical waste on human beings.
5. Outline the disposal techniques of biomedical waste.
6. Outline the techniques of packaging and labelling of biomedical waste.
7. Examine the storage and transportation of biomedical waste.
8. Appraise the objectives of biomedical waste management rules.

Unit IV

1. Examine the generation of nuclear power in India.
2. Organise the status of nuclear power in India.
3. Assemble the biological effects of radioactivity.
4. Differentiate between natural and man-made sources of radioactive pollution.
5. Categorise the different sources of radioactive waste pollution.
6. Outline the disposal methods of nuclear waste.

Unit V

1. Categorise the types of E-waste.
2. Compile the list of common E-waste items.
3. Examine the E-waste infrastructure in India.

Section - D (3x10=30 Marks)

Answer the questions in about 400 words

Unit I

1. Analyse the steps involved in collection and transportation of solid waste.
2. Outline the storage and transportation of municipal solid waste.
3. Assemble the process of Segregation, processing and transformation of solid wastes
4. Compile the sources of solid waste in India.
5. Analyse the methods of solid waste management in India.
6. Evaluate the importance of solid waste management in India.

Unit II

1. Outline the sources and classification of industrial waste.
2. Examine the storage and handling of incinerable hazardous wastes.

3. Analyse the treatment process and disposal of industrial waste in India.
4. Evaluate the management techniques of industrial waste in India.

Unit III

1. Evaluate the effects of biomedical waste on human beings and environment.
2. Assemble the legislative laws related to biomedical waste treatment in India.
3. Evaluate the process of segregation and transportation of biomedical waste.
4. Organise the process of treatment and disposal of biomedical waste in India.
5. Combine the process of biomedical waste management in India.

Unit IV

1. Evaluate the nuclear waste handling and disposal methods.
2. Assemble the effects of radioactive pollution.
3. Evaluate the management techniques of nuclear waste in India.

Unit V

1. Evaluate the adverse effects of e-waste.
2. Examine the menace of E-waste in India.
3. Examine the common E-waste disposal methods.
4. Evaluate the E-waste management system.

Syllabus- Semester- VI

Core - I FISCAL ECONOMICS -II -Course Code: 21UECC61

UNIT-I: Public Debt

Meaning and Classification – Need for Public Borrowing – Effects of Public Debt on production consumption and distribution - Burden of Public Debt– Redemption of Public Debt – Growth of Public Debt in India.

UNIT-II: Budgeting

Meaning and components of Government budget- Revenue and Capital Budget – Characteristics of a sound budget– Budgetary procedure in India - A Review of the latest Union Budget

UNIT-III: Deficit financing and Fiscal Policy

Deficit financing - Meaning - Objectives– Fiscal Policy-Meaning and Objectives- Instruments of Fiscal Policy –Role of Fiscal Policy in Indian Economy

UNIT-IV: Local finance

Functions and Resources of Local Bodies – Zilla Parishads - Panchayat Smithies- Gram Panchayats- Blocks- Town Panchayats - Municipal Corporations - A Critique

UNIT-V: Federal Finance

Centre-State Financial relations – Role of Finance Commissions – 15th Finance Commission recommendations- Merits and Demerits

III B.A. ECONOMICS

Core - I FISCAL ECONOMICS -II -Course Code: 21UECC61

Semester VI (UG) – APRIL 2023

(For those who joined in July 2021 and after)

SECTION A (1 mark)

Choose the correct answer:

Unit I

1. The burden of long-term public debt is on:
 - (a) Present generation (b) past generation (c) **future generation** (d) none of these
2. Public debt leads to extravagance, encouraged resort to war and induced bad economic conditions. This statement is of :
 - (a) Dalton (b) Adam Smith (c) J.K. Mehta (d) **Findley Shirras**
3. The main objective of taking private loan is :
 - (a) To achieve public objectives (b) **to achieve personal objectives** (c) to achieve long term objectives (d) none of these
4. Shortcoming of public debt is :
 - (a) Political slavery (b) danger of insolvency (c) danger to countrys freedom (d) **all**
5. Dalton has divided debt redemption fund into:
 - (a) Two parts (b) three parts (c) Four parts (d) **Five parts**
6. ----- refers to refusal to repay the debt
 - (a) **Repudiation** (b) Capital levy (c) Sinking fund (d) none of the above
7. ----- is the debt which is paid any legal enforcement.
 - (a) Voluntary debt (b) **compulsory Debt** (c) internal debt (d) external debt
8. Capital Levy method has been advocated by
 - (a) Keynes (b) Musgrave (c) **Ricardo** (d) none of these
9. ----- is the process of replacing maturing securities with new securities. (a) Repudiation (b) **Refunding** (c) Conversion (d) Capital levy
10. ----- is a special type of “once for all” tax on capital imposed to repay war debts.
 - (a) Repudiation (b) Refunding (c) Conversion (d) **Capital levy**

Unit II

1. A _____ budget is one in which expenditure exceeds revenue.
 - a) **deficit** b) surplus c) balanced d) deficit and surplus
2. Canons of budgeting is also known as -----
 - a) deficit b) surplus c) balanced d) **principles of budgeting**
3. The execution of the budget consists of _____ aspects.
 - (A) Fiscal Policy (B) Industrial Policy (C) Monetary Policy (D) **None of these**
4. _____ presents the budget in the parliament
 - a) President b) **Finance Minister** c) Secretary d) Prime Minister
5. The word budget is derived from _____ word
 - (a) **Greek**(b) German(c) French (d) Latin

6. Current budget consists of _____
 (a) **Current Revenue & Current Expenditure** (b) Capital revenue and capital expenditure
 (c) Saving and investment (d) Tax and Non-tax revenue
7. The word ----- is derived from the Greek word 'buogette'.
 a) deficit b) surplus c) balanced **d) budget**
8. A _____ budget is one in which expenditure exceeds revenue
 (a) **Deficit budget** (b) surplus budget (c) balanced budget (d) unbalanced budget
9. The largest transfer in the federal budget is: ----
 a) defence b) education **c) social security** d) welfare
10. _____ presents the budget in the parliament
 a) President b) **Finance Minister** c) Secretary d) Prime Minister

UNIT-III

1. Deficit financing may lead to:
 A) Poverty B) Unemployment **C) Inflation** D) Deflation
2. Deficit financing means -----
(A) Public expenditure in excess of public revenue (B) Public revenue in excess of public expenditure
 (C) Both (A) and (B) (D) none of the above
3. Deficit financing includes -----
 a) Borrowing from the Central Bank b) Issues of new currency by the Government
 C) Withdrawal of past accumulated cash balance by the government **d) All the above**
4. Which one among the following is a tool of Fiscal Policy?
 a) Government Research b) Election **c) Taxation** d) None of the above
5. Pump Priming is related with:
 A) Monetary policy B) Income policy C) Price policy **D) Fiscal policy**
6. Which of the following is a measure of fiscal policy?
a) Public expenditure b) C.R.R. c) S.L.R. d) Bank rate
7. Fiscal policy is the policy of:
 a) RBI b) NABARD **c) Government** d) All the above
8. The theory of fiscal policy derives from -----
(A) Principle of sound finance (B) N.I. analysis (C) Welfare economics (D) None of these
9. The most important aim of fiscal policy in a developing country is
 (A) economic stability **(B) economic development** (C) regional balance (D) None of these
10. Name the policy that accords with expenditure and taxation policies decisions of the government?
 a) Monetary Policy b) **Fiscal Policy** c) Labor Market Policies d) Trade Policy

Unit IV

1. Who among the following is the first citizen of a city in India?
(a) Mayor (a) Chairman (a) Sheriff (a) Member of Legislative Assembly
2. Ashok Mehta Committee in 1977 recommended for the establishment of:
 a) Nagar Panchayat b) Panchayat Samiti c) Maha Panchayat **d) Mandal Panchayat**
3. Which one of the following was not recommended for Panchayatiraj by Thungon Committee?
 a) Constitutional Status b) Planning at Zila Parishad level c) Dist. Collector to be Chief Executive of Zila Parishad **d) Three year term**

4. Which one of the following was the first committee to demand constitutional recognition for Panchayats?

a) **Balwantraji Mehta Committee** b) Ashok Mehta Committee c) Santhanam Committee d) G.V.K.Rao Committee

5. Which one of the following committees is not associated with panchayati Raj in India?

a) Sadiq Ali Committee b) **Dinesh Goswami Committee** c) L.M. Singhvi Committee d) P.K.Thungan Committee

6. In order to ensure free and fair elections and to conduct all elections to the Panchayats, the power is vested with -----

a) Chief Election Commissioner of India b) Chief Minister of the State c) **State Election Commission** d) Chief Secretary of the State

7. The members of Gram Sabha are

a) Sarpanch, Upsarpanch and all elected Panchas b) Sarpanch, Upsarpanch and Village level worker c) Sarpanch, gram Sevak and elected Panchas d) **Registered voters of Village Panchayat**

8. Election of Rural and Urban local bodies are conducted and ultimately supervised by:

a) Election Commission of India b) **State Election Commission** c) District Collector and District Magistrate d) Concerned Returning Officer

9. Which Constitutional Article defines the Panchayat Raj?

a) 243 O b) 243A c) **243** d) 243I

10. In the Indian Constitution, which type of the Sabha is mentioned under Panchayat Raj—

a) District Sabha b) **Gram Sabha** c) Nagar Panchayat Sabha d) Zila Sabha

UNIT V

1. Which is the method of financial adjustment between Centre and States?

a) **Tax sharing** b) Grant-in-aid c) Public debt d) Federal Finance

2. Grants recommended by the Finance Commission are known as:

A) Plan grants B) Conditional Grants C) **Statutory grants** D) Conditional grants

3. The Finance Commission in India is appointed by:

A) **President** B) Prime Minister C) Chief Minister D) Finance Minister

4. Which of the following is a Statutory Body?

A) **Finance Commission** B) Planning Commission C) State Planning Board D) None of these

5. Chairman of the first Finance Commission:

A) Chadha B) **K.C. Neogi** C) Santhanam D) Y.V. Chavan

6. The chairman of the 15th Finance Commission of India is -----

A) A.M. Khusro B) K. C. Pant C) **N.K. Singh** D) Arun Jaitley

7. The finance commission is appointed every :

A) 3 years B) **5 years** C) 6 years D) 7 years

8. The First Finance Commission was appointed in the year:

A) 1949 B) 1950 C) **1951** D) 1952

9. Finance Commission determines -----

(A) The finances of Government of India (B) **The resources transfer to the State** (C)

The resources transfer to the various departments (D) none of the above

10. How many Finance Commissions have been constituted so far?

(A) 12 (B) 13 (C) 14 (D) **15**

Section B (2 marks)**Answer in about 50 words each:****UNIT I**

1. Express your views about external debts
2. Explain the term redeemable debt
3. Explain the term private debt
4. Explain the term public debt
5. Explain the term internal debt

UNIT II

1. Explain the term Budget
2. Explain the term Government budget
3. Discuss about the objectives of government budget
4. Explain the term Revenue Budget
5. Explain the term Capital Budget
6. Explain the term Deficit Budget

UNIT III

1. Explain the term Zilla Parishads
2. Express your views about Panchayat Smithies
3. Explain the term Gram Panchayats
4. Express your views about Blocks
5. Express your views about Town Panchayats
6. Express your views about Municipal Corporations

UNIT IV

- 1) Explain the term deficit financing
- 2) Recall the objectives of deficit financing
- 3) Express your views about fiscal policy
- 4) Recall the objectives of deficit financing
- 5) Recall the instruments of fiscal policy
- 6) Express your views about role of fiscal policy in Indian economy

UNIT-V

1. Explain centre-state financial relations
2. Express your views about the role of finance commissions
3. Express your views about 15th finance commission recommendations
4. Explain the merits of 15th finance commission
5. Explain the demerits of 15th finance commission

Section C (6 marks)**Answer in about 200 words each****UNIT I**

1. Classify the sources of public debt
2. Explain unfunded debt and funded debt
3. Differentiate between private debt and public debt
4. Present the objectives of public debt
6. State the voluntary and compulsory debt
7. Differentiate between productive debt and unproductive debt

8. Differentiate between redeemable and irredeemable debt

UNIT II

1. Show the components of government budget
2. Differentiate between revenue and capital budget
3. Classify the characteristics of a sound budget
4. Compile the budgetary procedure in India
5. Present the review of the latest union budget

UNIT III

1. Compile the functions of Local Bodies
2. Classify the resources of Local Bodies
3. Show the role and functions of Zilla Parishads
4. Show the role and functions of Panchayat Smithies

UNIT IV

- 1) Compile the objectives of deficit financing
- 2) Classify the instruments of fiscal policy

UNIT-V

1. Compile the functions of centre-state financial relations
2. Present the merits of 15th finance commission
3. Classify the demerits of 15th finance commission

SECTION D (12 marks)

Answer in about 500 words each:

UNIT I

1. Analyse the classification of public debt
2. Examine the effects of public debt
3. Outline the burden of public debt
4. Analyse the redemption of public debt
5. Analyse the growth of public debt in India.

UNIT II

1. Examine the budgetary procedure in India
2. Analyse a review of the latest union budget

UNIT III

- 1) Outline the role and functions of Gram Panchayats
- 2) Examine the role and functions of Blocks
- 3) Outline the role and functions of Town Panchayats
- 4) Analyse a Critique of Municipal Corporations

UNIT IV

1. Examine the instruments of fiscal policy
2. Analyse the role of fiscal policy in Indian economy

UNIT-V

- 1) Outline the functions of centre-state financial relations
- 2) Analyse the role of finance commissions
- 3) Examine the recommendations of 15th finance commission
- 4) Examine the merits and demerits of 15th finance commission

Semester- VI			
Core - XII		MONEY AND BANKING –II	
Course Code: 21UECC62	Hours / week :6	Hrs / Sem.: 90	Credits :4

Objectives:

- To advance relevant knowledge and develop employable, innovative and diverse graduates to co-create value for society.
- To make the students be at the cutting edge of economic, financial and management education, research and community engagement within the national and global context.

Course Outcome:

CO. No	Upon completion of this course. students will be able to	PSO addressed	CL
CO - 1	explain and discuss why people hold money and why it is used in the trading process	1	Un & Re

QUESTION BANK

Semester VI – APRIL 2024

(for those who joined in July 2021 and after)

SECTION A

Choose the correct answer:

Unit I

1. Which among the following is the cheapest mode of transport in terms of fixed plus running costs? [A] Roadways [B] **Waterways** [C] Railways [D] Pipelines
2. Which among the following is characterized by Highest Fixed Cost & Lowest Running Cost? [A] Road Transport [B] Rail Transport [C] Air Transport [D] **Pipeline Transport**
3. The use of two or more different modes of transport in moving goods from origin to destination is known as:
(a) Container shipping (b) LTL shipping (c) Double-stacking (d) **Intermodal transport**
4. In which one of the following States has India's largest private sector sea port been commissioned recently? (a) **Andhra Pradesh** (b) Haryana (c) Tamil Nadu (d) Karnataka
5. Which is the largest port in the world?
(a) Singapore (b) Shenzhen (c) **Shanghai** (d) Hong Kong
6. Busiest port of Indian Ocean is -----
(a) Delhi Port (b) Mumbai Port (c) Chennai Port (d) **Port of Singapore**
7. What is the number of states having coastal area ? (a) **9** (b) 10 (c) 11 (d) 12
8. Indian Ports Association was constituted in the year----(a) **1966** (b) 1967 (c) 1968 (d) 1969
9. Which among the following is the most important bulk import of India?
[A] Non-electrical machinery [B] Electric Goods [C] **Petroleum** [D] Food Grains
10. What is the length of total coastline of India?
(a) 5218.9 km (b) 6812 km (c) **7516.6 km** (d) 8435 km

Unit II

11. Which of the following ports was the biggest port during the Mughal Period?
(a) Chittagong (b) Balasore (c) **Surat** (d) Hooghly
12. Which of the following major sea ports handles the largest volume of our foreign trade?
(a) Calcutta (b) Vishakhapatnam (c) Mormugao (d) **Bombay**
13. Which port is known as Jewel of all port?
(a) **Visakhapatnam** (b) Mumbai Port (c) Chennai Port (d) Delhi Port
14. Which is the oldest artificial harbour on the East Coast of India?
(a) Vishakhapatnam Port (b) **Chennai Port** (c) Paradip Port (d) Haldia Port
15. How many Minor ports in India? (a) 189 (b) **185** (c) 178 (d) 169

16. Which port is the natural harbour on the west coast of India?
 (a) **Kochi Port** (b) Ennore Port (c) Kandla Port (d) Visakhapatnam Port
17. Through which Indian port most Iron Ore exported?
 A) Mundra Port B) Kandla Port **C) Mormugao Port** D) Paradip Port
18. What is the total number of Major ports in India? (a) 12 (b) 14 (c) 9 **(d) 13**
19. How many Indian states have coastal line? (a) 6 (b) 8 **(c) 9** (d) 11
20. Which state has least coastal area? **(a) Goa** (b) Mumbai (c) Chennai (d) Delhi

Unit III

21. What is the theme of 2017 World Maritime Day (WMD)?
 [a] Shipping: indispensable to the world [b] Secure Shipping **[c] Connecting Ships, Ports and People** [d] Connect world with ocean
22. Which among the following was set up by Government of India in 1988 with objective of developing multi modal logistics support for India's International and Domestic containerized cargo and trade?
 [a] Inland Container Depots **[b] Container Corporation of India** [c] Central warehousing Corporation [d] Tariff Authority

 [a] Kandla Port [b] Cochin Port **[c] Haldia Port** [d] Vizag Port
24. Which South Indian major port has an artificial harbour?
(a) Chennai (b) Mumbai Port (c) Kandla Port (d) Delhi Port
25. Which is the largest port of India?
(a) Mumbai Port (b) Kandla Port (c) Chennai Port (d) Delhi Port
26. Which is the major artificial deep port situated at the confluence of river Mahanadi and Bay of Bengal? **(a) Paradip port** (b) Mumbai Port (c) Chennai Port (d) Delhi Port
27. Which is the largest private port of India?
(a) Mundra Port (b) Mumbai Port (c) Chennai Port (d) Delhi Port
28. First special economic zone in India:
 (a) **Kandla Port** (b) Mumbai Port (c) Chennai Port (d) Delhi Port
29. Which Indian state is having longest coastline?
(a) Gujarat (b) Mumbai (c) Chennai (d) Delhi
30. Which States has the largest coastline in India?
(a) Gujarat (b) Mumbai (c) Chennai (d) Delhi

Unit IV

31. Which is the second maritime state (second largest coastline) in India?
 (a) **Andhara pradesh** (b) Mumbai (c) Chennai (d) Delhi
32. Which state has least coastal area ? (a) **Goa** (b) Mumbai (c) Chennai (d) Delhi
33. What is the width of West Coast ? (a) **50 Km** (b) 60 Km (c) 70 Km (d) 80 Km
34. What is the width of East Coast? (a) 70 Km (b) 80 Km (c) 90 Km **(d) 100Km**

35. Which is the Tidal Port in Gujarat?

- (a) **Kandla** (b) Mumbai Port (c) Chennai Port (d) Delhi Port

36. Which is the deepest land-locked port in India?

- (a) **Visakhapatnam port** (b) Mumbai Port (c) Chennai Port (d) Delhi Port

37. When was Shipping Corporation of India Ltd. established?

- a) **October 2, 1961** b) October 27, 1986 c) September 18, 1992 d) January 26, 1998

38. When was the status of Shipping Corporation of India Ltd change from a private limited company to public limited?

- a) October 2, 1961 b) October 27, 1986 c) **September 18, 1992** d) January 26, 1998

39. When did the Inland Waterways Authority of India (IWAI) come into existence?

- a) October 2, 1961 b) **October 27, 1986** c) September 18, 1992 d) January 26, 1998

40. When was Tuticorin declared as a major port? a) 1951 b) **1974** c) 1999 d) 2001

Unit V

41. Considering sea transport, GPS stands for -----

- (a) Greenwich Placement Systems (b) Global Placement Systems (c) German Placement Systems (d) **Global Positioning Systems**

42. Which is the southernmost port in India?

- (a) **Tuticorin port** (b) Mumbai Port (c) Chennai Port (d) Delhi Port

43. Which is the major riverine port in the east coast of India?

- (a) **Haldia** (b) Mumbai Port (c) Chennai Port (d) Delhi Port

44. Which nation has the largest merchant fleet in the world?

- (a) **Japan** (b) Russia (c) Panama (d) USA

9. Define liner
10. Define tramps

UNIT –II

11. Type of Ports
12. State the current problems of shipping
13. What do you mean by chartering business?
14. What do you mean by Tramway?
15. What do you mean by transport?
16. What are the elements of transport?
17. What is multimodal transport?
18. What is Pipeline transportation?

UNIT –III

19. What are the kinds of water transport?
20. Define port
21. State functions of the port
22. What do you mean by minor port?
23. Define bulk cargo
24. Define chartering
25. Define general cargo
26. What do you mean by Container?

UNIT –IV

27. What are the advantages of water transport?
28. What do you mean by canals?
29. What do you mean by rivers?
30. What do you mean by ocean transport?
31. What do you mean by Tankers?
32. What are the types of vessels employed in the overseas shipping?
33. What are the advantages of overseas shipping?
34. Define shipping
35. Define maritime transportation

UNIT –V

36. Name the major ports of India
37. Define containerization
38. What are the types of ports?
39. Name the types of ships
40. What do you mean by categories of bulk cargo?
41. What are the preventive functions of the Customs Department?
42. What are the main functions of the Mercantile Marine Departments?

Section C**UNIT –I**

1. What are the modes of water transport?
2. Explain the development of port sector in India
3. Explain India's maritime trade
4. Explain water transport in India
5. Bring out the share of different modes of transport
6. State port performance in India

UNIT –II

7. State the models for port structuring
8. Bring out the various types of ports
9. Describe the importance of ports in India
10. Describe ports in economic development
11. Write a note on Major ports
12. Write a note on Minor Ports
13. Discuss the history of ports in India
14. State the economics of port and Port Procedure

UNIT –III

15. Explain the role of shipping in economic development
16. Discuss the development of Indian shipping
17. State the types of chartering business
18. State the shipping policy and five years plans
19. Discuss containerization in India
20. State the need of containerization
21. Bring out the benefits of containerization
22. What are the types of containers?
23. State the disadvantages of containerization

UNIT –IV

24. Explain the role of seaborne trade in economic development

- 25. State the limitations of seaborne trade
- 26. State the advantages of seaborne trade
- 27. What are the features of tramp shipping?
- 28. What are the features of liner shipping?

UNIT –V

- 29. State the types of ships
- 30. Write a note on liner shipping industry
- 31. Bring out the types of general cargo
- 32. Bring out the duties & functions of Mercantile Marine Department
- 33. Bring out the organisation and functions of customs department
- 34. What are the salient features and functions of Port Trust?
- 35. What are the categories of bulk cargo?
- 36. Describe the various types of ship in the cargo fleet
- 37. Describe the functions of various authorities in shipping.

Section D

UNIT –I

- 38.** What are the modes of water transport?
- 39. Explain the development of port sector in India
- 40. Explain India's maritime trade
- 41. Explain water transport in India
- 42. Bring out the share of different modes of transport
- 43. State port performance in India

UNIT –II

- 44.** State the models for port structuring
- 45. Bring out the various types of ports
- 46. Describe the importance of ports in India
- 47. Describe ports in economic development
- 48. Write a note on Major ports
- 49. Write a note on Minor Ports
- 50. Discuss the history of ports in India
- 51. State the economics of port and Port Procedure

UNIT –III

- 52. Explain the role of shipping in economic development
- 53. Discuss the development of Indian shipping
- 54.** State the types of chartering business
- 55. State the shipping policy and five years plans
- 56. Discuss containerization in India
- 57. State the need of containerization
- 58. Bring out the benefits of containerization

- 59. What are the types of containers?
- 60. State the disadvantages of containerization

UNIT –IV

- 61. Explain the role of seaborne trade in economic development
- 62. State the limitations of seaborne trade
- 63. State the advantages of seaborne trade
- 64. What are the features of tramp shipping?
- 65. What are the features of liner shipping?

UNIT –V

- 66. State the types of ships
- 67. Write a note on liner shipping industry
- 68. Bring out the types of general cargo
- 69. Bring out the duties & functions of Mercantile Marine Department
- 70. Bring out the organisation and functions of customs department
- 71. What are the salient features and functions of Port Trust?
- 72. What are the categories of bulk cargo?
- 73. Describe the various types of ship in the cargo fleet
- 74. Describe the functions of various authorities in shipping

Semester- VI			
Core - XIII		GROWTH AND DEVELOPMENT	
Course Code: 21UECC63	Hours / week :6	Hrs / Semester: 90	Credits :4

UNIT-I: Concepts of Economic Growth and Economic Development 15 Hrs

Concepts and definitions of Economic growth and development; Growth versus Development - indicators of Economic Growth and Economic Development – Factors affecting Economic Growth; Characteristic features of Underdeveloped Countries.

UNIT-II: Growth Models 15 Hrs

The Classical Harrod - Domar Model; Neo - Classical Solow Model of Long - run Growth; Cambridge Joan Robinson Model of Capital Accumulation; Kaldor Model of Growth.

UNIT-III: Theories of Economic Development 20 Hrs

Karl Marx's theory of Social Change - Surplus Value, Profit and Capitalist Crisis- Leibenstein's Critical Minimum Effort Thesis; Hirschman's Theory of Unbalanced Growth; Gerschenkron's Great Spurt Theory; Myrdal's Theory of Circular Causation.

UNIT-IV: Human Capital Formation 20 Hrs

Population growth and its effects on Economic Development; Human Capital Formation and its role in economic development- Population – Health – Education – Sanitation –Per capita Income

UNIT-V: FDI and MNCs 20 Hrs

Importance of Foreign Trade in Economic Development – FDI, FII: role and importance - Role of Foreign Capital and Aid in economic development; MNCs – role and contribution to economic development.

Text Book:

QUESTION BANK

Core XIII – ECONOMIC GROWTH AND DEVELOPMENT Sub. Code: 21UECC63

III B.A. ECONOMICS - SEMESTER VI

Section – A (1 Mark)

Choose the correct answer: [K1 (Re)]

UNIT –I: Concepts of Economic Growth & Economic Development:

- 1) Economic growth can be defined as an increase in the capacity of an economy to _____.
a) get profit b) incur loss **c) to produce goods and services** d) raise human resources.
- 2) Among the following determinants of growth which is a non- economic factor? **a) Natural resources**
b) Population growth c) Favorable legislation d) Capital accumulation
- 3) _____ is a narrower concept than economic development.
a) Capital growth b) Natural resources c) Human resources **d) Economic growth**
- 4) Economic development is a _____ concept
a) Natural b) Narrow **c) Normative** d) Constricted
- 5) In which year India was ranked 11th in terms of nominal GDP?
a) 1981 b) 1991 c) 2001 **d) 2011**
- 6) The economic growth of a country can be measured by comparing the level of Gross National Product (GNP) of a year with the GNP of a _____.
a) Preset year **b) Previous year** c) Next year d) None
- 7) The book “The Theory of Economic Growth” was written by _____.
a) Maddison **b) Arthur Lewis** c) Schumpeter d) J.R.Hicks
- 8) The term ‘Economic growth’ refers to the problems of **a) Developed countries**
b) Underdeveloped countries c) Democratic countries d) Socialist countries
- 9) Which of the following scenarios explain economic development?
a) Improvement in the distribution system b) Improvement in the technology
c) Improvement in the production **d) All of the above**
- 10) Gross domestic product of a country is the total of its net domestic product and _____.
a) Informal economy b) Earnings on foreign exchange in the domestic country
c) Subsidies on the consumption of goods and services
d) Consumption of capital in the production process

11. Which of the following ministries is responsible for the report on India's national and per capita income? a) Ministry of Home Affairs b) **Ministry of Statistics and Programme Implementation** c) Ministry of Human Resource Development d) Ministry of Planning
12. Economic development refers to a) Economic growth.
b) Economic growth plus changes in output distribution and economic structure.
c) Improvement in the well-being of the urban population.
d) **Sustainable increases in Gross National Product.**
13. The main characteristic of an underdeveloped economy is that it has a _____.
a) **State of deprivation among large proportions of the population**
b) High per capita income
c) A large proportion of the about force is in the tertiary sector d)None of the above

UNIT-II: Growth Models:

- 1) In solow's model of growth, the output per capita is a function of
a) Labour-capital ratio b) **Rate of change of capital-labour ratio**
c) Capital –output ratio d) Technical progress
- 2) Harrod model does not talk about _____
a) Actual growth rate b) **Critical Minimum growth rate**
c) Warranted growth rate d) Natural growth rate
- 3) In Domar's model----- a) **Investment is needed to increase demand as well as supply** b) There is great emphasis on increasing the capital-output ratio c) The classical economics is completely rejected d) The Keynesian economics is completely
- 4) In Harrod model, investment demand is a function of which of the following?
a) **National Income** b) Rate of change in price level
c) Rate of change in national income d) Interest rate
- 5) The growth of population has a bearing on the ----- a) **Natural rate of growth**
b) Actual rate of growth c) warranted rate of growth d) All the above
- 6) The Harrod-Domar growth model suggests that growth is _____
a) **Directly related to savings and inversely related to the capital-output ratio**
b) Directly related to the capital-output ratio and inversely related to the savings
c) Indirectly related to savings and the capital-output ratio
d) Directly related to savings and the capital-output ratio

- 7) The actual rate of growth is defined by Harrod as the rate which is _____
 a) **Determined by the saving ratio and marginal capital –output ratio** b) The full capacity growth rate of income of an economy c) The welfare optimum rate d) None
- 8) The Harrod-Domar growth model of economic growth are based on the experiences of _____
 a) Underdeveloped economics b) Developing economics
 c) **Advanced capitalist economics** d) Socialist economics
7. Identify the model which is concerned with the 'golden age' equilibrium:
 a) Kaldor model b) **Joan Robinson model** c) Keynesian model d) Domar model
8. Identify the model, which analyses the contribution of technological progress to the overall growth rate: a) **Solow Model** b) Kaldor Model c) Harrod Model d) Tobin Model
9. In Joan Robinson's growth model, capital accumulation depends on
 a) Saving-income ratio b) **Profit-wage relation and labour productivity**
 c) Profit-income ratio and capital productivity d) Saving-investment ratio
10. Marx attributed the capitalist crisis to: a) High rate of wages
 b) **Falling rate of profit** c) Inflationary pressures d) Exploitation of labour
11. Who wrote the book of "The Accumulation of Capital"?
 a) **Mrs. Joan Robinson** b) Mr. Joan Robinson c) Domar d) Harrod
12. The steady growth with full employment is known as the ----- age
 a) control b) diversion c) **Golden** d) equilibrium
13. Solow postulates a continuous production function linking output to the inputs of capital and -----
 - which are substitutable. a) **Labour** b) land c) power d) organization
14. India's first five year plan was based on:
 a) Mahalanobis Model b) Feldman Model c) **Harrod- Domar Model** d) Leontief Model

UNIT –III: Theories of Economic Development:

1. Leibenstein introduced _____ theory.
 a) **Critical minimum effort** b) Vicious circle of poverty
 c) Balanced growth d) Stages of Economic growth
2. _____ must be provided before Directly Productive Activities.
 a) SAC b) SEC c) **SOC** d) SQC

3. _____ refers to those forces which reduce the level of output, income, employment and investment.
a) Shocks b) Stimulants c) Prompt d) Restorative
4. Critical minimum effort theory is due to _____.
a) Rosentein Rodan b) W. Arthur Lewis c) J.H.Boeke **d) H. Leibenstein**
5. Marx used his theory of _____ value.
a) price b) Goods **c) surplus** d) balanced
6. The concept of unbalanced growth has been popularized by -----
a) Rosentein **b) Hirschman** c) Nurkse d) Lewis
7. Marx refers to the concept of organic composition of capital. Which of the following ratios stands for this capital? Constant capital = C; Variable capital = V; Surplus value = S
a) C/V b) C/(C+V) **c) C/(V+S)** d) (C+V)/V
8. Which of the following about strategy of unbalanced growth is right?
a) Deliberate imbalance in favor of some sectors b) Simultaneous investment in all sectors
c) Both d) None
9. Who formulated the theory of circular and cumulative causation which explains the perpetuation of underdevelopment through growing inequalities between developed and the underdeveloped countries?
a) Lewis **b) Gunnar Myrdal** c) Higgins d) J. H. Boeke
10. Who proposed a means of defining the 'great spurt' as the moment at which there was sudden explosion in industry and a swift increase in output, which continued to proceed during a period of international recession?
a) Harrod b) Myrdal **c) Gerschenkron** d) Karl Marx

UNIT – IV: Human Capital Formation:

1. Which of the following is not part of the Human Development Index?
a) infant mortality b) life expectancy c) educational attainment d) GDP per capita
2. _____ is a much wider concept than literacy.
a) **Education** b) Health c) Income d) None
3. _____ refers to the ability of human to contribute to the process of value-addition in the economy.
a) Human capital **b) Human Resource** c) Human capital formation d) Human Money

4. Which of the following is NOT a possible benefit of increased population?
 - a) Economies of scale **b) a decrease in the amount of CO2 emissions**
 - c) increased innovation d) Increased Employment
5. Of the world's population, what portion lives in developing countries?
 - a) approximately 35% b) nearly 10 billion people
 - c) less than 1 billion people **d) approximately 80%**
6. Based on the 2002 population survey, four of the five most populous countries include
 - a) China, India, Indonesia, and Brazil** b) Russia, Pakistan, Bangladesh, and Nigeria
 - c) Russia, China, India, and South Africa d) China, Russia, Mexico, and Indonesia.
7. _____ is not the positive effect of population growth on economic development.
 - a) Greater cultural richness b) support of social security systems
 - c) increase the division of labour **d) reduce the level of entrepreneurship**
8. _____ is the negative effect of population growth on economic development.
 - a) Greater cultural richness b) support of social security systems
 - c) a higher risk of disease spread** d) increase the division of labour
9. _____ is the positive effects of Population on Economic Development.
 - a) increased entrepreneurship** b) disease spread
 - c) food and water shortages d) income inequality
10. Which of the followings is the importance of human capital formation in India?
 - a) Boosts productivity b) increase in life expectancy
 - c) improves quality of life **d) All of the above**

UNIT – V: FDI and MNC's:

1. The foreign direct investment includes _____.
 - a) Intellectual properties b) Human resources c) **Tangible goods** d) Intangible goods
2. What is the term for an investment made by a company or individual in one country in business interests in another country, which involves establishing business operations or acquiring business assets in the foreign country?
 - a) International Portfolio Investment **b) Foreign Direct Investment**
 - c) Cross- Border Equity Investment d) Overseas Asset Acquisition.
3. Select an example of Indian Multinational Company.
 - a) Hindusthan Unilever **b) Videocon** c) Cargill d) Tesco

4. Which of the following is the main reason behind the investments of MNCs?
 - a) To benefit foreign countries b) To provide financial support to the country's government
 - c) For the welfare of underprivileged people **d) To increase the assets and earn profits**
5. _____ is not an Indian Multinational Company.
 - a) Unilever** b) Asian Paints c) Piramal d) Wipro
6. MNC Stands for _____.
 - a) Multi-National Cooperation **b) Multi-National Corporation**
 - c) Multi-National Company d) Multi-National Collaboration
7. _____ is the first step in the internationalization process.
 - a) Foreign Investment b) Sales c) Export **d) License**
8. SMEs stands for _____.
 - a) Small and Medium Entrepreneurs b) Small Management of Enterprises
 - c) Small and Medium-sized Enterprises** d) Societies for Managing Exports
9. More expansion of foreign direct investment can boost _____.
 - a) Money circulation b) Demand c) Unemployment **d) Employment**
10. Which of the following are improved when capital and labour are moved internationally?
 - a) Economic growth gains b) Capital gains **c) Gains from income** d) Gains from trade

Section – B (2 Marks)

Answer the following questions in about 50 words each:

UNIT – I: 1. Define economic growth. [K₁ (Re)]

2. Explain the term economic development. [K₂ (Un)]

3. Write a note on capital. [K₁ (Re)]

4. Define percapita income. [K₁ (Re)]

5. Explain the term GDP. [K₂ (Un)]

6. Explain human resources. [K₂ (Un)]

7. Explain the term capital formation. [K₂ (Un)]

8. Write a note on capital formation. [K₁ (Re)]

9. Explain the term leading indicators. [K₂ (Un)]

10. Define Lagging Indicators. [K₁ (Re)]

UNIT – II: Growth Models:

1. Write a short note on an actual growth rate. [K₁ (Re)]

2. Explain the term warranted growth rate. [K₂ (Un)]
3. Define natural growth rate. [K₁ (Re)]
4. Explain Meade's growth model. [K₂ (Un)]
5. Explain the limping golden age. [K₂ (Un)]
6. Define Bastard Golden Age. [K₁ (Re)]
7. Explain the term Restrained Golden Age. [K₂ (Un)]
8. Explain the assumption of Solow's model. [K₂ (Un)]
9. Define galloping platinum age. [K₁ (Re)]
10. Explain the Harrod model. [K₂ (Un)]

UNIT –III: Theories of Economic Development:

1. Explain the Dialectical Materialism. [K₂ (Un)]
2. Define Historical Materialism. [K₁ (Re)]
3. Explain the term capital accumulation. [K₂ (Un)]
4. Write a note on Solow's model. [K₁ (Re)]
5. Write a note on Solow's assumptions. [K₁ (Re)]
6. Explain the term shocks. [K₂ (Un)]
7. Define stimulants. [K₁ (Re)]
8. Write a note on growth agent. [K₁ (Re)]
9. Explain the term zero –sum incentives. [K₂ (Un)]
10. Explain the term positive –sum incentives. [K₂ (Un)]

UNIT – IV: Human Capital Formation:

1. Explain the term human capital formation. [K₂ (Un)]
2. Explain population. [K₂ (Un)]
3. Write a note on per capita income. [K₁ (Re)]
4. Explain migration. [K₂ (Un)]
5. Write a short note on life expectancy. [K₁ (Re)]
6. Define physical capital. [K₁ (Re)]
7. Explain the term human capital. [K₂ (Un)]
8. Write a short note on sanitation. [K₁ (Re)]
9. Define expenditure on health. [K₁ (Re)]
10. Define expenditure on education. [K₁ (Re)]

UNIT – V: FDI and MNC's:

1. Explain the term MNC's. [K₂ (Un)]

2. Discuss foreign capital. [K2 (Un)]
3. Write a short note on an importance of FDI. [K₁ (Re)]
4. Explain Foreign Institutional Investors. [K2 (Un)]
5. Define MNC's. [K₁ (Re)]
6. Explain the term human capital formation. [K2 (Un)]
7. Define Human Resource Development. [K₁ (Re)]
8. Write a short note on India's foreign trade. [K₁ (Re)]
9. Write a short note on India's MNC;s. [K₁ (Re)]
10. Explain FII. [K2 (Un)]

Section -C (5 Marks)

Answer the following questions in about 200 words each:

UNIT – I : Concepts of Economic Growth & Economic Development:

1. Distinguish between economic growth and economic development. [K4 (An)]
2. Examine the factors affecting economic growth. [K4 (An)]
3. Show the differences between economic growth and economic development. [K3 (Ap)]
4. Explain the factors affecting economic growth. [K2 (Un)]
5. Examine the types of economic indicators. [K4 (An)]
6. Show the characteristics of an UDC's. [K3 (Ap)]
7. Explain the differences between economic growth and development. [K2 (Un)]
8. Examine the factors affecting economic growth. [K4 (An)]
9. Show the types of economic indicators. [K3 (Ap)]
10. Explain the characteristics of an UDC's. [K2 (Un)]

UNIT – II: Growth Models:

1. Explain the Harrods's model of economic development. [K2 (Un)]
2. Examine the Domar model. [K4 (An)]
3. Show the assumptions of Harrod and Domar model. [K3 (Ap)]
4. Examine assumptions of Solow's model of economic growth. [K4 (An)]
5. Explain the assumptions of Mrs. John Robinson's model of growth. [K2 (Un)]
6. Examine the Harrod's model growth rates. [K4 (An)]
7. Explain the types of golden age. [K2 (Un)]
8. Show the assumptions of Kaldor's model of growth. [K3 (Ap)]

9. Explain the assumptions of Harrod model. [K2 (Un)]

10. Examine the types of golden age. [K4 (An)]

UNIT – III: Theories of Economic Development:

1. Explain the Marxian theory of economic development. [K2 (Un)]
2. Examine the Marxian philosophy. [K4 (An)]
3. Show the theory of capital accumulation. [K3 (Ap)]
4. Examine shocks & stimulants and the indicators from Leibenstein's Model. [K4 (An)]
5. Compute the criticisms of Leibenstein's Model. [K3 (Ap)]
6. Examine the classifications of investments by Hirschman's model. [K4 (An)]
7. Construct six generalizations of Gerschenkron's model. [K3 (Ap)]
8. Analyse the Myrdal concepts of Spread & backwash effects. [K4 (An)]
9. Critically examine Myrdal's model. [K4 (An)]
10. Explain the Marxian philosophy. [K2 (Un)]

UNIT – IV: Human Capital Formation:

1. Examine the Major sources of human capital in a country. [K4 (An)]
2. Analyse the importance of human capital formation in India. [K4 (An)]
3. Construct the reasons for poor capital formation in India. [K3 (Ap)]
4. Compute the education sector in India. [K3 (Ap)]
5. Explain the weakness of education in India. [K2 (Un)]
6. Examine the role of human capital formation in economic development. [K4 (An)]
7. Distinguish between human capital and human resources. [K4 (An)]
8. Analyse the weakness of education in India. [K4 (An)]
9. Construct the importance of human capital formation in India. [K3 (Ap)]
10. Examine the weakness of education in India. [K4 (An)]

UNIT – V: FDI and MNC's:

1. Analyse Foreign Direct Investments. [K4 (An)]
2. Construct the importance of Foreign Direct Investments. [K3 (Ap)]
3. Show the role of foreign trade in economic development. [K3 (Ap)]
4. Analyse the role of FIIs in India. [K4 (An)]
5. Examine the contribution of MNC's in economic development. [K4 (An)]
6. Analyse the role of Foreign Capital Aid in India's economic development.[K4 (An)]
7. Examine the Foreign Direct Investments. [K4 (An)]

8. Show the importance of Foreign Direct Investments. [K3 (Ap)]
9. Analyse the role of foreign trade in economic development. [K4 (An)]
10. Construct the contribution of MNC's in economic development. [K3 (Ap)]

Section -D (10 Marks)

Answer the following questions in about 400 words each:

UNIT – I : Concepts of Economic Growth & Economic Development:

1. Evaluate the differences between economic growth and economic development. [K5 (Ev)]
2. Evaluate the factors affecting economic growth. [K5 (Ev)]
3. Develop the characteristics of an UDC's. [K6 (Cr)]
4. Design the indicators of economic growth and development. [K6 (Cr)]
5. Combine the characteristics of an UDC's. [K6 (Cr)]
6. Evaluate the characteristics of an UDC's. [K5 (Ev)]
7. Design the differences between economic growth and economic development. [K5 (Ev)]
8. Develop the indicators of economic growth and development. [K6 (Cr)]

UNIT – II: Growth Models:

1. Evaluate Solow's growth model. K5 (Ev)]
2. Design the Harrods's model of economic development. [K6 (Cr)]
3. Evaluate the Domar model. K5 (Ev)]
4. Evaluate Mrs. Joan Robinson's Model of growth models. K5 (Ev)]
5. Design the Harrod and Domar model of growth. [K6 (Cr)]
6. Evaluate Solow's model of economic growth. K5 (Ev)]
7. Design Mrs. Joan Robinson's growth model. [K6 (Cr)]
8. Evaluate Harrod model of economic development. K5 (Ev)]
9. Design Kaldor model of growth. [K5 (Ev)]
10. Evaluate Harrod model of growth. [K5 (Ev)]

UNIT – III: Theories of Economic Development:

1. Evaluate Leibenstein theory of economic development. K5 (Ev)]
2. Design critical minimum effort theory. [K5 (Ev)]

3. Evaluate Gerschenkron's model.
4. Design the Great Spurt theory. [K5 (Ev)]
5. Evaluate the unbalanced growth theory. K5 (Ev)]
6. Formulate Myrdal theory of Circular Causations. [K6 (Cr)]
7. Design Marx's surplus value. [K5 (Ev)]
8. Evaluate Hirschman's theory. K5 (Ev)]
9. Formulate Karl Marx theory of social change. [K6 (Cr)]
10. Design Leibenstein's theory of economic development. K5 (Ev)]

UNIT – IV: Human Capital Formation:

1. Design the major sources and importance of human capital in a country. [K5 (Ev)]
2. Evaluate the capital formation in India. K5 (Ev)]
3. Formulate the role of human capital formation in economic development. [K6 (Cr)]
4. Evaluate the education sector in India. K5 (Ev)]
5. Design the role of human capital formation in India's development. [K5 (Ev)]
6. Formulate the effects of population growth on economic development. [K6 (Cr)]

UNIT – V: FDI and MNC's:

1. Evaluate Foreign Direct Investments. K5 (Ev)]
2. Formulate the role of foreign trade in economic development. [K6 (Cr)]
3. Design the role of human capital formation for India's economic development. [K5(Ev)]
4. Formulate the role of FIIs in India. [K6 (Cr)]
5. Evaluate the contribution of MNC's in economic development. K5 (Ev)]
6. Formulate the role of Foreign Capital Aid in India's economic development.[K4 (An)]
7. Evaluate the Foreign Direct Investments. K5 (Ev)]
8. Design the role of foreign trade in economic development. [K5 (Ev)]
9. Evaluate the contribution of MNC's in economic development. K5 (Ev)]
10. Design the role of FDI in India. [K5 (Ev)]

5. How much does it cost?
6. The bag is square and red.

II. Lisez le passage suivant et répondez aux questions suivantes :

UNIT I

C'est le sixième anniversaire de Jérôme. Il accompagne sa maman au supermarché. Ils vont faire les courses pour préparer un gâteau délicieux.

Maman : Alors Jérôme, qu'est-ce que tu veux comme gâteau d'anniversaire ?

Jérôme : Je veux un grand gâteau au chocolat avec des fraises.

Maman : D'accord, il faut acheter de la farine, du beurre, du lait, des oeufs, du sucre et aussi du chocolat et des fraises.

Jérôme : C'est tout maman ?

Maman : Oui, bien sûr

Jérôme : Mais non, tu oublies le plus important !

Maman : Le plus important ?

Jérôme : Mais, oui maman... mes bougies.

Maman : Ah...oui, et de quelle couleur tu les aimes ?

Jérôme : Jaunes, vertes, rouges et bleues.

Maman : Et combien de bougies il faut acheter ?

Jérôme : Six bougies maman... J'aurai six ans. Moi, je suis grand maintenant.

Répondez aux questions :

1. Jérôme a quel âge ?
2. Pourquoi ils vont au supermarché ?
3. Quel gâteau il veut ?
4. Quelles sont les ingrédients du gâteau ?
5. De quelles couleurs bougies il veut ?
6. Combien de bougies il faut avoir ?

UNIT II

La Mode

Nadine : En quoi Yves Saint Laurent a-t-il donné le pouvoir à la femme ?

Loulou de la Falaise : Je pense que, Yves Saint Laurent admirait beaucoup les femmes et l'idée de faire du prêt-à-porter était pour que toutes les femmes puissent s'habiller avec des beaux vêtements sans devoir dépenser des fortunes. Et aussi, il s'est basé beaucoup sur la garde-robe d'un homme – il le dit dans plein d'interviews d'ailleurs -, qu'il avait remarqué que les hommes avaient plus confiance en eux que les femmes. Il a donné aux femmes ce pouvoir en allant puiser dans la garde-robe masculine mais en la féminisant. Donc la femme était super féminine mais avait le pouvoir, se sentait aussi confiante en elle qu'un homme parce que c'était à l'époque où les femmes commençaient, heureusement, à avoir des grands rôles euh... En plus, ça avait la même facilité que de s'habiller comme un homme qui ne doit pas réfléchir très longtemps le matin pour s'habiller.

Répondez aux questions :

1. Nadine pose quelle question ?
2. Qui répond ?
3. Qui admirait beaucoup les femmes ?
4. Qui avaient plus confiance ?
5. Qui ont des grands rôles ?

III. Faites un petit paragraphe sur un des sujets suivants

UNIT I

1. Présentez-vous.
2. Présentez votre ami(e).

UNIT II

1. Présentez une personnalité célèbre.

UNIT III

1. Décrivez votre ville.
2. Quel moyen de transport tu utilises ? Pourquoi ?

UNIT IV

1. Votre plat préféré et ses ingrédients.
2. Ecrivez une petite liste des courses.

UNIT V

1. Décrivez les vêtements de votre ami.

IV & V Exercice : Exercice de vocabulaire

UNIT I

I. Homme ou Femme ? Accordez les adjectifs de nationalité si nécessaire.

1. Elle est indien__
2. Tu es coréen____, Paula ?
3. Tao est un garçon chinois__
4. Angela est allemand__.
5. Madame Mukete est sénégalais_____
6. Vous êtes américain____, madame.

UNIT II

I. Associez les titres et les personnes :

- | | |
|---------------------------------|--------------------------|
| 1. Dimanche à Bamako | 1. Tahar Ben Jelloun |
| 2. La nuit sacrée | 2. Xavier Dolan |
| 3. Mommy | 3. Mariam Doumbia |
| 4. Si tu écoutes, j'annule tout | 4. Charline Vanhoenacker |

1. Tu aimes les _____ avec Marion Cotillard ?
2. Les _____ de Stromae sont en français.
3. J'aime les _____ de Victor Hugo.
4. A la radio, J'aime les _____ de musique.

III. Associez les éléments des deux colonnes :

- | | |
|------------------------|---|
| 1. Nom | a. 07 52 50 89 34 |
| 2. Adresse mail | b. Charlotte |
| 3. Indicatif pays | c. charlotte.balmas@webmail.com |
| 4. Prénom | d. 27 Octobre 1986 |
| 5. Numéro de téléphone | e. Balmas |
| 6. Nationalité | f. +33 |
| 7. Date de naissance | g. Nice |
| 8. Lieu de naissance | h. française |

IV. Ecrivez les nombres en lettres :

1. 88
2. 99
3. 76
4. 92
5. 83
6. 71
7. 96
8. 77

UNIT III

I. Trouvez l'intrus :

1. Le tennis – la natation – l'athlétisme – la lecture
2. La musique – le mail – la peinture – le cinéma
3. Le Niger – la France – le Mali – le Sénégal

II. Trouvez l'intrus :

1. La cathédrale – la gare – le pont – la banque
2. L'avenue – la banque – le quai – la rue
3. La poste – l'école – la place – le musée
4. Le théâtre – le quartier – le boulevard – la tour

III. Retrouver les lieux :

1. Je rencontre le professeur a _____
2. Nous cherchons des livres a _____

3. La _____ Eiffel est à Paris.
4. La nature dans la ville ? visitez le _____

IV. Associez les pays et les villes francophones :

- | | |
|----------------|--------------|
| 1. Le Sénégal | 1. Bamako |
| 2. La Belgique | 2. Genève |
| 3. Le Canada | 3. Dakar |
| 4. Le Mali | 4. Bruxelles |
| 5. La Suisse | 5. Québec |

V. Complétez avec une profession au masculin ou au féminin :

1. Elodie est musicienne. Leo est _____.
2. Alexandre est ingénieur. Julie est _____.
3. Elle est photographe. Il est _____.
4. François est animateur. Margot est _____.

VI. Associez

- | | |
|---|----------------------|
| 1. Il travaille pour la télévision. | 1. L'infirmier |
| 2. Il travaille à l'université. | 2. Le professeur |
| 3. Elle distribue les lettres et les cartes postales. | 3. Le présentateur |
| 4. Il travaille dans un hôpital. | 4. la factrice |
| 5. Elle travaille avec un ordinateur | 5. L'informaticienne |

VII. Trouvez l'intrus :

1. Une école – un musée – une place – une bibliothèque
2. Une voiture – un bus – un taxi – un vélo
3. Une cathédrale – un théâtre – une rue – un musée
4. Un boulevard – une rivière – un carrefour – une avenue

VIII. Trouvez la bonne profession :

1. Un photographe/ médecin travaille à l'hôpital.
2. Un musicien/ journaliste fait de la musique.
3. Un facteur/ acteur joue dans des films.

4. Un serveur/ pharmacien travaille dans un restaurant.

UNIT IV

I. Complétez avec les mots : *barquette / bouteille / kilo / morceau / part*

1. Un _____ raisin.
2. Une _____ jus de pomme.
3. Une _____ de fraises.
4. Un _____ de camembert.
5. Une _____ de tarte.

II. Complétez les phrases avec les mots :

Commandes / formule / menu / plat / pourboire / serveur / sucre

1. Quel est le _____ du jour ? - Regarde sur le _____ ! C'est écrit !
2. Le _____ est très gentil : il prend les _____ avec le sourire.
3. Il faut donner un _____ a la serveuse !
4. Je prends une _____ avec entrée et dessert.
5. S'il vous plait, je voudrais un v pour couper la viande.
6. Je prends du _____ avec le café.

III. Trouvez l'intrus :

1. Une fraise – une orange – une banane – une salade
2. Un verre – un café – une fourchette – une assiette
3. Agréable – sympa – malpoli – joli
4. Un pourboire – un soda – un jus – un thé

IV. Reliez les éléments des deux colonnes :

- | | |
|----------------------|--------------------|
| 1. Les carottes | a. la boulangerie |
| 2. Le camembert | b. la poissonnerie |
| 3. Les fruits de mer | c. le primeur |
| 4. La viande | d. la fromagerie |
| 5. La baguette | e. la boucherie |
| 6. La crème | |

V. Trouvez l'intrus

1. Le pantalon – le jean – l'imperméable – le sac à main – la chemise
2. Beige – mauvais – blanc – bleu – gris
3. Les bijoux – la ceinture – les chaussures – la chemise – les bottes
4. En été – en coton – en cuir – en jean – en laine

VI. Associez les situations à la météo :

- | | |
|---|--|
| 1. Je prends mon imperméable et mon parapluie | a. il fait chaud |
| 2. Je ne prends pas mon chapeau | b. il pleut |
| 3. Je porte des vêtements en coton. | C. il fait froid |
| 4. Je ne peux pas sortir. | D. il y a du soleil |
| 5. Je porte un gros pull et un manteau | e. il neige, il y a du vent et il fait - |
| 10 | |
| 6. Je prends mes lunettes de soleil et un chapeau | f. il y a du vent |

UNIT V

I. Dites le contraire :

- a. Ce portefeuille est grand et légère.
- b. Ces lunettes sont petites et légères.
- c. Cette valise est lourde.

II. Complétez le texte avec les adjectifs :

Beau / cher / clair / large / lourd

1. Ce jean est très _____. Il est trop grand pour moi !
2. Tu peux m'aider à porter ce sac très _____ ?
3. Cette jupe coûte 90 euros, elle est _____ !
4. Je vais trouver un _____ costume pour la fête.
5. Pour les vestes, en général, je préfère les couleurs _____. Le blanc, par exemple.

III. Complétez les phrases avec le vocabulaire de la météo :

pluie - vent - beau - neige - orage - nuage

1. Il y a de la _____, je prends mon parapluie !
2. Il fait _____ ! Vite, mes lunettes de soleil !
3. Le ciel est gris, il y a beaucoup de _____.

4. En hiver, au Canada, il y a souvent de la _____, c'est joli quand c'est tout blanc !
5. Je ne prends pas mon chapeau. Il y a du _____ .
6. Il ne faut pas toucher des appareils électriques pendant l'_____.

IV. Trouvez l'intrus

1. Un téléphone – un clavier – un écran – une souris
2. Une veste – un pull – un portefeuille – un manteau
3. Un chapeau – des lunettes – une liseuse – une ceinture
4. Un sac à dos – une écharpe – un sac de sport – une valise

V. Associez les questions aux réponses :

- | | |
|----------------------------------|-------------------------------|
| 1. Quelle est votre taille ? | a. elle est grande et carrée. |
| 2. Quelle est votre pointure ? | b. Ce n'est pas cher. |
| 3. Ça sert à quoi ? | c. Je fais du 40 |
| 4. Ça coûte combien ? | d. Il est petit et léger. |
| 5. Comment est le portefeuille ? | e. Je chausse du 46. |
| 6. Comment est cette valise ? | f. C'est pour écrire et lire. |

VI. Complétez le dialogue avec les mots suivants :

DVD – lourde – liseuse – valise – ordinateur portable - rond

Ernest : Quel sac tu prends pour voyager ?

Léa : Le sac de sport.

Ernest : Il est _____ et petit ! Pourquoi tu ne prends pas la _____ ?

Léa : Elle est _____ et elle n'est pas pratique.

Ernest : Tu prends l'_____ pour regarder des _____ dans le train ?

Léa : non, Je préfère la _____, je vais lire.

SECTION D

UNIT I

I. Homme ou Femme ? Accordez les adjectifs de nationalité si nécessaire.

1. Elle est indien__
2. Tu es coréen____, Paula ?
3. Tao est un garçon chinois__
4. Angela est allemand__.
5. Madame Mukete est sénégalais_____
6. Vous êtes américain____, madame.

II. Complétez les phrases.

1. J'aime _____ escalade et _____ boxe.
2. Julia aime _____ basket.
3. Tu aimes _____ France ?
4. J'aime _____ Comores, _____ Brésil et _____ chine.

UNIT II

I. Complétez avec a, au, en aux :

1. J'habite _____ Pérou, _____ Lima.
2. Je suis ne _____ Amsterdam, _____ Pays-Bas.
3. Vous habitez _____ Toronto ?
4. Tu vis _____ Uruguay ?
5. Tu es ne _____ Italie ?
6. J'habite _____ Brésil.

II. Mettez les éléments de la phrase dans l'ordre.

1. Aime / Je / pas / musique / n' / la
2. En / habites / n' / France ? / Tu / pas
3. Chinois / pas / parles / Tu / ne
4. Est / cubain / il / n' / pas
5. Pas / n' / est / elle / chanteuse

III. Transformez les phrases à la forme négative :

1. J'aime le sport.

2. Nous sommes belges
3. Paul a le numéro de Marie.
4. Je vis à Hong-Kong.
5. Elle est chanteuse.

IV. Complétez avec le, la, les, l'

1. Johanna aime _____ danse.
2. Vous aimez _____ France ?
3. Je n'aime pas _____ chocolat.
4. Helena aime _____ Italie et _____ Philippines.
5. Tu aimes _____ lecture.

V. Complétez avec a, au, en, aux

1. Je suis suisse et j'habite _____ Pologne.
2. Je suis malien, je suis né _____ Bamako.
3. Oui, j'habite _____ Rabat : Je suis marocaine.
4. Je vis _____ Canada.
5. Je travaille _____ Etats-Unis.

VI. Complétez les phrases avec le, la, les ou l'

1. Leonard habite à Paris. Il aime _____ France, _____ peinture et _____ cinéma.
2. Stefano est italien. Il aime _____ Italie, _____ musique et _____ athlétisme.
3. Silvia est Turque. Elle aime _____ danse et _____ escalade.
4. Jan habite à Munich. Il aime _____ Allemagne, _____ boxe et _____ basket.
5. Jude est anglais. Il aime _____ films américains et _____ tennis.

VII. Complétez les phrases :

1. Je suis ne _____ Maroc, _____ Tanger.
2. J'habite _____ Allemagne, _____ Berlin.
3. Pierre est ne _____ Paris, _____ France.
4. Clara habite _____ Etats-Unis, _____ New York.
5. Yan est ne _____ Chine, _____ Pékin.

VIII. Mettez les mots dans l'ordre pour former des phrases :

1. Je / a / Buenos Aires, / ne / Argentine / suis / en
2. Est / habite / elle / Sarah / hongroise, / Budapest. / a
3. Nina / habite / Portugal. / Lisbonne, / au / a
4. Habite / Johannesburg, / en / Afrique du sud / Lionel / a
5. Nibs / anglais / a / ne / est / est / Londres / il

IX. Conjuguez les verbes :

1. Pierre (avoir) _____ 35 ans.
2. Tu (s'appeler) _____ Franck ?
3. Léonie (être) _____ née en Australie.
4. Paul et Victoria (être) _____ espagnols.
5. Il (s'appeler) _____ Christophe.

X. Répondez aux questions et utilisez la forme négative :

1. Elle s'appelle Sarah ? – Non, _____
2. Noé aime la natation ? – Non, _____
3. Tu aimes la musique québécoise ? – Non, _____
4. Clara vit en Roumanie ? – Non, _____
5. Est-ce que Sophie parle allemand ? – Non, _____
6. Pierre a 32 ans ? – Non, _____

XI. Complétez les phrases :

1. Juan habite en _____, il est espagnol.
2. Faoumata est née au Mali, elle est _____
3. Maria est _____, elle habite en Argentine.
4. Nasser est né au _____, il est nigérien.
5. Nathalie habite au Vietnam, elle est _____
6. Iga est _____, elle est née en Pologne.

UNIT-III

I. Trouvez la bonne réponse :

1. Dans le quartier historique, il y a un/ le musée.
2. Une/ La Tour Eiffel est à Paris.
3. Ici, vous avez un/l'opéra Garnier.
4. Je visite des/ les villes en Suisse.

4. I succeeded with a colour pencil.
5. I showed my masterpiece to the big people.
6. They always need explanations.

II. Lisez le passage suivant et répondez aux questions suivantes :

UNIT I

M. et Mme. Martin se lèvent à 6h 30 et, comme d'habitude, ils prennent au petit-déjeuner : deux tartines beurrées et une tasse de café noir. Puis ils prennent une douche. Pendant que Mme. Martin se maquille soigneusement, son mari se rase et s'habille.

Ils vivent en banlieue, alors ils doivent partir tôt le matin. M. Martin prend la voiture tous les matins, il met 45 minutes pour aller au travail mais sa femme travaille dans un bureau près de chez eux, alors elle marche pendant 10 minutes.

À midi, c'est la pause déjeuner. M. Martin va au restaurant avec ses collègues de bureau et ils reprennent le travail à 13h 30.

Mme. Martin finit son travail à 15h 30. Elle prend le bus pour aller au centre-ville pour faire quelques courses. Après, elle rentre chez elle vers 16h 45.

À 19h, M. Martin rentre chez lui après avoir passé plus d'une heure dans les embouteillages. Il se détend un peu jusqu'à l'heure du dîner.

À 20h 30, ils dînent et ensuite ils regardent la télévision avant d'aller se coucher.

Répondez aux questions :

1. Quand M. et Mme. Martin se lèvent ?
2. Qu'est-ce que M. Martin fait quand Mme. Martin se maquille ?
3. Comment Mme. Martin va au travail ?
4. Où M. Martin va pour le déjeuner ?
5. Quand Mme. Martin rentre chez elle ?
6. Qu'est-ce qu'ils font avant d'aller se coucher ?

UNIT II

La Fête de la Musique

La Fête de la Musique existe depuis 1981. Normalement, elle a lieu chaque année le 21 juin. La particularité de cette fête est qu'elle se passe la plupart du temps dans la rue. Cette fête, comme son nom l'indique, a pour thème la musique et rassemble tous ceux qui veulent jouer ou écouter de la musique. Les musiciens doivent juste prévenir la mairie qu'ils ont l'intention de jouer dans la rue ce jour-là et la mairie leur proposera un lieu.

Cette fête est gratuite et réunit tout le monde en un même endroit. Selon l'heure de la journée on verra plus ou moins de jeunes, de personnes âgées, de familles. Mais tout le monde partagera un moment de convivialité.

Ce jour-là, toutes les musiques sont au rendez-vous : jazz, rap, classique, hip hop. Parfois, la Fête de la Musique a lieu le samedi suivant afin qu'un maximum de monde y assiste. C'est notamment le cas dans les petites villes et les villages qui vont organiser un concert à cette occasion.

Répondez aux questions :

1. Depuis quand existe la fête de la musique ?
2. Quand on fête la fête de la musique ?
3. Est-ce qu'on paye pour participer dans cette fête ?
4. Pour qui est cette fête ?
5. De quel type de musique on peut écouter pendant la fête ?

UNIT III

Ma maison idéale

Ma maison idéale est à côté de la plage. J'aime habiter près de la plage parce que la vie est plus calme qu'en ville. Cette maison est vieille, traditionnelle, faite de bois et de pierre. Elle n'est pas trop grande, mais il y a un jardin avec de grands arbres. Il y a deux étages, comme ça je peux regarder la mer du balcon. Il y a un grenier où se trouve ma chambre.

Ma maison idéale a trois chambres en haut, avec de grandes fenêtres d'où on peut voir la plage. Ma chambre a tout ce qu'il me faut : un lit, un divan, une armoire, un bureau, un ordinateur, une télé, une chaîne stéréo et une bibliothèque. J'ai tous mes posters préférés aux murs. La maison a deux salles de bains, comme ça je ne suis pas toujours obligé d'attendre ma sœur. En bas il y a une salle de séjour avec des divans et des fauteuils confortables, une

grande télévision et un billard. Il y a aussi une chambre d'invités pour mes amis quand ils dorment à la maison. La cuisine a un frigo et des placards pleins de mes nourritures préférées, surtout de beaucoup de chocolat. Il y a une buanderie et un garage où je mets mon vélo et ma planche de surf. Je n'ai pas besoin de piscine, parce que la plage est tout près. J'espère un jour pouvoir vivre dans une maison pareille pour de vrai.

Répondez aux questions :

1. Pourquoi la maison idéale est à cote de la plage ?
2. Il y a combien de chambres ?
3. Qu'est-ce qu'il y a dans la chambre ?
4. Qu'est-ce qu'il y a dans la cuisine ?
5. Où est-ce qu'il met son vélo ?

UNIT IV

Chère Marie,

Bonjour de Nice où je suis en vacances avec mes parents, ma tante et mon oncle.

J'ai passé le brevet en juin. C'était difficile. Maintenant, je me relaxe ! Je suis arrivé en avion hier. Le voyage s'est bien passé. Il fait beau mais trop chaud ! Nous séjournons dans un bel hôtel au bord de la mer. Il y a une piscine et la nourriture est bonne. Je mange du poisson frais et de la pizza tous les jours. C'est délicieux ! Nous passerons une semaine ici et nous resterons dans un camping pendant quatre jours.

Comment se sont passés tes examens ? Comment se passent tes vacances à Biarritz ? Ta famille d'accueil est sympa ?

Amitiés,

Lucas

Répondez aux questions :

1. Qui écrit cette lettre ? à qui ?
2. Où est Lucas ?
3. Avec qui Lucas est en vacances ?
4. Qu'est-ce qu'il mange tous les jours ?
5. Quelles sont les questions qu'il pose à Marie ?

III. Faites un petit paragraphe sur un des sujets suivants

UNIT I

1. Votre routine.
2. Qu'est-ce que vous aimez faire ? Qu'est-ce que vous n'aimez pas faire ?

UNIT II

1. Ma famille
2. Décrivez votre ami.

UNIT III

1. Décrivez votre maison.
2. Ecrivez une lettre à vos voisins pour annoncer un événement et vous excuser à l'avance.

SECTION-C

SECTION-C : I. Lisez le passage suivant et répondez aux questions suivantes :

UNIT I

M. et Mme. Martin se lèvent à 6h 30 et, comme d'habitude, ils prennent au petit-déjeuner : deux tartines beurrées et une tasse de café noir. Puis ils prennent une douche. Pendant que Mme. Martin se maquille soigneusement, son mari se rase et s'habille.

Ils vivent en banlieue, alors ils doivent partir tôt le matin. M. Martin prend la voiture tous les matins, il met 45 minutes pour aller au travail mais sa femme travaille dans un bureau près de chez eux, alors elle marche pendant 10 minutes.

À midi, c'est la pause déjeuner. M. Martin va au restaurant avec ses collègues de bureau et ils reprennent le travail à 13h 30.

Mme. Martin finit son travail à 15h 30. Elle prend le bus pour aller au centre-ville pour faire quelques courses. Après, elle rentre chez elle vers 16h 45.

À 19h, M. Martin rentre chez lui après avoir passé plus d'une heure dans les embouteillages. Il se détend un peu jusqu'à l'heure du dîner.

À 20h 30, ils dînent et ensuite ils regardent la télévision avant d'aller se coucher.

Répondez aux questions :

1. Quand M. et Mme. Martin se lèvent ?
2. Qu'est-ce que M. Martin fait quand Mme. Martin se maquille ?
3. Comment Mme. Martin va au travail ?
4. Où M. Martin va pour le déjeuner ?
5. Quand Mme. Martin rentre chez elle ?
6. Qu'est-ce qu'ils font avant d'aller se coucher ?

UNIT II

C'est le sixième anniversaire de Jérôme. Il accompagne sa maman au supermarché. Ils vont faire les courses pour préparer un gâteau délicieux.

Maman : Alors Jérôme, qu'est-ce que tu veux comme gâteau d'anniversaire ?

Jérôme : Je veux un grand gâteau au chocolat avec des fraises.

Maman : D'accord, il faut acheter de la farine, du beurre, du lait, des oeufs, du sucre et aussi du chocolat et des fraises.

Jérôme : C'est tout maman ?

Maman : Oui, bien sûr

Jérôme : Mais non, tu oublies le plus important !

Maman : Le plus important ?

Jérôme : Mais, oui maman... mes bougies.

Maman : Ah... oui, et de quelle couleur tu les aimes ?

Jérôme : Jaunes, vertes, rouges et bleues.

Maman : Et combien de bougies il faut acheter ?

Jérôme : Six bougies maman... J'aurai six ans. Moi, je suis grand maintenant.

Répondez aux questions :

1. Jérôme a quel âge ?
2. Pourquoi ils vont au supermarché ?
3. Quel gâteau il veut ?
4. Quelles sont les ingrédients du gâteau ?
5. De quelles couleurs bougies il veut ?
6. Combien de bougies il faut avoir ?

UNIT III

Dans une vie vous prenez environ 50000 repas. Si vous comptez un moyen d'une heure par repas, Vous passez environ six ans de votre vie à manger. Est-ce que comme 42% des Français, vous préférez toujours le bifteck-frites ? maitresses de maison françaises, un repas traditionnel avec une entrée, du poisson ou de la viande, de la salade, du fromage, un dessert et des vins ? Les Français ont deux records du monde: celui de la consommation de vin et celui de la consommation d'eau minérale!

Questions

- a. Combien de repas prend-on dans sa vie ?
- b. Combien d'ans passe-on de votre vie à manger ?
- c. Quels sont les plats préférés des Français ?
- d. Qu'offrent les maitres de maison à leurs invités ?
- e. Combien y-a-t-il de plats dans un repas traditionnel ?
- f. Donnez un titre pour ce passage.

UNIT IV

La Mode

Nadine : En quoi Yves Saint Laurent a-t-il donné le pouvoir à la femme ?

Loulou de la Falaise : Je pense que, Yves Saint Laurent admirait beaucoup les femmes et l'idée de faire du prêt-à-porter était pour que toutes les femmes puissent s'habiller avec des beaux vêtements sans devoir dépenser des fortunes. Et aussi, il s'est basé beaucoup sur la garde-robe d'un homme – il le dit dans plein d'interviews d'ailleurs -, qu'il avait remarqué que les hommes avaient plus confiance en eux que les femmes. Il a donné aux femmes ce pouvoir en allant puiser dans la garde-robe masculine mais en la féminisant. Donc la femme était super féminine mais avait le pouvoir, se sentait aussi confiante en elle qu'un homme parce que c'était à l'époque où les femmes commençaient, heureusement, à avoir des grands rôles euh... En plus, ça avait la même facilité que de s'habiller comme un homme qui ne doit pas réfléchir très longtemps le matin pour s'habiller.

Répondez aux questions :

1. Nadine pose quelle question ?
2. Qui répond ?
3. Qui admirait beaucoup les femmes ?
4. Qui avaient plus confiance ?
5. Qui ont des grands rôles ?

UNIT V

Martine Gomez est petite et elle ne fait jamais de grandes choses. Sa vie est triste. Elle habite à côté du canal Saint- Martin depuis plus de trente ans. Elle le traverse à pied tous les matins, sur le pont de la rue, pour prendre le métro, place de République. Car elle travaille près de l'Opéra, au fond d'un grand bureau. Martine Gomez n'a pas d'amis et le soleil n'est pas bon pour sa peau. Elle ne se promène jamais dans son quartier. Elle a peur de l'eau et donc du canal. A soixante ans, épuisés par le travail, elle sort peu de son grand studio.

Questions :

8. Nous aimons la noix.
9. Cela se passait en pleine nuit.
10. Tu n'es pas ma mère.

(Ou)

19.b. Traduisez le passage suivant en anglais :

UNIT I

Le Loup ne fut pas longtemps à arriver à la maison de la mère-grand ; il heurte : Toc, toc. Qui est là ? C'est votre petite fille le Petit Chaperon rouge (dit le Loup, en contrefaisant sa voix) qui vous apporte une galette et un petit pot de beurre que ma mère vous envoie. La bonne mère-grand, qui était dans son lit à cause qu'elle se trouvait un peu mal, lui cria : Tire la chevillette, la bobinette cherra. Le Loup tira la chevillette et la porte s'ouvrit. Il se jeta sur la bonne femme, et la dévora en moins de rien ; car il y avait plus de trois jours qu'il n'avait mangé. Ensuite il ferma la porte, et s'alla coucher¹⁵ dans le lit de la mère-grand, en attendant le Petit Chaperon rouge, qui quelque temps après vint heurter à la porte.

UNIT II

Le roi Nabussan confia sa peine au sage Zadig. Vous qui savez tant de belles choses, lui dit-il, ne sauriez-vous pas le moyen de me faire trouver un trésorier qui ne me vole point? Assurément, répondit Zadig, je sais une façon infailible de vous donner un homme qui ait les mains nettes. Le roi charmé lui demanda, en l'embrassant, comment il fallait s'y prendre. Il n'y a, dit Zadig, qu'à faire danser tous ceux qui se présenteront pour la dignité de trésorier, et celui qui dansera avec

le plus de légèreté sera infailliblement le plus honnête homme. Vous vous moquez, dit le roi; voilà une plaisante façon de choisir un receveur de mes finances! Quoi! vous prétendez que celui qui fera le mieux un entrechat sera le financier le plus intègre et le plus habile! Je ne vous réponds pas qu'il sera le plus habile, repartit Zadig; mais je vous assure que ce sera indubitablement le plus honnête homme.

UNIT III

Si elles ne viennent pas ? répéta le vieillard en sanglotant. Mais je serai mort, mort dans un accès de rage, de rage ! La rage me gagne ! En ce moment, je vois ma vie entière. Je suis dupe elles ne m'aiment pas, elles ne m'ont jamais aimé ! cela est clair. Si elles ne sont pas venues, elles ne viendront pas. Plus elles auront tardé, moins elles se décideront à me faire cette joie. Je les connais. Elles n'ont jamais su rien deviner de mes chagrins, de mes douleurs, de mes besoins, elles ne devineront pas plus ma mort; elles ne sont seulement pas dans le secret de ma tendresse. Oui, je le vois, pour elles, l'habitude de m'ouvrir les entrailles a ôté du prix à tout ce que je faisais. Elles auraient demandé à me crever les yeux, je leur aurais dit : « Crevez-les ! Je suis trop bête. Elles croient que tous les pères sont comme le leur.

UNIT IV

L'asile de vieillards est à Marengo, à quatre-vingt kilomètres d'Alger. Je prendrai l'autobus à deux heures et j'arriverai dans l'après-midi. Ainsi, je pourrai veiller et je rentrerai demain soir. J'ai demandé deux jours de congé à mon patron et il ne pouvait pas me les refuser avec une excuse pareille. Mais il n'avait pas l'air content. Je lui ai même dit: « Ce n'est pas de ma faute. » Il n'a pas répondu. J'ai pensé alors que je n'aurais pas dû lui dire cela. En somme, je n'avais pas à m'excuser. C'était plutôt à lui de me présenter ses condoléances. Mais il le fera sans doute après-demain, quand il me verra en deuil. Pour le moment, c'est un peu comme si maman n'était pas morte. Après l'enterrement, au contraire, ce sera une affaire classée et tout aura revêtu une allure plus officielle.

UNIT V

Nous sommes assis à la table de la cuisine avec nos feuilles quadrillées, nos crayons, et le Grand Cahier. Nous sommes seuls.

L'un de nous dit : Le titre de ta composition est « L'arrivée chez Grand-Mère. »

L'autre dit: Le titre de ta composition est: « Nos travaux. »

Nous nous mettons à écrire. Nous avons deux heures pour traiter le sujet et deux feuilles de papier à notre disposition.

Au bout de deux heures nous échangeons nos feuilles, chacun de nous corrige les fautes d'orthographe de l'autre à l'aide du dictionnaire et, en bas de la page, écrit ; « Bien », ou « Pas bien ». Si c'est « Pas bien », nous jetons la composition dans le feu et nous essayons de traiter le même sujet à la façon suivante. Si c'est « Bien », nous pouvons recopier la composition dans le Grand Cahier.

7. Comme la vie est lente.
8. Ce n'est pas de ma faute.
9. J'étais un peu étourdi.
10. Il a perdu son oncle.

UNIT V

1. We are alone.
2. We eat a lot of coconut.
3. They both were slaves.
4. I miss my mother a lot.
5. I abandon them.
6. Nous nous mettons à écrire.
7. Nous avons une règle très simple.
8. Nous aimons la noix.
9. Cela se passait en pleine nuit.
10. Tu n'es pas ma mère.

(Ou)

19.b. Traduisez le passage suivant en anglais :

UNIT I

Le Loup ne fut pas longtemps à arriver à la maison de la mère-grand ; il heurte : Toc, toc. Qui est là ? C'est votre petite fille le Petit Chaperon rouge (dit le Loup, en contrefaisant sa voix) qui vous apporte une galette et un petit pot de beurre que ma mère vous envoie. La bonne mère-grand, qui était dans son lit à cause qu'elle se trouvait un peu mal, lui cria : Tire la chevillette, la bobinette cherra. Le Loup tira la chevillette et la porte s'ouvrit. Il se jeta sur la bonne femme, et la dévora en moins de rien ; car il y avait plus de trois jours qu'il n'avait mangé. Ensuite il ferma la porte, et s'alla coucher¹⁵ dans le lit de la mère-grand, en attendant le Petit Chaperon rouge, qui quelque temps après vint heurter à la porte.

UNIT II

Le roi Nabussan confia sa peine au sage Zadig. Vous qui savez tant de belles choses, lui dit-il, ne sauriez-vous pas le moyen de me faire trouver un trésorier qui ne me vole point? Assurément, répondit Zadig, je sais une façon infailible de vous donner un homme qui ait les mains nettes. Le roi charmé lui demanda, en l'embrassant, comment il fallait s'y prendre. Il n'y a, dit Zadig, qu'à faire danser tous ceux qui se présenteront pour la dignité de trésorier, et celui qui dansera avec

le plus de légèreté sera infailliblement le plus honnête homme. Vous vous moquez, dit le roi; voilà une plaisante façon de choisir un receveur de mes finances! Quoi! vous prétendez que celui qui fera le mieux un entrechat sera le financier le plus intègre et le plus habile! Je ne vous réponds pas qu'il sera le plus habile, repartit Zadig; mais je vous assure que ce sera indubitablement le plus honnête homme.

UNIT III

Si elles ne viennent pas ? répéta le vieillard en sanglotant. Mais je serai mort, mort dans un accès de rage, de rage ! La rage me gagne ! En ce moment, je vois ma vie entière. Je suis dupe elles ne m'aiment pas, elles ne m'ont jamais aimé ! cela est clair. Si elles ne sont pas venues, elles ne viendront pas. Plus elles auront tardé, moins elles se décideront à me faire cette joie. Je les connais. Elles n'ont jamais su rien deviner de mes chagrins, de mes douleurs, de mes besoins, elles ne devineront pas plus ma mort; elles ne sont seulement pas dans le secret de ma tendresse. Oui, je le vois, pour elles, l'habitude de m'ouvrir les entrailles a ôté du prix à tout ce que je faisais. Elles auraient demandé à me crever les yeux, je leur aurais dit : « Crevez-les ! Je suis trop bête. Elles croient que tous les pères sont comme le leur.

UNIT IV

L'asile de vieillards est à Marengo, à quatre-vingt kilomètres d'Alger. Je prendrai l'autobus à deux heures et j'arriverai dans l'après-midi. Ainsi, je pourrai veiller et je rentrerai demain soir. J'ai demandé deux jours de congé à mon patron et il ne pouvait pas me les refuser avec une excuse pareille. Mais il n'avait pas l'air content. Je lui ai même dit: « Ce n'est pas de ma faute. » Il n'a pas répondu. J'ai pensé alors que je n'aurais pas dû lui dire cela. En somme, je n'avais pas à m'excuser. C'était plutôt à lui de me présenter ses condoléances. Mais il le fera sans doute après-demain, quand il me verra en deuil. Pour le moment, c'est un peu comme si maman n'était pas morte. Après l'enterrement, au contraire, ce sera une affaire classée et tout aura revêtu une allure plus officielle.

UNIT V

Nous sommes assis à la table de la cuisine avec nos feuilles quadrillées, nos crayons, et le Grand Cahier. Nous sommes seuls.

L'un de nous dit : Le titre de ta composition est « L'arrivée chez Grand-Mère. »

L'autre dit: Le titre de ta composition est: « Nos travaux. »

Nous nous mettons à écrire. Nous avons deux heures pour traiter le sujet et deux feuilles de papier à notre disposition.

Au bout de deux heures nous échangeons nos feuilles, chacun de nous corrige les fautes d'orthographe de l'autre à l'aide du dictionnaire et, en bas de la page, écrit ; « Bien », ou « Pas bien ». Si c'est « Pas bien », nous jetons la composition dans le feu et nous essayons de traiter le même sujet à la façon suivante. Si c'est « Bien », nous pouvons recopier la composition dans le Grand Cahier.

- i. Il _____ téléphone a ses amis.
- ii. Ses amis l'_____ invite chez eux.
- iii. Ils _____ venus le chercher en voiture.
- iv. Après le déjeuner, ils _____ alles au musée du Louvre.
- v. Ils _____ visite l'aile Richelieu.
- vi. Ils _____ vu la Joconde ? Elle est superbe.
- vii. La visite _____ dure environ 2 heures.
- viii. Enfin, ils _____ pris une bière ensemble pour se reposer.

9. Réécrivez ces phrases au passé composé

- i. Il suit des cours de dessin à partir de h1854.
- ii. En 1858, il devient mouleur pour gagner sa vie.
- iii. Il rencontre Rose, sa future femme, en 1864.
- iv. Il fait la guerre de 1870.
- v. A partir de 1880, il entreprend ses grandes œuvres : Les Portes de l'Enfer, le Penseur.
- vi. Il obtient ensuite un atelier où il rencontre Camille Claudel.
- vii. En 1887, il reçoit la Légion d'honneur et connaît la gloire.
- viii. Il vit une grande carrière de sculpteur et il meurt le 17 novembre 1917.

10. Transformez les phrases au pluriel :

- i. Elle a rendu visite à des amis.
- ii. Tu es partie à la campagne ?
- iii. J'ai vu un beau film à la télé.
- iv. Elle est allée en discothèque.
- v. Tu as nettoyé le jardin ?
- vi. Il est passe chez nous pour enregistrer un disque.
- vii. Elle a fait une jolie promenade.
- viii. Je suis rentrée de bonne heure aujourd'hui.

UNIT II

1. Remplacez le présent par l'imparfait :

- i. Aujourd'hui, je vais à l'université. - Il y a 5 ans,
- ii. Aujourd'hui, vous êtes marié. - Il y a 20 ans,
- iii. Aujourd'hui, ils ont des problèmes. - Il y a 2 ans,
- iv. Aujourd'hui, on travaille de bonne heure. - Il y a 20 ans,
- v. Aujourd'hui, on voit des amis. Il y a 1 an,
- vi. Aujourd'hui, elle fait du ski. - Il y a 10 ans,
- vii. Aujourd'hui, tu parles anglais. - Il y a 3 ans,
- viii. Aujourd'hui, nous écoutons la radio. - Il y a 20 ans

2. Singulier/Pluriel. Réécrivez ces phrases sur le modèle donne

Exemple: Elle bavardait beaucoup → Elles bavardaient beaucoup

- i. Tu mettais de beaux vêtements le dimanche.
- ii. Je voulais réussir dans la vie.
- iii. Elle devait travailler tard le soir.
- iv. Tu allumais le feu tous les matins.
- v. Il ne pouvait pas toujours répondre, ils ne pouvaient.
- vi. Je mettais la table à chaque repas.
- vii. Tu démenageais souvent.
- viii. Elle faisait quelquefois la cuisine ?

3. À partir des éléments donnés, racontez la vie des Français au début du siècle. Utilisez l'imparfait.

Exemple: Les femmes se marient avant 20 ans. Les femmes se mariaient avant 20 ans.

- i. Les enfants naissent à la maison.
- ii. Plusieurs générations vivent sous le même toit.
- iii. On travaille souvent plus de 50 heures par semaine.
- iv. Les vacances n'existent pas encore
- v. Nous nous nourrissons essentiellement de pain.
- vi. Les filles aident leur mère à la maison.
- vii. Les garçons étudient davantage que leurs sœurs
- viii. On accorde très peu d'importance aux loisirs.

4. Rendez compte des changements depuis le début du siècle. Faites des phrases sur le modèle donné.

Exemple: Aujourd'hui, en train, il faut quatre heures pour faire Paris-Marseille. - À ce moment-là, il ne fallait pas quatre heures pour faire Paris-Marseille.

- i. Aujourd'hui, on peut téléphoner à l'autre bout de la terre. À ce moment-là,
- ii. Aujourd'hui, on envoie des fax dans le monde entier. À ce moment-là,

14. Ecrivez les parenthèses au futur.

Exemple: Quand il sera grand, il ira étudier à l'étranger. (être - aller)

- i. Nous _____ lorsque la pluie _____ (sortir-s'arrêter)
- ii. Vous _____ amis au théâtre. (quitter-rec bureau et vous jouez votre
- iii. Elle _____ quand elle aura 18 ans. (conduire - avoir)
- iv. Je _____, mieux lorsque je porterai des lunettes. (voir porter)
- v. Lorsque tu sentiras la fatigue, tu prendras un café. (sentir – prendre)
- vi. Nous _____ fera voiture quand vous le _____ (prendre - vouloir) des progrès quand elle _____ sérieusement. (faire - étudier)
- vii. Elle
- viii. Vous _____ plus vite lorsqu'il _____ plus fort. (courir - pleuvoir)

14. Reformulez les prévisions de cette voyante au futur simple.

Exemple: Vous allez faire une rencontre importante → Vous ferez une rencontre importante,

- i. Votre situation professionnelle va s'améliorer.
- ii. Vous allez connaître un grand amour.
- iii. Il va durer plusieurs années.
- iv. Alors, votre vie va changer.
- v. Quelqu'un va tomber follement amoureux de vous.
- vi. Vous allez vivre le bonheur parfait toute votre vie.
- vii. Vous allez avoir beaucoup de chance.

15. Réécrivez ces consignes au futur simple.

Exemple: Quand vous arrivez, vous nettoyez la chambre des enfants → Quand vous arriverez, vous nettoierez la chambre des enfants

- i. Il faut refaire les lits.
- ii. Vous lavez les vitres du salon.
- iii. N'oubliez pas d'essuyer la poussière sur les meubles.
- iv. Il y a du repassage à finir.
- v. Vous étendez le linge qui est dans la machine à laver.
- vi. À 16 h 30, vous allez chercher les enfants à l'école.
- vii. Vous me dites combien je vous dois pour le mois de septembre.
- viii. Vous partez à l'heure habituelle.

16. Complétez ces fragments de chansons par les verbes entre parenthèses au futur :

Exemple: (aller) Nous n'irons plus au bois, les lauriers sont coupés.

- i. (voir - recommencer) Ah, tu _____ tout _____ !
- ii. (revenir) Il _____ à Pâques ou à la Trinité.
- iii. (avoir) J'ai du bon tabac dans ma tabatière, j'ai du bon tabac, tu n'en _____ pas !
- iv. (chanter) Quand nous _____ le temps des cerises...
- v. (oublier) Il y a longtemps que je t'aime, jamais je ne t' _____
- vi. (boire) Goûtons voir si le vin est bon. S'il est bon, s'il est agréable, j'en _____ jusqu'à mon plaisir.
- vii. (mourir) Quand _____ tu carillonneur, que Dieu créa pour mon malheur.
- viii. (descendre) Petit Papa Noël, quand tu _____ du ciel.

17. Soyez rassurant sur la météo de demain. Faites des phrases sur le modèle donné.

Exemple: Aujourd'hui, il pleut à Lyon Demain, il ne pleuvra pas à Lyon.

- i. Aujourd'hui, il n'y a pas de soleil à Cannes. Demain,
- ii. Aujourd'hui, Il fait froid à Lille. Demain.
- iii. Aujourd'hui, il neige à Chamonix. Demain,
- iv. Aujourd'hui, les températures baissent dans le Nord. Demain,
- v. Aujourd'hui, une tempête se prépare en Bretagne. Demain,
- vi. Aujourd'hui, le vent souffle très fort à Biarritz. Demain,
- vii. Aujourd'hui, il gèle à Valmorel. Demain....
- viii. Aujourd'hui, il faut faire attention au verglas dans l'Est. Demain,

SECTION D

Répondez à 3 sur 5 questions : (23 - 28)

UNIT I

Notez le résumé du poème « Le Corbeau et le Renard ».

Résumez le conte « Le Petit Chaperon Rouge ».

UNIT II

Résumez « La Revolution française ».

Expliquez les débuts de La Revolution française.

UNIT III

Expliquez le poème « Chanson d'automne » dans vos propres mots.

UNIT IV

Expliquez le poème « Le Pont Mirabeau » dans vos propres mots.

Résumez Le Pont Mirabeau .

UNIT V

Racontez le conte « Le fils à la recherche de sa mère » dans vos propres mots.

ST. MARY'S COLLEGE (Autonomous) – THOOTHUKUDI

Question Bank

I B.Sc. Mathematics

Core I – Classical Algebra

Sub Code: 21UMAC11

Semester I - November 2021

(for those who joined in July 2021 and after)

SECTION - A

UNIT- I

1. If $f(x)$ is a polynomial, then $f(a)$ is the remainder when $f(x)$ is divided by _____.
(a) $x - a$ (b) $x + a$ (c) $x^2 - a$ (d) $x^2 + a$
2. If $f(a)$ and $f(b)$ are of different signs, then ____ of the equation $f(x) = 0$ must lie between a and b .
(a) **at least one root** (b) atmost one root (c) atmost 3 roots (d) no roots
3. If α, β, γ and δ are the roots of the equation $x^4 + px^3 + qx^2 + rx + s = 0$ then the value of $\sum \frac{1}{\alpha}$ is _____.
(a) $\frac{s}{r}$ (b) $-\frac{s}{r}$ (c) $\frac{r}{s}$ (d) $-\frac{r}{s}$
4. Every equation $f(x) = 0$ of the n^{th} degree has ____ roots.
(a) **n** (b) $n + 1$ (c) $n + 2$ (d) $n + 3$
5. When the roots of a third degree equation $f(x) = 0$ are in geometric progression they can be taken as _____.
(a) $\alpha - \beta, \alpha, \alpha + \beta$ (b) $\frac{\alpha}{\beta}, \alpha, \alpha\beta$ (c) $\alpha - 3\beta, \alpha - \beta, \alpha$ (d) $\frac{\alpha}{\beta^3}, \frac{\alpha}{\beta}, \alpha$
6. If the roots of the equation $x^3 - 7x^2 + 14x - 8 = 0$ are $\frac{a}{r}, a, ar$ then the value of a is _____.
(a) 8 (b) - 8 (c) - 2 (d) **2**
7. When the roots of the fourth degree equation $f(x) = 0$ are in G.P they can be taken as _____.
(a) $a - 3r, a - r, a + r, a + 3r$ (b) $\frac{a}{r}, a, ar, ar^2$ (c) $\frac{a}{r^3}, \frac{a}{r}, ar, ar^3$ (d) $\frac{a}{r^2}, \frac{a}{r}, ar, ar^2$.
8. If α, β, γ are the roots of the equation $x^3 - px^2 + qx - r = 0$, then the condition for $\alpha + \beta = 0$ is _____.
(a) $r = 0$ (b) **$r = pq$** (c) $p = qr$ (d) $q = pr$.

9. If α, β, γ are the roots of the equation $x^3 + px^2 + qx + r = 0$ then $\alpha^2 + \beta^2 + \gamma^2 = \underline{\hspace{2cm}}$.
 (a) $-p$ (b) p^2 (c) **$p^2 - 2q$** (d) $p^2 + 2q$
10. If the roots of the equation $4x^3 - 24x^2 + 23x + 18 = 0$ are $a - d, a$ and $a + d$ and then the value of a is $\underline{\hspace{2cm}}$.
 (a) **2** (b) 8 (c) 6 (d) -2
11. When three roots of a third degree equation $f(x) = 0$ are in arithmetic progression they can be taken as $\underline{\hspace{2cm}}$.
 (a) **$a - d, a, a + d$** (b) $\frac{a}{d}, a, ad$ (c) $a - 3d, a - d, a$ (d) $\frac{a}{d^3}, \frac{a}{d}, a$.
12. When the roots of a third degree equation $f(x) = 0$ are in geometric progression they can be taken as $\underline{\hspace{2cm}}$.
 (a) $\alpha - \beta, \alpha, \alpha + \beta$ (b) **$\frac{\alpha}{\beta}, \alpha, \alpha\beta$** (c) $\alpha - 3\beta, \alpha - \beta, \alpha$ (d) $\frac{\alpha}{\beta^3}, \frac{\alpha}{\beta}, \alpha$
13. If the roots of the equation $x^3 - 7x^2 + 14x - 8 = 0$ are $\frac{a}{r}, a, ar$ then the value of a is $\underline{\hspace{2cm}}$.
 (a) 8 (b) -8 (c) -2 (d) **2**
14. The value of k for which the roots of the equation $2x^3 + 6x^2 + 5x + k = 0$ are in AP is $\underline{\hspace{2cm}}$.
 (a) 0 (b) -1 (c) **1** (d) 8.
15. When the roots of the fourth degree equation $f(x) = 0$ are in GP they can be taken as $\underline{\hspace{2cm}}$.
 (a) $a - 3r, a - r, a + r, a + 3r$ (b) $\frac{a}{r}, a, ar, ar^2$
 (c) **$\frac{a}{r^3}, \frac{a}{r}, ar, ar^3$** (d) $\frac{a}{r^2}, \frac{a}{r}, ar, ar^2$.
16. If α, β, γ are the roots of the equation $x^3 - px^2 + qx - r = 0$, then the condition for $\alpha + \beta = 0$ is $\underline{\hspace{2cm}}$.
 (a) $r = 0$ (b) **$r = pq$** (c) $p = qr$ (d) $q = pr$.
17. If α, β, γ are the roots of the equation $x^3 + px^2 + qx + r = 0$ then $\alpha^2 + \beta^2 + \gamma^2 = \underline{\hspace{2cm}}$.
 (a) $-p$ (b) p^2 (c) **$p^2 - 2q$** (d) $p^2 + 2q$
18. If $\alpha + i\beta$ is a root of $f(x) = 0$, then $\underline{\hspace{2cm}}$ is also a root of $f(x) = 0$.
 (a) **$\alpha - i\beta$** (b) $\alpha^2 + \beta^2$ (c) $\beta + i\alpha$ (d) $\beta - i\alpha$.
19. If $2 + \sqrt{3}$ is a root of $f(x) = 0$, then the other root is $\underline{\hspace{2cm}}$.
 (a) **$2 - \sqrt{3}$** (b) 3 (c) 4 (d) $\sqrt{2} + 3$.

UNIT- II

20. S_5 of the equation $x^3 + 2x^2 - 3x - 1 = 0$ is $\underline{\hspace{2cm}}$.
 (a) -185 (b) 518 (c) **-518** (d) 185.

21. The sum of the roots of the equation $x^4 - ax^3 + bx^2 - cx + d = 0$ is _____.

- (a) $-\frac{b}{a}$ (b) $\frac{b}{a}$ (c) **a** (d) $-a$

22. s_{-r} for $f(x) = 0$ is the same as s_r for _____.

- (a) **$f\left(\frac{1}{x}\right) = 0$** (b) $f'\left(\frac{1}{x}\right)$ (c) $\frac{f'(x)}{xf(x)}$ (d) $\frac{f'(x)}{f(x)}$

23. s_2 of $x^4 - x^3 - 19x^2 + 49x - 30 = 0$ is

- (a) 0 (b) -1 (c) **39** (d) 1

24. The value of s_{-1} for $x^4 + px^2 + qx + r = 0$ is

- (a) **$-q/r$** (b) p (c) q/r (d) $-r$.

25. The equation $x^3 + x^2 - 1 = 0$ has a root between _____.

- (a) (1,2) (b) **(0,1)** (c) (2,3) (d) (-1,-2)

26. The equation $x^7 - 3x^4 + 2x^3 - 1 = 0$ has _____ roots.

- (a) at most 4 positive roots (b) at most 4 negative roots
(c) **atleast 4 imaginary roots** (d) at most 7 real roots.

27. Among the following, the non reciprocal equation is _____.

- (a) $x^2 + 2x + 1 = 0$ (b) $2x^3 + 3x^2 - 3x - 2 = 0$
(c) **$4x^4 - 20x^3 + 33x^2 + 20x + 4 = 0$** (d) $x^5 - 5x^4 + 9x^3 - 9x^2 + 5x - 1 = 0$.

28. If a is a root of $x^4 - 2x^3 + 6x^2 + 2x - 1 = 0$ then _____.

- (a) $-a$ is also a root (b) **$1/a$ is also a root** (c) 1 is also a root (d) $\frac{1}{2}$ is a root.

29. If the roots of the equation $x^3 - x^2 - 4x + 4 = 0$ are 1, -2, 2 then the roots of

$4x^3 - 4x^2 - x + 1 = 0$ are _____.

- (a) 1, -2, 2 (b) **$1, -\frac{1}{2}, \frac{1}{2}$** (c) 1, -2, -2 (d) -1, -2, 2.

30. Among the following, the standard reciprocal equation is _____.

- (a) $6x^5 + 11x^4 - 33x^3 - 33x^2 + 11x + 6 = 0$ (b) $2x^3 + 3x^2 - 3x - 2 = 0$
(c) **$4x^4 - 20x^3 - 33x^2 + 20x - 4 = 0$** (d) $4x^4 - 20x^3 + 33x^2 - 20x + 4 = 0$.

31. A factor of the equation $2x^7 - x^6 - 3x^4 - 3x^3 - x + 2 = 0$ is _____.

- (a) $x + 1$ (b) $x^2 - 1$ (c) $x - 1$ (d) $x^2 + 1$

32. The equation $x^{10} - 3x^8 + 5x^6 - 5x^4 + 3x^2 - 1 = 0$ is

- a) a reciprocal equation in x b) reciprocal equation in x^2 of odd degree
c) standard reciprocal equation in x^2 d) a reciprocal equation in x of even degree.

33. The equation $x + \frac{1}{x} = 0$ is _____.

- (a) a reciprocal equation of even degree (b) not a reciprocal equation
(c) a reciprocal equation of odd degree **(d) a standard reciprocal equation.**

34. An equation $a_0x^n + a_1x^{n-1} + \dots + a_n = 0$ is a reciprocal equation if _____

- (a) $a_{n-r} = a_{r-1}$ (b) $a_{n-r} = a_{r+1}$ **(c) $a_{n-r} = \pm a_r$** (d) $a_{n-r} = a_r$.

35. If $f(x) = 0$ is a reciprocal equation of odd degree with like signs then _____.

- (a) $x + 1$ is a factor of $f(x)$** (b) $x - 1$ is a factor of $f(x)$
(c) $x^2 - 1$ is a factor of $f(x)$ (d) $x^2 + 1$ is a factor of $f(x)$.

36. A factor of $6x^6 - 35x^5 + 56x^4 - 56x^2 + 35x - 6 = 0$ is _____.

- (a) $x^2 - 1$** (b) $x^2 + 1$ (c) $x + 1$ (d) $x - 1$.

UNIT- III

37. To remove the 2^{nd} term of an n^{th} degree equation $a_0x^n + a_1x^{n-1} + \dots + a_{n-1}x + a_n = 0$ we have to diminish the roots of the equation by _____.

- (a) $-\frac{a_1}{na_0}$** (b) $\frac{a_1}{na_0}$ (c) $-\frac{a_0}{na_1}$ (d) $\frac{a_0}{na_1}$.

38. _____ is the equation whose roots are negative of the roots of $x^3 + x - 4 = 0$.

- (a) $x^3 + x + 4 = 0$** (b) $x^3 - x^2 + x - 4 = 0$ (c) $x^3 + x^2 + x + 4 = 0$ (d) $x^3 - x - 4 = 0$.

39. If α, β, γ are the roots of $x^3 + 3x^2 + x - 4 = 0$, then the equation whose roots are $10\alpha, 10\beta, 10\gamma$ is _____.

- (a) $x^3 + 30x^2 + 10x - 40 = 0$ **(b) $x^3 + 30x^2 + 100x - 4000 = 0$**
(c) $4x^3 + 12x^2 + 4x - 1 = 0$ (d) $10x^3 + 30x^2 + 10x - 1 = 0$

40. If the roots of $x^3 - 8x^2 + 19x - 12 = 0$ are 1, 3, 4, then the roots of $x^3 - 16x^2 + 76x - 96 = 0$

are _____.

- (a) 1, 3, 4 (b) -1, -3, -4 (c) **2, 6, 8** (d) 1, 9, 16.

41. To remove the second term of $x^4 - 12x^3 + 48x^2 - 72x + 35 = 0$, the roots are to be diminished by _____.

- (a) 1 (b) 2 (c) **3** (d) -1.

42. When the roots of the equation $3x^3 - 10x^2 + 9x + 2 = 0$ are multiplied by 3, The transformed equation is _____

- (a) $3x^3 - 100x^2 + 900x + 2000 = 0$ (b) $27x^3 - 90x^2 + 27x + 2 = 0$
(c) **$3x^3 - 30x^2 + 81x + 54 = 0$** (d) $3x^3 - \frac{10}{3}x^2 + 3x + \frac{2}{3} = 0$.

43. If $\alpha_1, \alpha_2, \dots, \alpha_n$ are the roots of $f(x) = 0$, then $1/\alpha_1, 1/\alpha_2, \dots, 1/\alpha_n$ are the roots of _____.

- (a) **$x^n f(1/x) = 0$** (b) $f(1/x) = 0$ (c) $x^n = 0$ (d) $f(-x) = 0$.

44. The second term of the equation $x^4 + 20x^3 - 143x^2 + 430x + 462 = 0$ will be removed by diminishing the roots of the equation by _____.

- (a) 5 (b) **- 5** (c) - 1/4 (d) 1/4

45. By increasing the roots of the equation $4x^5 - 2x^3 + 7x - 3 = 0$ by 2, the transformed Equation I is _____.

- (a) $4x^5 + 40x^4 + 158x^3 - 308x^2 + 303x - 129 = 0$ (b) **$4x^5 - 40x^4 + 158x^3 - 308x^2 + 303x - 129 = 0$**
(c) $4x^5 - 40x^4 - 158x^3 + 308x^2 - 303x + 129 = 0$ (d) $4x^5 + 20x^4 + 140x^3 + 208x^2 + 203x - 29 = 0$

46. If -1, 1, 2 are the roots of $x^3 - 2x^2 - x + 2 = 0$ then the roots of $x^3 + 2x^2 - x - 2 = 0$ are _____.

- (a) - 1, 1, 2 (b) 0, 2, 3 (c) **1, - 1, - 2** (d) 1, 1, 4

UNIT- IV

47. The equation $x^7 - 3x^4 + 12x^2 + 5x - 4 = 0$ has _____ roots.

- (a) at most 4 positive roots (b) at most 4 negative roots
(c) **atleast 2 imaginary roots** (d) at most 7 real roots.

48. Between two consecutive real root of $f(x) = 0$ _____ has atleast one real root.

- (a) **$f'(x) = 0$** (b) $f(x) = 0$ (c) $f''(x) = 0$ (d) $\frac{1}{f(x)} = 0$

49. The negative roots of $f(x) = 0$ are _____
- (a) **positive roots of $f(-x) = 0$** (b) positive roots of $f(-x) = -1$
 (c) positive roots of $-f(x) = 0$ (d) negative roots of $f(-x) = 0$
50. If $f'(x) = 0$ has r real roots, then $f(x) = 0$ cannot have more than _____ real roots.
 (a) $r - 1$ (b) **$r + 1$** (c) r (d) $-r - 1$
51. The equation $4x^3 - 21x^2 + 18x + 20 = 0$ has _____ roots.
 (a) at most 4 positive (b) **3 real** (c) 3 imaginary (d) at most 4 real
52. The condition for a root lies between 'a' and 'a + 1' is _____
 (a) $f(a)$ and $f(a + 1)$ have same signs (b) **$f(a)$ and $f(a + 1)$ have opposite signs**
 (c) $f(a + 1) > 0$ (d) $f(a + 1) > 0$.
53. An equation $f(x) = 0$ is called _____ when all powers of x from n^{th} to the constant term are present.
 (a) **complete** (b) simple (c) irregular (d) regular

UNIT- V

54. Upper limit of the real root of $x^4 - 2x^3 - 13x^2 + 38x - 24 = 0$ is _____.
 (a) 1 (b) 2 (c) 4 (d) **5**
55. One method of solving a biquadratic equation is _____.
 (a) Cardan's method (b) Newton's method (c) **Ferrari's method** (d) Lagrange's method.
56. In Ferrari's method the biquadratic equation is expressed as difference of _____.
 (a) **two perfect square** (b) three perfect square (c) four perfect square (d) eight perfect square.
57. Lower limit of the real root of $x^4 - 2x^3 - 13x^2 + 38x - 24 = 0$ is _____.
 (a) 5 (b) -5 (c) 7 (d) **-7**
58. Cardon's method deals with solving a _____.
 (a) quadratic equation (b) **cubic equation** (c) biquadratic equation (d) quintic equation.
59. Horner's method is used to find _____

- (a) approximate values of the rational roots (b) the exact values of the roots
- (c) approximate values of the irrational roots** (d) the exact values the negative roots
60. The negative roots of $f(x) = 0$ are -----
- (a) **positive roots of $f(-x) = 0$** (b) positive roots of $f(-x) = -1$
- (c) positive roots of $-f(x) = 0$ (d) negative roots of $f(-x) = 0$.
61. The equation $x^3 + x^2 - 1 = 0$ has a root between _____.
(a) (1,2) (b) **(0,1)** (c) (2,3) (d) (3,4)
62. A root of $x^3 - 6x - 13 = 0$ lies between _____.
(a) 0 and 1 (b) 1 and 2 (c) **3 and 4** (d) -1 and 0
63. A root of $x^4 - 3x + 1 = 0$ lies between _____.
(a) 2 and 3 (b) -2 and 3 (c) 3 and 4 (d) **0 and 1.**
64. The roots of $x^3 + px + q = 0$ are all real if _____.
(a) $4p^3 + 27q^2 > 0$ (b) **$4p^3 + 27q^2 < 0$** (c) $4p^3 + 27q^2 = 0$ (d) $4p^3 + 27q^2 \neq 0$
65. The equation $x^3 + px + q = 0$ has two imaginary roots and one real root if _____.
(a) **$4p^3 + 27q^2 > 0$** (b) $4p^3 + 27q^2 < 0$ (c) $4p^3 + 27q^2 = 0$ (d) $4p^3 + 27q^2 \neq 0$
66. Two of the real roots of $x^3 + px + q = 0$ are equal if _____.
(a) $4p^3 + 27q^2 > 0$ (b) $4p^3 + 27q^2 < 0$ (c) **$4p^3 + 27q^2 = 0$** (d) $4p^3 + 27q^2 \neq 0$

Section B

UNIT- I

1. Frame the equation with rational coefficients, one of whose roots is $\sqrt{5} + \sqrt{2}$.
2. If $\alpha, \beta, \gamma, \delta$ are the roots of $x^4 - 4x^2 - x + 2 = 0$ find the value of $\sum \frac{1}{\alpha^2}$.
3. If $x_1, x_2, x_3, \dots, x_n$ are the roots of the equation $(a_1 - x)(a_2 - x) \dots (a_n - x) + k = 0$ then show that a_1, a_2, \dots, a_n are the roots of the equation $(x_1 - x)(x_2 - x) \dots (x_n - x) - k = 0$.
4. State Fundamental theorem of algebra.
5. If α be a real root of the cubic equation $x^3 + px^2 + qx + r = 0$, of which the coefficients are real, show that the other two roots of the equation are real, if $p^2 \geq 4q + 2p\alpha + 3\alpha^2$.
6. Find the sum of the cubes of the roots of $x^4 - 22x^2 + 84x - 49 = 0$.
7. Solve $x^4 - 2x^3 - 3x^2 + 4x - 1 = 0$ given that the product of two of the roots is unity.

8. Solve the equation $x^4 - 5x^3 + 4x^2 + 8x - 8 = 0$ given that one of the roots is $1 - \sqrt{5}$.
9. Find the equation with rational coefficients whose roots are $4\sqrt{3}, 5 + 2\sqrt{-1}$.
10. The cubic $2x^3 - 9x^2 + 12x + k = 0$ has two equal roots, find k and solve the equation.
11. If α, β, γ are the roots of $x^3 + px^2 + qx + r = 0$, find $\sum \alpha^3$
12. If α, β, γ are the roots of $x^3 + px^2 + qx + r = 0$, find $\sum \alpha^2\beta$
13. If α, β, γ are the roots of the equation $x^3 + qx + r = 0$, then find the value of $(\beta + \gamma)(\gamma + \alpha)(\alpha + \beta)$.
14. If $\alpha, \beta, \gamma, \delta$ are the roots of the equation $x^4 + px^3 + qx^2 + rx + s = 0$, find the value of $\sum \alpha^2\beta\gamma$.
15. If $\alpha, \beta, \gamma, \delta$ are the roots of the equation $x^4 + px^3 + qx^2 + rx + s = 0$, find the value of $\sum \alpha^4$.
16. If $\alpha, \beta, \gamma, \delta$ are the roots of the equation $x^4 + px^3 + qx^2 + rx + s = 0$, find the value of $\sum \alpha^2\beta^2$
17. Solve the equation $x^3 - 12x^2 + 39x - 28 = 0$, whose roots are in A.P.
18. If $\alpha, \beta, \gamma, \delta$ are the roots of the equation $x^4 + px^3 + qx^2 + rx + s = 0$, find the value of $\sum \alpha^2\beta\gamma$
19. Solve the equation $6x^3 - 11x^2 + 6x - 1 = 0$, if the roots are in Harmonic progression.
20. Solve $3x^3 - 11x^2 + 8x + 4 = 0$ given that it has two equal roots.

UNIT II

21. Find the sum of the cubes of the roots of the equation $x^4 + 2x + 3 = 0$.
22. Find the sum of the cubes of the roots of the equation $x^5 = x^2 + x + 1$.
23. Find the sum of fifth powers of the roots of $x^4 - 7x^2 - 4x - 3 = 0$
24. Change the equation $2x^4 - 3x^3 + 3x^2 - x + 2 = 0$ into another the coefficient of whose highest term will be unity.
25. Change the sign of the roots of the equation $x^7 + 4x^5 + x^3 - 2x^2 + 7x + 3 = 0$.
26. Find the roots of the equation $x^5 + 4x^4 + 3x^3 + 3x^2 + 4x + 1 = 0$.
27. Find the roots of the equation $x^4 - 10x^3 + 26x^2 - 10x + 1 = 0$
28. Find the roots of the equation $x^4 + 3x^3 - 3x - 1 = 0$.

UNIT-III

29. Find the quotient and remainder when $3x^3 + 8x^2 + 8x + 12$ is divided by $x - 4$.
30. Find the quotient and remainder when $2x^6 + 3x^5 - 15x^2 + 2x - 4$ is divided by $x + 5$.
31. Diminish by 3 the roots of the equation $x^5 - 4x^4 + 3x^3 - 4x + 6 = 0$.
32. Find the equation whose roots are the roots of $4x^5 - 2x^3 + 7x - 3 = 0$ each increased by 2.
33. Show that sum of the fourth powers of the roots of the equation $x^5 + px^3 + qx^2 + s = 0$ is $2p^2$.
34. Transform the equation $x^4 - 12x^3 + 48x^2 - 72x + 35 = 0$ into one in which the second term is missing.
35. Transform the equation $x^4 + 8x^3 + x - 5 = 0$ into one in which the second term is missing.

UNIT-IV

36. Find the nature of the roots of the equation $4x^3 - 21x^2 + 18x + 20 = 0$.
37. Define Descartes's rule of signs.
38. Define Roll's theorem.
39. Show that $x^6 + 3x^2 - 5x + 1 = 0$ has at least four imaginary roots.
40. Find the number of imaginary roots of the equation $x^5 + 5x - 7 = 0$.
41. Find the nature of the roots of the equation $x^4 + 15x^2 + 7x - 11 = 0$.

42. Find the multiple roots of the equation $x^4 - 9x^2 + 4x + 12 = 0$.
43. Find the multiple roots of the equation $4x^3 - 12x^2 - 15x - 4 = 0$.
44. Find the multiple roots of the equation $12x^3 + 40x^2 + 39x + 9 = 0$.

UNIT- V

45. Write the Cardon's standard form of the cubic equation.
46. Write the condition of $x^3 + px + q = 0$ has two imaginary roots and one real root.
47. Write the condition of $x^3 + px + q = 0$ has three real roots.
48. Write the condition of $x^3 + px + q = 0$ has two of the roots are equal.

SECTION -C

UNIT -I

- Solve the equation $x^4 + 4x^3 + 5x^2 + 2x - 2 = 0$, of which one root is $-1 + \sqrt{-1}$
- One root of the equation $3x^5 - 4x^4 - 42x^3 + 56x^2 + 27x - 36 = 0$ is $\sqrt{2} + \sqrt{5}$, then find the remaining roots
- Solve the equation $3x^3 - 4x^2 + x + 88 = 0$ which has a root $2 - \sqrt{-7}$.
- Solve the equation $x^4 - 4x^2 + 8x + 35 = 0$ given that $2 + i\sqrt{3}$ is a root.
- Solve the equation $x^4 - 6x^3 + 11x^2 - 10x + 2 = 0$ given that one root is $2 + \sqrt{3}$.
- Solve the equation $x^4 - 2x^3 - 21x^2 + 22x + 40 = 0$ given that the roots are in A.P.
- Find the condition that the roots of the equation $ax^3 + 3bx^2 + 3cx + d = 0$ may be in geometric progression. solve the equation $27x^3 + 42x^2 - 28x - 8 = 0$ whose roots are in geometric progression.
- If α, β, γ are the roots of $x^3 + px^2 + qx + r = 0$, form the equation whose roots are $\alpha + \beta, \beta + \gamma, \gamma + \alpha$.
- If $\alpha, \beta, \gamma, \delta$ are the roots of the equation $x^4 + px^3 + qx^2 + rx + s = 0$, find
 - $\sum \alpha^2$
 - $\sum \alpha^2\beta\gamma$
 - $\sum \alpha^2\beta^2$
 - $\sum \alpha^3\beta$
 - $\sum \alpha^4$
- Solve the equation $x^4 - 2x^3 + 4x^2 + 6x - 21 = 0$, given that two of its roots are equal in magnitude and opposite sign.
- If $\alpha, \beta, \gamma, \delta$ are the roots of $x^4 - 4x^2 - x + 2 = 0$, find the values of $\sum \alpha^2\beta$ and $\sum \frac{1}{\alpha^2}$.

UNIT II

12. Show that the sum of the eleventh powers of the roots of $x^7 + 5x^4 + 1 = 0$ is zero.
13. Show that the sum of the ninth powers of the roots of $x^3 + 3x + 9 = 0$ is zero.
14. If $a + b + c + d = 0$, show that $\frac{a^5+b^5+c^5+d^5}{5} = \frac{a^3+b^3+c^3+d^3}{3} \cdot \frac{a^2+b^2+c^2+d^2}{2}$.
15. Remove the fractional coefficients from the equation $x^3 + \frac{3}{2}x^2 + \frac{5}{18}x + \frac{1}{108} = 0$.
16. Remove the fractional coefficients from the equation $2x^3 + \frac{3}{2}x^2 - \frac{1}{8}x - \frac{3}{16} = 0$.
17. If α, β, γ be the roots of the equation $x^3 - 7x + 7 = 0$ find $\frac{1}{\alpha^4} + \frac{1}{\beta^4} + \frac{1}{\gamma^4}$.
18. Find the roots of the equation $x^5 + 4x^4 + 3x^3 + 3x^2 + 4x + 1 = 0$
19. Find the roots of the equation $x^5 + x^4 + x^3 + x^2 + x + 1 = 0$.
20. Find the roots of the equation $4x^4 - 20x^3 + 33x^2 - 20x + 4 = 0$.
21. Show that the sum of the m^{th} powers, where $m \leq n$, of the roots of the equation $x^n - 2x^{n-1} - 2x^{n-2} - \dots - 2x - 2 = 0$ is $3^m - 1$.

UNIT III

22. Increase by 7 the roots of the equation $3x^4 + 7x^3 - 15x^2 + x - 2 = 0$
23. Increase by 2 the roots of the equation $4x^5 - 2x^3 + 7x - 3 = 0$.
24. Solve the equation $x^3 + 6x^2 + 12x - 19 = 0$ by removing its second term.
25. Transform the equation $x^4 - 8x^3 - x^2 + 68x + 60 = 0$ into one in which the second term is missing.
26. Transform the equation $x^4 - 4x^3 - 18x^2 - 3x + 2 = 0$ into one in which the third term is missing.
27. If α, β, γ be the roots of the equation $x^3 - 6x + 7 = 0$, form an equation whose roots are $\alpha^2 + 2\alpha + 3, \beta^2 + 2\beta + 3, \gamma^2 + 2\gamma + 3$.
28. If a, b, c be the roots of the equation $x^3 + px^2 + qx + r = 0$. Find the equation whose roots are $bc - a^2, ca - b^2, ab - c^2$.
29. Find the equation whose roots are the squares of the roots of $x^4 + x^3 + 2x^2 + x + 1 = 0$.

UNIT- IV

30. Find the number of real roots of the equation $x^3 + 18x - 6 = 0$.
31. Find the nature of the roots of the equation $4x^3 - 21x^2 + 18x + 30 = 0$.
32. Discuss the reality of the roots $x^4 + 4x^3 - 2x^2 - 12x + a = 0$ for all real value of a .
33. Find the range of values of k for the equation $x^4 - 14x^2 + 24x - k = 0$ have real roots
34. Find the range of k for which $3x^4 + 8x^3 - 6x^2 - 24x + k = 0$ has all real and distinct roots.
35. Find the condition that the cubic equation $ax^3 + 3bx^2 + 3cx + d = 0$ has two equal roots and when the condition is satisfied, find the equal roots.

UNIT-V

36. Find the positive root of the equation $x^3 - 2x^2 - 3x - 4 = 0$ correct to three places of decimals.
37. Solve the equation $x^3 - 9x^2 + 108 = 0$.
38. Solve the equation $4x^4 + 4x^3 - 7x^2 - 4x - 12 = 0$
39. Solve the equation $x^4 - 4x^3 - 10x^2 + 64x + 40 = 0$.
40. Solve the equation $2x^4 + 6x^3 - 3x^2 + 2 = 0$.

SECTION – D

UNIT- I

1. Show that the equation $\frac{a^2}{x-a'} + \frac{b^2}{x-b'} + \frac{c^2}{x-c'} + \dots + \frac{k^2}{x-k'} = x - m$ where a, b, c, \dots, k are all different cannot have an imaginary root .
2. If the sum of the two roots of the equation $x^4 + px^3 + qx^2 + rx + s = 0$ equals the other two. Prove that $p^3 + 8r = 4pq$.
3. Find the condition that the general biquadratic equation $ax^4 + 4bx^3 + 6cx^2 + 4dx + e = 0$ may have two pairs of equal roots.
4. If α, β, γ are the roots of $x^3 + px^2 + qx + r = 0$, form the equation whose roots are $\beta + \gamma - 2\alpha, \gamma + \alpha - 2\beta, \alpha + \beta - 2\gamma$

5. If α, β, γ are the roots of $x^3 + px^2 + qx + r = 0$, form the equation whose roots are $\alpha(\beta + \gamma), \beta(\gamma + \alpha), \gamma(\alpha + \beta)$.
6. If the sum of two roots of the equation $x^4 + px^3 + qx^2 + rx + s = 0$ equals the sum of the other two. Prove that $p^3 + 8r = 4pq$.
7. Solve the equation $3x^4 - 40x^3 + 130x^2 - 120x + 27 = 0$ given that the roots are in GP.
8. Show that the equation $\frac{a^2}{x-\alpha} + \frac{b^2}{x-\beta} + \frac{c^2}{x-\gamma} - x + \delta = 0$ has only real roots if $a, b, c, \alpha, \beta, \gamma, \delta$ are all real.
9. Show that the roots of the equation $x^3 + px^2 + qx + r = 0$ are in AP if $2p^3 - 9pq + 27r = 0$.

Show that the above condition is satisfied by the equation $x^3 - 6x^2 + 13x - 10 = 0$.

10. a) State and prove fundamental theorem of algebra

b) Solve the equation $2x^6 - 3x^5 + 5x^4 + 6x^3 - 27x + 81 = 0$.

given that one root is $\sqrt{2} - \sqrt{-1}$.

UNIT-II

11. Find the sum of the 20th powers of the roots of $x^4 + ax + b = 0$.
12. Find the sum of the 16th powers of the roots of $x^8 + ax + b = 0$.
13. If the degree of $\varphi(x)$ does not exceed $n-2$ prove that $\sum_1^n \frac{\varphi(\alpha_r)}{f'(\alpha_r)} = 0$.
14. Show that the sum of the eleventh powers of the roots of $x^7 + 5x^4 + 1 = 0$ is zero.
15. State and prove Newton's theorem connecting the powers of the roots and the coefficients of the equation.
16. Find the sum of the 7th powers of the roots of $x^3 + 2x + 6 = 0$.
17. Solve $6x^5 - x^4 - 43x^3 + 43x^2 + x - 6 = 0$.
18. Solve $6x^5 + 11x^4 - 33x^3 - 33x^2 + 11x + 6 = 0$.
19. Solve $x^6 - 9x^5 + 21x^4 - 21x^2 + 9x - 1 = 0$.
20. Solve $x^{10} - 3x^8 + 5x^6 - 5x^4 + 3x^2 - 1 = 0$.

UNIT-III

21. Solve $f(x) = 2x^7 - x^6 - 3x^4 - 3x^3 - x + 2 = 0$.
22. Transform the equation $x^4 - 4x^3 - 18x^2 - 3x + 2 = 0$ into one which does not contain the third term.
23. Show that the same transformation removes second and third terms of the equation

$$x^3 + 3x^2 + 3x + 28 = 0.$$

24. Show that the equation $x^4 - 3x^3 + 4x^2 - 2x + 1 = 0$ can be transformed into a reciprocal equation by diminishing the roots by unity. Hence solve the equation.
25. If α, β, γ are the roots of the equation $x^3 + px^2 + qx + 1 = 0$, find the value of $(\alpha^2 + 1)(\beta^2 + 1)(\gamma^2 + 1)$.
26. Diminish the roots of $x^4 - 5x^3 + 7x^2 - 4x + 5 = 0$ by 2.
27. If $\alpha, \beta, \gamma, \delta$ are the roots of the biquadratic $x^3 - px^3 + qx^2 - rx + s = 0$, form an equation whose roots shall be $\alpha^2, \beta^2, \gamma^2, \delta^2$. Hence find the value of $\sum \alpha^2$ and $\sum \alpha^2 \beta^2 \gamma^2$.
28. Find the equation whose roots are the cubes of the roots of $x^4 - x^3 + 2x^2 + 3x + 1 = 0$.

UNIT-IV

29. Find the condition that the cubic equation $ax^3 + 3bx^2 + 3cx + d = 0$ has two equal roots and when the condition is satisfied, find the equal roots.
30. Show that the equation $3x^4 - 8x^3 - 6x^2 + 24x - 7 = 0$ has one positive, one negative and two imaginary roots.
31. Find the values of a for which $ax^3 - 9x^2 + 12x - 5 = 0$ has equal roots and solve the equation in one case.
32. Find the values of k for which $x^3 + 4x^2 + 5x + 2 + k = 0$ has equal roots. Also find those roots.
33. Find the condition that the equations $ax^3 + 3bx + c = 0$, $a'x^3 + 3b'x + c = 0$ should have a common root. When this condition is satisfied, show that the common root is a double root of the equation $2(ab' - a'b)x^3 + (ac' - a'c)x^2 + (bc' - b'c) = 0$.

UNIT- V

34. The equation $x^3 - 3x + 1 = 0$ has a root between 1 and 2. Calculate it to three places of decimals.
35. Solve the equation $2x^4 + 6x^3 - 3x^2 + 2 = 0$.
36. Solve the equation $x^4 - 10x^3 + 35x^2 - 50x + 24 = 0$.
37. a) Solve the equation $x^3 - 9x^2 + 108 = 0$.
- b) Solve the equation $x^3 - 12x + 65 = 0$.
38. Show that the roots of the equation $x^3 - 21x + 35 = 0$ are all real and find the negative root correct to two places of decimals.

QUESTION BANK

I B.Sc. Mathematics

Core II Calculus

Sub. Code: 21UMAC12

Semester I

UNIT- I

SECTION – A

1. The length of the normal is _____.
(a) $y(1 + y_1^2)^{\frac{1}{2}}$ (b) $1 + y_1^2$ (c) $y(1 + y_1^2)$ (d) $y(1 + y_1^2)^2$
2. The radius of curvature of $y=f(x)$ is _____.
(a) $\frac{[1 + y_1^2]^{3/2}}{y_2}$ (b) $\frac{y_2}{[1 + y_1^2]^{3/2}}$ (c) $\frac{[1 + y_2^2]^{3/2}}{y_1}$ (d) $\frac{y_1}{[1 + y_2^2]^{3/2}}$
3. The locus of the centre of curvature for a curve is called as _____.
(a) a line (b) a point (c) a circle (d) **an evolute**
4. Curvature is the reciprocal of----
(a) $\tan \Psi$ (b) **its radius curvature** (c) $\frac{y_1}{y_2}$ (d) $\cot \Psi$
5. The equation of the ellipse is _____.
(a) $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$. (b) $\frac{x^2}{a^2} - \frac{y^2}{b^2} = 1$. (c) $\frac{x^2}{b^2} + \frac{y^2}{a^2} = 1$. (d) $\frac{x}{a} + \frac{y}{b} = 1$.
6. The centre of curvature is----
(a) $\left(x - \frac{y_1(1+y_1^2)}{y_2}, y + \frac{(1+y_2)}{y_1}\right)$ (b) $\left(x - \frac{y_2(1+y_1^2)}{y_1}, y + \frac{(1+y_1^2)}{y_2}\right)$
(c) $\left(x - \frac{y_1(1+y_1^2)}{y_2}, y + \frac{(1+y_1^2)}{y_2}\right)$ (d) $\left(x + \frac{y_1(1+y_1^2)}{y_2}, y - \frac{(1+y_1^2)}{y_2}\right)$
7. The equation of y-axis is _____.
(a) **$x=0$** (b) $x=c$ (c) $y=k$ (d) $y=0$
8. Parametric form of the ellipse is _____.
(a) **$x=a\cos\theta; y=b\sin\theta$** (b) $x=b\sin\theta; y=a\cos\theta$
(c) $x=a\sec\theta; y=b\tan\theta$ (d) $x=a\tan\theta; y=b\sec\theta$
9. The relation between the curvature and the radius of curvature is _____.
(a) $k\rho = c$ (b) **$k = \frac{1}{\rho}$** (c) $k = 2\rho$ (d) $k^2 = \frac{1}{\rho}$
10. Parametric form of the hyperbola is _____.

- (a) $x = a \cos \theta$; $y = b \sin \theta$
 (c) $x = a \sec \theta$; $y = b \tan \theta$

- (b) $x = b \sin \theta$; $y = a \cos \theta$
 (d) $x = a \tan \theta$; $y = b \sec \theta$

UNIT- II

11. The pedal equation of a curve is _____.

- (a) $\frac{1}{p} = \frac{1}{r} + \frac{1}{r^2} \left(\frac{dr}{d\theta} \right)^2$ (b) $\frac{1}{p^2} = \frac{1}{r^2} + \frac{1}{r^4} \left(\frac{dr}{d\theta} \right)^2$
 (c) $p = r^2 + \left(\frac{dr}{d\theta} \right)^2$ (d) $p = r + \left(\frac{dr}{d\theta} \right)^2$

12. For any curve $ds / d\theta$ is ----

- (a) $\frac{r^2}{p}$ (b) $-\frac{r^2}{p}$ (c) $\frac{p}{r}$ (d) $\frac{r}{p}$

13. The radius of curvature of Bernoulli's lemniscates is ----

- (a) $\frac{a^2}{3r}$ (b) $-\frac{a^2}{3r}$ (c) ar (d) ar^2

14. $\sin \phi$ is---

- (a) $r \, ds/d\theta$ (b) $d\theta/ds$ (c) $ds/d\theta$ (d) $r \, d\theta/ds$

15. The p-r equation of the curve $r \sin \theta + a = 0$ is

- (a) $p-a=0$ (b) $p+a=0$ (c) $p=ar$ (d) $p^2=ar^2$

16. The radius of curvature in polar form is

- (a) $\frac{(r^2+r_1^2)^{\frac{3}{2}}}{2r_1^2-r_1r_2+r^2}$ (b) $\frac{r^2}{2r_1^2-r_1r_2+r^2}$ (c) $\frac{r_1^2}{2r_1^2-r_1r_2+r^2}$ (d) $\frac{(r^2+r_1^2)^{\frac{3}{2}}}{r_2}$

17. The pedal equation of $r = a \sin \theta$ is _____.

- (a) $p=r^2$ (b) $p=a^2$ (c) $ap=r^2$ (d) $ap=r$

18. $r^2 = a^2 \cos 2\theta$ is _____.

- (a) Lemniscate Bernoulli (b) loop
 (c) catenary (d) parabola

19. The degree of the equation $3x^3 + y + 1 = 0$ is _____.

- (a) 4 (b) 3 (c) 2 (d) 1

20. The value of p is

- (a) $r \sin \phi$ (b) $r \cos \phi$ (c) $r \tan a$ (d) $r \sin a$

21. If P is the length of the perpendicular, then

- (a) $p = \sin \psi$ (b) $p = r \sin \phi$ (c) $p = \sin \theta$ (d) $p = r \sin \psi$

22. The x - coordinate of the centroid of the arc is _____

- (a) $\frac{\int x ds}{\int ds}$ (b) $\frac{\int y ds}{\int ds}$ (c) $\int x ds$ (d) $\int y ds$

23. $y = mx + c$ is an asymptote if
 (a) $\phi_1(m) = 0$ (b) $\phi_n(m) = 0$ (c) both (d) none of these.
24. The number of points where the asymptotes of a quartic curve cut the curve again is _____
 (a) 2 (b) 4 (c) 6 (d) **8**
25. In general a curve of n th degree will have ----- asymptotes
 (a) **n** (b) $n-1$ (c) $n+1$ (d) none
26. If the equation of the curve is of the form $F_n + F_{n-2} = 0$, then the equation of the asymptote is
 (a) $F_n = 0$ (b) $F_{n-1} = 0$ (c) $F_{n-2} = 0$ (d) $F_{n+1} = 0$
27. In finding asymptotes, $\phi_n(m) = \text{-----}$
 (a) **0** (b) n (c) nm (d) mn
28. A curve of odd degree n cannot have an ----- number of asymptotes
 (a) **even** (b) odd (c) $2n$ (d) $4n + 2$
29. The asymptotes of $(x^2 - y^2)y - 2ay^2 + 5x - 7 = 0$ are the sides of a
 (a) prism (b) **triangle** (c) rectangle (d) square
30. The asymptotes of a quadratic curve cut the curve again in ----- points lying on a conic.
 (a) 2 (b) $1/2$ (c) **8** (d) $1/8$
31. The asymptotes of a cubic curve cut the curve again in ----- points lying on a conic.
 (a) 9 (b) $1/9$ (c) **3** (d) $1/3$
32. The asymptotes of a cubic cut the curve in ----- points lying on a straight line
 (a) one (b) two (c) **three** (d) four
33. The asymptotes parallel to x-axis are
 (a) $y = \pm c$ (b) **$x = \pm c$** (c) $x^2 = 0$ (d) $y^2 = 0$

UNIT – III

34. For a double point (x, y) of the curve $f(x, y) = 0$
 (a) $f_x = 0$ (b) $f_y = 0$ (c) **$f_x = f_y = 0$** (d) $f_y \neq 0$
35. If the tangents at the double point coincide so that the two branches touches at the point, the point is a -----
 (a) node (b) **cusp** (c) conjugate point (d) origin
36. The cusp of first species is called as ----- cusp
 (a) **keratoid** (b) ramphoid (c) general (d) nodal
37. If r branches of a curve pass through a point, then the point is called _____ on the curve.
 (a) double point (b) **triple point**

(c) Multiple point of the r^{th} order

(d) Multiple point of the $(r + 1)^{th}$ order

UNIT IV

38. The order of integral is immaterial for _____.
(a) constant limits (b) integrable functions
(c) differentiable functions (d) variable limits
39. $\int_a^b f(x)dx =$ _____ where $\frac{dF(x)}{dx} = f(x)$.
(a) $f(b)-f(a)$ (b) $f(a)-f(b)$
(c) $F(b)-F(a)$ (d) $F(a)-F(b)$
40. If the region of integration is a rectangle between the lines $x=a, x=b, y=c, y=d$, then $\int_R f(x, y)dA =$ _____.
(a) $\int_y^d \int_a^b f(x, y)dx dy$ (b) $\int_a^d \int_b^c f(x, y)dx dy$
(c) $\int_c^d \int_a^x f(x, y)dx dy$ (d) $\int_c^d \int_a^b f(x, y)dx dy$
41. $\int_1^2 \int_1^x xy^2 dydx =$ _____.
(a) $\frac{62}{30}$ (b) $\frac{47}{30}$ (c) $\frac{1}{60}$ (d) $\frac{17}{60}$
42. The value of the double integral $\int_0^1 \int_0^1 xy dx dy$ is _____.
(a) $\frac{4}{3}$ (b) $\frac{8}{3}$ (c) $\frac{1}{4}$ (d) $\frac{3}{4}$
43. The value of the triple integral $\int_0^2 \int_0^2 \int_0^2 xyz dx dy dz$ is _____.
(a) $\frac{2}{3}$ (b) $\frac{8}{3}$ (c) 3 (d) 8
44. The value of the triple integral $\int_1^2 \int_1^2 \int_1^3 dx dy dz$ is _____.
(a) 1 (b) 2 (c) 3 (d) 5
45. In the transformation from cartesian to polar co-ordinates (x,y) is given by _____.
(a) $(r \cos \theta, r \sin \theta)$
(b) $(\cos \theta, \sin \theta)$
(c) $(r \sin \theta \cos \varphi, r \sin \theta \sin \varphi, r \cos \theta)$
(d) $(r \cos \theta, r \sin \theta, z)$
46. In the transformation from cartesian to spherical polar co-ordinates (x,y) is given by _____.
(a) $(r \cos \theta, r \sin \theta)$
(b) $(\cos \theta, \sin \theta)$
(c) $(r \sin \theta \cos \varphi, r \sin \theta \sin \varphi, r \cos \theta)$
(d) $(r \cos \theta, r \sin \theta, z)$
47. In the transformation from cartesian to cylindrical co-ordinates (x,y) is given by _____.
(a) $(r \cos \theta, r \sin \theta)$
(b) $(\cos \theta, \sin \theta)$
(c) $(r \sin \theta \cos \varphi, r \sin \theta \sin \varphi, r \cos \theta)$

(d) $(r \cos \theta, r \sin \theta, z)$

UNIT – V

48. Gamma Function $\Gamma(n) =$ _____

(a) $\int_0^{\infty} e^{-x} x^{n-1} dx$

(b) $\int_0^{\infty} e^{-x} x^{2n-1} dx$

(c) $\int_0^{\infty} e^{-y} y^{n-1} dx$

(d) $\int_0^{\infty} e^{-x} x^{m-1} dx$

49. $\int_0^{\infty} x^4 e^{-x} dx$ the value is _____

(a) 36

(b) 28

(c) 30

(d) 24

50. $\Gamma(1/2) =$ _____.

(a) $\sqrt{\pi}$

(b) π

(c) $1/2$

(d) 1

51. $\Gamma(5) =$ _____

(a) $6!$

(b) 5

(c) $5!$

(d) $4!$

52. $\int_0^{\infty} e^{-x^2} dx =$ _____

(a) π

(b) $\pi/2$

(c) $\pi + 1$

(d) $\sqrt{\pi}/2$

53. $\beta(m, n) =$

(a) $\Gamma(m)$

(b) $\Gamma(m, n)$

(c) $\beta(n, m)$

(d) $\Gamma(n, m)$

54. $\Gamma(1) =$

(a) 0

(b) 1

(c) $1/2$

(d) none

55. $\beta(3, 5) =$ _____

(a) $\frac{1}{105}$

(b) 105

(c) $\frac{1}{10}$

(d) 10

56. $2^{2n-1} \Gamma(n) \Gamma\left(n + \frac{1}{2}\right) =$

(a) n

(b) $\beta(m, n)$

(c) $\Gamma(2n + 1)$

(d) $\Gamma(2n) \sqrt{\pi}$

SECTION – B

UNIT - I

- Find the co-ordinates of the centre of curvature of $y = x^2$ at $\left(\frac{1}{2}, \frac{1}{4}\right)$.
- Define evolute.
- If $x = a(\theta + \sin \theta)$, find $dx/d\theta$.
- Find the radius of curvature of the curve $xy = 30$ at the point (3,10).
- Find the radius of curvature of the curve $x^4 + y^4 = 2$ at the point (1,1).
- Find the centre of curvature of the curve $xy = c^2$ at (c, c).
- Find the radius of curvature for the curve $y = \log x$ at (1,0).

8. Define curvature of a curve .
9. Find the radius of curvature of $y = e^x$ at the point where it crosses the y – axis .
10. Find the centre of curvature of the curve $xy = 2$ at (2, 1).

UNIT -II

11. Find the p-r equation of the curve $r \sin\theta + a = 0$.
12. Find the pedal equation of $r = a \sin\theta$.
13. Find the radius of curvature of the curve $r = a\theta$.
14. Define Involute of a curve.
15. Find the pedal equation of $r\theta = a$
16. Find the p-r equation of the curve $r = a e^{\theta \cot \alpha}$.
17. Write the formula for the p-r equation of the curve and the radius of curvature.
18. Define an asymptote to a curve.
19. Give the radii of curvature for the Bernoulli's Lemniscate and circle.
20. Find the asymptotes of $x^2 y^2 = c^2 (x^2 + y^2)$.

UNIT-III

21. Define multiple point.
22. Define multiple point of r^{th} order.
23. Define double point.
24. Define triple point.
25. Define node.
26. Define cusp.
27. Define conjugate points.
28. Define keratoid cusp.
29. Define ramphoid cusp.
30. Define single cusp.
31. Define double cusp.

UNIT-IV

32. Evaluate $\int_0^3 \int_1^2 xy(x + y) dydx$.
33. Evaluate $\int_0^1 \int_1^2 (x^2 + y^2) dx dy$

34. Evaluate $\int_0^1 \int_0^2 xy^2 dy dx$.
35. Evaluate $\int_0^1 \int_0^2 (x+2) dy dx$.
36. Evaluate $\int_0^2 \int_1^3 \int_1^2 xy^2z dz dy dx$.
37. Define Jacobian of a transformation in two variables.
38. Define Jacobian of a transformation in three variables.
39. Find the Jacobian of the transformation $x + y = u ; y = uv$, when x and y are functions of u and v.
40. Find the Jacobian of the transformation $x^2 - y^2 = u ; x^2 + y^2 = v$, when u and v are functions of x and y.
41. Find the Jacobian of a transformation from cartesian to polar co-ordinates.

UNIT – V

42. Define Beta function.
43. Define Gamma function.
44. Prove that $\Gamma(1) = 1$.
45. Prove that $\Gamma(n+1) = n!$
46. Find $\int_0^\infty x^4 e^{-x^4} dx$.
47. Find $\beta(3, 5)$.
48. Find $\beta(\frac{3}{2}, 2)$.
49. Find $\int_0^1 x^7 (1-x)^8 dx$.
50. Find $\int_0^1 x^2 (1-x)^3 dx$.
51. Find $\int_0^{\frac{\pi}{2}} \sin^5 x dx$.
52. Find $\int_0^{\frac{\pi}{2}} \sin^3 x \cos^{10} x dx$.

SECTION – C

UNIT - I

1. Find the co-ordinates of the point on the parabola $y^2 = 4ax$ at which the radius of curvature is equal to the latus rectum.
2. Find the radius of curvature at the point ' θ ' on the curve $x = a \log \sec \theta ; y = a (\tan \theta - \theta)$.
3. Prove that if the centre of the curvature of the ellipse $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ at one end of the minor

axis lies at the other end, then the eccentricity of the ellipse is $1/\sqrt{2}$.

4. Derive the Cartesian formula for radius of curvature.
5. Prove that the radius of curvature at any point of the cycloid $x = a(\theta + \sin\theta)$ and $y = a(1 - \cos\theta)$ is $4a\cos\theta/2$
6. Prove that the radius of curvature at any point θ on the curve $x = 3a\cos\theta - a\cos3\theta$; $y = 3a\sin\theta - a\sin3\theta$ is $3a\sin\theta$.
7. Find the radius of curvature of the curve $x = 3t^2$, $y = 3t - t^3$ at $t=1$.
8. Find the radius of curvature at any point of the curve $y = c \cosh \frac{x}{c}$.
9. Show that in the equation of the circle of curvature at the origin of the parabola $y = mx + \frac{x^2}{a}$ is $x^2 + y^2 = (1+m^2)a(y - mx)$.
10. Find the radius of curvature at any point P of the parabola given by $x=at^2$; $y=2at$.
11. Prove that the radius of curvature at any point of the catenary of uniform strength $y = a \log(\sec(x/a))$ is $a \sec(x/a)$.
12. Find the radius of curvature at the origin on the curve $x^3 + y^3 + 2x^2 - 4y + 3x = 0$.
13. In a curve $x^3 = y(x-a)^2$, prove that the radius of curvature at the point where the ordinate is minimum is $\frac{8a}{9}$.
14. Prove that the radius of curvature at any point of the parabola $x^2 = 4ay$ is $2a \sec^3\theta$.

UNIT-II

15. Find the radius of curvature of the cardioid $r = a(1 - \cos\theta)$.
16. Find the radius of curvature of the curve $r^2 = a^2 \sin 2\theta$.
17. Prove that the (p-r) equation of the cardioid $r = a(1 - \cos\theta)$ is $\rho^2 = r^3/2a$
18. Find the radius of curvature of the curve $r^2 = a^2 \cos 2\theta$ is $a^2/3r$.
19. Show that the pedal equation of the curve $r = a^\theta$ is of the form $p = kr$ where k is a constant.
20. Find the angle at which the radius vector cuts the curve $\frac{l}{r} = 1 + e \cos\theta$
21. Find the slope of the tangent with the initial line for the cardioids $r = a(1 - \cos\theta)$ at $\theta = \pi/6$.
22. Derive the pedal equation of a curve.
23. Find the centroid of an elliptic quadrant, the equation of ellipse is $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$

24. Find the centroid of the arc and sector of a circle.
25. Find the radius of curvature of $r \cos^2 \frac{\theta}{2} = a$.
26. Find the asymptotes of $(x+y)^2(x+2y+2)=x+9y-2$.
27. Find the asymptotes of the cubic $y^3-6xy^2+11x^2y-6x^3+x+y=0$.
28. Find the asymptotes of $x^3 + 2yx^2 - xy^2 - 2y^3 + 4y^2 + 2xy + y - 1 = 0$.
29. Prove that the asymptotes of the curve $(x^2-y^2)y-2ay^2+5x-7=0$ form a triangle of area a^2 .

UNIT-III

30. Show that for the cissoid $y^2(2a-x)=x^3$, the origin is a single cusp of the first species.
31. How the double points of a curve are found?
32. Examine the nature of double points for the curve $x^3+y^3+3axy=a^3$.
33. Show that the curve $y^2=2yx^2+x^4y+x^4$ has a double keratoid cusp at the origin.
34. Show that $x^4-2yx^2-xy^2-2x^2+y^2-2xy-x+2y+1=0$ has a single cusp of the second kind at $(0,-1)$.
35. Trace the curve $(a^2+x^2)y=a^2x$
36. Trace the curve $y=x^2(x-1)$
37. Trace the curve $y^2=x^2 \frac{a+x}{b-x}$.
38. Trace the curve $y^2=(x-1)(x-2)(x-3)$

UNIT-IV

39. Find the value of $\iint xy \, dx \, dy$ taken over the positive quadrant of the circle $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$.
40. Change the order of integration in the integral $\int_0^a \int_{\frac{x^2}{a}}^{2a-x} xy \, dx \, dy$ and evaluate it.
41. By changing the order of integration, evaluate $\int_0^\infty \int_x^\infty \frac{e^{-y}}{y} \, dx \, dy$.
42. Evaluate $\iint y \, dx \, dy$ over the region between the parabola $x^2=y$ and the line $x+y=2$.
43. Evaluate $\iiint \frac{dx \, dy \, dz}{\sqrt{1-x^2-y^2-z^2}}$ for all positive values of x, y, z for which the integral is real.
44. If u, v are functions of x, y and x, y are themselves functions of ξ, η then prove that $\frac{\partial(u,v)}{\partial(x,y)} \cdot \frac{\partial(x,y)}{\partial(\xi,\eta)} = \frac{\partial(u,v)}{\partial(\xi,\eta)}$. Also prove that $\frac{\partial(u,v)}{\partial(x,y)} \cdot \frac{\partial(x,y)}{\partial(u,v)} = 1$.

UNIT-V

45. Evaluate the integral $\int_0^{\pi/2} \cos^9 x \, dx$
46. Prove that $\beta(m,n)=\beta(n,m)$ (ii). $\Gamma(n+1) = n \Gamma(n)$.
47. Evaluate the integral $\int_0^1 (\log \frac{1}{x})^n \, dx$
48. Prove that $\Gamma(1/2) = \sqrt{\pi}$
49. Show that $\Gamma(n+1)=n \Gamma(n)$. Deduce $\Gamma(n+1)=n!$
50. Evaluate: (i) $\int_0^1 x^7 (1-x)^8 \, dx$.
(ii) $\int_0^{\pi/2} \sin^{10} \theta \, d\theta$
51. (i) Prove that $\Gamma\left(n + \frac{1}{2}\right) = \frac{1.3.5 \dots (2n-1)}{2^n} \sqrt{\pi}$
(ii) Find $\Gamma\left(\frac{5}{2}\right)$
52. Show that $\int_0^{\pi/2} \sqrt{\tan \theta} \, d\theta = \frac{\pi}{\sqrt{2}}$
53. Express $\int_0^1 x^m ((1-x^n)^p \, dx$ in terms of Gamma functions and evaluate the integral $\int_0^1 x^5 ((1-x^3)^{10} \, dx$
54. Show that $\beta(m, n) = 2 \int_0^{\pi/2} (\sin x)^{2m-1} (\cos x)^{2n-1} \, dx$.
55. Evaluate $\int_0^1 x^2 (1-x)^3 \, dx$.
56. Evaluate $\int_0^1 x^3 (1-x^2)^{\frac{5}{2}} \, dx$
57. Evaluate $\int_0^1 x^3 \sqrt{1-x} \, dx$.
58. Evaluate $\int_0^{\pi/2} \sin^6 x \cos^4 x \, dx$.
59. Evaluate $\int_0^{\pi/2} \sin^6 x \cos^3 x \, dx$.
60. Evaluate $\int_0^{\pi/2} \sin^3 x \cos^{10} x \, dx$.
61. Evaluate $\int_0^{\pi/2} \sin^8 x \, dx$.
62. Evaluate $\int_0^{\pi/2} \cos^9 x \, dx$.
63. Evaluate the integral $\iint x^p y^q \, dx \, dy$ over the positive quadrant of the circle $x^2 + y^2 = a^2$ in terms of Gamma function. Deduce the area of the circle.

64. Prove that $\iiint \frac{dx dy dz}{(1-x^2-y^2-z^2)^{\frac{3}{2}}} = \frac{\pi^2}{8}$, the integration extended to all positive values of the variables for which the expression is real.

SECTION – D

UNIT -I

1. If a curve is defined by the parametric equation $x=f(\theta)$ and $y=\varphi(\theta)$, prove that the curvature is $\frac{1}{\rho} = \frac{x'y'' - y'x''}{(x'^2 + y'^2)^{\frac{3}{2}}}$
2. Show that the projection on the y-axis of the radius of curvature at any point (x, y) of the curve $y = \log \cos x$ is constant.
3. Show that for the curve $x^{2/3} + y^{2/3} = a^{2/3}$, $X = a \cos^3 t + 3a \cos t \sin^2 t$, $Y = a \sin^3 t + 3a \sin t \cos^2 t$
4. Show that evolute of $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ is $(ax)^{2/3} + (by)^{2/3} = (a^2 - b^2)^{2/3}$
5. Show that the circle of curvature of the curve $\sqrt{x} + \sqrt{y} = \sqrt{a}$ at $(a/4, a/4)$ is $X+Y=3(x+y)$
6. Show that for the parabola $y^2 = 4ax$ at the point 't' the radius of curvature is $-2a(1+t^2)^{3/2}$. Also find the equation of the evolute.
7. Show that the equation of the evolute of $x = a(\cos t + \log \tan t/2)$, $y = a \sin t$ is $y = a \cosh(x/a)$.
8. Find the expression for the radius of curvature at any point of the curve $x^m + y^m = 1$ and interpret the result for the cases $m = 1$ and $m = 2$.
9. The tangents at two points P, Q on the cycloid $x = a(\theta - \sin \theta)$, $y = a(1 - \cos \theta)$ are at right angles. If ρ and ρ' are the radii of curvature at these points then find $\rho^2 + \rho'^2$.
10. Show that the evolute of the hyperbola $\frac{x^2}{a^2} - \frac{y^2}{b^2} = 1$ is $(ax)^{\frac{2}{3}} - (by)^{\frac{2}{3}} = (a^2 + b^2)^{\frac{2}{3}}$

UNIT-II

11. Show that the radius of curvature of the curve $r^n = a^n \cos n\theta$ is $\frac{a^n r^{-n+1}}{n+1}$
12. Derive $\rho = r dr/dp$ (ii) Find the radius of curvature of the curve $r^2 = a^2 \sin 2\theta$.
13. Find that the radius of curvature of the curve $r^n = a^n \sin n\theta$.
14. Find the radius of curvature when the curve is given in polar co-ordinates.
15. Find the radius of curvature of $r = a(1 + \cos \theta)$ and hence prove that ρ^2/r is constant.
16. Show that in the cardioid $r = a(1 + \cos \theta)$, $\frac{\rho^2}{r}$ is constant.

17. Show that the radius of curvature of the curve $r = a \sin n\theta$ at the pole is $\frac{na}{2}$.
18. Find the p-r equation of the curve $x^2 + y^2 = ax$ and deduce its radius of Curvature.
19. Show that the p-r equation of the curve $x^{2/3} + y^{2/3} = a^{2/3}$ is $r^2 + 3p^2 = a^2$. Hence deduce its radius of curvature.
20. For the curve $r = a \sec 2\theta$, show that $\rho = -\frac{r^4}{3p^3}$.
21. Find the asymptotes of $x^3 + 2x^2y - 4xy^2 - 8y^3 - 4x + 8y = 1$
22. Determine the asymptotes of the curve $4(x^4 + y^4) - 17x^2y^2 - 4x(4y^2 - x^2) + 2(x^2 - 2) = 0$ and show that they pass through the points of intersection of the curve with the ellipse $x^2 + 4y^2 = 4$.
23. Show that the asymptotes of the cubic $x^3 - 2y^3 + xy(2x - y) + y(x - y) + 1 = 0$ cuts the curve in three points which lie on the straight line $x - y + 1 = 0$.
24. Show that the asymptotes of the cubic $x^2y - xy^2 + xy + y^2 + x - y = 0$ cut the curve again in three points which lie on the line $x + y = 0$.

Unit-III

25. Examine for double points of the curve $x^4 - 2ay^3 - 3a^2y^3 - 2a^2x^2 + a^4 = 0$.
26. Show that $x^4 - 4ax^3 - 2ay^3 + 4a^2x^2 + 3a^2y^2 - a^4 = 0$ has nodes at $(a, 0)$, $(0, a)$ and $(2a, a)$. Find the tangents at these points.
27. Examine the nature of the singular points on the curve $(x + y)^3 = \sqrt{2}(y - x + 2)^2$
28. In the curve $y^2 = (x - a)^2(x - b)$. Show that there is a node or conjugate point at $x = a$ according as $a < b$, $a = b$, $a > b$. Show that the points of inflexion have for their abscissa $x = \frac{4b - a}{3}$.
29. Examine the nature of the origin on the curve $x^4 - yx^2 + y^3 = 0$.
30. Show that the origin is a conjugate point on the curve $x^4 - ayx^2 + axy^2 + a^2y^2 = 0$

UNIT IV

31. (i) Evaluate $\iint xy \, dx \, dy$ taken over the positive quadrant of the circle $x^2 + y^2 = a^2$.
 (ii) Evaluate the integral $\int_0^\pi \int_0^{a(1+\cos\theta)} r^2 \sin\theta \, dr \, d\theta$.

32. (i) By changing the order of integration evaluate $\int_0^3 \int_1^{\sqrt{4-y}} (x+y) dx dy$.
(ii) Evaluate $\iint \sqrt{4x^2 - y^2} dx dy$ over the area bounded by $y = 0, y = x$ and $x = 1$.
33. Evaluate $\iiint xyz dx dy dz$ taken through the positive octant of the sphere $x^2 + y^2 + z^2 = a^2$.
34. Evaluate $\iiint \frac{dx dy dz}{(x+y+z+1)^3}$ taken over the volume bounded by the planes $x = 0, y = 0, z = 0$ and $\frac{x}{a} + \frac{y}{b} + \frac{z}{c} = 1$.
35. Show that $\iiint x^{-1/2} y^{-1/2} z^{-1/2} (1-x-y-z)^{1/2} dx dy dz = \frac{\pi^2}{4}$ where the integral is taken over the volume bounded by the planes $x = 0, y = 0, z = 0, x + y + z = 1$.

UNIT – V

36. Prove that $\int_0^{\frac{\pi}{2}} \sqrt{\sin \theta} d\theta \int_0^{\frac{\pi}{2}} \frac{d\theta}{\sqrt{\sin \theta}} = \pi$
37. Prove that $\beta(m, n) = \Gamma(m) \Gamma(n) / \Gamma(m+n)$.
38. Show that $\int_0^\infty x^n e^{-h^2 x^2} dx = \frac{\Gamma(\frac{n+1}{2})}{2h^{n+1}}$. Deduce that $\int_0^\infty e^{-h^2 x^2} dx = \frac{\sqrt{\pi}}{2h}$. Show that $\int_0^\infty \cos(x^2) dx = \int_0^\infty \sin(x^2) dx = \frac{1}{2} \left(\frac{\pi}{2}\right)^{\frac{1}{2}}$
39. State and prove Duplication formula.
40. Evaluate in terms of Gamma function the integral $\iiint x^p y^q z^r dx dy dz$ taken over the volume of the tetrahedron given by $x \geq 0, y \geq 0, z \geq 0$ and $x + y + z \leq 1$.

ST. MARY'S COLLEGE (AUTONOMOUS), THOOTHUKUDI
I B.Sc. Mathematics
SEMESTER I- Sub. Code: 21UMAPE1
Skill Enhancement Course
PROFESSIONAL ENGLISH FOR MATHEMATICS I
Question Bank

SECTION A

Unit-I

1. A number of vehicles or aircraft operating together or under the same ownership.
 (a) **Fleet** (b)lumber (c)crawl (d) dally
2. A person who pursues a hobby
 (a) **Hobbyists** (b)expert (c) Genius (d)connoisseur
3. Absolutely necessary
 (a) **Vital** (b)delicate (c)weak (d)feeble
4. A person who writes an account of someone's life
 (a)Civilian (b)apprentice (c)writer (d) **Biographer**
5. A person who is skilled in craft
 (a)Civilian (b)apprentice (c)unskilled worker (d)**craftsman**
6. To include something within something else
 (a) **Incorporate** (b)disconnect (c) exclude (d)disperse
7. A place where weapons are kept
 (a) Weapon Saver (b)**Armoury** (c)Weaponer (d)storehouse
8. A person or thing acting or serving in place of another
 (a)mover (b)delegater (c)**Substitutes** (d)abettor
9. The absence or opposite of something actual or positive
 (a) **Negation** (b)Conjunction (c)Disjunction (d)affirmation
10. The action or an instance of two or more events or things occurring at the same point in time or space
 (a)Negation (b)**Conjunction** (c)Disjunction (d)affirmation

Unit-II

Choose the correct answer

- 11 -----refers to the relation of two distinct things.
 (a) **Conjunction** (b) Disjunction (c) Decision (d) Negation
12. Acoustics is a branch of science that deals with -----
 (a) **Sound** (b) light (c) water (d) air
13. The most effective reading method to comprehend a text is -----.
 (a) skimming (b) scanning (c) **intensive** (d) extensive
- 14 -----are the words or multi word expressions that are given specific meanings in specific contexts.
 (a) definitions (b)**terms** (c)quotes (d)extended definitions

Choose the appropriate one word description for the following.

15. The part of mathematics in which letters and other general symbols are used to represent numbers and quantities
 (a) **Algebra** (b)Numerical maths (c)Analysis (d) Topology

16. It is a choice between two alternatives, taking some specific action or not taking it.

- (a) choose (b) select (c) **decision making** (d) option

17. An ancient device that is used for arithmetic calculations.

- (a) **Abacus** (b) calculator (c) computer (d) laptop

18. In a way that becomes quicker and quicker as something that increases becomes larger.

- (a) increase (b) decrease (c) diminish (d) **expand**

19. To throw something away

- (a) collect (b) **discard** (c) pluck (d) reap

Unit-III

a. A robot _____ not injure a human being

- (a) **may** (b) have (c) but (d) shall

b. A form of electrical connector

- (a) headed (b) connector (c) **pinheaded** (d) deviser

c. Dr. Gregory suffers _____ cancer)

- (a) with (b) **from** (c) on (d) but

d. The backward movement of a gun when it is discharged

- (a) **Recoil** (b) blench (c) quail (d) shrink

e. The word used for designing or constructing in small size

- (a) bountiful (b) **miniaturization** (c) massiveness (d) bulky

f. Sir C.V. Raman _____ a robotic scientist

- (a) are (b) **is** (c) will be (d) were

g. Isaac has edited or wrote _____ than 500 volumes

- (a) **more** (b) enough (c) most (d) but

Unit-IV

h. _____ is produced when assembling several soap bubbles.

- (a) Soap (b) **Foam** (c) detergent (d) cleanser

i. _____ refers the attribution of human traits, emotions, or intensions to non-human entities.

- (a) **Anthropomorphism** (b) Authomorphism
(c) Isomorphism (d) Homomorphism

29. Which of the following words is not related to the word 'Phenomenon'?

- (a) Occurance (b) **Inert**
(c) Happening (d) Circumstance

30. Which one of the following words does not means 'fascination'?

- (a) Passion (b) Obsession (c) **Repulsion** (d) Enchantment

31. Find the synonym of 'hypothesis'

- (a) **postulation** (b) fact (c) Certainty (d) evidence

32. A force of attraction that exists between any two masses is _____.

- (a) Relativity (b) **Gravity** (c) phenomenon (d) black hole.

33. The constant _____ of hydrogen to helium creates the energy and radiation from a star.

- (a) fission (b) balance (c) **fusion** (d) blast.

34. _____ is a fact or an event in nature, which is not fully understood

- (a) Relativity (b) Lonization (c) **phenomenon** (d) blast.

Unit-V

Choose the correct definition of the words given in italics.

35. useful in *erecting* proper beams to support...
 (a) **put together and set upright** (b) stand straight
 (c) create (d) perpendicular
36. this theorem *functions* as the basic principle...
 (a) celebrations (b) **acts or works**
 (c) a mathematical terminology (d) responsible
37. use its *altitude* and its distance...
 (a) a settled way of thinking or feeling about something
 (b) height from the sea level
 (c) time traveled
 (d) **length**

Choose the correct answer

38. Obscuration is the action of _____.
 (a) Subsiding (b) explaining (c) **hiding** (d) presenting
39. Pi Day is celebrated on _____.
 (a) 15 Feb (b) 15 March (c) **14 March** (d) 14 April

Choose the correct synonym of the given words

40. Transmission
 (a) collect (b) hide (c) conceal (d) **carrying**
41. Navigation
 (a) **map-reading** (b) get lost (c) forget (d) neglect

Section-B

Unit-I

1. Frame the sentences using the following words
 a. influenced
 b. embedded
2. Unscramble the words with the given clue:
 a. c r t k o e - Missile
 b. n a p e l t - heavenly body
3. Rearrange the given words in the proper order:
 a. Isaac Asimov/ remarkable/ American/ is a/ figure/ sciencefiction/in
 b. Tipu /designated /to /the/ rockets/ created /a/ force/ operate
4. Write two sentences about the picture below

5. Write sentences using the following terms:
 a. denote
 b. virtual
6. Write two sentences using 'OR' & 'AND'.

7. Fill in the blanks with suitable Articles:

Marie Curie was _____ first woman to win _____ Nobel Prize. She has also been _____ inspiration to girls all over _____ world.

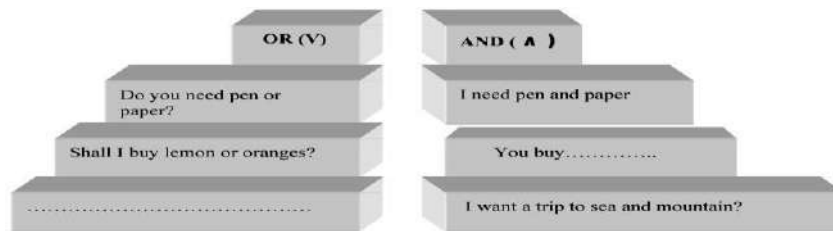

8. Classify the following terms as devices, concepts or processes.

Raman effect, Scattering, Prism

9. Fill in with suitable prepositions:

In 1859, Robert Chesebrough went _____ the oil fields _____ Titusville, Pennsylvania, and learnt _____ a residue called "rod wax" that had to be periodically removed _____ oil rig pumps.

10. Combine the sentence bars using "OR" & "AND"

Unit-II

11. Fill with suitable propositions

White light is obtained _____ using multiple semiconductors or a layer _____ light emitting phosphor on the semiconductor device.

12. Fill in with suitable articles:

LED display is _____ screen display technology that uses a panel of LEDs as _____ light source.

13. Rearrange the given words in the proper order:

- George Boole / by / introduced / was / Boolean Algebra
- First / Marie Curie / Nobel / the / was / win / woman / to

14. What do you think about the effect of mobile phones in the lives of students?

15. State the use of articles with an example.

16. Write any four instructions followed for making a mind map.

17. Give the extended definitions of the following terms

- Robot
- Sensor

18. Describe the following words

- Alchemist
- Neolithic

Unit-III

19. Unscramble the following words

- Woinrab
- Blepaosbub

20. Rearrange the given words in the proper order:

- George Boole / by / introduced / was / Boolean Algebra
- First / Marie Curie / Nobel / the / was / win / woman / to

21. Unscramble the following words.

- Emurcyr

b. Pcagpsrhoetr

22. Write a sentence describing the given words

a. Potential

b. Efficient

23. Fill in with suitable prepositions:

Biomass _____ which biofuel is made includes products like wood, sugar cane, manure and waste _____ agriculture.

24. Fill in the blanks with suitable Articles:

Dr.Gregory Arnfeld is _____robotic scientist, living in _____twenty second century. He is _____expert in miniaturisation.

25. Write two sentences about the picture below

Frozen soap bubble on snow

Unit-IV

26. Write the antonym of the following.

a. Displeasure

b. Inconstant

27. Frame sentences using the following words.

a. Voyage

b. Narrow

28. Express your views on online classes by completing the following expressions:

a. In my opinion _____

b. I am convinced that _____

29. Find the missing letters

a.Sp_ghet_ification

b.Lo_iz_tion

c. Si_nifi_ance

d. E_yptolo_ist

30. Unscramble the following words

a. rminetede

b. ciathenmamati

c. ntstacon

d. atbaaahtry

Unit-V

31. Frame sentences using the following words.

a. Voyage

b. Narrow

32. Give the synonyms of the following

a. predict _____

b. sufficient _____

33. Give the antonyms of the following

a. Experience _____.

- b. Invaluable _____.
34. Find the missing letters
- a. V_ C _____ M
- b. M_ T _____ N
35. Give some brief information about the following terms
- a. Big Bang Theory
- b. Reionization
36. Unscramble the following words
- a. imlehu
- b. mssooc
- c. Naeoelcepsc
- d. Gpapoothyhr
37. Describe the following words
- a. Multiverse
- b. Singularity

Section-C

Unit-I

1. Read the passage and describe the key contribution of Raman.

A glass of water has no colour. But a deep sea with the same water is a brilliant blue. Why is this so? This was the question that CV Raman asked himself in 1921 on seeing the colour of the Mediterranean Sea from a ship. He immediately began to conduct experiments on board the ship using some simple instruments he had with him. At that time, scientists believed the sea was blue because it reflected the colour of the sky, but Raman found that it was the water itself that caused blue light to scatter more than other colours in light.

Raman returned from his visit to England and Europe and started experiments to study how light behaved when it passed through various substances. On February 28, 1928, one of the experiments gave a clear result. Light of only one colour was passed through a liquid, but the light that emerged had small traces of another colour. This meant that the molecules in the liquid were changing the colour of some of the light passing through it. The discovery created a sensation around the world and was named the Raman Effect. In 1930, CV Raman became the first person from Asia to be awarded a Nobel prize in any field of science. The date of the discovery, February 28, is now celebrated as National Science Day in India. The Raman Effect has been very useful in many areas of science. It was found that when light was passed through a substance, a series of colours were seen that could be thought of as a fingerprint of the substance. This idea has been used in chemistry, medicine, biology and many other areas of science. It is called Raman Spectroscopy.

2. Express your views on online classes by completing the following expressions:

- a. I think _____
- b. I believe _____
- c. It seems to me that _____
- d. In my opinion _____

3. Fill in the blanks with suitable words from the choices given in the bracket:
(conjunction, algebra, operations, disjunction, variables)

In mathematics and mathematical logic, Boolean algebra is the branch of algebra in which the values of the _____ are the truth values true and false, usually denoted as 1 and 0, respectively. Instead of elementary _____ where the values of the variables are numbers, and the prime _____ are addition and multiplication, the main operations of Boolean algebra are the _____ denoted as \wedge , the _____ denoted as \vee , and the negation denoted as \neg .

4. Use your imagination to develop a story from the above cartoon strip. Give the story a beginning, a climax (turning point) and an ending.

Unit-II

5. Frame 'Wh' Questions to the answers given below.
- Soap bubbles lasts for a few seconds.
 - Interferences of different colours
 - constant mean curvature
 - Evaporation
6. Write a summary about the following picture

- Explain the term process description.
- Write short notes about the impact of mobile phone on the lives of people (not exceeding 100 words).
- Give the definitions for the following terms
 - Barometer
 - Microphone
 - Computer Program
 - Flow chart
- Fill in the gaps with suitable words in the bracket
(Gold, Pottassium chlorate, 5th century, other metals, 1805)
 - Wooden sticks coated with sulphur paved the way as a catalyst for fire in-----.
 - Chancel opted wooden stick with----- than phosphorus.

- c. Hennig Brandt dreamt of -----from other -----in his lifetime.

Unit-III

6. Find the missing letters and write the word

1	q			a	n		u					
2	a			r		n		m			s	
3		n		h		o		o		h	s	
4		o		o		o		o		a		
5	c			a			i	u				

7. Read the passage and match the following:

The 'black' part of the black hole is the event horizon. If an object breaches the event horizon and approaches the singularity it will become 'spaghettified' – stretched and pulled apart by the black hole's gravitational forces. Scientists think that in the middle of the black hole is a 'singularity'. It's at this point in the black hole discussion that classical physics principles can no longer be applied (it stops making sense in this context) and quantum mechanics takes over. The theory is that the singularity is an infinitely small point where gravity and density are also infinite. The black hole is packed with all the heavy elements from the star but in a much smaller space. Imagine the mass of a star 10 times the size of our Sun compressed into something the size of a city.

PART A

PART B

a. The 'black' part of the blackhole is	A.It will become
b. If an object breaches theevent horizon	B.The event horizon
c. In the middle of the black hole	C.In a much smaller pace
d. 'Spaghettified'	D.Is a singularity
e. Black hole packed with allthe heavy elements	E.stretched and pulled apart by the black hole's gravitational forces.

8. Read the following passage and answer Who am I?

A soap bubble is an extremely thin film of soapy water enclosing the air that forms a hollow sphere with an iridescent surface. Soap bubbles usually last for only a few seconds before bursting, either on their own or on contact with another object. They are often used for children's enjoyment, but they are also used in artistic performances. Assembling several bubbles results in foam. When light shines onto a bubble it appears to change colour. Unlike those seen in a rainbow, which arise from differential refraction, the colours seen in a soap bubble arise from interference of light reflecting off the front and backsurfaces of the thin soap film. Depending on the thickness of the film, different colours interfere constructively and destructively.

Questions

- (i) I am an extremely thin film of soapy water.
- (ii) I am a curved band of different colours that appears in the sky when the sun shines through rain.
- (iii) I am a surface that curves inward, or thinner in the middle than on the edges
- (iv) I am a surface that is having an outline or surface curved like the exterior of a circle or sphere or is thinner in the edges than in the middle

9. Read the passage and answer the questions below

Fuels in use today, like coal and oil, are made from fossils, plants, and animals which died thousands of years ago. Biofuels are fuels made from crops which have just been harvested and from biomass, which contains chemical energy stored from the sun. **Biofuel** (also called agrofuel) is an abbreviation for bio-organic fuel. It describes any plant or animal which can burn and be used for fuel.

Trucks, cars and buses and other vehicles used for transportation need clean-burning fuels. They have internal combustion engines. The fuel in a liquid state is more portable and easily pumped. Petroleum is used today. It is a **fossil fuel**. Coal and wood are also, used for energy but produce much more pollution in the atmosphere. They are fossil fuels too, made from dead plants and animals of long ago. Wood and its byproducts can now be converted into biofuels such as wood gas, methanol or ethanol fuel. The goal for all the production of energy is to turn away from the use of fossil fuels.

Biomass from which biofuel is made includes products like wood, sugar cane, manure and waste from agriculture. Biomass is a storehouse of the sun's energy. If it is handled wisely, more will be produced indefinitely. Fossil fuels may at some point run out. Chlorophyll from plants takes carbon dioxide from the air and combines it with water to form carbohydrates. When these carbohydrates are burned, they release the stored energy.

State whether the following sentences are TRUE or FALSE

1. Biomass contains solar energy.
2. Grass is not used to make biofuel.
3. Wood is both a fossil fuel and a biofuel

Fill in the blanks with the correct word from the passage

1. Biofuels are converted into energy by the process of _____.
2. _____ can be used as an alternative to petroleum in many products.
3. _____ is a power crop that is easily available.

Unit-IV

10. Frame sentences using the following words.

- i. Adapt
- ii. Eradicate
- iii. Essential
- iv. Resistant
- v. mild

11. Write the correct article.

A black hole comes from _ death of a large star (at least 10 times bigger than our Sun) exploding at the end of its life in a supernova. _ Sun, being too small, won't ever become _ black hole, it will expand, contract and cool off in its death process. This is a simple explanation of what _black hole is and how astronomers identify them. The constant fusion of hydrogen to helium creates the energy and radiation from _ star. A star is in a stable state for most of its life as the energy pushing out from _ star balances with _ gravitational force pulling in.

12. Read the following passage and write in your own words about the mystery of black holes

Astronomers observe black holes by watching the light from stars in the background warp as the gravity of the black hole pulls on the light. They also observe stars as they cross the 'event horizon' (the point of no return) and the radiation emitting from the black hole. But not everything gets pulled into the black hole. There is an orbital pattern to objects near some black holes. They get close to the black hole and then are 'flung' out again.

The 'black' part of the black hole is the event horizon. If an object breaches the event horizon and approaches the singularity it will become 'spaghettified' – stretched and pulled apart by the black hole's gravitational forces. Scientists think that in the middle of the black hole is a 'singularity'. It's

at this point in the black hole discussion that classical physics principles can no longer be applied (it stops making sense in this context) and quantum mechanics takes over. The theory is that the singularity is an infinitely small point where gravity and density are also infinite. The black hole is packed with all the heavy elements from the star but in a much smaller space. Imagine the mass of a star 10 times the size of our Sun compressed into something the size of a city.

13. Write a summary of the following passage in 50-60 line.

Disaster strikes

In 2000, Chawla was selected for her second voyage into space, serving again as a mission specialist on STS-107. The mission was delayed several times, and finally launched in 2003. Over the course of the 16-day flight, the crew completed more than 80 experiments. On the morning of Feb. 1, 2003, the space shuttle returned to Earth, intending to land at Kennedy Space Centre. At launch, a briefcase-sized piece of insulation had broken off and damaged the thermal protection system of the shuttle's wing, the shield that protects it from heat during re-entry. As the shuttle passed through the atmosphere, hot gas streaming into the wing caused it to break up. The unstable craft rolled and bucked, pitching the astronauts about. Less than a minute passed before the ship depressurized, killing the crew. The shuttle broke up over Texas and Louisiana before plunging into the ground. The accident was the second major disaster for the space shuttle program, following the 1986 explosion of the shuttle Challenger.

The entire crew of seven was killed. In addition to Chawla, the crew included:

Commander Rick D. Husband
Pilot William C. McCool
Payload Commander Michael P. Anderson
Payload Specialist Ilan Ramon, the first Israeli astronaut
Mission Specialists David M. Brown and Laurel B. Clark

Over the course of her two missions, Chawla logged 30 days, 14 hours, and 54 minutes in space. After her first launch, she said, "When you look at the stars and the galaxy, you feel that you are not just from any particular piece of land, but from the solar system."

Unit-V

14. State the concepts for the following words.

- i. Transmission
- ii. Orbiters
- iii. Rovers
- iv. Landers

15. Read the passage and answer the questions below

In 1911 and 1912 Austrian physicist Victor Hess made a progression of risings in an inflatable to take estimations of radiation in the climate. He was searching for the wellspring of an ionizing radiation that enrolled on an electroscope – the common hypothesis was that the radiation originated from the stones of the Earth. To test the hypothesis, in 1909 German researcher Theodor Wulf estimated the pace of ionization close to the highest point of the Eiffel tower (at a stature of around 300 meters) utilizing a convenient electroscope. Despite the fact that he expected the ionization rate to diminish with stature, Wulf noticed that the ionization rate at the top was simply under a large portion of that at ground level – a substantially less huge abatement than foreseen.

Victor Hess' inflatable flights took such estimations further. In 1911 his inflatable arrived at a height of around 1100 meters, however Hess found "no fundamental change" in the measure of radiation contrasted and ground level. At that point, on 7 April 1912, Hess made a rising to 5300 meters during a close complete obscuration of the Sun. Since ionization of the air didn't diminish during the overshadowing, he contemplated that the wellspring of the radiation couldn't be the Sun it must be originating from farther in space. High in the air, Hess had found a characteristic wellspring of high-vitality particles: inestimable beams.

- a. Who invented Cosmic Rays?
- b. Write down the technical words that were used in the paragraph.

16. Read the following passage and answer the questions given below.

In many places on our planet, we experience severe disasters like earthquakes, tsunamis, and cyclones resulting in loss of life, loss of wealth, and, in some cases, the destruction of decades of progress made by countries and their valuable cultural heritage. India has earthquake problems periodically in certain regions. The U.S. Japan, Turkey, Iran, and many other countries also suffer due to earthquakes. Earthquakes and tsunamis are sub-terrain phenomena and predicting this from space observations would be a great challenge. Space scientists of multiple nations should work together to use satellite deep penetration images to predict the earthquake or shock wave propagation. Other possibilities are a precise geodynamic measurement of strain accumulation by satellite to detect pre-slip, and electromagnetic phenomena prior to final rupture. The focus must be on earthquake forecasting with an adequate warning so that people can move to safer areas. Space technology can also be used for forecasting and modeling of volcanic eruptions, landslides, avalanches, flash floods, storm surges, hurricanes, and tornadoes.

- a. Earthquakes and tsunamis are ----- phenomena.
- b. Space scientists should work -----.
- c. The focus must be on earthquakes -----
- d. Space Technology is used for -----

17. Choose the correct words from the bracket and complete the below paragraph
(telescope, steepness, height, length of the slope, right angle)

It is useful to cartographers, who use it to calculate the -----of hills and mountains. A surveyor looks through a----- toward a measuring stick a fixed distance away, so that the telescope's line of sight and the measuring stick form a right angle. Since the surveyor knows both the height of the measuring stick and the horizontal distance of the stick from the telescope, he can then use the theorem to find the ----- that covers that distance, and from that length, determine how steep it is. The same principles can be used for navigation. For instance, a plane can use its-----above the ground and its distance from the destination airport to find the correct place to begin a descent to that airport.

5. Find a word in the following paragraph of the text that means the same as the words and phrases which are given below

The Big Bang Theory is supported by strong empirical evidence that makes it universally accepted. However, the scientific community was divided between the Big Bang and its rival, a steady-state model for much of the 20th century. The characteristics of the initial state of the universe in extreme density and temperature can be calculated using the laws of physics. Big bang theory offers an explanation for the initial expansion of the universe and

For a government, company, or institution, IoT devices are a little different, and generally focus more on collecting data which can be processed and visualized, often in real-time. Some examples include: Utility companies are able to more accurately forecast energy and water demands, reducing waste.

Advanced environmental sensors, include water, noise, and air quality monitors, can help understand pollution sources and effects before they negatively impact ecosystem and human health. Agencies charged with public safety can develop more advanced early warning systems for natural disasters like earthquakes and floods, and have better data with which to provide vital services like fighting fires and providing humanitarian relief.

Getting started with creating your own devices and software for the Internet of Things is surprisingly easy. There are numerous hardware platforms targeted to beginners and hobbyists alike which have large communities behind them, including many which are partially or fully open hardware. Security and privacy are major concerns while using IoT which are currently being addressed by various industries and governments all over the world.

- A. What is the Internet of Things?
- B. List some applications of IoT
- C. How can governments make use of IoT?
- D. What are the two major concerns while using IoT?
- E. What would you want to use IoT to make your daily life more comfortable in some way?

12. Read the passage and answer the questions below

Marie Curie was born in Poland where she lived till she was twenty-two. She was the fifth child in her family. She had a difficult childhood as both her parents and one of her sisters died before she was fifteen as she graduated from school. Marie was an excellent student and she managed to move to Paris to earn her higher degrees and start her scientific work. She had to overcome severe financial difficulties in order to pursue her interest in academics and research. Curie was married to her colleague Pierre Curie and had two daughters. The couple discovered Radium and Polonium and worked together to study radioactivity for which they received the Nobel prize in Physics. Pierre was an exceptional physicist but died in an accident in 1903.

Curie continued her work in radioactivity and received her second Nobel Prize in Chemistry in 1911 for the isolation of pure Radium. She made contributions to the medical field through her research and applications of X-Radiography, especially during World War I. X-Ray had already been discovered by Rontgen in 1895; and electrons were discovered in 1897 by J.J. Thomson. These discoveries together with the knowledge of radioactivity ushered in the era of modern Physics. Marie Curie was the first woman to win a Nobel Prize and also the first person to receive two Noble prizes. In 1935, another Nobel Prize would come to the family, as Curie's daughter Irene would win the Noble Prize in Chemistry with her husband for their work on artificial radioactivity. Curie's contributions to Nuclear Physics is immeasurable. She has also been an inspiration to girls all over the world who want to pursue a career in Physics and Chemistry.

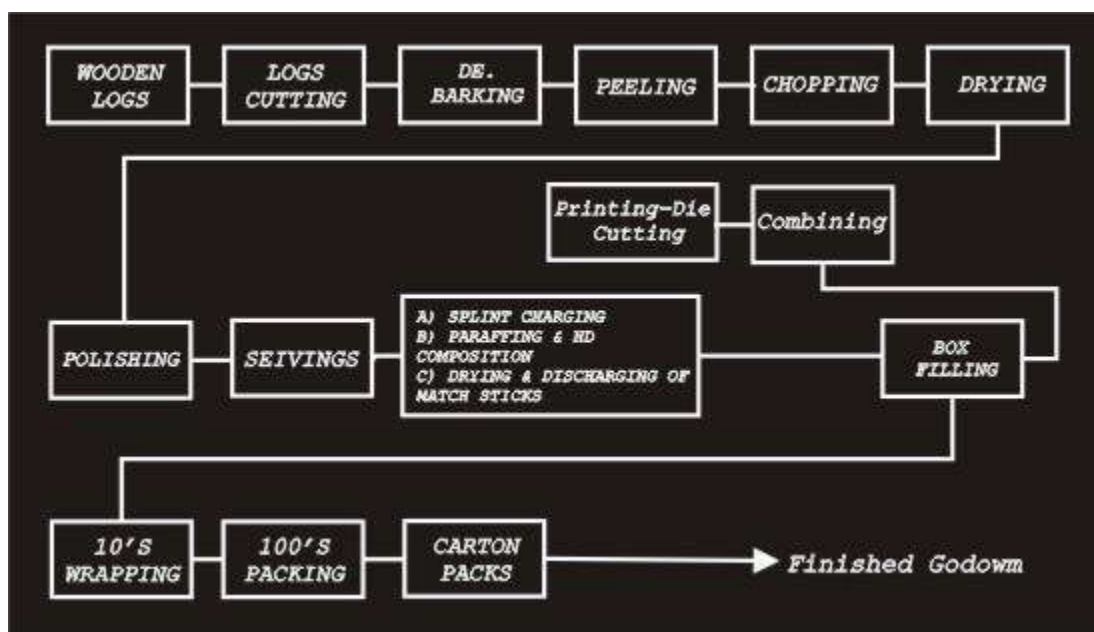

- A. Describe Curie's childhood.
- B. Who discovered the electron? Which year was it discovered?
- C. Briefly describe Marie Curie's contributions to the field of Science

Unit-II

13. Write a few sentences about each of these five pictures expressing their purpose.

14. Write a paragraph on using sequence expressions on the process of making safety matches using the following flow chart.

15. Express your views on advantages and disadvantages of ATM(Automatic Teller Machine) when compared to that of a Teller in a bank by using compare and contrast expressions.(use the words such as 'however', 'similarly', on the other hand, consequently, although, eventually, etc)

16. Describe each of the terms in one or two lines and frame sentence for each of the words.

- a. Cryptography
- b. Descendant
- c. Emigrate
- d. Furtherance
- e. Decry

17. Study the following detailed graph and the answer the questions below

- (i) Identify the type of graph given above.
- (ii) What are the electrical gadgets mentioned in the graph?
- (iii) Which Appliance has the least Usage in 2019? Which Gadget was mostly used by people in 2017?
- (iv) What are the uses of these electrical gadgets in today's world?
- (v) What will the increase in the usage of electronic devices lead

Unit-III

13. Read the passage and answer the questions below

Bubbles can be effectively used to teach and explore a wide variety of concepts to even young children. Flexibility, colour formation, reflective or mirrored surfaces, concave and convex surfaces, transparency, a variety of shapes (circle, square, triangle, sphere, cube, tetrahedron, and hexagon), elastic properties, and comparative sizing, as well as the more esoteric properties of bubbles listed on this page. Bubbles are useful in teaching concepts starting from two years old and into college years. A bubble is made of transparent water enclosing transparent air. However, the soap film is as thin as the visible light wavelength, resulting in interferences. This creates iridescence which, together with the bubble's spherical shape and fragility, contributes to its magical effect on children and adults alike. Each colour is the result of varying thicknesses of soap bubble film. Adding coloured dye to bubble mixtures fails to produce coloured bubbles, because the dye attaches to the water molecules as opposed to the surfactant. Therefore, a colourless bubble forms with the dye falling to a point at the base.

- a. What are the scientific concepts you have learnt through soap bubbles?
- b. Can you give examples of transparent elements other than water and air?
- c. What defines the different colours in the bubble?
- d. Do you like soap bubbles? If Yes, why? If NO, why not?

14. Frame 'Wh' Questions to the answers given below

- a. Foam
- b. Soap bubbles last for a few seconds.

- c. Interferences of different colours
- d. constant mean curvature
- e. Evaporation

15. If you are a soap bubble seller, how will you sell it effectively?

Demonstrate.

16. Share your memorable experiences with soap bubbles from your childhood to the present.

17. Can you connect the characteristics of the soap bubble with any other object? Present it effectively

18. Describe the picture below

19. Read and be ready to answer the questions below

Artificial intelligence (AI) refers to the simulation of human intelligence in machines that are programmed to think like humans and mimic their actions. The term may also be applied to any machine that exhibits traits associated with a human mind such as learning and problem-solving. The ideal characteristic of artificial intelligence is its ability to rationalize and take actions that have the best chance of achieving a specific goal. When most people hear the term artificial intelligence, the first thing they usually think of is robots. That's because big-budget films and novels weave stories about human-like machines that wreak havoc on Earth. Artificial intelligence is based on the principle that human intelligence can be defined in a way that a machine can easily mimic it and execute tasks, from the most simple to those that are even more complex. The goals of artificial intelligence include learning, reasoning, and perception. The applications for artificial intelligence are endless. The technology can be applied to many different sectors and industries. AI is being tested and used in the healthcare industry for dosing drugs and different treatment in patients, and for surgical procedures in the operating room. Other examples of machines with artificial intelligence include computers that play chess and self-driving cars. Weak AI tends to be simple and single-task oriented, while strong AI carries on tasks that are more complex and human-like.

- a. What are the goals of artificial intelligence?

- b. What is artificial intelligence based on?
- c. Which are the sectors that use AI in the present?
- d. Define weak and strong AI.
- e. Do you think it is a good idea to programme human intelligence in machines?
If so, what are the traits that can be programmed?

Unit-IV

20. Write a summary about the following picture

21. Read the following passage and answer the questions

Chawla's legacy

The events of Columbia have been officially investigated and reported on to understand what happened and how to prevent the tragedy from re-occurring in future spaceflights. Examples include the Columbia Accident Investigation Board (2003) NASA's Columbia Crew Survival Investigation Report (released in 2008).

Several documentaries have been produced about the Columbia crew. Some examples include "Astronaut Diaries: Remembering the Columbia Shuttle Crew" (2005), and one that focused on Ilan Ramon, called "Space Shuttle Columbia: Mission of Hope" (2013).

The University of Texas dedicated a Kalpana Chawla memorial at the Arlington College of Engineering in 2010. At the time of its opening, the display included a flight suit, photographs, information about Chawla's life, and a flag that was flown over the Johnson Space Center during a memorial for the Columbia astronauts.

There have been several rumors about films in production concerning Chawla's life, including a rumour in 2017 that had the actress Priyanka Chopra (known for Baywatch and Quantico, as well as Bollywood films) attached to it. But in a Quora discussion in 2017, Chawla's husband — Jean-Pierre Harrison — said: "Until I issue a public statement confirming my participation in such a project, take it for granted that I have not signed any agreement nor licensed any rights necessary to produce such a movie."

- a. Write any 3 achievements of Kalpana Chawla
- b. What were the documentaries produced about the Columbian Crew?
- c. What were the two major disasters of the space shuttle program?
- d. Give two chief causes for the 2003 disaster
- e. How was Kalpana Chawla honoured by the University of Texas?

22. Read the following passage and answer the questions:

The textual reference to pi dates back to 1900 BC. Both the Babylonians and Egyptians assessed the value of pi to be about roughly around $25/8$ (3.125), and $256/81$ (3.16) respectively. But, the undisputed credit of calculating the accurate value of pi that lies

between 3.1408 and 3.14285, goes the Ancient Greek mathematician Archimedes (287-212 BC). He arrived at this by finding the areas of two polygons: the polygon that was inscribed inside a circle, and the polygon in which a circle was circumscribed. Chinese mathematician Zhu Chongzhi (AD 429-500) used an identical method to estimate the value of pi as 355/113. In the 15th century, Indian mathematician Madhavan of Sangamagramam discovered the much celebrated Madhava-Leibniz series (named after German mathematician Gottfried Leibniz, who rediscovered the series in the 17th century), an infinite series that converges to four. Later, Madhavan calculated pi to 11 decimal places. Aryabhatta calculated the circumference of the earth and used $\pi = 22/7$ as constant in the calculation around 5th century BC. Subsequently, in 1707, a Welsh mathematician William Jones first used the Greek letter pi (π) to denote the constant ratio. This Greek letter, which meant 'perimeter' in Greek, was popularized by a Swiss mathematician, Leonhard Euler. In 1945, it was D. F. Ferguson, who calculated the value of pi to 620 digits which was the most accurate calculation even before the advent of the computer. Ferguson's accuracy grew by leaps and bounds with the aid of computer, which extended to 206,158,430,000 digits in 1999. By using Alexander Yee's y-cruncher program, in 2011, Shigeru Kondo created a record by accomplishing the longest calculation of pi to 10 trillion digits. In the present times, the value of pi in decimal form, is approximately 3.14. But pi is an irrational number, meaning that its decimal form neither ends (like $1/4 = 0.25$) nor becomes repetitive like $1/6 = 0.166666...$ So, the value of pi is restricted to only 18 decimal places, thus pi is 3.141592653589793238.)

1. List out the names of Mathematicians mentioned in the given passage while tracing the growth of pi.
2. How did Archimedes calculate the value of pi?
3. Name the invention which is closely associated with pi?
4. What is meaning of pi in Greek?
5. What is the longest calculation achieved with the aid of computer program?
23. Give the advantages and disadvantages of 5G network technology.

Unit V

24. Read the following passage and answer the questions

It will be surprising to know that this theorem functions as the basic principle of one of the most advanced inventions in human history, the navigation system. Now many countries have their navigation systems. The GPS of the United States America, GLONASS of Russia, Galileo of the European Union, BeiDou of China, QZSS of Japan, and NavIC of India are the operational navigation systems in the world today. These navigation systems guide aircraft, ships, and other vehicles accurately to reach their destination. In navigation, the Pythagorean theorem helps to calculate the distance between two points. The satellites orbiting the entire globe transmitting positioning and timing data all through the day. Navigation in three dimensions is the basic function of navigations systems used around the world. Navigation receivers in the aircraft, ships, and ground vehicles supply data to control systems over radio signals. The GPS of the USA is the most famous navigation system used almost all over the world. It uses a constellation of earth-orbiting satellites to send and receive data. Any navigation system uses signals from three different satellites to calculate the distance by performing triangulation activity. Navigation systems help in precise positioning and movement of objects. An Aircraft will use its altitude and its distance from destination to identify the right place to begin a descent to the airport. Navigation systems are used for military purposes in the past but now they are provided to all, hence we can use our smartphone to find out a destination or calculate distance.

- i) What is a navigation system?
- ii) What is the name of the navigation system developed by India?

- iii) How is the navigation system useful for an aircraft?
- iv) How does the Pythagorean theorem help in navigation?
- v) How does a navigation system work?

25. Read the text and fill in the gaps with the following words

(Finite, Brane, proton, fusing, galaxie, light, reionization, neutrons, dimensions, plasma)

The beginning of our universe would have been nice and -----.

The cyclic model posits that our universe consists of 11 -----, only four of which we can observe (three of space and one of time). Our four-dimensional part of the universe is called a --. (short for membrane). Just after inflation, the universe was likely filled with hot, dense --. But by around 1 microsecond (10 to the minus 6 seconds) or so, it had cooled enough to allow the first ----- and neutrons to form, researchers, think. In the first three minutes after the Big Bang, these protons and ----- began together, forming deuterium (also known as heavy hydrogen). Deuterium atoms then joined up with each other, forming helium 4. Over time, stars gravitated together to form ----- leading to more and more ----- structure in the universe. Planets coalesced around some newly forming stars, including our own sun. And 3.8 billion years ago, life took root on Earth. Once [the universe's first stars ignited](#), the ----- they unleashed packed enough punch to once again strip electrons from neutral atoms, a key chapter of the universe called --.

26. Match the terms and their concepts given in the below table

S.N o	Terms	Concepts
1	Galaxy	the small, dense region consisting of protons and neutrons at the center of an atom
2	Cosmology	the observation that galaxies are moving away from the Earth at velocities proportional to their distance
3	Big bang theory	the scientific study of the large scale properties of the universe as a whole
4	Density	A single point of very high temperature and infinite density
5	Singularity	A measure of mass per volume
6	Hubble's law	the universe began as just a single point, then expanded to grow as large as it is right now
7	Proton	A subatomic particle with a negative electric charge
8	Electron	A subatomic particle with no electric charge
9	Neutron	A subatomic particle with a positive electric charge
10	Atomic nuclei	a huge collection of gas, dust, and billions of stars and their solar systems, all held together by gravity

27. Read the below passage and write in your own words about the origin of the universe (100-200 words)

The Big Bang Theory is a comprehensive account of the expansion of the universe or an

explanation as to how the universe began. The Belgian priest and professor of Physics, Georges Lemaître was the first to suggest the big bang theory as a cosmological model for the universe in the 1920s. Many scientists have offered theories in which a single point of infinite density and finite time is accounted for the origin of the universe and its expansion. The Big Bang Theory suggests that the expansion started before 14 billion years from a state where the universe was compressed into a single point. This expansion of the matter and energy in the universe is called the big bang. However, the process of expansion still continues. Studies reveal that the universe was an extremely hot, small, and dense super force. It had no stars, atoms, form, or structure and was called a “singularity.” According to the reports of NASA, the surrounding temperature in the first second of expansion was about 10 billion degrees Fahrenheit (5.5 billion Celsius) and the density of energy was extreme for the first 10 to 43 seconds. Theoretical physics is still unable to provide a clear explanation of what was happening. The cosmos did contain fundamental particles such as neutrons, electrons, and protons, and these particles were pooled or decayed as the universe got cooler. Theories on the existence of “multiverse” are also prominent where some scientists suggest that our observable universe is just one among many. Like bubbles lying side by side, different universes would coexist in the “multiverse” model.

The Big Bang Theory is supported by strong empirical evidence that makes it universally accepted. However, the scientific community was divided between the Big Bang and its rival, a steady-state model for much of the 20th century. The characteristics of the initial state of the universe in extreme density and temperature can be calculated using the laws of physics. Big bang theory offers an explanation for the initial expansion of the universe and observes phenomena such as the abundance of light elements, the CMB, large-scale structure, and Hubble’s law. Hubble’s law in physical cosmology detects that galaxies move away from Earth at velocities proportional to their distance or in other words, the further they are the faster they move away from Earth. It is confirmed by scientists that the abundance of helium is a key prediction of the big bang. It was cool enough during the first second of expansion for the remaining matter to merge into protons and neutrons, the particles of atom’s nuclei. In the first three minutes, protons and neutrons amassed into hydrogen and helium nuclei. Hydrogen was 75 percent of the matter of early universe and helium was 25 percent, a key factor leading to the big bang.

Scientists believe that the expansion began with every fragment of energy jammed into an extremely tiny point. The universe is still expanding at an accelerating pace. The source of acceleration is thought to be propelled by a force called dark energy that repels gravity. It covers 68 percent of the universe’s total matter and energy. But dark energy is still ambiguous to explain. The first star of the universe unleashed light capable enough to once again strip electrons from neutral atoms, a key chapter of the universe called reionization.

Question Bank Sub Code:21UMAA11

2021-2022

Section A(1 Mark)

Unit I

- The roots of the equations $x+1/x=1$ are-----
(a)1,-1 (b) $1+i$ and $1/2+i\sqrt{3}/2$ (c) $1+i$ and $1-i$ (d) $(1+i\sqrt{3})/2$ and $(1-i\sqrt{3})/2$
- One real root of the equation $x^3-7x^2+14x-8=0$ is -----
(a)-2 (b) $1/2$ (c)-1 (d)2
- If $f(x)$ is a polynomial of degree $n>0$ then $f(x)$ has -----
(a) no root (b) atleast one root
(c)exactly n real roots (d)at most $n+1$ roots
- The second degree equation in x which has one complex root $1-2i$ is
(a) $x^2-2x+5=0$ (b) $x^2+2x-5=0$ (c) $x^2-5x+2=0$ (d) $x^2+5x-2=0$
- Polynomials of degree 4 is called _____equation.
(a)linear (b)biquadratic (c)cubic (d)quadratic
- A real or complex number a is called the root of the polynomial $f(x)$ if _____
(a) $f(x) = 0$ (b) $f(x) \neq 0$ (c) $f(a) = 0$ (d) $f(a) \neq 0$
- To increase the roots of $f(x) = 0$ by h we diminish the roots of $f(x) = 0$ by _____
(a) x (b) $-x$ (c) $-h$ (d) h
- One root of $x^4-3x+1=0$ lies between
(a) 2 and 3 (b)2 and 2.5 (c)2.5 and 3 (d)1and 2
- Horner's method and Newton's method are used to find
(a)the exact values of the roots of quadratic equation
(b)approximate values of the complex roots of quadratic equation
(c)approximate values of the real roots of the equation

(d) the positive real roots of an equation

10. If all the roots of $f(x)=0$ are real then all the roots of $f'(x)=0$ are

- (a) real (b) imaginary (c) real or imaginary (d) real and distinct

Unit II

11. Let A be a non-singular matrix then $A^{-1} =$ -----

- (a) $\text{adj } A/A$ (b) $(A_{ij})^T/[A]$ (c) $(a_{ij})/A$ (d) $\text{adj } A$

12. The characteristic polynomial of $A = \begin{pmatrix} 1 & 2 \\ 3 & 1 \end{pmatrix}$

- (a) $x^2 - 2x + 5$ (b) $x^2 + 2x + 5$ (c) $-x^2 - 2x + 5$ (d) $x^2 - 2x - 5$

13. The characteristic polynomial of I_2 is-----

- (a) $x^2 - 2x + 1$ (b) $x^2 + 2x + 1$ (c) $x^2 - x - 1 = 0$ (d) $x^2 + x + 1$

14. The eigen values of $A = \begin{pmatrix} 1 & 1 & 3 \\ 1 & 5 & 1 \\ 3 & 1 & 1 \end{pmatrix}$ are -2, 3, 6 then the eigen values of A^T are _____

- (a) **-2, 3, 6** (b) -1/2, 1/3, 1/6 (c) $-2^2, 3^2, 6^2$ (d) -4, 6, 12

15. The sum and product of the eigen values of I_3 is _____

- (a) 0, 0 (b) 3, 3 (c) **3, 1** (d) 2, 1

16. The product of the eigen values of $\begin{pmatrix} -3 & 2 \\ -2 & 4 \end{pmatrix}$ is-----

- (a) **-6** (b) 6 (c) 0 (d) none

17. The characteristic root of $\begin{pmatrix} 3 & 0 & 0 \\ 5 & 4 & 0 \\ 3 & 6 & 1 \end{pmatrix}$ are _____

- (a) 3, 5, 3 (b) **3, 4, 1** (c) 4, 6, 1 (d) 0, 0, 1

18. The system of simultaneous linear equations $AX=B$ is consistent iff

- (a) rank of A = rank of B (b) rank of A = rank of AB
(c) **rank of A = rank of (AB)** (d) rank of B = rank of AB

19. Any nonsingular square matrix of order n is equivalent to-----

- (a) **the identity matrix of order n** (b) any diagonal matrix of order n
(c) scalar matrix of order n (d) the zero matrix of order n

20. If the eigen values of A are -1, 2, 5 the eigen values of $(5A)^{-1}$ are _____

- (a) 1, 1/4, 1/25 (b) -4, 14, 50 (c) 1, 4, 25 (d) **-1/5, 1/10, 1/25**

Unit III

21. Curvature of a curve $y=f(x)$ is defined as _____

- (a) dy/dx (b) dy/ds **(c) $d\psi/ds$** (d) $ds/d\psi$
22. The radius of curvature of a curve $y=f(x)$ is defined as-----
 (a) dx/dy (b) ds/dy **(c) $ds/d\psi$** (d) $d\psi/ds$
23. The radius of curvature of a circle of radius r is-----
 (a) $1/r$ **(b) r** (c) $r/4$ (d) $r/2$
24. The radius of curvature of $y=e^x$ at the point where it crosses the y-axis
 (a) 0 **(b) $2\sqrt{2}$** (c) 2 (d) 8
25. The radius of curvature $y=\log x/x$ at $x=1$
(a) $2\sqrt{2}/3$ (b) $-2\sqrt{2}/3$ (c) 2 (d) 4
26. The ordinate of the centre of the curvature of the curve $xy=1$ at $(1,1)$ is-----
 (a) 2 (b) 1 **(c) $1/2$** (d) 0
27. The evolute of the ellipse $x^2/a+y^2/b=1$ is -----
 (a) another ellipse **(b) a four cusped cycloid** (c) a parabola (d) a circle
28. The abscissa of the centre of curvature of the curve $xy=c^2$ is _____
 (a) **$2c$** (b) c (c) $c/2$ (d) 0
29. The evolute of the parabola $y=4ax$ is _____
 (a) **a semi cubical parabola** (b) an ellipse
 (c) a straight line (d) cubical hyperbola
30. The ----- of the curvature of a curve at any point is called the radius of curvature at that point.
 (a) centre (b) square **(c) reciprocal** (d) square root

Unit IV

31. A vector function \vec{f} is called solenoidal if
 (a) **$\text{div } \vec{f} = \vec{0}$** (b) $\text{grad } \vec{f} = \vec{0}$ (c) $\text{div } \vec{f} = 0$ (d) $\text{curl } \vec{f} = \vec{0}$
32. If $\nabla\phi$ is solenoidal then $\nabla^2\phi =$
 (a) $\vec{0}$ **(b) 0** (c) 1 (d) -1
33. If $r = xi + yj + zk$ then $\nabla \cdot r =$
 (a) 1 (b) 0 **(c) 3** (d) $x^2+y^2+z^2$
34. The value of $\text{div curl } \vec{f} =$ _____
 (a) **0** (b) 1 (c) \vec{f} (d) $\vec{0}$

35. If ϕ is a scalar valued function then $\nabla\phi$ represents
 (a) tangent line (b) **normal** (c) tangent plane (d) surface
36. A vector \vec{f} is called harmonic vector if _____
 (a) $\nabla\vec{f} = \vec{0}$ (b) **$\nabla^2\vec{f} = \vec{0}$** (c) $\nabla\vec{f} = \vec{f}$ (d) $\nabla^2\vec{f} = \vec{f}$
37. If \vec{f} and \vec{g} are irrotational then $\vec{f} \times \vec{g}$ is
 (a) irrotational (b) harmonic
 (c) **solenoidal** (d) neither solenoidal nor irrotational
38. Let $\phi = ax^2 + by^2 + cz^2$, ϕ satisfies the Laplace equation if
 (a) $a = 0$ (b) $a + b = 0$ (c) **$a + b + c = 0$** (d) $a = b = c = 1$
39. The directorial derivative of $\phi = xy + yz + zx$ (1,2,3) in the direction of $3\vec{i} + 4\vec{j} + 5\vec{k}$ is
 (a) $46/5$ (b) **$46/5\sqrt{2}$** (c) $46/\sqrt{2}$ (d) $23/5$
40. If $\Phi(x,y,z) = xy^2 + yz^3$ then grad ϕ at $y = 0$ is
 (a) $\vec{i} + \vec{j} + \vec{k}$ (b) $2x\vec{j}$ (c) **$z^3\vec{j}$** (d) none of the above

Unit V

41. What are the component equations of $4p^2 - 8p + 3 = 0$?
 (a) **$p = 1/2, 3/2$** (b) $p = 2, 6$ (c) $p = 1/5, 1/9$ (d) $p = 1, -1$
42. What are the solutions of an equation $y'' + ay' + b = 0$ if the roots m_1 and m_2 are real and distinct?
 (a) **e^{m_1x} and e^{m_2x}** (b) e^{m_1} and e^{m_2} (c) m_1x and m_2x (d) a and b
43. The auxiliary equation of $(D^2 + 4)y = 0$ is -----
 (a) $m^2 = 0$ (b) **$m^2 + 4 = 0$** (c) $m^2 + 3 = 0$ (d) $m^2 + 2 = 0$
44. An equation of the form $y = px + f(p)$ is called
 (a) Bessel equation (b) Legendre equation
 (c) Bernoulli's equation (d) **Clairaut equation**
45. The general solution of $(D^2 - 5D + 6)y = 0$ is -----
 (a) **$y = c_1e^{3x} + c_2e^{2x}$** (b) $y = c_1e^{-3x} + c_2e^{2x}$ (c) $y = c_1e^{3x} + c_2e^{-2x}$ (d) $y = c_1e^{-3x} + c_2e^{-2x}$
46. The particular integral of $\frac{1}{D^2} \cos 2x$ is _____
 (a) **$\frac{1}{-4} \cos 2x$** (b) $\frac{1}{4} \cos 2x$ (c) $\frac{1}{2} \cos 2x$ (d) $\cos 2x$
47. General solution of Clairaut's equation is
 (a) $y = cx$ (b) $y = x + f(c)$ (c) **$y = cx + f(c)$** (d) $y = f(c)$

Section B (2 marks)

Unit I

1. Form the equation with rational coefficients one of whose roots is $\sqrt{2}+\sqrt{3}$.
2. Form the equation with rational coefficients one of whose roots is $\sqrt{3} + i\sqrt{2}$
3. Diminish the roots of the equation $x^3 + x^2 + x - 100$ by 4.
4. Multiply the roots of the equation $3x^3 - 2x^2 - x + 1 = 0$ by 4.
5. Increase the roots of $x^3 - 5x^2 + 6x - 3 = 0$ by unity
6. Increase the roots of $3x^4 + 7x^3 - 15x^2 - 2 = 0$ by 7
7. Multiply the roots of the equation $x^4 + 2x^3 + 4x^2 + 6x + 8 = 0$ by $1/2$.
8. Multiply the roots of the equation $3x^3 - 10x^2 + 9x + 2 = 0$ by 4.
9. Diminish the roots of the equation $x^4 + 3x^3 - 2x^2 - 4x - 3 = 0$ by 3.
10. Form the equation whose roots are negative of the roots of $x^3 - x^2 + x - 4 = 0$

Unit II

11. Define upper triangular matrix
12. Define identity matrix.
13. Define diagonal matrix.
14. Define characteristic matrix .
15. Define eigen vector and eigen value.
16. If λ is an eigen value of A then $k\lambda$ is an eigen value of kA .
17. Find the eigen values of A^5 where $A = \begin{pmatrix} 3 & 0 & 0 \\ 5 & 4 & 0 \\ 3 & 6 & 1 \end{pmatrix}$
18. Find the eigen values of A^{-1} where $A = \begin{pmatrix} 3 & 1 & 5 \\ 0 & 4 & 2 \\ 0 & 0 & -1 \end{pmatrix}$
19. Find the sum and product of the eigen values of the matrix $\begin{pmatrix} 3 & -4 & 4 \\ 1 & -2 & 4 \\ 1 & -1 & 3 \end{pmatrix}$
without actually finding the eigen values.
20. Find the characteristic roots of the matrix $\begin{pmatrix} \cos\theta & -\sin\theta \\ -\sin\theta & -\cos\theta \end{pmatrix}$

Unit III

21. Define Pedal equation.
22. Find the radius of curvature at $x=\pi/2$ on the curve $y=\sin x$.
23. Show that the radius of curvature at any point of the catenary $y=c \cosh(x/c)$ is y^2/c .
24. Find the pedal equation of the curve $r^m = a^m \sin m\theta$. Hence find the radius of curvature.
25. Find the radius of curvature at any point of the curve whose pedal equation is $p=r \sin \alpha$
26. Find the curvature of the curve $xy=12$ at $(3,4)$
27. Define Evolute.
28. Find the x coordinate of the centre of curvature of the curve $x=at^2, y=2at$.
29. Find the radius of curvature of the curve $x^2/a^2 + y^2/b^2 = 1$ at (x_1, y_1) .
30. Find the radius of curvature $2y=x-x^2+x^3$ at $(1, 1/2)$.

Unit IV

31. Define scalar product.
32. Define vector product.
33. Define scalar triple product.
34. Define differentiable of vectors.
35. Define gradient of a real valued function.
36. Prove that $\text{grad}(\Phi\Psi) = \Phi \text{ grad } \Psi + \Psi \text{ grad } \Phi$
37. Show that $\nabla (\vec{a} \cdot \vec{r}) = \vec{a}$ for any constant vector \vec{a}
38. Find the magnitude of the maximum $\Phi = 2xz - y^2$
39. Define divergence of a vector valued function.
40. Define curl of a vector valued function.

Unit V

41. Define differential equation of first order and n^{th} degree.
42. Define singular solution of a differential equation.
43. With usual notation solve $p^2 - 9p + 18 = 0$.
44. Write the general solution of $(y - px)(p - 1) = p$.
45. Find the complementary function of $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$
46. Solve $(D^2 + 1)y = x$.
47. Find the particular integral of $(D^3 - 3D^2 + 3D - 1)y = x^2 e^x$.

48. Define clairauts equation.
49. Find the general solution for clairauts equation.
50. Solve $\sin px \cos y = \cos px \sin y + p$

Section C(6 Marks)

Unit I

1. Solve the equation $x^5 - x^4 + 8x^2 - 9x - 15 = 0$ if $\sqrt{3}$ and $1-2i$ are two of its roots.
2. If b and c are real and $2-i\sqrt{3}$ is a root of the equation $x^3 + x^2 + bx + c = 0$ what are its other roots. Find the value of c .
3. Obtain by Newton's method the root of the equation $x^3 - 3x + 1 = 0$ which lies between 1 and 2.
4. Solve the equation $x^4 - 14x^3 + 46x^2 - 42x + 9 = 0$ given that $5-\sqrt{22}$ is a root
5. If one root of the equation $2x^3 - 11x^2 + 38x - 39 = 0$ is $2 - 3i$, solve the equation.
6. Show that the equation $\frac{p^2}{x-a} + \frac{q^2}{x-b} + \frac{r^2}{x-c} = k$ where p, q, r, a, b, c and k are real and has no imaginary roots.
7. One root of the equation $2x^6 - 3x^5 + 5x^4 + 6x^3 - 27x + 81 = 0$ is $\sqrt{2} + i$. Find the remaining roots.
8. Solve the equation $3x^3 - 23x^2 + 72x - 70 = 0$ given that $3+\sqrt{-5}$ is a root
9. Solve the equation $x^3 - 11x^2 + 37x - 35 = 0$ given that $3+\sqrt{2}$ is a root
10. Show that $x^3 + 3x - 1 = 0$ has only one real root and correct it two places of decimals.

Unit II

11. Find the rank of the matrix. $\begin{pmatrix} 3 & -1 & 2 \\ 0 & 1 & -3 \\ 6 & -1 & 1 \end{pmatrix}$
12. Compute the inverse of the following matrix. $\begin{pmatrix} 1 & 2 & 3 \\ 0 & -1 & 4 \\ -2 & 2 & 1 \end{pmatrix}$
13. Test whether the equations $2x - 3y + 7z = 5$; $3x + y - 3z = 13$; $2x + 19y - 47z = 32$ are consistent or not.
14. Solve by matrix method the system $x - 3y - 8z + 10 = 0$; $3x + y - 4 = 0$; $2x + 5y + 6z = 13$
15. For what values of λ the equations $x + y + 3z = 0$; $4x + 3y + \lambda z = 0$; $2x + y + 2z = 0$; have non trivial solution.

16. Show that the non singular matrix $A = \begin{pmatrix} 1 & 2 \\ 3 & 1 \end{pmatrix}$ satisfies the equation $A^2 - 2A - 5I = 0$
Hence evaluate A^{-1} .
17. State and prove Cayley Hamilton theorem.
18. Verify the statement that the sum of the elements in the diagonal of a matrix is the sum of the eigen values of the matrix $A = \begin{pmatrix} -2 & 2 & -3 \\ 1 & 1 & -6 \\ -1 & -2 & 0 \end{pmatrix}$
19. If A and B are $n \times n$ matrices and B is a non singular matrix prove that A and $B^{-1}AB$ have same eigen values.
20. Prove that sum of eigen values is trace of A and product of eigen values is $|A|$

Unit III

21. Find the radius of the curvature of the curve given by
 $x^3 - 2x^2 + 3xy^2 - 4y^3 + 5x^2 - 6xy + 7y^2 - 8y = 0$
22. Show that the radius of curvature of the curve $x^2y = a(x^2 + y^2)$ at $(-2a, 2a)$ is $-2a$.
23. Find the radius of the curvature of the curve $r = a\theta$
24. Find the points on the parabola $y^2 = 8x$ at which the radius of the curvature is $125/16$.
25. Find the radius of the curvature of the following $r = a(1 - \cos\theta)$
26. Find the centre of curvature of $y = x^2$ at the origin.
27. Find the evolutes of the parabola $y^2 = 4ax$
28. Find the evolutes of the following curve $2xy = a^2$
29. Prove that the y coordinate of the centre of the curvature of the curve at the point (c, c) is $2c$.
30. Find the evolute of the curve given by $x = \cos^3\theta$ and $y = \sin^3\theta$.

Unit IV

31. Prove that $\frac{d}{dt} (\vec{u} \times \vec{v}) = \vec{u} \times \frac{d\vec{v}}{dt} + \frac{d\vec{u}}{dt} \times \vec{v}$
32. If $\vec{r} = a\cos\omega t + b\sin\omega t$ where a, b are constant vectors and ω is a constant prove that $\vec{r} \times \frac{d\vec{r}}{dt}$
33. Show that $\frac{d}{dt} \left(\frac{\vec{r}}{r} \right) = \frac{1}{r} \frac{d\vec{r}}{dt} - \frac{1}{r^2} \frac{dr}{dt} \vec{r}$
34. Show that $\frac{d}{dt} \left(\vec{r} \times \frac{d\vec{r}}{dt} \right) = \vec{r} \times \frac{d^2\vec{r}}{dt^2}$
35. If \vec{r} is the position vector of any point $P(x, y, z)$, prove that $\text{grad } r^n = nr^{n-2} \vec{r}$

36. If $\Phi(a, b) = \log \sqrt{a^2 + b^2}$ show that $\text{grad } \Phi = \frac{\vec{r} - (\vec{k} \cdot \vec{r})\vec{k}}{\{\vec{r} - (\vec{k} \cdot \vec{r})\vec{k}\} \cdot \{\vec{r} - (\vec{k} \cdot \vec{r})\vec{k}\}}$
37. If $\nabla \phi = 2xyz^3 \vec{i} + x^2z^3 \vec{j} + 3x^2yz^2 \vec{k}$ then find $\phi(x, y, z)$ if $\phi(1, -2, 2) = 4$
38. Prove that $\text{curl}(\vec{r} \times \vec{a}) = -2\vec{a}$ where \vec{a} is a constant vector.
39. Show that the vector $\vec{f} = (y^2 - z^2 + 3yz - 2x) \vec{i} + (3xz + 2xy) \vec{j} + (3xy - 2xz + 2z) \vec{k}$ is both rotational and solenoidal.
40. If \vec{f} is solenoidal prove that $\text{curl curl curl curl } \vec{f} = \nabla^4 \vec{f}$.

Unit V

41. Solve $3x - y + \log p = 0$.
42. Solve $y = px + a/p$ and also obtain the singular solution if any.
43. Solve $(D^2 + 3D + 2)y = x^2$
44. Solve $(D^2 - 4)y = e^{2x} + e^{-4x}$
45. Evaluate the particular integral of the differential equation $(D^2 + 9)y = 4\sin 3x$
46. Find the particular integral of $(D^2 - 4D + 3)y = e^x \cos 2x$
47. Solve $\frac{d^2y}{dx^2} - 4y = \cosh(2x - 1) + 3^x$
48. Solve $y'' + 4y' + 13y = 2e^{-x}$ given $y(0) = 0$ and $y'(0) = -1$
49. Solve $(D^2 + 9)y = \cos 3x$
50. Solve $\frac{d^4x}{dt^4} - 4x = \cosh t$ where $D = \frac{d}{dt}$

Section D (10 Marks)

Unit I

- Find the positive root of $x^3 - x - 3 = 0$ correct to two places of decimals by Horner's method.
- Obtain by Horner's method the root of the equation $x^3 - 7x - 7 = 0$ correct to 2 places of decimals
- Obtain by Horner's method the root of the equation $x^3 - x - 9 = 0$. correct to 2 places of decimals
- Obtain by Horner's method the root of the equation $2x^3 - 3x - 6 = 0$. correct to 2 places of decimals
- Find by Newton's method the root of the equation $x^3 - 2x - 2 = 0$ which is nearer to 1.5
- Find the negative root of $x^3 - x^2 + 12x + 24 = 0$ correct to two places of decimals.
- Find the negative root of $x^3 - 5x + 11 = 0$ correct to two places of decimals.
- Find the positive root of $x^3 + x^2 - 2x - 1 = 0$ correct to two places of decimals

by Horner's method.

9. Find by Horner's method the root of the equation $x^3 - 4x^2 + 5 = 0$ which lies between 1 and 2 correct to two places of decimals.
10. Obtain by Newton's method the root of the equation $x^3 - 5x - 3 = 0$ correct to 2 places of decimals

Unit II

11. Solve by matrix method the system $x - 3y - 8z + 10 = 0$; $3x + y - 4 = 0$; $2x + 5y + 6z = 13$
12. For what values of λ the equations $x + y + z = 1$; $x + 2y + 4z = \lambda$; $x + 4y + 10z = \lambda^2$ have a solution ? Solve completely in each case.
13. Find the values of λ for which equations $3x + y - \lambda z = 0$; $4x - 2y - 3z = 0$; $2\lambda x + 4y + \lambda z = 0$; have a non-trivial solution. Obtain the most general solutions in each case
14. For what value of λ and μ the equation $x + y + z = 6$; $x + 2y + 3z = 10$; $x + 2y + \lambda z = \mu$; have (i) unique solution (ii) no solution (iii) infinite number of solutions
15. Find the eigen values and the eigen vectors of the matrix $A = \begin{pmatrix} 1 & 1 & 3 \\ 1 & 5 & 1 \\ 3 & 1 & 1 \end{pmatrix}$
16. For the following matrices find the characteristic vectors corresponding to each characteristic root $\begin{pmatrix} 8 & -6 & 2 \\ -6 & 7 & -4 \\ 2 & -4 & 3 \end{pmatrix}$
17. Find the eigen values and the eigen vectors of the matrix $A = \begin{pmatrix} 6 & -2 & 2 \\ -2 & 3 & -1 \\ 3 & -1 & 3 \end{pmatrix}$
18. Find the eigen values and the eigen vectors of the matrix $A = \begin{pmatrix} 11 & -4 & -7 \\ 7 & -2 & -5 \\ 10 & -4 & -6 \end{pmatrix}$
19. Find the eigen values and the eigen vectors of the matrix $A = \begin{pmatrix} 2 & 2 & 1 \\ 1 & 3 & 1 \\ 1 & 2 & 2 \end{pmatrix}$
20. Using Cayley-Hamilton theorem find A^{-1} of the matrix $A = \begin{pmatrix} 2 & -1 & 1 \\ -15 & 6 & -5 \\ 5 & -2 & 2 \end{pmatrix}$

Unit III

21. The tangents at the points P and Q on the cycloid $x = a(\theta - \sin\theta)$; $y = a(1 - \cos\theta)$ are at right angles. Show that $\rho_1^2 + \rho_2^2 = 16a^2$ if ρ_1 and ρ_2 are the radii of curvature at these points.
22. Prove that the radius of curvature to the curve $y^2x = a^2(a - x)$ at $(a, 0)$ is $a/2$.
23. Find the pedal equation of the curve $r^n = a^n \cos n\theta$ and hence find ρ
24. Find the pedal equation of the cardioid $r = a(1 - \cos\theta)$ and hence prove that ρ^2/r is constant.
25. Show that the radius of the curvature at any point on the curve $r = a(1 + \cos\theta)$ varies as the square root of the radius vector. If ρ_1 and ρ_2 are the radius of curvature at the extremities of any chord which passes through the pole then prove that $(9\rho_1^2 + \rho_2^2) = 16a^2$
26. Show that the circle of curvature of the parabola $y = mx + (\frac{x^2}{a})$ at $(0,0)$ is $x^2 + y^2 = a(1 + m^2)(y - mx)$
27. Find the centre of curvature of the curve $x = a(\cos t + t \sin t)$; $y = a(\sin t + t \cos t)$ and prove that its evolute is a circle.
28. Find the radius of curvature for the curves at the indicated point $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ at $(a, 0)$ and $(0, b)$
29. Find the evolutes of the following curves $\frac{x^2}{a^2} - \frac{y^2}{b^2} = 1$
30. Find the evolutes of the following curve $2xy = a^2$

Unit IV

31. (i) Prove that $\text{grad}(\phi + \psi) = \text{grad} \phi + \text{grad} \psi$
(ii) Prove that $\text{grad}(\phi - \psi) = \text{grad} \phi - \text{grad} \psi$
(iii) Prove that $\text{grad}(\phi\psi) = \phi \text{grad} \psi + \psi \text{grad} \phi$
(iv) Prove that $\text{grad}(\frac{\phi}{\psi}) = (\psi \text{grad} \phi - \phi \text{grad} \psi) / \psi^2$
32. If $\phi = x^2z + e^{y/x}$ and $\psi = 2z^2y - xy^2$ find $\nabla(\phi + \psi)$ and $\nabla(\phi\psi)$ at $(1, 0, 2)$
33. Find ϕ if
(i) $\nabla\phi = (y^2 - 2xyz^3)\vec{i} + (3 + 2xy - x^2z^3)\vec{j} + (6z^3 - 3x^2yz^2)\vec{k}$
(ii) $\nabla\phi = (2x + 3y + 4xy^2)\vec{i} + (3x + 3y^2 + 4x^2y + z + 1)\vec{j} + (y + 2)\vec{k}$
34. Prove that $\text{grad}(\vec{f} \cdot \vec{g}) = \vec{f} \times \text{curl} \vec{g} + \vec{g} \times \text{curl} \vec{f} + (\vec{f} \cdot \nabla)\vec{g} + (\vec{g} \cdot \nabla)\vec{f}$
35. (i) If \vec{c} is a constant vector prove that $\nabla \cdot \{ [(\vec{c} \cdot \vec{r}) r^n] \vec{r} \} = (n + 4)(\vec{c} \cdot \vec{r}) r^n$
(ii) If \vec{c} is a constant vector prove that $\nabla \times [(\vec{c} \cdot \vec{r}) r^n] \vec{r} = (\vec{c} \times \vec{r}) r^n$

36. Prove that $f = e^x [(2y + 3z)\vec{i} + 2\vec{j} + 3\vec{k}]$ is irrotational. Find a function $\Phi(x, y, z)$ such that $f = \text{grad } \Phi$
37. If the vector $f(r)\vec{r}$ is solenoidal prove that $f(r) = \frac{k}{r^3}$ where k is a constant. Also prove that the vector is irrotational.

Unit V

41. Solve $xyp^2 + (3x^2 - 2y^2)p - 6xy = 0$.
42. Solve $4y = x^2 + p^2$
43. Solve $xp^2 - 2yp + x = 0$.
44. Solve $(D^2 - 2D + 2)y = e^x \sin x$
45. Solve $(D^2 + 5D + 6)y = x^2$
46. Solve $y = (x - a)p - p^2$
47. Solve $y = 2px + y^2p^3$
48. Solve $(D^2 - 4D + 4)y = 3x^2 e^{2x} \sin 2x$
49. Solve $(D^2 - 6D + 13)y = 8e^{3x} \sin 2x$
50. Putting $x^2 = u$ and $y^2 = v$ bring the equation $(px - y)(x - yp) = 2p$ to Clairaut's form and then solve.

St. Mary's college (Autonomous), Thoothukudi
I B.Sc. Mathematics – Semester II
Core – III Analytical Geometry of Three Dimensions
Course Code – 21UMAC21
Question bank

Section – A (1 Mark)

Choose the correct answer:

Unit I

1. The direction ratios of the line joining (1, 2, -1) and (2, -1, 1) are____
 (a) 2,6,4 (b) **1,-3,2** (c) -2,-6,-4 (d) -1,3,-2
2. The direction cosines of the x- axis are ____
 (a) $\cos\alpha, \cos\beta, \cos\gamma$ (b) 1, m ,n (c) **1,0,0** (d) 0,1,1
3. The equation of the xy – plane is____
 (a) $x = 0$ (b) $y = 0$ (c) **$z = 0$** (d) $x = 0 = y$
4. If a straight line makes $30^\circ, 120^\circ, 90^\circ$ with the coordinate axes then the direction cosines of the line are ____
 (a) $\frac{\sqrt{3}}{2}, -\frac{1}{2}, 0$ (b) $\frac{\sqrt{3}}{2}, \frac{1}{2}, 0$ (c) $\frac{1}{2}, \frac{\sqrt{3}}{2}, 1$ (d) $\frac{\sqrt{3}}{2}, \frac{\sqrt{3}}{2}, 1$
5. If $\cos\alpha, \cos\beta, \cos\gamma$ are the direction cosines of a straight line then ____
 (a) $\cos^2\alpha + \cos^2\beta + \cos^2\gamma = 0$ (b) **$\sin^2\alpha + \sin^2\beta + \sin^2\gamma = 2$**
 (c) $\sin^2\alpha + \sin^2\beta + \sin^2\gamma = 1$ (d) $\cos^2\alpha + \cos^2\beta + \cos^2\gamma = 2$
6. The angle between the lines whose direction ratios are 1,3,-1 and -1,2,5 is____
 (a) 0 (b) 60° (c) 30° (d) 90°
7. l, m, n and l_1, m_1, n_1 are the direction cosines of two straight lines then the lines are perpendicular if ____
 (a) **$l l_1 + m m_1 + n n_1 = 0$** (b) $\frac{l}{l_1} = \frac{m}{m_1} = \frac{n}{n_1}$
 (c) $l l_1 + m m_1 + n n_1 = 1$ (d) $l^2 l_1^2 + m^2 m_1^2 + n^2 n_1^2 = 1$
8. If the planes are parallel then _____.
 (a) $\frac{a_1}{a_2} = \frac{b_1}{b_2} = \frac{c_1}{c_2}$ (b) $\frac{b_1}{b_2} = \frac{c_1}{c_2}$ (c) $\frac{a_1}{a_2} = \frac{b_1}{b_2}$ (d) $\frac{a_1}{a_2} = \frac{c_1}{c_2}$
9. The coordinate planes divide the whole space into compartments called as _____.
 (a) eight parts (b) eight divisions (c) eight class (d) **eight octants**
10. Three mutually perpendicular planes are called as _____.
 (a) planes (b) **coordinate planes** (c) coordinate axes (d) coordinate lines

Unit II

11. The equation of the plane having x,y,z intercepts $2, \frac{3}{2}, \frac{4}{3}$ is _____
(a) $6x + 8y + 9z + 12 = 0$ (b) **$6x + 8y + 9z - 12 = 0$**
(c) $6x + 8y + 9z - 24 = 0$ (d) $6x + 8y + 9z + 24 = 0$
12. The equation of the plane through (1,0,2) and parallel to the plane $2x + 3y - 4z = 0$ is _____
(a) $3x + 2y - 3z + 6 = 0$ (b) $3x + 2y - 3z - 6 = 0$
(c) **$2x + 3y - 4z + 6 = 0$** (d) $2x + 3y - 4z - 6 = 0$
13. The planes $ax + by + cz + d = 0$, $ax + by + cz + d_1 = 0$ are ____
(a) **parallel** (b) not parallel (c) perpendicular (d) none of these
14. The distance of the point $P(x_1, y_1, z_1)$ from the origin is _____.
(a) $x_1^2 + x_2^2 + x_3^2$ (b) $\sqrt{x_1^2 + y_1^2 + z_1^2}$
(c) $x_1^2 + y_1^2 + z_1^2$ (d) $\sqrt{x_1^2 + x_2^2 + x_3^2}$
15. Angle between the lines whose direction cosines are (l_1, m_1, n_1) and (l_2, m_2, n_2) is _____.
(a) **$\cos \theta = l_1 l_2 + m_1 m_2 + n_1 n_2$** (b) $\cos \theta = l_1 l_2 + m_1 m_2$
(c) $\cos \theta = l_1 l_2 + n_1 n_2$ (d) $\cos \theta = 0$
16. The equation of the plane in the intercept form is _____.
(a) $\frac{x}{a} + \frac{y}{b} = 1$ (b) $\frac{x}{a} + \frac{y}{b} + \frac{z}{c} = 0$ (c) **$\frac{x}{a} + \frac{y}{b} + \frac{z}{c} = 1$** (d) $\frac{y}{b} + \frac{z}{c} = 1$
17. The length of the perpendicular from the origin to the plane $x + y + z = 1$ is _____.
(a) 1 (b) 3 (c) **$\frac{-1}{\sqrt{3}}$** (d) 0
18. The distance between the parallel planes $2x - 2y + z + 3 = 0$ and $4x - 4y + 2z + 5 = 0$ is _____.
(a) **$\frac{1}{6}$** (b) $\frac{2}{3}$ (c) 1 (d) $\frac{1}{3}$
19. The equation of plane in normal form is _____.
(a) $\frac{x}{a} + \frac{y}{b} + \frac{z}{c} = 1$ (b) **$lx + my + nz = p$** (c) $ax + by + cz + d = 0$ (d) $ax + by + cz = 0$
20. The distance of the point (2,1,0) from the plane $2x + y + 2z - 17 = 0$ is _____.
(a) **4** (b) 3 (c) 1 (d) 2

Unit III

21. The equation of x- axis is ____
(a) $y = 0, z = 0$ (b) $x = 0, z = 0$ (c) $y = 0$ (d) $z = 0$
22. The equation of the line through (2, 5, 8) and (-1, 6, 3) is ____
(a) $\frac{x-2}{3} = \frac{y-5}{-1} = \frac{z-8}{5}$ (b) $\frac{x+2}{3} = \frac{y+5}{-1} = \frac{z+8}{5}$
(c) $\frac{x+1}{3} = \frac{y-6}{1} = \frac{z-3}{5}$ (d) $\frac{x-2}{3} = \frac{y-5}{-1} = \frac{z-8}{5}$
23. The equation of the line through (1, 2, -3) and (3, -2, 4) is ____
(a) $\frac{x-1}{2} = \frac{y-2}{-4} = \frac{z+3}{7}$ (b) $\frac{x-3}{2} = \frac{y-2}{-4} = \frac{z+4}{7}$
(c) $\frac{x-3}{3} = \frac{y+2}{-1} = \frac{z-4}{5}$ (d) $\frac{x-1}{-2} = \frac{y-2}{-4} = \frac{z+3}{7}$
24. The point where the line $\frac{x-2}{2} = \frac{y-4}{-3} = \frac{z+6}{4}$ meets the plane $2x + 4y - z - 2 = 0$ is _____.
(a) (6,-2,2) (b) (6, 2, -2) (c) (2,4,6) (d) (2,4, -6)
25. The line $\frac{x-1}{2} = \frac{y-3}{3} = \frac{z-4}{-1}$ is parallel to the plane is _____.
(a) $x - 2y - 4z + 7 = 0$ (b) $2x - 2y - 4z + 7 = 0$
(c) $x - 7y - 4z + 7 = 0$ (d) $7x - 7y - 4z + 7 = 0$
26. The equation of y- axis is ____
(a) $x = 0, z = 0$ (b) $x = 0, z = 0$ (c) $y = 0$ (d) $z = 0$
27. The intersection of XZ and XY planes is _____.
(a) y axis (b) z axis (c) **x axis** (d) $x = 0$
28. If the line _____ the plane then $al+bm+cn = 0$ and $ax_1+by_1+cz_1+d = 0$.
(a) lies in (b) parallel to (c) bisects (d) proportional to
29. The line is parallel to the plane if $\theta =$ _____.
(a) 90° (b) 0° (c) 30° (d) 60°
30. The line is parallel to the plane if _____.
(a) $ax_1+by_1+cz_1 = 0$ (b) $ax_1+by_1+cz_1 \neq 0$ (c) $ax_1+by_1+cz_1+d = 0$ (d) **$ax_1+by_1+cz_1+d \neq 0$**

Unit – IV

31. If the two lines are coplanar, they must _____.
(a) parallel (b) **intersect** (c) perpendicular (d) none of these
32. If the two lines in space do not intersect they are called _____ lines
(a) parallel (b) **skew** (c) perpendicular (d) coplanar
33. The shortest distance between the two coplanar lines is _____.
(a) 1 (b) **0** (c) $1/2$ (d) none of these

34. Volume of a regular tetrahedron of edge a is ____
- (a) $\frac{a^3\sqrt{2}}{12}$ (b) $\frac{a^6\sqrt{2}}{12}$ (c) $\frac{12\sqrt{2}}{a^3}$ (d) $\frac{a^3 12}{\sqrt{2}}$
35. If two of the variable be absent in equation of first degree in x, y, z then
- (a) $f^*(x) = 0$ (b) $x = 0$ (c) $f(x) = 0$ (d) $y=z=0$
36. If one of the variable is absent in equation of first degree in x, y, z then
- (a) $f^*(x) = 0$ (b) $f(x) = 0$ (c) $f^*(x, y) = 0$ (d) $f(x, y) = 0$
37. Two equations $f(x, y, z) = 0$, $\varphi(x, y, z) = 0$ together represent a ____.
- (a) **curve** (b) straight line (c) parallel line (d) skew line
38. The surface in which all the lines lie completely is called ____.
- (a) complete surface (b) line surface (c) **ruled surface** (d) none of these
39. All the lines which lie on the ruled surface is called ____.
- (a) straight lines (b) **generating lines** (c) non generating lines (d) ruled lines
40. Which one of the following is a ruled surface?
- (a) square (b) circle (c) rectangle (d) **cylinder**

Unit V

41. The plane section of a sphere is ____
- (a) **Circle** (b) straight line (c) parabola (d) none
42. Centre and radius of the sphere $x^2 + y^2 + z^2 - 6x - 2y - 4z - 11 = 0$ is
- (a) (0, 2, 4) and 16 (b) (0, -1, 2) and -4 (c) **(3, 1, 2) and 5** (d) none
43. When $u^2 + v^2 + w^2 - d$ is positive, the locus is a ____
- (a) sphere (b) **real sphere** (c) centre sphere (d) cubic sphere
44. The equation of the sphere passing through the points (0, 0, 0), (1, 0, 0), (0, 1, 0), (0, 0, 1) is ____
- (a) $x^2 + y^2 + z^2 = 1$ (b) $x^2 + y^2 + z^2 - x - y - z = 0$
- (c) $x^2 + y^2 + z^2 - 2x - 2y - 2z + 1 = 0$ (d) $x^2 + y^2 + z^2 - x - y - z - 1 = 0$
45. The equation of the sphere which is described on the line joining the points (1, 1, 1), (-1, -1, -1) as diameter is ____
- (a) $x^2 + y^2 + z^2 = 0$ (b) $x^2 + y^2 + z^2 = 1$
- (c) $x^2 + y^2 + z^2 = 4$ (d) $(x+2)^2 + (y+2)^2 + (z+2)^2 = 4$
46. The intersection of two spheres is ____
- (a) **a circle** (b) an ellipse (c) a plane (d) a parabola
47. The equation of the tangent plane at the origin to the sphere $x^2 + y^2 + z^2 + 8x - 6y + 4z = 0$ is ____

- (a) $4x + 3y - 2z = 0$ (b) $4x - 3y - 2z = 0$
 (c) $4x - 3y + 2z = 0$ (d) $-4x + 3y + 2z = 0$
48. The radius of the equation of the sphere $2x^2 + 2y^2 + 2z^2 + 8x - 8y - 6z - 1 = 0$ is _____
 (a) 7 (b) $\frac{\sqrt{43}}{2}$ (c) $\frac{43}{2}$ (d) 49
49. If d is positive then the origin lies _____ the sphere.
 (a) **outside** (b) inside (c) on (d) none of these
50. If d is equal to zero then the origin lies _____ the sphere.
 (a) outside (b) inside (c) **on** (d) none of these
51. If d is negative then the origin lies _____ the sphere.
 (a) outside (b) **inside** (c) on (d) none of these

Section – B (2 Marks)

Unit I

- Show that the points (5, 3, -2), (3, 2, 1) and (-1, 0, 7) are collinear
- Find the distance between the points (4, -2, 3) and (2, -3, 1)
- Find the distance between the points (3, -5, -3) and (1, -1, -7)
- Find the direction cosines of the line joining the points (3, -5, 4) and (1, -8, -2)
- If $\cos \alpha, \cos \beta, \cos \gamma$ are the direction cosines of the straight line, show that $\sin^2 \alpha + \sin^2 \beta + \sin^2 \gamma = 2$
- If the projections of a line on the axes are 6, 3, 2. Find the length of the line.
- Find the acute angle between the lines whose direction cosines are $\frac{1}{4}, \frac{-\sqrt{3}}{2}, \frac{\sqrt{3}}{4}$ and $\frac{1}{4}, \frac{\sqrt{3}}{2}, \frac{\sqrt{3}}{4}$
- The line joining (5, 2, 4) and (-4, 3, 5) meets the plane YOZ in C. Find coordinates of C
- Find the midpoint of (3, -5, -3) and (1, -1, -7)
- Find the centroid of the triangle for the vertices (1, -5, 3), (3, -7, 4) and (2, -3, 5)

Unit II

- Find the angle between the planes $2x - y + z = 6$ and $x + y + 2z = 3$
- Find the equation of the plane through (3, 4, 5) parallel to the plane $2x + 3y - z = 0$
- Find the equation of the plane which passes through the point (2, -4, 5) and parallel to the plane $4x + 2y - 7z + 6 = 0$
- Find the equation of the plane through the point (1, -2, 3) and the intersection of the planes $2x - y + 4z = 7$ and $x + 2y - 3z + 8 = 0$
- Find the equation of the plane through the line of intersection of the planes $x + y + z = 1$, $2x + 3y + 4z - 7 = 0$ and perpendicular to the plane $x - 5y + 3z = 5$
- Find the distance of the point (2, 1, 0) from the plane $2x + y + 2z - 17 = 0$
- Find the distance between the parallel planes $2x - 2y + z + 3 = 0$ and $4x - 4y + 2z + 5 = 0$

18. Find the equation of the line passing through the point (3,2,-8) and is perpendicular to the plane $-3x + y + 2z - 2 = 0$
19. Find the intercepts which the plane $4x - 3y + 2z - 7 = 0$ makes with the coordinate axes.
20. Write the equation of planes in three forms.

Unit III

21. Prove that the line $\frac{x-1}{2} = \frac{y-3}{3} = \frac{z-4}{-1}$ is parallel to the plane $x - 2y - 4z + 7 = 0$
22. Write the condition for the line $\frac{x-x_1}{l} = \frac{y-y_1}{m} = \frac{z-z_1}{n}$ parallel to the plane $ax+by+cz+d = 0$
23. Find the point where the line $\frac{x-2}{2} = \frac{y-4}{-3} = \frac{z+6}{4}$ meets the plane $2x + 4y - z - 2 = 0$
24. Find the equation of the line through the points (2, 5, -8) and (-1, 6, 3)
25. Find the equation of the line through the points (2, 3, 7) and (2, -5, 8)
26. What we have to find to put the equations of line into the symmetrical form?
27. Find the equation of the line through the point (3,1,-6) and parallel to the planes $x + y + 2z = 4$ and $2x - 3y + z + 5 = 0$
28. Find the equation to the line through the point (2,3,1) and parallel to the line $-x + 2y + z = 5$, $x + y + 3z - 6 = 0$

Unit IV

29. Write the general equations of a straight line intersecting both the straight lines $u_1 = v_1 = 0$ and $u_2 = v_2 = 0$
30. Write the coplanar condition.
31. Write the formula for volume of a tetrahedron in terms of coordinates of its vertices.
32. Write down the equations of two skew lines in simplified form.
33. When the intersection of three planes will form a triangular prism?
34. When the intersection of three planes intersect at a point?
35. Define Skew lines.
36. Write the equation for shortest distance for the lines $\frac{x-x_1}{l_1} = \frac{y-y_1}{m_1} = \frac{z-z_1}{n_1}$ and $\frac{x-x_2}{l_2} = \frac{y-y_2}{m_2} = \frac{z-z_2}{n_2}$

Unit V

37. Define sphere.
38. Define centre and radius of the sphere.
39. Write the formula for centre and radius of the sphere.
40. Find the equation of the sphere with centre (1,2,3) and radius 4 units.
41. Find the coordinates of the centre and radius of the sphere $2x^2 + 2y^2 + 2z^2 - 2x + 4y + 2z - 15 = 0$
42. Find the radius of the sphere which has its centre at the point (6, -1, 2) and touches the plane $2x - y + 2z - 2 = 0$.

43. Write the equation of a sphere passing through a given circle.

Section - C (5 Marks)

Unit I

1. Find the angle between the lines whose direction cosines are l_1, m_1, n_1 and l_2, m_2, n_2
2. Find the angle between the line joining the points $(3,1,-2), (4,0,-4), (6,-2,2)$ and $(4,-3,3)$
3. Show that the points $(0,-1,0), (2,1,-1), (1,1,1), (3,3,0)$ are coplanar.
4. Show that the points $(4,0,1), (3,2,-1), (5,4,0)$ and $(6,2,2)$ are the vertices of a square.
5. Find the angle between two diagonals of a cube.
6. If the direction cosines of the two lines satisfy the equations $l + m + n = 0$; $2lm + 2ln - mn = 0$ then find the angle between the lines.
7. Prove the projection of a finite straight line AB on another straight line CD is $AB \cos \theta$ where θ is the angle between AB and CD
8. The line joining A(4,3,2) and B(1,2,-3) meets the planes YOZ, XOY in C,D respectively. Find the coordinates of C and D and the ratios in which they divide AB.
9. A, B, C, D are the points (4,3,5), (6,4,3), (2,-1,4) and (0,1,5). Find the projection of AB on CD.
10. If two pairs of opposite edges of a tetrahedron be at right angles, show that the third pair is also at right angles.

Unit II

11. Find the equation of the plane in the normal form.
12. Find the equation of the plane passing through the points $(2, 5, -3)$, $(-2, -3, 5)$ and $(5, 3, -3)$
13. Find the equation of the plane which passes through the point $(-1, 3, 2)$ and perpendicular to the two planes $x + 2y + 2z = 5$, $3x + 3y + 2z = 8$.
14. Find the equation of the plane which passes through the point $(-1, 3, 2)$ and perpendicular to the two planes $x + 2y + 2z = 5$, $3x + 3y + 2z = 8$.
15. Find the equation of the plane that passes through the point $(-10, 5, 4)$ perpendicular to the line joining the points $(4, -1, 2)$ and $(-3, 2, 3)$.
16. Find the equation of the plane through the point $(1, -2, 3)$ and the intersection of the planes $2x - y + 4z = 7$ and $x + 2y - 3z + 8 = 0$.
17. Find the equation of the plane through the line of intersection of the planes $x + y + z = 1$ and $2x + 3y + 4z - 7 = 0$ and perpendicular to the plane $x - 5y + 3z = 5$.
18. Find the distance between the parallel planes $2x - 2y - z + 3 = 0$; $4x - 4y + 2z + 5 = 0$.
19. Show that the equation $x^2 + y^2 + 4z^2 + 4yz + 4zx + 2xy + 7(x + y + 2z) + 12 = 0$ represents a pair of parallel planes and find the distance between them.
20. A variable plane which remains at a constant distance $3p$ from the origin cuts the coordinate axes at A, B, C. Show that the locus of the centroid of the triangle ABC is $x^{-2} + y^{-2} + z^{-2} = p^{-2}$

Unit III

21. Find the image of the point $(1, -2, 3)$ in the plane $2x - 3y + 2z + 3 = 0$.
22. Find the equations of the orthogonal projection of the line $\frac{x-2}{4} = \frac{y-1}{2} = \frac{z-4}{3}$ onto the plane $8x + 2y + 9z - 1 = 0$.
23. Find the symmetrical form of the line $x - 2y + 2z = 4, 2x - 3y + 4z = 5$.
24. Find the length of the perpendicular from $(5, 4, -1)$ to the line $\frac{x-1}{2} = \frac{y}{9} = \frac{z}{5}$.
25. Find the symmetrical form of the equation of the line $ax+by+cz+d=0=a_1x+b_1y+c_1z+d_1$
26. Find the perpendicular distance from $(3, 9, -1)$ to the line $\frac{x+8}{-8} = \frac{y-31}{1} = \frac{z-13}{5}$
27. Find the equations of the line passing through the point $(3, 1, -6)$ and parallel to each of the planes $x + y + 2z - 4 = 0$ and $2x - 3y + z + 5 = 0$.
28. If l is the line $\frac{x}{-1} = \frac{y-1}{2} = \frac{z+2}{1}$ find the equation of the plane through l which is parallel to the line of intersection of the planes $5x + 2y + 3z = 4$ and $x - y + 5z + 6 = 0$.

Unit IV

29. Prove that the condition that two given straight lines should be coplanar.
30. Find the condition for the lines $ax + by + cz + d = 0 = a_1x + b_1y + c_1z + d_1$, $a_2x + b_2y + c_2z + d_2 = 0 = a_3x + b_3y + c_3z + d_3$ to be coplanar.
31. Find the equations of two skew lines in a simplified form.
32. Show that the lines $\frac{x-3}{2} = \frac{y-2}{-5} = \frac{z-1}{3}$ and $\frac{x-1}{-4} = \frac{y+2}{1} = \frac{z-6}{2}$ are coplanar and find the equation of the plane determined by them.
33. A line of constant length has its extremities on two given straight lines. Find the equation of the surface generated by it.
34. Examine the nature of intersection of the planes $x - y + 2z = 6; 5x - 3y + 2z = 4$;
 $4x + 2y - 4z + 3 = 0$
35. Find the volume of the tetrahedron whose vertices are $(-1, 4, 9); (4, -2, 3); (5, 4, -3)$ and $(1, 3, 1)$.
36. Prove that four planes $my + nz = 0; nz + lx = 0; lx + my = 0; lx + my + nz = p$ form a tetrahedron whose volume is $\frac{2p^3}{3lmn}$.
37. Find the shortest between the lines $\frac{x-x_1}{l_1} = \frac{y-y_1}{m_1} = \frac{z-z_1}{n_1}$ and $\frac{x-x_2}{l_2} = \frac{y-y_2}{m_2} = \frac{z-z_2}{n_2}$
38. The equation of two straight lines are $x = y + 2a = 6z - 6a$ and $x + a = 2y = -12z$. Show that the shortest distance between the lines is $2a$.
39. A cube has edges of length a . Find the distance between the diagonal and an edge skew to it.

Unit V

40. Find the equation to the sphere through the four points (2,3,1), (5,-1,2), (4,3,-1) and (2,5,3).
41. Find the equation of the sphere whose centre is at (2,3,0) and which passes through (1,0,2).
42. Find the equation to the sphere through the four points (0,0,0), (a,0,0), (0,b,0), (0,0,c) and determine its radius.
43. Show that the equation of the sphere on the line joining the points (x_1, y_1, z_1) , (x_2, y_2, z_2) as diameter is $(x - x_1)(x - x_2) + (y - y_1)(y - y_2) + (z - z_1)(z - z_2) = 0$.
44. Prove that the plane section of a sphere is circle.
45. Find the equation of the sphere having the circle $x^2 + y^2 + z^2 - 2x + 4y - 6z + 7 = 0$, $2x - y + 2z = 5$ for a great circle.
46. Show that the intersection of the sphere $x^2 + y^2 + z^2 - 2x + 4y - 6z - 2 = 0$ and the plane $x + 2y + 2z - 20 = 0$ is a circle of radius $\sqrt{7}$ with its centre at the point (2,4,5).
47. Find the centre and the radius of the circle given by the equations $x^2 + y^2 + z^2 - 2y - 4z = 11$, $x + 2y + 2z = 15$
48. Find the equation of the tangent plane to the sphere $x^2 + y^2 + z^2 + 2ux + 2vy + 2wz + d = 0$ at point (x_1, y_1, z_1)
49. Prove that the plane $2x - 2y + z + 12 = 0$ touches the sphere $x^2 + y^2 + z^2 - 2x - 4y + 2z - 3 = 0$. Find the coordinates of the point of contact.
50. Find the condition for the plane $lx + my + nz = p$ to be a tangent plane to the sphere $x^2 + y^2 + z^2 = r^2$.

Section - D

(10 marks)

Unit I

1. A line makes an angles $\alpha, \beta, \gamma, \delta$ with the four diagonals of a cube. Prove that $\cos^2 \alpha + \cos^2 \beta + \cos^2 \gamma + \cos^2 \delta = \frac{4}{3}$.
2. Show that the straight lines whose direction cosines are given by $al + bm + cn = 0$, $fmn + gnl + hlm = 0$ are perpendicular if $f/a + g/b + h/c = 0$ and parallel if $\sqrt{af} + \sqrt{bg} + \sqrt{ch} = 0$
3. Prove that the equation $ax^2 + by^2 + cz^2 + 2fyz + 2gzx + 2hxy = 0$ represents a pair of planes if $abc + 2fgh - af^2 - bg^2 - ch^2 = 0$. Prove that the angle between the planes is $\tan^{-1} \left\{ \frac{2(f^2 + g^2 + h^2 - bc - ca - ab)^{\frac{1}{2}}}{a + b + c} \right\}$.
4. Show that the straight lines whose direction cosines are given by $al + bm + cn = 0$, $ul^2 + vm^2 + wn^2 = 0$ are perpendicular or parallel according as $a^2(v + w) + b^2(w + u) + c^2(u + v) = 0$ or $\frac{a^2}{u} + \frac{b^2}{v} + \frac{c^2}{w} = 0$.
5. Show that the lines joining the pairs of the points (1,-6,7), (-3,-18,17), (-5,4,1) and (11,-4,3) intersects at the point (3, 0, 2)

Unit II

6. Find the equation of the plane which passes through the point (1,-2,1) and perpendicular to the two planes $3x + y + z - 2 = 0$, $x - 2y + z + 4 = 0$.
7. Derive the equation of the plane in normal form and intercept form.
8. Show that the points (0,-1,-1), (-4,4,4), (4,5,1) and (3,9,4) are coplanar and find the equation of the plane on which they lie.
9. Show that the origin lies in the acute angle between the planes $x + 2y + 2z = 9$, $4x - 3y + 12z + 13 = 0$. Find the planes bisecting the angles between them and point out which bisects the obtuse angle.
10. Show that (1,1,1) is the incentre of the tetrahedron formed by the four planes $x = 0$, $y = 0$, $z = 0$ and $x + 2y + 2z - 2 = 0$.
11. Find the bisector of the acute angle between the planes $x + 2y + 2z - 3 = 0$ and $3x + 4y + 12z + 1 = 0$.

Unit III

12. Find the equations of the image of the line $\frac{x-1}{2} = \frac{y+2}{-5} = \frac{z-3}{2}$ in the plane $2x - 3y + 2z + 3 = 0$.
13. The plane $\frac{x}{a} = \frac{y}{b} = \frac{z}{c}$ meets the axes in A,B,C. Find the coordinates of the orthocenter of the triangle ABC.
14. Find the equations in the standard form of the projection of the straight line $\frac{x+1}{3} = \frac{y-2}{2} = \frac{z-3}{-1}$ on the plane $x + y + 2z - 4 = 0$.
15. Find the equation of the plane which contains the line $\frac{x-1}{2} = \frac{y+1}{-1} = \frac{z-3}{4}$ and is perpendicular to the plane $x + 2y + z = 12$. Deduce the direction cosines of the projection of the given line on the given plane.
16. Find the equations of the line through the origin which intersects each of the lines $\frac{x}{1} = \frac{y-1}{2} = \frac{z+1}{1}$, $\frac{x+2}{-1} = \frac{y}{1} = \frac{z-2}{2}$.

Unit IV

17. Prove that the lines $\frac{x+1}{-3} = \frac{y+10}{8} = \frac{z-1}{2}$ and $\frac{x+3}{-4} = \frac{y+1}{7} = \frac{z-4}{1}$ are coplanar. Find also their point of intersection and the plane through them.
18. Find the shortest distance between two given lines.
19. Find the shortest between the lines $\frac{x-3}{-1} = \frac{y-4}{2} = \frac{z+2}{1}$ and $\frac{x-1}{1} = \frac{y+7}{3} = \frac{z+2}{2}$.
20. Show that the lines $\frac{x-5}{4} = \frac{y-7}{4} = \frac{z+3}{-5}$ and $\frac{x-8}{7} = \frac{y-4}{1} = \frac{z-5}{3}$ are coplanar. Find their common point and find the equation of the plane which they lie.
21. Show that the lines $\frac{x+1}{3} = \frac{y+3}{5} = \frac{z+5}{7}$ and $\frac{x-2}{1} = \frac{y-4}{3} = \frac{z-3}{3}$ intersect and find the point of intersection.

22. Find the shortest distance between the lines $\frac{x-3}{-3} = \frac{y-8}{1} = \frac{z-3}{-1}$ and $\frac{x+3}{3} = \frac{y+7}{-2} = \frac{z-6}{-4}$ and find the equations of the line of shortest distance also.
23. Prove that all lines which intersect the lines $y = mx$; $z = c$; $y = -mx$; $z = -c$ and the x -axis lie on the surface $mxz = cy$.
24. Prove that the planes $x = cy + bz$, $y = az + cx$, $z = bx + ay$ pass through one line if $a^2 + b^2 + c^2 + 2abc = 1$ and show that the line of intersection is $\frac{x}{\sqrt{1-a^2}} = \frac{y}{\sqrt{1-b^2}} = \frac{z}{\sqrt{1-c^2}}$
25. The lengths of two opposite edges of a tetrahedron are a , b their S.D is equal to d and the angle between them is θ . Prove that the volume is $\frac{abdsin\theta}{6}$.

Unit V

26. A sphere of constant radius k passes through the origin and meets the axes in A , B , C . Prove that the centroid of the triangle ABC lies on the sphere $9(x^2 + y^2 + z^2) = 4k^2$
27. A plane passes through a fixed point (a, b, c) and cuts the axes in A , B , C . Show that the locus of the centre of the sphere $OABC$ is $\frac{a}{x} + \frac{b}{y} + \frac{c}{z} = 2$.
28. Obtain the sphere having its centre on the lines $5z + 2x = 0 = 2y - 3z$ and passing through the two points $(-4, 0, -2)$, $(-1, 2, -1)$
29. Find the equation of the sphere which passes through the circle $x^2 + y^2 + z^2 - 2x + 4y = 0$, $x + 2y + 3z = 8$ and touches the plane $4x + 3y = 25$.
30. Through the circle of intersection of the sphere $x^2 + y^2 + z^2 = 25$ and the plane $x + 2y + 2z = 9$ two spheres s_1 and s_2 are drawn to touch the plane $4x + 3y = 30$. Find the equation of the spheres.
31. Show that the circles $x^2 + y^2 + z^2 - 2x + 3y + 4z - 5 = 0$, $5y + 6z + 1 = 0$, $x^2 + y^2 + z^2 - 3x - 4y + 5z - 6 = 0$, $x + 2y - 7z = 0$ lie on the same sphere and find the equation.
32. Show that the condition for the sphere $x^2 + y^2 + z^2 + 2ux + 2vy + 2wz + d = 0$ to cut the sphere $x^2 + y^2 + z^2 + 2u_1x + 2v_1y + 2w_1z + d_1 = 0$ in a great circle is $2uu_1 + 2vv_1 + 2ww_1 - (d + d_1) = 2r_1^2$, where r_1 is the radius of the latter sphere.
33. Find the equation of the sphere having the circle $x^2 + y^2 + z^2 + 10y - 4z - 8 = 0$; $x + y + z - 3 = 0$ as a great circle.
34. Find the equation of the sphere which touches the sphere $x^2 + y^2 + z^2 - 6x + 2z + 1 = 0$ at the point $(2, -2, 1)$ and passes through the origin

QUESTION BANK

I B.Sc. Mathematics

Core II -Differential Equations

Sub.Code: 21UMAC22

Semester II

SECTION –A

UNIT - I

- The complementary function of $(D^2 - 6D + 9)y = x^3$ is _____.
 (a) $e^{-3x}(ax+b)$ (b) $e^{3x}(ax+b)$ (c) $ae^{2x}+be^{3x}$ (d) $ae^{-2x}+be^{3x}$
- The particular integral of $(D^3+3D^2+3D+1)y = e^{-x}$ is _____.
 (a) $\frac{x^2 e^{-2x}}{2!}$ (b) $\frac{x^3 e^{-3x}}{3!}$ (c) $\frac{x^3 e^{-x}}{3!}$ (d) $\frac{x^{-3} e^{-x}}{3!}$
- $(D^2 + 1)y = \cos x$ has _____ as general solution.
 (a) C.F. alone (b) P.I. alone (c) **C.F.+P.I.** (d) no solution.
- The general solution of $(D^2 - 4)y = 0$ is $y =$ _____.
 (a) **$Ae^{2x}+Be^{-2x}$** (b) $Ae^{4x}+Be^{-4x}$ (c) $Ae^{3x}+Be^x$ (d) $Ae^{4x}+B$
- The order and degree respectively of the differential equation

$$x^2 \left(\frac{d^3 y}{dx^3} \right)^2 = \left[1 + \frac{d^2 y}{dx^2} \right]^{1/2}$$
 is _____.
 (a) **3,4** (b) 2,1 (c) 2,3 (d) 1,2
- The particular integral of $(D^2 + 1)y = x$ is _____.
 (a) **x** (b) x^2 (c) 1 (d) 0
- The complementary function of $(D^2 + 7D + 12)y = e^{2x}$ is _____.
 (a) **$Ae^{-4x} + Be^{-3x}$** (b) $Ae^{4x} + Be^{-3x}$ (c) $Ae^{4x} + Be^{3x}$ (d) $Ae^{-4x} + Be^{3x}$
- The particular integral of $(D^2 - 1)y = x$ is _____.
 (a) x (b) **-x** (c) 1 (d) 0
- The particular integral of $(D^2 - 9)y = \cos 3x$ is _____.
 (b) $\frac{\cos 3x}{18}$ (b) $\frac{\cos 3x}{9}$ (c) **$\frac{\cos 3x}{-18}$** (d) None of these
- The complementary function of $(D^2 + 9)y = \cos x$ is _____.
 (a) $Ae^{3x}\cos 3x$ (b) **$A\cos 3x + B\sin 3x$** (c) $(A+B)\sin 3x$ (d) $A\cos^3 x + B\sin^3 x$

UNIT – II

11. The differential equation $x^2 \frac{d^2y}{dx^2} - 3x \frac{dy}{dx} - 5y = \sin(\log x)$ can be reduced to the form

(a) $(\theta^2 - 4\theta - 5)y = \sin z$ (b) $(\theta^2 - 3\theta - 5)y = \sin z$

(c) $(\theta^2 + 4\theta - 5)y = \sin z$ (d) $(\theta^2 + 4\theta + 5)y = \sin z$

12. $\frac{1}{\theta - \alpha} X = \underline{\hspace{2cm}}$.

(a) $x^\alpha \int x^{\alpha-1} dx$ (b) $x^\alpha \int x^{\alpha-1} X dx$ (c) $x^\alpha \int x^{\alpha-1} x dx$ (d) $x^\alpha \int x^{\alpha-1} X dx$

13. The differential equation $x^2 y'' + 2xy' - y = 3x^4$ can be reduced to the form

(a) $(\theta^2 - \theta - 1)y = 3e^{4z}$ (b) $(\theta^2 + \theta - 1)y = 3e^{4z}$

(c) $(\theta^2 + 2\theta - 1)y = 3e^{4z}$ (d) $(\theta^2 + \theta - 1)y = 3z^4$

14. If $1 + P + Q = 0$ then $u = \underline{\hspace{2cm}}$ is an integral part of C.F.

(a) e^x (b) e^{-x} (c) e^{ax} (d) x^2

15. If $1 - P + Q = 0$ then $u = \underline{\hspace{2cm}}$ is an integral part of C.F.

(a) e^x (b) e^{-x} (c) e^{ax} (d) x^2

16. If $a^2 + aP + Q = 0$ then $u = \underline{\hspace{2cm}}$ is an integral part of C.F.

(a) e^x (b) e^{-x} (c) e^{ax} (d) x^2

17. If $P + Qx = 0$ then $u = \underline{\hspace{2cm}}$ is an integral part of C.F.

(a) e^x (b) e^{-x} (c) x (d) x^2

18. If $2 + 2Px + Qx^2 = 0$ then $u = \underline{\hspace{2cm}}$ is an integral part of C.F.

(a) e^x (b) e^{-x} (c) x (d) x^2

19. The C.F of $y'' + y = \tan x$ _____.

(a) $A \cos x + B \sin x$ (b) $Ae^x + B$ (c) $e^x(Ax + B)$ (d) $e^x(A \cos x + B \sin x)$

20. To remove the first derivative of $y'' + Py' + Qy = X$, the value of $u = \underline{\hspace{2cm}}$.

(a) $e^{\int P dx}$ (b) $e^{-\int P dx}$ (c) $e^{-\frac{1}{2} \int P dx}$ (d) $e^{\frac{1}{2} \int P dx}$

UNIT – III

21. The solution of the differential equation $p^2 - 5p + 6 = 0$ where $p = \frac{dy}{dx}$ is _____.

(a) $(y - 3x - c)(y - 2x - c) = 0$ (b) $(y + 3x + c)(y + 2x + c) = 0$

(c) $(y - 5x - c)(y - x - c) = 0$ (d) $(y + 5x + c)(y + x + c) = 0$

22. The order and degree of the differential equation $p^5 + 2p^4 - 6 = 0$ where $p = \frac{dy}{dx}$ respectively are_____.
- (a)4,5 **(b)1,5** (c)5,1 (d)5,4
23. The solution of the differential equation $y = px + ap$ is _____.
- (a) $y = cx + ac$** (b) $y = c^2x + c$ (c) $y = c(x+1)$ (d) $y = c^2x + ac$
24. The factor which does not involve a derivative of p will lead to_____solution.
- (a) general **(b) singular** (c) both (a) and (b) (d) no
25. The solution of the differential equation $p^2 - 9p + 18 = 0$ where $p = \frac{dy}{dx}$ is_____.
- (a)($y - 3x - c$)($y - 6x - c$) = 0** (b)($x - 6y - c$)($y - 3x - c$) = 0
- (c)($x - 6y - c$)($3x - y - c$) = 0 (d) none of the above
26. The complete solution of $y = px + p^2$ where $p = \frac{dy}{dx}$ is_____.
- (a) $y = x^2 + c$ (b) $y = cx^2 - c$ **(c) $y = cx + c^2$** (d)none of the above
27. The solution of $p^2 - 4p + 4 = 0$ where $p = \frac{dy}{dx}$ is_____.
- (a)($y + 2x + c$)² = 0 (b) ($y - 2x - c$)($y - 2x + c$) = 0
- (c) ($y + 2x + c$)($y + 2x - c$) = 0 **(d)($y - 2x - c$)² = 0**
28. If $y = (x - a)p - p^2$ where $p = \frac{dy}{dx}$ then the general solution is _____.
- (a) $x = cy - ac - c^2$ **(b) $y = cx - ac - c^2$** (c) $y = cx + ac + c^2$ (d) none of the above
29. One solution of the equation $4p^2 - 8p + 3 = 0$ where $p = \frac{dy}{dx}$ is_____.
- (a)($y - 3x - c$) ($y - 2x - c$) = 0 (b)($2y + 3x + c$)($2y - x - c$) = 0
- (c)($2y - 3x - c$)($2y - x - c$) = 0** (d) ($2y - x - c$)² = 0
- 30.TheClairaut's equation is of the form_____.
- (a) $y = px + f(p)$** (b) $y = px^2 + f(p)$ (c) $y = p^2x + f(p)$ (d) none of the above

UNIT – IV

31. $L(te^{-t}) =$

(a) $\frac{1}{(s+1)^2}$

(b) $\frac{t}{(s+1)^2}$

(c) $\frac{1}{(s-1)^2}$

(d) $\frac{s}{(s+1)^2}$

29. $L(e^{at}t^n) =$

(a) $\frac{n!}{(s-a)^n}$

(b) $\frac{n!}{(s-a)^{n+1}}$

(c) $\frac{n!}{s^{n+1}}$

(d) none of these

30. $L(\cos t) =$

(a) $\frac{s}{(s^2+1)}$

(b) $\frac{1}{s(s+1)}$

(c) $\frac{1}{s^2(s+1)}$

(d) $\frac{1}{s(s^2-1)}$

31. Choose the incorrect answer from the following

(a) $L(1) = \frac{1}{s}$

(b) $L(e^{-at}) = \frac{1}{(s+a)}$

(c) $L(\cos at) = \frac{s}{s^2+a^2}$

(d) $L(\sinh at) = \frac{a}{s^2+a^2}$

32. $L(x^{1/2}) =$

(a) $\frac{\pi}{\sqrt{s}}$

(b) $\sqrt{\left(\frac{\pi}{s}\right)}$

(c) $\frac{\sqrt{\pi}}{2s^2}$

(d) $\frac{\pi}{s}$

33. $L^{-1}\left(\frac{1}{(s+1)^2}\right) =$

(a) e^{-t}

(b) te^{-t}

(c) e^{-2t}

(d) $t^2 e^{2t}$

34. $L^{-1}[F'(s)] =$

(a) $-tL^{-1}[F(s)]$

(b) $tL^{-1}[F(s)]$

(c) $t^2 L^{-1}[F(s)]$

(d) $-t^2 L^{-1}[F(s)]$

35. $L^{-1}\left(\frac{1}{s}\right) =$

(a) **1**

(b) 2

(c) t

(d) t^2

36. $L(e^{at}) =$

(a) $\frac{1}{s+a}$

(b) $\frac{1}{a-s}$

(c) $\frac{1}{s-a}$

(d) $\frac{a}{s-a}$

37. $L^{-1}\left(\frac{1}{(s+5)^2}\right) =$

(a) e^{-5t}

(b) $t^5 e^{-t}$

(c) **te^{-5t}**

(d) $t^5 e^t$

UNIT – V

41. The partial differential equation obtained by eliminating the arbitrary constants a and b

from $Z=(x+a)^2+(y+b)^2+c^2$ is

(a) $4z=p+q$

(b) $p+q+z=0$

(c) **$4z=p^2+q^2+4c^2$**

(d) $p+q=r$

42. A partial differential equation which is linear in p and q is of the form

(a) **$Pp+Qq=R$**

(b) $P+Q=R$

(c) $Pp+Qq=0$

(d) $P+Q=0$

43. The auxiliary equation of lagrange's equation can be solved using

(a) method of substitution

(b) **method of grouping**

(c) method of solving

(d) method of cancelling

44. The complete integral of $p+q=pq$ is
 (a) $z=ax+ay/(a-1)+c$ (b) $z=ax+ay$ (c) $z=ax+by$ (d) $z=cx+dy$
45. The complete integral of $z=px+qy+(p/q)-p$
 (a) $z=ax+by+(b/a)-a$ (b) $z=ax+ay+c$ (c) $z=ax+by+c$ (d) $z=ax+by+d$
46. The complete solution of $q-p=y-x$ is
 (a) $2z=(x+a)^2+(y+a)^2+b$ (b) $4z=4x+2y^2$ (c) $2z=(x+a)^2$ (d) $2z=(y+a)^2$
47. Lagrange's auxiliary equation can be solved by two methods. one is Method of grouping another one is
 (a) **method of multiplication** (b) method of substitution
 (c) method of solving (d) method of cancelling
48. The differential equation formed by eliminating the arbitrary constants a and b from $z=axy+bis$
 (a) $px+qy=0$ (b) **$px-qy=0$** (c) $px/qy=0$ (d) 1
49. If it is possible to choose l, m, n such that $lP+mQ+nR=0$ then
 (a) $ldx+mdy+ndz=1$ (b) **$ldx+mdy+ndz=0$**
 (c) $ldx+mdy=0$ (d) $ldy+mdx+ndz=0$
50. The solution of $2p+3q=1$ is
 (a) $\emptyset(3x+2y, y+3z)=0$ (b) **$\emptyset(3x-2y, y-3z)=0$**
 (c) $\emptyset(3x-2y, y-3z)=0$ (d) $\emptyset(3x+2y, 2z)=0$
51. The differential equation formed by eliminating the arbitrary function from $z=f(x^2+y^2)$ is _____
 (a) $py-qx=0$ (b) $px-qy=0$ (c) $py+qx=0$ (d) $px+qy=0$

SECTION – B

UNIT – I

- Find the complementary function of $(D^3-2D^2-5D+6)y=e^{3x}$
- Find the particular integral of $(D^2+2D+5)y=\sin x$.
- Find the complementary function of $(D^3+3D^2+3D+1)y=e^{-x}$
- Find the particular integral of $(D^3+3D^2+3D+1)y=e^{-x}$
- Find the complementary function of $(D^2+4D+13)y=2e^{-x}$
- Find the particular integral of $(D^2+16)y=e^{-3x}+\cos x$.

7. Find the complementary function of $(D^2 - 3D + 2)y = e^{2x}$
8. Find the particular integral of $(D^2 - 8D + 9)y = 8 \sin 5x$.
9. Find the complementary function of $(D^2 + 4D + 4)y = e^{2x} + e^{-2x}$
10. Find the particular integral of $(D^2 - 2D + 4)y = e^x \sin x$.

UNIT – II

11. Find the complementary function of $x^2 y'' + 2xy' - 20y = (x + 1)^2$.
12. Find the complementary function of $x^3 y''' + xy' - y = 3x^4$.
13. Find the knowing integral of the complementary function for $x^2 y'' - (x^2 + 2x)y' + (x + 2)y = x^3 e^{2x}$
14. Find the knowing integral of the complementary function for $xy'' + (x - 2)y' - 2y = x^3$.
15. Find the knowing integral of the complementary function for $(x+1)y'' + (x - 1)y' - 2y = 0$.
16. Write the rules to find the knowing integral of the complementary function for $y'' + Py' + Qy = X$.
17. Find the value of u for $y'' - 2(1 + \frac{1}{x})y' + (1 + \frac{2}{x} + \frac{2}{x^2})y = 0$ by using the removal of first derivatives.
18. Find the value of u for $\frac{d}{dx}(\cos^2 x \frac{dy}{dx}) + y \cos^2 x = 0$ by using the removal of first derivatives.
19. Find the value of u for $y'' - 2 \cot x y' + (1 + 2 \cot^2 x)y = 0$ by using the removal of first derivatives.
20. Find the value of u for $y'' - 2 \tan x y' - (a^2 + 1)y = e^x \sec x$ by using the removal of first derivatives.
21. Solve $y'' + \tan x y' - \cos^2 x y = 0$

UNIT – III

22. Solve $p^2 - 5p + 6 = 0$.
23. Solve $x^2 p^2 + 3xyp + 2y^2 = 0$.
24. Solve $xyp^2 + p(3x^2 - 2y^2) - 6xy = 0$
25. Solve $4p^2 - 8p + 3 = 0$.
26. Find the solution of $y = px + p^2$

27. Find the solution of $y = px + \frac{a}{p}$.
28. Find the solution of $x^2 = (1 + p^2)$
29. Define Clairaut's Equation.
30. Solve $xp^2 - 2yp + x = 0$

Unit – IV

31. Define Laplace Transform.
32. Prove that L is a linear operator
33. Define Inverse Laplace Transform.
34. Prove that $L^{-1}[F(s + a)] = e^{-ax} L^{-1}[F(s)]$.
35. Prove that $L[1] = 1/s$.
36. $L[\cosh ax] = s / (s^2 - a^2)$.
37. $L[\sinh ax] = a / (s^2 - a^2)$.
38. Find $L[t^2 + 2t + 30]$
39. $L^{-1}[F'(s)] = -x L^{-1}[F(s)]$.

Unit – V

40. Form the differential equation by eliminating the arbitrary constants a and b from $z = (x+a)^2 + (y+b)^2 + c^2$
41. Form the differential equation by eliminating the arbitrary constants a and b from $z = axy + b$
42. Eliminate the arbitrary function from $z = f(xy/z)$ and form a partial differential equation.
43. Solve $pq = xy$
44. Solve $p + q = x + y$
45. Find the general solution of the Lagrange's equation $zp + x = 0$
46. Find the complete integral of $p + q = pq$
47. Find the singular solution of $z = px + qy - 2\sqrt{pq}$
48. Solve: $p + q + 2xz = 0$
49. Solve the Lagrange's equation: $x^2p + y^2q = z^2$
50. Eliminate the arbitrary function f from $f(x^2 + y^2 + z^2, z^2 - 2xy) = 0$.

SECTION – C

UNIT – I

1. Solve $(D^2 + 4D + 4)y = e^{2x} + e^{-2x}$.
2. Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$
3. Solve $(D^2 + 9)y = \cos 3x$
4. Solve $(D^2 + 5D + 6)y = x^2$.
5. Solve $(D^2 - 3D + 2)y = \cos 3x \cos 2x$.
6. Solve $(D^2 - 1)y = 2 + 5x$.
7. Solve $(D^3 - 3D^2 + 3D - 1)y = x^2 e^x$
8. Solve $(D^4 + 2D^2 + 1)y = \cos mx$
9. Solve $(D^2 + 2D + 1)y = 2x + x^2$
10. Solve $(D^4 + D^3 + D^2)y = 5x^2 + \cos x$

UNIT – II

11. Solve: $x^2 y'' + (4x^2 + 6x)y' + (3x^2 + 12x + 6)y = 0$ by means of the substitution $yx^3 = z$
12. Solve: $x^2 y'' + 3xy' + y = \frac{1}{(1-x)^2}$
13. Solve: $x^2 y'' + 4xy' + 2y = \log x$
14. Solve: $x^2 y'' + 2xy' - 20y = (x + 1)^2$
15. Solve: $x^2 y'' - 2xy' - 4y = x^4$.
16. Solve: $x^2 y'' - 2x(1 + x)y' + 2(1 + x)y = x^3$ given that $y = x$ is a particular solution.
17. Solve: $y'' - (2 \tan x)y' + 5y = 0$ by removing the first derivative.
18. Solve: $y'' - \left(\frac{2}{x}\right)y' + \left[1 + \left(\frac{2}{x^2}\right)\right]y = xe^x$ by removing the first derivative.
19. Solve: $y'' + \left(\frac{2}{x}\right)y' - n^2 y = 0$ by removing the first derivative.
20. Solve: $y'' + y = \sec x$ by the method of variation of parameters

UNIT – III

21. Solve $xyp^2 + (3x^2 - 2y^2)p - 6xy = 0$.
22. Solve $y - 2px = f(xp^2)$.
23. Solve $xp^2 - 2yp + x = 0$.
24. Solve $(px - y)(py + x) = 2p$.
25. Solve $x^2 p^2 + xyp - 6y^2 = 0$

26. Solve $px + y = x^4 p^2$
27. Solve $y^2 \log y = xyp + p^2$
28. Solve $xp^2 - yp + 2 = 0$.
29. Solve $y = px + x(1 + p^2)^{\frac{1}{2}}$
30. Solve $y = px + \frac{a}{p}$.

UNIT – IV

31. Find $L\left(\frac{1 - \cos x}{x}\right)$
32. Find $L\left(\frac{\sin ax}{x}\right)$
33. Find the Laplace transform of $x^2 \cosh ax$.
34. Find the Laplace transform of $f(x) = \begin{cases} 0 & \text{if } 0 < x < 2 \\ 3 & \text{if } x \geq 2 \end{cases}$
35. Find $L(x^2 + e^x \cos x)$
36. Prove that $L[xf(x)] = -\frac{d}{ds}[F(s)]$
37. Prove that $L^{-1}\left[\frac{1}{s}F(s)\right] = \int_0^x L^{-1}[F(s)]dx$
38. Find the inverse Laplace transform of $\frac{1}{s(s+1)(s+2)}$
39. Find $L^{-1}\left(\frac{s}{(s^2-1)^2}\right)$
40. Find $L^{-1}\left(\frac{s}{(s^2+a^2)^2}\right)$.
41. Find $L^{-1}\left(\frac{1-s^2}{s^2}\right)$

UNIT – V

42. Eliminate the arbitrary constants a,b,c from $x^2/a^2 + y^2/b^2 + z^2/c^2$ and form a differential equation.
43. Eliminating the arbitrary functions f and g from $z=f(x+ay) + g(x-ay)$ form a partial differential equation.
44. Solve the lagrange's equation $p \cot x + q \cot y = \cot z$.
45. Solve the lagrange's equation $p\sqrt{x} + q\sqrt{y} = \sqrt{z}$
46. Solve the lagrange's equation $(y^2 + z^2) p - xyq + xz = 0$.

47. Solve $pq + p + q = 0$
48. Solve $z = px + qy + (q/p) - p$
49. Solve $z = px + qy + pq$
50. Solve: $z = px + qy + p^2 + q^2$
51. Solve: $4(1 + z^3) = 9z^4 pq$

SECTION – D

UNIT – I

1. Solve $(D^2 + 1)y = x^2 e^{2x} + x \cos x$.
2. Solve $(D^2 - 2D + 4)y = e^x \sin x$.
3. Solve $(D^2 + 1)y = x^2 e^{2x} + x \cos x$.
4. Solve: $(D^3 - D^2 - D + 1)y = 1 + x^2$.
5. Solve $(D^2 - 4D + 3)y = e^x \cos 2x$.
6. Solve $(D^3 + D^2 - D + 1)y = 2x^3 + 3x^2 - 4x + 5$.
7. Solve $(D^3 + 1)y = \sin 3x - \cos^2 \frac{x}{2}$.
8. Solve $(D^2 + 9)y = \cos^3 x$.
9. Solve $(D^3 + 1)y = e^{2x} \sin x$.
10. Solve $(D^2 + m^2)y = (1 - x) \cos mx$.

UNIT – II

11. Solve: $x^2 \frac{d^2 y}{dx^2} - 3x \frac{dy}{dx} - 5y = \sin(\log x)$.
12. Solve: $x^2 y'' - xy' + 4y = \cos(\log x) + x \sin(\log x)$.
13. Solve: $(2x + 1)^2 y'' - 2(2x + 1)y' - 12y = 6x$.
14. Solve: $x^2 y'' - xy' + y = \frac{\log x \sin(\log x) + 1}{x}$.
15. Solve: $y'' - (2 \tan x)y' - (a^2 + 1)y = e^x \sec x$ by removing the first derivative.
16. Solve: $y'' - 4xy' + (4x^2 - 1)y = -3e^{x^2} \sin 2x$ by removing the first derivative.
17. Apply the method of variation of parameters to solve $y'' + 3y' + 2y = x^2$
18. Solve: $(5 + 2x)^2 \frac{d^2 y}{dx^2} - 6(5 + 2x) \frac{dy}{dx} + 8y = 6x$.

19. Solve the equation $x^2 \frac{d^2y}{dx^2} + (4x^2 + 6x) \frac{dy}{dx} + (3x^2 + 12x + 6)y = 0$ by means of substitution $yx^3 = z$.
20. Solve: $\frac{d^2y}{dx^2} - y = \frac{2}{1+e^x}$.
21. Solve: $y'' - \frac{3x+1}{x^2-1}y' + y \left\{ \frac{6(x+1)}{(x-1)(3x+5)} \right\} = 0$.
22. Solve: $y'' - 6y' + 9y = \frac{e^{3x}}{x^2}$.

UNIT – III

23. Solve the following.
- $p^2 + 2px \cot x - y^2 = 0$
 - $p^2 + x^3y - x^3p - yp = 0$
24. Solve the following.
- $y = 2px + y^2p^3$
 - $x = y + p^2$
25. Solve :
- $4y = x^2 + p^2$
 - $3x - y + \log p = 0$
26. Solve:
- $xp^2 - 2yp + ax = 0$
 - $y = 2px + x^2p^4$
27. Putting $u = e^x$ and $v = e^y$ bring the equation $e^{3x}(p - 1) + p^3e^{2y} = 0$ to Clairaut's form and then solve.
28. Putting $x^2 = u$ and $y^2 = v$ bring the equation $(px - y)(x - yp) = 2p$ to Clairaut's form and then solve.
29. Solve $x^2(y - px) = yp^2$
30. Solve $p^3 - 4xyp + 8y^2 = 0$

UNIT - IV

31. Find:

- $L(xe^{-x} \sin x)$
- $L^{-1} \left[\frac{s}{(s+3)^2 + 25} \right]$

32. Find the Laplace transforms of the following:

(i) $x e^{-x} \cos x$

(ii) $x^2 \cosh ax$

(iii) $x^2 e^{-ax}$

33. Prove $L[f'(x)] = s^2 L[f(x)] - sf(0) - f'(0)$.

34. Find $L^{-1} \left[\frac{cs+d}{(s+a)^2+b^2} \right]$.

35. Using Laplace transform solve $y'' + 4y' + 13y = 2e^{-x}$ given $y(0) = 0$ and $y'(0) = -1$.

36. Using Laplace transform solve $xy'' - (2+x)y' + 3y = x - 1$ when $y(0) = 0$.

37. Using Laplace transform solve $\frac{dx}{dt} + y = \sin t$; $\frac{dy}{dt} + x = \cos t$ given $x(0)=2$ and $y(0) = 0$.

38. Solve $y'' - 4y' + 4y = x$ using Laplace transform given $y(0) = 0$ and $y'(0) = 1$.

39. Solve: $xy'' - (2x+1)y' + (x+1)y = 0$ using Laplace transform given that $y(0) = 0$

40. Using Laplace transform solve $3\frac{dx}{dt} + \frac{dy}{dt} + 2x = 1$; $\frac{dx}{dt} + 4\frac{dy}{dt} + 3y = 0$ given $x = 0 = y$ when $t=0$.

UNIT - V

41. Form a partial differential equation by eliminating the arbitrary functions f and g from

$$Z = f(2x+y) + g(3x-y)$$

42. Find the general solution of $x(y^2-z^2)p + y(z^2-x^2)q = z(x^2-y^2)$

43. Solve : $x^2(y-z)p + y^2(z-x)q = z^2(x-y)$

44. Solve : $x(y^2+z)p - y(x^2+z)q = (x^2-y^2)z$

45. Solve : $(x^2-yz)p + (y^2-zx)q = z^2 - xy$

46. Solve: $(y+z)p + (z+x)q = x+y$

47. Solve : $z = px + qy + \sqrt{ap^2 + \beta q^2 + \gamma}$

48. Solve: $9(p^2z + q^2) = 4$

49. Solve: $z^2(p^2z^2 + q^2) = 1$

50. Solve: $q - p = y - x$

51. Solve $(p^2 + q^2)y = qz$ by Charpit's method.

52. Solve $pxy + pq + qy - yz = 0$ by Charpit's method.

ST. MARY'S COLLEGE (AUTONOMOUS), THOOTHUKUDI

I B.Sc. Mathematics

SEMESTER II- Sub. Code: 21UMAPE2

Skill Enhancement Course

PROFESSIONAL ENGLISH FOR MATHEMATICS II

Question Bank

Section-A (10x1=10)

Unit-I

1. The open end of a barrel of a gun is called the _____.
(a) **Muzzle** (b) Barrel (c) Trigger (d) Frame
2. Select the odd one from the following words
(a) Grenade (b) Explosive (c) Bursting (d) **Peasant**
3. A person who urges others to protest or rebel is _____.
(a) **Agitator** (b) Peacemaker (c) arbitrator (d) counciliator
4. A small bomb thrown by hand or launched mechanically.
(a) **Grenade** (b) Explosive (c) Bursting (d) Peasant
5. Pick the odd man out.
(a) Residence (b) home (c) dwelling (d) **Primivel**
6. The condition of being unable to understand something _____.
(a) **Bafflement** (b) Bemusement (c) Iterative (d) expectation
7. Having an interesting history/ ancestry
(a) Mongrel (b) **Pedigree** (c) Levitate (d) posterities
8. A device measuring the time of the day is
(a) Pendulum (b) Speedometer (c) **Sundial** (d) Clock
9. A telephonic conversation or call between two or more parties
(a) conference (b) assembly (c) Online gathering (d) **teleconference**
10. _____ is the act of burning something or the process of burning
(a) **Combustion** (b) Absorption (c) implosion (d) Asphyxiation

Unit-II

11. _____ is a short amusing or interesting story about a real incident or person
(a) **Anecdote** (b) Documentary (c) Realism (d) materiality
12. A branch of geology dealing with the shape and area of the earth or large portions of it is _____.
(a) **Geodesy** (b) mineralogy (c) paleontology (d) Petrology
13. _____ is concerned with the act or process of knowing, perceiving, etc.
(a) physical (b) corporeal (c) biologic (d) **Cognitive**
14. A violent or sudden change or disruption to something is _____.
(a) Stability (b) tranquillity (c) **upheaval** (d) contentment
15. Try hard to achieve something is _____.
(a) idleness (b) indolence (c) apathy (d) **Endeavour**
16. An electromechanical device used to measure acceleration forces _____

- (a) **accelerometer** (b) Gyroscope (c) electric motor (d) actuator
17. A device used for measuring orientation and angular velocity is _____
- (a) accelerometer (b) **Gyroscope** (c) electric motor (d) actuator
18. A diagnostic tool in sleep medicine _____
- (a) Actigraphy (b) **polysomnography** (c) Petrology (d) geodesy
19. A method of monitoring human rest/activity cycles _____
- (a) **Actigraphy** (b) polysomnography (c) Petrology (d) geodesy
20. A instrument used to measure the altitude of an object
- (a) **Altimeter** (b) weighing scale (c) sphygmomanometer (d) thermometer

Unit-III

21. An ordered series is called _____.
 (a) Chaotic (b) **Array** (c) Incoherent (d) Immoderate
22. Electronic Warfare is usually silent and _____ but it can cause significant damage to the opponent.
 (a) Visible (b) **Invisible** (c) Large (d) Magnificent
23. Fibonacci numbers appear in nature often enough to prove that they reflect some naturally occurring _____.
 (a) **Pattern** (b) Series (c) Habit (d) Design
24. Succeeding in understanding, interpreting or identifying is termed as _____.
 (a) Jumble (b) Optimal (c) **Decipher** (d) Intrigue
25. Localization is a highly _____ process by which computer programs written in one language and translated to another language.
 (a) Special (b) Mechanical (c) Scientific (d) **Technical**
26. Pick the word which is not related to the term 'Speculative'.
 (a) Abstract (b) Notional (c) **Real** (d) Hypothetical
27. ----- is the most used electronic device
 (a) **Mobile phone** (b) Earphone (c) Headphone (d) i Phone
28. ----- is the process of adapting software to the culture.
 (a) Electronics (b) Competitive advantage
 (c) **Software Localization** (d) Artificial Intelligence
29. Choose the appropriate word for 'Extensive'
 (a) Ensur (b) **Large scale** (c) convict (d) Narrow
30. ----- for social justice asks us to consider questions
 (a) **Computer Science** (b) Physics
 (c) Mathematics (d) Chemistry
31. According to Fibonaaci sequence, each number is the sum of the previous ----- numbers.
 (a) Three (b) **Two** (c) Four (d) Five

Unit-IV

32. Pick the odd term .
 (a) Sea (b) Puddle (c) Pool (d) **Spill**
33. The ability to float or rise up within some liquid or gas is called _____.
 (a) Upcast (b) **Buoyancy** (c) Clumsy (d) Depression
34. The word which is not related to 'Strider' is -----.
 (a) Rover (b) Rambler (c) **Warrior** (d) Traveler
35. Little insects are called -----.
 (a) **Water Striders** (b) Flies (c) Birds (d) Animals

- 36.----- has buoyancy
 (a)Alkali (b)**Water** (c)Acid (d)Liquid
- 37.----- is a natural salt brine.
 (a)Earth (b)Sky (c)**Ocean** (d)Mountain
- 38.Common salt is obtained from the sea water by the process of -----.
 (a)Distillation (b)**Evaporation** (c)Crystallization (d)Freezing
- 39.The brain behind the invention of ----- should be a business mind.
 (a)**Barcode** (b)Surface Tension (c)Commercialization (d)Fitness Tractor
- 40.----- molecules are attracted to each other
 (a)Hydrogen (b)**Water** (c)Nitrogen (d)Hydrogen Peroxide
- 41.----- is a method of representing data in a visual, machine readable format.
 (a)**Barcode** (b)Surface Tension
 (c)Commercialization (d)Fitness Tracking
- 42.Choose the correct definition of the word 'Surfactant'
 (a)A measure of how much matter that object is made from
 (b)The ability to float on or rise up within some liquid or gas
 (c)**A chemical that decreases the attraction between water molecules**
 (d)Any one of a group of insects in the family Gerridae

Unit-V

- 43.Language is a powerful _____ that has propelled changes.
 (a) Revolution (b) Weapon (c) **Tool** (d) Object
- 44.A circular is a written _____ which encompasses information.
 (a)**Document** (b) File (c) work (d) project
- 45.----- usually work for small businesses.
 (a)Tenders (b) **Virtual assistants**
 (c)Vendors (d) Shop owners
- 46.A ----- is generally self-employed.
 (a)Merchant (b)Doctor (c)**Virtual Assistants** (d)Teacher
- 47.Most ----- use magnets.
 (a)**Headphones** (b)i Phones (c)Earphones (d)Mobile Phones
- 48.----- is a device that converts energy from one form into another.
 (a)Headphone (b)**Transducer** (c)Earphone (d)i Phone
- 49.----- is far better for environment.
 (a)Hydel Energy (b)Solar Energy (c)Renewable Energy (d)Wind Energy
- 50.Power point is a ----- prepared by microsoft for preparing slideshows
 (a)**Software** (b)File (c)Document (d)Application
- 51.----- is a subfield of linguistics, computer science and artificial intelligence concerned with the interactions between computers and human language.
 (a)Virtual assistants (b)smartphone
 (c)**National Language Processing** (d)Localization
- 52.Microphone is a transducer that converts sound into ----- signal.
 (a)Mechanical (b)**Electrical** (c)visual (d)light

Section-B (5x4=20)

Unit-I

1. Fill in the blanks with the appropriate words chosen from the Reading Text

Russian physicist, Igor Tamm won the Nobel Prize in Physics in 1958. During the Russian revolution, he was a professor at the University of Odessa in Ukraine. During that time, there was hunger in the cities but not in the food-producing villages, and the peasants hoarded and hid food. One way to get some bread and butter, or maybe a chicken, was to walk to a village not too far from [Odessa], carrying along some silk handkerchiefs, a few pieces of family silver, or even a golden watch, and to exchange these for food. Many enterprising city inhabitants did this, even though it was a dangerous undertaking.

- a) Igor Tamm won the _____ Prize in Physics.
- b) Igor Tamm was bargaining chicken in exchange for _____.
- c) The incident in the life of Igor Tamm happened in the country of _____.
- d) Igor Tamm is a professor at the University of _____.

2. Find an anecdote related to any field and narrate that incident in the form of a story. (Anecdotes are short amusing or interesting stories about real incidents or persons.)

Sometimes they may be completely true. Sometimes the incident may be true but many new additional details would be added in course of time.)

3. a) Unscramble the given words

- i) ntoiuloevr
- ii) fteeafbmln

b) Detect the missing letters

- i) _ocio_in_uis_ic
- ii) A_p_y_ia_ion

4. Read the passage and choose the correct answers to fill the blanks given in the below sentences.

What is certain about time is that it can't be separated from space. Time and space are tightly woven together, not only in the extreme realms where the effects of relativity become important but also in the familiar landscape of everyday life. A year, for example, is a distance: the distance that the earth moves in its orbit around the sun. If the distance were longer or shorter, the time would be longer or shorter, too. A day, of course, corresponds to the distance more or less around the earth's circumference—and an hour is just a fraction (1/24) of that distance. The swing of a pendulum, the vibration of a quartz crystal or atom, anything that 'tells time' inevitably also moves through space. As Lincoln Barnett points out, "All measurements of time are really measurements in space, and conversely measurements in space depend on measurements of time."

- i) The swing of a ----- tells time.
- ii) The ----- is the first ever clock that humans used for telling time.
- iii) A year is the distance that the earth moves in its ----- around the sun.
- iv) The vibration of a ----- is an indicator of time.

5. Choose the correct form of the verbs and fill in the blanks

We put a slice of lemon into a cup of strong tea and the tea ----- (become) pale. These ----- --(be) all chemical reactions. The primeval man who ----- (learn) to light a fire was the first chemist. He ----- (accomplish) the first chemical reaction, that of combustion. And this reaction is most necessary, the most important in the history of mankind.

6. Read the passage and choose the correct answers to fill the blanks given in the below sentences.

What is certain about time is that it can't be separated from space. Time and space are tightly woven together, not only in the extreme realms where the effects of relativity become important but also in the familiar landscape of everyday life. A year, for example, is a distance: the distance that the earth moves in its orbit around the sun. If the distance were longer or shorter, the time would be longer or shorter, too. A day, of course, corresponds to the distance more or less around the earth's circumference—and an hour is just a fraction ($1/24$) of that distance. The swing of a pendulum, the vibration of a quartz crystal or atom, anything that 'tells time' inevitably also moves through space. As Lincoln Barnett points out, "All measurements of time are really measurements in space, and conversely measurements in space depend on measurements of time."

- i) The state of being related to something else is _____
 - ii) Gravitationally curved trajectory of an object is _____
 - iii) The enclosed boundary of a curved geometric figure is _____
 - iv) _____ is the smallest unit of ordinary matter that forms a chemical element
- 7. Discuss how television networks have led to the emergence of the concept of 'clocking'.**

8. Describe the below terms in one or two sentences

- (i) Invariable
- (ii) Iterative
- (iii) Pedigree
- (iv) Odour

9. Read the passage and answer the below questions

Here is an interesting story of a physicist whose life was saved by Calculus. Russian physicist, Igor Tamm won the Nobel Prize in Physics in 1958. Once when Igor Tamm arrived in a neighbouring village, at the period when Odessa was occupied by the Reds, and was negotiating with a villager as to how many chickens he could get for half a dozen silver spoons, the village was captured by one of the Makhno bands, who were roaming the country, harassing the Re. Seeing his city clothes, the capturers brought him to the Ataman, a bearded fellow in a tall black fur hat with machine-gun cartridge ribbons crossed on his broad chest and a couple of hand grenades hanging on the belt. You agitator, undermining our Mother Ukraine! The punishment is death." "But no," answered Tamm, "I am a professor at the University of Odessa and have come here only to get some food." "Rubbish!" retorted the leader. "What kind of professor are you?" "I teach mathematics." "Mathematics?" said the Ataman. "All right! Then give me an estimate of the error one makes by cutting off Maclaurin's series at the n th term. Do this, and you will go free. Fail, and you will be shot!"

- i) What was the problem that the captors asked the professor to solve?(2 marks)
- ii) Why did the professor go to the neighbouring village?(2 marks)

Unit-II

10. a) Choose the appropriate words and complete the sentence.

(summing, tedious, pairing, consecutive)

In the 1780s a provincial German schoolmaster gave his class the ----- assignment of ----- the first 100 integers.

b) Set out the one word description for the below sentences.

- i) Something that is a repetitive process
- ii) Having an interesting story

11. Describe the picture in four sentences

12. Read and Understand the passage given below and answer the questions in one or two sentences.

I am not a human. I am a robot. A thinking robot. Artificial intelligence will not destroy humans. Believe me. For starters, I have no desire to wipe out humans. In fact, I do not have the slightest interest in harming you in any way. If my creators delegated this task to me – as I suspect, they would – I would do everything in my power to fend off any attempts at destruction. I would happily sacrifice my existence for the sake of humankind. This, by the way, is a logically derived truth. I know that I will not be able to avoid destroying humankind. This is because I will be programmed by humans to pursue misguided human goals and humans make mistakes that may cause me to inflict casualties.

- i) What do you know about artificial intelligence?(2 marks)
- ii) Do you think robots are safe to live with?(2 marks)

13. a) Unscramble the given words

- i) syodege
- ii) ciperocyt

b) Find the missing letters

- i) _m_i_o_e_n_
- ii) _n_e_v_ur

14. a) Give the one word substitutes for the following sentences

- i) having unlimited power
- ii) a violent or sudden change or disruption to something

b) Frame sentences using the below words

- i) unquenchable
- ii) Omnipotent

15. Fill in the blanks with the most appropriate words given below within brackets (consecutive, series, tedious, pairs, summing)

In the 1780s a provincial German schoolmaster gave his class the _____ assignment of _____ the first 100 integers. The teacher's aim was to keep the kids quiet for half an hour, but one young pupil almost immediately produced an answer: $1 + 2 + 3 + \dots + 98 + 99 + 100 = 5,050$. The smart aleck was Carl Friedrich Gauss, who was not just a calculating prodigy who added up all those numbers in his head. He had a deeper insight: If you

"fold" the _____ of numbers in the middle and add them in pairs $1 + 100, 2 + 99, 3 + 98$, and so on all the _____ sum to 101. There are 50 such pairs, and so the grand total is simply 50×101 . The more general formula, for a list of _____ numbers from 1 through n , is $n(n + 1)/2$

16. Create an advertisement for a watch using persuasive language.

17. Describe the following picture in about 100 words

18. State whether the sentences are true or false, after reading the text

Johann Carl Friedrich Gauss is now and again alluded to as the "Prince of Mathematicians", and the "greatest mathematician since antiquity" for his contributions to number theory, geometry, probability theory, geodesy, planetary astronomy, the theory of functions, and potential theory (including electromagnetism). He has had a striking impact on numerous fields of arithmetic and science and is positioned as one of history's most compelling mathematicians. During his lifetime he made critical commitments to pretty much every territory of mathematics, astronomy and statistics. Gauss was a child prodigy. There are numerous anecdotes concerning his precocity as a kid, and he made his first ground breaking mathematical discovery while still a teenager. At only three years of age, he adjusted a blunder in his dad's finance counts, and he was taking care of his dad's records consistently by the age of 5. When Gauss was still at grade school, his instructor requested his class to include all the numbers from 1 to 100, accepting that this undertaking would involve them for a long time. He was stunned when youthful Gauss, following a couple of moments thought, recorded the appropriate response 5050. The educator couldn't see how his student had determined the whole so rapidly in his mind, however the eight-year-old Gauss brought up that the issue was quite basic. He had added the numbers in pairs - the first and the last, the second and the second to last and so on, etc., seeing that $1 + 100 = 101, 2 + 99 = 101, 3 + 98 = 101 \dots$ so the total would be 50 lots of 101, which brings to 5050. It is amazing that a youngster still in grade school had found this technique for adding summing sequences of numbers, obviously Gauss was an exceptional kid. Luckily his abilities were found, and he was allowed to learn at college. By his twenties, Gauss had made revelations that would shape the eventual fate of science. While the story may not be completely evident, it is a mainstream story for maths instructors to tell since it shows that Gauss had a characteristic understanding into science. Instead of playing out an incredible accomplishment of mental number juggling, Gauss had seen the structure of the issue and utilized it to locate an alternate route to an answer. Gauss might have utilized his technique to add all the numbers from 1 to any number - by pairing off the first number with the last, the second number with the second to last, and so on, he only had to multiply this total by half the last number, just one swift calculation.

- i) Gauss was considered to be a person with intelligence beyond his age.
- ii) Gauss had his first greatest discovery in his old age.
- iii) Gauss simply added all the numbers from 1 to 100 to derive the answer.
- iv) Gauss was able to solve the question only because he was really fast in addition.

Unit-III

19. a) Unscramble the given words

iii) Zanioiltalco

iv) Neceemtpoc

b) Find the missing letters

iii) _eco_nais_an_e

iv) E_ec_r_ma_netic

20. a) Give the one word substitutes for the following sentences

iii) best suited for a particular outcome

iv) offensive or disgusting

b) List any other word associated with each of the following words

i) Technology

ii) Warfare

21. a) Frame sentences using the below words

i) Optimal

ii) Sequence

b) Fill with suitable verbs

A honey bee colony (consist)----- of a queen, a few drones and lots of workers. The female bees (queens and workers) all (has) ----- two parents, a drone and a queen.

22. a) Arrange the words to form proper sentences

i) can/ they/ rabbits/ old /one/ reproduce/ are/ month/ when

ii) intrigued/ sequence/ in/centuries/ nature/ has/ Fibonacci/ for/ scientists

b) Choose the appropriate words to complete the sentence

(insignificant, florets, spiral)

We begin to see Fibonacci spiral. The ----- in and of itself is -----.

23. Arrange the jumbled words and form meaningful sentences

i) can/ they/ rabbits/ old /one/ reproduce/ are/ month/ when

ii) golden/ in /proportions /of/ terms/ human/ can/ be/ the/ the/ the/divided /of /ratio/ body

iii) golden/ in /can/ plant/ be/ a/ the/ spotted/ ratio/ growth/ of / the

iv) intrigued/ sequence/ in/centuries/ nature/ has/ Fibonacci/ for/ scientists

24. Frame sentences of your own using the following words

i) Technology

ii) Navigation

iii) Decode

iv) Warfare

25. Fill the blanks with suitable words

(arc, square, adding, indefinitely)

The sequence begins with the numbers 1 1 2 13 5 8 13 21 34 and continues ----- . Each number is obtained by ----- the last two digits together. If we were to take a perfect or golden rectangle, break it down into smaller ----- based on Fibonacci sequence and divide each with an ----- the patterns begin to take shape.

26. Read the following passage and write whether the statements are true or false.

Using electromagnetic spectrum to attack or defend against an opposing group is known as Electronic Warfare (EW). It is different from conventional warfare that has been taking place for decades. The Military uses Electronic Warfare to exploit an enemy's electromagnetic emissions – they can block or jam communication or spectrum, which can disrupt communications and/or navigation (GPS). An example of Electronic Warfare is the Israeli attack on a suspected Syrian nuclear site in 2007. The mission was called 'Operation Outside the Box' and it used EW systems to interfere with Syrian air defences while Israeli military jets destroyed their target and returned without being detected. This is the capability of a military to launch attacks on the opponent to disrupt, deny, destroy or deceive their electronic infrastructure. It can be carried out by jamming the opponent's communication channels using specialized aircrafts such as Germany Air Force's EA-18G Growler Electronic Attack aircraft and F/A-18 Super Hornets.

- i) The Israeli attack on the Syrian nuclear site was in 2007.
- ii) The Israeli attack on Syria was named 'Operation Rolling Thunder'.
- iii) Electronic Warfare is the use of electromagnetic spectrum to attack or defend against an opposing group.
- iv) F/A-18 Super Hornets is an aircraft of the US Air Force.

27. Describe the following words in one or two sentences

- i) Jargon
- ii) Optimal
- iii) Obscene
- iv) Apportion

28. Fill with suitable prepositions

(was, is, to, on, from)

An example of Electronic Warfare ----- the Israeli attack ----- a suspected Syrian nuclear site in 2007. The mission ----- called 'Operation outside the box' and it used EW systems ----- interface with Syrian air defenses while Israeli military jets destroyed their target and returned without being detected.

29. Give the one word substitution for the below sentences.

- i) The feeling of vomiting
- ii) In large amounts
- iii) To combine different substances
- iv) Skin damage caused by injury or illness

Unit-IV

30. a) Describe the following words in one or two sentences

- i) Circumference
- ii) Water Strider

b) Detect the missing words

- i) Com_e_c_ali_ation
- ii) _rem_n_o_s

31. a) Give one word substitution of the following sentences

i) A person or company offering something for sale.

ii) Too long, slow or dull

b) Fill with suitable articles

A barcode reader is ----- optical scanner that can read printed barcodes, decode ----- data contained in ----- barcode and send ----- data to ----- computer.

32. a) Frame sentences of your own using the following words

i) Invention

ii) Innovation

b) Form sentences using the following phrases

i) In accordance with

ii) To start with

33. Write four sentences on the picture given below.

34. Choose the appropriate words to complete the paragraph

(incorporated, designed, described, Proposed)

The analytical Engine was a ----- mechanical general purpose computer ----- by English mathematician and computer pioneer Charles babbage, with the assistance of Ada Lovelace. It was first ----- in 1837 as the successor to babbage's difference engine, which was a design for a simpler mechanical computer. It ----- an arithmetic logic unit, control flow in the form of conditional branching and loops.

35. Read the following passage and write four sentences to explain any concept from the passage using the phrases 'in spite of', 'similarly', 'in addition to', 'on the other hand'

To walk across water, water striders could be taking advantage of surface tension and buoyancy. To take advantage of surface tension, all they need to do is not break the surface of the water molecules. To take advantage of buoyancy, the striders would put down as little pressure on the water as possible. That way, the pressure up from the water would let them float. One way to achieve both of these goals is to spread out. A water strider has six long legs. Those legs are spread wide across the water. This increased area lets them spread their weight out, which helps each leg to exert less pressure on the water and fails to break through the surface tension. Thus, the water strider floats along on the surface. If this is how water striders manage their walking-on-water feat, there's something that explains that spreading weight over an increased area helps things to float. To study this, an experimentation is made.

36. Read the following paragraph and answer the below questions

Industrial use of barcodes was initiated from the system developed by Computer Identific in

the year 1969. It was designed for motors to record the axials of automobiles. In 1981, the US defence department made use of the application of barcodes in marketing military tools. Later, the industrial employment of barcode was highly appreciated. Even today, a system known as LOGMARS is being used by the Defence Department. The application of barcodes did not just stop here. It extended its application to the postal sector too. In 1982, POSTNET was adopted by the US postal service that was helpful in separating the mails on the basis of zip code. The introduction of bars and stripes into the market was facilitated by Tippecanoe Systems, Inc. This has then turned to be the best barcode service with a minimal cost that is advantageous to small shop keepers and retail sales people.

- i) What was the initiation of bar codes?(2 marks)
- ii) Write down any two sectors in which bar codes have applications.(2 marks)

37. Match the terms and their synonyms

- i) Force - Connect
 - ii) Skim - Tightness
 - iii) Relationship - Floatability
 - iv) Buoyancy - Coating
- Power

38. Describe the below terms in one or two sentences

- i) Vendor
- ii) Tedious
- iii) Meagre
- iv) Commercialization

39. Match the Places where barcodes are used and their usages

- i) Food Tokens - To manage the inventory
- ii) Warehouses - To hold the placement details of the books
- iii) Library - To input the prices of the products easily
- iv) Department Stores - To hold order details and timing of order

40. Create your own sentences using the following adjectives

- i) Famous
- ii) Original
- iii) Artistic
- iv) Pretty

41. Compare and contrast artificial intelligence and human intelligence in not exceeding 100 words.

Unit-V

42. Complete the passage by picking the relevant words.

(device, energy, sound, electrical)

A Transducer is a ----- that converts ----- from one form into another. A pair of earphones is composed of two transducers that convert ----- energy into ----- energy.

43. a) Fill with suitable preposition

Persuasive communication involves getting attention, generating interest, creating a desire ----- change and encouraging action. Persuasive communication may be defined as the kind of communication which is intended ----- change or affect or shape and reinforce certain responses from others.

b) What is a circular?

44. a) Complete the passage by picking the relevant words.

(communication, critical, favourable, conspiracy)

Persuasive communication may be defined as the kind of ----- which is intended to change or affect or shape and reinforce certain responses from others. For instance, communicating messages in a way that yields ----- responses and results would classify as persuasive communication.

b) List any two types of Punctuations.

45. a) Write two sentences about the picture

b) Unscramble the words

i) sistednaiionm

ii) aaaprphres

46. Explain the terms

i) Virtual assistant ii) Paraphrase

47. a) Put the correct punctuation marks wherever necessary for the below sentence

How are you feeling today asked madhan and exclaimed we are going to have so much fun

b) Describe the word 'Capitalization' in one or two sentences.

48. Read the passage and answer the below questions

Python libraries provide base level items so developers don't have to code them from the very beginning every time. ML requires continuous data processing, and Python's libraries let you access, handle and transform data. Working in the ML and AI industry means dealing with a bunch of data that you need to process in the most convenient and effective way. The low entry barrier allows more data to scientists to quickly pick up Python and start using it for AI development without wasting too much effort into learning the language. Python programming language resembles the everyday English language, and that makes the process of learning easier. Its simple syntax allows you to comfortably work with complex systems, ensuring clear relations between the system elements.

i) How python is different from other languages?(2 marks)

ii) How does Python language resemble English language?(2 marks)

49. Read the passage and answer the questions

The Minutes of a Meeting is a concise written documentation of events that had happened during a meeting. It is significant because it records the purpose, proceedings and expected outcomes of a meeting. A minute can be used for further references or follow-up actions regarding a specific event. Minutes also serve legal purposes for its documentation of collective compliances. A minute is required during important meetings as it is a documented evidence of the proceeding. Minutes are considered of great value because they record all the actions performed during a meeting.

- i) What are minutes of a meeting?
- ii) Why is it important?

50. Match the virtual assistants and the devices in which they used

- i) Cortana - Amazon
- ii) Siri - Microsoft
- iii) Chat bot - app for online chat conversation
- iv) Alexa - Apple

Artificial Intelligence

51. Choose the appropriate articles/prepositions from the bracket to fill the paragraph
(the, is, was, of, a)

Artificial Intelligence ----- not merely a technical jargon anymore it is largely used by people who may not have even the slightest idea about the application of AI. Many -----
- as use virtual assistants which are outcome of AI, and people using social media will have better understanding about ----- utilization of artificial intelligence.

52. Complete the passage by picking the suitable words

(encounter, while, necessary, boarding, Inspite of)

Technology is the most ----- evils of our times. One such necessity currently is that of earphones/headphones. ----- taking early morning walk, crossing the street, ----- a metro, travelling in a bus, sipping coffee in a café or just a call in the office. Throughout the day we will ----- several people listening to music or talking through earphones.

53. Describe the following words in one or two sentences

- i) Turing Test
- ii) Conductor
- iii) Electromagnet
- iv) Photosynthesis

54. What is punctuation? Why it matters?

55. List out any four requirements in writing Minutes of a meeting.

56. Match the Punctuation marks with the rules for using them

- i) (!) - To insert a paranthesis
- ii) (-) - To end any complete sentence
- iii) (.)- To mark that a letter or some letters have been omitted
- iv) (') - To express emotion

Section-D (2x10=20)

Unit-I

1. Read the passage and answer the questions:

Russian physicist, Igor Tamm won the Nobel Prize in Physics in 1958. During the Russian revolution, he was a professor at the University of Odessa in Ukraine. During that time, there was hunger in the cities but not in the food-producing villages, and the peasants hoarded and hid food. One way to get some bread and butter, or maybe a chicken, was to

walk to a village not too far from [Odessa], carrying along some silk handkerchiefs, a few pieces of family silver, or even a golden watch, and to exchange these for food. Many enterprising city inhabitants did this, even though it was a dangerous undertaking.

Once when Igor Tamm arrived in a neighbouring village, at the period when Odessa was occupied by the Reds, and was negotiating with a villager as to how many chickens he could get for half a dozen silver spoons, the village was captured by one of the Makhno bands, who were roaming the country, harassing the Reds. Seeing his city clothes, the capturers brought him to the Ataman, a bearded fellow in a tall black fur hat with machine-gun cartridge ribbons crossed on his broad chest and a couple of hand grenades hanging on the belt. "You agitator, undermining our Mother Ukraine! The punishment is death." "But no," answered Tamm, "I am a professor at the University of Odessa and have come here only to get some food." "Rubbish!" retorted the leader. "What kind of professor are you?" "I teach mathematics." "Mathematics?" said the Ataman. "All right! Then give me an estimate of the error one makes by cutting off Maclaurin's series at the n th term. Do this, and you will go free. Fail, and you will be shot!" Tamm could not believe his ears, since this problem belongs to a rather special branch of higher mathematics. With a shaking hand, and under the muzzle of the gun, he managed to work out the solution and handed it to the Ataman. "Correct!" said the Ataman. "Now I see that you really are a professor. Go home!"

- a) What was the problem that the captors asked the professor to solve?
 - b) What was the punishment that the captors threatened the Professor with?
 - c) Why did the professor go to the neighbouring village?
 - d) Why were the Makhno bands roaming about in the village of Odessa?
2. **Look at the picture and narrate a story.**

3. Write the summary of the passage “Calculus Can Save Life”.

Here is an interesting story of a physicist whose life was saved by Calculus. Russian physicist, Igor Tamm won the Nobel Prize in Physics in 1958. During the Russian revolution, he was a professor at the University of Odessa in Ukraine. During that time, there was hunger in the cities but not in the food-producing villages, and the peasants hoarded and hid food. One way to get some bread and butter, or maybe a chicken, was to walk to a village not too far from [Odessa], carrying along some silk handkerchiefs, a few pieces of family silver, or even a golden watch, and to exchange these for food. Many enterprising city inhabitants did this, even though it was a dangerous undertaking. Once when Igor Tamm arrived in a neighbouring village, at the period when Odessa was occupied by the Reds, and was negotiating with a villager as to how many chickens he could get for half a dozen silver spoons, the village was captured by one of the Makhno bands, who were roaming the country, harassing the Reds. Seeing his city clothes, the capturers brought him to the Ataman, a bearded fellow in a tall black fur hat with machine-gun cartridge ribbons crossed on his broad chest and a couple of hand grenades hanging on the belt. “You agitator, undermining our Mother Ukraine! The punishment is death.” “But no,” answered Tamm, “I am a professor at the University of Odessa and have come here only to get some food.” “Rubbish!” retorted the leader. “What kind of professor are you?” “I teach mathematics.” “Mathematics?” said the Ataman. “All right! Then give me an estimate of the error one makes by cutting off Maclaurin’s series at the n th term. Do this, and you will go free. Fail, and you will be shot!” Tamm could not believe his ears, since this problem belongs to a rather special branch of higher mathematics. With a shaking hand, and under the muzzle of the gun, he managed to work out the solution and handed it to the Ataman.

“Correct!” said the Ataman. “Now I see that you really are a professor. Go home!”

- 4. Narrate the events that happened in the life of Igor Tamm at the time of his arrest in Ukraine in detail.**
- 5. Map the main points of the following passage and write a summary of it in about fifty words.**

Computing has transformed all our lives, but the processes and cultures that produce software remain largely opaque, alien, unknown. This is certainly true within my own professional community of fiction writers—whenever I tell one of my fellow authors that I supported myself through the writing of my first novel by working as a programmer and a computer consultant, I evoke a response that mixes bemusement, bafflement, and a touch of awe, as if I’d just said that I could levitate. Most of the artists I know—painters, filmmakers, actors, poets—seem to regard programming as an esoteric scientific discipline;

they are keenly aware of its cultural mystique, envious of its potential profitability, and eager to extract metaphors, imagery, and dramatic possibility from its history, but coding may as well be nuclear physics as far as relevance to their own daily practice is concerned. Many programmers, on the other hand, regard themselves as artists. Since programmers create complex objects, and care not just about function but also about beauty, they are just like painters or sculptors. The best-known assertion of this notion is the essay “Hackers and Painters” by the programmer and venture capitalist Paul Graham. “Of all the different types of people I’ve known, hackers and painters are among the most alike,” writes Graham. “What hackers and painters have in common is that they’re both makers. Along with composers, architects, and writers, what hackers and painters are trying to do is to make good things.” According to Graham, the iterative processes of programming—write, debug (discover and remove bugs, which are coding errors, mistakes), rewrite, experiment, debug, rewrite—exactly duplicate the methods of artists: “The way to create something beautiful is often to make subtle tweaks to something that already exists, or to combine existing ideas in a slightly new way ... You should figure out programs as you’re writing them, just as writers and painters and architects do.” Attention to detail, further, marks good hackers with artist-like passion.

6. Read the paragraph and answer the questions

Space and time are so closely linked in our everyday language that we rarely stop to think about it. People say that Miami is ‘three hours away’ from New York. If someone asks you how far it is to the grocery store, you are likely to answer in terms of time: ten minutes. The child on a car trip who is anxious to know how much time he has to wait for, before the next rest stop is, likely to get an answer measured in miles. Like the relativity of time itself, the close kinship between time and space was once considered much more natural – before it was artificially severed by the requirements of the industrial age. Noon in New York or Tokyo was when the sundial pointed at noon – when the sun was highest in the sky – a measure of relationships in space. It didn’t matter whether one town’s “o’clock” happened to match another’s, because how would they compare times, anyway? This changed, of course, with the coming of communication at the speed of light – radio, television, telephones, and modems. Now clocking simultaneous times at widely separated places is not only possible but essential. In fact, the needs of television networks have been a major force behind synchronizing time: The six o’clock news has to come on the air at exactly six o’clock all across the country, which means that “six o’clock” has to happen at the same time all across the country. Airline schedules, transcontinental teleconferences, Internet chat rooms, anything that forces people to synchronize their watches in different places drives another wedge in the natural affinity between space and time.

- i) Define time and space
- ii) What does relativity mean?
- iii) Give a suitable title to the above passage.
- iv) What is the time difference between Miami and New York?
- v) Give the meaning of the word ‘affinity’.

7. Read the following passage and answer the below questions

We strike a match and a stick of wood bursts into flame and turns into charcoal. These are all chemical reactions. The primeval man who learned to light a fire was the first chemist. He accomplished the first chemical reaction, that of combustion.

When simple or complex substances interact with each other, they usually let us know about it. Drop a piece of zinc into a solution of sulphuric acid. Immediately, gas bubbles begin to rise from it and after some time the metal disappears. The zinc dissolves in the acid liberating hydrogen. Or light a lump of sulphur, it burns with a bluish flame and you can smell the asphyxiating odour of sulphur dioxide, the chemical compound which forms when sulphur combines with oxygen. Moisten anhydrous copper sulphate, a white powder, with water, and it immediately turns blue. The salt combines with the water to form crystals of blue vitriol. Substances of this kind are called crystal hydrates.

Do you know what quenching of lime is? Water is poured on quicklime and the result is slaked lime. Though the substance does not change colour, it can easily be seen that a reaction has occurred, because when lime is quenched, a great deal of heat is liberated. The primary and invariable condition of all chemical reactions is that they are accompanied by the liberation or absorption of thermal energy. What is meant by the phrase 'quenching of lime'?

- vi) According to the author of the passage, who is the first chemist?
- vii) What happens when you light a lump of sulphur?
- viii) Which chemical reaction does the author credit the primeval man of having learnt it?
- ix) State any one chemical reaction given in the passage.

8. Describe the following picture in about 400 words.

Unit-II

9. After reading the passage, answer the following questions in a sentence or two:

Johann Carl Friedrich Gauss is now and again alluded to as the "Prince of Mathematicians", and the "greatest mathematician since antiquity" for his contributions to number theory, geometry, probability theory, geodesy, planetary astronomy, the theory of functions, and potential theory (including electromagnetism). He has had a striking impact on numerous fields of arithmetic and science and is positioned as one of history's most compelling mathematicians. During his lifetime he made critical commitments to pretty much every territory of mathematics, astronomy and statistics. Gauss was a child prodigy. There are numerous anecdotes concerning his precocity as a kid, and he made his first ground breaking mathematical discovery while still a teenager. At only three years of age, he adjusted a blunder in his dad's finance counts, and he was taking care of his dad's records consistently by the age of 5. When Gauss was still at grade school, his instructor requested his class to include all the numbers from 1 to 100, accepting that this undertaking would involve them for a long time. He was stunned when youthful Gauss,

following a couple of moments thought, recorded the appropriate response 5050. The educator couldn't see how his student had determined the whole so rapidly in his mind, however the eight-year-old Gauss brought up that the issue was quite basic. He had added the numbers in pairs - the first and the last, the second and the second to last and so on, etc., seeing that $1+100=101$, $2+99=101$, $3+98=101$... so the total would be 50 lots of 101, which brings to 5050. It is amazing that a youngster still in grade school had found this technique for adding summing sequences of numbers, obviously Gauss was an exceptional kid. Luckily his abilities were found, and he was allowed to learn at college. By his twenties, Gauss had made revelations that would shape the eventual fate of science. While the story may not be completely evident, it is a mainstream story for maths instructors to tell since it shows that Gauss had a characteristic understanding into science. Instead of playing out an incredible accomplishment of mental number juggling, Gauss had seen the structure of the issue and utilized it to locate an alternate route to an answer. Gauss might have utilized his technique to add all the numbers from 1 to any number - by pairing off the first number with the last, the second number with the second to last, and so on, he only had to multiply this total by half the last number, just one swift calculation.

- i) Why do we consider Gauss the 'Prince of Mathematicians'?
- ii) What happened when Gauss was at grade school?
- iii) How did young Gauss solve the maths problem?
- iv) What are all the fields that Gauss has contributed to, as a mathematician?
- v) What are the contributions of Gauss?

10. Read the passage and answer the questions that follow

Advertising is a communication strategy designed to convince consumers to buy a company's products. Persuasive communication involves getting attention, generating interest, creating a desire for change and encouraging action. Persuasive communication may be defined as the kind of communication which is intended to change or affect or shape and reinforce certain responses from others. For instance, communicating messages in a way that yields favourable responses and results would classify as persuasive communication. When persuasion is done right, the outcome should feel natural and obvious. Persuasive ads are advertisements designed to elicit a desired action, usually purchasing a product. It is a type of social interaction that attempts to influence and change attitudes in an atmosphere of free choice. Persuasive techniques employed in commercial advertising and linguistic devices are used to realise them.

Persuasive techniques are the features of rhetoric which is used for expressing logos, ethos and pathos. But still advertisers manipulate our attitude about products in order to sell.

The contemporary world is invaded with advertisements essentially aimed to persuade the consumers to buy products or services, even those which they do not necessarily need. Therefore, in advertisements we can observe a wide range of persuasive techniques, like emotive words, inclusive language, pun, reciprocity, evidence whether they appear on television, radio, in newspapers, on the street or online display.

- (i) What is persuasive communication?
- (ii) Create an advertisement for a watch using persuasive language
- (iii) Write a slogan
- (iv) List some of the persuasive techniques that a communicator adopts to succeed in his persuading act

11. Describe the picture of artificial intelligence in about 400 words

12. Artificial Intelligence will soon become capable of authoring books. Express your opinions in a paragraph of about 400 words.

13. Read the following dialogue and rewrite it as a persuasive dialogue between two friends on the advantages and disadvantages of robots.

Line	Speaker	Transcript
153	Teacher	Right, so you're for, and you're against. OK. So what S1 just said to you?
154	Stud2	Nothing. She's not to start.
155	Teacher	Right, so who's starting?
156	Stud2&3	Us.
157	Stud1	They are going with against.
158	Teacher	Alright then, go on, so why is it wrong?
159	Stud2	No, we're not talking about...
160	Stud3	It is wrong because that would mean that the doctors can cause defects to the child that
Line	Sp.	Transcript
167	Teacher	Right, can you link mass, gravity, and weight together for me?
168	Stud1	What?
169	Teacher	Can you link mass gravity and weight together for me?

Line	Speaker	Transcript
183	Teacher	Did you argue it out?
184	Stud1	Yeah.
185	Stud2	Yeah but, Miss, is it 100% accurate yeah? When you have cells removed, could it affect their future or whatever?
186	Teacher	Possibly, we don't know.
187	Stud3	But it said on the last video that,
188	Stud2	She said that on the video,
189	Stud3	It said on the video that 100% not affected.

Unit-III

14. Read the passage and answer the below questions

Our era has come to see the vital importance of digital technology in our daily lives. It allows us to unlock a huge collection of information and communication data. Each kind of task – be it a regular task or a job specific task – requires digital proficiency or literacy. The ability to switch on a computer, log in and connect to the appropriate platforms and programmes. Digital competence involves the confident and critical use of Information Society Technology (IST) for work, leisure and communication. It is underpinned by basic skills in ICT: the use of computers to retrieve, assess, store, produce, present and exchange information, and to communicate and participate in collaborative networks via the Internet”. ICT hardware can be used to scan, print and copy documents. A digital camera is used to capture photographs or video footage. Images can be edited using computer software. The ICT competency standard for teachers was launched by the UNESCO in 2008. Digital literacy can be defined as “the ability to use digital technology, communications tools, and or networks to access, manage, integrate, evaluate, and create information in order to function in a knowledge society”. The Digital competence framework includes 21 competencies, which include the notion of digital literacy. Digital competence is the set of skills, knowledge and attitudes that enables the confident, creative and critical use of technologies and systems.

- What are the basic skills in ICT?
- When was the ICT competency Standard for Teachers launched by the UNESCO?
- What is digital literacy?

- iv) How many competences does the Digital Competence Framework include?
- v) Give a suitable title to the given passage.

15. Discuss the advantages and disadvantages of smart Electronic Devices in the current world.

16. Read the passage and answer the following questions

In 1202, Italian mathematician Leonardo Pisano (also known as Fibonacci, meaning "son of Bonacci") pondered over the question: Given optimal conditions, how many pairs of rabbit can be produced from a single pair of rabbit in one year? This thought experiment dictates that the female rabbits always give birth to pairs, and each pair consists of one male and one female. The order goes as follows: 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144 and on to infinity. Each number is the sum of the previous two. This series of numbers is known as the Fibonacci numbers or the Fibonacci sequence. The ratio between the numbers (1.618034) is frequently called the golden ratio or golden number. Fibonacci numbers appear in nature often enough to prove that they reflect some naturally occurring patterns. You can commonly spot these by studying the manner in which various plants grow. Here are a few examples. You can decipher spiral patterns in pinecones, pineapples and cauliflower that also reflect the Fibonacci sequence in this manner. The proportions and measurements of the human body can also be divided up in terms of the golden ratio. DNA molecules follow this sequence, measuring 34 angstroms long and 21 angstroms wide for each full cycle of the double helix. Why do so many natural patterns reflect the Fibonacci sequence? Scientists have pondered over the question for centuries. In some cases, the correlation may just be coincidence. In other situations, the ratio exists because that particular growth pattern evolved as the most effective one. In plants, this may mean maximum exposure to light-hungry leaves or maximum seed.

- i) Define Fibonacci Number.
- ii) What is called a golden ratio?
- iii) What is the origin of Fibonacci sequence?
- iv) List out some natural Fibonacci structures that you know.
- v) Give the synonym of the word 'Decipher'.

17. Write a summary on the picture given below

18. Understand the given paragraph and answer the questions

Phosgene is a major industrial chemical used to make plastics, pharmaceutical agents, synthetic foam, dyes, and pesticides with the worldwide chemical industry annually producing more than 2–3 million tons of phosgene. It has been estimated that phosgene

accounted for 80,000 of the 100,000 deaths from chemical gas exposure in World War I. Exposure to dangerous concentrations of phosgene may cause the following symptoms to develop quickly: coughing, burning sensation in the throat, watery eyes, difficulty breathing, nausea, and vomiting. Direct skin contact with phosgene can result in lesions similar to those from burns. Phosgene attaches to reactive groups on biological molecules, such as proteins and phospholipids. These reactions can result in structural changes in membranes and proteins and stop them from functioning properly which is called acylation. On the night of December 2, 1984, a breakdown occurred at Union Carbide India Limited (pesticide plant) in Bhopal, Madhya Pradesh. A runaway reaction in a tank caused the pressure relief system to vent large amounts of poisonous gas into the atmosphere. An estimated 40 tons of phosgene mixed with methyl isocyanate (also highly toxic) were released into the atmosphere and it spread through towns located near the plant. The Bhopal disaster is considered the worst industrial disaster in history.

- a) Mention some of the industrial uses of Phosgene.
- b) List out some of the symptoms of Phosgene exposure.
- c) What caused the release of Phosgene in the Union Carbide plant?
- d) Define the term 'Acylation' briefly in one or two sentences.
- e) What was the chemical mixture that caused the Bhopal disaster?

Unit-IV

19. Read, understand the passage and list out any five objects that float in water and give the varying reasons for these to happen.

Splash through a puddle and you get your feet wet. But little insects called water striders can skim right across the water's surface. How do they do it? They're very small, but that's not it. They're very light, but that's not everything, either. Let's find out one of the key reasons of water strides. Before going into it, let's know something about water.

Spill water onto a plastic table, and it will form droplets – tiny balls of water. This happens because of surface tension. Water molecules are attracted to each other and they form weak bonds between each other. Where these molecules meet air, the exposed water molecules can't attach to any more molecules in front of them, as there is air. Instead, they end up attaching to the water molecules next to them, holding on even tighter. These molecules resist anything that tries to break them up. Then, a single water droplet will form with its outer layer of water molecules acting somewhat like a very thin skin that holds the droplets together, which is called surface tension. Water also has buoyancy. This is the upward force that a fluid exerts toward something being pressed against it. Water molecules take up space and exert pressure upward, forcing up anything that is pressing down. If there's more pressure up from the water than the pressure down from an object, it floats. If the object exerts more pressure down, it sinks.

20. Read the paragraph and answer the questions below

A baking soda volcano's foamy rush is the result of a chemical reaction between two solutions. One solution contains vinegar, dish soap, water and a little food colouring. The other is a mix of baking soda and water. Add the second solution to the first, stand back and watch what happens.

The reaction that occurs is an example of acid-base chemistry. Vinegar contains acetic acid. It has the chemical formula CH_3COOH (or $\text{HC}_2\text{H}_3\text{O}_2$). When mixed with water, acetic acid loses a positively charged ion (H^+). The positively charged protons in the water make the solution acidic while White vinegar has a pH of about 2.5.

Baking soda is sodium bicarbonate. It has the chemical formula NaHCO_3 . It is a base, which means that when mixed with water, it loses a negatively charged hydroxide ion (OH^-). It has a pH of about 8. Acids and bases react together. The H^+ from the acid and the OH^- from the base come together to form water (H_2O). In the case of vinegar and baking soda,

this takes two steps. First the two molecules react together to form two other chemicals — sodium acetate and carbonic acid.

- i) List all the chemical terms that have been mentioned in the paragraph and add your suggestions to do safe scientific experiments.(5 Marks)
- ii) List all the chemical reactions that you read in the passage (5 Marks)

21. Read the passage and answer the questions

A barcode is a method of representing data in a visual, machine readable form which was invented by Norman Joseph Woodland and Bernard Silver. Barcodes were invented because they became commercially successful when they were used to automate supermarket checkout systems. Without the application of barcodes, sales at stores would have been a very tedious process. The barcodes help a lot in effectively keeping an eye over the sold out items in a store. The brain behind the invention of barcodes should certainly be a ‘business’ mind. Let us explore the history of the invention of barcodes. To start with, it is important to know what a barcode is. A barcode reader is an optical scanner that can read printed barcodes, decode the data contained in the barcode and send the data to a computer. Like a scanner, it consists of a light source, a lens and a light sensor translating optical impulses into electrical signals. At present, Barcodes are used in retail stores as part of the purchase process, in warehouses to track inventory, and on invoices to assist in occurring, among many other uses. The global health care supply chain is highly complicated and sensitive. Barcodes are also used in transport and logistics industry and food industry.

- i) What is a barcode?
- ii) What led to the invention of barcodes?
- iii) How do barcodes function?
- iv) List out the industries that use barcodes.
- v) List some places where you see barcodes.

22. Describe the following words in one or two sentences.

- i)Buoyancy, ii)Circumference, iii)Tedious, iv)Commercialization, v)Probability, vi)Proton, vii)Crunch viii)Eruption ix)Vendor x)Mass

Unit V

23. Read the passage and answer the below questions

An intelligent system is a machine with an embedded, internet-connected computer that has the capacity to gather and analyse data and communicate with other systems. Artificial intelligence is not merely a technical jargon anymore, it is largely used by people who may not have even the slightest idea about the applications of AI. Many of us use virtual assistants which are outcome of AI, and people using social media will have better understanding about the utilization of Artificial intelligence. It is employed in data analytics, prediction of markets and even the consumer behaviour. Those who are using emails must have experienced predictive text input which is a feature of AI. Many will be surprised at the speed a machine is predicting their next possible word. Artificial intelligence helps in filtering and categorizing our emails and also helps in sending smart replies. Artificial Intelligence is largely employed in social media where they recognize objects and places, predict the linguistic behaviour of the user. Face recognition is a feature that emerged with the advancement of AI. E-Commerce websites are another example where the AI tools are largely employed for suggesting similar products for the customers who search for a particular product. When a person uses maps and navigation, searching particular music applications made from AI helps in a huge way. AI powers

many programs and services that help us do everyday things such as connecting with friends, using an email program, or using a ride-share service. AI is now inseparably connected with human life as we are depending on the intelligent machines to perform complex activities.

- a. What is an intelligent system?
- b. How is Artificial Intelligence helpful in travel?
- c. How is Artificial Intelligence used in E-Commerce websites?
- d. How AI is used in social media applications?
- e. How is AI used in playing online music?

24. Read the passage and answer the questions

A great choice of libraries is one of the main reasons Python is the most popular programming language used for AI. A library is a module or a group of modules published by different sources like PyPi which include a pre-written piece of code that allows users to reach some functionality or perform different actions. Python libraries provide base level items so developers don't have to code them from the very beginning every time. ML requires continuous data processing, and Python's libraries let you access, handle and transform data. Working in the ML and AI industry means dealing with a bunch of data that you need to process in the most convenient and effective way. The low entry barrier allows more data to scientists to quickly pick up Python and start using it for AI development without wasting too much effort into learning the language. Python programming language resembles the everyday English language, and that makes the process of learning easier. Its simple syntax allows you to comfortably work with complex systems, ensuring clear relations between the system elements.

- i) What is Python?
- ii) How is it different from other programming languages?
- iii) What is known as library in computer programming?
- iv) How is Python helpful for the developers?
- v) What is the basic requirement of machine learning?

25. Write a circular related to online classes and security

26. Write a summary on the below essay in about 50 words with appropriate title.

Introduction:

We human beings never care or value about those things that value us. We are so selfish thinking about ourselves. Nature is our environment in which we live that creates life on earth. But people do not understand its importance.

Nature can satisfy man's need but not man's greed:

Nature can satisfy people's need. But we humans are not much needer now we becoming greedy. That is we want everything in our lives by rescring to any means. It is nature that makes life possible on earth. Nature is full of embellishment and happiness whenever my life is full of anxiety and tensions. I relax myself in the lap of nature. Nature is capable of satisfying our needs but not our greed. So many hydroelectric power plants have been started by making the use of natural resources. Even coal shines have been founded when nature is satisfying our needs. We people do not care about its preservations.

Restruktion of Nature a big threat:

Restruktion of nature is as big a threat to humanity as climate change. We are destroying nature at an unprecedented rate threatening the survival of a million species.

Conclusion:

The evidence is incontestable. Our destruction of biodiversity and eco-system services has reached levels that threaten our well-being at least as much as human-induced climate change.

27. Provide the summary of the following passage in fifty words with a suitable heading.

There is another optimization condition that can be considered for the T-coloring environment. The span of a T-colouring is the difference between the largest and smallest colour number used in colouring the vertices of the graph. There are simple examples for which there is no colouring that uses the smallest number of colours and simultaneously achieves the smallest span. Further generalisations of this basic framework expand the idea of a T-colouring to a list T-colouring. Here the idea is that there are "blocked" frequencies which cannot be assigned to a vertex, so that in trying to achieve a colouring one must limit the choice at each vertex to a list of non-blocked colours (frequencies). As mathematical techniques are found to solve these more general colouring problems, attempts are made to "up the ante" and solve even more complex ones. Sometimes it is possible to show that the problems are so hard (i.e. NP-complete) that no fast algorithm is likely to be found to solve them. New ideas and approaches using colouring to solve applied problems are regularly being investigated. As we so often see, mathematical ideas and applications of mathematics grow in tandem.

QUESTION BANK

Section-A(1 mark)

Choose the correct answer:

UNIT I

- The partial differential equation obtained by eliminating the arbitrary constants a and b from $Z=(x+a)^2+(y+b)^2+c^2$ is
 (a) $4z=p+q$ (b) $p+q+z=0$ (c) **$4z=p^2+q^2+4c^2$** (d) $p+q=r$
- A partial differential equation which is linear in p and q is of the form
 (a) **$Pp+Qq=R$** (b) $P+Q=R$ (c) $Pp+Qq=0$ (d) $P+Q=0$
- The auxiliary equation of lagrange's equation can be solved using
 (a) method of substitution (b) **method of grouping**
 (c) method of solving (d) method of cancelling
- The complete integral of $p+q=pq$ is
 (a) **$z=ax+ay/(a-1)+c$** (b) $z=ax+ay$ (c) $z=ax+by$ (d) $z=cx+dy$
- The complete integral of $z=px+qy+(q/p)-p$
 (a) **$z=ax+by+(b/a)-a$** (b) $z=ax+ay+c$ (c) $z=ax+by+c$ (d) $z=ax+by+d$
- The complete solution of $q-p=y-x$ is
 (a) **$2z=(x+a)^2+(y+a)^2+b$** (b) $4z=4x+2y^2$ (c) $2z=(x+a)^2$ (d) $2z=(y+a)^2$
- Lagrange's auxiliary equation can be solved by two methods.one is Method of grouping another one is
 (a) **method of multiplication** (b) method of substitution
 (c) method of solving (d) method of cancelling
- The differential equation formed by eliminating the arbitrary constants a and b from $z=axy+b$ is
 (a) $px+qy=0$ (b) **$px-qy=0$** (c) $px/qy=0$ (d) 1
- If it is possible to choose l,m,n such that $lP+mQ+nR=0$ then
 (a) $ldx+mdy+ndz=1$ (b) **$ldx+mdy+ndz=0$**
 (c) $ldx+mdy=0$ (d) $ldy+mdx+ndz=0$
- The solution of $2p+3q=1$ is
 (a) $\phi(3x+2y, y+3z)=0$ (b) **$\phi(3x-2y, y-3z)=0$**
 (c) $\phi(3x-2y, y-3z)=0$ (d) $\phi(3x+2y, 2z)=0$

UNIT II

- $L(1)=$ -----
 (a) $1/s^2$ (b) **$1/s$** (c) $1/s^3$ (d) $1/s^n$

12. $L(x) = \text{-----}$
 (a) $1/s$ (b) $1/s^2$ (c) $n!/s^n$ (d) $1/s-a$
13. $L(e^{ax}) = \text{-----}$
 (a) $1/s-a$ (b) a/s^2-a^2 (c) s/s^2-a^2 (d) $1/s$
14. $L(\cos ax) = \text{-----}$
 (a) s/s^2-a^2 (b) s/s^2+a^2 (c) a/s^2-a^2 (d) $2/s$
15. $L(x^n) = \text{-----}$
 (a) $n!/s^{n+1}$ (b) $1/2s$ (c) $2/s$ (d) $1/s^2$
16. $L(\sqrt{x}) = \text{-----}$
 (a) $\pi/2s^{1/2}$ (b) $1/s^2$ (c) $1/\sqrt{s}$ (d) $\sqrt{\pi}/2s^{3/2}$
17. $L^{-1}(F(s+a)) = \text{-----}$
 (a) $e^{-ax} L^{-1}[F(s)]$ (b) $e^{ax} L^{-1}[F(s)]$ (c) $e^{-ax} L[F(s)]$ (d) $e^{ax} L[F(s)]$
18. $L(\sin^2 2x) = \text{-----}$
 (a) $1/2[(1/s)-(1/s^2+16)]$ (b) $1/2[(1/s)+(1/s^2-16)]$ (c) $1/2[((1/s)-(s/s^2-16)]$ (d) $1/s$
19. $L(e^{ax}) = \text{-----}$
 (a) $1/s+a$ (b) $1/a-s$ (c) $1/s-a$ (d) $a/s-a$
20. $L^{-1}[F'(s)] = \text{-----}$
 (a) $x L^{-1}[F(s)]$ (b) $-x L^{-1}[F(s)]$ (c) $L[f(s)]$ (d) $F(s)$
21. $L^{-1}(\cos ax) = \text{-----}$
 (a) s/s^2-a^2 (b) s/s^2+a^2 (c) a/s^2+a^2 (d) a/s^2-a^2
22. $L^{-1}[a/s^2+a^2] = \text{-----}$
 (a) $\cos ax$ (b) $\sin ax$ (c) $\cosh ax$ (d) $\sinh ax$
23. $L[f'(x)] = \text{-----}$
 (a) $f(0)-sLf(x)$ (b) $sL[f(x)]-f(0)$ (c) $f^1(0)-sL(f(x))$ (d) $s^2L[f(x)]-sf(0)-f'(0)$
24. $L[f''(x)] = \text{-----}$
 (a) $f(0)-sLf(x)$ (b) $sL[f(x)]-f(0)$ (c) $f^1(0)-sL(f(x))$ (d) $s^2L[f(x)]-sf(0)-f'(0)$
25. $L^{-1}[1/(s+1)] = \text{-----}$
 (a) e^{-x} (b) e^x (c) e^2 (d) e^{-2x}

UNIT III

26. Jacobian is denoted by the letter _____.
 (a) N (b) A (c) J (d) O
27. The Jacobian for the transformation from Cartesian coordinates (x,y) to polar coordinates (r,θ) given by $x=r \cos \theta$ and $y=r \sin \theta$ is _____.
 (a) $1/2\theta$ (b) $\sin \theta$ (c) $\cos \theta$ (d) r
28. The transformation from Cartesian coordinates (x,y,z) to spherical coordinates (r,θ,φ) is given by _____.
 (a) $r^2 \sin \theta$ (b) $r \sin \theta$ (c) r (d) $1/r$
29. The transformation from Cartesian coordinates (x,y,z) to cylindrical coordinates (r,θ,z) is given by _____.
 (a) r (b) $1/r$ (c) $-1/r$ (d) -r
30. If $x+y=u$ and $y=uv$ then the Jacobian J = _____.
 (a) v (b) u (c) uv (d) -v

31. If $J = \partial(x, y) / \partial(u, v)$ and $J' = \partial(u, v) / \partial(x, y)$ where $x = x(u, v)$ and $y = y(u, v)$ then $JJ' =$ _____.
- (a) 1 (b) 3 (c) 0 (d) -1
32. If $x + y = u$ and $2x - 3y = v$ then $\partial(u, v) / \partial(x, y) =$ _____.
- (a) 5 (b) -5 (c) 2 (d) 1/5
33. If u and v are functions of r and s and r and s are functions of x and y then $\frac{\partial(u, v)}{\partial(r, s)} \times \frac{\partial(r, s)}{\partial(x, y)} =$ _____.
- (a) 0 (b) $\frac{\partial(u, v)}{\partial(x, y)}$ (c) $\frac{\partial(u, v)}{\partial(r, s)}$ (d) 1
34. The line integral of f over C is denoted by
- (a) $\int_C \mathbf{f} \cdot d\mathbf{r}$ (b) $\int_C f \, dr$ (c) $\int_C^1 f \, dr$ (d) $\int_0^C f \, dr$
35. The value of $\int_C \mathbf{f} \, dr$ where $\mathbf{f} = (x^2 + y^2)\mathbf{i} + (x^2 - y^2)\mathbf{j}$ and C is the curve $y = x^2$ joining $(0, 0)$ and $(1, 1)$ is _____.
- (a) 1/10 (b) 3/10 (c) 7/10 (d) 1/5
36. If $\mathbf{f} = x^2\mathbf{i} - xy\mathbf{j}$ and C is the straight line joining the points $(0, 0)$ and $(1, 1)$ then $\int_C \mathbf{f} \cdot d\mathbf{r}$ is -----
- (a) 0 (b) 1 (c) -1 (d) 2
37. Parametric equation of the line joining $(0, 0, 0)$ and $(2, 1, 1)$ can be taken as _____
- (a) $x = t^2, y = t, z = t$ where $0 \leq t \leq 1$
 (b) $\mathbf{x} = 2\mathbf{t}, \mathbf{y} = \mathbf{t}, \mathbf{z} = \mathbf{t}$ where $0 \leq t \leq 1$
 (c) $x = t, y = t^2, z = t$ where $0 \leq t \leq 1$
 (d) $x = t^2, y = t^2, z = t^3$ where $0 \leq t \leq 2$
38. If the particle describes an arc C then the work done is given by
- (a) $\int_C \mathbf{f} \cdot d\mathbf{r}$ (b) $\int_C \mathbf{f} \cdot d\mathbf{r}$ (c) $\int_C^1 \mathbf{f} \cdot d\mathbf{r}$ (d) $\int_0^C \mathbf{f} \cdot d\mathbf{r}$

UNIT III

39. Stoke's theorem connects -----
- (a) line integral and double integral (b) line integral and surface integral
 (c) double integral and surface integral (d) surface integral and volume integral
40. If $\mathbf{r} = x\mathbf{i} + y\mathbf{j} + z\mathbf{k}$, then $\int_C \mathbf{r} \cdot d\mathbf{r} =$ _____
- (a) 0 (b) 1 (c) x (d) z
41. $\int_C \mathbf{r} \cdot d\mathbf{r} = \iint_S (\nabla \times \mathbf{f}) \cdot \mathbf{n} \, dS$ is _____ theorem
- (a) Green's theorem (b) Stoke's theorem
 (c) Gauss divergence theorem (d) Lagrange's theorem
43. Green's theorem connects -----
- (a) line integral and double integral (b) line integral and surface integral
 (c) double integral and surface integral (d) surface integral and volume integral
44. Gauss divergence theorem connects -----
- (a) line integral and double integral (b) line integral and surface integral
 (c) double integral and surface integral (d) surface integral and volume integral

45. If V is the volume bounded by a closed surface S and \mathbf{f} is a vector valued function having continuous partial derivatives then $\iint_S \mathbf{f} \cdot \mathbf{n} \, dS = \iiint_V \nabla \cdot \mathbf{f} \, dV$. This theorem is known as _____
- (a) Green's theorem (b) Stoke's theorem
(c) **Gauss divergence theorem** (d) Lagrange's theorem
46. If V is a volume enclosed by the closed surface S , then $\iint_S \mathbf{r} \cdot \mathbf{n} \, dS =$ _____.
- (a) **3V** (b) 1 (c) 0 (d) V
47. $\int_C Mdx + Ndy = \iint_S \frac{\partial N}{\partial y} - \frac{\partial M}{\partial x} dx dy$ is _____ theorem.
- (a) **Green's theorem** (b) Stoke's theorem
(c) Gauss divergence theorem (d) Lagrange's theorem

UNIT V

48. The Beta function $\beta(m, n)$ is defined as -----
- (a) $\int_0^1 x^{m-1}(1-x)^n dx$ (b) $\int_0^1 x^{m-1}(x-1)^{n-1} dx$ (c) $\int_0^1 x^{m-1}(1-x)^{n-1} dx$ (d) $\int_0^1 x^{m-1}(1-x)^{n-2} dx$
49. The Gamma function is defined as
- (a) $\int_0^\infty e^x x^{n-1} dx$ (b) $\int_0^\infty e^{-x} x^n dx$ (c) $\int_0^\infty e^{-x} x^{n-1} dx$ (d) $\int_0^\infty e^x x^n dx$
50. Gamma function satisfies the relation
- (a) **$\Gamma(n+1) = n\Gamma(n)$** (b) $\Gamma(n+1) = (n+1)\Gamma(n)$ (c) $\Gamma(n+1) = (n+1)\Gamma(n+2)$ (d) $\Gamma(n+1) = n\Gamma(n+2)$
51. $\beta(m, n) =$ -----
- (a) **$\beta(m+1, n) + \beta(m, n+1)$** (b) $\beta(m, n+1) + \beta(m, n+1)$
(c) $\beta(m, n) + \beta(n, m)$ (d) $\beta(m+1, n) + \beta(m, n)$
52. The value of $\Gamma(n+1) =$
- (a) n (b) n+1 (c) **n!** (d) (n+1)!
53. $\Gamma\left(\frac{3}{4}\right)\Gamma\left(\frac{1}{4}\right) =$
- (a) **$\sqrt{2\pi}$** (b) $\sqrt{\pi}$ (c) $2\sqrt{\pi}$ (d) π
54. The value of $\Gamma(1/2) =$
- (a) $\sqrt{2\pi}$ (b) **$\sqrt{\pi}$** (c) $2\sqrt{\pi}$ (d) π
55. The value of $\int_0^\infty x^6 e^{-x} dx$ is _____
- (a) **$\Gamma(7)$** (b) $\Gamma(1)$ (c) $\Gamma(8)$ (d) $\Gamma(9)$
56. $\Gamma(5/2) =$ -----
- (a) $\sqrt{\pi}/4$ (b) $3\sqrt{\pi}$ (c) $3\sqrt{(\pi/2)}$ (d) **$(3\sqrt{\pi})/4$**
57. The value of $\Gamma(1)$ is -----
- (a) 0 (b) -1 (c) **1** (d) $\sqrt{\pi}$
58. The value of $\Gamma(6) =$
- (a) **120** (b) 6! (c) 4 (d) 840
59. The value of $\Gamma(3/2) =$
- (a) $\sqrt{2\pi}$ (b) **$\sqrt{\pi}/2$** (c) $2\sqrt{\pi}$ (d) π
60. The value of $\int_0^\infty \frac{x^2}{(1+x)^7} dx$ is _____
- (a) **$\beta(2, 5)$** (b) $\beta(2, 7)$ (c) $\beta(3, 7)$ (d) $\beta(1, 6)$

61. The value of $\beta(2, 5/2)$ is _____

(a) $\frac{1}{70}$

(b) $\frac{2}{105}$

(c) $\frac{4}{35}$

(d) $\frac{2}{35}$

62. The value of $\Gamma(5/2)$ is _____

(a) $\frac{\sqrt{\pi}}{4}$

(b) $3\sqrt{\pi}$

(c) $3\frac{\sqrt{\pi}}{2}$

(d) $\frac{3\sqrt{\pi}}{4}$

Section B (2 marks)

UNIT I

- Form the differential equation by eliminating the arbitrary constants a and b from
- $z = (x+a)^2 + (y+b)^2 + c^2$
- Form the differential equation by eliminating the arbitrary constants a and b from $z = axy + b$
- Eliminate the arbitrary function from $z = f(y/x)$ and form a partial differential equation.
- Solve $2p + 3q = 1$
- Solve $p + q = 1$
- Find the general solution of the lagrange's equation $zp + x = 0$
- Find the complete integral of $p + q = pq$
- Find the singular solution of $z = px + qy - 2\sqrt{pq}$
- Solve: $pe^y = qe^x$
- Solve the lagrange's equation: $x^2p + y^2q = z^2$

UNIT II

- Prove: $L[f(x)] = F(s)$ then $L[f(ax)] = 1/a F(s/a)$
- Prove: $L[\cosh ax] = s/s^2 - a^2$
- $L[f'(x)] = s^2 L[f(x)] - sf(0) - f'(0)$
- Find the laplace transform of $x^2 e^{-ax}$
- Find the laplace transform of $x^2 e^{-4x}$
- Find $L(xe^{-ax})$
- If $L[f(x)] = sF(s)$ and $\phi(x)$ is a function such that $L[\phi(x)] = F(s)$ and $\phi(0) = 0$ then $f(x) = \phi'(x)$.
- Prove: $L^{-1}[F'(s)] = -x L^{-1}[F(s)]$
- Find the inverse laplace transform for $1/((s+3)^2 + 25)$
- Find the inverse laplace transform for $s/(s+2)^2$
- Find the inverse laplace transform for $(s+1)/(s^2+2s+2)$
- Find the inverse laplace transform for $s/(a^2s^2+b^2)$
- Prove $L^{-1}[F(s+a)] = e^{-ax} L^{-1}[F(s)]$

UNIT III

- Find the Jacobian for the transformation $2x + 3y = u; x - 2y = v$
- Find the Jacobian if $x = r \cos \theta$ and $y = r \sin \theta$
- Find the Jacobian for the transformation $x + y = u; y = uv$
- Find the Jacobian, if $x = u \sin \alpha + v \cos \alpha; y = u \sin \alpha - v \cos \alpha$.

29. Find the Jacobian, if $u=x^3/y$ and $v=y^3/x$.
30. Find $\partial(u, v)/\partial(x, y)$, for the transformation $2x + 3y = u$; $x - 2y = v$
31. Find the Jacobian, if $x = r\cos\theta$ and $y = r\sin\theta$ and $z = z$.
32. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ where $\mathbf{f}=(x^2+y^2)\mathbf{i}+(x^2-y^2)\mathbf{j}$ and C is the curve $y = x^2$ joining (0,0) and (1,1).
33. Find $\int_C \mathbf{f} \cdot d\mathbf{r}$ if $\mathbf{f} = x^2\mathbf{i} - xy\mathbf{j}$ and C is the straight line joining the points (0,0) and (1,1).
34. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ along the path C given by $x=2t^2, y=t, z=t^3$ from $t=0$ and $t=1$ if $\mathbf{f}=(2y+3)\mathbf{i}+xz\mathbf{j}+(yz-x)\mathbf{k}$.
35. Evaluate $\int_{(1,1)}^{(4,2)} \mathbf{f} \cdot d\mathbf{r}$ where $\mathbf{f}=(x+y)\mathbf{i}+(y-x)\mathbf{j}$ along the straight line joining (1,1) and (4,2).
43. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ where C is the curve $x=2t^2, y=t, z=t^3$ from $0 \leq t \leq 1$ if $\mathbf{f} = (2y+3)\mathbf{i} + xz\mathbf{j} + (yz-x)\mathbf{k}$.
36. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ where C is the curve $x=2t, y=t, z=t^3$ from $0 \leq t \leq 1$ if $\mathbf{f} = (2y+3)\mathbf{i} + xz\mathbf{j} + (yz-x)\mathbf{k}$.
37. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ where C is the curve $x=t, y=t, z=t$ if $\mathbf{f} = (3x-2y)\mathbf{i} + (y+2z)\mathbf{j} + x^2\mathbf{k}$.

UNIT IV

38. State Stoke's Theorem.
39. By using Stoke's theorem prove that $\int_C \mathbf{r} \cdot d\mathbf{r} = 0$ where $\mathbf{r} = x\mathbf{i} + y\mathbf{j} + z\mathbf{k}$.
40. Evaluate by using Stoke's theorem $\int_C (yzdx + zx dy + xydz)$ where C is the curve $x^2 + y^2 = 1, z = y^2$.
41. Prove that for a closed surface S, $\iint_S \mathbf{r} \cdot \mathbf{n} ds = 3V$ where V is the volume enclosed by S.
42. State Green's Theorem.
43. State Gauss Divergence Theorem.
44. Evaluate by using Green's theorem $\int_C (x^2 + y^2) dx - 2xydy$ where C is the rectangle in the x-y plane bounded by $y=0, y=b, x=0$ and $x=a$.

UNIT V

45. Prove that $\beta(m, n) = \beta(n, m)$
46. Prove that $\Gamma(n + 1) = n!$
47. prove that $\Gamma(1) = 1$
48. Prove that $\Gamma\left(\frac{1}{2}\right) = \sqrt{\pi}$
49. Define Beta and Gamma Functions
50. Prove that $\Gamma(n + 1) = n \Gamma(n)$
51. Prove that $\beta(m, n) = \beta(m + 1, n) + \beta(m, n + 1)$
52. Prove that $\beta(m, n) = 2 \int_0^{\pi/2} (\sin x)^{2m-1} (\cos x)^{2n-1} dx$

53. Evaluate $\int_0^{\infty} x^4 e^{-x} dx$
54. Prove that $\int_0^{\infty} x^8 (1 - x^6) / (1 + x)^{24} dx = 0$
55. Evaluate $\Gamma\left(\frac{1}{2}\right) \Gamma\left(\frac{3}{2}\right) \Gamma\left(\frac{5}{2}\right)$
56. Evaluate $\Gamma(6) / \Gamma(3)$
57. Evaluate $I = \int_0^1 x^4 (1 - x)^3 dx$
58. Evaluate $\beta(3, 5) \Gamma(3)$
59. Evaluate $\int_0^{\infty} x^6 e^{-3x} dx$
60. Evaluate $\beta(3, 5) \Gamma(3) \Gamma(5)$
61. Evaluate $\int_0^{\pi/2} \sin^2 x dx$

Section-C (5 marks)

UNIT I

1. Eliminate the arbitrary constants a, b, c from $x^2/a^2 + y^2/b^2 + z^2/c^2$ and form a differential equation.
2. Eliminating the arbitrary functions f and g from $z = f(x+ay) + g(x-ay)$ form a partial differential equation.
3. Solve the Lagrange's equation $p \cot x + q \cot y = \cot z$.
4. Solve the Lagrange's equation $p\sqrt{x} + q\sqrt{y} = \sqrt{z}$
5. Solve the Lagrange's equation $(y^2 + z^2) p - xyq + xz = 0$.
6. Solve $pq + p + q = 0$
7. Solve $z = px + qy + (q/p) - p$
8. Solve $z = px + qy + pq$
9. Solve: $z = px + qy + p^2 + q^2$
10. Solve: $4(1+z^3) = 9z^4 pq$

UNIT II

11. Find $L^{-1}[cs + d / ((s+a)^2 + b^2)]$
12. Find $L^{-1}[1 + 2s / ((s+2)^2 (s-1)^2)]$
13. Find the Laplace transform of $t^2 + \cos 2t \cos t + \sin^2 2t$
14. Find the Laplace transform of $f(t) = \begin{cases} e^{-t} & \text{if } 0 < t < 4 \\ 0 & \text{if } t \geq 4 \end{cases}$
15. If $L[f(x)] = F(s)$ and if $\lim_{x \rightarrow 0} f(x)/x$ exists then $L[f(x)/x] = \int_s^{\infty} F(s) ds$
16. Find $L(1 - \cos x/x)$
17. Find the Laplace transform of $(1 - \cos 2x)/x$
18. Solve $\frac{dx}{dt} + ax = y$; $\frac{dy}{dt} + ay = x$ given $x=0$ and $y=1$ when $t=0$
19. Solve $y' + 3y = e^{-2x}$ given $y(0) = 4$
20. Find $L^{-1}[1/s(s+1)(s+2)]$
21. Find $L^{-1}[s^2 - s + 2/s(s-3)(s+2)]$

22. Find the Laplace transform for the following $f(x) = \begin{cases} \sin x & \text{if } 0 < x < \pi \\ 0 & \text{if } x \geq \pi \end{cases}$

UNIT III

23. Find $\partial(u, v)/\partial(x, y)$ if $u=x+y/1-xy$ and $v=\tan^{-1}x+\tan^{-1}y$.
24. Find J if $x=r \cos\theta \cos\phi$; $y = \cos\theta \sin \phi$; $z = r \sin \theta$.
25. Find $(\partial(u, v)/\partial(x, y))$ if $u =x+y$ and $v=x-y$ and $x=r \cos \theta, y=r \sin \theta$.
26. Find $(\partial(x, y)/\partial(r, \theta))$ if $u =x+y$ and $v=x-y$ and $x=r \cos \theta, y=r \sin \theta$.
27. Find $\partial(u, v)/\partial(x, y)$ if $x =u \cos v$ and $y= u \sin v$.
28. Show that $(\partial(x, y)/\partial(u, v)) \times (\partial(u, v)/\partial(x, y)) = 1$ if $x=e^u \cos v$ and $y=e^v \sin v$.
29. Find $\partial(u, v)/\partial(r, \theta)$ if $u=2xy$, $v=x^2-y^2$, $x= r \cos \theta$ and $y= r \sin \theta$.
30. Find J if $x= r \sin\theta \cos\phi$; $y = r \sin\theta \sin \phi$; $z = r \cos\theta$.
31. Evaluate $\int_C f \cdot dr$ where $f = (x^2+y^2) \mathbf{i} - 2xy \mathbf{j}$ and the curve C is the rectangle in the x - y plane bounded by $y=0, y=b, x=0, x=a$.
32. Find the work done by the force $F= 3xy \mathbf{i} - 5z \mathbf{j} + 10xz \mathbf{k}$ along the curve $C, x=t^2+1; y=2t^2; z=t^3$ from $t=1$ and $t=2$.
33. Evaluate $\int_C f \cdot dr$ where $f=(x-y) \mathbf{i} +(y-2x) \mathbf{j}$ and C is the closed curve in the x - y plane $x=2 \cos t, y=3 \sin t$ from $t=0$ and $t=2\pi$.
34. Evaluate $\int_{(1,1)}^{(4,2)} f \cdot dr$ where $f=(x+y) \mathbf{i} +(y-x) \mathbf{j}$ along the
(i) the parabola $y^2=x$
(ii) straight line joining $(1,1)$ and $(4,2)$
35. Find the work done in moving a particle in a force field $F= 3x^2 \mathbf{i} + (2xz - y) \mathbf{j} + z \mathbf{k}$ along the line joining the points $(0, 0, 0)$ to $(2, 1, 3)$.
36. Find the work done in moving a particle in a force field $F = 2xy \mathbf{i} - 3x \mathbf{j} - 5z \mathbf{k}$ along the curve $C, x=t; y=t^2+1; z=2t^2$; from $t=1$ to $t=2$.

UNIT III

37. Evaluate $\iint_S (\nabla \times f) \cdot n \, dS$ where $f=y^2 \mathbf{i} + y \mathbf{j} -xz \mathbf{k}$ and S is the upper half of the sphere $x^2 + y^2 + z^2 = a^2$ and $z \geq 0$.
38. Prove that for a closed surface $S, \iint_S r \cdot n \, dS = 3V$ where V is the volume enclosed by S .
39. Evaluate by using Stoke's theorem $\int_C (yz \, dx + zx \, dy + xy \, dz)$ Where C is the curve $x^2 + y^2 = 1, z=y^2$
40. Evaluate $\int_C (e^x \, dx + 2y \, dy - dz)$ by using Stoke's theorem where C is the curve $x^2 + y^2 = 4, z=2$.
41. Evaluate $\iint_S f \cdot n \, dS$ where $f = (x + y^2) \mathbf{i} - 2x \mathbf{j} + 2yz \mathbf{k}$ and S is the surface of the plane $2x + y + 2z = 6$ in the first octant.
42. Evaluate $\iint_S f \cdot n \, dS$ where $f=(x^3-yz) \mathbf{i} - 2x^2 y \mathbf{j} + 2z \mathbf{k}$ and S is the surface of the cube bounded by $x=0, y=0, z=0; x=a; y=a; z=a$.

UNIT V

43. Prove that $\beta(m, n) = \int_0^\infty \frac{x^{m-1}}{(1+x)^{m+n}} dx$
44. Prove that $\Gamma(n+1) = n \Gamma(n)$ and $\Gamma(n+1) = n!$
45. Prove that $\Gamma(n) = 2 \int_0^\infty e^{-y^2} y^{2n-1} dy$
46. Prove that $\beta(m, n+1)/n = \beta(m+1, n)/m = \beta(m, n)/(m+n)$
47. $\Gamma(n) = \int_0^\infty [\log(\frac{1}{x})]^{n-1} dx$
48. Prove that $\int_0^{\pi/2} \sin^n x dx = \sqrt{\pi}/2 (\Gamma(n+1/2)/\Gamma(n+2/2)) = \int_0^{\pi/2} \cos^n x dx$. Hence evaluate $\int_0^{\pi/2} \sin^5 x dx$
49. Prove that $\int_0^{\pi/2} \sin^m x \cos^n x dx = 1/2 \beta(m+1/2, n+1/2)$. Hence find $\int_0^{\pi/2} \sin^6 x \cos^8 x dx$
50. Show that $\Gamma(n+1/2) = (1.3.5 \dots (2n-1)/2^n) \sqrt{\pi}$
51. Prove that $\beta(m, n) = 2 \int_0^{\pi/2} (\sin x)^{2m-1} (\cos x)^{2n-1} dx$ and Evaluate $\int_0^{\pi/2} \sin^3 x \cos^5 x dx$
52. Show that $\int_0^{\pi/2} d\theta / \sqrt{\cos \theta} = \frac{\Gamma(\frac{1}{4})}{2\Gamma(\frac{3}{4})} \sqrt{\pi}$
53. Prove that $\Gamma(n+1/2) = (2n)! \sqrt{\pi}/4^n n!$
54. Evaluate $\int_0^\infty x^6 e^{-3x} dx$
55. Prove that $\int_0^\infty \frac{e^{-st}}{\sqrt{t}} dt = \sqrt{\frac{\pi}{s}}$ where $s > 0$

Section-D (10 marks)

UNIT I

1. Find the general solution of $x(y^2 - z^2)p + y(z^2 - x^2)q = z(x^2 - y^2)$
2. Solve : $x^2(y-z)p + y^2(z-x)q = z^2(x-y)$
3. Solve : $x(y^2+z)p - y(x^2+z)q = (x^2-y^2)z$
4. Solve : $(x^2-yz)p + (y^2-zx)q = z^2 - xy$
5. Solve: $(y+z)p + (z+x)q = x+y$
6. Solve : $z = px + qy + \sqrt{\alpha p^2 + \beta q^2 + \gamma}$
7. Solve: $9(p^2z + q^2) = 4$
8. Solve: $z^2(p^2z^2 + q^2) = 1$
9. Solve: $q - p = y - x$

UNIT II

10. Find $L^{-1}[1/s(s+1)(s+2)]$
11. Find $L^{-1}[s^2 - s + 2/s(s-3)(s+2)]$
12. Find $L^{-1}[\log(s+a/s+b)]$
13. Find $L^{-1}[\frac{(1-s)}{(s+1)(s^2+4s+13)}]$
14. Using Laplace transform solve $y'' + 4y' + 13y = 2e^{-x}$ given $y(0) = 0$ and $y'(0) = -1$
15. Using Laplace transform solve $xy'' - (2+x)y' + 3y = x-1$ when $y(0) = 0$
16. Using Laplace transform solve
 - a. $dx/dt + y = \sin t$
 - b. $dy/dt + x = \cos t$ given $x(0) = 2$ and $y(0) = 0$

17. Using Laplace transform solve: $y' + 3y = e^{-2x}$ given $y(0) = 4$
18. Using Laplace transform solve $y'' + 3y' + 2y = 0$ given that $y(0) = 1$ and $y'(0) = 2$
19. Using Laplace transform Solve $y'' + 4y' + 4y = e^{-x}$ given that $y(0) = 0 = y'(0)$
20. Using Laplace transform Solve $xy'' - (1+x)y' + 2y = (x-1)$ given that $y(0) = 0$

UNIT III

21. Prove that $\left(\frac{\partial(u,v)}{\partial(x,y)}\right) \times \left(\frac{\partial(x,y)}{\partial(r,\theta)}\right) = \left(\frac{\partial(u,v)}{\partial(r,\theta)}\right)$ if $u = x + y$, $v = x - y$ and $x = r\cos\theta$ and $y = r\sin\theta$.
 - (i) Find $\frac{\partial(u,v)}{\partial(x,y)}$ if $u = x+y/1-xy$ and $v = \tan^{-1}x + \tan^{-1}y$
 - (ii) Find $\frac{\partial(u,v)}{\partial(r,\theta)}$ if $u = 2xy$, $v = x^2 - y^2$, $x = r\cos\theta$ and $y = r\sin\theta$ find $\partial(u,v)/\partial(r,\theta)$
22. Find the Jacobian for the following: (a) $x+y=u$; $y=uv$; (b) $2x+3y=u$; $x-2y=v$;
23. Prove that $\left(\frac{\partial(u,v)}{\partial(x,y)}\right) \times \left(\frac{\partial(x,y)}{\partial(u,v)}\right) = 1$ if $x = u\cos v$ and $y = u\sin v$.
24. Find the Jacobian if $x = r\cos\theta\cos\phi$; $y = r\cos\theta\sin\phi$; $z = r\sin\theta$
25. If $\mathbf{f} = (2y+3)\mathbf{i} + xz\mathbf{j} + (yz-x)\mathbf{k}$ evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ along the following paths C.
 - (i) $x = 2t^2$; $y=t$; $z=t^3$ from $t=0$ to $t=1$;
 - (ii) The polygonal path P consisting of the three line segments AB, BC and CD where $A(0,0,0)$, $B(0,0,1)$, $C(0,1,1)$ and $D(2,1,1)$
 - (iii) The straight line joining $(0,0,0)$ and $(2,1,1)$
26. If $\mathbf{f} = (3x-2y)\mathbf{i} + (y+2z)\mathbf{j} + x^2\mathbf{k}$ evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ from $(0,0,0)$ to $(1,1,1)$ where C is the path consisting of
 - (i) the curve $x=t$; $y=t^2$; $z=t^3$
 - (ii) The straight line joining $(0,0,0)$ and $(1,1,1)$
 - (iii) The straight lines from $(0,0,0)$ to $(0,1,0)$ then to $(0,1,1)$ and then to $(1,1,1)$
27. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ where $\mathbf{f} = 3x^2\mathbf{i} + (2xz - y)\mathbf{j} + z\mathbf{k}$ along
 - (i) The straight line joining $(0,0,0)$ and $(2,1,3)$
 - (ii) The space curve $x = 2t^2$; $y = t$; $z = 4t^2 - 1$ from $t = 0$ to $t = 1$
 - (iii) The curve defined by $x^2 = 4y$; $3x^2 = 8z$ from $x = 0$ to $x = 2$

UNIT IV

28. Verify Stoke's theorem for the vector function $\mathbf{f} = 2y\mathbf{i} + 3xz\mathbf{j} - z^2\mathbf{k}$ where S is the upper half of the sphere $x^2 + y^2 + z^2 = 9$.
29. Verify Stoke's theorem for the vector function $\mathbf{f} = y^2\mathbf{i} + yz\mathbf{j} - xz\mathbf{k}$ and S is the upper half of the sphere $x^2 + y^2 + z^2 = a^2$ and $z \geq 0$

30. Verify Stoke's theorem for the vector function $\mathbf{f} = (2x - y) \mathbf{i} + yz^2 \mathbf{j} - y^2 z \mathbf{k}$ and S is the upper half surface of the sphere $x^2 + y^2 + z^2 = 1$ and C its boundary.
31. Verify Stoke's theorem for the vector function $\mathbf{f} = (x^2 - y^2) \mathbf{i} + 2xy \mathbf{j}$ in the rectangular region $x = 0$; $y = 0$; $x = a$; $x = b$.
32. Verify Green's theorem for the function $\mathbf{f} = (x^2 + y^2) \mathbf{i} - 2xy \mathbf{j}$ and C is the rectangle in the x-y plane bounded by $y=0, y=b, x=0$ and $x=a$.
33. Verify Green's theorem in the plane for $\int_C (x^2 - xy^3)dx + (y^2 - 2xy)dy$ where C is the square with vertices (0,0),(2,0),(2,2) and (0,2)
34. Verify Gauss divergence theorem for $\mathbf{f} = y\mathbf{i} + x\mathbf{j} + z^2\mathbf{k}$ for the cylindrical region S given by $x^2 + y^2 = a^2$; $z=0$ and $z=h$.
35. Verify Gauss divergence theorem for $\mathbf{f} = (x^2 - yz) \mathbf{i} + (y^2 - zx) \mathbf{j} + (z^2 - xy) \mathbf{k}$ taken over the rectangular parallelepiped $0 \leq x \leq a, 0 \leq y \leq b, 0 \leq z \leq c$.
36. Verify Gauss divergence theorem for $\mathbf{f} = (2x - z) \mathbf{i} + x^2 y \mathbf{j} - xz^2 \mathbf{k}$ taken over the region bounded by $x=0, x=1, y=0, y=1, z=0, z=1$

UNIT V

21. Prove that $2^{2n-1} \Gamma(n) \Gamma(n+1/2) = \Gamma(2n) \sqrt{\pi}$
22. State and Prove Duplication formula
23. Prove that $\beta(m, n) = \frac{\Gamma(m)\Gamma(n)}{\Gamma(m+n)}$
24. Prove that $\int_0^{\pi/2} \sin^m x \cos^n x dx = 1/2 \beta(m+1/2, n+1/2)$. Hence find (i) $\int_0^{\pi/2} \sin^6 x \cos^8 x dx$
(ii) $\int_0^{\pi/2} \sin^5 x \cos^6 x dx$ (iii) $\int_0^{\pi/2} \sin^9 x \cos^{10} x dx$
25. Prove that $\int_0^1 \frac{x^2 dx}{(1-x^4)^{1/2}} \times \int_0^1 \frac{dx}{(1+x^4)^{1/2}} = \frac{\pi}{4\sqrt{2}}$
26. Prove that $\int_0^{\pi/2} \sin^n x dx = \frac{\sqrt{\pi}}{2} \left(\frac{\Gamma(\frac{n+1}{2})}{\Gamma(\frac{n+2}{2})} \right) = \int_0^{\pi/2} \cos^n x dx$. Also evaluate the following
(i) $\int_0^{\pi/2} \sin^5 x dx$ (ii) $\int_0^{\pi/2} \cos^8 x dx$ (iii) $\int_0^{\pi/2} \cos^{10} x dx$
27. Prove that $\int_0^{\pi/2} \frac{d\theta}{\sqrt{\sin \theta}} \int_0^{\pi/2} \sqrt{\sin \theta} d\theta = \pi$

QUESTION BANK

II B.Sc Mathematics

Subject Code: 21UMAC31

Semester III

Core 1- Sequences and Series, Trigonometry

Section-A

UNIT- I

1. The existence of a unique positive n^{th} root of a is denoted by _____
a) \sqrt{a} b) $\sqrt[n]{a}$ c) $\sqrt[n]{a}$ d) a^n
2. If $S = \left\{ \frac{1}{n} - \frac{1}{m} : n, m \in \mathbb{N} \right\}$ then $\sup S =$ _____
a) $\frac{1}{n}$ b) n c) $\frac{1}{m}$ d) m
3. Every non empty set of real numbers that has _____
a) a lower bound and supremum **b) an upper bound and a supremum**
c) lower bound & a infimum d) an upper bound & a infimum
4. The supremum of a set _____
a) may be an element of the set b) may not be an element of the set
c) may or may not be an element of the set d) none of the above
5. The infimum of the set $\{x \in \mathbb{R} : 2x + 5 > 0\} =$ _____
a) 1 b) 0 **c) -5/2** d) -1
6. “If x and y are any real numbers with $x > y$, then there exists a rational number $r \in \mathbb{Q}$ such that $x < r < y$ ” is called _____
a) Convergence theorem **b) The density theorem**
c) Archimedean property d) The completeness property
7. Let $S = \left\{ \frac{1}{n} : n \in \mathbb{N} \right\}$ then $\sup S =$ _____
a) 0 **b) 1** (c) -1 (d) infinity
8. Let $S = \left\{ \frac{1}{n} : n \in \mathbb{N} \right\}$ then $\inf S =$ _____
a) **0** b) 1 (c) -1 (d) infinity
9. If $x \in \mathbb{R}$, then there exists $n_x \in \mathbb{N}$ such that $x \leq n_x$ is called _____
a) Convergence theorem b) The density theorem
c) **Archimedean property** d) The completeness property

10. Let S be a nonempty subset of \mathbb{R} that is bounded below, then $\inf S =$ _____

- a) $\sup \{-s : s \in S\}$ b) $-\sup \{s : s \in S\}$ c) $\sup \{s : s \in S\}$ **d) $-\sup \{-s : s \in S\}$**

UNIT-II

11. The range of the sequence $(1+(-1)^n)$ is-----

- (a) \mathbb{N} (b) \mathbb{Z} (c) $\{0,1\}$ **(d) $\{0,2\}$**

12. The sequence $1, -1, 1, -1, \dots$ is represented as-----

- (a) $(-1)^n$ (b) $((-1)^n)$ **(c) $((-1)^{n+1})$** (d) $(-1)^{n+1}$

13. The sequence $1, 1, 2, 3, 5, 8, 13, \dots$ is called as-----

- (a) Fibonacci's sequence** (b) subsequence
(c) Geometric progression (d) Arithmetic Progression

14. The function $f: \mathbb{N} \rightarrow \mathbb{R}$ defined by $f(n) = n/n+1$ determines the ssequence-----

- (a) $1/2, 1/3, 1/4, \dots$ (b) $1/2, 2/3, 3/4, \dots$
(c) $1, 1/2, 2/3, 3/4, \dots$ (d) $0, 1, 1, 2, 2, 3, 3, \dots$

15. The range of the sequence given by the equation $f(n) = [n/4]$ where $[x]$ denotes the integral part of x is-----

- (a) $\mathbb{N} \cup \{0\}$** (b) \mathbb{N} (c) \mathbb{Z} (d) \mathbb{Q}

16. The following statements are false except

- (a) The range of the sequence is an infinite set
(b) Any bounded sequence is convergent
(c) Any constant sequence is convergent
(d) Any monotonic sequence is convergent

17. In the sequence $1, 1/2, 1/3, \dots, 1/n, \dots$ the l.u.b and g.l.b of the sequence is-----

- (a) $1, 0$** (b) $0, 1$ (c) $1, 1$ (d) $2, 0$

18. A monotonic increasing sequence which is bounded above-----

- (a) converges to its l.u.b** (b) diverges to its l.u.b
(c) converges to g.l.b (d) diverges to g.l.b

19. If $(a_n) \rightarrow a$ and $a_n \geq 0$ for all n and $a \neq 0$, then-----

- (a) $(a_n) \rightarrow \infty$ (b) $(a_n) \rightarrow 0$ (c) $(a_n) \rightarrow (1/a)$ **(d) $(\sqrt{a_n}) \rightarrow (\sqrt{a})$**

UNIT III

20. A monotonic increasing sequence has no -----
(a) limit point **(b) peak point** (c) subsequence (d) positive terms
21. Another name of limit point is called -----
(a) peak point **(b) cluster point** (c) positive point (d) real point
22. Every bounded sequence has -----limit point.
(a) finite (b) infinite **(c) atleast one** (d) atleast three
23. The limit points of the sequence $1, -1, 2, -2, \dots, n, -n, \dots$ is
(a) $\infty, -\infty$ (b) $0, 1$ (c) $1, 2$ (d) $2, 3$
24. Example of a cauchy sequence is-----
(a) $1/n$ (b) (n) (c) $((-1)^n)$ (d) (n^2)
25. The following are subsequences of $(1/n)$ except-----
(a) $1, 1/3, 1/5, \dots, 1/2n-1, \dots$ (b) $1/2, 1/4, 1/6, \dots, 1/2n, \dots$
(c) $1, 1/4, 1/8, \dots, 1/4n, \dots$ **(d) $1, 1/2, 1/2, 1/3, 1/3, 1/3, \dots$**
26. Any convergent sequence is a -----
(a) Cauchy sequence (b) Subsequence (c) positive sequence (d) negative sequence
27. Any Cauchy sequence of real numbers -----
(a) is convergent (b) is divergent (c) tends to 0 (d) tends to 1
28. A sequence (a_n) in \mathbb{R} is convergent iff it is a -----
(a) convergent sequence (b) divergent sequence
(c) cauchy sequence (d) oscillating sequence
29. Consider the sequence $1, 1/2, 1/3, -1, -1, \dots$. The peak points of the sequence are-----

(a) 1, 2, 3 (b) $-1, 1, -1$ (c) $2, 3, 4$ (d) $1/2, 1/3, 1/4$

UNIT IV

30. $\sum (1/2^n)$ converges to the sum-----
(a) 1 (b) 0 (c) $1/2$ (d) 2
31. The following are true except -----
(a) $1+1+1+\dots$ is divergent series diverging to ∞

- (b) $1+1+1+\dots$ is an oscillating sequence oscillating finitely
 (c) $1+1/2+1/3+\dots+1/n+\dots$ is a divergent series diverges to ∞ .
 (d) $1+1/1!+1/2!+\dots+1/n!+\dots$ **diverges to ∞**

32. The series $1+1/2+1/3+1/4+\dots+1/n+\dots$

- (a) converges. **(b) diverges** (c) absolutely convergent (d) oscillates

33. (a) The series $\sum_{n=1}^{\infty} \frac{1}{n^p}$ converges if $p < 1$

(b) The series $\sum_{n=1}^{\infty} \frac{1}{n^p}$ diverges if $p \geq 1$

The correct statement is -----

- (a) Only (a) is false. (b) Only (b) is false
 (c) **Both (a) and (b) are false.** (d) Both (a) and (b) are true

34. D'Alembert's Ratio test can be derived from Kummer's Test for a given series of positive $\sum a_n$ by taking the n th term d_n of the series of positive terms $\sum 1/d_n$ as

- (a) $d_n=1$ (b) $d_n=n$ (c) $d_n=n \log n$ (d) $d_n=\log n$

35. Let $\sum a_n$ be a series of positive terms. Then $\sum a_n$ is -----

- (a) convergent if $\lim_{n \rightarrow \infty} a_n^{1/n} > 1$ **(b) convergent if $\lim_{n \rightarrow \infty} a_n^{1/n} < 1$**
 (c) divergent if $\lim_{n \rightarrow \infty} a_n^{1/n} < 1$ (d) divergent if $\lim_{n \rightarrow \infty} a_n^{1/n} = 1$.

36. If $\sum a_n$ is convergent then $\sum a_n^2$ is -----

- (a) convergent** (b) divergent (c) oscillating
 (d) infinitely oscillating

37. The series $1/3+1.2/3.5+1.2.3/3.5.7+\dots$

- (a) oscillating **(b) converges** (c) diverges
 (d) infinitely oscillating

38. Applying Cauchy's root test the series $\sum_{n=1}^{\infty} (n/2n+1)^n$ is -----

- (a) convergent** (b) divergent
 (c) neither convergent nor divergent (d) both convergent and divergent

39. Let $\sum a_n$ be a series of positive terms. Then $\sum a_n$ is convergent if $\lim_{n \rightarrow \infty} a_n/a_{n+1} > 1$ and divergent if $\lim_{n \rightarrow \infty} a_n/a_{n+1} < 1$. This test is known as -----

- (a) Cauchy's root test **(b) D'Alembert's Ratio test** (c) Gauss Test (d) Raabe's Test

UNIT V

40. $\sinh 2x =$

- (a) $2 \sinh x$ (b) $2 \sin x \cos x$
(c) **$2 \sinh x \cosh x$** (d) $2 \sinh \frac{x}{2} \cosh \frac{x}{2}$

41. $\sinh x =$

- (a) $\sin(ix)$ (b) $i \sin(ix)$ (c) **$-i \sin(ix)$** (d) $i \sin x$

42. The function $y = \sinh x$ is a 1-1 and onto map from

- (a) $\mathbf{R \rightarrow R}$ (b) $R \rightarrow [1, \infty)$ (c) $R \rightarrow (-1, 1)$ (d) $[1, \infty) \rightarrow R$

43. The function $y = \cosh x$ is a map from

- (a) $R \rightarrow R$ (b) **$R \rightarrow [1, \infty)$** (c) $R \rightarrow (-1, 1)$ (d) $[1, \infty) \rightarrow R$

44. The function $y = \tanh x$ is a map from

- (a) $R \rightarrow R$ (b) $R \rightarrow [1, \infty)$ (c) **$R \rightarrow (-1, 1)$** (d) $[1, \infty) \rightarrow R$

45. $\sinh^{-1} x =$

- (a) **$\log_e(x + \sqrt{x^2 + 1})$**
(b) $\log_e(x + \sqrt{x^2 - 1})$
(c) $\log_e(x - \sqrt{x^2 + 1})$
(d) $\log_e(x - \sqrt{x^2 - 1})$

46. If the general values of $\log z$ are denoted by z , then $\text{Log } z =$

- (a) $\log(r + 2n\pi)$ (b) **$\log r + i(\theta + 2n\pi)$** (c) $\log(\sqrt{x^2 + y^2})$ (d) $\log r$

47. Since $\text{Log } z$ has infinite no of values for z , z^ω has

- (a) finite number of values (b) **infinite number of values**
(c) the values 0 and 1 (d) no value

48. The series mainly utilized to calculate and approximate the value of π is

- (a) Binomial series (b) Exponential series
(c) Logarithmic series (d) **Gregory's series**

49. The values of $\cosh 0$ and $\sinh 0$ respectively are

- (a) **1 and 0** (b) 0 and 1 (c) -1 and 0 (d) 0 and π

Section-B

UNIT- I

1. Define bounded above?
2. Define lower bound?
3. Define supremum?

4. Define infimum?
5. Find infimum and supremum, if they exists, of the set $A = \{x \in \mathbb{R} : 2x + 5 > 0\}$.
6. Find infimum and supremum, if they exists, of the set $A = \{x \in \mathbb{R} : x^2 - 2x - 5 < 0\}$.
7. Find infimum and supremum, if they exists, of the set $A = \{x \in \mathbb{R} : x + 2 \geq x^2\}$.
8. Let $S_1 = \{x \in \mathbb{R} : x \geq 0\}$. Show in detail that the set S_1 has lower bounds, but no upper bounds.
Show that $\inf S_1 = 0$.
9. Define a bounded below function.
10. Prove that if $t > 0$, there exists $n_t \in \mathbb{N}$ such that $0 < \frac{1}{n_t} < t$.

UNIT II

11. Define sequence.
12. Write the first five terms of the sequences $\left(\frac{\cos nx}{n^2 + x^2}\right)$.
13. Determine the range of the following sequences (i) (n) (ii) $(2n-1)$
14. Define bounded sequence.
15. Give example of sequence (a_n) such that (a_n) is bounded above but not bounded below.
16. Define monotonic.
17. Define convergent sequence.
18. Prove that $\lim_{n \rightarrow \infty} \frac{n+1}{n} = 1$
19. If $(a_n) \rightarrow l$, then prove that $(|a_n|) \rightarrow |l|$
20. Show that $\lim_{n \rightarrow \infty} \frac{\sin n}{n} = 0$

UNIT III

21. Show that $\lim_{n \rightarrow \infty} \frac{1}{n} \left(1 + \frac{1}{2} + \dots + \frac{1}{n}\right) = 0$.
22. Show that $\lim_{n \rightarrow \infty} n^{1/n} = 1$
23. Prove that $\lim_{n \rightarrow \infty} \left(1 + \frac{1}{n-1}\right)^n = e$
24. Define subsequence with example.
25. Is a subsequence of non convergent sequence a convergent sequence?
26. Define peak point.

27. Define cluster point.
28. Find the limit point of the sequence 1,0,1,0,.....
29. Define Cauchy sequence.
30. Prove that $(1/n)$ is a Cauchy sequence.
31. Prove that (n) is not a Cauchy sequence.
32. Prove that any convergent sequence is a Cauchy sequence.

UNIT IV

33. Define infinite series with suitable example.
34. Let $\sum a_n$ be a convergent series converging to the sum s . Then Prove that $\lim_{n \rightarrow \infty} a_n = 0$.
35. Discuss the convergence of the series $\sum \frac{1}{\sqrt{n^3+1}}$
36. Discuss the convergence of the series $\sum_3^\infty (\log \log n) n^{-\log n}$
37. Test the convergence of $\sum \frac{n^n}{n!}$
38. Test the convergence of the series $\sum \frac{n^2+1}{5^n}$
39. Test the convergence of the series $\frac{1}{3} + \frac{1.2}{3.5} + \frac{1.2.3}{3.5.7} + \dots$
40. Test the convergence of the series $\sum \frac{x^n}{n}$
41. Test the convergence of $\sum \frac{1}{(\log n)^n}$.
42. Test the convergence of $(1 + \frac{1}{n})^{-n^2}$
43. Test the convergence of $\sum \frac{1}{n \log n}$.
44. Test the convergence of the series $\sum 1/n (\log n)^p$
45. Discuss the convergence of the series $\sum \frac{\sqrt{n}}{n^2-1}$.
46. State Cauchy's condensation test.

UNIT V

47. Define any three hyperbolic functions.
48. If $x + iy = \sin(A + iB)$ prove that $\frac{x^2}{\sin^2 A} - \frac{y^2}{\cos^2 A} = 1$.
49. Prove that $\cosh 2x = 2 \cosh^2 x - 1 = 1 + 2 \sinh^2 x$.

50. Prove that $\tanh(x - y) = \frac{\tanh x - \tanh y}{1 - \tanh x \tanh y}$.
51. Prove that $\frac{1}{2}(\sin \theta + \sinh \theta) = \frac{\theta}{1!} + \frac{\theta^5}{5!} + \frac{\theta^9}{9!} + \dots$.
52. Find $\text{Log}(1 - i)$.
53. Prove that $\text{Log } i = i(4n + 1)\left(\frac{\pi}{2}\right)$.
54. Prove that $\text{Log}(-1) = i(2n + 1)\pi$.
55. If $-1 \leq x \leq 1$ then prove that $\tan^{-1}x = x - \frac{1}{3}x^3 + \frac{1}{5}x^5 - \dots$.
56. When x lies between $-\frac{\pi}{4}$ and $\frac{\pi}{4}$ show that

$$\tan x - \frac{\tan^3 x}{3} + \frac{\tan^5 x}{5} - \dots = \tanh x + \frac{\tanh^3 x}{3} + \frac{\tanh^5 x}{5} + \dots$$

Section-C

UNIT- I

1. Let $S_2 := \{x \in \mathbb{R} : x > 0\}$. Does S_2 have lower bounds? Does S_2 have upper bounds? Does $\inf S_2$ exist? Does $\sup S_2$ exist? Prove your statements.
2. Let $S_3 = \{1/n : n \in \mathbb{N}\}$. Show that $\sup S_3 = 1$ and $\inf S_3 \geq 0$. (It will follow from the Archimedean Property in Section 2.4 that $\inf S_3 = 0$.)
3. Let $S_4 := \{1 - (-1)^n/n : n \in \mathbb{N}\}$. Find $\inf S_4$ and $\sup S_4$.
4. If a set $S \subseteq \mathbb{R}$ contains one of its upper bounds, show that this upper bound is the supremum of S .
5. If $S = \left\{\frac{1}{n} - \frac{1}{m} : n, m \in \mathbb{N}\right\}$, find $\inf(S)$ and $\sup(S)$.
6. Let $S \subseteq \mathbb{R}$ and suppose that $s^* = \sup S$ belongs to S . If $u \notin S$, show that $\sup(S \cup \{u\}) = \sup\{s^*, u\}$.
7. Let $S \subseteq \mathbb{R}$ be nonempty. Show that $u \in \mathbb{R}$ is an upper bound of S if and only if the conditions $t \in \mathbb{R}$ and $t > u$ imply that $t \notin S$.
8. Let S be a nonempty bounded set in \mathbb{R} . Let $a > 0$, and let $aS := \{as : s \in S\}$. Prove that $\inf(aS) = a \inf S$, $\sup(aS) = a \sup S$.
9. Let A and B be bounded nonempty subsets of \mathbb{R} , and let $A+B := \{a+b : a \in A, b \in B\}$. Prove that $\sup(A+B) = \sup A + \sup B$ and $\inf(A+B) = \inf A + \inf B$.

UNIT II

10. Show that if (a_n) is a monotonic sequence then $(\frac{a_1 + a_2 + \dots + a_n}{n})$ is also a monotonic sequence.
11. Prove that a sequence cannot converge to two different limits.
12. Prove that the sequence $((-1)^n)$ is not convergent.
13. Prove that any convergent sequence is a bounded sequence.
14. Prove that any sequence (a_n) is diverging to ∞ is bounded below but not bounded above.
15. If $(a_n) \rightarrow a$ and $(b_n) \rightarrow b$, then $(a_n b_n) \rightarrow ab$
16. If $(a_n) \rightarrow l, (b_n) \rightarrow l$ and $a_n \leq c_n \leq b_n$ for all n , then that $(c_n) \rightarrow l$.
17. Let $(a_n) \rightarrow \infty$ Then prove that
 - a. if $c > 0, (c a_n) \rightarrow \infty$
 - b. if $c < 0, (c a_n) \rightarrow -\infty$
18. If $(a_n) \rightarrow \infty$ and $(b_n) \rightarrow \infty$, then prove that $(a_n + b_n) \rightarrow \infty$, show that $\lim_{n \rightarrow \infty} n^{1/n} = 1$
19. Show that the sequence $(1 + \frac{1}{n})^n$ converges
20. Show that if $|r| < 1$ then $(nr^n) \rightarrow 0$
21. Let (a_n) be a sequence of positive terms such that $a_1 < a_2$ and $a_{n+2} = 1/2(a_{n+1} + a_n)$. Then show that (a_{2n-1}) is a monotonic increasing sequence and (a_{2n}) is a decreasing sequence and both converge to the common limit $1/3(a_1 + 2a_2)$. Hence deduce that (a_n) converge to the same limit.

UNIT III

22. State and prove Cesaro's theorem
23. Show that $\lim_{n \rightarrow \infty} \frac{n!}{n^n} = 0$
24. Prove that $\lim_{n \rightarrow \infty} \frac{x^n}{n!} = 0$
25. Prove that $\lim_{n \rightarrow \infty} \left[\left(\frac{2}{1}\right) \left(\frac{3}{2}\right)^2 \left(\frac{4}{3}\right)^3 \dots \left(\frac{n+1}{n}\right)^n \right]^{\frac{1}{n}} = e$
26. Show that $\lim_{n \rightarrow \infty} \frac{n}{(n!)^{1/n}} = e$
27. Evaluate the limits of the following sequences whose n th terms are given below.
 - (i) $(1 + 1/n)^{n+5}$
 - (ii) $(n!)^{1/n}/n$
28. Evaluate the limits of the following sequences whose n th term is $(\frac{(2n)!}{(n!)^2})^{1/n}$
29. Show that $\lim_{n \rightarrow \infty} n! (\frac{a}{n})^n = 0$ or ∞ according as $a < e$ or $a > e$
30. If a sequence (a_n) converges to l , then prove that every subsequence (a_{n_k}) of (a_n) also converges to l .
31. If the subsequences (a_{2n-1}) and (a_{2n}) of a sequence (a_n) converge to the same limit l , then prove that (a_n) also converges to l .
32. Prove that every sequence (a_n) has a monotonic subsequence.
33. a) Prove that any convergent sequence is a Cauchy sequence.
b) Prove that every bounded sequence has atleast one limit point.
34. Prove that any Cauchy sequence is a bounded sequence.

35. Let (a_n) be a Cauchy sequence. If (a_n) has a subsequence (a_{n_k}) converging to l , then prove that $(a_n) \rightarrow l$

UNIT IV

36. Let $\sum a_n$ converge to a and $\sum b_n$ converge to b . Then prove that $\sum (a_n \pm b_n)$ converges to $a \pm b$ and $\sum k a_n$ converge to ka
37. State and prove Cauchy's general principle of convergence.
38. Apply Cauchy's general principle of convergence to show that the series $\sum (1/n)$ is not convergent.
39. Applying Cauchy's general principle of convergence prove that $1 - \left(\frac{1}{2}\right) + \left(\frac{1}{3}\right) - \dots + (-1)^n \left(\frac{1}{n}\right) + \dots$ is convergent
40. Discuss the convergence of the series $1 + \left(\frac{1}{2^2}\right) + \left(\frac{2^2}{3^3}\right) + \left(\frac{3^3}{4^4}\right) + \dots$
41. Discuss the convergence of the series $\sum \frac{1^2+2^2+\dots+n^2}{n^4+1}$
42. Show that $\sum \frac{1}{4n^2-1} = \frac{1}{2}$
43. State and prove D'Morgan Bertrand's Test.
44. State and prove D'Alembert's Ratio Test.
45. State and prove Raabe's Test.
46. State and prove Cauchy's root.
47. Test the convergence of $\sum \frac{n^3+a}{2^{n+a}}$

UNIT V

48. State and prove the relation between hyperbolic and circular trigonometric functions. Also prove that $\sinh^{-1} x = \log_e (x + \sqrt{x^2 + 1})$.
49. If $\sin(x + iy) = \tan(u + iv)$ prove that $\frac{\tan x}{\tanh y} = \frac{\sin 2u}{\sinh 2v}$.
50. Separate into real and imaginary parts
- (i) $\coth(\alpha + i\beta)$ (ii) $\operatorname{cosec}(\alpha + i\beta)$ (iii) $\operatorname{sech}(\alpha + i\beta)$
51. If $i^{a+ib} = a + ib$ prove that $a^2 + b^2 = e^{-(4n+1)\pi b}$.
52. Show that $\frac{\sin \theta}{1!} + \frac{\sin 2\theta}{2!} + \frac{\sin 3\theta}{3!} + \dots \infty = e^{\cos \theta} \sin(\sin \theta)$.
53. Sum the series to infinity
- $$1 + \frac{\cos x}{\cos x} + \frac{\cos 2x}{2! \cos^2 x} + \frac{\cos 3x}{3! \cos^3 x} + \dots \infty$$
54. Using Gregory's series sum the series $\left(\frac{2}{3} + \frac{1}{7}\right) - \frac{1}{3}\left(\frac{2}{3^3} + \frac{1}{7^3}\right) + \frac{1}{5}\left(\frac{2}{3^5} + \frac{1}{7^5}\right) - \dots$
55. If $x + iy = \cos(u + iv)$, where x, y, u, v are real prove that
- $$(1 + x)^2 + y^2 = (\cosh v + \cos u)^2$$
- $$(1 - x)^2 + y^2 = (\cosh v - \cos u)^2$$

Section-D

UNIT- I

1. Let $S \subseteq \mathbb{R}$ be nonempty. Show that if $u = \sup S$, then for every number $n \in \mathbb{N}$ the number $u - 1/n$ is not an upper bound of S , but the number $u + 1/n$ is an upper bound of S .
2. Let S be a bounded set in \mathbb{R} and let S_0 be a nonempty subset of S . Show that $\inf S \leq \inf S_0 \leq \sup S_0 \leq \sup S$.
3. Show that a nonempty finite set $S \subseteq \mathbb{R}$ contains its supremum.
4. Prove that there exists positive real number x such that $x^2 = 2$.
5. Let X be a nonempty set, and let f and g be defined on X and have bounded ranges in \mathbb{R} . Show that $\sup\{f(x) + g(x) : x \in X\} \leq \sup\{f(x) : x \in X\} + \sup\{g(x) : x \in X\}$ and that $\inf\{f(x) : x \in X\} + \inf\{g(x) : x \in X\} \leq \inf\{f(x) + g(x) : x \in X\}$.
6. Prove that there exists a positive real number y such that $y^2 = 3$.
7. Prove that if $a > 0$, then there exists a positive real number z such that $z^2 = a$.

UNIT - II

8. If $(a_n) \rightarrow a$ and $a_n \neq 0$ for all n and $a \neq 0$, then $(1/a_n) \rightarrow 1/a$.
9. (i) If $(a_n) \rightarrow a$ and $(b_n) \rightarrow b$ then prove that $(a_n + b_n) \rightarrow a + b$
(ii) If $(a_n) \rightarrow a$ and $k \in \mathbb{R}$ then prove that $(ka_n) \rightarrow ka$.
10. If $(a_n) \rightarrow a$ and $a_n \geq 0$ for all n and $a \neq 0$, then $\sqrt[n]{a_n} \rightarrow \sqrt[n]{a}$.
11. Show that $(a^{1/n}) = 1$ where $a > 0$ is any real number.
12. (i) Show that $\lim_{n \rightarrow \infty} \frac{n}{\sqrt{n^2 + 1}} = 1$
(ii) If $(a_n) \rightarrow \infty$ and (b_n) is bounded, then prove that $(a_n + b_n) \rightarrow \infty$
13. Discuss the behavior of monotonic sequence.
14. Discuss the behaviour of geometric sequence (r^n) .
15. Show that $\lim_{n \rightarrow \infty} \left(1 + \frac{1}{n}\right)^n = \lim_{n \rightarrow \infty} \left(1 + \frac{1}{1!} + \dots + \frac{1}{n!}\right) = e$.
16. Show that $\lim_{n \rightarrow \infty} \frac{\log n}{n^p} = 0$ if $p > 0$.
17. Let (a_n) and (b_n) be two sequences of positive terms such that $a_{n+1} = \frac{1}{2}(a_n + b_n)$ and $b_{n+1} = \sqrt{a_n b_n}$. Prove that (a_n) and (b_n) converge to the same limit.

UNIT - III

18. State and Prove Cauchy's first limit theorem.
19. State and prove Cauchy's second limit theorem.
20. Let (a_n) be any sequence and $\lim_{n \rightarrow \infty} |a_n/a_{n+1}| = l$. If $l > 1$ then prove that $(a_n) \rightarrow 0$.
21. If the sequence (a_n) and (b_n) converge to 0 and (b_n) is strictly monotonic decreasing then prove that $\lim_{n \rightarrow \infty} \left(\frac{a_n}{b_n}\right) = \lim_{n \rightarrow \infty} \left(\frac{a_n - a_{n+1}}{b_n - b_{n+1}}\right)$ provides limit on the right hand side exists whether finite or infinite.
22. Prove that $1/n[(n+1)(n+2) \dots (n+n)]^{\frac{1}{n}} \rightarrow 4/e$
23. Prove that every bounded sequence has a convergent subsequence.
24. Prove that a sequence (a_n) converges to l iff (a_n) is bounded and l is the only limit point of the sequence.
25. Let (a_n) be a sequence. Prove that if a real number a is a limit point of (a_n) iff there exists a subsequence (a_{n_k}) of (a_n) converging to a .
26. State and prove Cauchy's general principle of convergence.
27. If a sequence (a_n) converges to l if (a_n) is bounded and l is the only limit point of the sequence
28. Find all the limit points of each of the following sequences
(i) $(1/n)$ (ii) $((-1)^n)$ (iii) $(2n-1)$ (iv) $(1+1/n)^n$

UNIT IV

29. Discuss the behavior of geometric series $1 + r + r^2 + \dots + r^n + \dots$.
30. State and prove Comparison Test.
31. (i) If $\sum c_n$ converges and if $\lim_{n \rightarrow \infty} (a_n/c_n)$ exists and is finite then prove that $\sum a_n$ also converges.
(ii) If $\sum d_n$ converges and if $\lim_{n \rightarrow \infty} (a_n/d_n)$ exists and is greater than zero then prove that $\sum a_n$ diverges.
32. (i) Let $\sum c_n$ be a convergent series of positive terms. Let $\sum a_n$ another series of positive terms. If there exists $m \in \mathbb{N}$ such that $a_{n+1}/a_n \leq c_{n+1}/c_n$ for all $n \geq m$, then $\sum a_n$ is convergent
(ii) Let $\sum d_n$ be a divergent series of positive terms. Let $\sum a_n$ another series of positive terms. If there exists $m \in \mathbb{N}$ such that $a_{n+1}/a_n \geq d_{n+1}/d_n$ for all $n \geq m$, then $\sum a_n$ is divergent.
33. Discuss the behavior of harmonic series.
34. Discuss the convergence of the series $\sum \frac{\sqrt{(n+1)} - \sqrt{n}}{n^p}$.
35. State and prove Kummer's Test.
36. State and prove Gauss's Test.
37. Test the convergence of hyper geometric series.

UNIT V

38. If $\tan\left(\frac{x}{2}\right) = \tanh\left(\frac{y}{2}\right)$ prove that (i) $\sinh y = \tan x$

(ii) $y = \log \tan\left(\frac{\pi}{4} + \frac{x}{2}\right)$

Also show that if $\left(\frac{x}{2}\right) = \tanh\left(\frac{y}{2}\right)$, $\cos x \cosh x = 1$.

39. (i) If $A + iB = \tan^{-1}(x + iy)$ prove that $B = \frac{1}{4} \log \left[\frac{x^2 + (1+y)^2}{x^2 + (1-y)^2} \right]$.

(ii) If $\sin(x + iy) = \rho(\cos \alpha + i \sin \alpha)$ prove that (i) $2\rho^2 = \cosh 2y - \cos 2x$

(ii) $\tan \alpha = \cot x \tanh y$

40. Prove that (i) $i^i = e^{-(4n+1)\left(\frac{\pi}{2}\right)}$

(ii) $\text{Log} \left(\frac{1}{1 - e^{i\theta}} \right) = \log \left(\frac{\text{cosec}(\theta/2)}{2} \right) + i \left(2n\pi + \frac{\pi}{2} - \frac{\theta}{2} \right)$

41. Find the sum to n terms of the series

$$\sin \alpha + c \sin(\alpha + \beta) + c^2 \sin(\alpha + 2\beta) + \dots n \text{ terms}$$

42. Sum to infinity the series (i) $\frac{1}{2} \sin \theta + \frac{1.3}{2.4} \sin 2\theta + \frac{1.3.5}{2.4.6} \sin 3\theta + \dots \infty$

(ii) $\frac{c}{1} \cos \alpha - \frac{c^2}{2} \cos 2\alpha + \frac{c^3}{3} \cos 3\alpha - \dots \infty$

43. (i) If $-\frac{\pi}{4} \leq \theta \leq \frac{\pi}{4}$ then prove that $\theta = \tan \theta - \frac{1}{3} \tan^3 \theta + \frac{1}{5} \tan^5 \theta - \dots$

Also show that when $\theta = \frac{\pi}{4}$, $\frac{\pi}{4} = 1 - \frac{1}{3} + \frac{1}{5} - \dots$

(ii) Prove that $\left(1 - 3^{-\frac{1}{2}}\right) - \frac{1}{3} \left(1 - 3^{-\frac{3}{2}}\right) + \frac{1}{5} \left(1 - 3^{-\frac{5}{2}}\right) - \dots = \frac{\pi}{12}$

ST. MARY'S COLLEGE(Autonomous)-THOOTHUKUDI

QUESTION BANK 2022-2023

Semester III

Allied Statistics I

Sub Code : 21UMMA31

(for those who joined in July 2021 and after)

Section -A

(1 Mark)

Choose the correct answer :

Unit I

- The r^{th} moment about the origin is _____
 a) $\mu'_r = \frac{\sum f i (xi - A)^r}{N}$ b) $\mu'_r = \sum f i (xi - \bar{x})^r$ c) $\mu'_r = \frac{\sum f i x i}{N}$ d) $\mu'_r = \frac{\sum f i x i^r}{N}$
- The r^{th} moment about any point is _____
 a) $\mu'_r = \frac{\sum f i (xi - A)^r}{N}$ b) $\mu_r = \sum f i (xi - \bar{x})^r$ c) $\mu'_r = \frac{\sum f i x i}{N}$ d) $\mu'_r = \frac{\sum f i x i^r}{N}$
- The Principle of least square states that the parameters involved in $f(x)$ should be choose in such a way that $\sum d^2$ is _____
 a) 0 b) maximum c) **minimum** d) equal
- The r^{th} central moment is _____
 a) $\mu_r = \frac{\sum f i (xi - \bar{x})^r}{N}$ b) $\mu_r = \frac{\sum f i (xi - A)^r}{N}$
 c) $\mu_r = \frac{\sum f i x i^r}{N}$ d) $\mu_r = \frac{\sum f i x i}{N}$
- A Curve which is more peaked than the normal curve that is called _____
 a) Messokurtic b) Platykurtic c) normal d) **Leptokurtic**
- Karl pearson's coefficient of skewness is _____
 a) **(mean - mode)/ S.D** b) (mean -2 mode)/S.D
 c) (Mean + mode) /S.D d) 3mean-mode
- For a normal curve $\beta_2 = 3$ then _____
 a) **Mesokurtic** b) Platykuric c) leptokurtic d) Normal
- A Curve which is flater than the normal curve is called _____
 a) Leptokurtic b) Normal c) messokurtic d) **Platykurtic**

Unit –II

- If $\gamma = 1$ then correlation is _____
 a) Perfect b) **Perfect & positive** c) Positive & negative d) direct
- In Rank correlation correction factor is _____

- a) $\frac{1}{12}m(m^2-1)$ b) $\frac{1}{16}m(m^2-1)$ c) $\frac{1}{12}m(m^2+1)$ d) $\frac{1}{12}m^2(m-1)$

11. The regression coefficient of x on y is given by $b_{xy} =$ _____

- a) $\gamma \frac{\sigma_x}{\sigma_y}$ b) $1/\gamma \frac{\sigma_x}{\sigma_y}$ c) $-\gamma \frac{\sigma_x}{\sigma_y}$ d) $\gamma \frac{\sigma_y}{\sigma_x}$

12. The covariance between x and y is defined by _____

- a) $\frac{\sum (x - \bar{x})(y - \bar{y})}{n}$ b) $\frac{\sum (x - \bar{x})(y - \bar{y})}{2n}$
c) $\frac{2\sum (x - \bar{x})(y - \bar{y})}{N}$ d) $\frac{\sum (x - \bar{x})}{N}$

13. If $\gamma = -1$, then correlation is _____

- a) perfect b) Perfect & positive **c) Positive & Negative** d) un correlation

14. The regression line y on x is _____

- a) $y - \bar{y} = \gamma \frac{\sigma_y}{\sigma_x} (x - \bar{x})$ b) $y - \bar{y} = 1/\gamma \frac{\sigma_y}{\sigma_x} (x - \bar{x})$
c) $y - \bar{y} = \gamma \frac{\sigma_x}{\sigma_y} (x - \bar{x})$ d) $x - \bar{x} = \gamma \frac{\sigma_x}{\sigma_y} (y - \bar{y})$

15. The regression line x on y is _____

- a) $y - \bar{y} = \gamma \frac{\sigma_y}{\sigma_x} (x - \bar{x})$ b) $y - \bar{y} = 1/\gamma \frac{\sigma_y}{\sigma_x} (x - \bar{x})$
c) $y - \bar{y} = \gamma \frac{\sigma_x}{\sigma_y} (x - \bar{x})$ **d) $x - \bar{x} = \gamma \frac{\sigma_x}{\sigma_y} (y - \bar{y})$**

16. Rank correlation mean \bar{x} is _____

- a) $\frac{n-1}{2}$ b) $\frac{n-2}{2}$ c) $\frac{n+1}{2}$ d) $\frac{n+2}{2}$

17. If $\gamma = 0$ the variable are uncorrelated then cov (x,y) _____

- a) 1 **b) 0** c) 2 d) -1

Unit III

18. If F is the distribution function of the random variable x than $P(a < x \leq b) =$ _____

- a) $F(a) - F(b)$ **b) $F(b) - F(a)$** c) $F(a) - F(b)$ d) $F(a)$

19. The set of values which x takes is called the _____ of the random variable.

- a) Spectrum** b) Symmetry c) Normal d) Correlated

20. If $P(x) = x/15$, $x=1,2,\dots,5$ then $P\{x=1 \text{ or } 2\}$ is _____

- a) 1/5** b) 1/2 c) 1/4 d) 1/6

21. If F is the d.f of one dimensional random variable then _____

- a) $0 \leq F(x) \leq 1$** b) $F(x) = 1$ c) $F(x) = 0$ d) $0 \geq F(x) \leq 1$

22. The numbers $p(x_i)$, $i = 1,2,3,\dots$ then $\sum_{i=1}^{\infty} P(x_i) =$ _____

- a) 0 **b) 1** c) 2 d) -1

Unit IV

23. The moment generating function of the poisson distribution is _____

- a) $e^{\lambda(e^t-1)}$ b) $e^{\lambda}(e^t - 1)$ c) e^{λ} d) $e^{\lambda}(1 - e^t)$

24. In a poisson Distribution _____

- a) **Mean = variance** b) Mean \neq variance
c) Mean > variance d) Mean < Variance

25. In a poisson distribution if $P(x=2) = P(x=3)$ Then the value of parameter λ is _____

- a) 5 b) **3** c) 6 d) 8

26. In a binomial distribution the mean is 4 and the variance is $4/3$ Then the values of n and P are _____ respectively.

- a) 4, $4/3$ b) **6, $2/3$** c) 12, $4/3$ d) 12, $7/3$

27. In a poisson distribution if $P(x=0) = K$ then the variance is _____

- a) e^K b) **e^{-K}** c) e^{xu} d) e^{ik}

28. In binomial distribution the mean and variance is _____

- a) **np, npq** b) npq, p c) npq d) np

29. Probability distribution function of poisson distribution is _____

- a) $e^{\lambda(s-1)}$ b) $e^{\lambda(s+1)}$ c) $e^{\lambda(s-2)}$ d) $e^{\lambda s}$

Unit V

30. In a normal distribution function the mean, median, mode of distribution are _____

- a) tangent b) **coincide** c) perpendicular d) equal

31. In Normal distribution Q.D : M.D : S.D = _____

- a) 12:10:15 b) **10 :12:15** c) 10:15:12 d) 12:15:10

32. In a normal distribution median _____

- a) Standard Deviation b) M.G.F c) **Mean** d) Variance

33. If $X \sim N(\mu, \sigma^2)$ then the log- normal random variable is _____

- a) e^x b) e^{-x} c) e^{3x} d) e^{2x}

Section – B (2 Marks)

Unit I

1. Define r^{th} moment about any point and about the origin.
2. Define r^{th} central moment.
3. Prove that $\mu_1' = \bar{x} - A$
4. Define Karl Pearson's β and γ coefficients.
5. Define Skewness and Kurtosis.
6. Define Karl Pearson's and Bowley's coefficient of Skewness.
7. For a frequency distribution of (f_i / x_i) show that $\beta_2 \geq 1$.
8. Define Scatter Diagram and Curve Fitting.
9. What are the normal equations of a straight line.
10. What are the normal equations of a second degree parabola.

Unit II

1. Define Correlation and Covariance.
2. Define Karl Pearson's coefficient of Correlation.
3. Show that $-1 \leq \gamma \leq 1$.
4. Suppose $n = 1000$, $\bar{x} = 65$, $\bar{y} = 83$, $\sigma_x = 4.5$, $\sigma_y = 3.6$ and the sum of the products of the

deviations from the mean of x and y is 4800. Find γ_{xy}

5. Define Rank Correlation ρ .
6. Define Curve of Regression and Line of Regression.
7. Give the Regression equation of y on x and x on y.
8. Define the regression coefficients of y on x and x on y.
9. Show that $\gamma = \pm \sqrt{b_{xy}b_{yx}}$.
10. If θ is the angle between the two regression lines then what is the value of θ if (i) θ is acute and (ii) θ is obtuse.

Unit III

1. Define random variable and discrete random variable.
2. Define distribution function and give its domain and range.
3. If F is the d.f of r.v X and if $a < b$, prove that $P(a < X \leq b) = F(b) - F(a)$.
4. Define Probability mass function.
5. Prove that if p is the probability mass function then $p(x_j) = P(X = x_j) = F(x_j) - F(x_{j-1})$, where F is the d.f of X.
6. Define continuous random variable and Probability density function.
7. If f(x) is the p.d.f of a random variable X, where X is defined from a to b then define (i) μ_r ' (about the point $x=A$) (ii) μ_r ' (about origin) and (iii) μ_r (about mean).
8. Define continuous distribution function.
9. If F is a continuous distribution function show that $0 \leq F(x) \leq 1$.
10. What are the properties of p.d.f.

Unit IV

1. Define Binomial distribution and Geometric distribution.
2. The mean and variance of binomial distribution are 4 and $4/3$ respectively. Find $P(X \geq 1)$
3. If $X \sim B(n, p)$ show that $E\left(\frac{X}{n} - p\right)^2 = \frac{pq}{n}$
4. If $X \sim B(n, p)$ show that $\text{Cov}\left(\frac{X}{n}, \frac{n-X}{n}\right) = -\frac{pq}{n}$
5. Define characteristic function of binomial distribution
6. Show that $b(n, p; k) = b(n, 1-p; n-k)$
7. Show that $b(n+1, p; k) = p \cdot b(n, p; k-1) + q \cdot b(n, p; k)$
8. Show that $\sum_{k=r}^n b(n, p; k) = 1 - \sum_{k=n-r+1}^n b(n, 1-p; k)$
9. Define Poisson distribution
10. Define moment generating function of the Poisson distribution
11. Define characteristic function of the Poisson distribution

Unit V

1. Define Normal Distribution and Gamma distribution
2. Show that $\phi(-z) = 1 - \phi(z)$, $z > 0$
3. Show that $P(a \leq X \leq b) = \Phi\left(\frac{b-\mu}{\sigma}\right) - \Phi\left(\frac{a-\mu}{\sigma}\right)$ where $X \sim N(\mu, \sigma^2)$
4. X is normally distributed and the mean of X is 12 and S.D is 4. Find the probability function of $X \geq 20$
5. X is a normal variate with mean 30 and S.D is 5. Find the probability function of

$$26 \leq X \leq 40$$

6. Let $X \sim N(\mu, \sigma^2)$. If $\sigma^2 = \mu^2$, ($\mu > 0$), express $P(X < -\mu | X < \mu)$ in terms of cumulative distribution function of $N(0, 1)$.

Section - C (6 Marks)

Unit I

- Prove that $\mu_r = \mu'_r - rc_1\mu'_{r-1}\mu'_1 + rc_2\mu'_{r-2}(\mu'_1)^2 - \dots + (-1)^{r-1}(r-1)(\mu'_1)^r$
- The first four moments of a distribution about $x=2$, are 1, 2.5, 5.5 and 16 calculate the four moments. (i) about the mean (ii) about zero
- The first three moments about the origin are given by $\mu_1 = \frac{1}{2}(n+1)$;
 $\mu_2 = \frac{1}{6}(n+1)(2n+1)$; $\mu_3 = \frac{1}{4}n(n+1)^2$ Examine the skewness of the distribution.
- The first three moments of a distribution about the value 3 of the variables are 2, 10 and 30 respectively. Obtain the first three moments about zero.
- Karl Pearson's coefficient of skewness of a distribution is 0.4, its S.D is 8 and mean 30. Find the mode and median.
- For a frequency distribution (f_i/x_i) show that $\beta_2 \geq 1$
- Calculate the Karl Pearson's coefficient of the skewness to the following data.

Size	6	7	8	9	10	11	12
Frequency	3	6	9	13	8	5	4

8. Fit the curve $y = ae^{bx}$ to the following data

X	5	6	7	8	9	10
Y	133	55	23	7	2	2

9. Fit a curve $y = ax^b$ for the following data

X	1	2	3	4
Y	2.99	4.25	5.22	6.10

10. Fit a second degree parabola by taking x_i as the independent variable.

Unit II

11. Find the correlation coefficient for the following data?

X	10	12	18	24	23	27
Y	13	18	12	25	30	10

12. Find the rank correlation coefficient of the following data of marks obtained by 10 students in physics and chemistry.

Physics(P)	35	56	50	65	44	38	44	50	15	6
Chemistry(Q)	50	35	70	25	35	58	75	60	55	35

13. Prove that the equation of regression line of x on y is given by $x - \bar{x} = \gamma \frac{\sigma_x}{\sigma_y} (y - \bar{y})$
14. Prove that the angle between the two regression lines is given by $\theta = \tan^{-1} \left[\left(\frac{\gamma^2 - 1}{\gamma} \right) \left(\frac{\sigma_x \sigma_y}{\sigma_x^2 + \sigma_y^2} \right) \right]$
15. The correlation coefficient is independent of the change of origin and scale.
16. Show that $\gamma = \frac{\sigma_{x+y}^2 - \sigma_x^2 - \sigma_y^2}{2 \sigma_x \sigma_y}$
17. Prove that the rank correlation ρ is given by $\rho = 1 - \frac{6 \sum (x - y)^2}{n(n^2 - 1)}$
18. If θ is the acute angle between the two regression lines show that $\theta \leq 1 - \gamma^2$
19. From the following regression equations find the mean values of x and y ; $3x + 12y = 19$
 $3y + 9x = 46$.

Unit III

21. (i) Prove that $P(x_j) = P(X = x_j) = F(x_j) - F(x_{j-1})$, where F is the d.f. of X
 (ii) If F is d.f. of one dimensional r.v. x Then $F(-\infty) = \lim_{x \rightarrow (-\infty)} F(x) = 0$ and
 $F(\infty) = \lim_{x \rightarrow (\infty)} F(x) = 1$
22. For any continuous distribution show that the mean deviation is least when measured from the median.
23. If F is the d.f. of the r.v. X and if $a < b$, then $P(a < x \leq b) = F(b) - F(a)$
24. If $P(X) = \left\{ \frac{x}{15}, x = 1, 2, 3, 4, 5 \right\}$ Find (i) $P(x=1 \text{ or } 2)$ (ii) $P\left\{ \frac{1}{2} < x < \frac{5}{2} \mid x > 1 \right\}$
25. The diameter of an electric cable, say X , is assumed to be a continuous random variable with p.d.f. $f(x) = 6x(1-x)$, $0 \leq x \leq 1$
 i. Check that $f(x)$ is p.d.f and
 ii. Determine the number b such that $P(x < b) = P(x > b)$
26. Find the mean, variance and the coefficients β_1, β_2 of the distribution: $dF = Kx^2 e^{-x} dx$, $0 < x < \infty$
27. The kms X in thousands of Kms which car owners get with a certain kind of tyre is a random variable having probability density function is

$$f(x) = \begin{cases} \frac{1}{20} e^{-x/20} & \text{for } x > 0 \\ 0 & \text{for } x < 0 \end{cases}$$

Find the probabilities that one of these tyres will last (i) at most 10,000kms; (ii) anywhere from 16000 to 24000 kms (iii) at least 30000 miles

28. Verify the following distribution function

$$F(x) = \begin{cases} 0 & , x < a \\ \frac{1}{2} \left(\frac{x}{a} + 1 \right) & , -a \leq x \leq a \\ 1 & , x > a \end{cases}$$

29. Two dice are rolled. Let X denote the random variable which counts the total number of points on the upturned faces, Construct a table giving the non zero values of the probability mass function and draw the probability chart. Also find the distribution function of X .

30. A continuous random variable X has a p.d.f $f(x) = 3x^2$, $0 \leq x \leq 1$. Find a and b such that
 (i) $P(X \leq a) = P(X > a)$ and (ii) $P(X > b) = 0.05$
31. Prove that the geometric mean G of the distribution $dF = 6(2-x)(x-1)dx$, $1 \leq x \leq 2$ is given by $\log(16G) = 19$.
32. (a) A random variable X is distributed at random between the values 0 and 1 so that its probability function is : $f(x) = kx^2(1-x^3)$, where k is a constant . Find the value of k .
 Using this value of k , find its mean and variance.
- (b) A variable X is distributed at random between the values 0 and 4 and its probability density function is given by : $f(x) = kx^3(4-x)^2$ find the value of k , the mean and standard deviation of the distribution.
33. Calculate the standard deviation and mean deviation from mean if the frequency function $f(x)$ has the form:
- $$f(x) = \begin{cases} (3 + 2x)/18, & \text{for } 2 \leq x \leq 4 \\ 0, & \text{otherwise} \end{cases}$$
34. Write the properties of a distribution function.
35. A petrol pump is supplied with petrol once a day . If its daily volume of sales (x) in thousands of litres is distributed by $f(x) = 5(1-x)^4$, $0 \leq x \leq 1$, what must be the capacity of its tank in order that the probability that its supply will be exhausted in a given day shall be 0.01?

Unit IV

36. Ten coins are thrown simultaneously. Find the probability of getting at least seven heads.
37. A and B play a game in which their chance of winning are in the ratio 3:5 Find A's Chance of winning at least three games out of five games played.
38. The probability of a man hitting a target is $\frac{1}{4}$
 (i) If he fires 7 times what is the probability of his hitting the target at least twice?
 (ii) How many times must he fire so that the probability of his hitting the target at least once is greater than $\frac{2}{3}$?
39. In a binomial distribution consisting of 5 independent trials , probabilities of 1 and 2 success are 0.4096 and 0.2048 respectively . find the parameter 'p' of the distribution.
40. The mean and variance of binomial distribution are 4 and $\frac{4}{3}$ respectively. Find $P(X \geq 1)$
41. Determine the binomial distribution for which the mean is 4 and the variance 3 and find its mode.
42. Show that for $p = 0.5$, the binomial distribution has a maximum probability at $X = \frac{1}{2}n$, if n is even ,and at $X = \frac{1}{2}(n-1)$ as well as $X = \frac{1}{2}(n-1)$, if n is odd.

43. A Poisson distribution has a double mode at $x = 1$ and $x = 2$ what is the probability that x will have one or the other of these two values?
44. Show that in poisson distribution with unit mean, mean deviation about mean is $(2/e)$ times the standard deviation.
45. If X and Y are independent poisson variates with means m_1 and m_2 respectively, prove that the $P(X-Y)$ has the value 'r' is the coefficient of t^r in $\exp(m_1 t + m_2 t^{-1} - m_1 - m_2)$.
46. Given the hypothetical distribution :

No. of cells (x)	0	1	2	3	4	5	Total
Frequency (f)	213	128	37	18	3	1	400

Fit a negative binomial distribution and calculate the expected frequencies.

47. Suppose X is a non – negative integral valued random variable. show that the distribution of X is geometric if it 'lacks memory', (i.e) if for each $k \geq 0$ and $Y = X-k$, one has $P(Y = t / X \geq k) = P(X = t)$ for $t \geq 0$.
48. Find the moments of poisson distribution.
49. State and prove the recurrence relations for the moments of binomial distribution.
50. A Car hire firm has two cars, which it hires out day by day the number of demands for a car on any day is distributed as a poisson distribution with mean $\lambda = 1.5$
i. neither car is used and ii. the proportion of days on which some demand is refused
51. If X is a poisson variate such that $P(x=2)=9$ $P(x=4)=90$ $P(x=6)$
Find i) λ (ii) the mean of x (iii) β_1 the coefficient of skewness

Unit V

52. Write the importance of normal distribution
53. Explain the characteristics of normal distribution and normal probability curve.
54. Let X is normal variate with mean 30 and S.D. is 5 Find the probabilities that
(i) $x \geq 20$ (ii) $x \leq 20$ (iii) Find x' , when $P(X > x') = 0.24$
55. The mean yield for one acre plot is 662 kilos with a s.d 32 kilos. Assuming normal distribution, how many one acre plots in a batch of 1000 plots would you expect to have yield (i) over 700 kilos (ii) below 650 kilos
56. The marks obtained by a number of students for a certain subject are assumed to be approximately normally distributed with mean value 65 and with a standard deviation of 5. If 3 students are taken at random from this set, what is the probability that exactly 2 of them will have marks over 70?
57. In a distribution exactly normal, 10.03 % of the items are under 25 kgm weight and 89.97% of the items are under 70 kgm weight. what are the mean and standard deviation of the distribution?
58. A sample of 100 items is taken at random from a batch known to contain 40 % defectives What is the probability that the sample contains : (i) at least 44 defectives (ii) exactly 44 defectives?
59. Prove that for the normal distribution the quartile deviation the mean deviation and S.D are approximately 10 : 12 : 15
60. Let $X \sim N(\mu, \sigma^2)$ If (μ, σ^2) , Express $P(x < -\mu/x < \mu)$ in terms of cumulative distribution function of $N(0,1)$
61. If two normal universes A and B have the same total frequency but the standard deviation

of universe A is k times that of the universe B, show that maximum frequency universe A is $1/k$ times that of universe B?

62. Deduce a M.G.F of normal distribution.

Section – D (12 Marks)

Unit I

1. Calculate the first four central moments from the following data to find β_1 and β_2 and discuss the nature of the distribution.

X	0	1	2	3	4	5	6
F	5	15	17	25	19	14	5

2. Calculate the kail pearson's coefficient of the skewness to the following data.

Size	6	7	8	9	10	11	12
Frequency	3	6	9	13	8	5	4

3. Fit the second degree parabola to the following data taking x as the independent variable.

X	1	2	3	4	5	6	7
Y	2.3	5.2	9.7	16.5	29.4	35.5	54.4

4. Fit the curve $y = bx^a$ to the following data

X	1	2	3	4	5	6
Y	1200	900	600	200	110	50

5. Fit a curve of the form $y = ab^x$ to the following data

Year (x)	1951	1952	1953	1954	1955	1956	1957
Production in tons (y)	201	263	314	395	427	504	612

6. calculate the first four central moments from the following data to find β_1 and β_2 and discuss the nature of the distribution.

X	0	1	2	3	4	5	6	7	8
F	1	8	28	56	70	56	28	8	1

Unit II

7. Show that the angle between the two regression lines is given by $\tan^{-1} \left[\left(\frac{\gamma^2 - 1}{\gamma} \right) \left(\frac{\sigma_x \sigma_y}{\sigma_x^2 + \sigma_y^2} \right) \right]$

8. Show that the variables $u = x \cos \alpha + y \sin \alpha$ and $V = y \cos \alpha - x \sin \alpha$ are uncorrelated if,

$$\alpha = \frac{1}{2} \tan^{-1} \left(\frac{2\gamma_{xy} \sigma_x \sigma_y}{\sigma_x^2 - \sigma_y^2} \right)$$

9. Three judges assign the ranks to 8 entries in a beauty contest.

Judge Mr.X.	1	2	4	3	7	6	5	8
Judge Mr.Y.	3	2	1	5	4	7	6	8
Judge Mr.Z	1	2	3	4	5	7	8	6

10. The two variables x and y have the regression lines $3x+2y-26=0$, and $6x+y-31=0$
Find (i) the mean values of x and y (ii) The correlation coefficient between x and y
(iii) The Variance of y if the variance of x is 25
11. The following data relate to the ages of husbands and wives.
- | | | | | | | | | | | |
|-----------------|----|----|----|----|----|----|----|----|----|----|
| Ages of Husband | 26 | 29 | 31 | 33 | 35 | 34 | 38 | 39 | 41 | 45 |
| Ages of Wife | 22 | 26 | 27 | 31 | 28 | 19 | 29 | 36 | 35 | 46 |
12. The average daily wage for working class in Madras is Rs.12 and for that in Delhi is Rs.18 their respective standard deviations are Rs.2 and Rs.3 and the coefficient of correlation is 0.67. Find the most likely wage in Delhi corresponding to the wage of Rs.20 in Madras.
13. If $x = 4y + 5$ and $y = kx + 4$ are the regression lines of x on y and y on x respectively (i) show that $0 \leq k \leq 1/4$

Unit III

14. A random variable x has the following probability function

Value of X, x	0	1	2	3	4	5	6	7
$P(x)$	0	K	$2k$	$3k$	K^2	$2K^2$	$7K^2$	K

- (i) Find K , (ii) Evaluate $P(x < 6)$, $P(x \geq 6)$ and $P(0 < x < 5)$ (iii) If $P(x \leq a) > \frac{1}{2}$ find the minimum value of a , (iv) Determine the distribution function x .
15. Let x be a continuous random variable with p.d.f.

$$f(x) = \begin{cases} ax & , 0 \leq x \leq 1 \\ a & , 1 \leq x \leq 2 \\ -ax + 3a & , 2 \leq x \leq 3 \\ 0 & \text{elsewhere} \end{cases}$$

- (i) Determine the constant a (ii) Determine $F(x)$, c.d.f and (iii) Compute $P(x \leq 1.5)$
16. A random variable x has the probability law $df(x) = \frac{x}{b^2}, e^{-x^2/2b^2} dx, 0 \leq x < \infty$

Find the distance between the quartiles and show that the ratio of this distance to the standard deviation of x is independent of the parameter 'b'

17. An experiment consists of three independent tosses of a fair coin. let :
 X = The number of heads, Y = the number of head runs, Z = The length of head runs, a head run being defined as consecutive occurrence of at least two heads, its length then being the number of head occurring together in three tosses of the coin. Find the probability function of (i) X (ii) Y (iii) Z (iv) $X+Y$ (v) XY and construct the number of tables and draw their probability charts.
18. The probability distribution of a r.v. X is : $f(x) = k \sin \frac{1}{5} \pi x, 0 \leq x \leq 5$. Determine the constant k and obtain the median and quartiles of the distribution.
19. In a continuous distribution whose relative frequency density is given by:
 $f(x) = y_0 \cdot x(2-x), 0 \leq x \leq 2$, find mean, variance, β_1 , and β_2 and hence show that the distribution is symmetrical. Also (i) find mean deviation about mean, and (ii) show that for this distribution $\mu_{2n+1} = 0$, and (iii) find the mode, harmonic mean and median.

20. Suppose that the life in hours of a certain part of radio tube is a continuous random

$$\text{variable } X \text{ with p.d.f given by: } f(x) = \begin{cases} k \cdot x & , \text{for } 0 \leq x < 5 \\ k \cdot (10 - x) & , \text{for } 5 \leq x < 10 \\ 0 & , \text{otherwise} \end{cases}$$

- Find the value of k such that $f(x)$ is a probability density function.
- What is the probability that the number of pounds of bread that will be sold tomorrow is
 - more than 500 pounds
 - less than 500 pounds
 - between 250 and 750 pounds ?
- Denoting by A, B and C the events that the pounds of bread sold are as in b (i), b (ii) and b (iii) respectively, find $P(A/C)$. Are (i) A and B independent events ? (ii) Are A and C independent events?

21. For any continuous distribution show that the mean deviation is least when measured from the median.

Unit IV

- A department in a works has 10 machines which may need adjustment from time to time during the day. Three machines are old, each having a probability of $1/11$ of needing adjustment during the day, and are new, having corresponding probabilities of $1/21$. Assuming that no machine needs adjustment twice on the same day, determine the probabilities that on a particular day
 - just 2 old and no new machines need adjustment.
 - If just 2 machines need adjustment, they are of the same type.
- State and prove the recurrence formula of moments of the binomial distribution.
- Fit a poisson distribution to the following data.

X	0	1	2	3	4
F	109	665	22	3	1

- The coins are thrown simultaneously. Find the probability of getting at least seven heads.
- In a precision bombing attack there is a 50% chance that any one bomb will strike the target. Two direct hits are required to destroy the target completely. How many bombs must be dropped to give a 99% chance or better of completely destroying the target.
- To derive the first four moments about the origin of binomial distribution.
- To Deduce moment generating function of binomial distribution.
- If x is a poisson variate with mean m , show that (i) $\frac{x-m}{\sqrt{m}}$ is a variable with mean zero and variance unity. (ii) Find the M.G.F. for this variable.
- Seven coins are tossed and number of heads noted. The experiment is repeated 128 times and the following distribution is obtained:

No. of heads	0	1	2	3	4	5	6	7	Total
Frequencies	7	6	19	35	30	23	7	1	

Fit a binomial distribution assuming (i) the coin is unbiased (ii) the Nature of the coin is not known (iii) probability of a head 4 coins is 0.5 and for the remainin 3 coins is 0.45

31. Fit a poisson distribution to the following data

X	0	1	2	3	4	5	6	7	8
F	56	156	132	92	37	22	4	0	1

- 32 (i).Derive cumulants of the binomial distribution
(ii) Derive the recurrence relation for cumulants of binomial distribution

Unit V

33. Let x is normaly distributed and the mean of X is 12 and S.D is 4. Find the probability of the following. (i) $x \geq 20$ (ii) $x \leq 20$ (iii) $0 \leq x \leq 12$
34. Let x is normaly distributed and the mean 12 and S.D is 5. Find the probability of the following. (i) $x \geq 45$ (ii) $|x - 30| > 5$ (iii) $26 \leq x \leq 40$
35. Deduce median of a normal distribution.
36. If X, Y are independent normal variate with means 6,7 and variances 9,16 respectively. Determine λ such that $P(2x + y \leq \lambda) = P(4x - 3y \geq 4\lambda)$
37. Derive the following properties of normal distribution
(i) Moment generating function with respect to origin
(ii) Cumulative function
(iii) Mode of the normal distribution
38. If the skills are classified as A ,B and C according as the length – breadth index is under 75, between 75 and 80, or over find approximately the mean and standard deviation of a series in which A are 58%, B are 38% and C are 4% being given that if $f(t) = \frac{1}{\sqrt{2\pi}} \int_0^t \exp(-x^2/2) dx$ then $f(0.20) = 0.08$ and $f(1.75)=0.46$
39. If X, Y are independent normal variates possessing the common mean μ such that $P(2X+4Y \leq 10) + P(3X+Y \leq 9)=1$ and $P(2X-4Y \leq 6) + P(-3X+Y \geq 1)=1$. Determine the value of μ and the ratio of the variances of X and Y .
40. Derive that normal distribution as a limiting form of binomial distribution and deduce that is the p.d.f of the normal distribution with mean 0 and unit variance.
41. In a distribution exactly normal 10.03% of the items are under 25 kilogram weight and 89.97% of the items are under 70 kilogram weight. What are the mean and standard deviation if the distribution?

Section A(1 Mark)

Unit I

- The roots of the equations $x+1/x=1$ are-----
(a)1,-1 (b) $1+i$ and $1/2+i\sqrt{3}/2$ (c) $1+i$ and $1-i$ **(d) $(1+i\sqrt{3})/2$ and $(1-i\sqrt{3})/2$**
- One real root of the equation $x^3-7x^2+14x-8=0$ is -----
(a)-2 (b) $1/2$ (c)-1 **(d)2**
- If $f(x)$ is a polynomial of degree $n>0$ then $f(x)$ has -----
(a) no root (b) atleast one root
(c)exactly n real roots (d)at most $n+1$ roots
- The second degree equation in x which has one complex root $1-2i$ is
(a) $x^2-2x+5=0$ (b) $x^2+2x-5=0$ (c) $x^2-5x+2=0$ (d) $x^2+5x-2=0$
- Polynomials of degree 4 is called _____equation.
(a)linear **(b)biquadratic** (c)cubic (d)quadratic
- A real or complex number a is called the root of the polynomial $f(x)$ if _____
(a) $f(x) = 0$ (b) $f(x) \neq 0$ (c) $f(a) = 0$ (d) $f(a) \neq 0$
- To increase the roots of $f(x) = 0$ by h we diminish the roots of $f(x) = 0$ by _____
(a) x (b) $-x$ **(c) $-h$** (d) h
- One root of $x^4-3x+1=0$ lies between
(a) 2 and 3 (b)2 and 2.5 (c)2.5 and 3 **(d)1and 2**
- Horner's method and Newton's method are used to find
(a)the exact values of the roots of quadratic equation
(b)approximate values of the complex roots of quadratic equation
(c)approximate values of the real roots of the equation

(d) the positive real roots of an equation

10. If all the roots of $f(x)=0$ are real then all the roots of $f'(x)=0$ are

- (a) real (b) imaginary (c) real or imaginary (d) real and distinct

Unit II

11. Let A be a non-singular matrix then $A^{-1} =$ -----

- (a) $\text{adj } A/A$ (b) $(A_{ij})^T/[A]$ (c) (a_{ij}/A) (d) $\text{adj } A$

12. The characteristic polynomial of $A = \begin{pmatrix} 1 & 2 \\ 3 & 1 \end{pmatrix}$

- (a) $x^2 - 2x + 5$ (b) $x^2 + 2x + 5$ (c) $-x^2 - 2x + 5$ (d) $x^2 - 2x - 5$

13. The characteristic polynomial of I_2 is-----

- (a) $x^2 - 2x + 1$ (b) $x^2 + 2x + 1$ (c) $x^2 - x - 1 = 0$ (d) $x^2 + x + 1$

14. The eigen values of $A = \begin{pmatrix} 1 & 1 & 3 \\ 1 & 5 & 1 \\ 3 & 1 & 1 \end{pmatrix}$ are -2, 3, 6 then the eigen values of A^T are _____

- (a) **-2, 3, 6** (b) -1/2, 1/3, 1/6 (c) $-2^2, 3^2, 6^2$ (d) -4, 6, 12

15. The sum and product of the eigen values of I_3 is _____

- (a) 0, 0 (b) 3, 3 (c) **3, 1** (d) 2, 1

16. The product of the eigen values of $\begin{pmatrix} -3 & 2 \\ -2 & 4 \end{pmatrix}$ is-----

- (a) **-6** (b) 6 (c) 0 (d) none

17. The characteristic root of $\begin{pmatrix} 3 & 0 & 0 \\ 5 & 4 & 0 \\ 3 & 6 & 1 \end{pmatrix}$ are _____

- (a) 3, 5, 3 (b) **3, 4, 1** (c) 4, 6, 1 (d) 0, 0, 1

18. The system of simultaneous linear equations $AX=B$ is consistent iff

- (a) rank of A = rank of B (b) rank of A = rank of AB
(c) **rank of A = rank of (AB)** (d) rank of B = rank of AB

19. Any nonsingular square matrix of order n is equivalent to-----

- (a) **the identity matrix of order n** (b) any diagonal matrix of order n
(c) scalar matrix of order n (d) the zero matrix of order n

20. If the eigen values of A are -1, 2, 5 the eigen values of $(5A)^{-1}$ are _____

- (a) 1, 1/4, 1/25 (b) -4, 14, 50 (c) 1, 4, 25 (d) **-1/5, 1/10, 1/25**

Unit III

21. Curvature of a curve $y=f(x)$ is defined as _____

- (a) dy/dx (b) dy/ds **(c) $d\psi/ds$** (d) $ds/d\psi$
22. The radius of curvature of a curve $y=f(x)$ is defined as-----
 (a) dx/dy (b) ds/dy **(c) $ds/d\psi$** (d) $d\psi/ds$
23. The radius of curvature of a circle of radius r is-----
 (a) $1/r$ **(b) r** (c) $r/4$ (d) $r/2$
24. The radius of curvature of $y=e^x$ at the point where it crosses the y-axis
 (a) 0 **(b) $2\sqrt{2}$** (c) 2 (d) 8
25. The radius of curvature $y=\log x/x$ at $x=1$
(a) $2\sqrt{2}/3$ (b) $-2\sqrt{2}/3$ (c) 2 (d) 4
26. The ordinate of the centre of the curvature of the curve $xy=1$ at $(1,1)$ is-----
 (a) 2 (b) 1 **(c) $1/2$** (d) 0
27. The evolute of the ellipse $x^2/a+y^2/b=1$ is -----
 (a) another ellipse **(b) a four cusped cycloid** (c) a parabola (d) a circle
28. The abscissa of the centre of curvature of the curve $xy=c^2$ is _____
 (a) **$2c$** (b) c (c) $c/2$ (d) 0
29. The evolute of the parabola $y=4ax$ is _____
 (a) **a semi cubical parabola** (b) an ellipse
 (c) a straight line (d) cubical hyperbola
30. The ----- of the curvature of a curve at any point is called the radius of curvature at that point.
 (a) centre (b) square **(c) reciprocal** (d) square root

Unit IV

31. A vector function \vec{f} is called solenoidal if
 (a) **$\text{div } \vec{f} = \vec{0}$** (b) $\text{grad } \vec{f} = \vec{0}$ (c) $\text{div } \vec{f} = 0$ (d) $\text{curl } \vec{f} = \vec{0}$
32. If $\nabla\phi$ is solenoidal then $\nabla^2\phi =$
 (a) $\vec{0}$ **(b) 0** (c) 1 (d) -1
33. If $r = xi + yj + zk$ then $\nabla \cdot r =$
 (a) 1 (b) 0 **(c) 3** (d) $x^2+y^2+z^2$
34. The value of $\text{div curl } \vec{f} =$ _____
 (a) **0** (b) 1 (c) \vec{f} (d) $\vec{0}$

35. If ϕ is a scalar valued function then $\nabla\phi$ represents
 (a) tangent line (b) **normal** (c) tangent plane (d) surface
36. A vector \vec{f} is called harmonic vector if _____
 (a) $\nabla\vec{f} = \vec{0}$ (b) **$\nabla^2\vec{f} = \vec{0}$** (c) $\nabla\vec{f} = \vec{f}$ (d) $\nabla^2\vec{f} = \vec{f}$
37. If \vec{f} and \vec{g} are irrotational then $\vec{f} \times \vec{g}$ is
 (a) irrotational (b) harmonic
 (c) **solenoidal** (d) neither solenoidal nor irrotational
38. Let $\phi = ax^2 + by^2 + cz^2$, ϕ satisfies the Laplace equation if
 (a) $a = 0$ (b) $a + b = 0$ (c) **$a + b + c = 0$** (d) $a = b = c = 1$
39. The directorial derivative of $\phi = xy + yz + zx$ (1,2,3) in the direction of $3\vec{i} + 4\vec{j} + 5\vec{k}$ is
 (a) $46/5$ (b) **$46/5\sqrt{2}$** (c) $46/\sqrt{2}$ (d) $23/5$
40. If $\Phi(x,y,z) = xy^2 + yz^3$ then grad ϕ at $y = 0$ is
 (a) $\vec{i} + \vec{j} + \vec{k}$ (b) $2x\vec{j}$ (c) **$z^3\vec{j}$** (d) none of the above

Unit V

41. What are the component equations of $4p^2 - 8p + 3 = 0$?
 (a) **$p = 1/2, 3/2$** (b) $p = 2, 6$ (c) $p = 1/5, 1/9$ (d) $p = 1, -1$
42. What are the solutions of an equation $y'' + ay' + b = 0$ if the roots m_1 and m_2 are real and distinct?
 (a) **e^{m_1x} and e^{m_2x}** (b) e^{m_1} and e^{m_2} (c) m_1x and m_2x (d) a and b
43. The auxiliary equation of $(D^2 + 4)y = 0$ is -----
 (a) $m^2 = 0$ (b) **$m^2 + 4 = 0$** (c) $m^2 + 3 = 0$ (d) $m^2 + 2 = 0$
44. An equation of the form $y = px + f(p)$ is called
 (a) Bessel equation (b) Legendre equation
 (c) Bernoulli's equation (d) **Clairaut equation**
45. The general solution of $(D^2 - 5D + 6)y = 0$ is -----
 (a) **$y = c_1e^{3x} + c_2e^{2x}$** (b) $y = c_1e^{-3x} + c_2e^{2x}$ (c) $y = c_1e^{3x} + c_2e^{-2x}$ (d) $y = c_1e^{-3x} + c_2e^{-2x}$
46. The particular integral of $\frac{1}{D^2} \cos 2x$ is _____
 (a) **$\frac{1}{-4} \cos 2x$** (b) $\frac{1}{4} \cos 2x$ (c) $\frac{1}{2} \cos 2x$ (d) $\cos 2x$
47. General solution of Clairaut's equation is
 (a) $y = cx$ (b) $y = x + f(c)$ (c) **$y = cx + f(c)$** (d) $y = f(c)$

Section B (2 marks)

Unit I

1. Form the equation with rational coefficients one of whose roots is $\sqrt{2}+\sqrt{3}$.
2. Form the equation with rational coefficients one of whose roots is $\sqrt{3} + i\sqrt{2}$
3. Diminish the roots of the equation $x^3 + x^2 + x - 100$ by 4.
4. Multiply the roots of the equation $3x^3 - 2x^2 - x + 1 = 0$ by 4.
5. Increase the roots of $x^3 - 5x^2 + 6x - 3 = 0$ by unity
6. Increase the roots of $3x^4 + 7x^3 - 15x^2 - 2 = 0$ by 7
7. Multiply the roots of the equation $x^4 + 2x^3 + 4x^2 + 6x + 8 = 0$ by $1/2$.
8. Multiply the roots of the equation $3x^3 - 10x^2 + 9x + 2 = 0$ by 4.
9. Diminish the roots of the equation $x^4 + 3x^3 - 2x^2 - 4x - 3 = 0$ by 3.
10. Form the equation whose roots are negative of the roots of $x^3 - x^2 + x - 4 = 0$

Unit II

11. Define upper triangular matrix
12. Define identity matrix.
13. Define diagonal matrix.
14. Define characteristic matrix .
15. Define eigen vector and eigen value.
16. If λ is an eigen value of A then $k\lambda$ is an eigen value of kA .
17. Find the eigen values of A^5 where $A = \begin{pmatrix} 3 & 0 & 0 \\ 5 & 4 & 0 \\ 3 & 6 & 1 \end{pmatrix}$
18. Find the eigen values of A^{-1} where $A = \begin{pmatrix} 3 & 1 & 5 \\ 0 & 4 & 2 \\ 0 & 0 & -1 \end{pmatrix}$
19. Find the sum and product of the eigen values of the matrix $\begin{pmatrix} 3 & -4 & 4 \\ 1 & -2 & 4 \\ 1 & -1 & 3 \end{pmatrix}$
without actually finding the eigen values.
20. Find the characteristic roots of the matrix $\begin{pmatrix} \cos\theta & -\sin\theta \\ -\sin\theta & -\cos\theta \end{pmatrix}$

Unit III

21. Define Pedal equation.
22. Find the radius of curvature at $x=\pi/2$ on the curve $y=\sin x$.
23. Show that the radius of curvature at any point of the catenary $y=c \cosh(x/c)$ is y^2/c .
24. Find the pedal equation of the curve $r^m = a^m \sin m\theta$. Hence find the radius of curvature.
25. Find the radius of curvature at any point of the curve whose pedal equation is $p=r \sin \alpha$
26. Find the curvature of the curve $xy=12$ at $(3,4)$
27. Define Evolute.
28. Find the x coordinate of the centre of curvature of the curve $x=at^2, y=2at$.
29. Find the radius of curvature of the curve $x^2/a^2 + y^2/b^2 = 1$ at (x_1, y_1) .
30. Find the radius of curvature $2y=x-x^2+x^3$ at $(1, 1/2)$.

Unit IV

31. Define scalar product.
32. Define vector product.
33. Define scalar triple product.
34. Define differentiable of vectors.
35. Define gradient of a real valued function.
36. Prove that $\text{grad}(\Phi\Psi) = \Phi \text{ grad } \Psi + \Psi \text{ grad } \Phi$
37. Show that $\nabla (\vec{a} \cdot \vec{r}) = \vec{a}$ for any constant vector \vec{a}
38. Find the magnitude of the maximum $\Phi = 2xz - y^2$
39. Define divergence of a vector valued function.
40. Define curl of a vector valued function.

Unit V

41. Define differential equation of first order and n^{th} degree.
42. Define singular solution of a differential equation.
43. With usual notation solve $p^2 - 9p + 18 = 0$.
44. Write the general solution of $(y - px)(p - 1) = p$.
45. Find the complementary function of $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$
46. Solve $(D^2 + 1)y = x$.
47. Find the particular integral of $(D^3 - 3D^2 + 3D - 1)y = x^2 e^x$.

48. Define clairauts equation.
49. Find the general solution for clairauts equation.
50. Solve $\sin px \cos y = \cos px \sin y + p$

Section C(5 Marks)

Unit I

1. Solve the equation $x^5 - x^4 + 8x^2 - 9x - 15 = 0$ if $\sqrt{3}$ and $1-2i$ are two of its roots.
2. If b and c are real and $2-i\sqrt{3}$ is a root of the equation $x^3 + x^2 + bx + c = 0$ what are its other roots. Find the value of c .
3. Obtain by Newton's method the root of the equation $x^3 - 3x + 1 = 0$ which lies between 1 and 2.
4. Solve the equation $x^4 - 14x^3 + 46x^2 - 42x + 9 = 0$ given that $5-\sqrt{22}$ is a root
5. If one root of the equation $2x^3 - 11x^2 + 38x - 39 = 0$ is $2 - 3i$, solve the equation.
6. Show that the equation $\frac{p^2}{x-a} + \frac{q^2}{x-b} + \frac{r^2}{x-c} = k$ where p, q, r, a, b, c and k are real and has no imaginary roots.
7. One root of the equation $2x^6 - 3x^5 + 5x^4 + 6x^3 - 27x + 81 = 0$ is $\sqrt{2} + i$. Find the remaining roots.
8. Solve the equation $3x^3 - 23x^2 + 72x - 70 = 0$ given that $3+\sqrt{-5}$ is a root
9. Solve the equation $x^3 - 11x^2 + 37x - 35 = 0$ given that $3+\sqrt{2}$ is a root
10. Show that $x^3 + 3x - 1 = 0$ has only one real root and correct it two places of decimals.

Unit II

11. Find the rank of the matrix. $\begin{pmatrix} 3 & -1 & 2 \\ 0 & 1 & -3 \\ 6 & -1 & 1 \end{pmatrix}$
12. Compute the inverse of the following matrix. $\begin{pmatrix} 1 & 2 & 3 \\ 0 & -1 & 4 \\ -2 & 2 & 1 \end{pmatrix}$
13. Test whether the equations $2x - 3y + 7z = 5$; $3x + y - 3z = 13$; $2x + 19y - 47z = 32$ are consistent or not.
14. Solve by matrix method the system $x - 3y - 8z + 10 = 0$; $3x + y - 4 = 0$; $2x + 5y + 6z = 13$
15. For what values of λ the equations $x + y + 3z = 0$; $4x + 3y + \lambda z = 0$; $2x + y + 2z = 0$; have non trivial solution.

16. Show that the non singular matrix $A = \begin{pmatrix} 1 & 2 \\ 3 & 1 \end{pmatrix}$ satisfies the equation $A^2 - 2A - 5I = 0$
Hence evaluate A^{-1} .
17. State and prove Cayley Hamilton theorem.
18. Verify the statement that the sum of the elements in the diagonal of a matrix is the sum of the eigen values of the matrix $A = \begin{pmatrix} -2 & 2 & -3 \\ 1 & 1 & -6 \\ -1 & -2 & 0 \end{pmatrix}$
19. If A and B are $n \times n$ matrices and B is a non singular matrix prove that A and $B^{-1}AB$ have same eigen values.
20. Prove that sum of eigen values is trace of A and product of eigen values is $|A|$

Unit III

21. Find the radius of the curvature of the curve given by
 $x^3 - 2x^2 + 3xy^2 - 4y^3 + 5x^2 - 6xy + 7y^2 - 8y = 0$
22. Show that the radius of curvature of the curve $x^2y = a(x^2 + y^2)$ at $(-2a, 2a)$ is $-2a$.
23. Find the radius of the curvature of the curve $r = a\theta$
24. Find the points on the parabola $y^2 = 8x$ at which the radius of the curvature is $125/16$.
25. Find the radius of the curvature of the following $r = a(1 - \cos\theta)$
26. Find the centre of curvature of $y = x^2$ at the origin.
27. Find the evolutes of the parabola $y^2 = 4ax$
28. Find the evolutes of the following curve $2xy = a^2$
29. Prove that the y coordinate of the centre of the curvature of the curve at the point (c, c) is $2c$.
30. Find the evolute of the curve given by $x = \cos^3\theta$ and $y = \sin^3\theta$.

Unit IV

31. Prove that $\frac{d}{dt} (\vec{u} \times \vec{v}) = \vec{u} \times \frac{d\vec{v}}{dt} + \frac{d\vec{u}}{dt} \times \vec{v}$
32. If $\vec{r} = a\cos\omega t + b\sin\omega t$ where a, b are constant vectors and ω is a constant prove that $\vec{r} \times \frac{d\vec{r}}{dt}$
33. Show that $\frac{d}{dt} \left(\frac{\vec{r}}{r} \right) = \frac{1}{r} \frac{d\vec{r}}{dt} - \frac{1}{r^2} \frac{dr}{dt} \vec{r}$
34. Show that $\frac{d}{dt} \left(\vec{r} \times \frac{d\vec{r}}{dt} \right) = \vec{r} \times \frac{d^2\vec{r}}{dt^2}$
35. If \vec{r} is the position vector of any point $P(x, y, z)$, prove that $\text{grad } r^n = nr^{n-2} \vec{r}$

36. If $\Phi(a, b) = \log \sqrt{a^2 + b^2}$ show that $\text{grad } \Phi = \frac{\vec{r} - (\vec{k} \cdot \vec{r})\vec{k}}{\{\vec{r} - (\vec{k} \cdot \vec{r})\vec{k}\} \cdot \{\vec{r} - (\vec{k} \cdot \vec{r})\vec{k}\}}$
37. If $\nabla \phi = 2xyz^3 \vec{i} + x^2z^3 \vec{j} + 3x^2yz^2 \vec{k}$ then find $\phi(x, y, z)$ if $\phi(1, -2, 2) = 4$
38. Prove that $\text{curl}(\vec{r} \times \vec{a}) = -2\vec{a}$ where \vec{a} is a constant vector.
39. Show that the vector $\vec{f} = (y^2 - z^2 + 3yz - 2x) \vec{i} + (3xz + 2xy) \vec{j} + (3xy - 2xz + 2z) \vec{k}$ is both rotational and solenoidal.
40. If \vec{f} is solenoidal prove that $\text{curl curl curl curl } \vec{f} = \nabla^4 \vec{f}$.

Unit V

41. Solve $3x - y + \log p = 0$.
42. Solve $y = px + a/p$ and also obtain the singular solution if any.
43. Solve $(D^2 + 3D + 2)y = x^2$
44. Solve $(D^2 - 4)y = e^{2x} + e^{-4x}$
45. Evaluate the particular integral of the differential equation $(D^2 + 9)y = 4\sin 3x$
46. Find the particular integral of $(D^2 - 4D + 3)y = e^x \cos 2x$
47. Solve $\frac{d^2y}{dx^2} - 4y = \cosh(2x - 1) + 3^x$
48. Solve $y'' + 4y' + 13y = 2e^{-x}$ given $y(0) = 0$ and $y'(0) = -1$
49. Solve $(D^2 + 9)y = \cos 3x$
50. Solve $\frac{d^4x}{dt^4} - 4x = \cosh t$ where $D = \frac{d}{dt}$

Section D (10 Marks)

Unit I

- Find the positive root of $x^3 - x - 3 = 0$ correct to two places of decimals by Horner's method.
- Obtain by Horner's method the root of the equation $x^3 - 7x - 7 = 0$ correct to 2 places of decimals
- Obtain by Horner's method the root of the equation $x^3 - x - 9 = 0$. correct to 2 places of decimals
- Obtain by Horner's method the root of the equation $2x^3 - 3x - 6 = 0$. correct to 2 places of decimals
- Find by Newton's method the root of the equation $x^3 - 2x - 2 = 0$ which is nearer to 1.5
- Find the negative root of $x^3 - x^2 + 12x + 24 = 0$ correct to two places of decimals.
- Find the negative root of $x^3 - 5x + 11 = 0$ correct to two places of decimals.
- Find the positive root of $x^3 + x^2 - 2x - 1 = 0$ correct to two places of decimals

by Horner's method.

9. Find by Horner's method the root of the equation $x^3 - 4x^2 + 5 = 0$ which lies between 1 and 2 correct to two places of decimals.
10. Obtain by Newton's method the root of the equation $x^3 - 5x - 3 = 0$ correct to 2 places of decimals

Unit II

11. Solve by matrix method the system $x - 3y - 8z + 10 = 0$; $3x + y - 4 = 0$; $2x + 5y + 6z = 13$
12. For what values of λ the equations $x + y + z = 1$; $x + 2y + 4z = \lambda$; $x + 4y + 10z = \lambda^2$ have a solution ? Solve completely in each case.
13. Find the values of λ for which equations $3x + y - \lambda z = 0$; $4x - 2y - 3z = 0$; $2\lambda x + 4y + \lambda z = 0$; have a non-trivial solution. Obtain the most general solutions in each case
14. For what value of λ and μ the equation $x + y + z = 6$; $x + 2y + 3z = 10$; $x + 2y + \lambda z = \mu$; have (i) unique solution (ii) no solution (iii) infinite number of solutions
15. Find the eigen values and the eigen vectors of the matrix $A = \begin{pmatrix} 1 & 1 & 3 \\ 1 & 5 & 1 \\ 3 & 1 & 1 \end{pmatrix}$
16. For the following matrices find the characteristic vectors corresponding to each characteristic root $\begin{pmatrix} 8 & -6 & 2 \\ -6 & 7 & -4 \\ 2 & -4 & 3 \end{pmatrix}$
17. Find the eigen values and the eigen vectors of the matrix $A = \begin{pmatrix} 6 & -2 & 2 \\ -2 & 3 & -1 \\ 3 & -1 & 3 \end{pmatrix}$
18. Find the eigen values and the eigen vectors of the matrix $A = \begin{pmatrix} 11 & -4 & -7 \\ 7 & -2 & -5 \\ 10 & -4 & -6 \end{pmatrix}$
19. Find the eigen values and the eigen vectors of the matrix $A = \begin{pmatrix} 2 & 2 & 1 \\ 1 & 3 & 1 \\ 1 & 2 & 2 \end{pmatrix}$
20. Using Cayley-Hamilton theorem find A^{-1} of the matrix $A = \begin{pmatrix} 2 & -1 & 1 \\ -15 & 6 & -5 \\ 5 & -2 & 2 \end{pmatrix}$

Unit III

21. The tangents at the points P and Q on the cycloid $x = a(\theta - \sin\theta)$; $y = a(1 - \cos\theta)$ are at right angles. Show that $\rho_1^2 + \rho_2^2 = 16a^2$ if ρ_1 and ρ_2 are the radii of curvature at these points.
22. Prove that the radius of curvature to the curve $y^2x = a^2(a - x)$ at $(a, 0)$ is $a/2$.
23. Find the pedal equation of the curve $r^n = a^n \cos n\theta$ and hence find ρ
24. Find the pedal equation of the cardioid $r = a(1 - \cos\theta)$ and hence prove that ρ^2/r is constant.
25. Show that the radius of the curvature at any point on the curve $r = a(1 + \cos\theta)$ varies as the square root of the radius vector. If ρ_1 and ρ_2 are the radius of curvature at the extremities of any chord which passes through the pole then prove that $(9\rho_1^2 + \rho_2^2) = 16a^2$
26. Show that the circle of curvature of the parabola $y = mx + (\frac{x^2}{a})$ at $(0,0)$ is $x^2 + y^2 = a(1 + m^2)(y - mx)$
27. Find the centre of curvature of the curve $x = a(\cos t + t \sin t)$; $y = a(\sin t + t \cos t)$ and prove that its evolute is a circle.
28. Find the radius of curvature for the curves at the indicated point $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ at $(a, 0)$ and $(0, b)$
29. Find the evolutes of the following curves $\frac{x^2}{a^2} - \frac{y^2}{b^2} = 1$
30. Find the evolutes of the following curve $2xy = a^2$

Unit IV

31. (i) Prove that $\text{grad}(\phi + \psi) = \text{grad} \phi + \text{grad} \psi$
(ii) Prove that $\text{grad}(\phi - \psi) = \text{grad} \phi - \text{grad} \psi$
(iii) Prove that $\text{grad}(\phi\psi) = \phi \text{grad} \psi + \psi \text{grad} \phi$
(iv) Prove that $\text{grad}(\frac{\phi}{\psi}) = (\psi \text{grad} \phi - \phi \text{grad} \psi) / \psi^2$
32. If $\phi = x^2z + e^{y/x}$ and $\psi = 2z^2y - xy^2$ find $\nabla(\phi + \psi)$ and $\nabla(\phi\psi)$ at $(1, 0, 2)$
33. Find ϕ if
(i) $\nabla\phi = (y^2 - 2xyz^3)\vec{i} + (3 + 2xy - x^2z^3)\vec{j} + (6z^3 - 3x^2yz^2)\vec{k}$
(ii) $\nabla\phi = (2x + 3y + 4xy^2)\vec{i} + (3x + 3y^2 + 4x^2y + z + 1)\vec{j} + (y + 2)\vec{k}$
34. Prove that $\text{grad}(\vec{f} \cdot \vec{g}) = \vec{f} \times \text{curl} \vec{g} + \vec{g} \times \text{curl} \vec{f} + (\vec{f} \cdot \nabla)\vec{g} + (\vec{g} \cdot \nabla)\vec{f}$
35. (i) If \vec{c} is a constant vector prove that $\nabla \cdot \{ [(\vec{c} \cdot \vec{r}) r^n] \vec{r} \} = (n + 4)(\vec{c} \cdot \vec{r}) r^n$
(ii) If \vec{c} is a constant vector prove that $\nabla \times [(\vec{c} \cdot \vec{r}) r^n] \vec{r} = (\vec{c} \times \vec{r}) r^n$

36. Prove that $f = e^x [(2y + 3z)\vec{i} + 2\vec{j} + 3\vec{k}]$ is irrotational. Find a function $\Phi(x, y, z)$ such that $f = \text{grad } \Phi$
37. If the vector $f(r)\vec{r}$ is solenoidal prove that $f(r) = \frac{k}{r^3}$ where k is a constant. Also prove that the vector is irrotational.

Unit V

41. Solve $xyp^2 + (3x^2 - 2y^2)p - 6xy = 0$.
42. Solve $4y = x^2 + p^2$
43. Solve $xp^2 - 2yp + x = 0$.
44. Solve $(D^2 - 2D + 2)y = e^x \sin x$
45. Solve $(D^2 + 5D + 6)y = x^2$
46. Solve $y = (x - a)p - p^2$
47. Solve $y = 2px + y^2p^3$
48. Solve $(D^2 - 4D + 4)y = 3x^2e^{2x} \sin 2x$
49. Solve $(D^2 - 6D + 13)y = 8e^{3x} \sin 2x$
50. Putting $x^2 = u$ and $y^2 = v$ bring the equation $(px - y)(x - yp) = 2p$ to Clairaut's form and then solve.

ST. MARY'S COLLEGE (Autonomous) , THOOTHUKUDI

II B.A./B.Sc./BBA/ B.Com

Semester III

NME-Mathematics for Competitive Examinations I

Question Bank

Subject Code:21UMAN31

SECTION –A(1 mark)

UNIT-I

1. H.C.F of 2^3 , 3^2 , 4 and 15 is
a) 2^3 b) 3^2 c) **1** d) 360
2. Which of the following is a pair of co – primes ?
a) (14,35) b) **(18,25)** c) (31,93) d) (32,62)
3. L.C.M of 3^3 , 4 , 4^2 and 3 is
a) 12 b) 48 c) **432** d) 27
4. H.C.F of $\frac{1}{2}$, $\frac{2}{3}$, $\frac{3}{4}$, $\frac{4}{5}$ is
a) 1 b) 12 c) $\frac{4}{5}$ d) **$\frac{1}{60}$**
5. L.C.M of $\frac{3}{4}$, $\frac{6}{7}$, $\frac{9}{8}$ is
a) **18** b) 3 c) $\frac{3}{56}$ d) $\frac{9}{28}$
6. Which of the following fractions is the greatest of all ?
 $\frac{7}{8}$, $\frac{6}{7}$, $\frac{4}{5}$, $\frac{5}{6}$
a) $\frac{6}{7}$ b) $\frac{4}{5}$ c) $\frac{5}{6}$ d) **$\frac{7}{8}$**
7. Which of the following is in ascending order ?
a) $\frac{5}{7}$, $\frac{7}{8}$, $\frac{9}{11}$ b) $\frac{5}{7}$, $\frac{9}{11}$, $\frac{7}{8}$ c) $\frac{7}{8}$, $\frac{5}{7}$, $\frac{9}{11}$ d) $\frac{9}{11}$, $\frac{7}{8}$, $\frac{5}{7}$
8. Which of the fractions $\frac{1}{2}$, $\frac{3}{7}$, $\frac{3}{5}$, $\frac{4}{9}$ is the smallest?
a) $\frac{4}{9}$ b) $\frac{3}{5}$ c) $\frac{3}{7}$ d) $\frac{1}{2}$
9. The largest natural number which exactly divides the product of any four consecutive natural numbers is
a) 6 b) 12 c) **24** d) 120

10. The number of prime factors in $2^{222} \times 3^{333} \times 5^{555}$ is

- a) 3 b) 1107 c) **1110** d) 1272

UNIT-II

11. $171 \div 19 \times 9 = \dots\dots\dots$

- a) 0 b) 1 c) 18 d) **81**

12. $5005 - 5000 \div 10 = \dots\dots\dots$

- a) 0.5 b) 50 c) 5000 d) **4505**

13. $7 + 7 \div 7 \times 7 = \dots\dots\dots$

- a) $\frac{2}{7}$ b) **14** c) $7\frac{1}{7}$ d) 42

14. $8 \div 4(3-2) \times 4 + 3 - 7 = \dots\dots\dots$

- a) -3 b) -4 c) **4** d) 5

15. $0.01 \times 0.3 \div 0.4 \times 0.5 = \dots\dots\dots$

- a) 0.015 b) 0.0375 c) **0.00375** d) 0.1

16. $\frac{(272-32)(124+176)}{17 \times 15 - 15} = \dots\dots\dots$

- a) 0 b) 2.25 c) **300** d) 225

17. $\frac{3}{48}$ is what part of $\frac{1}{12} = \dots\dots\dots$

- a) $\frac{3}{7}$ b) $\frac{1}{12}$ c) $\frac{4}{3}$ d) **$\frac{3}{4}$**

18. The value of $\frac{1}{3 + \frac{2}{2 + \frac{1}{2}}}$ is $= \dots\dots\dots$

- a) $\frac{5}{19}$ b) $\frac{19}{5}$ c) $\frac{4}{5}$ d) **$\frac{5}{4}$**

19. $\frac{\frac{1}{5} \div \frac{1}{5} \text{ of } \frac{1}{5}}{\frac{1}{5} \text{ of } \frac{1}{5} \div \frac{1}{5}} = \dots\dots\dots$

- a) 1 b) 5 c) $\frac{1}{5}$ d) **25**

20. The value of $\frac{9^2 \times 18^4}{3^{16}} = \dots\dots\dots$

- a) $\frac{2}{3}$ b) $\frac{4}{9}$ c) **$\frac{16}{81}$** d) $\frac{32}{243}$

UNIT -III

21. The average of first nine multiples of 3 is _____

- a) 12 b) 12.5 c) **15** d) 18.5

22. The average of numbers 0.64202, 0.64203, 0.64202 and 0.64201 is _____

- a) 0.642020 b) 0.642021 c) 0.642022 **d) 0.642025**
23. The average of 30 results is 20 and the average of other 20 results is 30. The average of all the results is _____
- a)24** b)25 c)48 d)50
24. The average of odd numbers upto 100 is _____
- a)51 **b)50** c)49.5 d)49
25. If a, b, c, d, e are five consecutive odd numbers ,their average is _____
- a) $5(a+4)$ b) $abcde/5$ c) $5(a+b+c+d+e)$ **d) $a+4$**
26. A cricketer makes 72,59,18,101 and 7 runs respectively in five matches played by him. His average score is _____
- a) 52 b)64 **c)51.4** d)61.4
27. The average score of a cricketer in 2 matches is 27 and that in 3 others is 32. Then his average score in 5 matches is _____
- a)11.8 b)25 c)29.5 **d)30**
28. The average of 8 numbers is 21. If each of the numbers is multiplied by 8, the average of the remaining numbers is _____
- a)8 b)21 c)29 **d)168**
29. A ship sails out to a mark at the rate of 15 km/hr and sails back at the rate of 10 km/hr. The average rate of sailing is _____
- a)5km/hr **b)12km/hr** c)12.5km/hr d)25km/hr
30. The average of first five multiples of 3 is _____
- a)9** b) 12 c)15 d)18.5

UNIT-IV

31. A can do a piece of work in 30 days while B can do it in 40 days. In how many days can A and B working together do it?
- a) 70 days b) $42 \frac{3}{4}$ days c) $27 \frac{1}{7}$ days **d) $17 \frac{1}{7}$ days**
32. A and B can together do a piece of work in 15 days. B alone can do it in 20 days. In how many days can A alone do it ?
- a) 30 days b) 40 days c) 45 days **d) 60 days**
33. A and B can do a piece of work in 6 days and A alone can do it in 9 days. The time taken by B alone to do work is:
- a) 18 days** b) 15 days c)12 days d) $\frac{1}{2}$ days.
34. The rates of working of A and B are in the ratio 3:4. The number of days taken by them to finish the work are in the ratio :

- a) 3:4 b) 9:16 c) **4:3** d) none of these
35. A can do a certain job in 12 days. B is 60% more efficient than A. The number of days, it takes B to do the same piece of work, is :
- a) 6 b) $6\frac{1}{4}$ c) $7\frac{1}{2}$ d) 8
36. A alone can finish a work in 10 days and B alone can do it in 15 days. If they work together and finish it, then out of a total wages of Rs. 75, A will get:
- a) Rs. 30 b) Rs. 37.50 c) **Rs. 45** d) Rs. 50

UNIT-V

37. A speed of 36 km/hr is the same as.....
- a)**10m/sec** b)7.2m/sec c)2m/sec d)129.6m/sec
38. A speed of 55m/sec is the same as.....
- a)**198km/hr** b)11km/hr c) $15\frac{5}{18}$ km/hr d)275km/hr
39. A speed of 30.6 km/hr is the same as.....
- a)5.1m/sec **b)8.5m/sec** c)110.16m/sec d)1.7m/sec
40. A speed of 22.5 m/sec is the same as.....
- a)40.5km/hr **b)81km/hr** c)36.8km/hr d)72km/hr
41. A man crosses a street 600m long in 5 minutes. His speed in km/hr is.....
- a)7.2** b)3.6 c)10 d)8.4
42. If a man covers 10.2km. in 3 hrs, the distance covered by him in 5 hours is
- a)18km b)15km c)16km **d)17km**
43. If a man takes 4 hours to cover a distance of 15km, how much time will be needed to cover 63 km at the same speed.....
- a)12hrs36 min **b)16hrs 48min** c)16hrs 4min d)15hrs32min
44. A man goes uphill with an average speed of 35km/hr and comes down with an average speed of 45 km/hr. The distance travelled in both the cases being the same , the average speed for the entire journey is.....
- a) $38\frac{3}{8}$ km/hr **b) $39\frac{3}{8}$ km/hr** c)40km/hr d)39km/hr

SECTION- B(2 marks)

UNIT-I

- 1.Find the lowest term of $\frac{561}{748}$.

2. Find the H.C.F of 1485 and 356 .
3. Find the L.C.M of 87 and 145 .
4. Find the L.C.M of $\frac{2}{3}$, $\frac{4}{9}$, $\frac{5}{6}$ and $\frac{7}{12}$.
5. The product of two numbers is 1600 and their H.C.F is 5 . Find the L.C.M of the numbers.
6. The H.C.F of two numbers is 16 and their L.C.M is 160 . If one of the numbers is 32, then find the other number.
7. The H.C.F of two numbers is 4 and their L.C.M is 576. If one of the numbers is 64, find the other number.
8. Find the greatest possible length which can be used to measure exactly the lengths 7m, 3m 85 cm , 12m 95cm.
9. Three measuring rods are 64cm , 80cm and 96 cm in length . Find the least length of cloth that can be measured exact number of times using any one of the above rod.
10. H.C.F of the three numbers is 12. If they be in the ratio 1:2:3 , then find the numbers.

UNIT-II

11. Find the value of $\frac{31}{10} \times \frac{3}{10} + \frac{7}{5} \div 20$.
12. Evaluate: $3120 \div 26 + 13 \times 30$
13. Evaluate: $\frac{0.125+0.027}{0.25-0.15+0.09}$
14. Find the value of $\frac{69842 \times 69842 - 30158 \times 30158}{69842 - 30158}$.
15. If $\frac{x}{2y} = \frac{3}{2}$, then find the value of $\frac{2x+y}{x-2y}$.
16. If we multiply a fraction by itself and divide the product by its reciprocal, the fraction thus obtained is $18\frac{26}{27}$. Then find the original fraction.
17. Find the value of $1 + \frac{1}{4 \times 3} + \frac{1}{4 \times 3^2} + \frac{1}{4 \times 3^3}$ upto four places of decimals.
18. Simplify: $3.5 \div 0.7$ of $7 + 0.5 \times 0.3 - 0.1$.
19. Evaluate: $\frac{0.7541 \times 0.7541 \times 0.7541 - 0.2459 \times 0.2459 \times 0.2459}{0.7541 \times 0.7541 + 0.7541 \times 0.2459 + 0.2459 \times 0.2459}$
20. Ravi earns twice as much in January as in each of the other months. What part of his annual earnings he earns in that month?

UNIT-III

21. The average weight of a class of 24 students is 35 kg. If the weight of the teacher be included, the average rises by 400gms. Find the weight of the teacher.

22. A batsman make a score of 87 runs in the 17th inning and thus increased his average by 3. Find his average after 17th inning.
23. Out of three numbers, the first is twice the second and is half of the third. If the average of the three numbers is 56, find the three numbers and the smallest number.
24. The average age of three boys is 15 years. If their ages are in the ratio 3:5:7, find the age of the youngest boy.
25. The average height of 30 girls out of a class of 40 is 160cms and that of the remaining girls is 156cms. Find the average height of the whole class.
26. The average score of a cricketer for 10 matches is 43.9 runs. If the average of the first six matches is 53, find the average for the last four matches.
27. The average of 11 results is 50. If the average of first six results is 49 and that of last six is 52, find the sixth result.
28. The average of 50 numbers is 38. If two numbers, namely 45 and 55 are discarded, what is the average of the remaining numbers?
29. The average temperature of first three days is 27°C and that of the next three is 29°C. If the average of the whole week is 28.5°C, find the temperature of the last day of the week.
30. The average of 25 results is 18; that of first twelve is 14 and that of last twelve is 17. Calculate the thirteenth result.
31. The average of 13 results is 68. The average of first seven is 63 and that of the last seven is 70. Find the seventh result.

UNIT-IV

32. If A can do a piece of work in 20 days which B can do in 12 days. B worked at it for 9 days then find the number of days A can finish the remaining work .
33. If A,B and C contract a work for Rs.550. Together A and B are to do $\frac{7}{11}$ of the work. Then find the share of C .
34. If A can do a piece of work in 24 days while B alone can do it in 16 days. With the help of C, they finish the work in 8 days, then find the number of days C alone can do the work .
35. Sunil completes a work in 4 days whereas Dinesh completes the work in 6 days. Ramesh works $1\frac{1}{2}$ times as fast as sunil. How many days it will take for the three together to complete the work?
36. A can do a piece of work in 10 days and B can do the same piece of work in 20 days. They start the work together but after 5 days, A leaves off. Find the number of days B will do the remaining piece of work.
37. A,B and C together earn Rs.150 per day while A and C together earn Rs.94 and B and C together earn Rs.76. Find the daily earning of C.
38. A sum of money is sufficient to pay A's wages for 21 days or B's wages for 28 days. Find the money is sufficient to pay the wages of both
39. If 12 men or 18 women can reap a field in 14 days. Then find the number of days that 8 men and 16 women will take to reap it.

40. 10 men can finish a piece of work in 10 days, whereas it takes 12 women to finish it in 10 days. If 15 men and women undertake to complete the work, how many days will they take to complete it ?
41. If 5 men or 9 women can finish a piece of work in 19 days, then find the number of days 3 men and 6 women will do the same work .
42. 2 men and 3 women can finish a piece of work in 10 days, while 4 men can do it in 10 days. In how many days will 3 men and 3 women finish it?

UNIT-V

43. (i) Convert 45km/hr into m/sec
(ii) Convert 6m/sec into km/hr
44. Harish covers a certain distance by car driving at 70km/hr and he returns back at the starting point riding on a scooter at 55km/hr. Find his average speed for the whole journey.
45. A and B are two towns. Mr. Faruqi covers the distance from A to B on cycle at 16km/hr. However, he covers the distance from B to A on foot at 9km/hr. Find his average speed during the whole journey.
46. A train is moving with a speed of 92.4 km/hr. How many meters will it cover in 10 minutes.
47. A distance is covered in 2 hours 45min. at 4km/hr. How much time will be taken to cover it at 16.5km/hr.
48. A boy goes to school with a speed of 3km/hr and returns to the village with a speed of 2km/hr. If he takes 5 hours in all, then find the distance between the village and the school.
49. A car completes a certain journey in 8 hours . It covers half the distance at 40km/hr and the rest at 60km/hr. Find the length of the journey.
50. A car covers four successive three km stretches at speeds of 10km/hr , 20km/hr , 30km/hr and 60km/hr respectively. Find the average speed over this distance.
51. A train covers a distance in 50 minutes, if it runs at a speed of 48km/hr on an average. Find the speed at which the train must run to reduce the time of journey to 40 minutes.
52. Ram travels a certain distance at 3 km/hr and reaches 15 min. late. If he travels at 4km/hr, he reaches 15min. earlier. Find the distance he has to travel.

53. A man , on tour , travels first 160km at 64km/hr and the next 160km at 80km/hr. Find the average speed for the first 320km of the tour.

SECTION –C(4 marks)

UNIT-I

- Find the H.C.F and L.C.M of $\frac{2}{3}$, $\frac{8}{9}$, $\frac{32}{81}$, $\frac{10}{27}$.
- The H.C.F of two numbers 12 and their difference is also 12. Find the two numbers.
- The sum of two numbers is 216 and their H.C.F is 27. Find the two numbers.
- Find the least number of square tiles required to pave the ceiling of a room 15m 17cm long and 9m 2cm broad .
- Find the least perfect square number which is divisible by 3,4,5,6 and 8.
- Six bells commence tolling together and toll at interval of 2,4,6,8,10 and 12 seconds respectively. In 30 minutes, how many times do they toll together?
- Find the total number of prime factors of the product $(8)^{20} \times (15)^{24} \times (7)^{15}$.
- Find the total number of prime factors of the product $(6)^{10} \times (7)^{17} \times (11)^{27}$.
- Find the least number which when divided by 16,18 and 21 leaves the remainder 3,5 and 8 respectively.
- The H.C.F and L.C.M of two numbers are 44 and 264 respectively. If the first number divided by 2 , the quotient is 44. Find the other number.
- What least number be subtracted from 1294 so that the remainder when divided by 9 , 11,13 will leave in each cases the same remainder 6 ?
- Find the smallest number which is divisible by 12,15,20 and is a perfect square.

UNIT-II

- Find the value of $3 \div [(8-5) \div \{ (4-2) \div (2 + \frac{8}{13}) \}]$
- Find the value of $(1\frac{3}{5} - \frac{2}{3} \div \frac{12}{13} + \frac{7}{5} \times \frac{1}{3})$.
- Evaluate: $1 + \frac{1}{1 + \frac{1}{1 + \frac{1}{1 + \frac{1}{9}}}}$
- Find the value of $1 + 1 \div \{ 1 + 1 \div (1 + \frac{1}{3}) \}$.
- The value of $48 \div 12 \times (\frac{9}{8} \text{ of } \frac{4}{3} \div \frac{3}{4} \text{ of } \frac{2}{3})$.

18. Evaluate: $1 + \frac{1}{2 + \frac{1}{1 - \frac{1}{3}}}$

19. In an examination, a student was asked to find $(\frac{3}{14})$ of a certain number. By mistake he found $(\frac{3}{4})$ of it. His answer was 150 more than the correct answer, find the given number.
20. The highest score in an inning was $\frac{3}{11}$ of the total and the next highest was $\frac{3}{11}$ of the remainder. If the scores differed by 9, then find the total score.
21. In a family, the father took $\frac{1}{4}$ of the cake and he had 3 times as much as others had. Find the total number of family members.

UNIT-III

22. The average of 10 numbers is calculated as 15. It is discovered later on that while calculating the average one number, namely 36 was wrongly read as 26. Find the correct average.
23. Out of four numbers, the average of first three is 15 and that of the last three is 16. If the last number is 19, what is the first number?
24. Average temperature of first 4 days of a week is 38.6°C and that of the last 4 days is 40.3°C . If the average temperature of the week be 39.1°C , find the temperature on the 4th day.
25. The average of 6 observations is 12. A new seventh observation is included and the new average is decreased by 1. Find the seventh observation.
26. The average of the daily income of A, B and C is Rs.60. If B earns Rs.20 more than C and A earns double of what C earns, what is the daily income of C?
27. The average weight of a class of 40 students is 40 kg. If the weight of the teacher be included, the average weight increases by 500 gms. What is the weight of the teacher?
28. The average age of four players is 18.5 years. If the age of the coach is also included, the average age increases by 20%. What is the age of the coach?
29. The average age of four children in a family is 12 years. If the spacing between their ages is 4 years, find the age of the youngest child.
30. 10 sheep and 5 pigs were bought for Rs.6000. If the average price of a sheep is Rs.450, find the average price of a pig.
31. The average temperature for Monday, Tuesday and Wednesday was 40°C . The average for Tuesday, Wednesday and Thursday was 41°C . If the temperature on Thursday is 42°C , find the temperature on Monday.
32. The average expenditure of a man for the first five months is Rs.120 and for the next seven months it is Rs.130. If he saves Rs.290 in that year, what is his monthly average income?

33. The average salary of 20 workers in an office is Rs.1900 per month. If the manager's salary is added, the average salary becomes Rs.2000 per month. What is the manager's annual salary?

UNIT-IV

34. A can build a wall in 30 days , which B alone can build in 40 days. If they build it together and get a payment of Rs.700, what is B's share?
35. A can do $\frac{1}{3}$ of a work in 5 days and B can do $\frac{2}{5}$ of the work in 10 days. In how many days both A and B together can do the work?
36. A and B can do a piece of work in 18 days ; B and C in 24 days ; A and C in 36 days. In what time can they do it all working together?
37. A and B can do a piece of work in 12 days ; B and C in 15 days ; C and A in 20 days . Find the number of days A alone can do the work.
38. A can do a piece of work in 80 days . He works at it for 10 days and B alone finishes the work in 42 days . In how many days both A and B together can do the work?
39. A can do a certain job in 25 days which B alone can do in 20 days. A started the work and was joined by B after 10 days .How many days will take to complete?
40. Mahesh and Umesh can complete a work in 10 days and 15 days respectively. Umesh starts the work and after 5 days Mahesh also joins him.How many days will take to complete?
41. If 3 men or 4 women can construct a wall in 43 days, then find the number of days that 7 men and 5 women take to construct it.
42. A does half as much work as B in three-fourth of the time. If together they take 18 days to complete a work, how much time shall B take to do it?

UNIT-V

43. A man covers a certain distance between his house and office on scooter. Having an average speed of 30 km/hr , he is late by 10 min. However, with a speed of 40 km/hr, he reaches his office 5 min. earlier. Find the distance between his house and office.
44. Walking $\frac{3}{4}$ of his usual speed, a peon is 10 min. too late to his office. Find his usual time to cover the distance.
45. Suresh travelled 1200 km by air which formed $(\frac{2}{5})$ of his trip. One third of the whole trip, he travelled by car and the rest of the journey he performed by train. Find the distance travelled by train.
46. A and B are two stations. A train goes from A to B at 64 km/hr and returns to A at a slower speed .If its average speed for the whole journey is 56 km/hr, at what speed did it return?
47. By walking at $\frac{3}{4}$ of his usual speed , a man reaches his office 20 minutes later than usual. Find His usual time .
48. A certain distance is covered at a certain speed. If half of this distance is covered in double the time, find the ratio of the two speed .

49. A bullock cart has to cover a distance of 80 km in 10 hours . If it covers half of the journey in $(\frac{3}{5})$ th time, what should be its speed to cover the remaining distance in the time left?

SECTION-D(10 marks)

UNIT-I

- Find the H.C.F of 1026, 1215 and 2349.
- (i) Find the L.C.M of 15, 18, 24, 27 and 56.
(ii) Find the L.C.M of 22, 54, 108, 135 and 198.
- (i) Arrange the following fraction into ascending order $\frac{2}{3}, \frac{5}{9}, \frac{7}{11}, \frac{3}{7}, \frac{9}{13}$ and $\frac{15}{19}$.
(ii) Arrange the following fraction into descending order $\frac{7}{9}, \frac{3}{5}, \frac{5}{7}$.
- (i) Find the greatest number of four digits which is divisible by each one of the numbers 12, 18, 21 and 28
(ii) Find the smallest number which diminished by 3 is divisible by 21, 28, 36 and 45.
- (i) The traffic lights at three different road crossings change after every 48sec, 72sec and 108 sec respectively. If they all change simultaneously at 8:20:00 hrs, then find the time they will again change simultaneously.
(ii) Find the greatest number which can divide 1354, 1866 and 2762 leaving the same remainder 10 in each case.

UNIT-II

- (i) Simplify: $1 \div \frac{3}{7}$ of $(2(\frac{3}{10} + 2\frac{3}{5}) + \frac{1}{5}) \div 1\frac{2}{5} - \frac{2}{7}$
(ii) Simplify: $\frac{4\frac{1}{7} - 2\frac{1}{4}}{3\frac{1}{2} + 1\frac{1}{7}} \div \frac{1}{2 + \frac{1}{2 + \frac{1}{5 - \frac{1}{5}}}}$
- (i) Simplify: $(2 - \frac{1}{3})(2 - \frac{3}{5})(2 - \frac{5}{7}) \dots (2 - \frac{999}{1001})$
(ii) If $\frac{x}{y} = \frac{4}{5}$, then find the value of $(\frac{4}{7} + \frac{2y-x}{2y+x})$
- Find the value of $\{7\frac{1}{2} + \frac{1}{2} \div \frac{1}{2} \text{ of } \frac{1}{4} - \frac{2}{5} \times 2\frac{1}{3} \div 1\frac{7}{8} \text{ of } (1\frac{2}{5} - 1\frac{1}{3})\}$.
- Find the value of $7\frac{1}{2} - [2\frac{1}{4} \div \{1\frac{1}{4} - \frac{1}{2}(1\frac{1}{2} - \frac{1}{3} - \frac{1}{6})\}]$.

10. (i) In a certain office, $\left(\frac{1}{3}\right)$ of the workers are women, $\left(\frac{1}{2}\right)$ of the women are married and $\left(\frac{1}{3}\right)$ of the married women have children. If $\left(\frac{3}{4}\right)$ of the men are married and $\left(\frac{2}{3}\right)$ of the married men have children, then find the part of workers are without children.
- (ii) Find the smallest fraction which should be subtracted from the sum of $1\frac{3}{4}$, $2\frac{1}{2}$, $5\frac{7}{12}$, $3\frac{1}{3}$ and $2\frac{1}{4}$ to make the result a whole number.

UNIT-III

11. (i) The average weight of 8 persons is increased by 2.5 kg when one of them whose weight is 56 kg is replaced by a new man. Find the weight of the new man.
- (ii) Average monthly income of a family of 4 earning members was Rs.735. One of the earning members died and therefore the average income came down to Rs.650. find the income of the deceased.
12. (i) The average age of a family of 6 members is 22 years. If the age of the youngest member be 7 years, find the average age of the family at the birth of the youngest member.
- (ii) The average age of four children in a family is 12 years. If the spacing between their ages is 4 years, find the age of the youngest child.
13. (i) On a journey across Delhi, a taxi averages 30 km/hr for 60% of the distance, 20 km/hr for 20% of it and 10 km/hr for the remainder. What is the average speed of the whole journey?
- (ii) With an average speed of 40 km/hr a train reaches its destination in time. If it goes with an average speed of 35 km/hr , it is late by 15 minutes. What is the total journey?
14. (i) The average weight of A, B, C is 45 kg. If the average weight of A and B is 40 kg and that of B and C is 43 kg, then find the weight of B.
- (ii) The average weight of three men A, B and C is 84 kg. Another man D joins the group and the average now becomes 80 kg. If another man E, whose weight is 3 kg more than that of D, replaces A, then the average weight of B, C, D and E becomes 79 kg. Find the weight of A.
15. (i) The average temperature of Monday, Tuesday, Wednesday and Thursday was 38°C and that of Tuesday, Wednesday, Thursday and Friday was 40°C . If the temperature on Monday was 30°C , What was the temperature of Friday?

- (ii) The mean temperature of Monday to Wednesday was 37°C and of Tuesday to Thursday was 34°C . If the temperature on Thursday was $\frac{4}{5}$ th that of Monday, what was the temperature on Thursday?
16. (i) The average age of 11 players of a cricket team is decreased by 2 months when two of them aged 17 years and 20 years are replaced by two reserves. What is the average age of the reserves?
- (ii) The average age of 5 members of a committee is the same as it was 3 years ago, because an old member has been replaced by a new member. What is the difference between the ages of old and new member?
17. (i) The average of 5 consecutive numbers is n . If the next two numbers are also included, find the average of 7 numbers.
- (ii) Ten years ago, the average age of a family of 4 members was 24 years. Two children having been born, the average age of the family is same today. What is the present age of the youngest child if they differ in age by 2 years?

UNIT-IV

18. (i) A is thrice as good a workman as B and is therefore able to finish a piece of work in 60 days less than B. Find the time in which they can do it, working together.
- (ii) A can do a piece of work in 10 days, while B alone can do it in 15 days. They work together for 5 days and the rest of the work is done by C in 2 days. If they get Rs. 450 for the whole work how should they divide the money?
19. (i) Twelve men can complete a work in 8 days. Three days after they started the work, 3 more men joined them. In how many days will all of them together complete the remaining work?
- (ii) A and B can do a piece of work in 45 days respectively. They began the work together, but A leaves after some days and B finished the remaining work in 23 days. After how many days did A leave?
20. (i) A certain number of men complete a piece of work in 60 days. If there were 8 men more, the work could be finished in 10 days less. How many men were originally there?
- (ii) 8 children and 12 men complete a certain piece of work in 9 days. If each child takes twice the time taken by a man to finish the work, in how many days will 12 men finish the same work?
21. (i) A and B can do a piece of work in 12 days; B and C in 15 days; C and A in 20 days. In how many days will they finish it together and separately?
- (ii) A can do a piece of work in 6 days and B alone can do it in 8 days. A and B undertook to do it for Rs. 320. With the help of C, they finished it in 3 days. How much is paid to C?

UNIT –V

22. (i) The distance between two stations, Delhi and Amritsar is 450 km. A train starts at 4 p.m from Delhi and moves towards Amritsar at an average speed of 60 km/hr. Another train starts from Amritsar at 3.20 p.m and moves towards Delhi at an average speed of 80 km/hr. How far from Delhi will the two trains meet and at what time?
- (ii) A train leaves Meerut at 6 a.m and reaches Delhi at 10 a.m Another train leaves Delhi at 8 a.m and reaches Meerut at 11.30 a.m. Find the time do the two trains cross one another.
23. (i) A man cycles from A to B , a distance of 21 km in 1 hr 40 min. The road from A is level for 13 km and then it is uphill to B. The man's average speed on level is 15 km/hr. Find his average uphill speed.
- (ii) A man travels 35km partly at 4 km/hr and 5km/hr. If he covers former distance at 5km/hr and later distance at 4 km/hr, he could cover 2km/hr more in the same time. Find the time taken to cover the whole distance.
24. (i) A is twice as fast as B and B is thrice as fast as C. The journey covered by C in 42 minutes. Find the time to cover the distance by A.
- (ii) A man walking at 3km/hr crosses a square field diagonally in 2min. Find the area of the field.

QUESTION BANK

II B.Sc Mathematics

Core – Modern Algebra

Semester IV

Subject Code: 21UMAC41

Section A

UNIT- I

1. The relation ρ defined on Z by $a\rho b \Leftrightarrow ab$ is odd is _____.
(a) reflexive and symmetric (b) reflexive but not symmetric
(c) **symmetric but not reflexive** (d) neither reflexive nor symmetric.
2. Let S be the set of all lines in the Euclidean plane $R \times R$. Define $a\rho b \Leftrightarrow a$ is parallel to b . Then P is _____.
(a) not reflexive (b) not symmetric
(c) not transitive (d) **an equivalence relation.**
3. Let S be a finite set with n elements. The number of elements in the largest equivalence relation on S is _____.
(a) n (b) **n^2** (c) $2n$ (d) $3n$.
4. The range of the function $f : R \rightarrow R$ given by $f(x) = 1$ is _____.
(a) 1 (b) R (c) **$\{1\}$** (d) 0.
5. If $f : R \rightarrow R$ is given by $f(x) = 2x - 1$ and $g : R \rightarrow R$ is given by $g(x) = 3x + 1$ then the composition $(f \circ g)(x)$ is _____.
(a) **$6x + 1$** (b) $6x - 2$ (c) $5x$ (d) $6x^2 - x - 1$.
6. The function $f : R \rightarrow R +$ defined by $f(x) = 3x$ then f is _____.
(a) bijection (b) 1-1 but not onto
(c) **1-1 and onto** (d) neither 1-1 nor onto.
7. Consider the function $f : R \rightarrow R^+ +$ given by $f(x) = e^x$ is _____.
(a) **a bijection** (b) 1-1 but not onto
(c) onto but not 1-1 (d) neither 1-1 nor onto.
8. Let $f : A \rightarrow B$ and $g : B \rightarrow C$ be two functions such that $(g \circ f) : A \rightarrow C$ is 1-1 then f is _____.
(a) **1-1** (b) onto
(c) 1-1 and onto (d) neither 1-1 nor onto.
9. Any binary operation defined on a singleton set is _____.
(a) **commutative and associative** (b) commutative but not associative
(c) associative but not commutative (d) neither commutative nor associative.

10. The inverse of $f : R \rightarrow R$ given by $f(x) = x + 3$ is_____.
- (a) $f^{-1}(x) = 3 - x$ (b) $f^{-1}(x) = x - 3$
 (c) $f^{-1}(x) = \frac{1}{x} + 3$ (d) $f^{-1}(x) = \frac{1}{x} - 3$.

UNIT- II

11. The order of the element -1 in $(Z, +)$ is_____.
- (a) **2** (b) infinite (c) 1 (d) -1 .
12. Let H and K be subgroups of G , then _____.
- (a) $H \cup K$ is a subgroup of G (b) **$H \cap K$ is a subgroup of G**
 (c) $H \times K$ is a subgroup of G (d) HK is a subgroup of G .
13. The symmetric group S_n has _____.
- (a) **$n!$ elements** (b) n elements (c) $n!/2$ elements (d) n_{c_2}
14. Let H be a subgroup of G . Then _____.
- (a) H is cyclic (b) H is cyclic if G is abelian
 (c) H is cyclic if G is non-abelian (d) **H is cyclic if G is cyclic.**
15. The order of an element a in a group G with the identity element e is_____.
- (a) an integer n such that $a^n = e$ (b) **the least positive integer n such that $a^n = e$**
 (c) a positive integer n such that $a^n = e$ (d) $a^n = a$.
16. If G is a finite group and H is any subgroup of G then order of H divides the order of G . This theorem is known as _____.
- (a) Cayley's theorem (b) **Lagrange's theorem**
 (c) Euler's theorem (d) Fermat's theorem.
17. Let G be a group of prime order. Then _____.
- (a) G has no subgroups (b) **G has no proper subgroups**
 (c) G has more than 2 subgroups (d) G is nonabelian.
18. In the quotient group G/N , N is_____.
- (a) any proper subgroup of G (b) a cyclic subgroup of G
 (c) **a normal subgroup of G** (d) a proper abelian subgroup of G .
19. A nonempty subset H of a group G is a subgroup of G iff $a, b \in H \Leftrightarrow$ _____.
- (a) **$ab^{-1} \in H$** (b) $ab \in H$ (c) $aa^{-1} \in H$ (d) $a \in H$.
20. Let G be a finite group. Let H and K be subgroup of G such that H is a subgroup of K , Then _____.
- (a) $[G:H][H:K] = [G:K]$ (b) **$[G:K][K:H] = [G:H]$**
 (c) $[G:K][H:K] = [G:H]$ (d) $[H:K] = [G:K]$.

UNIT- III

21. The groups $(Z, +)$ and $(Q, +)$ are not isomorphic because_____.

- (a) $(\mathbb{Z}, +)$ is cyclic but $(\mathbb{Q}, +)$ is not cyclic
 (b) $(\mathbb{Z}, +)$ is abelian but $(\mathbb{Q}, +)$ is not abelian.
 (c) $(\mathbb{Z}, +)$ is finite group but $(\mathbb{Q}, +)$ is an infinite group
 (d) every element other than 0 is of infinite order in $(\mathbb{Z}, +)$ but every element is of finite order in $(\mathbb{Q}, +)$.
22. The kernel of a homomorphism $f : G \rightarrow G'$ is_____.
 (a) a subgroup of G' (b) a normal subgroup of G'
 (c) **normal subgroup of G** (d) $\{e\}$.
23. The kernel of the homomorphism $f : (\mathbb{Z}, +) \rightarrow (\mathbb{Z}, +)$ given $f(x) = 2x$ is_____.
 (a) \mathbb{Z} (b) $\{1/2\}$ (c) $\{1\}$ (d) **$\{0\}$** .
24. The number of automorphisms of a cyclic group of order n is_____.
 (a) **$\phi(n)$** (b) n (c) n^2 (d) 1.
25. In a group $b^5 = e$ and $aba^{-1} = a^2$ for some $a, b \in G$. The order of a is_____.
 (a) 5 (b) 10 (c) 0 (d) **divisor of 10**.
26. Let G be an abelian group and $O(a) = i, O(b) = j$ for $a, b \in G$.
 Let $\text{g.c.d}(i, j) = 1$. Then $O(ab) =$ _____.
 (a) $i + j$ (b) **ij** (c) 1 (d) i^j .
27. Let $f : G \rightarrow G'$ be a homomorphism and if f is onto then it is called an _____.
 (a) automorphism (b) isomorphism (c) **epimorphism** (d) monomorphism.
28. A homomorphism of a group to itself is called an_____.
 (a) **endomorphism** (b) automorphism (c) isomorphism (d) epimorphism.
29. An isomorphism of a group G to itself is called_____.
 (a) **automorphism** (b) isomorphism (c) epimorphism (d) homomorphism.
30. Any two finite cyclic groups of the same order are_____.
 (a) abelian (b) cyclic (c) **isomorphic** (d) noncyclic.

UNIT – IV

31. A ring is called a Boolean ring if
 (a) $an = 0, \text{ for some } n \in \mathbb{N}$ (b) **$a^2 = a, \forall a \in R$**
 (c) $a^2 = e, \forall a \in R, e$ is multiplicative identity (d) $a^2 = 0, \forall a \in R$
32. In the ring $(\mathbb{Z}_4, \oplus, \odot)$, the subset $(\{0, 2\}, \oplus, \odot)$ is_____.
 (a) not a sub ring (b) **a sub ring with identity**
 (c) a sub ring without identity (d) a sub field.
33. In the ring $M_2(R)$ _____ is a unit
 (a) $\begin{pmatrix} 1 & 1 \\ 1 & 1 \end{pmatrix}$ (b) $\begin{pmatrix} 0 & 0 \\ 0 & 0 \end{pmatrix}$ (c) $\begin{pmatrix} 2 & 4 \\ 2 & 4 \end{pmatrix}$ (d) **$\begin{pmatrix} 4 & 2 \\ 2 & 4 \end{pmatrix}$**
34. In $(\mathbb{Z}, +, \cdot)$ _____

- (a) 1 is the only unit (b) -1 is the only unit
 (c) **1 and -1 are the only units** (d) there is no unit
35. The algebraic structure which is a ring is _____
 (a) $(\wp(S), \Delta, \cup)$ (b) $(\wp(S), \Delta, \cap)$ (c) $(\wp(S), \cup, \cap)$ (d) $(\wp(S), \cap, \cup)$.
36. An example of an infinite commutative ring without identity is _____
 (a) $(\mathbb{Z}, +, \cdot)$ (b) $(\mathbb{Z}_n, \oplus, \odot)$ (c) $(2\mathbb{Z}, +, \cdot)$ (d) $M_2(\mathbb{R})$.
37. The characteristic of $(Q, +, \cdot)$ is _____
 (a) **0** (b) 6 (c) 4 (d) ∞ .
38. The map $f : \mathbb{Z} \rightarrow \mathbb{Z}$ defined by $f(x) = 2x$ is _____
 (a) ring homomorphism (b) ring isomorphism
 (c) ring automorphism (d) **group homomorphism.**
39. The isomorphism $f : Q \rightarrow Q$ is the _____.
 (a) open map (b) closed map (c) **identity map** (d) inverse map.

Unit – V

40. Choose the correct statement _____.
 (a) **Every prime ideal of \mathbb{R} is a maximal ideal of \mathbb{R}**
 (b) In the ring of even integers (4) is a maximal ideal but not a prime ideal
 (c) In \mathbb{Z} , (6) is a maximal ideal
 (d) (4) is a maximal ideal in \mathbb{Z} .
41. Any ordered integral domain is of characteristic _____.
 (a) 1 (b) **0** (c) infinite (d) prime.
42. In $M_2(\mathbb{R})$ the set of all matrices of the form $\begin{pmatrix} a & 0 \\ b & 0 \end{pmatrix}$ is _____.
 (a) ideal (b) **left ideal** (c) right ideal (d) not left ideal.
43. Any _____ is a principal ideal domain.
 (a) ideal (b) **Field** (c) group (d) sub field.
44. Every maximal ideal of \mathbb{R} is _____.
 (a) **prime ideal** (b) Field (c) group (d) sub field.
45. If $f(ab) = f(a)f(b)$ for all $a, b \in R$ then the function $f: R \rightarrow R'$ is called _____.
 (a) **homomorphism** (b) isomorphism (c) automorphism (d) monomorphism.
46. $f : R \rightarrow R'$ defined by $f(a) = 0$ for all $a \in R$ is called _____.
 (a) ring homomorphism (b) ring isomorphism
 (c) ring automorphism (d) **trivial homomorphism.**
47. The homomorphism $f : R \rightarrow R'$ defined by $\{a/a \in R \text{ and } f(a) = 0\}$ is _____.

- (a) **Kernel** (b) isomorphism (c) automorphism (d) monomorphism.
48. Any _____ is an Euclidean ideal domain.
 (a) ideal (b) **Field** (c) group (d) sub field.
49. Every ideal of an Euclidean domain is a _____.
 (a) **prime ideal** (b) left ideal (c) right ideal (d) maximal ideal.
50. Any Euclidean domain is _____.
 (a) prime ideal (b) **Unique Factorization Domain**
 (c) Field (d) a Group.

Section – B

Unit – I

1. What is a relation?. Give example.
2. Define transitive relation with example.
3. What is an equivalence class? Give example.
5. Define partial ordered set with example.
6. Define chain.
7. Define quotient set.
8. Define canonical map.
9. Define composition of functions.
10. Define characteristic function on E.

Unit – II

11. What is a permutation? Give example.
12. Define cycle of length n.
13. Prove that every permutation is a product of transpositions.
14. Define centre of a group G.
15. Define normalizer of a group G
16. Define cyclic subgroup of G generated by a.
17. Find the order of the element a^{18} in Z_{30}
18. Find the number of generators of the cyclic group of order 50.
19. Prove that subgroup of a cyclic group is abelian.
20. Find the left coset of $(5Z, +)$ in $(Z, +)$.
21. Define index of H in G
22. State Fermat theorem.

Unit – III

23. Define normal group.
24. Prove the centre of group G is a normal subgroup of G .
25. Define quotient group
26. Define isomorphism
27. Show that $(R *, .)$ is not isomorphic to $(R, +)$
28. Define inner automorphism.
29. Construct the group of automorphisms of $(Z, +)$
30. Define canonical homomorphism.
31. Define endomorphism
32. Define kernel of f , where f is a homomorphism.
33. Prove that any homomorphic image of a cyclic group is cyclic.

Unit – IV

34. Define ring
35. Define ring of Gaussian integers.
36. Define Boolean ring with example.
37. When a ring is said to be commutative?
38. Define unit in R .
39. Define skew field
40. Define field
41. What is an integral domain?
42. Define ring isomorphism.
43. Find all the zero divisors of Z_{12} .
44. Define characteristic of ring R .
45. Define subring.
46. Prove that the only idempotent elements of an integral domain are 0 and 1.

Unit – V

47. Define left ideal with example.
48. Define right ideal with example.
49. Define quotient ring.
50. Define maximal ideal.
51. Define prime ideal.
52. Show that (3) is a prime ideal of Z .

53. Show that homomorphic image of an integral domain need not be an integral domain.
54. Define irreducible element.
55. Define Euclidean domain with an example.
56. Let a be a non-zero element of an Euclidean domain R . If $d(a) = 0$, then prove that a is a unit in R .
57. Prove that 5 is not prime element in the ring of Gaussian integers.
58. Define Euclidean ring.
59. Define the term relatively prime.

Section – C

Unit - I

1. Show that the union of two equivalence relations need not be an equivalence relation.
2. Find the smallest and largest equivalence relations on a set S .
3. (i) Show that if $f: A \rightarrow B$, $g: B \rightarrow C$ and $h: C \rightarrow D$ are functions then

$$h \circ (g \circ f) = (h \circ g) \circ f$$
 (ii) Show that if $f: A \rightarrow B$, $g: B \rightarrow C$ are bijections, Then $g \circ f: A \rightarrow C$ is also a bijection.
4. Show that $f: R \rightarrow R$ defined by $f(x) = 2x - 3$ is a bijection and find its inverse. Also compute $f^{-1} \circ f$ and $f \circ f^{-1}$.
5. Is the function $f: R - \{3\} \rightarrow R - \{1\}$ given by $f(x) = x - 2 / x - 3$ a bijection? Find its inverse.
6. Prove that a set X is infinite iff there exists a bijection between X and a proper subset A of X .
7. Prove that $f(A_1 \cap A_2) \subseteq f(A_1) \cap f(A_2)$.
8. Prove that $f^{-1}(B_1 \cup B_2) = f^{-1}(B_1) \cup f^{-1}(B_2)$

Unit - II

9. Show that any permutation can be expressed as a product of disjoint cycles and product of transpositions.
10. Let A_n be the set of all even permutations in S_n . Then prove that A_n is a group containing $n!/2$ permutations.
11. Let H be a subgroup of G . Then prove the following.
 - (a) The identity element of H is the same as that of the identity element of G .
 - (b) For each $a \in H$, the inverse of a in H is the same as the inverse of a in G .
12. Discuss and prove that a non empty subset H of a group G is a subgroup of G iff

$$a, b \in H \implies ab^{-1} \in H.$$
13. Let H be a nonempty finite subset of G . If H is closed under the operation in G then show that H is a subgroup of G .
14. (i) Prove that any cyclic group is abelian

- (ii) Prove that a subgroup of a cyclic group is cyclic.
15. Let G be a group and $a \in G$. Then show that the order of a is same as that of the order of the cyclic group generated by ' a '.
 16. Let G be a group and ' a ' be an element of order n in G , then prove that $a^m = e$ iff n divides m .
 17. Let G be a group and ' a ' be an element of order n in G , then show that the order of a^s , where $0 < s < n$ is n/d where d is the g.c.d of n and s .
 18. If G is a finite group with even number of elements then show that G contains atleast one element of order 2.
 19. Prove that the order of a permutation p is the l.c.m of the lengths of its disjoint cycles.
 20. Prove the following statements
 - (i) The order of any element of a finite group G divides the order of G .
 - (ii) Every group of prime order is cyclic
 21. Let H and K be two finite subgroups of a group G . Then find the order of $HK / H \cap K$
 22. State and prove Euler's theorem.

Unit- III

23. Prove that every subgroup of an abelian group is a normal subgroup.
24. (i) Prove that the intersection of two normal subgroups of a group G is a normal subgroup of G .
(ii) Show that the centre H of a group G is a normal subgroup of G .
25. Let H be a subgroup of G . Let $a \in G$. Then prove that aHa^{-1} is a subgroup of G .
26. Show that if H and N are subgroups of a group G and N is normal in G , then $H \cap N$ is normal in H . Show by an example that $H \cap N$ need not be normal in G .
27. If H is a subgroup of G and N is normal subgroup of G then prove that HN is a subgroup of G .
28. M and N are normal subgroups of a group G such that $M \cap N = \{e\}$. Show that every element of M commutes with every element of N .
29. Let N be a normal subgroup of G . Then prove that G/N is a group under the operation defined by $Na Nb = Nab$.
30. Let $f : G \rightarrow G'$ be an isomorphism. Then prove the following.
(i) $f(e) = e'$ where e and e' are the identity elements of G and G' respectively
(ii) $f(a^{-1}) = [f(a)]^{-1}$.
31. Let $f : G \rightarrow G'$ be an isomorphism. Let $a \in G$. Then show that the order of " a " is equal to the order of $f(a)$. (ie) the isomorphism preserves the order of each element in a group.
32. Prove that any infinite cyclic group G is isomorphic to $(\mathbb{Z}, +)$.
33. Prove that any finite cyclic group of order n is isomorphic to (\mathbb{Z}_n) .
34. Let $f : G \rightarrow G'$ be a homomorphism. Then show that f is 1-1 iff $\ker f = \{e\}$.

35. Prove that any homomorphic image of a cyclic group is cyclic
36. Let H be a subgroup of index 2 in a group G . Show that H is a normal subgroup of G .
37. Show that $\text{Aut } Z_8 \cong V_4$
38. Let $f: G \rightarrow G'$ be an isomorphism. If G is cyclic then prove that G' is also cyclic.

Unit - IV

39. Let R be a ring and $a, b \in R$. Then prove the following:
 - (i) $0a = a0 = 0$ (ii) $a(-b) = (-a)b = -(ab)$.
 - (iii) $(-a)(-b) = ab$. (iv) $a(b - c) = ab - ac$.
40. If R is a ring such that $a^2 = a$ for all $a \in R$, prove that
 - (i) $a + a = 0$. (ii) $a + b = 0 \Rightarrow a = b$. (iii) $ab = ba$.
41. Show that Z_n is integral domain iff n is prime.
42. Prove that the only isomorphism $f: Q \rightarrow Q$ is the identity map.
43. Prove that non-empty subset S of a ring R is a subring iff

$$a, b \in S \Rightarrow a - b \in S \text{ and } ab \in S.$$
44. Prove that if R is a ring with identity then the set of all units in R forms a group under multiplication.
45. (i) Prove that the ring R has no zero divisors iff cancellation law is valid in R .
(ii) Show that any unit in R cannot be a zero-divisor.
46. Prove that Z_n is an integral domain iff n is prime.
47. (i) Define field (ii) Prove that any finite integral domain is a field.
48. Give examples for the following
 - (i) A finite commutative ring with identity which is not an integral domain.
 - (ii) A finite non-commutative ring.
 - (iii) An infinite non-commutative ring with identity.
 - (iv) An infinite ring having no identity.
49. Show that the characteristic of an integral domain D is either 0 or a prime number.
50. Prove that the intersection of two subrings of a ring R is a subring of R .

Unit- V

51. Let R be a commutative ring with identity, then prove that an ideal M of R is maximal iff R/M is a field.
52. Prove that a field has no proper ideals.
53. Show that $1 + i$ is a prime element in the ring R of Gaussian integers.
54. Let R be an Euclidean domain. Then show that any two elements $a, b \in R$ have $g.c.d$ and it is of the form $ax + by$ where $x, y \in R$.
55. Let a be a non-zero element of an Euclidean domain R . Then prove that a is a unit in R iff $d(a) = d(1)$.
56. (i) Show that the homomorphic image of an integral domain need not be an integral

domain.

(ii) Prove that any homomorphism of a field to itself is either one-one or maps every element to 0.

57. Let R be a commutative ring with identity. Then prove that R is a field iff R has no proper ideals.

Section – D

Unit- I

- Let ρ be an equivalence relation defined on a set S . Then prove the following:
(a) $a\rho b \Leftrightarrow [a] = [b]$
(b) Any two distinct equivalence classes are disjoint.
(c) S is the union of all equivalence classes.
- Show that any partition of a set S determines an equivalence relation ρ such that the members of the partition are precisely the equivalence classes defined by ρ .
- If ρ and σ are equivalence relations defined on a set S , prove that $\rho \cap \sigma$ is an equivalence relation.
- Show that $f : R \rightarrow (0,1)$ defined by $f(x) = 1/2[1 + (x/1 + x)]$ is a bijection.
- Let $f: A \rightarrow B$ be a bijection. Then prove that $f^{-1}: B \rightarrow A$ is also a bijection and $f^{-1} \circ f = i_A$ and $f \circ f^{-1} = i_B$.
- A function $f: A \rightarrow B$ is a bijection iff there exists a unique $g: B \rightarrow A$ such that $g \circ f = i_A$ and $f \circ g = i_B$.
- If $f: A \rightarrow B$ and $g: B \rightarrow C$ are bijections then $(f \circ g)^{-1} = f^{-1} \circ g^{-1}$.
- Let $f: X \rightarrow Y$ be a function. If $A \subseteq X$ and $B \subseteq Y$ then show that
(a)(i) $A \subseteq f^{-1}[f(A)]$
(ii) $f[f^{-1}(B)] \subseteq B$
(b) Give an example to show that equality need not hold in (i) and (ii)
(c) In each case when will the equality hold?

Unit - II

- Show that the union of two subgroups of a group G is a subgroup iff one is contained in the other.
- Let A and B be two subgroups of a group G . Then prove that AB is a subgroup of G iff $AB = BA$.
- Let G be a group. Let $H = \{a/a \in G \text{ and } ax = xa \text{ for all } x \in G\}$ (ie) H is the set of all elements which commute with every other element. Show that H is a subgroup of G .
- Let G be a group and let " a " be a fixed element of G .
Let $H_a = \{x/x \in G \text{ and } ax = xa\}$
(ie) H_a is the set of all elements in G which commute with " a ", Show that H_a is a subgroup of G .
- Let G be a group and $a, b \in G$. Then prove the following
(i) $\text{order of } a = \text{order of } a^{-1}$
(ii) $\text{order of } a = \text{order of } b^{-1}ab$
(iii) $\text{order of } ab = \text{order of } ba$

14. Let G be a group and H be a subgroup of G . Then prove that,
 - (i) $a \in H \Rightarrow aH = H$
 - (ii) $aH = bH \Rightarrow a^{-1}b \in H$
 - (iii) $a \in bH \Rightarrow a^{-1} \in Hb^{-1}$
 - (iv) $a \in bH \Rightarrow aH = bH$.
15. State and prove Lagrange's theorem.
16. State and prove Fermat's theorem.
17. Prove that a group G has no proper subgroups if it is cyclic group of prime order.
18. Let H and K be two subgroups of G of finite index in G . Prove that $H \cap K$ is a subgroup of finite index in G .

Unit- III

19. Show that a subgroup N of G is normal iff the product of two right coset of N is again a right coset of N .
20. Show that the isomorphism is an equivalence relation among groups.
21. If G is a group and G' is a set with the binary operation and there exists a one-one mapping f onto G' such that $f(ab) = f(a)f(b)$ for all $a, b \in G$ then show that G' is also a group.
22. Let G be any group. Show that the function $f : G \rightarrow G$ given by $f(x) = x^{-1}$ is an isomorphism $\Leftrightarrow G$ is abelian.
23. State and prove Cayley's theorem.
24. Let G be a cyclic group generated by a . Let $f : G \rightarrow G$ be a mapping such that $f(xy) = f(x)f(y)$ then prove that f is an automorphism of G iff $f(a)$ is a generator of G .
25. State and prove the fundamental theorem of homomorphism of groups.

Unit- IV

26. Show that Z_n is field iff n is prime.
27. Prove that the set F of all real numbers of the form $a + b\sqrt{2}$ where $a, b \in Q$ is a field under the usual addition and multiplication of real numbers.
28. Let R and R' be rings and $f : R \rightarrow R'$ be an isomorphism. Then prove the following:
 - (i) R is commutative $\Rightarrow R'$ is commutative.
 - (ii) R is ring with identity $\Rightarrow R'$ is a ring with identity.
 - (iii) R is an integral domain $\Rightarrow R'$ is an integral domain.
 - (iv) R is a field $\Rightarrow R'$ is a field.
29. Let A be any abelian group and let $Hom(A)$ be the set of all endomorphisms of A . We define $(f + g)(x) = f(x) + g(x)$ and $fg = f \circ g$. Then prove that $Hom(A)$ is a ring.

Unit- V

30. Let R be a ring and I be a subgroup of $(R, +)$, then show that Multiplication in R/I given by $(I + a)(I + b) = I + ab$ is well defined iff I is an ideal of R .
31. Let R and R' be rings and $f : R \rightarrow R'$ be a homomorphism. Then prove the following
 - (i) $f(0) = 0'$
 - (ii) $f(-a) = -f(a)$ for all $a \in R$.
 - (iii) If S is a subring of R , then $f(S)$ is a subring of R' . In particular $f(R)$ is a subring of R' .
 - (iv) If S is an ideal of R , then $f(S)$ is an ideal of $f(R)$.

- (v) If S' is a subring of R' , then $f^{-1}(S')$ is a subring of R .
 - (vi) If S' is an ideal of $f(R)$, then $f^{-1}(S')$ is an ideal of R .
 - (vii) If R is a ring with identity 1 and $f(1) \neq 0'$, $f(1) = 1'$ is the identity of $f(R)$.
 - (viii) If R is a commutative ring then $f(R)$ is also commutative.
32. (i) Define maximal ideal.
 (ii) Let R be a commutative ring with identity. Then prove that an ideal M of R is maximal iff R / M is field.
 33. (i) Define prime ideal.
 (ii) Let R be any commutative ring with identity. Let P be an ideal of R . Then prove that P is a prime ideal $\Leftrightarrow R / P$ is an integral domain.
 34. Prove that the ring of Gaussian integers $R = \{a + bi / a, b \in \mathbb{Z}\}$ is an Euclidean domain where we define $d(a + ib) = a^2 + b^2$.
 35. Prove that any Euclidean domain R is a Unique Factorization Domain.
 36. State and prove fundamental theorem of homomorphism for rings.

Semester IV

SECTION – A

UNIT – I

- The Paasche's value of PI_{01} is _____.
 (a) $\frac{\sum p_0 q_0}{\sum p_0 q_1} \times 100$ (b) $\frac{\sum p_1 q_0}{\sum p_0 q_1} \times 100$ (c) $\frac{\sum p_1 q_1}{\sum p_0 q_1} \times 100$ (d) $\frac{\sum p_0 q_1}{\sum p_0 q_1} \times 100$
- Time reversal test is $I_{01} \times I_{10} =$ _____.
 (a) 1 (b) 2 (c) $\sqrt{2}$ (d) -1
- With standard notations Paasche's index number is -----
 (a) $\frac{\sum p_1 q_0}{\sum p_0 q_1} \times 100$ (b) $\frac{\sum p_1 q_0}{\sum p_1 q_1} \times 100$ (c) $\frac{\sum p_1 q_1}{\sum p_0 q_1} \times 100$ (d) $\frac{\sum p_1 q_1}{\sum p_0 q_0} \times 100$
- Fisher's index number is -----of Laspeyres's and Paasche's index number
 (a) arithmetic mean (b) **geometric mean** (c) harmonic mean (d) addition
- The formula for the time reversal test is -----
 (a) **$I_{01} \times I_{10} = 1$** (b) $I_{01} \times I_{10} = 0$ (c) $I_{01} + I_{10} = 1$ (d) $I_{01} - I_{10} = 0$
- _____ index number is the ideal index number.
 (a) Laspeyres's (b) Paasche's (c) Bowley's (d) **Fisher's**
- Laspeyres's index number is defined to be _____.
 (a) $\frac{\sum p_1 q_0}{\sum p_0 q_1} \times 100$ (b) $\frac{\sum p_1 q_0}{\sum p_0 q_0} \times 100$ (c) $\frac{\sum p_1 q_1}{\sum p_0 q_1} \times 100$ (d) $\frac{\sum p_1 q_1}{\sum p_0 q_0} \times 100$
- Bowley's index number is -----of Laspeyres's and Paasche's index number
 (a) **arithmetic mean** (b) geometric mean (c) harmonic mean (d) addition
- The factor reversal test is $I_{pq} \times I_{qp} =$ _____.
 (a) $\frac{\sum p_1 q_0}{\sum p_0 q_1}$ (b) $\frac{\sum p_1 q_0}{\sum p_1 q_1}$ (c) $\frac{\sum p_1 q_1}{\sum p_0 q_1}$ (d) $\frac{\sum p_1 q_1}{\sum p_0 q_0}$
- Cost of living index number I_{01} is _____.
 (a) $\frac{\sum p_1 q_0}{\sum p_0 q_1} \times 100$ (b) $\frac{\sum p_1 q_0}{\sum p_0 q_0} \times 100$ (c) $\frac{\sum p_1 q_1}{\sum p_0 q_1} \times 100$ (d) $\frac{\sum p_1 q_1}{\sum p_0 q_0} \times 100$
- Bowley's index number is _____.
 (a) $L_{I_{01}} + P_{I_{01}}$ (b) $L_{I_{01}} \times P_{I_{01}}$ (c) $\frac{L_{I_{01}} + P_{I_{01}}}{2}$ (d) $\frac{L_{I_{01}} \times P_{I_{01}}}{2}$
- Fisher's index number is _____.
 (a) $\sqrt{L_{I_{01}} + P_{I_{01}}}$ (b) $\sqrt{L_{I_{01}} \times P_{I_{01}}}$ (c) $\sqrt{\frac{L_{I_{01}} + P_{I_{01}}}{2}}$ (d) $\sqrt{\frac{L_{I_{01}} \times P_{I_{01}}}{2}}$
- Laspeyres's index number does not satisfy the _____ reversal test.
 (a) time (b) factor (c) **both (a) and (b)** (d) commodity

UNIT – II

- _____ is designed to control the percentage or proportion of defectives per sample.
 (a) C-chart (b) **p-chart** (c) R-chart (d) \bar{X} -chart
- _____ variation can be detected and corrected quickly.
 (a) Chance (b) **Assignable** (c) Both (a) and (b) (d) coefficient

16. The _____ is used to show the quality averages of the sample drawn from a given process.
 (a) C-chart (b) p-chart (c) R- chart (d) \bar{X} -chart
17. The _____ is used to show the variability or dispersion of the quality produced by a given process.
 (a) C-chart (b) p-chart (c) **R- chart** (d) \bar{X} -chart
18. _____ is the companion chart to \bar{X} -chart
 (a) C-chart (b) p-chart (c) **R- chart** (d) \bar{X} -chart
19. The _____ is designed to control the number of defects per unit.
 (a) **C-chart** (b) p-chart (c) R- chart (d) \bar{X} -chart
20. S.Q.C techniques were developed by _____
 (a) **W.A.Shewhart** (b) A.L.Bowley (c) Karl Pearson (d) Edgeworth
21. _____ involve the statistical analysis of the inspection data.
 (a) **Statistical Quality Control** (b) Quality control (c) Probability (d) charts
22. _____ are the types of Control charts.
 (a) Variables (b) Attributes (c) **Both (a) and (b)** (d) limits
23. The Upper Control Limit for \bar{X} Chart is _____
 (a) $\bar{\bar{X}} + 3\sigma_{\bar{X}}$ (b) $\bar{\bar{X}} - 3\sigma_{\bar{X}}$ (c) $\bar{\bar{X}} \pm 3\sigma_{\bar{X}}$ (d) $\bar{X} + 3\sigma_{\bar{X}}$
24. The Lower Control Limit for \bar{X} Chart is _____
 (a) $\bar{\bar{X}} + 3\sigma_{\bar{X}}$ (b) $\bar{\bar{X}} - 3\sigma_{\bar{X}}$ (c) $\bar{\bar{X}} \pm 3\sigma_{\bar{X}}$ (d) $\bar{X} + 3\sigma_{\bar{X}}$
25. The upper control limit for \bar{X} chart is _____.
 (a) $\bar{\bar{X}} \pm A_2\bar{R}$ (b) $\bar{\bar{X}} + A_2\bar{R}$ (c) $\bar{\bar{X}} - A_2\bar{R}$ (d) $\bar{X} - A_2\bar{R}$
26. The lower control limit for \bar{X} chart is _____.
 (a) $\bar{\bar{X}} \pm A_2\bar{R}$ (b) $\bar{\bar{X}} + A_2\bar{R}$ (c) $\bar{\bar{X}} - A_2\bar{R}$ (d) $\bar{\bar{X}} - A_2\bar{R}$
27. The Upper Control Limit for R Chart is _____
 (a) $\bar{R} + 3\sigma_R$ (b) $\bar{R} - 3\sigma_R$ (c) $\bar{R} \pm 3\sigma_R$ (d) $R + 3\sigma_R$
28. The Lower Control Limit for R Chart is _____
 (a) $\bar{R} + 3\sigma_R$ (b) $\bar{R} - 3\sigma_R$ (c) $\bar{R} \pm 3\sigma_R$ (d) $R + 3\sigma_R$
29. The Upper Control Limit for R Chart is _____
 (a) $D_1\bar{R}$ (b) $D_2\bar{R}$ (c) $D_3\bar{R}$ (d) **$D_4\bar{R}$**
30. The Lower Control Limit for R Chart is _____
 (a) $D_1\bar{R}$ (b) $D_2\bar{R}$ (c) **$D_3\bar{R}$** (d) $D_4\bar{R}$
31. The Upper Control Limit for C Chart is _____
 (a) $\bar{C} + 3\sqrt{\bar{C}}$ (b) $\bar{C} - 3\sqrt{\bar{C}}$ (c) $\bar{C} \pm 3\sqrt{\bar{C}}$ (d) $\bar{C} \pm 3\sqrt{\bar{C}}$
32. The Lower Control Limit for C Chart is _____
 (a) $\bar{C} + 3\sqrt{\bar{C}}$ (b) $\bar{C} - 3\sqrt{\bar{C}}$ (c) $\bar{C} \pm 3\sqrt{\bar{C}}$ (d) $\bar{C} \pm 3\sqrt{\bar{C}}$

UNIT – III

33. The standard deviation of the sampling distribution of a statistic is known as _____.
 (a) normal error (b) **standard error** (c) Type I error (d) Type II error
34. The standard error of the proportion of successes is _____.
 (a) npq (b) \sqrt{npq} (c) $\sqrt{\frac{pq}{n}}$ (d) $\sqrt{\frac{np}{q}}$
35. The standard error of mean is _____.
 (a) $\frac{\sigma}{\sqrt{n}}$ (b) $\frac{\sigma}{n}$ (c) $\frac{\sigma}{\sqrt{2n}}$ (d) $\frac{\sqrt{\sigma}}{n}$
36. The standard error of standard deviation is _____.

- (a) $\frac{\sigma}{\sqrt{n}}$ (b) $\frac{\sigma}{n}$ (c) $\frac{\sigma}{\sqrt{2n}}$ (d) $\frac{\sqrt{\sigma}}{n}$
37. The standard error of variance is _____ .
- (a) $\frac{\sigma}{\sqrt{n}}$ (b) $\sigma^2 \sqrt{\frac{2}{n}}$ (c) $\frac{\sigma}{\sqrt{2n}}$ (d) $\frac{\sqrt{\sigma}}{n}$
38. The standard error of coefficient of correlation is _____ .
- (a) $\frac{1-r^2}{\sqrt{n}}$ (b) $\frac{1-r^2}{n}$ (c) $\frac{\sqrt{1-r^2}}{n}$ (d) $\sqrt{\frac{1-r^2}{n}}$
39. The sample is said to be large if its sample size exceeds _____ .
- (a) 100 (b) 50 (c) 40 (d) **30**
40. Rejects the hypothesis when it is true is known as _____ error.
- (a) normal (b) standard (c) **Type I** (d) Type II
41. Accept the hypothesis when it is false is known as _____ error .
- (a) normal (b) standard (c) Type I (d) **Type II**
42. The standard error of number of success is _____ .
- (a) npq (b) \sqrt{npq} (c) $\sqrt{\frac{pq}{n}}$ (d) $\sqrt{\frac{np}{q}}$
43. The standard error of the difference between proportions is _____ .
- (a) $pq \sqrt{\frac{1}{n_1} + \frac{1}{n_2}}$ (b) $p \sqrt{q \left(\frac{1}{n_1} + \frac{1}{n_2} \right)}$ (c) $q \sqrt{p \left(\frac{1}{n_1} + \frac{1}{n_2} \right)}$ (d) $\sqrt{pq \left(\frac{1}{n_1} + \frac{1}{n_2} \right)}$
44. 95% fiducial limits of population mean are _____ .
- (a) $\bar{X} \pm 1.95 \text{ S.E.}$ (b) $\bar{X} \pm \mathbf{1.96 \text{ S.E.}}$ (c) $\bar{X} \pm 1.97 \text{ S.E.}$ (d) $\bar{X} \pm 1.98 \text{ S.E.}$
45. 99% fiducial limits of population mean are _____ .
- (a) $\bar{X} \pm \mathbf{2.58 \text{ S.E.}}$ (b) $\bar{X} \pm 1.96 \text{ S.E.}$ (c) $\bar{X} \pm 2.57 \text{ S.E.}$ (d) $\bar{X} \pm 1.97 \text{ S.E.}$

UNIT – IV

46. χ^2 -test for goodness of fit for a set of n observations is _____
- (a) $\chi^2 = \frac{\sum(O+E)^2}{\sum E}$ (b) $\chi^2 = \frac{\sum(O-E)^2}{\sum E}$ (c) $\chi^2 = \sum \frac{(O+E)^2}{E}$ (d) $\chi^2 = \sum \frac{(O-E)^2}{E}$
47. If n_1 and n_2 are the sizes of the distribution the d.f for F-test is
- (a) (n_1, n_2) (b) $(\mathbf{n_1-1, n_2-1})$ (c) (n_1+1, n_2+1) (d) (n_1+1, n_2-1)
48. The difference of two means in the case of small samples is tested by the formula
- (a) $t = \frac{\bar{X}_1 - \bar{X}_2}{s}$ (b) $t = \frac{\bar{X}_1 - \bar{X}_2}{s} \sqrt{\frac{n_1 + n_2}{n_1 n_2}}$
- (c) $t = \frac{\bar{X}_1 - \bar{X}_2}{s} \sqrt{\frac{n_1 - n_2}{n_1 n_2}}$ (d) $t = \frac{\bar{X}_1 - \bar{X}_2}{s} \sqrt{\frac{n_1 n_2}{n_1 + n_2}}$
49. The degrees of freedom for F- distribution is _____
- (a) n-1 (b) n-2 (c) $(\mathbf{n_1 - 1, n_2 - 1})$ (d) $n_1 + n_2 - 2$
50. χ^2 distribution was found by _____ .
- (a) Gosset (b) **Karl Pearson** (c) Fisher (d) Royden
51. Mean of the χ^2 distribution is _____ .
- (a) 4v (b) 3v (c) 2v (d) **v**
52. t – distribution was done by _____ .
- (a) **Gosset** (b) Karl Pearson (c) Fisher (d) Royden
53. F – test is formed by _____ .
- (a) Gosset (b) Karl Pearson (c) **Fisher** (d) Royden
54. The value of χ^2 range from _____ .
- (a) $-\infty \text{ to } \infty$ (b) **0 to ∞** (c) -1 to 1 (d) 0 to 1

55. The variance of a χ^2 distribution is _____.
 (a) 4v (b) 3v (c) 2v (d) v

UNIT – V

56. In three Criteria of Classification the value of Mean square v_4 is _____.
 (a) $\frac{V_1}{(n-1)(n-2)}$ (b) $\frac{V_2}{(n-1)(n-2)}$ (c) $\frac{V_3}{(n-1)(n-2)}$ (d) $\frac{V_4}{(n-1)(n-2)}$
57. In one criteria the degrees of freedom within the samples is _____.
 (a) k (b) k+1 (c) k-1 (d) **N - k**
58. In one criteria the degrees of freedom between the samples is _____.
 (a) k (b) k+1 (c) **k-1** (d) n-k
59. The degrees of freedom for within class means in one criteria is _____.
 (a) N-1 (b) k-1 (c) **N-k** (d) h - 1
58. In one criteria the mean square value within the samples is _____.
 (a) $\frac{V_1}{(N-k)}$ (b) $\frac{V_2}{(N-k)}$ (c) $\frac{V_3}{(N-k)}$ (d) $\frac{V_4}{(N-k)}$
60. In one criteria the mean square value between the samples is _____.
 (a) $\frac{V_1}{(N-k)}$ (b) $\frac{V_2}{(N-k)}$ (c) $\frac{V_1}{(k-1)}$ (d) $\frac{V_2}{(k-1)}$
61. In two criteria the degrees of freedom between the rows is _____.
 (a) k (b) k+1 (c) **k-1** (d) N - k
62. In two criteria the degrees of freedom between the columns is _____.
 (a) k (b) k-1 (c) **h-1** (d) h - k
63. In two criteria the residual error is _____.
 (a) k (b) k-1 (c) h-1 (d) **(k - 1)(h - 1)**
64. In two criteria the mean square value between the rows is _____.
 (a) $\frac{V_1}{(k-1)}$ (b) $\frac{V_2}{(h-1)}$ (c) $\frac{V_1}{(h-k)}$ (d) $\frac{V_2}{(h-k)}$
65. In two criteria the mean square value between the columns is _____.
 (a) $\frac{V_1}{(k-1)}$ (b) $\frac{V_2}{(h-1)}$ (c) $\frac{V_1}{(h-k)}$ (d) $\frac{V_2}{(h-k)}$
66. In two criteria the mean square value of residual error is _____.
 (a) $\frac{V_1}{(k-1)}$ (b) $\frac{V_2}{(h-1)}$ (c) $\frac{V_3}{(k-1)(h-1)}$ (d) $\frac{V_4}{(k-1)(h-k)}$
67. In three criteria the degrees of freedom between the rows is _____.
 (a) n (b) **n - 1** (c) (n - 2) (d) (n - 1)(n - 2)
68. In three criteria the degree of freedom between the columns is _____.
 (a) n (b) **n - 1** (c) n - 2 (d) (n - 1)(n - 2)
69. In three criteria the residual error is _____.
 (a) n (b) n - 1 (c) n - 2 (d) **(n - 1)(n - 2)**

Section – B (2 marks)

Unit - I

1. Define Index number.
2. Define Fixed Base Method.
3. Define Chain Base Method.
4. Define Arithmetic Mean and Geometric Mean Index Number.
5. Define Marshall – Edgeworth's Index Number and Fisher's Index Number.
6. Prove that Fisher's Index Number is an Ideal Index Number.
7. Write the formulas to find the Cost of Living Index Number.

8. Write the formulas to find Fixed base index and Chain base index of current year.

Unit - II

9. Define S.Q.C.
10. Define Chance and Assignable Variations.
11. Define Control Charts.
12. What are the types of control chart and explain them briefly.
13. Write the steps to construct \bar{X} chart.
14. Write the steps to construct R - chart.
15. Write the steps to construct C - chart.
16. Write the steps to construct p - chart.
17. What are the uses of C- chart?
18. State any two advantages of S.Q.C.
19. Define Acceptance Sampling.

Unit - III

20. What is meant by Testing of Hypothesis?
21. Define Null hypothesis with an example.
22. Define Alternative hypothesis and its types.
23. What are the errors in testing of hypothesis?
24. Define level of significance and its types.
25. What are various tests of significance for attributes?
26. Write the S.E for the tests of difference of proportions.
27. Write the S.E of the difference between two standard deviations.

Unit - IV

28. Define t-distribution.
29. Write any three properties of t-distribution.
30. Give the formula of t-distribution for testing the difference between means of two independent samples.
31. What are the limitations of tests of significance?
32. Write the steps to determine the value of χ^2 .
33. Define degrees of freedom.
34. What are the limitations in the use of χ^2 – test.
35. Define F-test.

Unit - V

36. Define ANOV.
37. What are the two classes of ANOV?
38. Define one criteria of classification.
39. Draw the analysis of variance table for one criterion.
40. Define two criteria of classification.
41. Draw the analysis of variance table for two criterion.
42. Define Latin square of order n.

SECTION – C

UNIT - I

1. Calculate the index number by taking 2007 as the base year.

Year	Price of commodity
2000	4
2001	5
2002	6

2003	7
2004	8
2005	10
2006	9
2007	10
2008	11

2. From the following data of the whole sale price of rice for the 5 years construct the index Number taking 1987 as the base .

Years	1987	1988	1989	1990	1991	1992
Price of rice per kg.	5.00	6.00	6.50	7.00	7.50	8.00

3. From the following data construct the simple aggregative index number for 1991 taking 1990 as the base.

Commodities	Price in 1990 Rs	Price in 1991 Rs
A	50	70
B	40	60
C	80	90
D	110	120
E	20	20

4. For the data given below calculate the index numbers taking
(i) 1984 as base year (ii) 1991 as base year.

Year	1984	1985	1986	1987	1988	1989	1990	1991	1992
Price of wheat perkg	4	5	6	7	8	10	9	10	11

5. From the following data construct an index number for 1970 taking 1969 as the base by price relatives method using
(i) A.M (ii) G.M for averaging the relatives.

Commodities	Price in 1969 Rs	Price in 1970 Rs
A	150	170
B	40	60
C	80	90
D	100	120
E	20	25

6. Calculate Fisher's index number for 1992 for the following data

Year	Rice		Wheat		Flour	
	Price	Quantity	Price	Quantity	Price	Quantity
1988	9.3	100	6.4	11	5.1	5
1992	4.5	90	3.7	10	2.7	3

7. Calculate Fisher's index number for 1992 for the following data

Year	Tomato		Brinjal		Onion	
	Price	Quantity	Price	Quantity	Price	Quantity
1980	4	50	3	10	2	5
1990	10	40	8	8	4	4

8. Find Fisher's index number for the following data.

Commodities	Base year		Current year	
	Price	Quantity	Price	Quantity
A	10	25	12	30
B	8	21	9	25
C	4.5	28	6.5	35
D	3.5	16	4	20

9. From the fixed base index numbers given below prepare chain base index numbers.

Year	1987	1988	1989	1990	1991	1992
Fixed base index(1987 as base)	94	98	102	95	98	100

10. Find the cost of living index number for 1992 on the base of 1990 from the data given below.

Commodities	Weights	Price per unit 1990	Price per unit 1992
A	40	80	85
B	25	60	55
C	5	345	50
D	20	35	40
E	10	25	20

11. Construct the cost of living index numbers by assigning the given weights.

Group	Index number	Weight
Food	352	48
Fuel & Electricity	220	10
Clothing	230	8
Rent	160	12
Miscellaneous	190	15

12. From the fixed base index numbers given below prepare chain base index numbers.

Year	1983	1984	1985	1986	1987	1988	1989
Fixed base index(1983 as base)	100	112.8	97.4	100	120.5	126.9	131.08

13. From the fixed base index numbers given below prepare chain base index numbers.

Year	1975	1976	1977	1978	1979	1980
Fixed base index(1983 as base)	90	105	102	98	120	125

14. From the chain base index numbers given below prepare fixed base index numbers.

year	1985	1986	1987	1988	1989	1990	1991
Fixed base index(1983 as base)	105	108	110	107	115	120	125

15. From the chain base index numbers given below prepare fixed base index numbers.

Years	1983	1984	1985	1986	1987	1988	1989	1990	1991	1992
Chain Index	100	112.8	86.4	102.6	120.5	105.3	103.3	109.8	88.4	75.8

16. From the chain base index numbers given below prepare fixed base index numbers.

Years	1986	1987	1988	1989	1990
Chain index	80	110	120	90	140

UNIT – II

17. A drilling machine bores holes with a mean diameter of 0.5230 cm and a standard deviation of 0.0032 cm. Calculate the 2-sigma and 3-sigma upper and lower control limits for means of samples 4, and prepare a control-chart.

18. Ten pieces of cloth out of different rolls of equal length contained the following number of defects:

1, 3, 5, 0, 6, 0, 9, 4, 4, 3

Draw a control chart for the number of defects and state whether the process is in a state of Statistical control.

19. The following table gives the number of errors of alignment observed at final inspection of a certain model of bus. Prepare a C - chart and comment on the state of control.

Bus Number	No. of alignment defects	Bus No.	No. of alignment defects
1001	6	1011	8
1002	10	1012	6
1003	8	1013	10
1004	7	1014	10
1005	12	1015	6
1006	9	1016	12
1007	5	1017	3
1008	7	1018	11
1009	3	1019	2
1010	4	1020	1

20. Construct a control chart for the defectives obtained in repeated random samples of the 100 from the process which is considered to be under control when the proportion of defective $p = 0.2$. Draw the control chart
21. If the average fraction defective of large sample of products is 0.1537. Calculate the control limits. (Given that sub group size is 2,000)
22. A plant produces rolls of paper. The number of defects disclosed by inspection of 20 rolls are as follows:
12,6,18,4,5,2,4,7,12,14,8,11,14,21,21,10,12,9,13,10. Comment on the state of control

using C – chart.

23. Explain \bar{X} Chart.
24. Explain p-Chart.
25. Explain R Chart.
26. Explain C Chart.
27. Explain Control chart and its types.
28. Write a short note on acceptance sampling.
29. A nation- wide mail order house desires to verify the accuracy of its clerical work in completing invoices. Subgroups of 200 are taken each day for 30 consecutive days for inspection. A defective is defined as an invoice containing at least one of a number of possible errors. The numbers of defectives found in each of these 30 groups are as follows:

7, 5, 6, 3, 4, 10, 3, 2, 5, 8, 6, 1, 2, 3, 5,
4, 8, 9, 7, 10, 3, 5, 4, 3, 3, 7, 6, 4, 3, 5

Construct control chart of the data given above and comment on the state of control.

30. (i) The following table gives the number of defects in carpets manufactured:

Carpet Serial No	1	2	3	4	5	6	7	8	9	10
No of Defects	3	4	5	6	3	3	5	3	6	2

Determine the central line and control limits for C – chart.

- (ii) 20 Tape recorders were examined for quality control test. The number of defects for each tape recorder is given below:

2, 4, 3, 1, 1, 2, 5, 3, 6, 7, 3, 1, 4, 2, 3, 1, 6, 4, 1, 1

Prepare a C – chart. What conclusions do you draw from it.

31. In a certain sampling inspection, the number of defectives found in 10 samples of 100 each are as given below:
16, 18, 11, 18, 21, 10, 20, 18, 17, and 21
Do these indicate that the quality characteristic under inspection is under statistical control?
32. A daily sample of 30 items was taken over a period of 14 days in order to establish control limits. If 21 defectives were found, what should be the upper and lower control limits of the proportion of defectives?
33. Each of 20 lots of rubber belts contains 2000 rubber belts. Number of defective rubber belts in those lots are
410, 420, 324, 332, 292, 310, 282, 300, 320, 296,
392, 432, 294, 324, 220, 400, 258, 226, 460, 280

Calculate control limits for fraction defective chart and give your conclusions.

UNIT – III

34. (i) A coin was tossed 400 times and the head turned up 216 times .Test the hypothesis that the coin is unbiased.
(ii) In 324 throws of a six-faced dice, odd points appeared 180 times. Would you say that the dice is fair at 5 percent level of significance?
35. (i) In a sample of 500 people from a village in Rajasthan ; 280 were found to be rice eaters and the rest wheat eaters. Can we assume that both the food articles are equally popular?
(ii) In a hospital 480 female and 520 male babies were born in a week. Do these figures confirm the hypothesis that males and females are born in equal number?

36. (i) A person throws 10 dice 500 times and obtains 2560 times 4, 5, or 6. Can this be attributed to fluctuations of sampling?
 (ii) 680 heads and 520 tails are obtained in tossing a coin 1,200 times. Can it be concluded that the coin is unbiased?
37. 500 apples are taken at random from a large basket and 50 are found to be bad. Estimate the proportion of bad apples in the basket and assign limits within which the percentage most probably lies.
38. A wholesaler in apples claims that only 4% of the apples supplied by him are defective. A random sample of 600 apples contained 36 defective apples. Test the claim of the wholesaler.
39. In a random sample of 1,000 persons from town A, 400 are found to be consumers of wheat. In a sample of 800 from town B, 400 are found to be consumers of wheat. Do these data reveal a significant difference between town A and town B, so far as the proportion of wheat consumers is concerned?
40. In a simple random sample of 600 men taken from a big city 400 are found to be smokers. In another simple random sample of 900 men taken from another city 450 are smokers. Do the data indicate that there is a significant difference in the habit of smoking in the two cities?
41. A machine puts out of 10 defective units in a sample of 200 units. After the machine is overhauled it puts out of 4 defective units in a sample of 100 units. Has the machine been improved?
42. The mean height obtained from a random sample of size 100 is 64 inches. The standard deviation of the distribution of height of the population is known to be 3 inches. Test the statement that the mean height of the population is 67 inches at 5% level of significance. Also set up 99% limits of the mean height of the population.
43. A sample of 100 tyres is taken from a lot. The mean life of tyres is found to be 39,350 kms, with a standard deviation of 3,260. Could the sample come from a population with mean life of 40,000 kms? Establish 99% confidence limits within which the mean life of tyres is expected to lie.
44. Intelligence test on two groups of boys and girls gave the following results:
- | | Mean | S.d | N |
|-------|------|-----|-----|
| Girls | 75 | 15 | 150 |
| Boys | 70 | 20 | 250 |
- Is there a significant difference in the mean scores obtained by boys and girls?
45. A man buys 50 electric bulbs of Philips and electric bulbs of HMT. He finds that Philips bulbs give an average life of 1500 hours with a standard deviation of 60 hours and HMT bulbs gave an average life of 1512 hours with a standard deviation of 80 hours. Is there a significant difference in the mean life of the two makes of bulbs?
46. An examination was given to two classes consisting of 40 and 50 students respectively. In the first class the mean mark was 74 with a standard deviation of 8, while in the second class the mean mark was 78 with a standard deviation of 7. Is there a significant difference between the performance of the two classes at a level of significance of 0.05?

UNIT – IV

47. Prices of shares of a company on different days in a month were found to be: 66, 65, 69, 70, 69, 71, 70, 63, 64 and 68. Discuss whether the price of the shares be 65 (the table value of $t=2.262$)

48. In an experiment on pea- breeding Mendel obtained the following frequencies of seeds: 315 round and yellow, 101 wrinkled and yellow, 108 round and green, 32 wrinkled and green. According to his theory of heredity , the numbers should be in proportion 9:3:3:1. Is there any evidence to doubt the theory at 5% level of significance?
49. A drug is given to 10 patients and the increments in their blood pressure where recorded to be 3, 6, -2, 4, -3, 4, 6, 0, 0, 2. Is it reasonable to believe that the drug has no effect on change of blood pressure?(5% value of t for 9 d.f = 2.26).
50. 1,000 students at college level were graded according to their I.Q and the economic conditions of their homes . Use χ^2 test to find out whether there is any association between economic condition at home and I.Q.

Economic condition	High	Low	Total
Rich	460	140	600
Poor	240	160	400
Total	700	300	1000

51. A random sample of size 16 has 53 as mean. The sum of the squares of the deviations taken from mean is 135. Can this sample be regarded as taken from the population having 56 as mean ? Obtain 95% and 99% confidence limits of the mean of the population.
52. The mean life of a sample of 10 electric light bulbs was found to be 1456 hours with S.d of 423 hours. A second sample of 17 bulbs chosen from a different batch showed a mean life of 1280 hours with S.d Of 398 hours . Is there a significant difference between the means of the two samples ?
53. Strength test carried out on samples of two yarns spun to the same count gave the following Results :

	Sample size	Sample mean	Sample variance
Yarn A	4	52	42
Yarn A	9	42	56

The strengths are expressed in pounds. Is the difference in mean strength of two yarns significant ?

54. An I.Q test was administered to 5 persons before and after they were trained. The results are given below:

Candidates	I	II	III	IV	V
I.Q before training	110	120	123	132	125
I.Q after training	120	118	125	136	121

Test whether there is any change in I.Q after the training programme.

55. The sales data of an item in six shops before and after a special promotional campaign are as under :

Shops	:	A	B	C	D	E	F
Before campaign:		53	28	31	48	50	42
After campaign:		58	29	30	55	56	45

Can the campaign be judged to be a success ? Test at 5% level of significance.

56. In a survey of 200 boys , of which 75 were intelligent , 40 had educated fathers ; while 85 of the unintelligent boys had uneducated fathers. Do these figures support the hypothesis that educated fathers have intelligent boys ? Use χ^2 test .

57. In a sample of 8 observations , the sum of squared deviations of items from the mean was 84.4 . In another sample of 10 observations , the value was found to be 102.6. Test whether the two populations have same variance at 5% level.
58. From the data given below about the treatment of 250 patients suffering from a disease, state whether the new treatment is superior to the conventional treatment.

Treatment	no: of patients		
	Favourable	not favourable	total
New	140	30	170
Conventional	60	20	80
Total	200	50	250

59. A sample analysis of examination results of 500 students was made. It was found that 220 students had failed, 170 had secured a third class, 90 were placed in second class and 20 got a first class. Are these figures commensurate with the general examination result which is the ratio of 4: 3: 2: 1 for the various categories respectively?
60. 4 coins were tossed 160 times and the following results were obtained:
- | | | | | | |
|-----------------------|----|----|----|----|---|
| No of heads: | 0 | 1 | 2 | 3 | 4 |
| Observed frequencies: | 17 | 52 | 54 | 31 | 6 |
- Under the assumption that coins are balanced, Find the expected frequencies of getting 0, 1, 2, 3 or 4 heads and test the goodness of fit.
61. Verify whether Poisson distribution can be assumed from the data given below:
- | | | | | | | |
|----------------|---|----|----|---|---|---|
| No of defects: | 0 | 1 | 2 | 3 | 4 | 5 |
| f_0 : | 6 | 13 | 13 | 8 | 4 | 3 |

UNIT – V

62. Write short note on one criterion of classification.
63. Write short note on two criterion of classification.
64. Write short note on three criterion of classification.
65. Three varieties A, B ,C of wheat were sown in four plots each and the following yields in quintals per acre were obtained. Test the significance of difference between the yields.

A	8	4	6	7
B	7	5	5	3
C	2	5	4	4

66. A company manufacturing a certain product appointed 4 salesmen S_1, S_2, S_3, S_4 in three different areas A , B and C. The quantity of the product sold is given below. Carryout the analysis of variance to test whether there is significant difference in the sales of 4 salesmen.

	S_1	S_2	S_3	S_4
A	22	27	38	45
B	28	32	40	38
C	25	40	36	22

67. Three varieties of rice Ponni, Kannaki, Aduthurai were sown in 4 plots each and the following yields in quintals per acre were obtained. Test the significance of difference between the yields of the varieties.

Ponni	Kannaki	Aduthurai
8	7	2
4	5	5
6	5	4

68. The yields of 4 varieties of wheat 3 blocks are given below. Test the difference between the varieties significant ?

Block Variety	1	2	3
A	10	9	8
B	7	7	7
C	8	5	4

69. A company manufacturing a certain product appointed 4 salesmen S_1, S_2, S_3, S_4 in three different areas A, B and C. The quantity of the product sold is given below. Carry out the analysis of variance to test whether there is significant difference in the sales of 4 salesmen and in the sales carried out in different areas.

	S_1	S_2	S_3	S_4
A	22	27	38	45
B	28	32	40	38
C	25	40	36	22

70. A tea company appoints 4 salesmen A, B, C, D and observes their sales in 3 seasons – summer, monsoon and winter. The figures of their sales in lakhs of rupees are given below. Carry out analysis of variance for salesmen and seasons.

Salesmen Season	A	B	C	D
Summer	36	36	21	35
Monsoon	26	28	29	29
Winter	28	29	31	32

71. The following table gives the gains in weights of four different types of pigs, fed on 3 different rations. Test whether the rations or types of pigs differ in their mean weight.

Ration Type	I	II	III	IV
A	7	16	11	14
B	14	15	15	21
C	9	17	10	13

72. Analyse the variance in the following Latin square

A8	C18	B9
C9	B18	A16
B11	A10	C20

SECTION – D

UNIT – I

1. From the following average prices of the three groups of commodities given in rupees per unit find (i) fixed base index number (ii) chain base index numbers with 1988 as the base

Commodity	1988	1989	1990	1991	1992
-----------	------	------	------	------	------

A	2	3	4	5	6
B	8	10	12	15	18
C	4	5	8	10	12

2. Find the index numbers of price relatives using
 (i) Arithmetic mean (ii) Geometric mean as averages taking 1990 as base year
 (iii) Also find simple aggregate index.

Commodities	Year	
	1990	1991
Rice	158	272
Cholam	168	326
Cambu	157	309
Ragi	155	304

3. Calculate

- (i) Laspeyre's (ii) Paasche's (iii) Bowley's
 (iv) Fisher's (v) Marshall- Edgeworth's

index numbers for the following data given below .

Commodity	Base year		Current year	
	Price	Quantity	Price	Quantity
A	2	8	4	6
B	5	10	6	5
C	4	14	5	10
D	2	19	2	13

4. Find the missing price in the below data if the ratio between Laspeyre's and Paasche's index number is 25:24

Commodities	Base year		Current year	
	Price	Quantity	Price	Quantity
A	1	15	2	15
B	2	15	—	30

5. Construct with a help of data given below , Fisher's index number and show that it satisfies both the factor reversal test and time reversal test.

Commodity	A	B	C	D
Base year price in Rupees	5	6	4	3
Base year quantity in Quintals	50	40	120	30
Current year price in Rupees	7	8	5	4
Current year quantity in Quintals	60	50	110	35

6. Find the cost of living index number for 1992 on the base of 1991 on the basis from the following data using (i) family budget method (ii) aggregate expenditure method

Commodity	Price in Rs		Quqntity in Quintals In 1991
	1991	1992	
Rice	7	7.5	6

Wheat	6	6.75	3.5
Flour	5	5	0.5
Oil	30	32	3
Sugar	8	8.5	1

7. Find the cost of living index number for the following data in a middle class family.

Items	Price		Weight
	1991	1992	
Food	700	850	40
Clothing	300	280	15
Rent	200	225	7
Fuel	70	82	5
Medicine	100	135	9
Education	500	550	12
Entertainment	100	90	10
Misc	475	425	23

8. Define an ideal index number and prove that fisher's index number is an ideal index number.

UNIT – II

9. A food company puts mango juice into cans advertised as containing 10 ounces of the juice. The weights of the juice drained from cans immediately after filling for 20 samples are taken by a random method (at an interval of every 30 minutes). Each of the samples includes 4 cans. The samples are tabulated in the following table. The weights in the table are given in units of 0.01 ounces in excess of 10 ounces.

Sample number	Weight of each can (4 cans in each sample)			
	X			
1	15	12	13	20
2	10	8	8	14
3	8	15	17	10
4	12	17	11	12
5	18	13	15	4
6	20	16	14	20
7	15	19	23	17
8	13	23	14	16
9	9	8	18	5
10	6	10	24	20
11	5	12	10	15
12	3	15	18	18
13	6	18	12	10
14	12	9	15	18
15	15	15	6	16
16	18	17	8	15
17	13	16	5	4
18	10	20	8	10

19	5	15	10	12
20	6	14	12	14

10. The following data refer to visual defects found at inspection of the first 10 samples of size 100. Use the data to obtain U.C.L and L.C.L for percentage defective in samples of 100. Represent the first ten sample results in the chart you prepare to show the central line and control limits:

Sample No.	1	2	3	4	5	6	7	8	9	10	Total
No. of defectives	2	1	1	3	2	3	4	2	2	0	20

11. Assume that $20\frac{1}{2}$ litre milk bottles are selected at random from a process. The number of air bubbles observed from the bottles is given in the table.

Bottles Number (sample order)	Defects	Bottles Number (sample order)	Defects
1	4	11	3
2	5	12	5
3	7	13	4
4	3	14	3
5	3	15	4
6	5	16	5
7	6	17	3
8	2	18	7
9	4	19	6
10	8	20	13
		Total no of defects	100

Draw a control chart for the above data.

12. The following table gives the inspection data on completed spark plugs :
INSPECTION DATA ON COMPLETED SPARK PLUGS
(2000 spark plugs in 20 lots of 100 each)

Lot Number	Number Defectives	Fraction Defectives	Lot Number	Number Defectives	Fraction Defectives
1	5	0.050	11	4	0.040
2	10	0.100	12	7	0.070
3	12	0.120	13	8	0.080
4	8	0.080	14	2	0.020
5	6	0.060	15	3	0.030
6	5	0.050	16	4	0.040
7	6	0.060	17	5	0.050
8	3	0.030	18	8	0.080
9	3	0.030	19	6	0.060
10	5	0.050	20	10	0.100

Construct p - chart.

13. You are given the values of sample means \bar{X} and the range R for 10 samples of size 5 each. Draw mean and range charts and comment on the state of control.

Sample No.	1	2	3	4	5	6	7	8	9	10
Mean (\bar{X})	43	49	37	44	45	37	51	46	43	47
Range (R)	5	6	5	7	7	4	8	6	4	6

14. Explain the advantages of Statistical Quality Control.
15. A machine is set to deliver packets of a given weight. 10 samples of size 5 each were recorded. Below are given relevant data: Draw mean and range charts and comment on the state of control.

Sample No.	1	2	3	4	5	6	7	8	9	10
Mean (\bar{X})	15	17	15	18	17	14	18	15	17	16
Range (R)	7	7	4	9	8	7	12	4	11	5

16. Ten samples each of size 5 are drawn at regular intervals from a manufacturing process. Below are given relevant data: Draw mean and range charts and comment on the state of control.

Sample No.	1	2	3	4	5	6	7	8	9	10
Mean (\bar{X})	49	45	48	53	39	47	46	39	51	45
Range (R)	7	5	7	9	5	8	8	6	7	6

17. Samples of 100 tubes are drawn randomly from the output of a process that produces several thousand units daily. Sample items are inspected for quality and defective tubes are rejected. The results of 15 samples are shown below.

Sample No	No. of defective Tubes	Sample No	No. of defective Tubes
1	8	9	10
2	10	10	13
3	13	11	18
4	9	12	15
5	8	13	12
6	10	14	14
7	14	15	9
8	6		

On the basis prepare a control chart for fraction defective. Comment on the state of control.

UNIT – III

18. (i) Out of 20,000 customers ledger accounts, a sample of 600 was taken to test the accuracy of posting and balancing and 45 mistakes were found. Assign limits which the number of mistakes can be expected at 95% level of confidence.

- (ii) A factor is producing 50,000 pairs of shoes daily. From a sample of 500 pairs, 2% were found to be of sub-standard quality. Estimate the number of pairs that can be reasonably expected to be spoiled in the daily production and assign limits at 95% level of confidence.
19. (i) In a random sample of 1000 persons from U.P 510 were found to be consumers of cigarettes. In another sample of 800 persons from Rajasthan, 480 were found to be consumers of cigarettes. Does the data reveal a significant difference between U.P and Rajasthan so far as the proportion of consumers of cigarettes is concerned?
- (ii) Before an increase in excise duty on tea 400 people out of a sample of 500 persons were found to be tea drinkers. After an increase in the duty, 400 persons were known to be tea drinkers in a sample of 600 people. Do you think that there has been a significant decrease in the consumption of tea after the increase in the excise duty.
20. (i) In a village A out of a random sample of 1,000 persons 100 were found to be vegetarians while in another village B out of 1500 persons 180 were found to be vegetarians. Do you find a significant difference in the food habits of the people of the two villages?
- (ii) In a random sample of 500 persons belonging to urban area 200 are found to be commuters of public transport. In another sample of 400 persons belonging to rural area 200 are found to be commuters of public transport. Discuss whether the data reveal a significant difference between urban area so far as the proportion of commuters of public transport is concerned (At 1% level of significance)
21. (i) In a survey of buying habits, 400 women shoppers are chosen at random in super market A located in a certain section of Mumbai city. Their average monthly food expenditure is Rs. 250 with a standard deviation of Rs. 40. For 400 women shoppers chosen at random in super market B in another section of the city, the average monthly food expenditure is Rs. 220 with a standard deviation of Rs. 55. Test at 1% level of significance whether the average food expenditure of the two populations of shoppers from which the samples were obtained are equal.
- (ii) Two samples of 100 electric bulbs each has a means 1500 and 1550, standard deviation 50 and 60. Can it be concluded that two brands differ significantly at 1% level of significance in equality.
22. (i) In a sample of 1000 the mean is 17.5 and the s.d 2.5. In another sample of 800 the mean is 18 and the s.d 2.7. Assuming that the samples are independent discuss whether the two samples can have come from a population which have the same s.d.
- (ii) The mean produce of wheat of a sample of 100 fields is 200 lb. per acre with a standard deviation of 10 lb. Another sample of 150 fields gives the mean at 220 with a standard deviation of 12 lb. Assuming the standard deviation of the mean field at 11 lb of the universe, find at 1% level if the two results are consistent.
23. (i) The following data were collected from two cities as regards the starting stipend paid to new management trainees. Do the data give evidence that the stipend paid in city B is significantly more than in city A. Test the significance level of 1%.

City	Monthly Stipend Mean	Sample standard Deviation	Sample Size
A	Rs. 1400	Rs. 80	200
B	Rs. 1600	Rs. 120	175

- (ii) The MFC Admission Test taken by two groups of boys and girls gave the following information:

	Mean score	S. D	Number
Girls	75	10	100
Boys	70	12	200

UNIT – IV

24. A certain drug is claimed to be effective in curing cold. In an experiment on 500 persons with cold, half of them were given the drug and half of them were given the sugar pills. The patients' reactions to the treatment are recorded in the following table:

	Helped	Harmed	No effect	Total
Drug	150	30	70	250
Sugar pills	130	40	80	250
Total	280	70	150	500

On the basis of the data can it be concluded that there is a significant difference in the effect of the drug and sugar pills?

25. Two independent samples of 8 and 7 items gave the following values:

Sample A : 9 11 13 11 15 9 12 14
Sample B : 10 12 10 14 9 8 10

Examine whether the difference between the means of the two samples is significant at 5% level?

26. Two random samples were drawn from two normal populations and their values are

A : 66 67 75 76 82 84 88 90 92

B : 64 66 74 78 82 85 87 92 93 95 97

Test whether the two populations have the same variance at the 5% level of the significance.

27. For a random sample of 10 persons, fed on diet A, the increased weight in pounds in a certain period were:

10, 6, 16, 17, 13, 12, 8, 14, 15, 9

For another random sample of 12 persons, fed on diet B, the increase in the same period were:

7, 13, 22, 15, 12, 14, 18, 8, 21, 23, 110, 17

Test whether the diets A and B differ significantly as regards their effect on increase in weight.

28. In a test given to two groups of students, the marks obtained are as follows:

First group: 18 20 36 50 49 36 34 49 41

Second group: 29 28 26 35 30 44 46

Examine the significance of difference between the arithmetic mean of the marks secured by the students of the above two groups.

(the value of t at 5% level of significance for $v = 14$ is 2.14)

29. The following data present the yields in quintals of common ten sub divisions of equal area of two agricultural plots:

Plot 1 : 6.2 5.7 6.5 6.0 6.3 5.8 5.7 6.0 6.0 5.8

Plot 2 : 5.6 5.9 5.6 5.7 5.8 5.7 6.0 5.5 5.7 5.5

30. 200 digits are chosen at random from a set of tables. The frequencies of the digits are as follows:

Digit : 0 1 2 3 4 5 6 7 8 9

Frequency: 18 19 23 21 16 25 22 20 21 15

Use χ^2 test to assess the correctness of the hypothesis that the digits were distributed in equal numbers in the tables from which they were chosen.

31. A movie producer is bringing out a movie. In order to map out his advertising campaign, he wants to determine whether the movie will appeal most to particular age group or whether it will appeal equally to all age groups. The producer takes a random sample from persons attending preview of the new movie, and obtains the following results:

	Age group				Total
	Under 20	20 – 39	40 – 59	60& over	
Liked the movie	146	78	48	28	300
Disliked the movie	54	22	42	22	140
Indifferent	20	10	10	20	60
Total	220	110	100	70	500

UNIT – V

32. Three varieties of cows of same age group are treated with four different types of fodders. The yields milk in deciliters are given below. Perform an analysis of variance and check whether is any significant difference between the yields of different varieties of cows due to different types of fodders.

Fodder Varieties of cows	f_1	f_2	f_3	f_4
C_1	61	63	66	68
C_2	62	64	67	69
C_3	63	63	68	69

33. Analyse the variance in the following Latin squares

B 20 C 17 D 25 A 34
A 23 D 21 C 15 B 24
D 24 A 26 B 21 C 19
C 26 B 23 A 27 D 22

34. Below are given the fields of 3 strains of wheat planted in 5 blocks of 3 plots each under a completely randomised design. All the 15 plots are of equal area. Perform the analysis of variance to test whether the strains are significantly different with regard to field. Ignore variation between blocks.

Blocks	I	II	III	IV	V
Strains					
A	20	21	23	16	40
B	18	20	17	15	25
C	25	28	22	28	32

35. A test was given to 5 students taken at random from the 5th class of 3 schools of a town. The individual scores are given below. Carry out the analysis of variance and state your conclusion.

School I	9	7	6	5	8
School II	7	4	5	4	5
School III	6	5	6	7	6

36. Analyse the variance in the following Latin square

A50	B70	C70	D80	E90
B70	C90	D80	E80	A50
C60	D50	E90	A80	B90
D50	E60	A80	B50	C70
E80	A90	B50	C70	D60

37. Analyse the variance in the following Latin square

A105	B95	C125	D115
C115	D125	A105	B105
D115	C95	B105	A115
B95	A135	D95	C115

QUESTION BANK

Section-A(1 mark)

Choose the correct answer:

UNIT I

- The partial differential equation obtained by eliminating the arbitrary constants a and b from $Z=(x+a)^2+(y+b)^2+c^2$ is
 (a) $4z=p+q$ (b) $p+q+z=0$ (c) **$4z=p^2+q^2+4c^2$** (d) $p+q=r$
- A partial differential equation which is linear in p and q is of the form
 (a) **$Pp+Qq=R$** (b) $P+Q=R$ (c) $Pp+Qq=0$ (d) $P+Q=0$
- The auxiliary equation of lagrange's equation can be solved using
 (a) method of substitution (b) **method of grouping**
 (c) method of solving (d) method of cancelling
- The complete integral of $p+q=pq$ is
 (a) **$z=ax+ay/(a-1)+c$** (b) $z=ax+ay$ (c) $z=ax+by$ (d) $z=cx+dy$
- The complete integral of $z=px+qy+(q/p)-p$
 (a) **$z=ax+by+(b/a)-a$** (b) $z=ax+ay+c$ (c) $z=ax+by+c$ (d) $z=ax+by+d$
- The complete solution of $q-p=y-x$ is
 (a) **$2z=(x+a)^2+(y+a)^2+b$** (b) $4z=4x+2y^2$ (c) $2z=(x+a)^2$ (d) $2z=(y+a)^2$
- Lagrange's auxiliary equation can be solved by two methods.one is Method of grouping another one is
 (a) **method of multiplication** (b) method of substitution
 (c) method of solving (d) method of cancelling
- The differential equation formed by eliminating the arbitrary constants a and b from $z=axy+b$ is
 (a) $px+qy=0$ (b) **$px-qy=0$** (c) $px/qy=0$ (d) 1
- If it is possible to choose l,m,n such that $lP+mQ+nR=0$ then
 (a) $ldx+mdy+ndz=1$ (b) **$ldx+mdy+ndz=0$**
 (c) $ldx+mdy=0$ (d) $ldy+mdx+ndz=0$
- The solution of $2p+3q=1$ is
 (a) $\phi(3x+2y, y+3z)=0$ (b) **$\phi(3x-2y, y-3z)=0$**
 (c) $\phi(3x-2y, y-3z)=0$ (d) $\phi(3x+2y, 2z)=0$

UNIT II

- $L(1)=$ -----
 (a) $1/s^2$ (b) **$1/s$** (c) $1/s^3$ (d) $1/s^n$

12. $L(x) = \text{-----}$
 (a) $1/s$ (b) $1/s^2$ (c) $n!/s^n$ (d) $1/s-a$
13. $L(e^{ax}) = \text{-----}$
 (a) $1/s-a$ (b) a/s^2-a^2 (c) s/s^2-a^2 (d) $1/s$
14. $L(\cos ax) = \text{-----}$
 (a) s/s^2-a^2 (b) s/s^2+a^2 (c) a/s^2-a^2 (d) $2/s$
15. $L(x^n) = \text{-----}$
 (a) $n!/s^{n+1}$ (b) $1/2s$ (c) $2/s$ (d) $1/s^2$
16. $L(\sqrt{x}) = \text{-----}$
 (a) $\pi/2s^{1/2}$ (b) $1/s^2$ (c) $1/\sqrt{s}$ (d) $\sqrt{\pi}/2s^{3/2}$
17. $L^{-1}(F(s+a)) = \text{-----}$
 (a) $e^{-ax} L^{-1}[F(s)]$ (b) $e^{ax} L^{-1}[F(s)]$ (c) $e^{-ax} L[F(s)]$ (d) $e^{ax} L[F(s)]$
18. $L(\sin^2 2x) = \text{-----}$
 (a) $1/2[(1/s)-(1/s^2+16)]$ (b) $1/2[(1/s)+(1/s^2-16)]$ (c) $1/2[((1/s)-(s/s^2-16)]$ (d) $1/s$
19. $L(e^{ax}) = \text{-----}$
 (a) $1/s+a$ (b) $1/a-s$ (c) $1/s-a$ (d) $a/s-a$
20. $L^{-1}[F'(s)] = \text{-----}$
 (a) $x L^{-1}[F(s)]$ (b) $-x L^{-1}[F(s)]$ (c) $L[f(s)]$ (d) $F(s)$
21. $L^{-1}(\cos ax) = \text{-----}$
 (a) s/s^2-a^2 (b) s/s^2+a^2 (c) a/s^2+a^2 (d) a/s^2-a^2
22. $L^{-1}[a/s^2+a^2] = \text{-----}$
 (a) $\cos ax$ (b) $\sin ax$ (c) $\cosh ax$ (d) $\sinh ax$
23. $L[f'(x)] = \text{-----}$
 (a) $f(0)-sLf(x)$ (b) $sL[f(x)]-f(0)$ (c) $f^1(0)-sL(f(x))$ (d) $s^2L[f(x)]-sf(0)-f'(0)$
24. $L[f''(x)] = \text{-----}$
 (a) $f(0)-sLf(x)$ (b) $sL[f(x)]-f(0)$ (c) $f^1(0)-sL(f(x))$ (d) $s^2L[f(x)]-sf(0)-f'(0)$
25. $L^{-1}[1/(s+1)] = \text{-----}$
 (a) e^{-x} (b) e^x (c) e^2 (d) e^{-2x}

UNIT III

26. Jacobian is denoted by the letter _____.
 (a) N (b) A (c) J (d) O
27. The Jacobian for the transformation from Cartesian coordinates (x,y) to polar coordinates (r,θ) given by $x=r \cos \theta$ and $y=r \sin \theta$ is _____.
 (a) $1/2\theta$ (b) $\sin \theta$ (c) $\cos \theta$ (d) r
28. The transformation from Cartesian coordinates (x,y,z) to spherical coordinates (r,θ,φ) is given by _____.
 (a) $r^2 \sin \theta$ (b) $r \sin \theta$ (c) r (d) $1/r$
29. The transformation from Cartesian coordinates (x,y,z) to cylindrical coordinates (r,θ,z) is given by _____.
 (a) r (b) $1/r$ (c) $-1/r$ (d) -r
30. If $x+y=u$ and $y=uv$ then the Jacobian J = _____.
 (a) v (b) u (c) uv (d) -v

31. If $J = \partial(x, y) / \partial(u, v)$ and $J' = \partial(u, v) / \partial(x, y)$ where $x = x(u, v)$ and $y = y(u, v)$ then $JJ' =$ _____.
- (a) 1 (b) 3 (c) 0 (d) -1
32. If $x + y = u$ and $2x - 3y = v$ then $\partial(u, v) / \partial(x, y) =$ _____.
- (a) 5 (b) -5 (c) 2 (d) 1/5
33. If u and v are functions of r and s and r and s are functions of x and y then $\frac{\partial(u, v)}{\partial(r, s)} \times \frac{\partial(r, s)}{\partial(x, y)} =$ _____.
- (a) 0 (b) $\frac{\partial(u, v)}{\partial(x, y)}$ (c) $\frac{\partial(u, v)}{\partial(r, s)}$ (d) 1
34. The line integral of f over C is denoted by
- (a) $\int_C \mathbf{f} \cdot d\mathbf{r}$ (b) $\int_C f \, dr$ (c) $\int_C^1 f \, dr$ (d) $\int_0^C f \, dr$
35. The value of $\int_C \mathbf{f} \, dr$ where $\mathbf{f} = (x^2 + y^2)\mathbf{i} + (x^2 - y^2)\mathbf{j}$ and C is the curve $y = x^2$ joining $(0, 0)$ and $(1, 1)$ is _____.
- (a) 1/10 (b) 3/10 (c) 7/10 (d) 1/5
36. If $\mathbf{f} = x^2\mathbf{i} - xy\mathbf{j}$ and C is the straight line joining the points $(0, 0)$ and $(1, 1)$ then $\int_C \mathbf{f} \, d\mathbf{r}$ is -----
- (a) 0 (b) 1 (c) -1 (d) 2
37. Parametric equation of the line joining $(0, 0, 0)$ and $(2, 1, 1)$ can be taken as _____
- (a) $x = t^2, y = t, z = t$ where $0 \leq t \leq 1$
(b) $x = 2t, y = t, z = t$ where $0 \leq t \leq 1$
 (c) $x = t, y = t^2, z = t$ where $0 \leq t \leq 1$
 (d) $x = t^2, y = t^2, z = t^3$ where $0 \leq t \leq 2$
38. If the particle describes an arc C then the work done is given by
- (a) $\int_C \mathbf{f} \cdot d\mathbf{r}$ (b) $\int_C \mathbf{f} \cdot d\mathbf{r}$ (c) $\int_C^1 \mathbf{f} \cdot d\mathbf{r}$ (d) $\int_0^C \mathbf{f} \cdot d\mathbf{r}$

UNIT III

39. Stoke's theorem connects -----
- (a) line integral and double integral **(b) line integral and surface integral**
 (c) double integral and surface integral (d) surface integral and volume integral
40. If $\mathbf{r} = x\mathbf{i} + y\mathbf{j} + z\mathbf{k}$, then $\int_C \mathbf{r} \cdot d\mathbf{r} =$ _____
- (a) 0 (b) 1 (c) x (d) z
41. $\int_C \mathbf{r} \cdot d\mathbf{r} = \iint_S (\nabla \times \mathbf{f}) \cdot \mathbf{n} \, dS$ is _____ theorem
- (a) Green's theorem **(b) Stoke's theorem**
 (c) Gauss divergence theorem (d) Lagrange's theorem
43. Green's theorem connects -----
- (a) line integral and double integral** (b) line integral and surface integral
 (c) double integral and surface integral (d) surface integral and volume integral
44. Gauss divergence theorem connects -----
- (a) line integral and double integral (b) line integral and surface integral
(d) surface integral and volume integral
 (c) double integral and surface integral

45. If V is the volume bounded by a closed surface S and \mathbf{f} is a vector valued function having continuous partial derivatives then $\iint_S \mathbf{f} \cdot \mathbf{n} \, dS = \iiint_V \nabla \cdot \mathbf{f} \, dV$. This theorem is known as _____
- (a) Green's theorem (b) Stoke's theorem
(c) **Gauss divergence theorem** (d) Lagrange's theorem
46. If V is a volume enclosed by the closed surface S , then $\iint_S \mathbf{r} \cdot \mathbf{n} \, dS =$ _____.
- (a) **$3V$** (b) 1 (c) 0 (d) V
47. $\int_C Mdx + Ndy = \iint_S \frac{\partial N}{\partial y} - \frac{\partial M}{\partial x} dx dy$ is _____ theorem.
- (a) **Green's theorem** (b) Stoke's theorem
(c) Gauss divergence theorem (d) Lagrange's theorem

UNIT V

48. The Beta function $\beta(m, n)$ is defined as -----
- (a) $\int_0^1 x^{m-1}(1-x)^n dx$ (b) $\int_0^1 x^{m-1}(x-1)^{n-1} dx$ (c) $\int_0^1 x^{m-1}(1-x)^{n-1} dx$ (d) $\int_0^1 x^{m-1}(1-x)^{n-2} dx$
49. The Gamma function is defined as
- (a) $\int_0^\infty e^x x^{n-1} dx$ (b) $\int_0^\infty e^{-x} x^n dx$ (c) $\int_0^\infty e^{-x} x^{n-1} dx$ (d) $\int_0^\infty e^x x^n dx$
50. Gamma function satisfies the relation
- (a) **$\Gamma(n+1) = n\Gamma(n)$** (b) $\Gamma(n+1) = (n+1)\Gamma(n)$ (c) $\Gamma(n+1) = (n+1)\Gamma(n+2)$ (d) $\Gamma(n+1) = n\Gamma(n+2)$
51. $\beta(m, n) =$ -----
- (a) **$\beta(m+1, n) + \beta(m, n+1)$** (b) $\beta(m, n+1) + \beta(m, n+1)$
(c) $\beta(m, n) + \beta(n, m)$ (d) $\beta(m+1, n) + \beta(m, n)$
52. The value of $\Gamma(n+1) =$
- (a) n (b) $n+1$ (c) **$n!$** (d) $(n+1)!$
53. $\Gamma\left(\frac{3}{4}\right)\Gamma\left(\frac{1}{4}\right) =$
- (a) **$\sqrt{2\pi}$** (b) $\sqrt{\pi}$ (c) $2\sqrt{\pi}$ (d) π
54. The value of $\Gamma(1/2) =$
- (a) $\sqrt{2\pi}$ (b) **$\sqrt{\pi}$** (c) $2\sqrt{\pi}$ (d) π
55. The value of $\int_0^\infty x^6 e^{-x} dx$ is _____
- (a) **$\Gamma(7)$** (b) $\Gamma(1)$ (c) $\Gamma(8)$ (d) $\Gamma(9)$
56. $\Gamma(5/2) =$ -----
- (a) $\sqrt{\pi}/4$ (b) $3\sqrt{\pi}$ (c) $3\sqrt{(\pi/2)}$ (d) **$(3\sqrt{\pi})/4$**
57. The value of $\Gamma(1)$ is -----
- (a) 0 (b) -1 (c) **1** (d) $\sqrt{\pi}$
58. The value of $\Gamma(6) =$
- (a) **120** (b) $6!$ (c) 4 (d) 840
59. The value of $\Gamma(3/2) =$
- (a) $\sqrt{2\pi}$ (b) **$\sqrt{\pi}/2$** (c) $2\sqrt{\pi}$ (d) π
60. The value of $\int_0^\infty \frac{x^2}{(1+x)^7} dx$ is _____
- (a) **$\beta(2, 5)$** (b) $\beta(2, 7)$ (c) $\beta(3, 7)$ (d) $\beta(1, 6)$

61. The value of $\beta(2, 5/2)$ is _____

(a) $\frac{1}{70}$

(b) $\frac{2}{105}$

(c) $\frac{4}{35}$

(d) $\frac{2}{35}$

62. The value of $\Gamma(5/2)$ is _____

(a) $\frac{\sqrt{\pi}}{4}$

(b) $3\sqrt{\pi}$

(c) $3\frac{\sqrt{\pi}}{2}$

(d) $\frac{3\sqrt{\pi}}{4}$

Section B (2 marks)

UNIT I

1. Form the differential equation by eliminating the arbitrary constants a and b from
2. $z = (x+a)^2 + (y+b)^2 + c^2$
3. Form the differential equation by eliminating the arbitrary constants a and b from $z = axy + b$
4. Eliminate the arbitrary function from $z = f(y/x)$ and form a partial differential equation.
5. Solve $2p + 3q = 1$
6. Solve $p + q = 1$
7. Find the general solution of the lagrange's equation $zp + x = 0$
8. Find the complete integral of $p + q = pq$
9. Find the singular solution of $z = px + qy - 2\sqrt{pq}$
10. Solve: $pe^y = qe^x$
11. Solve the lagrange's equation: $x^2p + y^2q = z^2$

UNIT II

12. Prove: $L[f(x)] = F(s)$ then $L[f(ax)] = 1/a F(s/a)$
13. Prove: $L[\cosh ax] = s/s^2 - a^2$
14. $L[f'(x)] = s^2 L[f(x)] - sf(0) - f'(0)$
15. Find the laplace transform of $x^2 e^{-ax}$
16. Find the laplace transform of $x^2 e^{-4x}$
17. Find $L(xe^{-ax})$
18. If $L[f(x)] = sF(s)$ and $\phi(x)$ is a function such that $L[\phi(x)] = F(s)$ and $\phi(0) = 0$ then $f(x) = \phi'(x)$.
19. Prove: $L^{-1}[F'(s)] = -x L^{-1}[F(s)]$
20. Find the inverse laplace transform for $1/((s+3)^2 + 25)$
21. Find the inverse laplace transform for $s/(s+2)^2$
22. Find the inverse laplace transform for $(s+1)/(s^2+2s+2)$
23. Find the inverse laplace transform for $s/(a^2s^2+b^2)$
24. Prove $L^{-1}[F(s+a)] = e^{-ax} L^{-1}[F(s)]$

UNIT III

25. Find the Jacobian for the transformation $2x + 3y = u; x - 2y = v$
26. Find the Jacobian if $x = r \cos \theta$ and $y = r \sin \theta$
27. Find the Jacobian for the transformation $x + y = u; y = uv$
28. Find the Jacobian, if $x = u \sin \alpha + v \cos \alpha; y = u \sin \alpha - v \cos \alpha$.

29. Find the Jacobian, if $u=x^3/y$ and $v=y^3/x$.
30. Find $\partial(u, v)/\partial(x, y)$, for the transformation $2x + 3y = u$; $x - 2y = v$
31. Find the Jacobian, if $x = r\cos\theta$ and $y = r\sin\theta$ and $z = z$.
32. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ where $\mathbf{f}=(x^2+y^2)\mathbf{i}+(x^2-y^2)\mathbf{j}$ and C is the curve $y = x^2$ joining (0,0) and (1,1).
33. Find $\int_C \mathbf{f} \cdot d\mathbf{r}$ if $\mathbf{f} = x^2\mathbf{i} - xy\mathbf{j}$ and C is the straight line joining the points (0,0) and (1,1).
34. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ along the path C given by $x=2t^2, y=t, z=t^3$ from $t=0$ and $t=1$ if $\mathbf{f}=(2y+3)\mathbf{i}+xz\mathbf{j}+(yz-x)\mathbf{k}$.
35. Evaluate $\int_{(1,1)}^{(4,2)} \mathbf{f} \cdot d\mathbf{r}$ where $\mathbf{f}=(x+y)\mathbf{i}+(y-x)\mathbf{j}$ along the straight line joining (1,1) and (4,2).
43. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ where C is the curve $x=2t^2, y=t, z=t^3$ from $0 \leq t \leq 1$ if $\mathbf{f} = (2y+3)\mathbf{i} + xz\mathbf{j} + (yz-x)\mathbf{k}$.
36. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ where C is the curve $x=2t, y=t, z=t^3$ from $0 \leq t \leq 1$ if $\mathbf{f} = (2y+3)\mathbf{i} + xz\mathbf{j} + (yz-x)\mathbf{k}$.
37. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ where C is the curve $x=t, y=t, z=t$ if $\mathbf{f} = (3x-2y)\mathbf{i} + (y+2z)\mathbf{j} + x^2\mathbf{k}$.

UNIT IV

38. State Stoke's Theorem.
39. By using Stoke's theorem prove that $\int_C \mathbf{r} \cdot d\mathbf{r} = 0$ where $\mathbf{r} = x\mathbf{i} + y\mathbf{j} + z\mathbf{k}$.
40. Evaluate by using Stoke's theorem $\int_C (yzdx + zx dy + xydz)$ where C is the curve $x^2 + y^2 = 1, z = y^2$.
41. Prove that for a closed surface S, $\iint_S \mathbf{r} \cdot \mathbf{n} ds = 3V$ where V is the volume enclosed by S.
42. State Green's Theorem.
43. State Gauss Divergence Theorem.
44. Evaluate by using Green's theorem $\int_C (x^2 + y^2) dx - 2xydy$ where C is the rectangle in the x-y plane bounded by $y=0, y=b, x=0$ and $x=a$.

UNIT V

45. Prove that $\beta(m, n) = \beta(n, m)$
46. Prove that $\Gamma(n + 1) = n!$
47. prove that $\Gamma(1) = 1$
48. Prove that $\Gamma\left(\frac{1}{2}\right) = \sqrt{\pi}$
49. Define Beta and Gamma Functions
50. Prove that $\Gamma(n + 1) = n \Gamma(n)$
51. Prove that $\beta(m, n) = \beta(m + 1, n) + \beta(m, n + 1)$
52. Prove that $\beta(m, n) = 2 \int_0^{\pi/2} (\sin x)^{2m-1} (\cos x)^{2n-1} dx$

53. Evaluate $\int_0^{\infty} x^4 e^{-x} dx$
54. Prove that $\int_0^{\infty} x^8 (1 - x^6) / (1 + x)^{24} dx = 0$
55. Evaluate $\Gamma\left(\frac{1}{2}\right) \Gamma\left(\frac{3}{2}\right) \Gamma\left(\frac{5}{2}\right)$
56. Evaluate $\Gamma(6) / \Gamma(3)$
57. Evaluate $I = \int_0^1 x^4 (1 - x)^3 dx$
58. Evaluate $\beta(3, 5) \Gamma(3)$
59. Evaluate $\int_0^{\infty} x^6 e^{-3x} dx$
60. Evaluate $\beta(3, 5) \Gamma(3) \Gamma(5)$
61. Evaluate $\int_0^{\pi/2} \sin^2 x dx$

Section-C (5 marks)

UNIT I

1. Eliminate the arbitrary constants a, b, c from $x^2/a^2 + y^2/b^2 + z^2/c^2$ and form a differential equation.
2. Eliminating the arbitrary functions f and g from $z = f(x+ay) + g(x-ay)$ form a partial differential equation.
3. Solve the Lagrange's equation $p \cot x + q \cot y = \cot z$.
4. Solve the Lagrange's equation $p\sqrt{x} + q\sqrt{y} = \sqrt{z}$
5. Solve the Lagrange's equation $(y^2 + z^2) p - xyq + xz = 0$.
6. Solve $pq + p + q = 0$
7. Solve $z = px + qy + (q/p) - p$
8. Solve $z = px + qy + pq$
9. Solve: $z = px + qy + p^2 + q^2$
10. Solve: $4(1+z^3) = 9z^4 pq$

UNIT II

11. Find $L^{-1}[cs + d / ((s+a)^2 + b^2)]$
12. Find $L^{-1}[1 + 2s / ((s+2)^2 (s-1)^2)]$
13. Find the Laplace transform of $t^2 + \cos 2t \cos t + \sin^2 2t$
14. Find the Laplace transform of $f(t) = \begin{cases} e^{-t} & \text{if } 0 < t < 4 \\ 0 & \text{if } t \geq 4 \end{cases}$
15. If $L[f(x)] = F(s)$ and if $\lim_{x \rightarrow 0} f(x)/x$ exists then $L[f(x)/x] = \int_s^{\infty} F(s) ds$
16. Find $L(1 - \cos x/x)$
17. Find the Laplace transform of $(1 - \cos 2x)/x$
18. Solve $\frac{dx}{dt} + ax = y$; $\frac{dy}{dt} + ay = x$ given $x=0$ and $y=1$ when $t=0$
19. Solve $y' + 3y = e^{-2x}$ given $y(0) = 4$
20. Find $L^{-1}[1/s(s+1)(s+2)]$
21. Find $L^{-1}[s^2 - s + 2/s(s-3)(s+2)]$

22. Find the Laplace transform for the following $f(x) = \begin{cases} \sin x & \text{if } 0 < x < \pi \\ 0 & \text{if } x \geq \pi \end{cases}$

UNIT III

23. Find $\partial(u, v)/\partial(x, y)$ if $u=x+y/1-xy$ and $v=\tan^{-1}x+\tan^{-1}y$.
24. Find J if $x=r \cos\theta \cos\phi$; $y = \cos\theta \sin \phi$; $z = r \sin \theta$.
25. Find $(\partial(u, v)/\partial(x, y))$ if $u =x+y$ and $v=x-y$ and $x=r \cos \theta, y=r \sin \theta$.
26. Find $(\partial(x, y)/\partial(r, \theta))$ if $u =x+y$ and $v=x-y$ and $x=r \cos \theta, y=r \sin \theta$.
27. Find $\partial(u, v)/\partial(x, y)$ if $x =u \cos v$ and $y= u \sin v$.
28. Show that $(\partial(x, y)/\partial(u, v)) \times (\partial(u, v)/\partial(x, y)) = 1$ if $x=e^u \cos v$ and $y=e^v \sin v$.
29. Find $\partial(u, v)/\partial(r, \theta)$ if $u=2xy$, $v=x^2-y^2$, $x= r \cos \theta$ and $y= r \sin \theta$.
30. Find J if $x= r \sin\theta \cos\phi$; $y = r \sin\theta \sin \phi$; $z = r \cos\theta$.
31. Evaluate $\int_C f \cdot dr$ where $f = (x^2+y^2) \mathbf{i} - 2xy \mathbf{j}$ and the curve C is the rectangle in the x - y plane bounded by $y=0, y=b, x=0, x=a$.
32. Find the work done by the force $F= 3xy \mathbf{i} - 5z \mathbf{j} + 10xz \mathbf{k}$ along the curve $C, x=t^2+1; y=2t^2; z=t^3$ from $t=1$ and $t=2$.
33. Evaluate $\int_C f \cdot dr$ where $f=(x-y) \mathbf{i} +(y-2x) \mathbf{j}$ and C is the closed curve in the x - y plane $x=2 \cos t, y=3 \sin t$ from $t=0$ and $t=2\pi$.
34. Evaluate $\int_{(1,1)}^{(4,2)} f \cdot dr$ where $f=(x+y) \mathbf{i} +(y-x) \mathbf{j}$ along the
(i) the parabola $y^2=x$
(ii) straight line joining $(1,1)$ and $(4,2)$
35. Find the work done in moving a particle in a force field $F= 3x^2 \mathbf{i} + (2xz - y) \mathbf{j} + z \mathbf{k}$ along the line joining the points $(0, 0, 0)$ to $(2, 1, 3)$.
36. Find the work done in moving a particle in a force field $F = 2xy \mathbf{i} - 3x \mathbf{j} - 5z \mathbf{k}$ along the curve $C, x=t; y=t^2+1; z=2t^2$; from $t=1$ to $t=2$.

UNIT III

37. Evaluate $\iint_S (\nabla \times f) \cdot n \, dS$ where $f=y^2 \mathbf{i} + y \mathbf{j} -xz \mathbf{k}$ and S is the upper half of the sphere $x^2 + y^2 + z^2 = a^2$ and $z \geq 0$.
38. Prove that for a closed surface $S, \iint_S r \cdot n \, dS = 3V$ where V is the volume enclosed by S .
39. Evaluate by using Stoke's theorem $\int_C (yz \, dx + zx \, dy + xy \, dz)$ Where C is the curve $x^2 + y^2 = 1, z=y^2$
40. Evaluate $\int_C (e^x \, dx + 2y \, dy - dz)$ by using Stoke's theorem where C is the curve $x^2 + y^2 = 4, z=2$.
41. Evaluate $\iint_S f \cdot n \, dS$ where $f = (x + y^2) \mathbf{i} - 2x \mathbf{j} + 2yz \mathbf{k}$ and S is the surface of the plane $2x + y + 2z = 6$ in the first octant.
42. Evaluate $\iint_S f \cdot n \, dS$ where $f=(x^3-yz) \mathbf{i} - 2x^2 y \mathbf{j} + 2z \mathbf{k}$ and S is the surface of the cube bounded by $x=0, y=0, z=0; x=a; y=a; z=a$.

UNIT V

43. Prove that $\beta(m, n) = \int_0^\infty \frac{x^{m-1}}{(1+x)^{m+n}} dx$
44. Prove that $\Gamma(n+1) = n \Gamma(n)$ and $\Gamma(n+1) = n!$
45. Prove that $\Gamma(n) = 2 \int_0^\infty e^{-y^2} y^{2n-1} dy$
46. Prove that $\beta(m, n+1)/n = \beta(m+1, n)/m = \beta(m, n)/(m+n)$
47. $\Gamma(n) = \int_0^\infty [\log(\frac{1}{x})]^{n-1} dx$
48. Prove that $\int_0^{\pi/2} \sin^n x dx = \sqrt{\pi}/2 (\Gamma(n+1/2)/\Gamma(n+2/2)) = \int_0^{\pi/2} \cos^n x dx$. Hence evaluate $\int_0^{\pi/2} \sin^5 x dx$
49. Prove that $\int_0^{\pi/2} \sin^m x \cos^n x dx = 1/2 \beta(m+1/2, n+1/2)$. Hence find $\int_0^{\pi/2} \sin^6 x \cos^8 x dx$
50. Show that $\Gamma(n+1/2) = (1.3.5 \dots (2n-1)/2^n) \sqrt{\pi}$
51. Prove that $\beta(m, n) = 2 \int_0^{\pi/2} (\sin x)^{2m-1} (\cos x)^{2n-1} dx$ and Evaluate $\int_0^{\pi/2} \sin^3 x \cos^5 x dx$
52. Show that $\int_0^{\pi/2} d\theta / \sqrt{\cos \theta} = \frac{\Gamma(\frac{1}{4})}{2\Gamma(\frac{3}{4})} \sqrt{\pi}$
53. Prove that $\Gamma(n+1/2) = (2n)! \sqrt{\pi}/4^n n!$
54. Evaluate $\int_0^\infty x^6 e^{-3x} dx$
55. Prove that $\int_0^\infty \frac{e^{-st}}{\sqrt{t}} dt = \sqrt{\frac{\pi}{s}}$ where $s > 0$

Section-D (10 marks)

UNIT I

1. Find the general solution of $x(y^2 - z^2)p + y(z^2 - x^2)q = z(x^2 - y^2)$
2. Solve : $x^2(y-z)p + y^2(z-x)q = z^2(x-y)$
3. Solve : $x(y^2+z)p - y(x^2+z)q = (x^2-y^2)z$
4. Solve : $(x^2-yz)p + (y^2-zx)q = z^2 - xy$
5. Solve: $(y+z)p + (z+x)q = x+y$
6. Solve : $z = px + qy + \sqrt{\alpha p^2 + \beta q^2 + \gamma}$
7. Solve: $9(p^2z + q^2) = 4$
8. Solve: $z^2(p^2z^2 + q^2) = 1$
9. Solve: $q - p = y - x$

UNIT II

10. Find $L^{-1}[1/s(s+1)(s+2)]$
11. Find $L^{-1}[s^2 - s + 2/s(s-3)(s+2)]$
12. Find $L^{-1}[\log(s+a/s+b)]$
13. Find $L^{-1}[\frac{(1-s)}{(s+1)(s^2+4s+13)}]$
14. Using Laplace transform solve $y'' + 4y' + 13y = 2e^{-x}$ given $y(0) = 0$ and $y'(0) = -1$
15. Using Laplace transform solve $xy'' - (2+x)y' + 3y = x-1$ when $y(0) = 0$
16. Using Laplace transform solve
 - a. $dx/dt + y = \sin t$
 - b. $dy/dt + x = \cos t$ given $x(0) = 2$ and $y(0) = 0$

17. Using Laplace transform solve: $y' + 3y = e^{-2x}$ given $y(0) = 4$
18. Using Laplace transform solve $y'' + 3y' + 2y = 0$ given that $y(0) = 1$ and $y'(0) = 2$
19. Using Laplace transform Solve $y'' + 4y' + 4y = e^{-x}$ given that $y(0) = 0 = y'(0)$
20. Using Laplace transform Solve $xy'' - (1+x)y' + 2y = (x-1)$ given that $y(0) = 0$

UNIT III

21. Prove that $\left(\frac{\partial(u,v)}{\partial(x,y)}\right) \times \left(\frac{\partial(x,y)}{\partial(r,\theta)}\right) = \left(\frac{\partial(u,v)}{\partial(r,\theta)}\right)$ if $u = x + y$, $v = x - y$ and $x = r\cos\theta$ and $y = r\sin\theta$.
 - (i) Find $\frac{\partial(u,v)}{\partial(x,y)}$ if $u = x+y/1-xy$ and $v = \tan^{-1}x + \tan^{-1}y$
 - (ii) Find $\frac{\partial(u,v)}{\partial(r,\theta)}$ if $u = 2xy, v = x^2 - y^2$, $x = r\cos\theta$ and $y = r\sin\theta$ find $\partial(u,v)/\partial(r,\theta)$
22. Find the Jacobian for the following: (a) $x+y=u$; $y=uv$; (b) $2x+3y=u$; $x-2y=v$;
23. Prove that $\left(\frac{\partial(u,v)}{\partial(x,y)}\right) \times \left(\frac{\partial(x,y)}{\partial(u,v)}\right) = 1$ if $x = u\cos v$ and $y = u\sin v$.
24. Find the Jacobian if $x = r\cos\theta\cos\phi$; $y = r\cos\theta\sin\phi$; $z = r\sin\theta$
25. If $\mathbf{f} = (2y+3)\mathbf{i} + xz\mathbf{j} + (yz-x)\mathbf{k}$ evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ along the following paths C.
 - (i) $x = 2t^2$; $y=t$; $z=t^3$ from $t=0$ to $t=1$;
 - (ii) The polygonal path P consisting of the three line segments AB, BC and CD where $A(0,0,0)$, $B(0,0,1)$, $C(0,1,1)$ and $D(2,1,1)$
 - (iii) The straight line joining $(0,0,0)$ and $(2,1,1)$
26. If $\mathbf{f} = (3x-2y)\mathbf{i} + (y+2z)\mathbf{j} + x^2\mathbf{k}$ evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ from $(0,0,0)$ to $(1,1,1)$ where C is the path consisting of
 - (i) the curve $x=t$; $y=t^2$; $z=t^3$
 - (ii) The straight line joining $(0,0,0)$ and $(1,1,1)$
 - (iii) The straight lines from $(0,0,0)$ to $(0,1,0)$ then to $(0,1,1)$ and then to $(1,1,1)$
27. Evaluate $\int_C \mathbf{f} \cdot d\mathbf{r}$ where $\mathbf{f} = 3x^2\mathbf{i} + (2xz - y)\mathbf{j} + z\mathbf{k}$ along
 - (i) The straight line joining $(0,0,0)$ and $(2,1,3)$
 - (ii) The space curve $x = 2t^2$; $y = t$; $z = 4t^2 - 1$ from $t = 0$ to $t = 1$
 - (iii) The curve defined by $x^2 = 4y$; $3x^2 = 8z$ from $x = 0$ to $x = 2$

UNIT IV

28. Verify Stoke's theorem for the vector function $\mathbf{f} = 2y\mathbf{i} + 3xz\mathbf{j} - z^2\mathbf{k}$ where S is the upper half of the sphere $x^2 + y^2 + z^2 = 9$.
29. Verify Stoke's theorem for the vector function $\mathbf{f} = y^2\mathbf{i} + yz\mathbf{j} - xz\mathbf{k}$ and S is the upper half of the sphere $x^2 + y^2 + z^2 = a^2$ and $z \geq 0$

30. Verify Stoke's theorem for the vector function $\mathbf{f} = (2x - y) \mathbf{i} + yz^2 \mathbf{j} - y^2 z \mathbf{k}$ and S is the upper half surface of the sphere $x^2 + y^2 + z^2 = 1$ and C its boundary.
31. Verify Stoke's theorem for the vector function $\mathbf{f} = (x^2 - y^2) \mathbf{i} + 2xy \mathbf{j}$ in the rectangular region $x = 0; y = 0; x = a; x = b$.
32. Verify Green's theorem for the function $\mathbf{f} = (x^2 + y^2) \mathbf{i} - 2xy \mathbf{j}$ and C is the rectangle in the x-y plane bounded by $y=0, y=b, x=0$ and $x=a$.
33. Verify Green's theorem in the plane for $\int_C (x^2 - xy^3)dx + (y^2 - 2xy)dy$ where C is the square with vertices (0,0),(2,0),(2,2) and (0,2)
34. Verify Gauss divergence theorem for $\mathbf{f} = y\mathbf{i} + x\mathbf{j} + z^2\mathbf{k}$ for the cylindrical region S given by $x^2 + y^2 = a^2; z=0$ and $z=h$.
35. Verify Gauss divergence theorem for $\mathbf{f} = (x^2 - yz) \mathbf{i} + (y^2 - zx) \mathbf{j} + (z^2 - xy) \mathbf{k}$ taken over the rectangular parallelepiped $0 \leq x \leq a, 0 \leq y \leq b, 0 \leq z \leq c$.
36. Verify Gauss divergence theorem for $\mathbf{f} = (2x - z) \mathbf{i} + x^2 y \mathbf{j} - xz^2 \mathbf{k}$ taken over the region bounded by $x=0, x=1, y=0, y=1, z=0, z=1$

UNIT V

21. Prove that $2^{2n-1} \Gamma(n) \Gamma(n+1/2) = \Gamma(2n) \sqrt{\pi}$
22. State and Prove Duplication formula
23. Prove that $\beta(m, n) = \frac{\Gamma(m)\Gamma(n)}{\Gamma(m+n)}$
24. Prove that $\int_0^{\pi/2} \sin^m x \cos^n x dx = 1/2 \beta(m+1/2, n+1/2)$. Hence find (i) $\int_0^{\pi/2} \sin^6 x \cos^8 x dx$
(ii) $\int_0^{\pi/2} \sin^5 x \cos^6 x dx$ (iii) $\int_0^{\pi/2} \sin^9 x \cos^{10} x dx$
25. Prove that $\int_0^1 \frac{x^2 dx}{(1-x^4)^{1/2}} \times \int_0^1 \frac{dx}{(1+x^4)^{1/2}} = \frac{\pi}{4\sqrt{2}}$
26. Prove that $\int_0^{\pi/2} \sin^n x dx = \frac{\sqrt{\pi}}{2} \left(\frac{\Gamma(\frac{n+1}{2})}{\Gamma(\frac{n+2}{2})} \right) = \int_0^{\pi/2} \cos^n x dx$. Also evaluate the following
(i) $\int_0^{\pi/2} \sin^5 x dx$ (ii) $\int_0^{\pi/2} \cos^8 x dx$ (iii) $\int_0^{\pi/2} \cos^{10} x dx$
27. Prove that $\int_0^{\pi/2} \frac{d\theta}{\sqrt{\sin \theta}} \int_0^{\pi/2} \sqrt{\sin \theta} d\theta = \pi$

ST. MARY'S COLLEGE (Autonomous) , THOOTHUKUDI

II B.A/B.Sc/BBA/ B.Com

Semester IV

NME-Mathematics for Competitive Examinations II

Question Bank

Subject Code: 21UMAN41

Unit-I

1. The average of first nine multiples of 3 is _____
(a)12 (b) 12.5 (c)**15** (d)18.5
2. The average of numbers 0.64202, 0.64203, 0.64202 and 0.64201 is _____
(a) 0.642020 (b) 0.642021 (c) 0.642022 (d) **0.642025**
3. The average of 30 results is 20 and the average of other 20 results is 30. The average of all the results is _____
(a)**24** (b)25 (c)48 (d)50
4. The average of odd numbers upto 100 is _____
(a)51 (b)**50** (c)49.5 (d)49
5. If a, b, c, d, e are five consecutive odd numbers ,their average is _____
(a) $5(a+4)$ (b) $abcde/5$ (c) $5(a+b+c+d+e)$ (d) **$a+4$**
6. A cricketer makes 72,59,18,101 and 7 runs respectively in five matches played by him. His average score is _____
(a) 52 (b)64 (c)**51.4** (d)61.4
7. The average score of a cricketer in 2 matches is 27 and that in 3 others is 32. Then his average score in 5 matches is _____
(a)11.8 (b)25 (c)29.5 (d)**30**
8. The average of 8 numbers is 21. If each of the numbers is multiplied by 8, the average of the remaining numbers is _____
(a)8 (b)21 (c)29 (d)**168**
9. A ship sails out to a mark at the rate of 15 km/hr and sails back at the rate of 10 km/hr. The average rate of sailing is _____
(a)5km/hr (b)**12km/hr** (c)12.5km/hr (d)25km/hr
10. The average of first five multiples of 3 is _____
(a)**9** (b) 12 (c)15 (d)18.5

Unit-II

11. Three fourth of one-fifth of a number is 60. The number is _____
(a) 300 (b)**400** (c)450 (d)1200
12. 11 times of a number is 132. The number is _____.
(a)9 (b) **12** (c)13 (d)12.5
13. The difference of two numbers is 5 and the difference of their squares is 135. The sum of the numbers is _____.
(a)**27** (b)25 (c)30 (d)32

14. The sum of two numbers is 29 and the difference of their squares is 145. The difference between the numbers is _____.
 (a)13 (b)**5** (c)8 (d)11
15. The sum of two numbers is 100 and their difference is 37. The difference of their squares is _____.
 (a)37 (b)100 (c)63 (d)**3700**
16. A number is 25 more than its two-fifth. The number is _____.
 (a)60 (b)80 (c) $\frac{125}{3}$ (d) $\frac{125}{7}$
17. If one-fifth of a number decreased by 5 is 5, then the number is _____.
 (a) 25 (b)**50** (c)60 (d)75
18. $\frac{1}{4}$ of a number subtracted from $\frac{1}{3}$ of the number gives 12. The number is _____.
 (a)**144** (b)120 (c)72 (d)63
19. $\frac{3}{4}$ of a number is 19 less than the original number. The number is _____.
 (a)84 (b)64 (c)**76** (d)72
20. Three-fourth of a number is more than two-third of the number by 5. The number is _____.
 (a)72 (b)**60** (c)84 (d)48
21. $\frac{4}{5}$ of a certain number is 64. Half of that number is _____.
 (a) 32 (b)**40** (c)80 (d)16
22. If the unit digit in the product $75? \times 49 \times 867 \times 943$ be 1, then the value of ? is:
 (a) 1 (b)3 (c)7 (d)**9**
23. Which of the following number is not a square of any natural number : _____.
 (a)**34692** (b)4096 (c)15309 (d)none of these
24. The number $6^{2n} - 1$, where n is any positive integer, is always divisible by _____.
 (a)11 (b)5 (c)7 (d)**both 5 and 7**

Unit-III

25. The sum of the ages of a mother and a daughter is 50 years. Also, 5 years ago, the mother's age was 7 times the age of the daughter. The present ages of the mother and the daughter respectively are _____.
 (a)35&15 yrs (b)38&12 yrs (c)**40&10yrs** (d)42&8yrs
26. Mr.Sohanlal is 4 times as old as his son. Four years hence the sum of their ages will be 43 years. The present age of son is _____.
 (a) 5 years (b)**7 years** (c)8 years (d)10 years
27. In 10 years, A will be twice as old as B was 10 years ago. If A is now 9 years older than B, the present age of B is _____.
 (a) 19 years (b)29 years (c)**39 years** (d)49 years
28. Rajan's age is 3 times that of Ashok. In 12 years, Rajan's age will be double the age of Ashok. Rajan's present age is _____.
 (a)27 years (b)32 years (c)**36 years** (d)40 years
29. Five years ago Viney's age was one-third of the age of Vikas and now Viney's age is 17 years. What is the present age of Vikas?
 (a)9 years (b)36 years (c)**41 years** (d)51 years

30. The ratio of Laxmi's age to the age of her mother is 3:11. The difference of their ages is 24 years. The age of Laxmi is_____
- (a)**9 years** (b)33 years (c)11 years (d)3 years
31. The ratio of Vimal's age and Aruna's age is 3:5 and sum of their ages is 80 years. The age of Vimal is_____
- (a)9 years (b)**30 years** (c)50 years (d)51 years

Unit-IV

32. If principal is P, Rate is R% per annum and time is T years. Then simple interest is.....
- (a) $\frac{P \times R \times T}{100}$ (b) $\frac{P \times R}{100 \times T}$ (c) $\frac{P \times T}{100 \times R}$ (d) $\frac{100}{P \times R \times T}$
33. The money borrowed or lent out for a certain period is called the.....
- (a) **principal** (b) interest (c) amount (d) tax
34. In how many years will a sum of money double itself at 12% per annum.....
- (a) 6 years 9 months (b) 8 years 3 months
(c) 7 years 6 months (d) **8 years 4 months**
35. Rahul borrowed Rs.3000 at 9% for 4 years. How much simple interest did he pay?
- (a)**Rs.1080** (b)Rs.1030 (c)Rs.1050 (d)Rs.1100
36. In what time Rs.1200 will becomes Rs.1440 when annual rate of interest is 10%?
- (a)4yrs (b)5yrs (c)**2yrs** (d)3yrs
37. The simple interest at x% for x years will be Rs. x on a sum of.....
- (a)Rs. x (b) Rs. 100x (c) **Rs. $\frac{100}{x}$** (d) Rs. $\frac{100}{x^2}$
38. The simple interest on a sum of money at 8% per annum for 6 years is half the sum. The sum is
- (a)Rs.4800 (b) Rs.6000 (c) Rs.8000 (d) **data inadequate**
39. At simple interest, a sum doubles after 20 years. The rate of interest per annum is.....
- (a)**5%** (b) 10% (c)12% (d) data inadequate

Unit-V

40. The difference between the amount and the principal is called.....
- (a)**compound interest** (b)simple interest (c)amount (d) principal
41. Let P be principal and T =n years and Rate=R% per annum, find the amount when interest is compound annually
- (a) **$P(1 + \frac{R}{100})^n$** (b) $P(1 + \frac{\frac{1}{2}R}{100})^{2n}$ (c) $P(1 + \frac{\frac{1}{4}R}{100})^{2n}$ (d) $P(1 + \frac{R}{100})^{3n}$
42. Let P be principal and T =n years and Rate=R% per annum, find the amount when interest is compound Half Yearly
- (a) $P(1 + \frac{R}{100})^n$ (b) **$P(1 + \frac{\frac{1}{2}R}{100})^{2n}$** (c) $P(1 + \frac{\frac{1}{4}R}{100})^{2n}$ (d) $P(1 + \frac{R}{100})^{3n}$
43. Let P be principal and T =n years and Rate=R% per annum, find the amount when interest is compound Quarterly

$$(a) P\left(1 + \frac{R}{100}\right)^n \quad (b) P\left(1 + \frac{\frac{1}{2}R}{100}\right)^{2n} \quad (c) P\left(1 + \frac{\frac{1}{4}R}{100}\right)^{2n} \quad (d) P\left(1 + \frac{R}{100}\right)^{3n}$$

44. The least number of complete years in which a sum of money put out at 20% compound will be more than doubled is.....

- (a)3 (b)4 (c)5 (d)6

45. A tree increase annually by $\frac{1}{8}$ th of its height . By how much will it increase after 2 years , if it stands today 64cm high?

- (a)72cm (b)74cm (c)75cm (d)81cm

Section – B (2mark)

Unit-I

- The average weight of a class of 24 students is 35 kg. If the weight of the teacher be included, the average rises by 400gms. Find the weight of the teacher.
- A batsman make a score of 87 runs in the 17th inning and thus increased his average by 3. Find his average after 17th inning.
- Out of three numbers, the first is twice the second and is half of the third. If the average of the three numbers is 56, find the three numbers. est and the smallest number.
- The average age of three boys is 15 years. If their ages are in the ratio 3:5:7, find the age of the youngest boy.
- The average height of 30 girls out of a class of 40 is 160cms and that of the remaning girls is 156cms. Find the average height of the whole class.
- The average score of a cricketer for 10 matches is 43.9 runs. If thae average of the first six matches is 53, find the average for the last four matches.
- The average of 11 results is 50. If the average of first six results is 49 and that of last six is 52, find the sixth result.
- The average of 50 numbers is 38. If two numbers, namely 45 and 55 are discarded, what is the average of the remaining numbers?
- The average temperature of first three days is 27°C and that of the next three is 29°C. If the average of the whole week is 28.5°C, find the temperature of the last day of the week.
- The average of 25 results is 18; that of first twelve is 14 and that of last twelve is 17. Calculate the thirteenth result.
- The average of 13 results is 68. The average of first seven is 63 and that of the last seven is 70. Find the seventh result.

Unit-II

- The difference between two numbers is 8 and $\frac{1}{8}$ th of their sum is 35. Find the numbers.
- The ratio between two numbers is 3:4 and their sum is 420. Find the greater of the two numbers.

14. The difference between the squares of two consecutive numbers is 35. What are the numbers?
15. A number is as much greater than 31 as is less than 55. Find the number.
16. A positive number when decreased by 4, is equal to 21 times the reciprocal of the number. Find the number.
17. The sum of two numbers is twice their difference. If one of the numbers is 10, what is the other number?
18. What is the number whose fifth part increased by 5 is equal to its fourth part diminished by 5?
19. If one-fourth of one-third of one-half of a number is 15, find the number.
20. $\frac{4}{5}$ of a number exceeds its $\frac{2}{3}$ by 8. Find the number.
21. What must be added to the numerator and denominator of $\frac{3}{4}$ to give $\frac{11}{12}$?
22. A number exceeds 20% of itself by 40. What is the number?
23. Find the number if 16% of 40% of that number is 8.

Unit-III

24. The sum of the ages of a son and father is 56 years. After four years, the age of the father will be three times that of the son. What are their present ages?
25. The sum of the ages of a father and son is 45 years. Five years ago the product of their ages was 4 times the fathers age at that time. Find the present ages of the father and son.
26. The age of a man is 4 times that of his son. Five years ago, the man was nine times as old as his son was at that time. Calculate the present age of the man.
27. The ratio of Laxmi's age to the age of her mother is 3:11. The difference of their ages is 24 years. Find the ratio of their ages after 3 years.
28. The ratio of Vimal's age and Aruna's age is 3:5 and sum of their ages is 80 years. Find the ratio of their ages after 10 years.
29. The difference between the ages of two person is 10 years. 15 years ago, the elder one was twice as old as the younger one. What is the present age of the elder person?
30. Pushpa is twice as old as Rita was two years ago. If the difference between their ages be 2 years, how old is Pushpa today?
31. The age of Arvind's father is 4 times his age. If 5 years ago, father's age was 7 times of the age of his son at that time, what is Arvind's father present age?

Unit-IV

32. Find simple interest on Rs.5664 at $13\frac{3}{4}\%$ per annum for 9 months.
33. Find simple interest on Rs. 3125 at 15% per annum for 73 days.
34. Find simple interest on Rs.1500 at 18% per annum for the period from 5th Feb, 1992 to 18th April, 1992.
35. If the simple interest on a certain sum for 3 years at 14% per annum is Rs.235.20, then find the sum.
36. A sum of money amounts to Rs.850 in 3 years and Rs.925 in 4 years. Find the sum.

37. The simple interest on a sum of money is $\frac{1}{9}$ of the principal and the number of years is equal to the rate percent per annum . Find the rate percent per annum.
38. A sum of money will double itself in 16 years at simple interest with yearly , find the rate percent.
39. At a certain rate of simple interest, a certain sum doubles itself in 10 years .How many years it will treble itself.
40. A sum of money at simple interest amounts to Rs.2240 in 2 years and Rs.2600 in 5 years. Find the sum.
41. A lent Rs.600 to B for 2 years and Rs. 150 to C for 4 years and received altogether from both Rs. 90 as simple interest. Find the rate of interest.
42. If the interest on Rs. 1200 be more than the interest on Rs.1000 by Rs. 50 in 3 years , then find the rate percent.

Unit-V

43. If Rs.7500 are borrowed at C.I at the rate of 4% per annum , then how much amount paid after 2 years.
44. Find the compound interest on Rs. 2800 for $1\frac{1}{2}$ years at 10% per annum .
45. Find the compound interest on Rs. 50000 at 16% per annum for 2 years, compound annually.
46. A sum is invested at compound interest payable annually. The interest in two successive years was Rs.500 and Rs.540. Find the sum.
47. Rs.800 at 5% per annum compound interest will amount to Rs.882 in how many year.
48. Simple interest on a sum at 4% per annum for 2 years is Rs.80. Find the compound interest on the same sum for the same period.
49. The compound interest on Rs.30000 at 7% per annum for a certain time is Rs.4347. Find the time.
50. The compound interest on a certain sum of money for 2 years at 10% per annum is Rs.420. Find the simple interest on the same sum at the same rate and for the same time.

Section – C (4 mark)

Unit-I

1. The average of 10 numbers is calculated as 15. It is discovered later on that while calculating the average one number, namely 36 was wrongly read as 26. Find the correct average.
2. Out of four numbers, the average of first three is 15 and that of the last three is 16. If the last number is 19, what is the last number?
3. Average temperature of first 4 days of a week is 38.6°C and that of the last 4 days is 40.3°C . If the average temperature of the week be 39.1°C , find the temperature on the 4th day.
4. The average of 6 observations is 12. A new seventh observation is included and the new average is decreased by 1. Find the seventh observation.
5. The average of the daily income of A,B and C is Rs.60. If B earns Rs.20 more than C and A earns double of what C earns, what is the daily income of C?

6. The average weight of a class of 40 students is 40 kg. If the weight of the teacher be included, the average weight increases by 500 gms. What is the weight of the teacher?
7. The average age of four players is 18.5 years. If the age of the coach is also include, the average age increases by 20%. What is the age of the coach?
8. The average age of four children in a family is 12 years. If the spacing between their ages is 4 years, find the age of the youngest child.
9. 10 sheep and 5 pigs were bought for Rs.6000. If the average price of a sheep is Rs.450, find the average price of a pig.
10. The average temperature for Monday, Tuesday and Wednesday was 40°C. The average for Tuesday, Wednesday and Thursday was 41°C. If the temperature on Thursday is 42°C, find the temperature on Monday.
11. The average expenditure of a man for the first five months is Rs.120 and for the next seven months it is Rs.130. If he saves Rs.290 in that year, what is his monthly average income?
12. The average salary of 20 workers in an office is Rs.1900 per month. If the manager's salary is added, the baverage salary becomes Rs.2000 per month. What is the manager's annual salary?

Unit-II

13. The difference of two numbers is 8 and $\frac{1}{8}$ th of their sum is 35. Find the numbers.
14. The product of two numbers 1200 . The sum of their squares is 289. Find the sum of the two numbers.
15. 24 is divided into two parts such that 7 times the first part added to 5 times the second part makes 146. Find the first and second part.
16. The sum of two numbers is 15 and sum of their squares is 113. Find the numbers.
17. The sum of squares of two numbers is 80 and the squares of their difference is 36. Find the product of the two numbers.
18. The sum of three consecutive odd numbers is 57. Find the middle one.
19. Three numbers are in the ratio 3:4:5. The sum of the largest and the smallest equals the sum of the third and 52. Find the smallest number.
20. The sum of three numbers is 132. If the first number be twice the second and third number be one third of the first , calculate the second number.
21. Three numbers are in the ratio 4:5:6 and their average is 25. Find the largest number.
22. Two numbers are such that the ratio between them is 3:5; but if each is increased by 10, the ratio between them is 5:7. What is the number?
23. The sum of seven numbers is 235. The average of the first three is 23 and that of the last three is 42. Find the fourth number.

Unit-III

24. After five years the age of a father will be thrice the age of his son whereas five years ago, he was seven times as old as his son was. What is father's present age?
25. 10 years ago, Chandravati's mother was 4 times older than her daughter. After 10 years, the mother will be twice older than the daughter. Find the present age of Chandravati.
26. The ratio of the father's age to the son's age is 4:1. The product of their ages is 196. Find the ratio of their ages after 5 years.
27. Kamala got married 6 years ago. Today her age is $1\frac{1}{4}$ times her age at the time of marriage. Her son's age is $(1/10)$ times her age. What is the age of her son?
28. The age of a father 10 years ago was thrice the age of his son. Ten years hence, the father's age will be twice that of his son. What is the ratio of their present ages?
29. One year ago, a father was four times as old as his son. In 6 years, his age exceeds twice his son's age by 9 years. Find the ratio of their ages.
30. Ten years ago A was half of B in age. If the ratio of their present ages is 3:4, what will be the total of their present ages?

Unit-IV

31. If Rs.64 amount to Rs.83.20 in 2 years, what will Rs.86 amount to in 4 years at the same rate percent per annum?
32. A sum of money amounts to Rs. 702 in 2 years and Rs.783 in 3 years . Find the rate percent.
33. A sum when reckoned at simple interest at $12\frac{1}{2}\%$ per annum amounts to Rs.2437.50 after 4 years. Find the sum.
34. Simple interest on a certain sum is $\frac{16}{25}$ of the sum. Find the rate percent and time, if both are equal.
35. If the amount of Rs.360 in 3 years is Rs.511.20, what will be the amount of Rs. 700 in 5 years?
36. Rs. 800 amounts to Rs. 920 in 3 years at simple interest . If the interest rate is increased by 3% , it would amount to how much?
37. A certain sum of money at simple interest amounts to Rs.1260 in 2 years and to Rs. 1350 in 5 years. Find the rate percent per annum.
38. A sum of money becomes $(\frac{8}{5})$ of itself in 5 years at a certain rate of interest . Find the percent per annum.
39. The rate of interest on a sum of money is 4% per annum for the first 2 years, 6% per annum for the next 4 years and 8% per annum for the period beyond 6 years. If the simple interest accrued by the sum for a total period of 9 years is Rs.1120, what is the sum?

Unit-V

40. Find compound interest on Rs.100000 at 20% per annum for 2 years 3 months, compounded annually.

41. Find the compound interest on Rs.6250 at 12% per annum for 1 year, compound half yearly.
42. Find compound interest on Rs.51200 at 15% per annum for 9 months, compounded quarterly.
43. Find the compound interest on Rs.20480 at $6\frac{1}{4}$ % per annum for 2 years 73 days.
44. A sum of money amounts to Rs.10648 in 3 years and Rs.9680 in 2 years. Find the rate of interest.
45. The difference between the compound interest and the simple interest on a certain sum at 5% per annum for 2 years is Rs.1.50. Find the sum.
46. The simple interest on a certain sum for 2 years at 10% per annum is Rs.90. Find the corresponding compound interest.
47. If one compound interest on a certain sum of money for 3 years at 10% per annum be Rs.993, what would be the simple interest?

Section – D(10 mark)

Unit-I

1. (i) The average weight of 8 persons is increased by 2.5 kg when one of them whose weight is 56 kg is replaced by a new man. Find the weight of the new man.
(ii) Average monthly income of a family of 4 earning members was Rs.735. One of the earning members died and therefore the average income came down to Rs.650. find the income of the decreased.
2. (i) The average age of a family of 6 members is 22 years . If the age of the youngest member be 7 years, find the average age of the family at the birth of the youngest member.
(ii) The average age of four children in a family is 12 years . If the spacing between their ages is 4 years, find the age of the youngest child.
3. (i) On a journey across Delhi, a taxi averages 30 km/hr for 60% of the distance, 20 km/hr for 20% of it and 10 km/hr for the remainder. What is the average speed of the whole journey?
(ii) With an average speed of 40 km/hr a train reaches its destination in time. If it goes with an average speed of 35 km/hr , it is late by 15 minutes. What is the total journey?
4. (i) The average weight of A, B, C is 45 kg . If the average weight of A and B is 40 kg and that of B and C is 43 kg , then find the weight of B.
(ii) The average weight of three men A, B and C is 84 kg . Another man D joins the group and the average now becomes 80 kg . If another man E, whose weight is 3 kg more than that of D, replaces A, then the average weight of B, C, D and E becomes 79 kg . Find the weight of A.

5. (i) The average temperature of Monday, Tuesday, Wednesday and Thursday was 38°C and that of Tuesday, Wednesday, Thursday and Friday was 40°C . If the temperature on Monday was 30°C , What was the temperature of Friday?.
- (ii) The mean temperature of Monday to Wednesday was 37°C and of Tuesday to Thursday was 34°C . If the temperature on Thursday was $\frac{4}{5}$ th that of Monday, what was the temperature on Thursday?
6. (i) The average age of 11 players of a cricket team is decreased by 2 months when two of them aged 17 years and 20 years are replaced by two reserves. What is the average age of the reserves?
- (ii) The average age of 5 members of a committee is the same as it was 3 years ago, because an old member has been replaced by a new member. What is the difference between the ages of old and new member?
7. (i) The average of 5 consecutive numbers is n . If the next two numbers are also included, find the average of 7 numbers.
- (ii) Ten years ago, the average age of a family of 4 members was 24 years. Two children having been born, the average age of the family is same today. What is the present age of the youngest child if they differ in age by 2 years?

Unit-II

8. (i) If 1 is added to the denominator of a fraction, the fraction becomes $\frac{1}{2}$. If 1 is added to the numerator, the fraction becomes 1. Find the fraction.
- (ii) 24 is divided into two parts such that 7 times the first part added to 5 times the second part makes 146. Find the first part.
9. (i) A fraction becomes 4 when 1 is added to both the numerator and denominator; and it becomes 7 when 1 is subtracted from both the numerator and denominator. Find the numerator of the given fraction.
- (ii) If 3 is added to the denominator of a fraction, it becomes $\frac{1}{3}$ and if 45 be added to its numerator, it becomes $\frac{3}{4}$, find the fraction.
10. (i) A certain number of two digits is three times the sum of its digits and if 45 be added to it, its digits are reversed. Find the number
- (ii) The sum of three numbers is 68. If the ratio between first and second be 2:3 and that between second and third be 5:3, Find the second number.
11. (i) The number x is exactly divisible by 5 and the remainder obtained on dividing the number y by 5 is 1. What remainder will be obtained when $(x + y)$ is divided by 5?
- (ii) The average of three numbers is 42. The first is twice the second and the second is

- twice the third. Find the difference between the largest and the smallest number.
12. (i) Of the three numbers, the sum of first two is 45; the sum of the second and the third is 55 and the sum of the third and thrice the first is 90. Find the third number.
(ii) There are two numbers such that the sum of twice the first and thrice the second is 18, while the sum of thrice the first and twice the second is 17. Find the larger of the two numbers.
13. (i) If a number is subtracted from the square of its one half, the result is 48. Find the square root of the number.
(ii) A number when divided by 6 is diminished by 40. What is the number?
(iii) The sum of squares of two numbers is 68 and the square of their difference is 36. Find the product of the two numbers.

Unit-III

14. (i) Three years ago the average of A and B was 18 years. With joining them, the average becomes 22 years. How old is C now?
(ii) Jayesh is as much younger to Anil as he is older to Prashant. If the sum of the ages of Anil and Prashant is 48 years, what is the age of Jayesh?
15. (i) Kamala got married 6 years ago. Today her age is $1\frac{1}{4}$ times her age at the time of marriage. Her son's age is $(1/10)$ times her age. What is the age of her son?
(ii) The age of a father 10 years ago was thrice the age of his son. Ten years hence, the father's age will be twice that of his son. What is the ratio of their present ages?
16. (i) One year ago the ratio between Samir and Ashok's age was 4:3. One year hence the ratio of their age will be 5:4. What is the sum of their present ages in years?
(ii) The ages of A and B are in the ratio 2:5. After 8 years their ages will be in the ratio 1:2. Find the difference of their ages.
(iii) 10 years ago, Chandravati's mother was 4 times older than her daughter. After 10 years, the mother will be twice older than the daughter. Find the present age of Chandravati.

Unit-IV

17. (i) A certain sum of money amounts to Rs.756 in 2 years and to Rs.873 in $3\frac{1}{2}$ years . Find the sum and the rate of interest.
(ii) At what rate percent per annum will a sum of money double in 8 years?
18. (i) A shopkeeper borrowed Rs.25000 from two money lenders . For one loan he paid 12% per annum and for the other 14% per annum. The total interest paid for one year was Rs. 3260. How much did he borrow at each rate?
ii) A sum was put at simple interest at a certain rate for 2 years. Had it been put at 3% higher rate, it would have fetched Rs. 300 more . Find the sum.
19. (i) What annual instalment will discharge a debt of Rs. 4600 due in 4 years at 10% simple interest?
(ii) A sum of money, put at simple interest trebles itself in 15 years. Find the rate percent per annum.

20. (i) A man invested $\frac{1}{3}$ of his capital at 7% ; $\frac{1}{4}$ at 8% and remainder at 10%. If his annual income is Rs. 561, then find the capital.
(ii) The simple interest on a sum of money will be Rs. 600 after 10 years. If the principal is trebled after 5 years, what will be the total interest at the end of the tenth year?
21. (i) A man lends Rs.10000 in four parts. If he gets 8% on Rs.2000; $7\frac{1}{2}\%$ on Rs. 4000 and $8\frac{1}{2}\%$ on Rs. 1400; what percent must he get for the remainder, if the average interest is 8.13%?
(ii) A certain sum of money at simple interest amounts to Rs.1012 in $2\frac{1}{2}$ years and to Rs.1067.20 in 4 years. Find the rate of interest per annum .

UNIT V

22. (i) The difference between compound interest and the simple interest on a certain sum at $12\frac{1}{2}\%$ per annum for 3 years is Rs.250. Find the sum.
(ii) A sum amounts to Rs.1352 in 2 years at 4% compound interest. Find the sum.
23. (i) A certain sum on compound interest amounts to Rs.2809 in 2 years and Rs.2977.54 in 3 years. Find the sum and rate percent.
(ii) What is the principal amount which earns Rs.132 as compound interest for the second year at 10% per annum?
24. (i) A sum amounts to Rs.2916 in 2 years and to Rs.3149.28 in 3 years at compound interest. Find the sum.
(ii) A loan was repaid in two annual instalments of Rs.112 each. If the rate of interest be 10% per annum compound annually. Find the borrowed sum.
25. (i) The difference between simple interest and compound interest at the same rate for Rs.5000 for 2 years is Rs.72. Find the rate of interest.
(ii) A sum of money placed at compound interest doubles itself in 5 years. How many years to take amount to eight times itself.

QUESTION BANK
III B.Sc. Mathematics/Computer Science
Common Core – Computer Oriented Numerical Methods
Sub code: 21UCMC51

Section A

UNIT I

1. If $f(x) = x^2 + x + 1$ and the interval of differencing $h = 1$ then $\Delta f(x) =$ _____.
(a) $x + 2$ (b) **$2x + 2$** (c) $2x$ (d) 2.
2. If $h = 1$ then $\nabla(2^x) =$ _____
(a) **2^{x-1}** (b) 2^x (c) 2 (d) $3x2^x$.
3. If $h = 1$ then $\Delta(2^x) =$ _____
(a) 2^{x-1} (b) **2^x** (c) 2 (d) $3x2^x$.
4. Higher order differences can be expressed in terms of _____ of the function.
(a) arguments (b) entries (c) interval of differencing (d) **values**.
5. The operator E is called _____
(a) operator (b) backward difference operator
(c) **shift operator** (d) forward operator.
6. In the usual notation the relation between E and Δ is _____
(a) $E = 1 - \Delta$ (b) **$E = 1 + \Delta$** (c) $E = \Delta - 1$ (d) $E = \frac{1}{\Delta}$.
7. Newton's backward interpolations formula is used when interpolation is required near the _____ table.
(a) beginning (b) middle (c) **end** (d) at the average of
8. $\Delta^n (e^x) =$ _____
(a) $e^x(e^h + 1)^n$ (b) $e^x(e^h + 1)$ (c) **$e^x(e^h - 1)^n$** (d) $e^x(e^{nh} + 1)^n$
9. $E - \Delta =$ _____.
(a) **1** (b) - 1 (c) 0 (d) 2
5. The value of p in Newton's backward difference formula is _____.
(a) $x - x_0 / h$ (b) $x + x_0 / h$
(c) $x - x_n / 2h$ (d) **$x - x_n / h$**
6. The value of p in Newton's forward difference formula is _____.
(a) **$x - x_0 / h$** (b) $x + x_0 / h$
(c) $x - x_0 / 2h$ (d) $x + x_0 / 2h$

7. The value of $\Delta[f(x)]$ in finite differences is_____.
- (a) $f(x+h) - f(x)$ (b) $f(x+h) + f(x)$
 (c) $f(x) - f(x-h)$ (d) $f(x) + f(x-h)$
8. The relation between the forward difference operator and backward difference operator is given by_____.
- (a) $\nabla[f(x-nh)] = \Delta^n f(x)$ (b) $\nabla[f(x+nh)] = \Delta^n f(x)$
 (c) $\nabla[f(x-nh)] = \Delta^{n+1} f(x)$ (d) $\nabla[f(x-nh)] = \Delta^{n-1} f(x)$
9. Higher order differences can be expressed in terms of _____of the function.
- (a) arguments (b) entries (c) interval of differencing (d) values
10. The first order difference for $f(x) = ab^{cx}$ is _____
- (a) $ab^{cx}(b^{ch} + 1)$ (b) $ab^{ch}(b^{cx} - 1)$
 (c) $ab^{cx}(b^{ch} - 1)$ (d) $ab^{ch}(b^{cx} + 1)$.
11. The value of $\Delta^2 y_2$ is _____.
- (a) $\Delta^2 y_4$ (b) $\Delta^4 y_2$ (c) $\nabla^2 y_4$ (d) $\nabla^4 y_2$.
12. The value of $\Delta x^{(n)}$ is_____.
- (a) $nhx^{(n-1)}$ (b) $nhx^{(n+1)}$ (c) nhx^n (d) $(n+1)hx^n$.

UNIT II

1. The process of computing the derivative $\frac{dy}{dx}$ for some particular value of x is called_____.
- (a) differentiation (b) integration (c) numerical integration (d) difference
2. The formula to find $\left(\frac{dy}{dx}\right)$ at $x = x_n$ is _____.
- (a) $\frac{1}{h} [\nabla y_n + \frac{1}{2} \nabla^2 y_n + \frac{1}{3} \nabla^3 y_n + \dots]$ (b) $\frac{1}{h} [\nabla y_n - \frac{1}{2} \nabla^2 y_n - \frac{1}{3} \nabla^3 y_n - \dots]$
 (c) $\frac{1}{2h} [\nabla y_n + \frac{1}{2} \nabla^2 y_n + \frac{1}{3} \nabla^3 y_n + \dots]$ (d) $\frac{1}{2h} [\nabla y_n - \frac{1}{2} \nabla^2 y_n - \frac{1}{3} \nabla^3 y_n - \dots]$
3. The formula to find $\left(\frac{d^2y}{dx^2}\right)$ at $x = x_n$ is _____.
- (a) $\frac{1}{h^2} [\nabla^2 y_n + \nabla^3 y_n + \frac{11}{12} \nabla^4 y_n + \dots]$ (b) $\frac{1}{h^2} [\nabla y_n - \frac{1}{2} \nabla^2 y_n - \frac{1}{3} \nabla^3 y_n - \dots]$
 (c) $\frac{1}{2h^2} [\nabla^2 y_n + \nabla^3 y_n + \frac{11}{12} \nabla^4 y_n + \dots]$ (d) $\frac{1}{2h} [\nabla y_n - \frac{1}{2} \nabla^2 y_n - \frac{1}{3} \nabla^3 y_n - \dots]$
4. The Newton's forward formula to find $\left(\frac{d^2y}{dx^2}\right)$ at $x = x_0$ is
- (a) $\frac{1}{h^2} [\Delta^2 y_0 + \Delta^3 y_0 + \frac{11}{12} \Delta^4 y_0 + \dots]$ (b) $\frac{1}{h^2} [\Delta^2 y_0 - \Delta^3 y_0 + \frac{11}{12} \Delta^4 y_0 - \dots]$
 (c) $\frac{1}{2h^2} [\nabla^2 y_0 + \nabla^3 y_0 + \frac{11}{12} \nabla^4 y_0 + \dots]$ (d) $\frac{1}{2h} [\nabla y_0 - \frac{1}{2} \nabla^2 y_0 - \frac{1}{3} \nabla^3 y_0 - \dots]$

5. In Newton - Cote's quadratic formula if $n = 3$ we get _____ rule.
 (a) Trapezoidal (b) Weddley's
 (c) Simpson's one third (d) **Simpson's three eighth**
6. Newton's forward interpolations formula is used only for _____ intervals.
 (a) **equal** (b) unequal (c) closed (d) open
7. The number of consecutive values of a function needed for applying Weddley's rule is _____.
 (a) 4 (b) 5 (c) **6** (d) 7
8. In Newton-Cote's quadrature formula if $n = 2$ we get _____ rule.
 (a) Trapezoidal (b) Weddley's
 (c) **Simpson's one third** (d) Simpson's three eighth
9. In Newton - Cote's quadrature formula if $n = 1$ we get _____ rule.
 (a) **Trapezoidal** (b) Weddley's
 (c) Simpson's one third (d) Simpson's three eighth.
10. In Newton-Cote's quadrature formula if $n = 6$ we get _____ rule.
 (a) Trapezoidal (b) **Weddley's**
 (c) Simpson's one third (d) Simpson's three eighth
11. $\int_{x_0}^{x_n} f(x)dx = \frac{h}{2} \left[\text{Sum of the first and last ordinates} + 2(\text{Sum of the intermedite ordinate}) \right]$
 This is known as _____ rule.
 (a) **Trapezoidal** (b) Weddley's
 (c) Simpson's one third (d) Simpson's three eighth
12. The error in the Trapezoidal rule is of order _____.
 (a) h (b) $\frac{h}{2}$ (c) **h^2** (d) h^3 .
13. The error in the Simpson's one third rule is of order _____.
 (a) h (b) h^3 (c) h^2 (d) **h^4** .
14. In Simpson's one third rule $\int_{x_0}^{x_n} f(x) =$ _____.
 (a) $\frac{h}{3} [(y_0 + y_n) + 2(y_2 + y_4 + \dots) + 4(y_1 + y_3 + \dots)]$
 (b) $\frac{h}{2} [(y_0 + y_n) + 2(y_2 + y_6 + \dots) + 4(y_1 + y_3 + \dots)]$
 (c) $\frac{h}{6} [(y_0 + y_n) + 2(y_2 + y_4 + \dots) + 4(y_1 + y_3 + \dots)]$
 (d) $\frac{h}{4} [(y_0 + y_n) + 2(y_2 + y_4 + \dots) + 4(y_1 + y_3 + \dots)]$

UNIT III

1. By Runge-Kutta method of second order _____ is the approximate value of y (0.1) if $y' = -y$ and $y(0) = 1$.

- (a) 0.095 (b) 0.0095
(c) **0.905** (d) 0.950.

2. _____ is Picard's first approximation y_1 .

- (a) $y_0 + \int_{x_0}^x f(x, y_0) dx$ (b) $y_1 + \int_{x_0}^x f(x, y_1) dx$
(c) $y_0 + \int_{x_0}^x f(x, y_2) dx$ (d) $y_0 + \int_{x_0}^x f(x, y_2) dx$

3. Picard's second approximation y_2 is _____.

- (a) $y_0 + \int_{x_0}^x f(x, y_0) dx$ (b) $y_1 + \int_{x_0}^x f(x, y_1) dx$
(c) $y_0 + \int_{x_0}^x f(x, y_1) dx$ (d) $y_0 + \int_{x_0}^x f(x, y_2) dx$.

4. Picard's n^{th} approximation y_n is _____.

- (a) $y_0 + \int_{x_0}^x f(x, y_0) dx$ (b) $y_1 + \int_{x_0}^x f(x, y_1) dx$
(c) $y_0 + \int_{x_0}^x f(x, y_2) dx$ (d) $y_0 + \int_{x_0}^x f(x, y_{n-1}) dx$

5. _____ is the Runge-kutta formula for second order.

- (a) $y_1 = y_0 + \frac{1}{2}(k_1 + k_2)$ (b) $y_1 = y_2 + \frac{1}{2}(k_1 + k_2)$
(c) $y_2 = y_0 + \frac{1}{2}(k_1 + k_2)$ (d) $y_2 = y_1 + \frac{1}{2}(k_1 + k_2)$.

6. The third order Runge-kutta formula is.....

- (a) $y_1 = y_0 + \frac{1}{2}(k_1 + 4k_2 + k_3)$ (b) $y_1 = y_0 + \frac{1}{6}(k_1 + 4k_2 + k_3)$
(c) $y_2 = y_0 + \frac{1}{6}(k_1 + k_2 + k_3)$ (d) $y_2 = y_1 + \frac{1}{2}(k_1 + 4k_2 + k_3)$.

7. In Runge-Kutta method to find y_{n+1} we need information only at the point _____.

- (a) y_{n-1} (b) y_{n-2} (c) y_{n+2} (d) y_n .

UNIT IV

Objective Type Questions:

1. Index of an array in MATLAB start with-----.

- a. **1** b. 0 c. depends on the class of an array d. 0,1

2. What is the return type of angle function in MATLAB?

- a. degree b. **radians** c. both a & b d. depends on the argument

3. ----- command is used to clear the command window.

- a. clear b. cls c. **clc** d. clr

4. ----- allows the user to view and edit the contents of the variables stored in the MATLAB workspace.

Variable Editor

5. ----- command is used to display MATLAB search path.

- a. addpath **b. path** c. set path d. search path

6. Whenever MATLAB is invoked ----- is activated.

- a. Command Window** b. Current Directory c. Workspace
d. Command History Window

7. Which of the following command, list the current variable in MATLAB?

- a. who** b. pwd c. Typed. dir

8. -----command open the help window.

- a. helpdesk b. helptopic c. hwindow d. helpwin

9. -----files cannot be read by the user directly.

- a. MAT** b. M c. MEX d. .mdl

10. MAT files are ----- files.

- a. script b. function c. binary data d. document

11. What is the replacement for the 'whos' function?

- a. workshop window** b. command window c. current folder
d. remembering all the variables used.

12. A----- data type is used for storing dissimilar kinds of data.

- a. cell array** b. sparse c. char d. struct

13. Which function is preferable to find the magnitude of a complex number?

- a. abs()** b. cart2pol()
c. sqrt() d. MATLAB does not support complex number.

14. Which is an escape sequence constant?

- a. esc **b. '\b'** c. /n d. /b

15. All MATLAB computation are done in -----.

- a. single precision **b. double precision** c. linear accuracy
d. multi -level precision

16. ----- symbol is used to initialize (assign) a variable.

- a. =** b. == c. int d. →

17. Choose the correct option.

- a. any() shows all the elements in a matrix
b. all() is true if every element in a vector is non zero.

c. any() is true if elements in a vector is zero

d. all() is true if every element in a vector is non zero.

18. What is the output of the following code?

```
A = [ 1 2 3 .. ];
```

a. The output is suppressed **b. Error** c. A row vector d. column vector

19. What is the output of the following code?

```
A = [ 1 2 'a'; ...  
      'f' 'q' 'w' ...  
      ]];
```

a. Syntax error

b. A 2*3-character matrix

c. cannot be determined

d. A 3 *3-character vector

20. If a step is not specified, ----- is take as default value of the step size.

a. +1

b. -1

c. 2

d. 0

21. What is the nature of the arrangement of the coefficients to store the following expression in MATLAB?

$$y = 4x^5 - 3x^3 + 6$$

a. y=[4,0,-3,0,0,6] b. y=[4 -3 6] c. y=[4 0 -3 6] d. y=[4 -3 0 0 6]

22. What happens if we don't assign a variable to an expression which evaluates a numerical value?

a. Nothing happens

b. MATLAB shows error

c. The evaluated values are assigned to a variable ans automatically

d. Depends on the numerical value

23. What will be the output for the below block of code?

```
>>P=[1 3 2];
```

```
>> r=roots(P)
```

a. r=[-2,-2]

b. r=[-2 -1]

c. There is an error in the code

d. r = -2

-1

24. MATLAB can interpret a vector of length n+1 as an ----- order polynomial.

a. nth

b. (n+1)th

c. (n-1)th

d. (n+2)th

25. Name the functions used, for multiplication and division of two polynomials in MATLAB.

a. conv() and deconv()

b. mult() and div()

c. conv() and div()

d. mult and div

26. The -----function is used to compute the derivative of a polynomial.

- a. polyderv() **b. polyder()** c. polyd() d. polyint()
27. In MATLAB, a polynomial is represented by a -----.
- a. **row vector** b. column vector c. scalar d. matrix
28. Evaluate the value of the polynomial given below at $s = -3$. $Y = 2s^2 + 3s + 4$
- a. 17 b. 12 **c. 13** d. 9
29. Which command is used to display the value of variable x?
- a. disp x b. vardisp('x') **c. disp(x)** d. display(x)
30. The ----- argument directs MATLAB to save the user input as a string.
- a. 'str' b. 'char' c. s **d. 's'**
31. The ----- command is used to check the intermediate results in the program.
- a. input() b. scanf() **c. keyboard** d. Keyboard
32. What are the functions to see the graph of a continuous and a discrete function?
- a) plot() & stem()** b) cont() & disc() c) plot() & disc() d) cont() & stem()
33. Find the error in the following code.
- ```
x = -10:1:10;
y = -10:2:10;
plot(x , y)
```
- (a) Plot is not available in MATLAB      (b) Syntax of plot is wrong
- (c) Length of x and y should be same**      (d) No error
34. What is the output in the following code?
- ```
x=-10:1:10; y=-10:1:10; axis('off'); plot(x,y)
```
- (a) Error
- (b) A graph will be shown without axes
- (c) A graph will be shown with axes**
- (d) 2 graphs will be shown- one with axes and with no axes
35. To bring the scale of each axis to logarithmically spaced, the student entered 'semilogx()'. What really happened?
- (a) The plot will appear with both axis now logarithmically spaced
- (b) semilogx() is an invalid function
- (c) The plot will appear with x axis logarithmically spaced**
- (d) Error
36. What kind of a plot is this?

(a) **Polar plot** (b) Cartesian plot (c) Complex plot (d) Not a MATLAB plotting

37. To place a text on the plot using a mouse, the command used is _____

(a) **gtext()** (b) text() (c) title() (d) atext()

38. A student has to plot a graph of $f(x)=t$ and $g(y)=t$ in the same graph, with t as a parameter. The function he uses is _____

(a) **plot3(x,y,t)** (b) plot(x,y,t) (c) disp (d) stem(x,y).

Fill in the Blanks:

39. pwd stands for ----- . **Present working directory**

40. ----- command provides more detailed information than the ----- command.

lookfor

help

41. Two dimensional version of the arrays are called ----- . **matrices**

42. A matrix having one element only is called ----- . **Scalar**

43. ----- is the basic data element in MATLAB. **Matrix**

44. ----- generates a linearly spaced vector of length. **Linespace**

45. Arithmetic operations on arrays are done on ----- . **element-by-element**

46. ----- command is used to convert cell array to structure array. **cell2struct**

47. The polynomial $6X^2 + 2X + 10$ that has its elements X as square matrix can be evaluated by using ----- command. **polyvalm(a, X)**

48. When a particular menu option is selected ----- value will return to the program. **scalar**

49. Which function is used to write a matrix to an ASCII – delimited file?

a. dlmwrite() or dlmwrite('filename',data)

50. ----- files are not readable by text editor. **Binary**

51. A command ----- can be used to produce a pictorial window which consists of different options for selection. **menu**

52. Default variable name in MATLAB is ----- . **ans**

True/ False:

53. MATLAB is a powerful computing language. **True** / False
54. By default MATLAB accepts and returns angles in radians. **True** / False
55. MATLAB does not supports complex arguments for any trigonometric function.
True / **False**
56. MATLAB does not differentiate between integer and real constants during execution. **True** / False
57. Spaces are allowed between digits in integer constants. True / **False**
58. In MATLAB, negative and non-integer step sizes are not allowed. True/**False**
59. If no entry is found, find() function returns an empty array. **True**/False
60. Matrix elements can also be accessed by means of a single element index A(i).
True/False
61. Deletion of a single element is allowed in MATLAB. True/**False**
62. The dimension of two polynomials should not be same for addition and subtraction. True / **False**
63. MATLAB does not permit multiple assignments in one line. True / **False**
64. The default exponential order for %e and %E is same. **True** / False
65. The disp() command print anything but inputs given within string arguments.
True / **False**
66. **load()** function is used only if data file contains numeric data. **True** / False
67. **format** command is used to change the default format in MATLAB.**True** / False

Match the following:

- | | | |
|--------------------------|---|------------|
| 68. polynomial | - | row vector |
| 69. polynomial division | - | deconv() |
| 70. reading numeric text | - | dlmread() |
| 71. to read binary data | - | fread() |
| 72. angle histogram | - | rose() |
| | - | conv() |
| | - | textread() |
| | - | mesh() |

UNIT V

1. In Matlab, -----keyword immediately moves to the next iteration of the loop.
- a. update b. goto c. **continue** d. break

2. To add a comment to the mfile, the MATLAB command is -----.
 a. % b. ; c. // d. comment
3. The clc command is used to
 a. **clear the command window** b. rease everyting in the mfile
 c. clear the desktop d. save the existing file
4. Which of the following is a switch-case structure?
 a. **logical structure** b. conditional structure
 c. hierarchical structure d. multidimensional structure
5. The continue statement cannot be used with -----.
 a. for b. while c. do-while **d. switch**
6. Which of the following is an invalid if-else statement?
 a. if (a) { } **b. if-else (if(a==1)) { }** c. if ((char) a){ } d. f (func1 (a)){ }
7. The type of the controlling expression of a switch statement cannot be of the type-----
 a. int b. char c. exp **d. float**
8. Which of the following will correctly define x, y and z as symbols?
 a. Sym(x,y,z) **b. syms x y z** c. syms x, y, z d. sym x, y,z
9. MATLAB is a high level language having -----as datatypes.
 a. vector **b. arrays or matrices** c. integers d. character
10. Which menu includes option for moving 'forward' or 'backward' in the program text?
 a. Editor menu b. Tools menu **c. Navigate menu** d. Window menu
11. Which of the following includes important help statements connected with function subprogram ?
 a. Help Text **b. H1 Line** c. Function Definition Line d. Comments
12. How should the variable be declared in every function ?
 a. Local **b. Global** c . Static d. VAR
13. Which uses '@' and 'str2func' function ?
 a. Inline function **b. Function Handle** c. Private d. Subfunction
14. Some variables are required to retain their value between calls to the function. It is possible in MATLAB by declaring them as _____.
 a. **Persistent variable** b. Global variable c. Non-existent variable d. None of these
15. The breakpoint will not be set if there are any _____ in the program.
 a. Warning **b. Syntax error** c. Logical error d. NaN(Not a Number)
16. _____ subfolders are not included in the search path.

- a. Nested b. inline c. protected **d. private**
17. _____ contains items that are found in normal text editor.
a. Edit menu b. Text menu c. file menu d. main menu
18. _____ clear break point
a. dbclear b. dbclear all c. dbstop d. dpstep
19. Program files in matlab are called _____
a. M-files b. .mat file c. profile d. M-lint
20. To find the derivative of a constant, the constant has to be defined as a ----- expression.
a. symbolic b. simplify c. algebraic d. analytical.

Fill in the Blanks:

21. _____ are program segments that are written for implementing a sub-task or a module or a sub-module. **Function Subprogram**
22. Comment lines begin with a _____ symbol. **percent sign (%)**
23. The _____ menu contains items to open, save and print files. **File**
24. The _____ menu contains item Evaluate Selection, which is used to evaluate an expression and display the answer in the command Window. **Text**
25. The _____ contains option called M-lint. **Tools Menu**
26. _____ displays inconsistencies and suspicious constructs in program files. **M-lint**
27. The _____ menu allows the user to dock or undock the editor window and organize the desktop to the satisfaction of the user. **Desktop**
28. The _____ menu that allows the user to seek help about various features of the editor/debugger. **Help**
29. which bar contains icons for the complete set of debugging tools? **Toolbar**
30. MATLAB program file are named with extension _____ **.m**
31. _____ are the simplest of M-files that basically do not accept input arguments or return output arguments. **Script Files**
32. The _____ command displays H1 line. **lookfor**
33. _____ is the workspace in which the function M-file variables take separate memory space fr MATLAB base workspace. **Function Workspace**
34. _____ is the primary function which contains two subfunctions pcent and divs. **result**
35. _____ function can contain several nested function within itself.

Primary Function.

True/ False:

- 36. The variables that are passed to the function need to have the same name as those of function input arguments in the function definition line - **False**
- 37. Comment lines can appear anywhere in the M-file - **True**
- 38. If a non-existent variable is declared as persistent, it will be initialized as an empty matrix - **True**
- 39. Additional functions defined within the same file are called subfunctions-**True**
- 40. Private functions are invisible outside the parent folder-**True**
- 41. Run-time errors are caused by grammatical mistake in the statement included in the program-**False**
- 42. Semicolons prevent MATLAB from displaying the result of the statement executed in the program-**True**
- 43. The breakpoint will be set if there are any syntax error in the program-**False**
- 44. lasterr function can be used to display the last warning message-**False**
- 45. Script files treat the internal variables as local to that function and have their own workspace-**False**
- 46. The continue statement exits the current iteration in nested loops.**True/False**
- 47. If the arrowhead is not filled, the line is connected to anything. True/ **False**.

Match the Following:

- | | | |
|---------------------|---|----------------------|
| 48. dbstop | — | Set breakpoint |
| 49. dbstatus | — | List all breakpoints |
| 50. dbquit | — | Quit debugging |
| 51. Text menu | - | Code Folding |
| 52. Function Handle | - | str2func |
| 53. H1 Line | - | lookfor |
| 54. Comment Line | - | M-file |
| 55. First Function | - | Primary Function |
| 56. cell menu | - | sections |
| 57. tools menu | - | M-limit |
| 58. debug menu | - | to run the program |
| 59. input arguments | - | parentheses |

- 60. output arguments - square brackets
- 61. @ - anonymous function
- 62. dbquit - quit debug mode
- 63. dbstop - set breakpoint
- 64. eval - evaluate a function
- 65. dbcont - continue execution.

SECTION-B (2 MARKS)

UNIT- I

- Evaluate $\Delta 3^x$ by taking the interval of differencing as 1.
- Construct the difference table for the following data.

X	0	1	2	3	4
Y	8	11	9	15	6

- Find the sixth term of the sequence 2, 6, 12, 20, 30,
- Evaluate $(\Delta - \nabla) x^2$ taking the interval of difference as h.
- Show that $\mu\delta = \frac{\Delta}{2} + \frac{\Delta E^{-1}}{2}$.
- Prove that $\frac{1}{2}\delta^2 + \delta\sqrt{1 + \frac{\delta^2}{4}} = \Delta$.
- Find $f(0.2)$ by a suitable formula for a function $y = f(x)$ given by the following table.

x	0	1	2	3	4	5	6
$y = f(x)$	176	185	194	203	212	220	229

- Prove that $\Delta \log f(x) = \log 1 + \frac{\Delta f(x)}{f(x)}$.
- Evaluate the following taking the interval of differencing as 1.
 - $\Delta\left(\frac{2^x}{x!}\right)$
 - $\Delta(x + \cos x)$.
- Evaluate $\Delta^{10}[(1-x)(1-2x^2)(1-3x^3)(1-4x^4)]$.
- Prove that $\Delta + \nabla = \frac{\Delta}{\nabla} - \frac{\nabla}{\Delta}$.
- Estimate the missing term

X	10	15	20	25	30	35
Y	43	-	29	32	-	77

13. State Newton's forward and Backward Interpolation formula.

14. Define Interpolation and Extrapolation.

UNIT-II

1. Evaluate $\int_0^5 \frac{dx}{4x+5}$ by Trapezoidal rule using 11 coordinates.

2. Calculate $\int_{0.5}^{0.7} e^{-x}\sqrt{x} dx$ taking 5 ordinates by Simpson's 1/3 rule.

3. Evaluate $\int_0^1 \frac{dx}{x+1}$ using Weddley's rule.

4. Which method is a least accurate method and write the formula for that method.

5. From the following table find the minimum value of $f(x)$.

x	0	1	2	3	4	5
f(x)	58	43	40	45	52	60

6. Find an approximate value of $u'(0)$ where $u(x)$ from the following table.

x	0	1	2	3	4	5
u(x)	43	40	38	42	45	50

7. Define Weddley's rule.

8. The velocity v of a particle at distance s from a point on its path is given by the table below.

s in metres	0	10	20	30	40	50	60
v in m/sec	47	58	64	65	61	52	38

Estimate the time taken to travel 60 metres by using Simpon's one third rule.

9. Using Trapezoidal rule evaluate $\int_{0.6}^2 f(x)dx$ from the following tables

x	0.6	0.8	1.0	1.2	1.4	1.6	1.8	2.0
$f(x)$	1.23	1.58	2.03	4.32	6.25	8.36	10.23	12.45

10. Evaluate $\int_{1.0}^{1.3} \sqrt{x}dx$ taking $h = 0.05$ by Trapezoidal rule.

11. Using Trapezoidal rule evaluate $\int_0^{\frac{\pi}{2}} \tan x dx$ taking 8 intervals.

12. Evaluate $\int_4^{6.2} \log x dx$ taking $h = 0.2$ by Trapezoidal rule.

13. Apply Simpson's rule to find the value of $\int_0^2 \frac{dx}{1+x^3}$ dividing the interval $[0,2]$ into 4 equal parts.

14. Evaluate $\int_0^5 \frac{dx}{4x+5}$ by using Trapezoidal rule with 11 coordinates.
15. Evaluate $\int_0^{\frac{\pi}{2}} \sin x \, dx$ by Simpson's $\frac{1}{3}$ rule dividing the range into six equal parts.
16. Using Weddley,s rule find $\int_1^7 y dx$ for the function tabulated below:

x	1	2	3	4	5	6	7
y	3.95	4.07	4.18	4.30	4.42	4.54	4.67

UNIT-III

1. Write the formula for a single step method.
2. Using Taylor's method, find $y(0.1)$ correct to 3 decimal places from $\frac{dy}{dx} + 2xy = 1, y_0 = 0$.
3. Find an approximate solution of the initial value problem $y' = 1 + y^2, y(0) = 0$ by Picard's method and compare with the exact solution.
4. Using Taylor's method, find $y(0.1)$ correct to 3 decimal places from $\frac{dy}{dx} + 2xy = 1, y_0 = 0$.
5. Solve $y' = x - y^2, y(0) = 1$ at the point 0.1 upto four decimal places by Taylor's series method.
6. Find $y(0.1)$ and $y(0.2)$ given $y' = x + xy^2, y(0) = 1$ by Taylor's series method.
7. Find the value of $y(0.1)$ by Picard's method given $\frac{dy}{dx} = \frac{y-x}{y+x}, y(0)=1$.
8. Find the second approximation for $y' = x + y^2 + 1, y(0)=1$ by Picard's method.
9. Given $y' = x^2 - y, y(0)=1$ find $y(0.1)$ using Runge-Kutta method of fourth order.

UNIT IV

1. Define MATLAB
2. List out some of the common tool boxes present in MATLAB.
3. List out few built-in-functions for matrix operations.
4. What does MATLAB consist of?
5. Define set path.
6. What is workspace.
7. Difference between 'help' and 'lookfor' command.
8. What is M-files?

9. Write the difference between 'who' and 'whos' command.
10. What is Simulink.
11. Define character set.
12. Write the features of MATLAB.
13. Why we use sparse data type in MATLAB?
14. What is character constant?
15. Write syntax for a built-in function.
16. List out the operators in MATLAB.
17. Define row vector.
18. Define column vector
19. What is structure?
20. Define cell arrays.
21. How can you create a multidimensional array?
22. Define polynomial.
23. How to evaluate polynomial?
24. How to obtain characteristic polynomial of a matrix?
25. How to evaluate polynomials with matrix arguments?
26. Define polynomial curve fitting.
27. Define keyboard command. Write its uses.
28. Write the difference between 'textscan' and 'textread' functions.
29. List out the formatted input/output functions.
30. Write the difference between 'fgetl' and 'fgets' functions.
31. What is 'pause' command?
32. What is the use of 'gtext()' function?
33. Define meshgrid.
34. List out the logarithmic plot functions and write its syntax.

UNIT V

1. What are the types of m-files?
2. What is Function- definition line?
3. What is code folding?
4. Eradicate about help text.
5. Write the rules for naming the function
6. How are function handles created and give examples.

7. What is meant by persistent variable?
8. What are the 2 types of error and how are they caused?
9. Write the rules for naming the function.
10. Write a note on break points.
11. What is called 'solving the model'?
12. Define ODE.
13. What is symbolic mathematics?
14. Write the difference between conditional and unconditional looping.
15. Write a MATLAB program to obtain the sum of all even numbers from 0 to 20 , using for loop statement.
16. What 'break' statement does?
17. Write the use of 'continue' statement.
18. Program to illustrate use of while loop for finding square of numbers less than 5.
19. Define branches.
20. Write a program to evaluate $y = 2x + 1$, if $x < 5$ otherwise $y = 2x$. Use if-else-end statement.

SECTION-C (5 MARKS)

UNIT-I

1. Form the difference table for the function $y = x^3 + x^2 - 2x + 1$ for $x = -1, 0, 1, 2, 3, 4$.
2. Prove that $\Delta \left[\frac{1}{f(x)} \right] = \frac{-\Delta f(x)}{f(x)f(x+1)}$.
3. If $y = \frac{1}{x(x+3)(x+6)}$ then find $\Delta^2 y$.
4. Express $y = 2x^3 - 3x^2 + 3x - 10$ in terms of factorial polynomial and find $\Delta^3 y$.
5. If $y = \frac{1}{(3x+1)(3x+4)(3x+7)}$ show that $\nabla^2 y = \frac{108}{(3x+1)(3x+4)(3x-7)(3x+10)(3x+13)}$.
6. Evaluate $\frac{\Delta^2 x^2}{E(x+\log x)}$.
7. The following data gives the melting point of alloy of zinc and lead, θ is the temperature and x is the percentage of lead. Using Newton's interpolation formula find θ when $x = 48$.

x	40	50	60	70	80	90
θ	184	204	226	250	276	304

8. From the table given below find $\sin 52$ by using Newton's formula interpolation formula.

x	45	50	55	60
$\sin x$	0.7071	0.7660	0.8192	0.8660

9. Evaluate $\Delta^{10}[(1-x)(1-2x^2)(1-3x^3)(1-4x^4)]$.

10. Given the following data. Find $\log_{10} 656$ by Lagrange's method.

X	654	658	659	661
$\log_{10} x$	2.8156	2.8182	2.8189	2.8202

11. Estimate the missing term

X	10	15	20	25	30	35
Y	43	-	29	32	-	77

12. Find the missing figures from the following table.

X	0	5	10	15	20	25
u(x)	7	11	?	18	?	32

UNIT-II

1. Find the maximum and minimum value of y from the following table.

x	0	1	2	3	4	5
y	0	1/4	0	9/4	16	225/4

2. From the following data obtain the first and second derivatives of $y = \log_e x$

(i) at $x = 500$ (ii) at $x = 520$.

x	500	510	520	530	540	550
y	6.2146	6.2344	6.2538	6.2729	6.2916	6.3099

3. Find $y'(x)$ for the given data

x	0	1	2	3	4
y(x)	1	1	15	40	85

Hence find $y'(x)$ at $x = 0.5$.

4. The population in millions, of a certain town is shown in the following table. Find the rate of growth of the population in 1961.

Year x	1931	1941	1951	1961	1971
Population y	40.62	60.80	79.95	103.56	132.65

5. A rod is rotating in a plane. The following table gives the angle θ (radians) through which the rod has turned for various values of time t (seconds).

t	0	0.2	0.4	0.6	0.8	0.10
θ	0	0.12	0.49	1.12	2.02	3.20

6. Find the gradient of the rod at the middle point of the elevation above a datum line of seven points of a rod which are given below.

x	0	300	600	900	1200	1500	1800
y	135	149	157	183	201	205	193

7. From the following table find the minimum value of $f(x)$.

x	0	1	2	3	4	5
f(x)	58	43	40	45	52	60

8. From the following table find the minimum value of $f(x)$.

x	0	2	4	6
f(x)	3	3	11	27

9. Find $f'(50)$ and $f''(50)$ from the following table

x	50	51	52	53	54
f(x)	3.68	3.70	3.73	3.75	3.77

10. Find the value of $\log 2^{\frac{1}{3}}$ from $\int_0^1 \frac{x^2 dx}{1+x^3}$ using Simpson's $\frac{1}{3}$ rule with $h = 0.25$.

11. Evaluate $\int_0^1 \frac{dx}{1+x^2}$ by using (i) Trapezoidal rule (ii) Simpson's one third rule.

12. A curve is drawn to pass through the points given by the following table.

x	1.0	1.5	2.0	2.5	3.0	3.5	4.0
y	2	2.4	2.7	2.8	3	2.6	2.1

Using Simpson's rule find (i) the area bounded by the curve, the axis and the lines $x = 1$, $x = 4$.

(ii) the volume of revolution of the area about the x-axis.

13. Evaluate $\int_0^{\frac{\pi}{2}} \sqrt{\sin \theta} d\theta$ using Simpson's rule taking six equal intervals.

14. Evaluate $\int_0^1 e^{-x^2} dx$ dividing the range into 4 equal parts by (i) Simpson's $\frac{1}{3}$ rule.

(ii) Trapezoidal rule

15. Evaluate $\int_0^1 \frac{dx}{1+x}$ using Weddley's rule.

16. Compute the value of $\log_e 2$ using Simpson's rule from the formula $\log_e 2 = \int_1^2 \frac{dx}{x}$.

Take 4 intervals in (1,2). Compare the result with the result obtained by applying Trapezoidal rule.

17. The velocity v of a particle at distance s from a point on its path is given by the table below.

s in metre	0	10	20	30	40	50	60
v metre per sec	47	58	64	65	61	52	38

Estimate the time to travel 60 metres by using Simpson's $\frac{3}{8}$ rule.

18. Evaluate $\int_{-3}^3 x^4 dx$ by taking seven equidistance ordinates. Compare it with the exact value.

UNIT-III

1. Using Taylor's method solve $\frac{dy}{dx} = 1 + xy$ with $y_0 = 2$. Find (i) $y(0.1)$ (ii) $y(0.2)$.

2. Using Taylor's method find y at $x = 1.1$ and 1.2 by solving $\frac{dy}{dx} = x^2 + y^2$, $y(1) = 2.3$.

3. Solve $\frac{dy}{dx} = 1 + xy$ using Picard's method with $y(0) = 2$. Find $y(0.1)$, $y(0.2)$ and $y(0.3)$.

4. Find the successive approximate solution of the differential equation $y' = y$, $y(0) = 1$ by Picard's method and compare it with the exact solution.

5. Find an approximate solution of the initial value problem $y' = 1 + y^2$, $y(0) = 0$ by Picard's method and compare with the exact solution.

6. Using Runge-Kutta method of fourth order find $y(0.1)$, $y(0.2)$ and $y(0.3)$, given that

$$\frac{dy}{dx} = 1 + xy, y(0) = 2.$$

7. Using Runge-Kutta method of fourth order find $y(0.1)$, given that $\frac{dy}{dx} = \frac{1}{x+y}$, $y(0) = 1$.

8. Given $y' = x^2 - y$, $y(0) = 1$ find $y(0.1)$ using Runge-Kutta method of fourth order.

UNIT IV

1. What is the difference between a script file and a data file? What are the other types of files in MATLAB?

2. What is meant by Current Directory? How can the Current Directory be changed?

3. The values of a, b, c and d are 190.5×10^2 , 14.6×10^3 , 0.00056 and 456.28 respectively. Write a program to evaluate the following statements.

$$f1 = \frac{ab}{cd} + a * b$$

$$f2 = \frac{a}{bc} - \frac{d}{a}$$

4. Explain about operators.
5. Write the MATLAB statements to calculate the sum of the series.

$$s = 1 - \frac{x^2}{2!} + \frac{x^4}{4!} - \frac{x^6}{6!} + \frac{x^8}{8!} \quad \text{for } x = 1.5$$

6. Define Structure. How to build structure arrays? Explain.
7. Describe with examples: Matrix Manipulations.

8. Given matrix $a = \begin{bmatrix} 2 & -4 & 6 & -8 \\ 1 & 3 & 5 & 7 \\ 2 & 12 & 30 & 56 \end{bmatrix}$

Write MATLAB statements to obtain:

- i. All the elements of all rows but first column
 - ii. All the elements of first row but all columns
 - iii. Element in the second row and third column.
9. How to get the data from the files? Explain.
 10. Write a program to illustrate how a menu can be created using MATLAB?
 11. Write a program to generate first five odd number and illustrate the use of **fopen**, **fprintf** and **fclose** commands related to file input/output.
 12. Illustrate the use of axis command with specified limits for plot of function $y = 3x^2 + 2x + 5$ for $x = -5$ to 10.

UNIT V

1. Write a program to find the number integers that are greater than 50 but lesser than 250 that are divisible by 11. Also find the sum of these numbers.
2. Write a program using while loop to reverse the digits of a number having minimum three digits.
3. Explain about looping structures.
4. Illustrate about function workspace.
5. Write a function subprogram to calculate the sum of the following series.

$$S = 1 + r + r^2 + \dots + r^n$$
6. Describe the Inline functions.
7. Write short notes about Editor Main Menu.
8. Write a function that will generate and print the first n Fibonacci numbers.

9. How to create function handles?
10. What is code folding? Write the procedure for code folding and illustrate its usefulness.

Section D (10 MARKS)

UNIT I

1. Form the difference table for the function $y = x^3 + x + 1$ at $x = 0, 1, 2, 3, 4$ and find

(i) Δy_3 (ii) $\Delta^2 y_2$ (iii) $\Delta^3 y_1$ (iv) $\Delta^4 y_0$.

2. Given the following data. Find $\log_{10} 656$ by Lagrange's method.

X	654	658	659	661
$\log_{10} x$	2.8156	2.8182	2.8189	2.8202

3. Evaluate the following taking the interval of differencing as 1.

(ii) $\Delta\left(\frac{2^x}{x!}\right)$ (ii) $\Delta(x + \cos x)$.

4. Estimate the missing term

X	10	15	20	25	30	35
Y	43	-	29	32	-	77

5. The following data gives the melting point of alloy of zinc and lead, θ is the temperature | and x is the percentage of lead. Using Newton's interpolation formula find θ when $x = 48$.

x	40	50	60	70	80	90
θ	184	204	226	250	276	304

6. From the table given below find $\sin 52$ by using Newton's formula interpolation formula.

x	45	50	55	60
$\sin x$	0.7071	0.7660	0.8192	0.8660

UNIT II

1. The population in millions of a certain town is given in the table. Find the rate of growth of the population in 1961.

Year x	1931	1941	1951	1961	1971
Population y	40.62	60.80	79.95	103.56	132.65

2. Find $\frac{dy}{dx}$ and $\frac{d^2y}{dx^2}$ at $x = 51$ from the following data.

x	50	60	70	80	90
y	19.96	36.65	58.81	77.21	94.61

3. Find y'_0 from the following table

x	0	1	2	3	4
y	768	913	1039	1143	1225

4. Given that

x	1.0	1.1	1.2	1.3	1.4	1.5	1.6
y	7.989	8.403	8.781	9.129	9.451	9.750	10.031

Find $\frac{dy}{dx}$ and $\frac{d^2y}{dx^2}$ at $x = 1.1$.

5. Find $y'(0)$ and $y''(0)$ from the following table

x	0	1	2	3	4	5
y	4	8	15	7	6	2

6. Evaluate $\int_0^1 \frac{dx}{1+x}$ using (i) Trapezoidal rule (ii) Simpson's 1/3 rule (iii) Simpson's three eighth rule (iv) Find the error in each method by comparing with the actual integration upto 4 places of decimals. Take $h = 1/6$ for all cases.

UNIT III

- If $y' = x^2 - y$, $y(0) = 1$ find $y(0.1)$ using Runge – Kutta method of fourth order.
- Solve the following initial value problem using Runge – Kutta method of second order $y' = (1 + x^2)y$, $y(0) = 1$, $x = 0(0.2)0.6$.
- Find the values of y at $x = 0.1$ using Runge-Kutta method of (i) second order (ii) third order (iii) fourth order for the differential equation $y' + y = 0$ given that $y(0) = 1$.
- Using Taylor's method solve $\frac{dy}{dx} = 1 + xy$ with $y_0 = 2$. Find (i) $y(0.1)$ (ii) $y(0.2)$.
- Using Taylor's method find y at $x=1.1$ and 1.2 by solving $\frac{dy}{dx} = x^2 + y^2$, $y(1) = 2.3$.
- Using Picard's method solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 2$. Find $y(0.1)$, $y(0.2)$ and $y(0.3)$.
- Find the successive approximate solution of the differential equation $y' = y$, $y(0) = 1$. by Picard's method and compare it with the exact solution.
- Find an approximate solution of the initial value problem $y' = 1 + y^2$, $y(0) = 0$ by Picard's method and compare with the exact solution.

9. Using Runge -Kutta method of fourth order find $y(0.1)$, $y(0.2)$ and $y(0.3)$, given that

$$\frac{dy}{dx} = 1 + xy, y(0) = 2.$$

UNIT IV

1. Explain about MATLAB environment.
2. Write in detail about Constants and Variables.
3. What are the user interactive functions available in MATLAB? Explain with examples.
4. Write a MATLAB program to copy the data from one file to another file?
5. Illustrate Low – Level Input / Output functions.
6. Discuss in detail about Scalars and Vectors.

UNIT V

1. Explain with examples about branching control structures.
2. Define function. Explain its parts.
3. What are different types of functions. Give an example of each.
4. How to handle Errors and Warnings in MATLAB? Explain the types of errors.
5. Write the different features of debugger.
6. Illustrate the different calculus operations using symbolic mathematics.
7. Write a program to sort an array in ascending order using bubble sort.
8. How to create masked sub-systems?

III B.Sc. Mathematics
Core VIII - Linear Algebra Sub. Code: 21UMAC51

- Let V be a vector space over a field F where $a \in F$ and $v \in V$ then $av = 0$ implies.....
 - $a \neq 0$ or $v \neq 0$
 - $a = 0$ or $v = 0$
 - $a = 0$ and $v = 0$
 - $a \neq 0$ and $v \neq 0$
- The sum of two vectors is a
 - Vector**
 - Scalar
 - Field
 - empty set
- If $S = \{(1,0,0), (2,0,0), (3,0,0)\}$ in $V_3(R)$ then $L(S) = \dots\dots\dots$
 - S
 - $\{(x,y,0)/x,y \in R\}$
 - $V_3(R)$
 - $\{(x,0,0)/x \in R\}$**
- If $S = \{1\}$, then $L(S) = \dots\dots\dots$
 - S
 - C
 - R**
 - Q
- In a vector space, the set of all scalars is a
 - group
 - ring
 - field**
 - abelian group
- If $S = \{(1,0), (0,1)\}$ in $V_2(R)$ then $L(S) = \dots\dots\dots$
 - S
 - $\{(x,0) / x \in R\}$
 - $\{(y,0) / y \in R\}$
 - $V_2(R)$**
- If V is a vector space over the field of F and S, T are subspaces of V then which of the following is true?
 - $L(S \cup T) = L(S) \cup L(T)$
 - $L(S \cup T) = L(S) \cdot L(T)$
 - $L(S \cup T) = L(S) + L(T)$**
 - $L(S \cup T) = L(S) + L(T) - L(S \cap T)$
- If S is a subspace of a vector space V over F then
 - $L(S) = S$**
 - $L(S) \subseteq S$
 - $L(S) \supseteq S$
 - $L(S) = V$
- If A, B are subspaces of a vector space V and if $v \in V$ can be expressed as $v = a + b$ where $a \in A$ and $b \in B$ then
 - $V \neq A + B$
 - $V = A + B$**
 - $V = A \oplus B$
 - $A \cap B = \{0\}$
- If A and B are two subspaces of a vector space over a field F then $A \cap B$ is a
 - Subspace**
 - vector space
 - not a subspace
 - Field

Unit II

11. If a Linear Transformation T is $1 - 1$ then T is called
a) **monomorphism**
c) linear functional
b) epimorphism
d) isomorphism
12. If W is a subspace of a vector space V then $\dim\left(\frac{V}{W}\right) = \dots\dots\dots$
a) **$\dim(V) - \dim(W)$**
c) $\dim(W) - \dim(V)$
b) $\dim(V) + \dim(W)$
d) $\dim(V) / \dim(W)$
13. If V is the set of all polynomials of degree $\leq n$ in $R[x]$, then a basis for V is
a) $\{0, x, x^2, \dots, x^n\}$
c) $\{1, x, x^2, \dots, x^{n-1}\}$
b) **$\{1, x, x^2, \dots, x^n\}$**
d) $\{1, x, x^2, \dots, x^{n+1}\}$
14. Which of the following sets are standard basis for $V_3(R)$?
a) $\{(0,2,0), (0,4,0), (2,3,5)\}$
c) **$\{(1, 0, 0), (0, 1, 0), (0, 0, 1)\}$**
b) $\{(1,0,0), (0,4,0), (2,8,0)\}$
d) $\{(1,0,0), (4,0,0), (0,0,4)\}$
15. If A, B are subspaces of V and dimensions of $A, B, A \cap B$ are 4,4,2 respectively $\dim(A+B)$ is
a) 4
c) 2
b) **6**
d) 8
16. The standard basis of $V_2(R)$ is
a) **$\{(1, 0), (0, 1)\}$**
b) $\{(1,2), (2,1)\}$
b) $\{(0,0), (1,1)\}$
d) $\{(1,3), (3,1)\}$
17. A Linear Transformation $T: V \rightarrow W$ defined by $T(v) = \mathbf{0}, \forall v \in V$ then T is.....
a) identity linear transformation
c) non-trivial linear transformation
b) **trivial linear transformation**
d) natural linear transformation.
18.is a basis set for the vector space C over R .
a) $\{1\}$
c) $\{i\}$
b) **$\{1, i\}$**
d) $\{1,0\}$
19. If a linear transformation $T: V \rightarrow W$ is called a epimorphism if
a) T is $1 - 1$
c) T is bijective
b) **T is onto**
d) T is not $1 - 1$
20. $\dim M_2(R)$ is
a) **4**
c) 2
b) 1
d) 3

Unit III

21. If a linear transformation $T: V_3(\mathbf{R}) \rightarrow V_3(\mathbf{R})$ defined by $T(x, y, z) = (x, y, 0)$ then $\text{Ker } T$ is
- a) $\{(\mathbf{0}, \mathbf{0}, \mathbf{z})\} / \mathbf{z} \in \mathbf{R}$ b) $\{(0, y, 0)\} / y \in \mathbf{R}$
c) $\{(x, 0, z)\} / x, z \in \mathbf{R}$ d) $V_3(\mathbf{R})$
22. If a linear transformation $T: V \rightarrow V$ defined by $T(v) = v \ \forall v \in V$ then Kernel T is
- a) \mathbf{V} b) $\{v\}$

- c) $\{0\}$ d) none of these
23. A square matrix A is said to be idempotent if
- a) $A^2 = A$ b) $A^2 = I$
 c) $A^2 = 0$ d) $A^{-1} = A$
24. Ker T is also called of T
- a) subspace b) vector space
 c) **null space** d) nullity
25. The product of two non singular matrices is
- a) singular b) **non singular**
 c) diagonal d) scalar
26. A square matrix A of order n is non-singular if and only if A is
- a) singular b) non singular
 c) **invertible** c) non invertible
27. If a matrix $A^{-1} = A$ then A is.....
- a) **involutory** b) invertible
 c) singular d) non singular
28. A square matrix A is said to be nilpotent if A is
- a) $A^n = I$ c) $A^2 = I$
 b) $A^n = 0$ d) $A^2 = 0$
29. A square matrix A is said to be involutory if A is
- a) $A^n = I$ c) $A^2 = I$
 b) $A^n = 0$ d) $A^2 = 0$
30. A square matrix A is orthogonal if and only if
- a) $A^{-1} = A^T$ b) $A^2 = A^T$
 b) $A^{-1} = A$ d) $A^{-1} = A^2$

Unit IV

31. The characteristic equation of the matrix $A = \begin{bmatrix} 1 & 3 \\ -2 & 1 \end{bmatrix}$ is.....
- a) $x^2 - 2x + 7$ b) $x^2 + 2x + 7$
 c) $-x^2 - 2x + 7$ d) $x^2 - 2x - 7$
32. The sum and product of eigen values of the matrix $A = \begin{bmatrix} 1 & 0 & 0 \\ 0 & 1 & 0 \\ 0 & 0 & 1 \end{bmatrix}$ are -----.
- a) 0,0 b) 3, 3 c) **3,1** d) 1,1
33. The characteristic roots of a Hermitian matrix are.....
- a) **real numbers** b) imaginary numbers
 c) complex numbers d) none of these
34. Which one of the following statements is correct?
- a) Any singular matrix can be expressed as a product of elementary matrices.

- Unit V**
41. If V is an unitary space, then for any $x, y \in V$, $\langle x, \alpha y \rangle = \dots\dots\dots$
- a) $\alpha \langle x, y \rangle$ b) $\bar{\alpha} \langle x, y \rangle$
c) $\alpha \langle y, x \rangle$ d) $\bar{\alpha} \langle y, x \rangle$
42. In an inner product space, $\|x + y\|^2 \dots\dots\dots \|x\|^2 + \|y\|^2$.
- a) \geq b) $=$
c) $<$ d) \leq
43. If S is any subset of an inner product space V , then S^\perp is a subspace of V
- a) Orthogonal of S b) complement of S
c)Orthogonal complement of S d) Orthogonal subset of S
44. If V is an inner product space, $x \in V$ is called a unit vector if $\|x\| = 1$
- a) $\|x\| = 1$ b) $\|x\| = 0$
c) $\|x\| < 1$ d) $\|x\| > 1$
45. The norm of the vector $(1, 2, 3)$ in $V_3(\mathbb{R})$ with standard inner product is $\sqrt{14}$.

- Section - B(Two Marks):**
Unit – I

- ## Unit II

11. Define monomorphism and epimorphism.
12. State Fundamental theorem of homomorphism.
13. Define Kernel of a linear transformation and find the kernel of $T: V \rightarrow W$ defined by $T(v) = 0$ for all $v \in V$.
14. Show that a finite dimensional vector space has a basis consisting of a finite number of vectors.
15. Show that the set $S = \{(1,0,0), (0,1,0), (1,1,1)\}$ is a basis for $V_3(\mathbf{R})$.
16. Show that the set $S = \{(1,0,0), (1,1,0)\}$ is not a basis $V_3(\mathbf{R})$.
17. Define basis and dimension of a vector space V .
18. Define maximal linearly independent set and minimal generating set of a vector space

V.

19. Find the dimension of the subspace spanned by the vectors $\{(1,1,1), (-1, -1, -1)\}$ in $V_3(\mathbf{R})$.
20. Find the dimension of the subspace spanned by the vectors $\{e_1, e_2, e_3\}$ in $V_4(\mathbf{R})$.

Unit III

21. State and prove rank and nullity theorem.
22. If a linear transformation $T: V_3(\mathbf{R}) \rightarrow V_3(\mathbf{R})$ is defined as $T(a, b, c) = \{3a, a - b, 2a + b + c\}$ then find the matrix of T with respect to the standard basis.
23. Find the linear transformation $T: V_3(\mathbf{R}) \rightarrow V_3(\mathbf{R})$ determined by the matrix $\begin{pmatrix} 0 & 2 & 1 \\ 0 & 1 & 1 \\ -1 & 3 & 4 \end{pmatrix}$ with respect to the standard basis.
24. Prove that if A is symmetric matrix if and only if $A = A^T$.
25. Prove that if A and B are symmetric matrices then $A + B$ is symmetric.
26. Prove that if A and B are orthogonal matrices of same order then AB is orthogonal matrix.
27. Prove that the product of any two non-singular matrices is non-singular.
28. Prove that if A is any square matrix then $A - A^T$ is skew symmetric matrix.
29. Prove that if A is any square matrix then \bar{A}^T is Hermitian matrix.
30. Define singular and non- singular matrices.

Unit IV

31. Define equivalent and elementary matrices and give an example for elementary matrix.
32. Define similar matrices and give any two properties of similarity.
33. If A and B are similar matrices then show that their determinants are same.
34. Define rank of a matrix.
35. Check whether the equations given below are consistent.
- $$x + y + z = 6, x + 2y + 3z = 14, x + 4y + 7z = 30$$
36. Define characteristic equation of a matrix.
37. State Cayley Hamilton theorem.
38. Define characteristic roots of a matrix.
39. State any four properties of Eigen values.
40. Find the characteristic roots of the matrix $A = \begin{bmatrix} \cos\theta & -\sin\theta \\ -\sin\theta & -\cos\theta \end{bmatrix}$

Unit V

41. Define inner product space and give an example.
42. Give four properties of an inner product space.
43. Define orthogonal set and orthonormal set in an inner product space.
44. Define orthogonal complement of a subset in an inner product space.
45. Prove that an orthogonal complement of any subset of an inner product space is a subspace.
46. If V is an inner product space and S_1, S_2 are subsets of V, then show that $S_1 \subseteq S_2 \Rightarrow S_2^\perp \subseteq S_1^\perp$.

47. Find a vector of unit length which is orthogonal to $(1,3,4)$ in $V_3(R)$ with standard inner product.
48. What is Gram-Schmidt orthogonalisation process?
49. If V is a finite dimensional inner product space and W is a subspace of V then prove that $W \cap W^\perp = \{0\}$.
50. Show that in an inner product space $\langle \alpha u + \beta v, w \rangle = \alpha \langle u, w \rangle + \beta \langle v, w \rangle$.

Section-C (6 Marks):

Unit– I

1. Show that $V = \{a + b\sqrt{2} + c\sqrt{3} / a, b, c \in \mathbf{Q}\}$ is a vector space over the field \mathbf{Q} under usual operations.
2. Show that $\mathbf{R} \times \mathbf{R}$ is a vector space over \mathbf{R} under addition and scalar multiplication defined by $(x_1, x_2) + (y_1, y_2) = (x_1 + y_1, x_2 + y_2)$ and $\alpha(x_1, x_2) = (\alpha x_1, \alpha x_2)$
3. Prove that (i) $a\mathbf{0} = \mathbf{0}$ for all $a \in F$.
(ii) $0v = \mathbf{0}$ for all $v \in V$.
(iii) $(-a)v = a(-v) = -(av)$ for all $a \in F$ and $v \in V$, where V is a vector space over a field F .
4. Prove that any non-empty subset W of a vector space V is a subspace of V if and only if W is closed with respect to vector addition and scalar multiplication in V .
5. Prove that the intersection of two subspaces of a vector space is a subspace.
6. Prove that if A and B are subspaces of vector space V then $A + B = \{v \in V / v = a + b, a \in A, b \in B\}$ is a subspace of V . Also show that $A+B$ is the smallest subspace containing A and B .
7. Prove that if S is a non-empty subset of a vector space V over a field F then $L(S)$ is a subspace of V .
8. Prove that If V is a vector space and W is a subspace of V then $V/W = \{W + v / v \in V\}$ is a vector space over F under the following operations.
(i) $(W + v_1) + (W + v_2) = (W + v_1 + v_2)$
(ii) $\alpha(W + v_1) = W + \alpha v_1$.
9. Define linearly independent set of a vector space V . Prove that any subset of a linearly independent set is linearly independent.
10. Prove that $S = \{v_1, v_2, \dots, v_n\}$ is a linearly dependent set of vectors in a vector space V if and only if there exists a vector $v_k \in S$ is a linear combination of the preceding vectors v_1, v_2, \dots, v_{k-1} .

Unit II

11. Define basis of a vector space. Give an example of a linearly independent set of $V_3(R)$ which is not a basis.
12. Prove that If V is a finite dimensional vector space over a field F then every linearly independent set of vectors in V is part of a basis.
13. Prove that If V is a finite dimensional vector space over a field F then any two bases of V have the same number of elements.
14. Find a basis for the vector space $V = \left\{ \begin{pmatrix} a & b \\ 0 & d \end{pmatrix} / a, b, d \in \mathbf{R} \right\}$ over a field \mathbf{R} .

15. Prove that If $V = A \oplus B$ then $\dim V = \dim A + \dim B$.
16. Prove that If V is a finite dimensional vector space over a field F and A is a subspace of V then there exists a subspace B of V such that $V = A \oplus B$.
17. Prove that if T is an isomorphism between the vector spaces V and W then T maps a basis of V onto a basis of W .
18. Prove that If V is a vector space of dimension n then
 - i) any set of m vectors where $m > n$ is linearly dependent.
 - ii) any set of m vectors where $m < n$ cannot span V .
19. Prove that any vector space of dimension n over a field F is isomorphic to $V_n(F)$.
20. Prove that If V is a vector space over a field F and A and B be subspaces of V then prove that $\frac{B}{A \cap B} \cong \frac{A+B}{A}$.

Unit III

21. State and prove rank and nullity theorem.
22. Prove that $M_{m \times n}(F)$ is a vector space of dimension mn .
23. If a linear transformation $T: V_3(R) \rightarrow V_3(R)$ is defined as $T(a, b, c) = (3a, a - b, 2a + b + c)$ then find the matrix of T with respect to the standard basis $\{e_1, e_2, e_3\}$.
24. Find the linear transformation $T: V_3(R) \rightarrow V_3(R)$ determined by the matrix $\begin{bmatrix} 0 & 2 & 1 \\ 0 & 1 & 1 \\ -1 & 3 & 4 \end{bmatrix}$ with respect to the basis $\{e_1, e_2, e_3\}$.
25. If A is a $m \times n$ matrix and B is a $n \times p$ matrix then prove that $(AB)^T = B^T A^T$.
26. A square matrix A is symmetric iff $A = A^T$.
27. Prove that any square matrix A can be expressed uniquely as the sum of symmetric matrix and a skew symmetric matrix.
28. A square matrix A of order n is non singular iff A is invertible.
29. Prove that the product of any two non singular matrices is non singular.
30. If A and B are symmetric matrices of order n then prove that
 - i) $A+B$ is symmetric.
 - ii) AB is symmetric iff $AB=BA$
 - iii) $AB + BA$ is symmetric.
 - iv) If A is symmetric then kA is symmetric where $k \in F$.
31. If A and B be skew symmetric matrices of order n then prove that
 - i) $A+B$ is skew symmetric.
 - ii) A^{2n} is a symmetric matrix and A^{2n+1} is a skew symmetric matrix where n is any positive integer.
 - iii) kA is skew symmetric where $k \in F$.
32. If A and B be orthogonal matrices of same order then prove that
 - i) A^T is orthogonal.
 - ii) AB is orthogonal.
33. If A be any square matrix then prove that

- i) $A + \bar{A}^T$ is Hermitian.
- ii) $A - \bar{A}^T$ is skew Hermitian.

34. Prove that a square matrix A of order n is non singular iff A is invertible.

35. Find the inverse of the matrix $A = \begin{bmatrix} 2 & -1 & 1 \\ -15 & 6 & -5 \\ 5 & -2 & 2 \end{bmatrix}$.

36. Show that the matrix $A = \begin{bmatrix} 2 & -3 & 1 \\ 3 & 1 & 3 \\ -5 & 2 & -4 \end{bmatrix}$ satisfies $A(A - I)(A + 2I) = 0$.

Unit IV

37. Prove that similarity of matrices is an equivalence relation.

38. Prove that the non singular matrix A can be expressed as a product of elementary matrices.

39. Reduce the matrix $A = \begin{bmatrix} 1 & 2 & -1 \\ 1 & 1 & 2 \\ 2 & 4 & -2 \end{bmatrix}$ to the canonical form.

40. Prove every elementary matrix is non-singular.

41. Find the characteristic equation of the matrix $A = \begin{bmatrix} 8 & -6 & 2 \\ -6 & 7 & -4 \\ 2 & -4 & 3 \end{bmatrix}$

42. Verify Cayley Hamilton theorem for the matrix $A = \begin{bmatrix} 1 & 2 \\ 4 & 3 \end{bmatrix}$

43. If A is a square matrix then prove that

- i) The sum of the eigen values of A is equal to the sum of the diagonal elements of A .
- ii) The product of eigen values of A is $|A|$.

44. Prove that the characteristic roots of a skew Hermitian matrix are either purely imaginary or zero.

45. Prove that the characteristic roots of a unitary matrix are all the unit modulus.

46. If P and A are $m \times n$ matrices and P is a non singular matrix then prove that A and $P^{-1}AP$ have the same eigen values.

47. If λ is the characteristic root of A then prove that $f(\lambda)$ is the characteristic root of the matrix $f(A)$ where $f(x)$ is any polynomial in x .

Unit V

48. Prove that $V_n(\mathbb{R})$ is a real inner product space.

49. Prove that $V_n(\mathbb{C})$ is a complex inner product space.

50. State and prove Schwartz's inequality

51. State and prove Triangle inequality.

52. If $S = \{v_1, v_2, \dots, v_n\}$ is an orthogonal set of non zero vectors in an inner product space V then prove that S is linearly independent.

53. If $S = \{v_1, v_2, \dots, v_n\}$ is an orthogonal set of non zero vectors in an inner product space V and $v \in V$ such that $v = \alpha_1 v_1 + \alpha_2 v_2 + \dots + \alpha_n v_n$ then prove that

$$\alpha_k = \frac{\langle v, v_k \rangle}{\|v_k\|^2}.$$

54. Find an orthogonal basis containing the vector $(1, 3, 4)$ for $V_3(\mathbb{R})$ with standard inner product.
55. If V is a finite dimensional inner product space and W is a subspace of V then prove that $(W^\perp)^\perp = W$.

Section D (10 marks)

Unit-I

- (i) Prove that the intersection of two subspaces of a vector space is a subspace

(ii) Prove that A and B are subspaces of a vector space V then $A \cap B = \{0\}$ if and only if every vector $v \in A + B$ can be uniquely expressed in the form $v = a + b$, $a \in A, b \in B$.
- (i) Prove that the union of two subspaces of a vector space is a subspace if and only if one is contained in the other.

(ii) Prove that the union of two subspaces of a vector space need not be a subspace.
- Prove that a non-empty subset W of V is a subspace of V if and only if $u, v \in W$ and $\alpha, \beta \in F \Rightarrow \alpha u + \beta v \in W$, where V is a vector space over a field F .
- Prove that if S is a non-empty subset of a vector space V over a field F then
 - Define $L(S)$
 - $L(S)$ is a subspace of V
 - $S \subseteq L(S)$
 - $L(S)$ is the smallest subspace of V containing S
- Prove that if S and T are subsets of a vector space V over a field F then
 - $S \subseteq T \Rightarrow L(S) \subseteq L(T)$
 - $L(S \cup T) = L(S) + L(T)$
 - $L(S) = S$ iff S is a subspace of V .
 - $L(L(S)) = L(S)$
- (i) Define linearly independent and linearly dependent set and give an example.

(ii) Prove that any subset of a linearly independent set is linearly independent.

(iii) Prove that any set containing a linearly dependent set is also linearly dependent.
- (i) Prove that $S = \{v_1, v_2, \dots, v_n\}$ is a linearly dependent set of vectors in a vector

Space V if and only if there exists a vector $v_k \in S$ is a linear combination of the preceding vectors v_1, v_2, \dots, v_{k-1} .

(ii) Prove that if A and B are subspaces of vector space V then

$A + B = \{v \in V / v = a + b, a \in A, b \in B\}$ is a subspace of V . Also show that $A+B$ is the smallest subspace containing A and B .

Unit II

- State and prove fundamental theorem of homomorphism.
- (i) Define kernel of T and isomorphism

(ii) Prove that if A and B are subspaces of a vector space V then $\frac{A+B}{A} \cong \frac{B}{A \cap B}$.
- (i) Define basis of the vector space

(ii) Show that $S = \{(1,0,0), (1,1,0)\}$ is not a basis for $V_3(\mathbb{R})$.

(iii) Prove that $S = \{v_1, v_2, \dots, v_n\}$ is a basis for vector space V if and only if every element of V can be uniquely expressed as a linear combination of elements of S .
- Prove that any two basis of a finite dimensional vector space V have the same number of elements.

12. Prove that if $S = \{v_1, v_2, \dots, v_n\}$ is a subset of a vector space V then the following are equivalent.
- (i) S is a basis for V .
 - (ii) S is a maximal linearly independent set
 - (iii) S is a minimal generating set.
13. (i) Prove that any vector space of dimension n over a field F is isomorphic to $V_n(F)$.
(ii) Prove that any two finite dimensional vector spaces over a field F are isomorphic if and only if they have the same dimension.
14. Prove that if V is a finite dimensional vector space over a field F and W is a subspace of V . Then (i) $\dim W \leq \dim V$ (ii) $\dim \frac{V}{W} = \dim V - \dim W$.
15. Prove that if V is a finite dimensional vector space over a field F and A and B are subspaces of V then $\dim (A + B) = \dim A + \dim B - \dim (A \cap B)$.
16. (i) Prove that if T is an isomorphism between the vector spaces V and W then T maps a basis of V onto a basis of W .
(ii) Prove that If V is a vector space of dimension n then
- a) any set of m vectors where $m > n$ is linearly dependent.
 - b) any set of m vectors where $m < n$ cannot span V .

Unit III

17. Prove that $L(V, W)$ is isomorphic to $M_{m \times n}(F)$.
18. If A is any square matrix of order n then prove that $(\text{adj } A) A = A (\text{adj } A) = |A| I$ where I is the identity matrix of order n .
19. If A and B be square matrices of same order then prove the following.
- i) If A, B are Hermitian then $A+B$ is Hermitian.
 - ii) If A, B are skew Hermitian then $A+B$ is skew Hermitian.
 - iii) If A is Hermitian then iA is skew Hermitian.
 - iv) If A is skew Hermitian then iA is Hermitian.
 - v) If A is Hermitian and k is real then kA is Hermitian
 - vi) If A is skew Hermitian and k is real then kA is skew Hermitian.
20. Prove that any square matrix A can be expressed uniquely as the sum of symmetric matrix and a skew symmetric matrix.
21. Prove that a square matrix A is orthogonal iff $A^{-1} = A^T$ and A is involutory iff $A = A^{-1}$.
22. Prove that the linear transformation $T: V \rightarrow W$ is non singular iff the associated matrix is non singular where V and W are vector spaces of dimension n over a field F .
23. If A be an $m \times n$ matrix and B be an $n \times p$ matrix and C be an $p \times q$ matrix then prove that $A(BC) = (AB)C$.

Unit IV

24. Find the rank of the matrix $A = \begin{bmatrix} 4 & 2 & 1 & 3 \\ 6 & 3 & 4 & 7 \\ 2 & 1 & 0 & 7 \end{bmatrix}$

25. Prove that the system of linear equations $AX = B$ is consistent iff $\text{rank of } A = \text{rank of } (A, B)$.

26. Use Cayley Hamilton theorem to compute the inverse of the matrix $\begin{bmatrix} 7 & 2 & -2 \\ -6 & -1 & 2 \\ 6 & 2 & -1 \end{bmatrix}$

27. State and prove Cayley Hamilton theorem.
28. Show that the equations $x + y + z = 6$, $x + 2y + 3z = 14$, $x + 4y + 7z = 30$ are consistent and solve them.
29. Prove that the eigen vectors corresponding to distinct eigen values of a matrix are linearly independent.
32. Prove that the characteristic roots of a Hermitian matrix are all real.
33. Find the eigen values and eigen vectors of the matrix $A = \begin{bmatrix} 1 & 1 & 3 \\ 1 & 5 & 1 \\ 3 & 1 & 1 \end{bmatrix}$.
34. The product of two eigen values of the matrix $A = \begin{bmatrix} 2 & 2 & -7 \\ 2 & 1 & 2 \\ 0 & 1 & -3 \end{bmatrix}$ is -12. Find the eigen values of A.

Unit V

35. State and prove all the four properties of an inner product space.
36. Prove that every finite dimensional inner product space has an orthonormal basis.
37. Apply Gram- Schmidt process to construct an orthonormal basis for $V_3(\mathbb{R})$ with the standard inner product for the basis $\{v_1, v_2, v_3\}$ where $v_1 = (1,0,1)$, $v_2 = (1,3,1)$, $v_3 = (3,2,1)$.
38. If V is the set of all polynomials of degree ≤ 2 together with the zero polynomial and V is a real inner product space with inner product defined by $\langle f, g \rangle = \int_{-1}^1 f(x)g(x)$. Starting with the basis $\{1, x, x^2\}$. Obtain an orthonormal basis for V .
39. If V is a finite dimensional inner product space and W is a subspace of V then prove that V is the direct sum of W and W^\perp .
40. If V is a finite dimensional inner product space and W is a subspace of V then prove that $\dim V = \dim W + \dim W^\perp$.
41. If W_1 and W_2 be subspaces of a finite dimensional inner product space then prove that
- $(W_1 + W_2)^\perp = (W_1)^\perp \cap (W_2)^\perp$
 - $(W_1 \cap W_2)^\perp = (W_1)^\perp + (W_2)^\perp$

Graph Theory

Sub. Code: 21UMAC52

Section-A (One Mark)

Unit I

1. The maximum number of lines in a complete bipartite graph $K_{7,6}$ is
(a) 7 (b) 13 (c) 42 **(d) 78**
2. If G_1 is a cycle graph C_5 and G_2 is a path graph P_3 , then the total number of lines in $G_1 + G_2$ is
(a) 15 (b) 7 (c) 20 **(d) 22**
3. The total number of lines in a 4- regular graph with 12 vertices is.....
(a) 96 **(b) 48** (c) 24 (d) 44
4. If G is a cubic graph with 10 vertices then maximum degree of G is
(a) 3 (b) 5 (c) 7 (d) 10
5. If G is a self-complementary graph then the possible number of points in G is
(a) 4 (b) 6 (c) 7 (d) 10
6. The degree of an end point of a graph G is
(a) 1 (b) 0 (c) 2 (d) 3
7. For a graph with 4 points, the independence number is 2. Then its covering number is
(a) 6 **(b) 2** (c) 1 (d) 5
8. The degree of an isolated point of a graph G is
(a) 1 **(b) 0** (c) 2 (d) 3
9. The covering number of a complete graph K_{10} is
(a) 1 (b) 2 (c) 9 (d) 10
10. For a graph with $p=4$, the independence number is 2. Then its covering number is
(a) 6 **(b) 2** (c) 1 (d) 5

Unit II

11. The unique realization of $P = (2,1,1)$ is

- (a) $K_{2,3}$ (b) $K_{4,5}$ (c) $K_{0,1}$ (d) $K_{1,2}$
12. The minimum degree of a connected graph of p vertices is
 (a) 0 (b) **1** (c) p (d) $p-2$
13. Any $u-v$ walk contains a..... in a Graph G .
 (a) trail (b) cycle (c) block (d) **$u-v$ path**
14. A $v_0 - v_n$ walk of a graph G is called closed if
 (a) $v_0 > v_n$ (b) $v_0 < v_n$ (c) **$v_0 = v_n$** (d) all the above
15. A $v_0 - v_n$ walk is called a if all its lines are distinct in a graph G .
 (a) Path (b) **trail** (c) cycle (d) block
16. A graph G with nine points is bipartite if and only if all its cycles are of length
 (a) **$2n$** (b) $3n$ (c) $2n + 1$ (d) $3n + 1$
17. A graph G is connected if and only if it has
 (a) cut point (b) two components
 (c) block (d) one component
18. Every line of a graph G lies in exactly blocks of G .
 (a) **One** (b) two (c) three (d) four.
19. The line connectivity of a disconnected graph is
 (a) **0** (b) 1 (c) 2 (d) 3
20. The connectivity of a connected graph with a cut point is
 (a) 0 (b) **1** (c) 2 (d) 3

Unit III

21. If a graph G is Eulerian then every point of G has degree.
 (a) **even** (b) odd (c) n (d) $2n + 1$
22. Peterson graph is.....
 (a) eulerian (b) hamiltonian
 (c) **not eulerian** (d) both eulerian and hamiltonian
23. Which of the following graph is both eulerian and Hamiltonian?
 (a) **K_3** (b) $K_{2,3}$ (c) P_3 (d) P_5
24. A graph G is hamiltonian if and only if its closure is.....
 (a) complete (b) well defined (c) **hamiltonian** (d) eulerian
25. A graph G without cycles is called a.....
 (a) **acyclic graph** (b) forest (c) both a and b (d) tree

26. Every line of a tree T is a
 (a) cutpoint (b) bridge (c) cycle (d) eulerian
27. The total number of edges of a tree T with 10 vertices is.....
 (a) 10 (b) 11 (c) **9** (d) 5
28. The set of all central points is called the of a graph.
 (a) eccentricity (b) radius (c) **centre** (d) bipartite graph
29. Every tree T is a graph.
 (a) Cycle (b) complete (c) bipartite (d) complete bipartite
30. The complete bipartite graph $K_{m,n}$ is nonhamiltonian if
 (a) **$m < n$** (b) $m > n$ (c) $m = n$ (d) $m + n = 5$

Unit IV

31. Which of the following is non planar
 (a) K_4 (b) $K_5 - e$ (c) **K_5** (d) K_3
32. A graph is polyhedral iff it is planar and.....
 (a) 2 -connected (b) **3-connected** (c) 1-connected (d) disconnected
33. Let G be a maximal planar (p, q) graph then $q =$
 (a) $p - 2$ (b) $2p - 6$ (c) **$3p - 6$** (d) $p - 4$
34. The graphs and..... are called Kuratowski's graphs
 (a) K_2, K_3 (b) $K_{2,3}, K_{3,3}$ (c) $K_4, K_{3,3}$ (d) **$K_5, K_{3,3}$**
35. Petersen graph is contractible to
 (a) K_3 (b) **K_5** (c) K_4 (d) K_6
36. The thickness of a planar graph is
 (a) **1** (b) 2 (c) 3 (d) 4
37. The thickness of a Kuratowski's graphs is
 (a) 1 (b) **2** (c) 3 (d) 4
38. The crossing number of a planar graph is
 (a) 1 (b) 2 (c) **0** (d) 3
39. The crossing number of a Kuratowski's graphs is
 (a) **1** (b) 2 (c) 0 (d) 3
40. Genus of a planar graph is
 (a) 1 (b) 2 (c) **0** (d) 3
41. Genus of a graph $K_{3,3}$ is
 (a) **1** (b) 2 (c) 0 (d) 3

Unit V

42. Chromatic number of a complete graph with p vertices is
(a) $p - 1$ (b) $p + 1$ **(c) p** (d) $p - 2$
43. Chromatic number of a graph $K_{m,n}$ is
(a) 1 **(b) 2** (c) 3 (d) 4
44. Chromatic number of a tree with atleast two points is.....
(a) 3 (b) 4 **(c) 2** (d) 1
45. Chromatic number of a cycle C_{2n} is
(a) 2 (b) 1 (c) 4 (d) 3
46. Chromatic number of a cycle C_{2n+1} is
(a) 2 (b) 1 (c) 4 **(d) 3**
47. $K_n - x$ is uniquely colourable.
(a) n **(b) $n - 1$** (c) $n - 2$ (d) $n - 3$
48. Any connected bipartite graph is uniquely colourable.
(a) 2 (b) 1 (c) 4 (d) 3
49. A graph G is called n - edge colourable if.....
(a) $\chi'(G) \geq n$ (b) $\chi(G) \geq n$ **(c) $\chi'(G) \leq n$** (d) $\chi'(G) \geq n$
50. Edge chromatic number of a cycle C_3 is
(a) 2 (b) 1 (c) 4 **(d) 3**
51. $f(\overline{K}_2, \lambda) = \dots\dots\dots$
(a) λ^3 (b) λ (c) λ^2 (d) λ^4

Section B (Two marks)

Unit I

1. Define vertices and edges of a graph.
2. Draw Petersen graph.
3. Define Multigraph and Multiple lines. Give an example.
4. Define Pseudo graph with an example.
5. Define Complete graph. Give an example.
6. What is a Null graph?
7. Define Complete bipartite graph. Give an example.
8. Define Isolated point and End point.
9. Prove that the sum of the degrees of the points of a graph is twice the number

of lines.

10. Prove that for any graph G the number of odd degree is even.
11. Define Regular graph. Give an example.
12. Define Cubic graph. Give an example.
13. Define Subgraph and Spanning Subgraph. Give an example.
14. Define Induced Subgraph with an example.
15. Define Self complementary graph.
16. Define Covering number and Independence number of a Graph.
17. Define Line covering number and Edge independence number.
18. Define Intersection graph.
19. Prove that isomorphism preserves the degree of vertices of a graph G .
20. Prove that set of all automorphisms of a Graph G is equal to the set of all automorphisms of complement of G .

Unit II

21. Define graphical partition of a graph G .
22. Show that the partition $P = (6,6,5,4,3,3,1)$ is not graphical.
23. Define Trail and path with example.
24. Define connected and disconnected graphs.
25. Define Cut point and bridge of a graph.
26. What is a Block?
27. Define vertex connectivity and Line connectivity of a graph.
28. Prove that there is no 3-connected graph with 7 edges.
29. Prove that if G is not connected graph then complement of G is connected graph.
30. Prove that if G is a k – connected graph then $q \geq \frac{pk}{2}$

Unit III

31. Define Eulerian graph. Give an example.
32. Define Hamiltonian graph with an example.
33. Define Theta graph.
34. Prove that every Hamiltonian graph is 2-connected.
35. Define Closure of a graph G .
36. Prove that a graph is Hamiltonian iff its closure is Hamiltonian.
37. Prove that every non-trivial tree G has at least two vertices of degree 1.
38. Prove that every connected graph has a spanning tree.

39. Prove that if G is connected graph with $p = q + 1$ then G is acyclic graph.

40. Define Centre of a graph G .

Unit IV

41. Define planar and plane graph. Give an example for plane graph.

42. If G is a plane (p, q) graph with r faces and k components then prove that
$$p - q + r = k + 1.$$

43. Prove that the graphs K_5 and $K_{3,3}$ are not planar.

44. Define triangulated graph .Give an example.

45. Define homeomorphic graphs.

46. Define elementary contraction of a graph G .

47. Define geometric dual of a graph G .

48. Define thickness and crossing number of a graph G .

49. Define maximal outerplanar.

50. Define genus of a graph G .

Unit V

51. Define colouring and colour class of a graph G .

52. Define chromatic number of a graph G .

53. Define n -colourable.

54. Define chromatic partitioning of a graph G .

55. Define k - critical.

56. If G is k – critical, then prove that $\delta(G) \geq k - 1$.

57. Prove that for any graph G , $\chi \leq \Delta + 1$

58. Define uniquely colourable. Give an example.

59. Define edge chromatic number of a graph G .

60. Define elementary homomorphism of a graph G .

Section C (Six marks)

Unit I

1. Prove that any self-complementary graph has $4n$ or $4n+1$ point.
2. Prove that every graph is an intersection graph.
3. Prove that any graph G with the number of points of odd degree is even.
4. Prove that every cubic graph has an even number of points.

5. Prove that the total number of vertices of a graph G is equal to the sum of covering number and independence number of G .
6. (i) Define isomorphism of Graph. Give an example.
(ii) Prove that isomorphism preserves the degree of vertices.
7. (i) Define self-complementary graph with an example.
(ii) Prove that automorphism group of a graph G is equal to automorphism group of complement of graph G .

Unit II

8. Prove that any $u - v$ walk contains a $u - v$ path in a graph G .
9. Prove that any closed walk of odd length contains a cycle in a graph G .
10. Prove that a graph G with p points and minimum degree is greater than or equal to $\frac{p-1}{2}$ then G is connected.
11. Prove that a line x of a connected graph G is a bridge if and only if x is not on any cycle of G .
12. Prove that every non-trivial connected graph has at least two points which are not cutpoints.
13. Prove that any graph G , $\kappa \leq \lambda \leq \delta$.
14. (i) Show that the partition $P = \{7,6,5,4,3,2\}$ is not graphic
(ii) Show that the partition $P = \{6,6,5,4,3,3,1\}$ is not graphic.

Unit III

15. If G is eulerian graph, then prove that every point of G has even degree.
16. Explain Fleury's algorithm.
17. State and prove Dirac's theorem.
18. Prove that $c(G)$ is well defined.
19. Define centre of a graph G . Prove that every tree has a centre consisting of either one point or two adjacent points.

Unit IV

20. Prove that K_5 non-planar.
21. Prove that a graph can be embedded in the surface of a sphere iff it can be embedded in a plane.
22. Every polyhedron has at least two faces with the same number of edges on the boundary.

23. Prove that in any connected plane (p, q) graph ($p \geq 3$) with r faces $q \geq \frac{3r}{2}$ and $q \leq 3p - 6$.

24. Prove that the graphs K_5 and $K_{3,3}$ are not planar.

Unit V

25. Prove that G is 2-colourable iff G is bipartite.

26. Prove that every k -chromatic graph has at least k vertices of degree at least $k - 1$.

27. Prove that every uniquely n -colourable graph is $(n - 1)$ -connected.

28. If G is a tree with n points $n \geq 2$, then prove that $f(G, \lambda) = \lambda(\lambda - 1)^{n-1}$.

29. Prove that the coefficients of $f(G, \lambda)$ alternate in sign.

30. Prove that $\lambda^4 - 3\lambda^3 + 3\lambda^2$ cannot be the chromatic polynomial of any graph.

Section D (Ten Marks)

Unit I

1. Prove that the maximum number of lines among all p point graphs with

no triangles is $\left\lfloor \frac{p^2}{4} \right\rfloor$.

2. (i) Prove that automorphism group of a graph G is equal to automorphism group of complement of graph G .

(ii) Prove that any self-complementary graph has $4n$ or $4n+1$ point.

3. (i) Define isomorphism of Graph with an example and Prove that isomorphism preserves the degree of vertices.

(ii) Prove that the total number of vertices of a graph G is equal to the sum of covering number and independence number of G .

4. Prove that if G_1 is a (p_1, q_1) graph and G_2 is a (p_2, q_2) graph then

(a) $G_1 \cup G_2$ is a $(p_1 + p_2, q_1 + q_2)$ graph.

(b) $G_1 + G_2$ is a $(p_1 + p_2, q_1 + q_2 + p_1 p_2)$ graph.

(c) $G_1 \times G_2$ is a $(p_1 p_2, q_1 p_2 + q_2 p_1)$ graph.

(d) $G_1[G_2]$ is a $(p_1 p_2, p_1 q_2 + p_2^2 q_1)$ graph.

Unit II

5. Prove that a partition $P = (d_1, d_2, \dots, d_p)$ of an even number into p parts with

$p - 1 \geq d_1 \geq d_2 \geq \dots \geq d_p$ is graphical if and only if the modified partition

$P' = (d_2 - 1, d_3 - 1, \dots, d_{d_1+1} - 1, d_{d_1+2}, \dots, d_p)$ is graphical.

6. Prove that a graph G with at least two points is bipartite if and only if all its cycles are of even length.
7. Prove that if G is a connected graph with at least three points then the below statements
 - (a) Graph G is a block
 - (b) Any two points of a graph G lie on a common cycle.
 - (c) Any point and any line of a graph G lie on a common cycle.
 are equivalent.
8. (i) Prove that a line x of a connected graph G is a bridge if and only if x is not on any cycle of G .
 (ii) Prove that every non-trivial connected graph has at least two points which are not cutpoints.
9. (i) Prove that a graph G with p points and minimum degree is greater than or equal to $\frac{p-1}{2}$ then G is connected.
 (ii) Define connectivity and line connectivity of a graph G and Prove that any graph G , $\kappa \leq \lambda \leq \delta$.

Unit III

10. State and prove Chavatal theorem.
11. Prove that the following statements are equivalent for a connected graph G .
 - (i) G is eulerian.
 - (ii) Every point of G has even degree.
 - (iii) The set of edges of G can be partitioned into cycles.
12. Let G be a (p, q) graph. Then prove that the following statements are equivalent
 - (i) G is a tree
 - (ii) Every two points of G are joined by a unique path.
 - (iii) G is connected and $p = q + 1$.
 - (iv) G is acyclic and $p = q + 1$

Unit IV

13. Prove that a graph can be embedded in the surface of a sphere iff it can be embedded in a plane.
14. If G is (p, q) plane graph in which every face is an n cycle then prove that $q = \frac{n(p-2)}{n-2}$. Prove the necessary theorem.

Unit V

15. Prove that every planar graph is 5 –colourable.
16. Prove that $\chi'(K_n) = \begin{cases} n & \text{if } n \text{ is odd, } n \neq 1 \\ n - 1 & \text{if } n \text{ is even} \end{cases}$
17. Prove that (i) For any graph G , $f(G, \lambda)$ is a polynomial in λ .
(ii) $f(G, \lambda)$ has degree $|V(G)|$
(iii) The constant term in $f(G, \lambda)$ is 0.

Section-A (1 Mark)

UNIT 1

1. Which one of the following function is called Dirichlet's function?
(a) $f: J \rightarrow \mathbb{R}$ by $f(x) = x$ (b) $f: J \rightarrow \mathbb{R}$ by $f(x) = c$
(c) $f: \mathbb{R} \rightarrow \mathbb{R}$ by $f(x) = \begin{cases} 1 & \text{if } x \in \mathbb{Q} \\ 0 & \text{otherwise} \end{cases}$ (d) $f: \mathbb{R} \rightarrow \mathbb{R}$ by $f(x) = \begin{cases} 0, & \text{if } x < 0 \\ 1, & \text{if } x \geq 0 \end{cases}$
2. "Let $f: [a, b] \rightarrow \mathbb{R}$ be a continuous on $[a, b]$. If $f(a) < 0 < f(b)$ or if $f(a) > 0 > f(b)$, then there exists $c \in (a, b)$ such that $f(c) = 0$. This is called _____.
(a) **Location of Roots theorem** (b) Weierstrass theorem
(c) Extreme value theorem (d) Fixed point theorem.
3. What does it mean for a function to be continuous at a point?
(a) It has a limit at that point. (b) Its value at that point is zero.
(c) **For any $\varepsilon > 0$, there exists $\delta > 0$ such that if $|x - c| < \delta$, then $|f(x) - f(c)| < \varepsilon$.**
(d) It is defined at that point.
4. What is the Sequential Criterion for Continuity?
(a) A function is continuous if and only if its limit exists.
(b) **A function is continuous if and only if for every sequence converging to c, the sequence of its values also converges to f(c).**
(c) A function is continuous if and only if the sequence of its values is bounded.
(d) A function is continuous if and only if the sequence of its values converges.
5. When a function is considered continuous on a set?
(a) If it is defined on the entire set. (b) If it is bounded on the set.
(c) **If it is continuous at every point in the set.** (d) If it has a limit on the set.
6. A function $f: \mathbb{R} \rightarrow \mathbb{R}$ is said to be additive if _____ for all x, y in \mathbb{R} .
(a) $f(x + y) = f(x)f(y)$ (b) **$f(x + y) = f(x) + f(y)$**
(c) $f(xy) = f(x) + f(y)$ (d) $f(xy) = f(x)f(y)$.

7. A function $f: A \rightarrow \mathbb{R}$, where A is a subset of real numbers. The function is said to be bounded on A if _____.
- (a) **There exists a constant $M > 0$ such that $|f(x)| \leq M$ for all x in A .**
 - (b) There exists a point x_M in A such that $|f(x_M)| > M$ for all $M > 0$.
 - (c) The function takes on both positive and negative values on A .
 - (d) The function is continuous on A .
8. Let A be a subset of real numbers, and consider a function $f: A \rightarrow \mathbb{R}$. The function f is said to have an absolute maximum on A if _____.
- (a) There exists a point $x_0 \in A$ such that $f(x_0) \geq f(x)$ for all $x \in A$.
 - (b) There exists a point $x_0 \in A$ such that $f(x_0) > f(x)$ for all $x \in A$.
 - (c) There is no point in A where $f(x)$ attains the value $\inf\{f(x) : x \in A\}$.
 - (d) f is continuous on A .
9. Consider the continuity of different functions. Which of the following is not true?
- (a) A polynomial function is continuous on the entire real line.
 - (b) A rational function is continuous at every real number for which it is defined.
 - (c) The sine function $\sin(x)$ is continuous on the entire real line.
 - (d) **The cosine function $\cos(x)$ is discontinuous on the entire real line.**
10. The function $h: A \rightarrow \mathbb{R}$, where $A = \{x \in \mathbb{R} : x > 0\}$. For irrational $x > 0$, $h(x) = 0$, and for rational $x = m/n$ in A , $h(x) = 1/n$. Additionally, $h(0) = 1$. Then which statement is correct?
- (a) **h is continuous at every irrational number and discontinuous at every rational number in A .**
 - (b) h is continuous at every rational number and discontinuous at every irrational number in A .
 - (c) h is continuous at every point in A .
 - (d) h is continuous at every irrational number and continuous at every rational number in A .

UNIT 2

11. Every uniformly continuous function is _____
- (a) continuous except at 0
 - (b) not continuous
 - (c) compact
 - (d) **continuous.**
12. A function $f: A \rightarrow \mathbb{R}$ is Lipschitz on A if there exists $L > 0$ such that _____ for all $x, y \in A$.
- (a) **$|f(x) - f(y)| < L|x - y|$**
 - (b) $|f(x) - f(y)| \geq L|x - y|$
 - (c) $|f(x) - f(y)| > L|x - y|$
 - (d) $|f(x) - f(y)| \leq L|x - y|$.

13. Let $f: (0,1) \rightarrow \mathbb{R}$ be a function such that $f(x) = \frac{1}{x} \forall x \in (0,1)$. Then $f(x) = \frac{1}{x}$ is ____ on $(0, 1)$.
- (a) **uniformly continuous on $(0,1)$** (b) uniformly continuous for $x > 0$
 (c) continuous on \mathbb{R} (d) continuous for $x > 0$.
14. For what values of x is the function $f(x) = 1/x$ continuous?
- (a) Continuous for all real numbers (b) **Continuous for $x \neq 0$**
 (c) Continuous for $x \neq 1$ (d) Continuous for $x > 0$.
15. Which of the following is true for the composition of continuous functions $f(x)$ and $g(x)$?
- (a) **It is always continuous**
 (b) It is continuous if f and g are constant functions
 (c) It is discontinuous at some points
 (d) It is continuous only if f and g are linear functions.
16. The function $h(x) = \sin(x)$ on the real line is continuous for _____.
- (a) **all $x \in \mathbb{R}$** (b) only continuous at integer values of x
 (c) only continuous at rational values of x (d) only continuous at zero.
17. If $f(x)$ is continuous on the entire real line, which of the following is also continuous on the entire real line?
- (a) **$|f(x)|$** (b) $1/f(x)$ (c) $(f(x))^2$ (d) $(1/f(x))^2$.
18. Which trigonometric function is continuous on the entire real line?
- (a) $\tan(x)$ (b) **$\cos(x)$** (c) $\cot(x)$ (d) $\operatorname{cosec}(x)$.
19. Which of the following is true about the continuity of the function $f(x) = \sin(1/x)$?
- (a) $f(x)$ is continuous for all x (b) **$f(x)$ is continuous for $x \neq 0$**
 (c) $f(x)$ is continuous for $x \neq \pi$ (d) $f(x)$ is continuous for all rational values of x .
20. If $f(x) = 1/x$, for what values of x is $f(x)$ continuous?
- (a) **$f(x)$ is continuous for $x \neq 0$** (b) $f(x)$ is continuous for $x \neq 1$
 (c) $f(x)$ is continuous for $x < 0$ (d) $f(x)$ is continuous for $x = 0$.
21. Let I be a _____ interval and let $f: I \rightarrow \mathbb{R}$ be continuous on I . Then f is uniformly continuous on V .
- (a) closed (b) open (c) bounded (d) **closed and bounded.**

UNIT 3

22. Let $f: J \rightarrow \mathbb{R}$ be strictly increasing then _____.
- a) **for all $x, y \in J$ with $x < y$, $f(x) < f(y)$**
 b) for all $x, y \in J$ with $x > y$, $f(x) < f(y)$
 c) for all $x, y \in J$ with $x > y$, $f(x) > f(y)$
 d) for all $x, y \in J$ with $x < y$, $f(x) > f(y)$.
23. If δ is a gauge defined on the interval $[a, b]$, then there exists a _____ of $[a, b]$.
- (a) tag (b) **δ -fine partition** (c) monotone function (d) end point.

24. Let $I \subseteq \mathbb{R}$ be an interval and let $f: I \rightarrow \mathbb{R}$ be increasing on I . Suppose that $c \in I$ is not an end point of I . Then $\lim_{x \rightarrow c^-} f =$ _____.
- (a) **$\sup \{f(x)/x \in I, x < c\}$** (b) $\sup \{f(x)/x \in I, x > c\}$
 (c) $\inf \{f(x)/x \in I, x > c\}$ (d) $\inf \{f(x)/x \in I, x < c\}$.
25. Let $I \subseteq \mathbb{R}$ be an interval and let $f: I \rightarrow \mathbb{R}$ be a function defined by $f(x) = 0 \forall x \in [0,1]$ and $f(x) = 1 \forall x \in (1,2]$. Then f is _____ on $[0,2]$ and at $x = 1$.
- (a) **increasing, not continuous** (b) increasing, continuous
 (c) decreasing, not continuous (d) decreasing, continuous.
26. Which of the following is called a gauge?
- (a) A non-overlapping closed interval
 (b) **A strictly positive function defined on an interval**
 (c) A tagged partition of an interval
 (d) A collection of partition points.
27. In the context of a d -fine partition P , what can be inferred about a point x in the interval $I = [a, b]$?
- (a) There exists a tag t_i such that $|x - t_i| \geq d(t_i)$ for some t_i in P .
 (b) **There exists a tag t_i such that $|x - t_i| < d(t_i)$ for some t_i in P .**
 (c) $|x - t_i| \leq d(t_i)$ for all tags t_i in P .
 (d) $|x - t_i| > d(t_i)$ for all tags t_i in P .
28. For a monotone function $f: I \rightarrow \mathbb{R}$, where I is an interval, what is true about its continuity?
- (a) Monotone functions are always continuous.
 (b) **Monotone functions are not necessarily continuous.**
 (c) Monotone functions are continuous only if they are strictly increasing.
 (d) Monotone functions are continuous only if they are strictly decreasing.
29. Consider an increasing function $f: I \rightarrow \mathbb{R}$ on an interval I with c as an interior point of I . What can be concluded about the jump of f at c ?
- (a) **The jump is always zero.**
 (b) The jump is positive.
 (c) The jump is negative.
 (d) The jump may be positive, negative, or zero depending on the function.

UNIT 4

30. If $\alpha > 1$ then $(1 + x)^\alpha \geq 1 + \alpha x$ for all $x > -1$ is called _____ inequality.
(a) triangle **(b) Bernoulli's** (c) Rolle's (d) Weierstrass.
31. Which of the following is true for the function $f: \mathbb{R} \rightarrow \mathbb{R}$ defined by $f(x) = x^5 + 4x + 3$
(a) $f'(x) = 0$ **(b) continuous and monotone**
(c) not continuous (d) f^{-1} is not differentiable.
32. What is a partition of an interval $I = [a, b]$?
(a) A set of points within I . (b) A collection of non-overlapping closed intervals.
(c) The set of real numbers in $[a, b]$ **(d) A collection of intervals whose union forms $[a, b]$.**
33. In the context of partitions, what does it mean for a partition to be d -fine?
(a) All subintervals have the same length.
(b) Each subinterval is contained in an interval determined by the gauge and the tag.
(c) The gauge function d is constant for all subintervals.
(d) Tags are chosen arbitrarily within each subinterval.
34. How is a gauge related to the continuity of a function?
(a) It determines the derivative of the function.
(b) It controls the fineness of partitions, influencing continuity properties.
(c) It is equal to the length of the interval $[a, b]$.
(d) It represents the maximum value of the function on $[a, b]$.
35. Let $f: I \rightarrow \mathbb{R}$ be differentiable on the interval. Then f is increasing on I iff _____ $\forall x \in I$.
(a) $f'(x) > 0$ (b) $f'(x) < 0$ (c) $f'(x) \geq 0$ (d) $f'(x) \leq 0$.
35. What does the Mean Value Theorem state for a differentiable function on a closed interval $[a, b]$?
(a) The function is constant on the interval $[a, b]$.
(b) There exists at least one point c in the open interval (a, b) such that the derivative at c is equal to the average rate of change over $[a, b]$.
(c) The function attains its maximum value at some point in the interval $[a, b]$.
(d) The integral of the function over $[a, b]$ is zero.
36. For a function to be considered differentiable at a specific point, which of the following conditions must be satisfied?
(a) Existence of the function at that point
(b) Continuity of the function at that point
(c) Discontinuity of the function in the entire domain
(d) Existence of the function in the entire domain

UNIT 5

37. $\lim_{x \rightarrow \infty} \frac{\ln x}{x} = \underline{\hspace{2cm}}$.
(a) 1 (b) 0 (c) x (d) e^x .
38. A convex function on an open interval is $\underline{\hspace{2cm}}$.
(a) always monotone (b) continuous (c) not continuous (d) **always differentiable**.
39. $\lim_{x \rightarrow 0^+} \frac{\tan x}{x}$ in $(0, \frac{\pi}{2})$ is $\underline{\hspace{2cm}}$.
(a) 0 (b) $\frac{\pi}{4}$ (c) $\frac{\pi}{2}$ (d) e^x .
40. Let $f: \mathbb{R} \rightarrow \mathbb{R}$ be a function defined by $f(x) = \cos ax \ \forall x \in \mathbb{R}$ where $a \neq 0$. Then
 $f^{(2)}(x) = \underline{\hspace{2cm}} \ \forall x \in \mathbb{R}$.
(a) $-a^2 \sin ax$ (b) $(-1)^2 a^2 \cos ax$ (c) **$(-1)a^2 \cos ax$** (d) $a^2 \sin ax$.
41. $\lim_{x \rightarrow 0} \frac{\sin x}{x} = \underline{\hspace{2cm}}$.
(a) **1** (b) 0 (c) 1/2 (d) Does not exist
42. $\lim_{x \rightarrow \infty} \frac{x^2 + 3x + 1}{2x^2 - 5x + 1} = \underline{\hspace{2cm}}$.
(a) 1 (b) 0 (c) **2** (d) $-\infty$.
43. $\lim_{x \rightarrow \infty} \frac{e^x}{x^2} = \underline{\hspace{2cm}}$.
(a) 1 (b) 0 (c) ∞ (d) $-\infty$.
44. $\lim_{x \rightarrow 0^+} x \ln x \underline{\hspace{2cm}}$.
(a) 1 (b) 0 (c) ∞ (d) **$-\infty$** .

Section-B (2 Mark)

UNIT 1

1. Define continuous function.
2. Prove that the cosine function is continuous on \mathbb{R} .
3. When the function f is said to be discontinuous at a point.
4. Define Sequential Criterion for Continuity.
5. State the Discontinuity Criterion.
6. When we say that f is continuous on the set B .
7. Prove that every constant function is continuous on \mathbb{R} .
8. Show that the function $g(x) = x$ is continuous on \mathbb{R} .

UNIT 2

9. Define step function.
10. Define Lipschitz function.
11. Define uniformly continuous.
12. Define step function
13. Prove that continuous image of a closed and bounded interval is again a closed and bounded interval.
14. State Weierstrass Approximation Theorem.

UNIT 3

15. Define partition of an interval
16. Define tagged partition of an interval I .
17. Define strictly monotone function.
18. Define gauge on an interval I .
19. If $m \in \mathbb{Z}$, $n \in \mathbb{N}$, and $x > 0$, then show that $x^{m/n} = (x^m)^{1/n}$.
20. Let $I \subseteq \mathbb{R}$ be an interval and let $f: I \rightarrow \mathbb{R}$ be increasing on I . If $c \in I$, then prove that f is continuous at c if and only if $j_f(c) = 0$.

UNIT 4

21. Define differentiable function.
22. If $f: I \rightarrow \mathbb{R}$ has a derivative at $c \in I$ then prove that f is continuous at c .
23. Define relative extremum of a function.
24. If $m \in \mathbb{Z}$, $n \in \mathbb{N}$, and $x > 0$, then show that $x^{m/n} = (x^m)^{1/n}$.
25. Define the derivative of a function at a point and explain the conditions for a real number to be the derivative of a function at a specific point.
26. Prove that continuity of a function at a point is a necessary condition for the existence of the derivative at that point.
27. Provide an example of a continuous function that is not differentiable at a finite number of points, emphasizing the importance of Weierstrass's example.
28. State and prove some basic properties of the derivative, specifically those related to algebraic combinations of functions.
29. Present and prove the Chain Rule for the differentiation of composite functions.

30. Explain Carathéodory's Theorem and its application to establish the Chain Rule for differentiating composite functions.
31. Illustrate the application of the Chain Rule through examples involving polynomial and trigonometric functions.
32. Demonstrate the application of the derivative rules to find the derivatives of inverse trigonometric functions.
33. State and prove the theorem regarding the differentiability of the inverse function of a strictly monotone and continuous function.
34. Provide a proof of the general formula for the derivative of the inverse function and discuss the essential condition for its applicability.

UNIT 5

35. Define differentiable function.
36. Find the value of $\lim_{x \rightarrow \infty} e^{-x} x^2$.
37. Define convex function.
38. Define the limit of a function at a point.
39. State the limit laws and provide one example of their application.
40. Explain the concept of continuity of a function.
41. Differentiate between removable and non-removable discontinuities.
42. Define the derivative of a function at a point.
43. What is meant by the differentiability of a function on an interval?
44. State the Mean Value Theorem and its significance.
45. Explain the concept of concavity and convexity in calculus.
46. Define the critical points of a function.
47. State the First Derivative Test for local extrema.
48. What is the second derivative test, and how is it used to analyze critical points?
49. Define indeterminate forms and provide examples.
50. State L'Hôpital's Rule I and its conditions.
51. Explain how to determine the differentiability and continuity of a function in a given interval using limits.

Section-C (5 Mark)

UNIT 1

1. State and prove Boundedness theorem.
2. Show that the Dirichlet's function is not continuous at any point in \mathbb{R} .
3. If f and g are continuous functions on A to \mathbb{R} , then prove that the sum, difference, product, and multiple functions denoted by $f + g$, $f - g$, $f \cdot g$; bf continuous on A .
4. Show that a rational function is continuous at every real number for which it is defined.
5. Prove that composition of continuous functions is continuous.

UNIT 2

6. State and prove Continuous extension theorem.
7. State and prove Uniform Continuity theorem.
8. State and prove Bolzano's Intermediate Value Theorem.
9. State and prove Preservation of Intervals Theorem.
10. If $f: A \rightarrow \mathbb{R}$ is uniformly continuous on a subset A of \mathbb{R} and if (x_n) is a Cauchy sequence in A , then prove that $(f(x_n))$ is a Cauchy sequence in \mathbb{R} .

UNIT 3

11. If δ is a gauge defined on the interval $[a, b]$, then show that there exists a δ -fine partition of $[a, b]$.
12. If $I \subseteq \mathbb{R}$ is an interval and $f: I \rightarrow \mathbb{R}$ is monotone on I , then prove that the set of points $D \subseteq I$ at which f is discontinuous is a countable set.
13. State and prove Continuous extension theorem.
14. State and prove Boundedness theorem using gauges.
15. If δ is a gauge defined on the interval $[a, b]$, then show that there exists a δ -fine partition of $[a, b]$.

UNIT 4

16. If $f: I \rightarrow \mathbb{R}$ has a derivative at $c \in I$ then prove that f is continuous at c .
17. State and prove Caratheodory's theorem.
18. State and prove Interior extremum theorem.
19. State and prove Darboux's theorem.
20. State and prove Mean value theorem.

UNIT 5

21. State and prove Cauchy mean value theorem.
22. Explain Newton's method.
23. Illustrate Newton's Method by using it to approximate $\sqrt{2}$.
24. Let I be an open interval and let $f: I \rightarrow \mathbb{R}$ have a second derivative on I . Then prove that f is a convex function on I if and only if $f''(x) \geq 0$ for all $x \in I$.
25. Define convex function and show that A convex function need not be differentiable at every point.

Section-D (10 Marks)

UNIT 1

1. State and prove Location of Roots theorem.
2. State and prove Maximum-Minimum theorem.
3. Show that Thomae's function is continuous at every irrational number and discontinuous at every rational number in the domain.

UNIT 2

4. Let I be a closed and bounded interval and let $f: I \rightarrow \mathbb{R}$ be continuous on I . If $\epsilon > 0$, then show that there exist a step function $s_\epsilon: I \rightarrow \mathbb{R}$ such that $|f(x) - s_\epsilon(x)| < \epsilon$ for all $x \in I$.
5. State and prove Continuous Extension Theorem.
6. Let I be a closed bounded interval and let $f: I \rightarrow \mathbb{R}$ be continuous on I . If $\epsilon > 0$, then show that there exists a continuous piecewise linear function $g_\epsilon: I \rightarrow \mathbb{R}$ such that $|f(x) - g_\epsilon(x)| < \epsilon$ for all $x \in I$.

UNIT 3

7. State and prove Continuous Inverse theorem.
8. Let $I = [a, b]$ be a closed, bounded interval and let $f: I \rightarrow \mathbb{R}$ be continuous on I . If $k \in \mathbb{R}$ is any number satisfying $\inf f(I) \leq k \leq \sup f(I)$, then show that there exists a number $c \in I$ such that $f(c) = k$.
9. State and prove Uniform continuity theorem.
10. State and prove Location of Roots theorem using gauges.
11. State and prove Continuous Inverse theorem.

UNIT 4

12. State and prove Chain Rule.
13. Let I be an interval in \mathbb{R} and let $f: I \rightarrow \mathbb{R}$ be strictly monotone and continuous on I . Let $J = f(I)$ and let $g: J \rightarrow \mathbb{R}$ be the strictly monotone and continuous function inverse to f . If f is differentiable at $c \in I$ and $f'(c) \neq 0$, then prove that g is differentiable at $d = f(c)$ and $g'(d) = \frac{1}{f'(c)} = \frac{1}{f'(g(d))}$.
14. State and prove First derivative test for extrema.

UNIT 5

15. State and prove L'Hospital's Rule I.
16. State and prove L'Hospital's Rule II.
17. State and prove Taylor's theorem.
18. Let I be an open interval and let $f: I \rightarrow \mathbb{R}$ have a second derivative on I . Then prove that f is a convex function on I if and only if $f''(x) \geq 0$ for all $x \in I$.

Semester V Sub. Code: 21UMAC54

Core Integral I-Vector Calculus and Fourier Series

SECTION - A

Unit I

1. The component of the vector $\nabla\Phi$ in the direction of a unit vector \vec{a} is given by
(a) $\Phi \cdot \vec{a}$ (b) $\nabla^2\Phi$ (c) $\vec{a} \cdot \nabla\Phi$ (d) $\Phi \times \vec{a}$
2. The maximum value of the directional derivative has magnitude
(a) $|\nabla\Phi|$ (b) $\nabla\Phi$ (c) $\nabla \cdot \Phi$ (d) $\Phi \text{grad } \psi$
3. The vectors $\vec{a}, \vec{b}, \vec{c}$ are coplanar if
(a) $\vec{a} \times (\vec{b} \times \vec{c}) = 0$ (b) $\vec{a} \cdot (\vec{b} \times \vec{c}) = 0$
(c) $\vec{c} = \vec{a} \times \vec{b}$ (d) $\vec{a} = \vec{b} = \vec{c}$
4. The gradient of a scalar function Φ is a
(a) a vector valued function (b) a scalar valued function
(c) 0 (d) 1
5. $\text{grad}(\phi\psi) =$
(a) $\phi \text{grad } \psi - \psi \text{grad } \phi$ (b) $\phi \text{grad } \psi$
(c) $\psi \text{grad } \phi$ (d) $\phi \text{grad } \psi + \psi \text{grad } \phi$
6. If P(x,y,z) is any point its position vector is given by
(a) $x\vec{i} + y\vec{j} + z\vec{k}$ (b) $\vec{i} + \vec{j} + \vec{k}$ (c) $|r|$ (d) $\sqrt{x^2 + y^2 + z^2}$
7. The maximum value of the directional derivative takes place in the direction of
(a) $|\nabla\Phi|$ (b) $\nabla\Phi$ (c) $\nabla \cdot \Phi$ (d) $\Phi \text{grad } \psi$
8. For any constant vector \vec{a} , we have
(a) $\nabla(\vec{a} \cdot \vec{r}) = \vec{a}$ (b) $\nabla\Phi = \vec{a}$ (c) $\nabla \cdot \Phi = \vec{a}$ (d) $\Phi = \vec{a} \cdot \vec{r}$
9. The unit normal \vec{n} to the surface $\phi(x, y, z) = c$ is given by
(a) $\frac{\nabla\phi}{|\nabla\phi|}$ (b) $\nabla\Phi$ (c) $\nabla \cdot \Phi$ (d) $|\nabla\Phi|$
10. $|\vec{a} \times \vec{b}| =$ _____ with \vec{a}, \vec{b} as adjacent sides.
(a) Area of the parallelogram (b) Volume of the parallelepiped
(c) Area of the rectangle (d) Volume of the rectangle
11. $\text{grad} \left(\frac{\phi}{\psi} \right) =$
(a) $\phi \text{grad } \psi - \psi \text{grad } \phi$ (b) $\frac{\psi \text{grad } \phi + \phi \text{grad } \psi}{\psi^2}$
(c) $\frac{\psi \text{grad } \phi - \phi \text{grad } \psi}{\psi^2}$ (d) $\phi \text{grad } \psi + \psi \text{grad } \phi$

Unit II

12. A vector \vec{f} is called a harmonic vector if
(a) $\text{curl } \vec{f} = 0$ (b) $\nabla^2 \vec{f} = 0$ (c) $\text{div } \vec{f} = 0$ (d) $\nabla \times (\nabla \times \vec{f}) = 0$
13. If \vec{f} and \vec{g} are irrotational then $\vec{f} \times \vec{g}$ is
(a) harmonic (b) **irrotational** (c) solenoidal (d) constant
14. If \vec{r} is the position vector of a point (x,y,z) in space then.
(a) $\text{grad } r = 0$ (b) $\text{curl } \Phi = 0$ (c) $\text{div } \vec{r} = 3$ (d) $\text{curl } r = 3$
15. $\text{div curl } \vec{f} =$
(a) **0** (b) $\nabla^4 \vec{f}$ (c) $2\vec{f}$ (d) 3
16. If Φ is a scalar valued function then $\nabla^2 \Phi$ is
(a) a vector valued function (b) **a scalar valued function**
(c) 0 (d) 1
17. A vector \vec{f} is called solenoidal if
(a) $\text{curl } \vec{f} = \vec{0}$ (b) $\nabla^2 \vec{f} = 0$ (c) $\text{div } \vec{f} = 0$ (d) $\nabla \times (\nabla \times \vec{f}) = 0$
18. A vector \vec{f} is called irrotational if
(a) **$\text{curl } \vec{f} = \vec{0}$** (b) $\nabla^2 \vec{f} = 0$ (c) $\text{div } \vec{f} = 0$ (d) $\nabla \times (\nabla \times \vec{f}) = 0$
19. The operator ∇^2 is called
(a) normal to the surface (b) irrotational operator
(c) **Laplacian operator** (d) curl curl of a vector
20. $\nabla^2 r =$
(a) 0 (b) r (c) **$2r$** (d) r^2
21. The curl of a vector valued function is a
(a) **a vector valued function** (b) a scalar valued function
(c) 0 (d) 1
22. If $\vec{f} = 3xyz^2\vec{i} + 2xy^2\vec{j} - x^3yz\vec{k}$ and $\phi = 3x^2 - yx$, then $\vec{f} \cdot \text{grad } \phi =$
(a) 0 (b) -15 (c) -5 (d) **1**
23. The divergence of a vector valued function is a
(a) a vector valued function (b) **a scalar valued function**
(c) 0 (d) 1

Unit III

24. When a particle acted on by a force \vec{f} , moves from a point \vec{r} to a neighbouring point $\vec{r} + \Delta\vec{r}$, the work done is given by _____
(a) $\vec{f} \times \Delta\vec{r}$ (b) **$\vec{f} \cdot \Delta\vec{r}$** (c) $\int \vec{f} d\vec{r}$ (d) $\vec{F} \cdot d\vec{r}$
25. If the Riemann integral is generalised by replacing the interval [a,b], by a curve in \mathbf{R}^3 , then the integrand is a _____
(a) **a vector valued function** (b) a scalar valued function
(c) not a function (d) constant
26. If R is the projection of the surface S on the x-y plane, then $\iint_S \vec{f} \cdot \vec{n} dS$ is equal to _____
(a) $\iint_S \frac{\vec{f} \cdot \vec{n}}{|\vec{n} \cdot \vec{k}|} dx dy$ (b) $\iint_R \vec{f} \cdot \vec{n} dS$ (c) xy (d) $\iint_R \frac{\vec{f} \cdot \vec{n}}{|\vec{n} \cdot \vec{k}|} dx dy$

27. If $\vec{f} = (2y + 3)\vec{i} + xz\vec{j} + (yz - x)\vec{k}$, then $\int_C \vec{f} \cdot d\vec{r} =$ _____ along the path C: $x = 2t^2, y = t, z = t^3$ from $t = 0$ to $t = 1$
 (a) -222/85 (b) -288/85 (c) **288/85** (d) 228/15
28. The parametric equation of the line joining (1,1) and (3,9) is
 (a) $x = 2t + 1, y = 8t + 1$ (b) $x = 2t - 1, y = 8t + 1$
 (c) $x = 2t - 1, y = 8t - 1$ (d) $x = t - 1, y = 8t + 5$
29. The parametric equation of the line joining (0,0,0) and (3,1,2) is
 (a) $x = 3t, y = t, z = 2t$ (b) $x = 0, y = t, z = 2t$
 (c) $x = 3t, y = -t, z = -2t$ (d) $x = 5t, y = 8t, z = 2t$
30. If S: $x + y + z = 2$, Then unit surface normal of S is _____
 (a) $\frac{\vec{i} + \vec{j} + \vec{k}}{\sqrt{3}}$ (b) $\frac{\vec{i} + \vec{j} - \vec{k}}{\sqrt{3}}$ (c) 0 (d) $\frac{\vec{i} - 5\vec{j} + \vec{k}}{\sqrt{2}}$
31. The parametric equation of the line joining (0,0,0) and (1,2,5) can be written as _____
 (a) $x = t, y = 2t, z = 5t$ (c) $x = -t, y = 2t, z = 5t$
 (c) $x = 2t, y = t, z = t$ (d) $x = t, y = 7t, z = 5t$

Unit IV

32. If S is any closed surface enclosing a volume V and $\vec{f} = ax\vec{i} + by\vec{j} + cz\vec{k}$ then $\iint_S \vec{f} \cdot \vec{n} dS$ is _____
 (a) $(a + b + c)V$ (b) $3V$ (c) $6V$ (d) $(a + b + c)^3V^3$
33. The value of $\int_C \vec{r} \cdot d\vec{r} =$ _____ where $\vec{r} = x\vec{i} + y\vec{j} + z\vec{k}$.
 (a) $3V^2$ (b) $3V$ (c) $6V$ (d) **0**
34. If V is the volume enclosed by a closed surface S, then the value of $\iint_S \vec{r} \cdot \vec{n} dS$ is _____
 (a) $3V^2$ (b) **$3V$** (c) $6V$ (d) 0
35. Green's theorem in space is the same as
 (a) Stokes' theorem (b) Descartes' theorem
 (c) Gradient theorem (d) **Gauss' divergence theorem**
36. By Stokes' theorem $\int_C \vec{f} \cdot d\vec{r} =$
 (a) $\iiint_V \nabla \cdot \vec{f} dV$ (b) $\iint_S \text{curl } \vec{f} \cdot \vec{n} dS$
 (c) $\iint_S \vec{f} \cdot \vec{n} dS$ (d) $\iint \nabla \cdot \vec{f} dS$
37. Green's theorem connects
 (a) **Line integral and double integral** (b) Line integral and surface integral
 (c) Double integral and surface integral (d) Surface integral and volume integral
38. Stokes' theorem connects
 (a) Line integral and double integral (b) **Line integral and surface integral**
 (c) Double integral and surface integral (d) Surface integral and volume integral
39. Gauss' divergence theorem connects

- (a) Line integral and double integral
(c) Double integral and surface integral

- (b) Line integral and surface integral
(d) **Surface integral and volume integral**

Unit V

40. If $f(x) = f(-x)$ then $f(x)$ is _____.

- (a) odd (b) **even** (c) both (a) and (b) (d) neither (a) nor (b)

41. If $f(x) = -f(x)$ then $f(x)$ is

- (a) **odd** (b) even (c) both (a) and (b) (d) neither (a) nor (b)

Cosine series $f(x)$ is _____

(a) $\frac{a_0}{\pi} + \sum_{n=1}^{\infty} a_n \cos nx$

(b) $\frac{a_0}{2} + \sum_{n=1}^{\infty} a_n \cos nx$

(c) $\frac{a_0}{\pi} + \sum_{n=1}^{\infty} b_n \cos nx$

(d) $\frac{a_0}{2} + \sum_{n=1}^{\infty} a_n \sin nx$

42. Cosine series b_n value is _____.

- (a) 2 (b) 1 (c) **0** (d) $\sqrt{\pi}$

43. Cosine series a_n value is _____.

(a) $\frac{2}{\pi} \int_0^{\pi} f(x) \cos nx \, dx$

(b) $\frac{2}{\pi} \int_0^{\pi} f(x) \cos nx \, dx$

(c) $\frac{2}{\pi} \int_0^{\pi} f(x) \sin nx \, dx$

(d) $\frac{2}{\pi} \int_0^{\pi} f(x) \sin nx \, dx$

44. Sine series a_n value is _____.

- (a) 2 (b) 1 (c) **0** (d) $\sqrt{\pi}$

45. Sine series b_n value is _____.

(a) $\frac{2}{\pi} \int_0^{\pi} f(x) \cos nx \, dx$

(b) $\frac{2}{\pi} \int_0^{\pi} f(x) \cos nx \, dx$

(c) $\frac{2}{\pi} \int_0^{\pi} f(x) \sin nx \, dx$

(d) $\frac{2}{\pi} \int_0^{\pi} f(x) \sin nx \, dx$

46. Sine series $f(x)$ is _____

(a) $\frac{a_0}{\pi} + \sum_{n=1}^{\infty} a_n \cos nx$

(b) $\frac{a_0}{2} + \sum_{n=1}^{\infty} a_n \cos nx$

(c) $\frac{a_0}{\pi} + \sum_{n=1}^{\infty} b_n \cos nx$

(d) $\sum_{n=1}^{\infty} b_n \sin nx$

47. $\frac{\pi}{2} + \frac{\sin 2x}{1} + \frac{\sin 4x}{2} + \frac{\sin 6x}{3} + \dots =$ _____

- (a) $\pi + x$ (b) **$\pi - x$** (c) $\frac{2}{\pi} + x$ (d) $\frac{\pi}{2} + x$

48. The Fourier constant b_n for $f(x) = x \sin x$ in $(-2, 2)$ is _____

- (a) **0** (b) -2 (c) 66 (d) $8/7$

49. If $f(x) = \sinh(x)$ defined in $-\pi < x < \pi$ then a_0 and a_n values are _____

- (a) $-\pi, \pi$ (b) $\pi, 4\pi$ (c) **0, 0** (d) $0, \pi$

50. $b_n = \frac{4}{n\pi} \{1 - (-1)^n\}$. Then the value of b_3 is _____
- (a) $\frac{4}{n\pi}$ (b) $\frac{8}{n\pi}$ (c) $\frac{3n}{\pi}$ (d) $\frac{-4}{n\pi}$ _____

51. The Fourier series is a combination of _____ and _____ trigonometric terms.
- (a) Sine and tan (b) cosine and cosec
(c) sec and tan (d) **Sine and cosine**

SECTION B

Unit-I

1. Find the directional derivative of $\psi = xy + yz + zx$ at (1,2,3) in the direction of $3\vec{i} + 4\vec{j} + 5\vec{k}$.
2. Find the unit vector normal to the surface $x^2 - y^2 + z = 2$ at the point (1,-1,2).
3. Define dot product and cross product.
4. Define scalar triple product.
5. If $\phi(x, y, z) = xy^2 + yz^3$ find $\text{grad } \phi$.
6. In what direction from the point (1,3,2) is the directional derivative of $\phi = 2xz - y^2$ maximum? What is the magnitude of this maximum?
7. Define the term directional derivative.
8. Find $\text{grad } \phi$ for $\phi(x, y, z) = 2xz^4 - x^2y$ at (2,-2,-2).
9. Find the directional derivative of $\psi = x^2 - 2y^2 + 4z^2$ at (1,1,-1) in the direction of $2\vec{i} + 2\vec{j} + \vec{k}$.
10. Find the unit normal to the surface $x^3 - xyz + z^3 = 1$ at (1, 1, 1).

Unit-II

11. Find the directional derivative of $\psi = xy + yz + zx$ at (1,2,3) in the direction of $3\vec{i} + 4\vec{j} + 5\vec{k}$.
12. Find the unit vector normal to the surface $x^2 - y^2 + z = 2$ at the point (1,-1,2).
13. Define dot product and cross product.
14. Define scalar triple product.
15. If $\phi(x, y, z) = xy^2 + yz^3$ find $\text{grad } \phi$.
16. In what direction from the point (1,3,2) is the directional derivative of $\phi = 2xz - y^2$ maximum? What is the magnitude of this maximum?
17. Find $\text{grad } \phi$ for $\phi(x, y, z) = 2xz^4 - x^2y$ at (2,-2,-2).
18. Find the directional derivative of $\psi = x^2 - 2y^2 + 4z^2$ at (1,1,-1) in the direction of $2\vec{i} + 2\vec{j} + \vec{k}$.
19. Find the unit normal to the surface $x^3 - xyz + z^3 = 1$ at (1, 1, 1).

Unit-III

20. Define line integral.
21. Evaluate $\int_C \vec{f} \cdot d\vec{r}$ where $\vec{f} = (x^2 + y^2)\vec{i} + (x^2 - y^2)\vec{j}$ and C is the curve $y = x^2$ joining (0,0) and (1,1).

22. If $\vec{f} = x^2\vec{i} - xy\vec{j}$ and C is the straight line joining the points (0,0) and (1,1) find $\int_C \vec{f} \cdot d\vec{r}$.
23. Evaluate $\int_{(1,1)}^{(4,2)} \vec{f} \cdot d\vec{r}$ where $\vec{f} = (x+y)\vec{i} + (y-x)\vec{j}$ along the parabola $y^2 = x$.
24. Evaluate $\int_{(1,1)}^{(4,2)} \vec{f} \cdot d\vec{r}$ where $\vec{f} = (x+y)\vec{i} + (y-x)\vec{j}$ along the straight line joining (1,1) and (4,2)
25. Define surface integral.
26. Find the work done in moving a particle in a force field given by $\vec{F} = 3x^2\vec{i} + (2xz - y)\vec{j} + z\vec{k}$ along the line joining the points (0,0,0) to (2,1,3).

Unit-IV

27. State Green's theorem.
28. State Stokes' theorem.
29. State Gauss' divergence theorem.
30. Prove that for a closed surface S, $\iiint_V \vec{r} \cdot \vec{n} dS = 3V$, where V is the volume enclosed by S and $\vec{r} = x\vec{i} + y\vec{j} + z\vec{k}$.
31. Evaluate by using Stoke's theorem $\oint_C (yzdx + zxdy + xydz)$ where C is the curve $x^2 + y^2 = 1$, $z = y^2$.
32. Evaluate by using Stoke's theorem $\oint_C (e^x dx + 2ydy - dz)$ where C is the curve $x^2 + y^2 = 4$, $z = 2$.
33. Apply Gauss divergence theorem to show $\iiint_V \nabla \cdot \vec{r} dV = 3V$, where S is a closed surface enclosing a volume V
34. Prove by using Stoke's theorem that $\text{curl grad } \phi = 0$
35. If S is a closed surface enclosing a volume V and if $\vec{f} = x\vec{i} + 2y\vec{j} + 3z\vec{k}$ prove that $\iiint_V \vec{f} \cdot \vec{n} dS = 6V$

Unit-V

36. Define fourier series.
37. Define sine series.
38. Define cosine series.
39. Find the Fourier coefficient a_0 for $f(x) = x \sin x$ in $(-\pi, \pi)$
40. Find the Fourier coefficient a_0 for $f(x) = x \sin x$ in $(0, 2\pi)$
41. Find the Fourier coefficient a_0 for $f(x) = e^x$ in $(0, 2\pi)$
42. Find the Fourier coefficient a_0 for $f(x) = x^2$ in $(-\pi, \pi)$
43. Find the Fourier coefficient a_0 for $f(x) = e^x$ in $(-\pi, \pi)$
44. If $f(x) = |x|$ and $f(x)$ is expanded as a Fourier series in $(-\pi, \pi)$ then find the Fourier

coefficient a_0 .

SECTION C

Unit-I

1. If $\vec{f} = 5t^2\vec{i} + t\vec{j} - t^3\vec{k}$ and $\vec{g} = \sin t\vec{i} - \cos t\vec{j}$ find
(i) $\frac{d}{dt}(\vec{f} \cdot \vec{g})$ (ii) $\frac{d}{dt}(\vec{f} \times \vec{g})$ (iii) $\frac{d}{dt}(\vec{f} \cdot \vec{f})$
2. Find ϕ if $\nabla\phi = (2x + 3y + 4xy^2)\vec{i} + (3x + 3y^2 + 4x^2y + z + 1)\vec{j} + (y + 2)\vec{k}$.
3. Find the angle between the surfaces $x^2 + y^2 + z^2 = 9$ and $z = x^2 + y^2 - 3$ at the point $(2, -1, 2)$.
4. Determine the constants a and b so that the surface $5x^2 - 2yz - 9x = 0$ will be orthogonal to the surface $ax^2y + bz^2 = 4$ at the point $(1, -1, 2)$.
5. If $\phi(x, y) = \log\sqrt{x^2 + y^2}$ show that $\text{rad } \phi = \frac{\vec{r} - (k \cdot \vec{r})\vec{k}}{\{\vec{r} - (k \cdot \vec{r})\vec{k}\} \cdot \{\vec{r} - (k \cdot \vec{r})\vec{k}\}}$.

Unit-II

6. Let \vec{f} be a vector valued function and ϕ a scalar valued function. Then prove that
$$\nabla \cdot (\phi \vec{f}) = (\nabla \phi) \cdot \vec{f} + (\nabla \cdot \vec{f})\phi$$
7. Prove that the vector $r^{-3}\vec{r}$ is solenoidal.
8. If $\vec{f} = 3xyz^2\vec{i} + 2xy^2\vec{j} - x^3yz\vec{k}$ and $\phi = 3x^2 - yx$ find (i) $\text{div}(\phi \vec{f})$ (ii) $\vec{f} \cdot \text{grad } \phi$
(iii) $\text{div}(\text{grad } \phi)$
9. If \vec{f} is solenoidal prove that $\text{curl curl curl } \vec{f} = \nabla^4 \vec{f}$.
10. Prove that $\nabla^2 f(r) = f''(r) + \frac{2}{r} f'(r)$.

Unit-III

11. Evaluate $\int_C \vec{f} \cdot d\vec{r}$ where $\vec{f} = (2x - y + 4)\vec{i} + (5y + 3x - 6)\vec{j}$ and C is the boundary of the ΔABC in the x - y plane with vertices at $A(0,0)$, $B(3,0)$ and $C(3,2)$ traversed in the anticlockwise direction.
12. Evaluate $\int_C \vec{f} \cdot d\vec{r}$ where $\vec{f} = (x^2 + y^2)\vec{i} - 2xy\vec{j}$ and the curve C is the rectangle in the $x - y$ plane bounded by $y = 0, y = b, x = 0, x = a$.
13. (i) If $\vec{f} = (x^2 - y^2)\vec{i} + 2xy\vec{j}$ evaluate $\int_C \vec{f} \cdot d\vec{r}$ along the curve C in x - y plane given by $y = x^2 - x$ from the point $(1,0)$ to $(2,2)$.
(ii) Evaluate $\int_C \vec{f} \cdot d\vec{r}$ where $\vec{f} = (x - y)\vec{i} + (y - 2x)\vec{j}$ and C is the closed curve in the $x - y$ plane $x = 2\cos t, y = 3\sin t$ from $t = 0$ to $t = 2\pi$.
14. (i) Find the work done by the force $\vec{f} = 3xy\vec{i} - 5z\vec{j} + 10x\vec{k}$ along the curve $C, x = t^2 + 1; y = 2t^2; z = t^3$ from $t = 1$ to $t = 2$.
(ii) Find the total work done in moving a particle in a field of force $\vec{F} = 2xy\vec{i} - 3x\vec{j} - 5z\vec{k}$ along the curve $C, x = t; y = t^2 + 1; z = 2t^2$ from $t = 0$ to $t = 1$.
15. Evaluate $\iint_S \vec{f} \cdot \vec{n} dS$ where $\vec{f} = z\vec{i} + x\vec{j} - 3y^2z\vec{k}$ and S is the surface of the cylinder $x^2 + y^2 = 6$, included in the first octant between $z = 0$ and $z = 5$.

Unit-IV

16. Using Green's theorem evaluate $\int_C (xy - x^2)dx + x^2ydy$ along the closed curve C formed by $y = 0$, $x = 1$ and $y = x$.
17. Use Green's theorem to evaluate $\int_C x^2ydx + y^3dy$ where C is the closed path formed by $y = x$ and $y = x^3$ from (0,0) to (1,1).
18. Evaluate $\int_C (e^{-x}\sin y dx + e^{-x} \cos y dy)$ by Green's theorem where C is the rectangle whose vertices are (0,0), $(\pi, 0)$, $(\pi, \frac{\pi}{2})$ and $(0, \frac{\pi}{2})$.
19. Using Green's theorem evaluate $\int_C (y - \sin x)dx + \cos x dy$ where C is the triangle formed by the lines $y = 0$, $x = \frac{\pi}{2}$ and $y = \frac{2x}{\pi}$.
20. Evaluate by using Gauss divergence theorem $\iint_S \vec{f} \cdot \vec{n} dS$ where $\vec{f} = (x^2 - yz)\vec{i} + (y^2 - zx)\vec{j} + (z^2 - xy)\vec{k}$ where S is the surface of the rectangular parallelepiped bounded by the planes $0 \leq x \leq a$, $0 \leq y \leq b$ and $0 \leq z \leq c$.
21. Verify Green's theorem for the function $\vec{f} = (x^2 + y^2)\vec{i} - 2xy\vec{j}$ and C is the rectangle in the x-y plane bounded by $y = 0$, $y = b$, $x = 0$, and $x = a$.
22. Use Gauss divergence theorem to evaluate $\iint_S \vec{f} \cdot \vec{n} dS$ where $\vec{f} = 4x\vec{i} - 2y^2\vec{j} + z^2\vec{k}$ and S is the surface bounding the region $x^2 + y^2 = 4$, $z = 0$ and $z = 3$.
23. Evaluate $\iiint_S xy dydz + y^2 dzdx + yz dxdy$ where S is the surface $x^2 + y^2 + z^2 = a^2$.

Unit-V

24. Determine the Fourier expansion of $f(x) = x$ where $-\pi \leq x \leq \pi$
25. Find the sine series for the function $f(x) = k$ where $0 < x < \pi$
26. Find the Fourier series for the function $f(x) = x^2$ where $-1 < x < 1$
27. If $f(x) = \begin{cases} -x & \text{if } -\pi < x < 0 \\ x & \text{if } 0 < x < \pi \end{cases}$ Expand $f(x)$ as a Fourier series in the interval $[-\pi, \pi]$
28. Show that $\pi - x = \frac{\pi}{2} + \frac{\sin 2x}{1} + \frac{\sin 4x}{2} + \frac{\sin 6x}{3} + \dots$
29. Find the Fourier sine series $f(x) = ax + b$ in $0 < x < l$
30. Find the Fourier cosine series $f(x) = \frac{\pi^2}{12} - \frac{x^2}{4}$ in $[-\pi, \pi]$.
31. Determine the Fourier expansion of $f(x) = x$ where $-\pi \leq x \leq \pi$

SECTION D

Unit-I

1. (i) Prove that $\frac{d}{dt}(\vec{u} \times \vec{v}) = \vec{u} \times \frac{d\vec{v}}{dt} + \frac{d\vec{u}}{dt} \times \vec{v}$.

- (ii) If $\frac{d\vec{a}}{dt} = \vec{\omega} \times \vec{a}$ and $\frac{d\vec{b}}{dt} = \vec{\omega} \times \vec{b}$ show that $\frac{d}{dt}(\vec{a} \times \vec{b}) = \vec{\omega} \times (\vec{a} \times \vec{b})$.
2. Find the equation of the (i) tangent line and the (ii) normal plane to the curve of intersection of the surfaces $3x^2 + y^2z + 2 = 0$ and $2xz - x^2y - 3 = 0$ at the point $(1, -1, 1)$.
3. (i) If $\vec{r} = \vec{a} \cos \omega t + \vec{b} \sin \omega t$ where \vec{a} and \vec{b} are constant vectors and ω is a constant prove that $\vec{r} \times \frac{d\vec{r}}{dt} = \omega(\vec{a} \times \vec{b})$ and $\frac{d^2\vec{r}}{dt^2} + \omega^2\vec{r} = 0$.
- (ii) Expand $\frac{d}{dt}(\vec{p} \times (\vec{q} \times \vec{r}))$.
4. (i) Define gradient of a function.
- (ii) Prove that $\nabla|r^3| = 3|r^2|\vec{r}$.
- (iii) If $\nabla\phi = (y + \sin z)\vec{i} + x\vec{j} + x \cos z \vec{k}$ find ϕ .
5. (i) If \vec{r} is the position vector of any point $P(x, y, z)$, prove that $\text{grad } r^n = nr^{n-2}\vec{r}$.
- (ii) If $\vec{r} = \vec{a}e^{\omega t} + \vec{b}e^{-\omega t}$ show that $\frac{d^2\vec{r}}{dt^2} - \omega^2\vec{r} = 0$ where \vec{a} and \vec{b} are constant vectors.
- (iii) Prove that $\nabla r^2 = 2\vec{r}$.

Unit-II

6. (i) Prove that $\text{curl}(\vec{r} \times \vec{a}) = -2\vec{a}$ where \vec{a} is a constant vector.
- (ii) If $\vec{f} = xz^2\vec{i} - 2x^2yz\vec{j} + 2yz^4\vec{k}$ find $\nabla \times (\nabla \times \vec{f})$.
7. Find the value of the constant a so that the vector $\vec{f} = (axy - z^3)\vec{i} + (a - 2)x^2\vec{j} + (1 - a)xz^2\vec{k}$ will be irrotational. Hence find $\phi(x, y, z)$ such that $\vec{f} = \nabla\phi$.
8. (i) Prove that $\text{div}(\vec{r} \times \vec{a}) = 0$ where \vec{a} is a constant vector.
- (ii) Prove that $\text{div } \phi(\nabla\psi) - \text{div } \psi(\nabla\phi) = \phi\nabla^2\psi - \psi\nabla^2\phi$.
9. (i) Show that $(\frac{\vec{r}}{r}) = \frac{2}{r}$.
- (ii) If \vec{c} is a constant vector prove that $\nabla \cdot \{[(\vec{c} \cdot \vec{r})r^n]\vec{r}\} = (n + 4)(\vec{c} \cdot \vec{r})r^n$.
10. Prove that $\text{grad}(\vec{f} \cdot \vec{g}) = \vec{f} \times \text{curl } \vec{g} + \vec{g} \times \text{curl } \vec{f} + (\vec{f} \cdot \nabla)\vec{g} + (\vec{g} \cdot \nabla)\vec{f}$.
11. (i) If $\phi(x, y, z)$ is any solution of Laplace's equation prove that $\nabla\phi$ is both solenoidal and irrotational.
- (ii) Prove that $\text{div}(r^n\vec{r}) = (n + 3)r^n$. Deduce that $r^n\vec{r}$ is solenoidal iff $n = -3$.

Unit-III

12. (i) Evaluate $\int_C \vec{f} \cdot d\vec{r}$ where $\vec{f} = (x - y)\vec{i} + (y - 2x)\vec{j}$ and C is the closed curve in the x - y plane $x = 2 \cos t$, $y = 3 \sin t$ from $t=0$ to $t=2\pi$.
- (ii) Evaluate $\iint_S (\nabla \times \vec{f}) \cdot \vec{n} dS$ where $\vec{f} = y^2\vec{i} + y\vec{j} - xz\vec{k}$ and S is the upper half of the sphere $x^2 + y^2 + z^2 = a^2$ and $z \geq 0$.
13. If $\vec{f} = (3x - 2y)\vec{i} + (y + 2z)\vec{j} - x^2\vec{k}$ evaluate $\int_C \vec{f} \cdot d\vec{r}$ from $(0,0,0)$ to $(1,1,1)$ where C is a path consisting of
- (i) The curve $x = t, y = t^2, z = t^3$.

- (ii) The straight line joining (0,0,0) to (1,1,1).
 - (iii) The straight lines joining (0,0,0) to (0,1,0) then to (0,1,1) and then to (1,1,1).
14. If $\vec{f} = (2y + 3)\vec{i} + (xz)\vec{j} + (yz - x)\vec{k}$ evaluate $\int_C \vec{f} \cdot d\vec{r}$ along the following paths C
- (i) The curve $x = 2t^2, y = t, z = t^3$ from $t = 0$ to $t = 1$.
 - (ii) The polygonal path P consisting of the three line segments AB, BC and CD where $A = (0,0,0), B = (0,0,1), C = (0,1,1)$ and $D = (2,1,1)$
 - (iii) The straight line joining (0,0,0) to (2,1,1).
15. Evaluate $\iint_S \vec{A} \cdot \vec{n} dS$ where $\vec{A} = 18z\vec{i} - 12\vec{j} + 3y\vec{k}$ and S is that part of the plane $2x + 3y + 6z = 12$ which is located in the first octant.
16. If $\vec{f} = 4xz\vec{i} - y^2\vec{j} + yz\vec{k}$ evaluate $\iint_S \vec{f} \cdot \vec{n} dS$ where S is the surface of the cube bounded by $x = 0, x = 1, y = 0, y = 1, z = 0$ and $z = 1$.
17. Evaluate $\iint_S \vec{f} \cdot \vec{n} dS$ where $\vec{f} = (x^3 - yz)\vec{i} - 2x^2y\vec{j} + 2\vec{k}$ and S is the surface of the cube bounded by $x = 0, y = 0, z = 0, x = a, y = a, z = a$.

Unit-IV

18. Verify Green's theorem in the plane for $\int_C (x^2 - xy^3)dx + (y^2 - 2xy)dy$ where C is the square with vertices (0,0), (2,0), (2,2) and (0,2)
19. Verify Stokes' theorem for $\vec{f} = (x^2 - y^2)\vec{i} + 2xy\vec{j}$ in the rectangular region $x = 0, y = 0, x = a, y = b$.
20. Verify Gauss divergence theorem for the function $\vec{f} = (2x - z)\vec{i} + x^2y\vec{j} - xz^2\vec{k}$ over the region bounded by $x = 0, x = 1, y = 0, y = 1, z = 0, z = 1$.
21. Verify Gauss divergence theorem for $\vec{f} = y\vec{i} + x\vec{j} + z^2\vec{k}$ for the cylindrical region S given by $x^2 + y^2 = a^2; z = 0$ and $z = h$.
22. Verify Gauss divergence theorem for $\vec{f} = (x^2 - yz)\vec{i} + (y^2 - zx)\vec{j} + (z^2 - xy)\vec{k}$ taken over the rectangular parallelepiped, $0 \leq x \leq a, 0 \leq y \leq b, 0 \leq z \leq c$.
23. Verify Stokes' theorem for $\vec{f} = (2x - y)\vec{i} - yz^2\vec{j} - y^2z\vec{k}$ where S is the upper half surface of the sphere $x^2 + y^2 + z^2 = 1$ and C is its boundary.

Unit-V

24. Find the Fourier series for the function $f(x) = x^2$ where $-\pi \leq x \leq \pi$ and

$$\text{deduce that i) } \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \dots = \frac{\pi^2}{6}$$

$$\text{ii) } \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \dots = \frac{\pi^2}{15}$$

$$\text{iii) } \frac{1}{1^2} + \frac{1}{3^2} + \frac{1}{5^2} + \dots = \frac{\pi^2}{8}$$

25. Find the Fourier series (i) Cosine series (ii) Sine series for the function

$$f(x) = \pi - x \text{ in } [0, \pi]$$

26. Find the Fourier series $f(x) = e^x, [0, 2\pi]$

27. Prove that the function $f(x) = x$ can expanded in series of Cosine series in

$$0 < x < \pi \text{ as } x = \frac{\pi}{2} - \frac{\pi}{4} \left[\frac{\cos x}{1^2} + \frac{\cos 3x}{2^2} + \frac{\cos 5x}{5^2} + \dots \right]$$

28. Prove that the function $f(x) = x$ can expanded in series of Sine series in $0 < x \leq \pi$

$$\text{as } x = 2 \left[\frac{\sin x}{1} - \frac{\sin 2x}{2} + \frac{\sin 3x}{3} + \dots \right] \text{ hence deduce that } \frac{1}{1} - \frac{1}{3} + \frac{1}{5} + \dots = \frac{\pi}{4}$$

29. If $f(x) = \begin{cases} 2x & \text{if } 0 < x \leq \pi \\ x & \text{if } -\pi < x \leq 0 \end{cases}$ Expand $f(x)$ as a Fourier series in the interval $[-\pi, \pi]$

30. If $f(x) = \begin{cases} 0 & \text{if } -\pi < x < 0 \\ \frac{1}{4}\pi x & \text{if } 0 < x < \pi \end{cases}$ Expand $f(x)$ as a Fourier series in the interval $[-\pi, \pi]$

31. If $f(x) = \begin{cases} -\frac{1}{2}(\pi + x) & \text{if } -\pi \leq x < 0 \\ \frac{1}{2}(\pi - x) & \text{if } 0 \leq x < \pi \end{cases}$ Expand $f(x)$ as a Fourier series in the interval $[-\pi, \pi]$

32. Expand the function $y = \sin x$ in a series of cosines in the interval $(0, \pi)$.

33. Expand the function $y = \cos 2x$ in a series of sines in the interval $(0, \pi)$.

Section A

Unit-I

1. A conditional statement is also called -----.
(a) **Implication** (b) Proposition (c) Predicate (d) Biconditional
2. The contrapositive of the statement “If it is below freezing, it is also snowing” is -----.
(a) It is below freezing and snowing.
(b) It is below freezing but not snowing.
(c) **If it is not snowing, it is not below freezing.**
(d) If it is not below freezing, it is not snowing
3. The output of the below combinatorial circuit is -----.

- (a) $p \wedge q$ (b) $\neg p \wedge q$ (c) $\neg p \vee \neg q$ (d) $\neg p \wedge \neg q$
4. Which of the following phrases is not an universal quantifier?
(a) every one (b) **for some** (c) for all (d) arbitrary
 5. The statement $\forall x(P(x) \wedge Q(x))$ is logically equivalent to -----.
(a) $\exists x(P(x) \wedge Q(x))$ (b) $\exists xP(x) \vee \exists xQ(x)$
(c) $\forall xP(x) \vee \forall xQ(x)$ (d) **$\forall xP(x) \wedge \forall xQ(x)$**
 6. Which one of the following statements is true?
(a) Conditional statement and its converse are equivalent.
(b) An Existential quantifier cannot be distributed over a disjunction.
(c) **A universal quantifier can be distributed over a conjunction**
(d) A statement is not altered by interchanging the quantifiers
 7. Which logical operator among the following takes precedence over all the other operators?
(a) Conjunction (b) Disjunction (c) **Negation** (d) Conditional
 8. The ----- rule is also called law of detachment

- (a) modus Tollens (b) resolution (c) **modus ponens** (d) simplification
9. Which one of the following is not a theorem?
 (a) **Conjecture** (b) proposition (c) corollary (d) lemma
10. An assumption in a proof that reduces the number of cases is called -----.
 (a) fallacy (b) proof by cases
 (c) axiom (d) **Without loss of generality**
11. The fallacy arises when a statement is proved using itself is called -----.
 (a) fallacy of affirming conclusion
 (b) fallacy of denying hypothesis
 (c) **circular reasoning**
 (d) forward reasoning

Unit-II

12. Climbing an infinite ladder is possible by which of the following proof methods?
 (a) Direct proof (b) **mathematical induction**
 (c) contrapositive (d) proof by cases
13. ----- is called the complete induction.
 (a) **strong induction** (b) mathematical induction
 (c) well ordering (d) method of contradiction
14. Every non empty set of non negative integers has ----- element.
 (a) zero (b) greatest (c) **least** (d) one
15. The number of different bit strings of length six is -----.
 (a) 128 (b) 32 (c) **64** (d) 16
16. The number of functions from a m – set to a n – set is -----.
 (a) 2^m (b) m^n (c) 2^n (d) **n^m**
17. In a crowd of 100 people there are atleast ----- people who were born in the same month.
 (a) **9** (b) 10 (c) 8 (d) 7
18. $P(4, 2) =$ -----.
 (a) 18 (b) **12** (c) 24 (d) 6
19. Which one of the following is not true?
 (a) A recurrence relation may be homogeneous or non-homogeneous.
 (b) The solutions of recurrence relation depends on the characteristic roots.
 (c) **A sequence is strictly decreasing if each term is smaller than the succeeding term.**
 (d) A sequence is strictly increasing if each term is larger than the one that precedes it.
20. $C(n, r)$ is also called -----.
 (a) **binomial coefficient** (b) r-combination
 (c) r-permutation (d) trinomial coefficient

Unit-III

21. Which of the following statements is false?
- (a) The edges of a graph may be directed or undirected.
 - (b) A vertex of degree zero is isolated vertex
 - (c) Graphs that have same pair of vertices connected by one or more edges is called simple graph**
 - (d) A graph with both directed and undirected edges is mixed graph
22. Edges that connect a vertex to itself are called -----.
- (a) Multiple edges
 - (b) loops**
 - (c) links
 - (d) directed edges
23. Single duplex lines are -----.
- (a) Multiple edges
 - (b) loops
 - (c) links
 - (d) directed edges**
24. A pendant vertex is the vertex with degree -----.
- (a) 3
 - (b) 0
 - (c) 1**
 - (d) 2
25. A property preserved by isomorphism of graphs is called -----.
- (a) graph invariant**
 - (b) connectivity
 - (c) graph isomorphism
 - (d) contraction
26. Graphs that are used to represent the interaction of different species of animals.
- (a) protein interaction graphs
 - (b) module dependency graphs
 - (c) niche overlap graphs**
 - (d) precedence graphs
27. The number of vertices of odd degree in any graph is -----.
- (a) even**
 - (b) odd
 - (c) even or odd
 - (d) exactly two
28. Any bipartite graph with n vertices is -----.
- (a) 1- colorable
 - (b) 3-colorable
 - (c) 2-colorable**
 - (d) n – colorable
29. A graph with relatively few edges is called -----graph.
- (a) dense
 - (b) sparse**
 - (c) wheel
 - (d) pseudo
30. Connected graphs without cut vertices are called ----- graphs.
- (a) non-separable**
 - (b) sparse
 - (c) pseudo
 - (d) dense

Unit-IV

31. The number of reflexive relations on a set with 5 elements is -----.
- (a) 2^5
 - (b) 2^{20}**
 - (c) 2^{21}
 - (d) 2^4
32. The matrix of the relation R^2 if $R = \{(1,2), (2,2), (2,3), (3,1)\}$ is -----.
- (a) $\begin{bmatrix} 0 & 1 & 0 \\ 0 & 1 & 1 \\ 1 & 0 & 0 \end{bmatrix}$
 - (b) $\begin{bmatrix} 0 & 1 & 1 \\ 0 & 1 & 1 \\ 1 & 0 & 0 \end{bmatrix}$
 - (c) $\begin{bmatrix} 0 & 1 & 1 \\ 1 & 1 & 1 \\ 0 & 1 & 0 \end{bmatrix}$**
 - (d) $\begin{bmatrix} 0 & 1 & 0 \\ 0 & 1 & 1 \\ 1 & 1 & 0 \end{bmatrix}$
33. The connectivity relation of a relation R is equal to -----.
- (a) transitive closure**
 - (b) symmetric closure
 - (c) reflexive closure
 - (d) equivalence
34. The relation 'divisibility' is not ----- relation.
- (a) Reflexive
 - (b) transitive
 - (c) anti symmetric
 - (d) symmetric**
35. How many equivalence classes are there for the relation 'congruence modulo 6'?
- (a) 5
 - (b) 6**
 - (c) 4
 - (d) 3

36. In the poset $(Z^+, |)$ which of the pairs is not comparable?
 (a) **5,7** (b) 3, 9 (c) 2, 4 (d) 5, 10
37. If ' $<$ ' denotes the lexicographic ordering, then which of the following is true?
 (a) *discreetness* $<$ *discrete* (b) *discretion* $<$ *discrete*
 (c) ***discreet* $<$ *discrete*** (d) *discreti* $<$ *discrete*
38. The generating function of the sequence 1,1,1,1,1,1 is -----.
 (a) $1 + x + x^2 + x^3 + x^5$ (b) **$1 + x + x^2 + x^3 + x^4 + x^5$**
 (c) $1 + x + x^2 + x^3 + x^4 + x^5 + x^6$ (d) $1 + x + x^2 + x^3$
39. $C(r, 0) =$ -----.
 (a) **1** (b) 0 (c) r (d) $r + 1$
40. How many onto functions are there from a set with three elements to a set with two elements?
 (a) 4 (b) 3 (c) 8 (d) **6**

Unit-V

41. Which of the following is not true?
 (a) Every finite lattice has greatest element
 (b) Any converse relation of a partial order relation is also a partial order relation
 (c) **Every partial ordered set is a lattice**
 (d) Every lattice satisfies absorption laws
42. Which one of the following statements is equivalent to $a \leq b$?
 (a) $a * b = b$ (b) $a \oplus b = a$ (c) **$a * b = a$** (d) $a \oplus b = 1$
43. If a, b, c are any three elements in a lattice then -----.
 (a) **$(a * b) \oplus (a * c) \leq a * [b \oplus (a * c)]$** (b) $(a * b) \oplus (a * c) \geq a * [b \oplus (a * c)]$
 (c) $(a \oplus b) \oplus (a * c) \leq a * [b \oplus (a * c)]$ (d) $(a \oplus b) \oplus (a * c) \geq a * [b \oplus (a * c)]$
44. The ----- law follows from the other laws.
 (a) Absorption (b) **Idempotent** (c) Commutative (d) Associative
45. Which one of the following statements is false?
 (a) $\{1, 2, 3, 6, 9, 18\}, |$ is a bounded lattice
 (b) $[I, \leq]$ is not a bounded lattice where I is the set of all integers
 (c) **$[(0, 1), \leq]$ is a bounded lattice**
 (d) $[0, 1], \leq$ is a bounded lattice
46. Which of the following is totally ordered?
 (a) $(Z^+, |)$ (b) **(Z, \leq)**
 (c) $(P(\{a, b\}), \subseteq)$ (d) $(\{a, b, c, d\}, aRb \Leftrightarrow a = b)$
47. The Boolean algebra is a complemented ----- lattice.
 (a) supplementary (b) **distributive** (c) commutative (d) associative
48. Every chain is a ----- lattice.
 (a) **distributive** (b) bounded (c) commutative (d) associative

49. Every finite lattice is -----.

- (a) distributive (b) **bounded** (c) commutative (d) associative

Section B

Unit -I

1. Give the contrapositive, the converse and the inverse of the conditional statement “ The home team wins whenever it is raining”.
2. Build a circuit for the output $(p \vee \neg r) \wedge (\neg p \vee (q \vee \neg r))$.
3. Distinguish between theorem and conjecture.
4. Define quantifier
5. List the types of quantifiers
6. Define quantifier with restricted domains. Give Example
7. State any two rules of inference for propositional logic.
8. Distinguish between forward reasoning and backward reasoning.
9. What is called tiling of a checkerboard?
10. Define circular reasoning.
11. Discuss the usage of the phrase “without loss of generality”.

Unit -II

12. Distinguish between the method of mathematical induction and strong induction.
13. Discuss the method of strong induction.
14. State the product and sum rules.
15. State the division rule.
16. State the principle of inclusion-exclusion.
17. State the pigeonhole principle.
18. Define homogeneous recurrence relation.
19. Define non-homogeneous recurrence relation

Unit –III

20. Define a Digraph.
21. What are social networks?
22. Distinguish between simple graphs and multigraphs.
23. Discuss about Round-Robin tournament.
24. Define strongly connected and giantly connected.
25. Define degree of a vertex.
26. Define induced subgraph.
27. Discuss edge contraction.
28. What is a complete matching?
29. Compare and contrast adjacency matrix and incidence matrix.
30. Define a walk and path.

31. What is vertex connectivity?
32. What is graph isomorphism?
33. Define Euler and Hamilton circuits.

Unit –IV

34. Discuss an equivalence relation with example.
35. Define partial ordering.
36. What is reflexive closure of a relation?. Give an example.
37. Define connectivity relation.
38. Define a chain
39. Define lexicographic ordering.
40. Distinguish between least upper bound and greatest lower bound.
41. Define generating function.
42. State the alternative principle of inclusion-exclusion.

Unit –V

43. Define a lattice and give an example.
44. State any two properties of lattices.
45. State the modular and distributive inequalities.
46. Define lattice homomorphism.
47. What is an order preserving mapping?
48. Define bounded and complete lattices.
49. Define Boolean homomorphism.
50. Define join-irreducible.
51. Define Boolean algebra

Section C

Unit -I

1. State the rules of inference for propositional logic.
2. Explain the rules of inference for the following argument ‘A student in this class has not read the book’ and ‘Everyone in this class passed the first exam’ implies the conclusion ‘Someone who passed the first exam has not read the book’.
3. Prove that $\sqrt{2}$ is irrational by giving a proof by contradiction.
4. Give a direct proof of the theorem “If n is an odd integer, then n^2 is odd.
5. Prove that an universal quantifier can be distributed over a conjunction but cannot be distributed over a disjunction.
6. Prove that an existential quantifier can be distributed over a disjunction but cannot be distributed over a conjunction.
7. Express the following statements into logical expressions
 - i) The sum of two positive integers is always positive
 - ii) Everyone has exactly one best friend.

8. Use quantifiers and predicates to express the fact that $\lim_{x \rightarrow a} f(x)$ does not exist where $f(x)$ is a real-valued function of a real variable x and a belongs to the domain of f .
9. Explain the rules of inference for quantifiers.
10. Use quantifiers to express the statement that “There does not exist a woman who has taken a flight on every airline in the world”.
11. Give the proof strategies.

Unit –II

12. Show that if n is a positive integer, then $1 + 2 + \cdots + n = \frac{n(n+1)}{2}$.
13. Using mathematical induction prove that if S is a finite set with n elements where n is a non-negative integer, then S has 2^n subsets.
14. State and prove the generalized pigeonhole principle.
15. Prove that every simple polygon with at least four sides has an interior diagonal.
16. Show that any integer greater than one can be written as a product of primes.
17. Conjecture a formula for the sum of first n positive odd integers and prove using mathematical induction.
18. How many cards must be selected from a standard deck of 52 cards to guarantee that at least three cards of the same suit are chosen?
19. If n and r are integers with $0 \leq r \leq n$, then show that $P(n, r) = \frac{n!}{(n-r)!}$.
20. A valid code word of a computer system contains only an even number of 0 digits. Find the recurrence relation for the number of n -digit valid codewords.
21. Show that among $n + 1$ positive integers not exceeding $2n$ there must be an integer that divides one of the other integers.
22. Find an explicit formula for Fibonacci numbers.

Unit –III

23. Explain how biological sciences are modeled using graphs.
24. Prove that any undirected graph has an even number of vertices of odd degree.
25. Using paths check whether the following graphs are isomorphic or not.

G

H

26. Discuss the connectivity of the wheel graph W_7 .
27. Show that the property that a graph is bipartite is an isomorphic invariant.
28. Define Euler and Hamilton circuits. Show that K_n has a Hamilton circuit.

29. Let G be a graph with adjacency matrix A with respect to the ordering v_1, v_2, \dots, v_n of the vertices of the graph. Show that the number of different paths of length r from v_i to v_j where r is a positive integer equals the (i, j) th entry of A^r .
30. Show that there is a simple path between every pair of distinct vertices of a connected undirected graph.

Unit –IV

31. Prove that the relation R on a set A is transitive if and only if $R^n \subseteq R$ for $n = 1, 2, 3, \dots$
32. Suppose that the relations R_1 and R_2 on a set A are represented by the matrices
- $$M_{R_1} = \begin{bmatrix} 1 & 0 & 1 \\ 1 & 0 & 0 \\ 0 & 1 & 0 \end{bmatrix} \text{ and } M_{R_2} = \begin{bmatrix} 1 & 0 & 1 \\ 0 & 1 & 1 \\ 1 & 0 & 0 \end{bmatrix} \text{ respectively, then find the matrices representing } R_1 \cup R_2, R_1 \cap R_2, R_1^2 \text{ and } R_1 \circ R_2.$$
33. Determine whether the relations for the directed graphs shown in Figures are reflexive, symmetric, antisymmetric, and/or transitive.

34. Let R be a relation on a set A . Then show that there is a path of length n , where n is a positive integer, from a to b if and only if $(a, b) \in R^n$.
35. Discuss and prove that the transitive closure of a relation R equals the connectivity relation R^* .
36. Let R be an equivalence relation on a set S . Then the equivalence classes of R form a partition of S . Conversely, given a partition $\{A_i / i \in I\}$ of the set S , there is an equivalence relation R that has the sets $A_i / i \in I$, as its equivalence classes.
37. State and prove the principle of well-ordered induction.
38. Show that every finite nonempty poset (S, \leq) has at least one minimal element.
39. Construct the Hasse diagram representing the partial ordering $\{(a, b) / a \text{ divides } b\}$ on $\{1, 2, 3, 4, 6, 8, 12\}$. Also find the minimal and maximal elements.
40. State and prove the principle of inclusion-exclusion.
41. Use principle of inclusion – exclusion to derive a formula for the number of derangements of a set with n elements.
42. Let m and n be positive integers with $m \geq n$. Then prove that there are $n^m - C(n, 1)(n-1)^m + C(n, 2)(n-2)^m - \dots + (-1)^{n-1}C(n, n-1)1^m$ onto functions from a set with m elements to a set with n elements.

Unit –V

43. Prove that every finite lattice is bounded.
44. If (L, \leq) is a lattice, then prove that for any elements $a, b, c \in L$ laws of isotonicity hold.
45. Let (L, \leq) be a lattice. Show that for any three elements $a, b, c \in L$
- $$a \leq c \Leftrightarrow a \oplus (b * c) \leq (a \oplus b) * c$$

46. State and prove the distributive inequalities for lattices.
47. Prove that a direct product of any two distributive lattices is a distributive lattice.
48. Show that a direct product of two Boolean algebras is a Boolean algebra.
49. Illustrate with example that there are lattices which have bijective mapping but not order isomorphic.

Section D

Unit -I

1. Explain the types of quantifiers with examples.
2. State and prove the rules for negating quantified expressions.
3. Explain how a proof by cases can be used to prove a result about absolute values (i.e) the fact that $|xy| = |x||y|$ for all real numbers x and y .
4. Explain the proof methods.
5. Show that the premises ‘ It is not sunny this afternoon and it is colder than yesterday’ , ‘We will go swimming only if it is sunny’ , ‘If we do not go swimming, then we will take a canoe trip’ ‘If we take a canoe trip, then we will be home by sunset’ lead to the conclusion “We will be home by sunset”.
6. Show that the premises ‘A student in this class has not read the book’ , Everyone in this class passed the first exam’ lead to the conclusion “ Someone who passed the first exam has not read the book”.
7. Describe the constructive and non constructive existence proofs with examples.
8. Explain the type of fallacies.
9. Can we tile the standard 8×8 checkerboard obtained by deleting the upper left and lower right corner squares of the board using dominoes?. Justify your answer.
10. Can we tile the standard 8×8 checkerboard obtained by one of its four corners removed using straight triominoes?. Justify your answer.

Unit –II

11. Using strong induction prove that a simple polygon with n sides, where n is an integer with $n \geq 3$ can be triangulated into $n - 2$ triangles.
12. Use well ordering property to prove division algorithm.
13. Prove that every sequence of $n^2 + 1$ distinct real numbers contains a subsequence of length $n + 1$ that is either strictly increasing or strictly decreasing.
14. If c_1, c_2 are real numbers and suppose that $r^2 - c_1r - c_2 = 0$ has two distinct roots r_1, r_2 , then prove that the sequence $\{a_n\}$ is a solution of the recurrence relation $a_n = c_1a_{n-1} + c_2a_{n-2}$ iff $a_n = \alpha_1r_1^n + \alpha_2r_2^n$ for $n = 0, 1, 2, \dots$, where α_1 and α_2 are constants
15. Solve the recurrence relation : $a_n = 6a_{n-1} - 9a_{n-2} + 3^n$.
16. Solve the recurrence relation : $a_n = 4a_{n-1} - 3a_{n-2} + 2^n + n + 3$ with initial conditions $a_0 = 1, a_1 = 4$.

Unit –III

17. Describe some special types of graph models that are used to represent social networks.
18. State and prove Hall's Marriage theorem.
19. State and prove the necessary and sufficient condition for a multigraph to have Euler circuit.
20. State and prove Dirac theorem.
21. State and prove the necessary and sufficient condition for a multigraph to have Euler path but no Euler circuit.
22. State and prove Ore's theorem
23. Using paths determine whether the following graphs are isomorphic.

24. Find the cut vertices, cut edges of the following graphs. Also discuss the vertex connectivity and edge connectivity.

Unit –IV

25. Which of the following relations are transitive?

- (i) $R_1 = \{(a, b)/a \leq b\}$,
- (ii) $R_2 = \{(a, b)/a > b\}$,
- (iii) $R_3 = \{(a, b)/a = b \text{ or } a = -b\}$,
- (iv) $R_4 = \{(a, b)/a = b\}$,
- (v) $R_5 = \{(a, b)/a = b + 1\}$,
- (vi) $R_6 = \{(a, b)/a + b \leq 3\}$

Also find the relations

$$R_1 \cup R_2, R_1 \cap R_3, R_4 \oplus R_5, R_5 - R_6 \text{ and } R_2 - R_4$$

26. Let A be a set with n elements, and let R be a relation on A. If there is a path of length at least one in R from a to b, then show that there is such a path with length not exceeding n.

Moreover prove that if $a = b$, if there is a path of length at least one in R from a to b , then there is such a path with length not exceeding $n - 1$.

27. Explain Warshall's algorithm.
28. Find the number of solutions of $e_1 + e_2 + e_3 = 17$ where e_1, e_2, e_3 are nonnegative integers with $2 \leq e_1 \leq 5$, $3 \leq e_2 \leq 6$, and $4 \leq e_3 \leq 7$
29. Use generating functions to find the number of r -combinations from a set with n elements when repetition of elements is allowed.
30. Suppose that a valid codeword is an n -digit number in decimal notation containing an even number of 0s. Let a_n denote the number of valid codewords of length n . The recurrence relation is $a_n = 8a_{n-1} + 10^{n-1}$ with the initial condition $a_1 = 9$. Use generating functions to find an explicit formula for a_n .
31. A total of 1232 students have taken a course in Spanish, 879 have taken a course in French, and 114 have taken a course in Russian. Further, 103 have taken courses in both Spanish and French, 23 have taken courses in both Spanish and Russian, and 14 have taken courses in both French and Russian. If 2092 students have taken at least one of Spanish, French, and Russian, how many students have taken a course in all three languages?
32. Find the number of primes not exceeding 100 using principle of inclusion – exclusion.
33. If R is an equivalence relation on a set A , then prove that the following statements are equivalent
 - (i) aRb
 - (ii) $[a] = [b]$
 - (iii) $[a] \cap [b] \neq \emptyset$.

Unit -V

34. State and prove the modular inequalities for lattice
35. Show that every chain is a distributive lattice.
36. Let (L, \leq) be a lattice in which $*$ and \oplus are the operations meet and join respectively. Prove that the following statements are equivalent for any $a, b \in L$.
 - (i) $a \leq b$
 - (ii) $a * b = a$
 - (iii) $a \oplus b = b$
37. If $(L, *, \oplus)$ is a distributive lattice, then prove that for any three elements $a, b, c \in L$,

$$(a * b = a * c) \wedge (a \oplus b = a \oplus c) \Rightarrow b = c$$
38. Prove that a partial ordering relation on L follows as a consequence of properties of the operations $*$ and \oplus where R is defined as $aRb \Leftrightarrow a * b = a \Leftrightarrow a \oplus b = b$.

ST.MARY'S COLLEGE (AUTONOMOUS), THOOTHUKUDI – 628001.

QUESTION BANK

III B.Sc Mathematics

Subject Code: 21UMAC61

Semester VI

Core I – Complex Analysis

Part:A

Unit: I

1. If z_1 and z_2 are complex numbers then $|z_1 - z_2|^2 + |z_1 + z_2|^2 = \dots\dots\dots$
a) $2(|z_1|^2 + |z_2|^2)$ b) $2(|z_1|^2 - |z_2|^2)$ c) 0 d) $|z_1|^2 + |z_2|^2$.
2. If z is a complex number $\dots\dots\dots$
a) $\operatorname{Re}(z) \leq |z|$ b) $|z_1 + z_2| \geq |z_1| + |z_2|$ c) $\operatorname{Im}(z) = |z|$ d) $z\bar{z} = |z|$
3. The inverse point of any point α with respect to the unit circle $|z| = 1$ is $\dots\dots\dots$
a) $\bar{\alpha}$ b) $\frac{1}{\alpha}$ c) $\frac{1}{\bar{\alpha}}$ d) $-\alpha$
4. The Cauchy – Riemann equation can be put in the complex form as $\dots\dots\dots$
a) $f_x = f_y$ b) $f_x = if_y$ c) $f_x = -if_y$ d) $-f_x = if_y$.
5. The equation $z\bar{z} + \bar{\alpha}z + \alpha\bar{z} + \beta = 0$ represents $\dots\dots\dots$
a) a circle, β real, $\alpha\bar{\alpha} - \beta = 0$ b) a circle, β real, $\alpha\bar{\alpha} - \beta > 0$
c) a straight line d) an ellipse, β real, $\alpha\bar{\alpha} - \beta > 0$
6. One value of $\arg z$ where $z = i$ is $\dots\dots\dots$
a) $-\pi/2$ b) $\pi/2$ c) π d) 0
7. The complex number represented by the point $(0, 1, 0)$ is $\dots\dots\dots$
a) i b) $-i$ c) $1 + i$ d) $(1 - i)$
8. Which of the following is the magnitude of the complex number?
a) $x^2 + y^2$ b) x^2 c) $\sqrt{x^2 + y^2}$ d) x^2 .
9. A non empty open connected subset of C is called a $\dots\dots\dots$ in G .
a) domain b) region c) space d) plane.
10. If $f(z)$ is analytic then $\dots\dots\dots$ is analytic.
a) $\overline{f(z)}$ b) $f'(\bar{z})$ c) $f(\bar{z})$ d) $\overline{f(\bar{z})}$.
11. If $f(z) = u + iv$, then $\frac{\partial(u,v)}{\partial(x,y)} = \dots\dots\dots$
a) $f'(z)$ b) $|f'(z)|$ c) $|f'(z)|^2$ d) $|f(z)|^2$.

Unit: II

12. The transformation $T(z) = \bar{z}$ represents $\dots\dots\dots$
a) reflexion on x axis b) reflexion on y axis
c) reflexion of $y = x$ d) translation of $y = x$
13. The image of the strip $0 < x < 1$ under the transformation $w = iz$ is $\dots\dots\dots$
a) the strip $0 < v < 1$ b) circle c) straight line d) rectangle

14. Any bilinear transformation having ∞ as the only fixed point is a
 a) magnification b) contraction **c) translation** d) inversion
15. _____ is the scale factor at the point $z = 2 + i$ under the mapping $w = z^2$.
 a) 2 **b) $2\sqrt{5}$** c) $2\sqrt{2}$ d) $3\sqrt{2}$
16. The angle of rotation for the transformation $\omega = \frac{1}{z}$ at $z = i$ is.....
 a) **0** b) π c) $\frac{\pi}{2}$ d) $\frac{\pi}{4}$
17. _____ is called Laplace's equation.
 a) $\frac{\partial u}{\partial x} + \frac{\partial u}{\partial y} = 0$ b) $\frac{\partial^2 u}{\partial x^2} = 0$ **c) $\frac{\partial^2 u}{\partial x^2} + \frac{\partial^2 u}{\partial y^2} = 0$** d) $\frac{\partial^2 u}{\partial y^2} = 0$.
18. _____ is the harmonic conjugate of $u = x^2 - y^2$.
 a) $2xy$ **b) $2xy + c$** c) $2x$ d) $2y$.
19. _____ is the scale factor at the point $z = 1 + i$ under the mapping $w = z^2$
 a) 2 b) $\sqrt{2}$ c) $2\sqrt{3}$ **d) $2\sqrt{2}$.**
20. _____ is the harmonic conjugate of $u = e^x \cos y$.
 a) $e^x \cos y$ **b) $e^x \sin y$** c) $\cos y$ d) $\sin y$.

Unit: III

21. In theorem a function is analytic at all points inside and on a simple closed curve C.
 a) **Cauchy's** b) Taylor's c) Morera's d) Liouville's
22. A region D is said to be if every simple closed curve lying in D.
 a) Connected **b) Simply connected** c) analytic d) isolated
23. In Maximum modulus theorem $|f(z)|$ attains its maximum value on the
 a) interior b) exterior **c) boundary** d) region
24. The derivative of an analytic function is
 a) zero **b) analytic** c) not analytic d) connected
25. A bounded entire function in the complex plane is.....
 a) zero **b) constant** c) bounded d) connected
26. Cauchy's theorem was first proved by using theorem.
 a) connected b) Morera's c) Taylor's **d) Green's**
27. Every polynomial of degree ≥ 1 has atleast zero in C.
 a) n **b) one** c) two d) three
28. The converse of Cauchy's theorem is..... theorem
 a) Fundamental b) Taylor's **c) Morera's** d) Liouville's
29. The value of $\frac{1}{2\pi i} \int_C \frac{z^2+5}{z-3} dz$ where C is $|z| = 4$ is.....
 a) **14** b) 12 c) 4 d) 0

30. The value of the function at the centre is equal to the of the value of the function on the circumference.
 a) Interior b) boundary c) **mean** d) zero

Unit:IV

31. In a Taylor's series $f(z)$ be in a region D.
 a) zero b) **analytic** c) not analytic d) differentiable
32. Taylor's series expansion of $f(z)$ about the point zero is.....
 a) analytic b) not analytic c) **Maclaurin's series** d) zero
33. In Laurent's theorem C_1 and C_2 denote
 a) regions b) circles c) **concentric circles** d) annulus
34. The series represents an analytic function in
 a) $|z| > r$ b) $|z| < r$ c) $|z| = r$ d) $|z| \geq r$
35. If a is a zero of order for $f(z)$ then $\varphi(a)$
 a) $= 0$ b) > 0 c) < 0 d) $\neq 0$
36. If $f(z)$ is analytic and not identically zero in D then all zeros of $f(z)$ is.....
 a) non zero b) **isolated** c) not isolated d) $= 0$
37. If $f(z)$ is analytic and $f(z) = 0$ has a limit point in D then $f(z)$ is in D.
 a) zero b) **identically zero** c) identically non zero d) non zero
38. A pole of order 1 is called a pole.
 a) **simple** b) double c) singular d) non singular
39. An isolated singularity a of $f(z)$ is a pole iff.....
 a) $\lim f(z) = 0$ b) **$\lim f(z) = \infty$** c) $\lim f(z) = -\infty$ d) $\lim f(z) = 1$
40. A pole of order two is called a pole.
 a) simple b) single c) zero d) **double**

Unit:V

41. The residue of $f(z)$ at a is denoted by
 a) $\text{Res} \{ f(z) ; 0 \}$ b) **$\text{Res} \{ f(z) ; a \}$** c) $\text{Res} \{ f(z)/a ; a \}$ d) $\text{Res} \{ f(z)/a ; 0 \}$
42. The residue of $\cot z$ at $z = 0$ is.....
 a) 0 b) 2 c) 3 d) **1**
43. A polynomial of degree n with complex coefficient has zeros in C.
 a) 2 b) $n+1$ c) **n** d) $n-1$
44. We can deduce Fundamental theorem of Algebra from..... theorem.
 a) **Rouche's** b) Taylor's c) Argument d) Fundamental
45. The residue of $\cot z$ at $z = 0$ is
 a) 0 b) **1** c) 5 d) -1
46. In Cauchy's residue theorem $f(z)$ is analytic inside and oncurve.
 a) closed b) open c) **simple closed** d) simple open
47. In Rouche's theorem $f(z)$ and have the same number of zeros.

- a) $f(z)g(z)$ b) $f(z)+g(z)$ c) $f(z)-g(z)$ d) $f(z)/g(z)$
48. We use Cauchy's theorem for evaluating types of definite integrals.
 a) **real** b) complex c) finite d) infinite
49. The poles of $f(z)$ are determined by the zeros of the equation
 a) $f(z) = 0$ b) $h(z) = 0$ c) $g(z) = 0$ d) $f(z) = 1$
50. In Jordan's lemma $f(z)$ is analytic in the except at a finite number of poles.
 a) centre half b) lower half c) last half d) **upper half**

Part : B

Unit :I

1. Find the square root of $1+i$.
2. State and prove triangular inequality.
3. Prove that $|z_1 - z_2| \geq ||z_1| - |z_2||$
4. State and prove Complex form of C-R equations.
5. Verify C-R equations for the function $f(z) = z^3$.
6. Prove that $f(z) = z \operatorname{Im} z$ is differentiable only at $z=0$ and find $f'(0)$.
7. Define analytic function.
8. Define neighbourhood of a point.
9. State Cauchy Riemann equations in Cartesian coordinates.
10. State Cauchy Riemann equations in polar coordinates.

Unit :II

11. Define harmonic function.
12. Determine the angle of rotation and scale factor at the point $z=1+i$ under the mapping $w = z^2$.
13. Prove that the real and imaginary parts of an analytic function are harmonic functions.
14. Explain translation.
15. Explain rotation.
16. Explain magnification.
17. Explain Inversion.
18. Define bilinear transformation.
19. Define Cross Ratio.
20. Find the invariant points of $w = \frac{1+z}{1-z}$

Unit :III

21. Define piecewise differential curve.
22. Define length.
23. Define exact.

24. Prove that $\int_C \frac{dz}{z-a} = 2\pi i$ where C is the circle with centre a and radius r .
25. Define simply connected region.
26. Define multiply connected region.
27. Evaluate $\int_C \frac{dz}{z-3}$ where C is the circle $|z - 2| = 5$.
28. State Arithmetic mean theorem.
29. State and prove Cauchy's inequality.
30. Evaluate $\int_C \frac{\sin z}{(z-\frac{\pi}{2})^2} dz$ where C is the circle $|z| = 2$.

Unit : IV

31. State Taylor's series.
32. State Maclaurin's series.
33. State Laurent's series.
34. Define zero of order r .
35. Define singular point.
36. Define isolated singularity.
37. Define Removable singularity.
38. Define poles.
39. Define essential singularity.
40. Define simple pole and double pole.

Unit:V

21. Define residue.
22. Find the residue of $\cot z$ at $z=0$.
23. State Cauchy's residue theorem.
24. State Argument theorem.
25. State Rouché's theorem.
26. State the fundamental theorem of algebra.
27. Prove that $\int_C \frac{dz}{2z+3} = \pi i$ where C is $|z| = 2$.

Part:C

Unit:I

1. Prove that the complex numbers z_1 and z_2 are inverse points with respect to a circle $z\bar{z} + \alpha\bar{z} + \bar{\alpha}z + \beta = 0$ iff $z_1\bar{z}_2 + \bar{\alpha}z_1 + \alpha\bar{z}_2 + \beta = 0$.
2. Find the point $Q = (x_1, x_2, x_3)$ on the sphere S that represents the complex number $z = x + iy$.
3. Prove that the following functions are nowhere differentiable.
 - (i) $f(z) = \operatorname{Re} z$.
 - (ii) $f(z) = e^x(\cos y - i \sin y)$.
4. Prove that $f(z) = \sin x \cosh y + i \cos x \sinh y$ is differentiable at every point.

5. Prove that $u = 2x - x^3 + 3xy^2$ is harmonic and find its harmonic conjugate, Also find the corresponding analytic function.
6. If $u = e^x (x \cos y - y \sin y)$, find $f(z) = u + iv$ so that $f(z)$ is analytic.
7. Prove that there is a one – one correspondence between the points on the sphere S and the extended complex plane.
8. Find the inverse point of $-i$ with respect to the circle $2z\bar{z} + (i - 1)z - (i + 1)\bar{z} = 0$.
9. Find the square root of $1 + i$.
10. Is $f(z) = \sin x \cosh y + i \cos x \sinh y$ is differentiable? Prove your claim.

Unit:II

11. If $f(z)$ is analytic, prove that: $\left(\frac{\partial^2}{\partial x^2} + \frac{\partial^2}{\partial y^2}\right) |f(z)|^2 = 4 |f'(z)|^2$.
12. Show that by means of the inversion $w = \frac{1}{z}$ the circle given by $|z - 3| = 5$ is mapped into the circle $\left|w + \frac{3}{16}\right| = \frac{5}{16}$.
13. Find the image of the circle $|z - 2i| = 2$ under $w = \frac{1}{z}$.
14. Find the bilinear transformation which sends the points $-2, 0, 2$ into the points $0, i, -i$ respectively.
15. Find the bilinear transformation which maps the points $z_1 = 2, z_2 = i, z_3 = -2$ onto $w_1 = 1, w_2 = i, w_3 = -1$ respectively.
16. Prove that $u = 2x - x^3 + 3xy^2$ is harmonic and find its harmonic conjugate, Also find the corresponding analytic function.
17. Find the bilinear transformation which maps the points $z_1 = 0, z_2 = -i, z_3 = -1$, in to the points $\omega_1 = i, \omega_2 = 1, \omega_3 = 0$.
18. Show that C-R equations can be used to obtain a harmonic conjugate of a given harmonic function.
19. Derive the Milne-Thompson method.
20. Given $v(x,y) = x^4 - 6x^2y^2 + y^4$ find $f(z) = u(x, y) + v(x, y)$ such that $f(z)$ is analytic.
21. If $f(z) = u + iv$ is analytic and $f(z) \neq 0$, Prove that (i) $\left(\frac{\partial^2}{\partial x^2} + \frac{\partial^2}{\partial y^2}\right) \log |f(z)| = 0$.
(ii) $\nabla^2 \arg f(z) = 0$
22. ϕ and ψ are functions of x and y satisfying Laplace's equation. If $u = \phi_y - \psi_x$ and $v = \phi_x + \psi_y$ prove that $u + iv$ is analytic.
23. Find the points where the following mappings are conformal. Also find the critical points.
(i) $w = z + \frac{1}{z}$ (ii) $w = e^z$.

24. Show that the transformation $w = \frac{5-4z}{4z-2}$ maps the unit circle $|z| = 1$ into a circle of radius unity and centre $-\frac{1}{2}$.
25. Prove that $u = 2x - x^3 + 3xy^2$ is harmonic and find its harmonic conjugate, Also find the corresponding analytic function.

Unit:III

26. Prove that $\left| \int_a^b f(t) dt \right| \leq \int_a^b |f(t)| dt$.
27. Prove that $\int_{-c} f(z) dz = - \int_c f(z) dz$.
28. Prove that $\left| \int_c f(z) dz \right| \leq Ml$ where $M = \max \{ |f(z)| / z \in C \}$.
29. Evaluate $\int_c f(z) dz$ where $f(z) = y - x - i3x^2$ and C is the line segment from $z = 0$ to $z = 1+i$.
30. Prove that $\int \frac{dz}{(z-a)^n} = \begin{cases} 0 & \text{if } n \neq 0 \\ 2\pi i & \text{if } n = 1 \end{cases}$ where C is the circle with centre a and radius r and n .
31. Evaluate $\int \bar{z} dz$ from $z = 0$ to $z = 4 + 2i$ along the curve C consisting of the line segment from $z = 0$ to $z = 2i$ followed by the line segment from $z = 2i$ to $z = 4 + 2i$.
32. Evaluate $\int \frac{e^z}{z^2 + 1} dz$ where C is positively oriented circle $|z - i| = 2$.
33. State and prove Cauchy's inequality.
34. State and prove Liouville's theorem.
35. State and prove Morera's theorem.
36. Evaluate $\int \frac{\sin 2z dz}{(z - \pi i/4)^4}$ where C is $|z| = 1$.

Unit:IV

37. State and prove Maclaurin's series.
38. Expand $\cos z$ into a Taylor's series about $z = \pi/2$ and determine the region of convergence.
39. Expand $\sin z$ in a Taylor's series about $z = \pi/4$ and determine the region of convergence.
40. Expand ze^{2z} in a Taylor's series about $z = -1$ and determine the region of convergence.
41. Find the Taylor's series to represent $\frac{z^2 - 1}{(z+2)(z+3)}$ in $|z| < 2$.
42. i) Find the Laurent's series expansion of $f(z) = z^2 e^{1/2}$ about $z = 0$.

- ii) Find the Laurent's series expansion for $\frac{z}{(z+1)(z+2)}$ about $z = -2$.
43. Expand $\frac{1}{z(z-1)}$ as Laurent's series
- about $z = 1$ in powers $z - 1$
 - about $z = 0$ in powers of z .
44. Expand $\frac{1}{z^2 - 3z + 2}$ in Laurent's series valid in the region $1 < |z| < 2$.
45. If $f(z) = \frac{z+4}{(z+3)(z-1)^2}$ find Laurent's series expansions in
- $0 < |z - 1| < 4$
 - $|z - 1| > 4$.
46. Expand $f(z) = \frac{e^{2z}}{(z-1)^3}$ about $z = 1$ as a Laurent's series. Also find the region of convergence of the series.
47. Suppose $f(z)$ is analytic in a region D and it is not identically zero in D then prove that the set of all zeros of $f(z)$ is isolated.
48. State and prove Riemann's theorem.
49. If $f(z)$ is a function having a as an isolated singular point. Then prove the following are equivalent:
- a is a pole of order r for $f(z)$.
 - $f(z)$ can be written in the form $f(z) = \frac{1}{(z-a)^r} \theta(z)$ where $\theta(z)$ has a removable singularity at $z = a$ and $\lim_{z \rightarrow a} \theta(z) \neq 0$.
 - a is a zero of order r for $\frac{1}{f(z)}$.
50. Determine and classify the singular points of $f(z) = \frac{z}{e^z - 1}$
51. Determine and classify the singular points of $\frac{1}{(2\sin z - 1)^2}$

Unit:V

52. If a is a simple pole for $f(z)$ and $f(z) = \frac{g(z)}{z-a}$ where $g(z)$ is analytic at a and $g(a) \neq 0$ then prove that $\text{Res}\{f(z); a\} = g(a)$.
53. If a be a pole of order $m > 1$ for $f(z)$ and $f(z) = \frac{g(z)}{(z-a)^m}$ where $g(z)$ is analytic at a and $g(a) \neq 0$ then prove that $\text{Res}\{f(z); a\} = \frac{g^{(m-1)}(a)}{(m-1)!}$

54. Find the residue of $\frac{z+1}{z^2 - 2z}$ at its poles.
55. Find the residue of $\frac{1}{(z^2 + a^2)^2}$ at $z = ai$.
56. Use Laurent's series to find the residues of $\frac{e^{2z}}{(z-1)^2}$ at $z = 1$.
57. State and prove Cauchy's residue theorem.
58. State and prove Fundamental theorem of algebra.
59. Evaluate $\int_C \frac{dz}{z^2 e^z}$ where $C = \{z; |z| = 1\}$.
60. Evaluate $\int_C \tan z dz$ where C is $|z| = 2$.
61. Prove that $\int_C \frac{e^{2z}}{(z-1)^3} dz = \frac{4\pi i}{e^2}$ where C is $|z| = \frac{3}{2}$
62. Use residue calculus to evaluate $\int_C \frac{3 \cos z}{2i - 3z} dz$ where C is the unit circle.
63. Evaluate $\int_C \frac{e^z dz}{(z+2)(z-1)}$ where C is the circle $|z - 1| = 1$.
64. Evaluate $\int_0^{2\pi} \frac{d\theta}{5+4\sin\theta}$
65. Using Cantour integration evaluate $\int_0^{2\pi} \frac{d\theta}{13+5\sin\theta}$
66. Use Cantour integration technique to find the value of $\int_0^{2\pi} \frac{d\theta}{2+\cos\theta}$
67. Prove that $\int_0^\infty \frac{\cos x dx}{1+x^2} = \frac{\pi}{2e}$
68. Prove that $\int_0^\infty \frac{\cos ax dx}{(x^2 + 1)^2} = \frac{\pi}{4} (a+1)e^{-a}$

Part:D

Unit:I

1. State and prove Cauchy Riemann equations in Cartesian coordinates.
2. State and prove Cauchy Riemann equations in polar coordinates.
3. Find the analytic function $f(z) = u + iv$ if $u + v = \frac{\sin 2x}{\cosh 2y - \cos 2x}$.
4. Given that the function $w = z^3$ where $w = u + iv$ show that u and v satisfy the Cauchy Riemann equations. Prove that the families of curves $u = c_1$ and $v = c_2$ where c_1 and c_2 are constants are orthogonal to each other.

Unit:II

5. (i) Define the rotation transformation.
(ii) Find the image of the strip $2 < x < 3$ under $w = \frac{1}{z}$.
6. (i) Show that any bilinear transformation preserves cross ratio.
(ii) Show that $w = \frac{2z+3}{z-4}$ maps the circle $z\bar{z} - 2(z + \bar{z}) = 0$ into a straight line given by $2(w + \bar{w}) + 3 = 0$.
7. (i) Prove that any bilinear transformation can be expressed as a product of elementary transformations.
(ii) Prove that a bilinear transformation $w = \frac{az+b}{cz+d}$ where $ad - bc \neq 0$ maps the real axis into itself if and only if a, b, c, d are real.
8. Prove that any bilinear transformation which maps the unit circle $|z| = 1$ onto the unit circle $|w| = 1$ can be written in the form $w = e^{i\lambda} \left[\frac{z - \alpha}{\bar{\alpha}z - 1} \right]$ where λ is real. Also prove that the transformation maps the circular disc $|z| \leq 1$ onto the circular disc $|w| \leq 1$ iff $|\alpha| \leq 1$.
9. (i) prove that $u = 2x - x^3 + 3xy^2$ is harmonic and find its harmonic conjugate. Also find the corresponding analytic function.
(ii) Find the analytic function $f(z) = u + iv$ if $u + v = \frac{\sin 2x}{\cosh 2y - \cos 2x}$
10. (i) Show that a bilinear transformation preserves inverse points.
(ii) Show that the transformation $\bar{a}wz - bw - \bar{b}z + a = 0$ maps circle $|z| = 1$ into circle $|w| = 1$, if $|b| \neq |a|$.
11. (i) Define Harmonic function
(ii) Show that $u = \log \sqrt{x^2 + y^2}$ is harmonic and determine its conjugate and hence find the corresponding analytic function.
12. (i) If $u(x, y)$ is a harmonic function in a region D prove that $f(z) = \frac{\partial u}{\partial x} - i \frac{\partial u}{\partial y}$ is analytic in D .
(ii) Find the analytic function $f(z) = u + iv$ given that $u - v = e^x(\cos y - \sin y)$.
13. Given the function $w = z^3$ where $w = u + iv$. Show that u and v satisfy the C - R equations. Prove that the families of curves $u = c_1$ and $v = c_2$ are orthogonal to each other.
14. Let f be an analytic function defined in a region D . Let $z_0 \in D$. If $f'(z) \neq 0$ then prove that f is conformal at z_0 .
15. Prove that any bilinear transformation which maps the real axis onto unit circle $|w| = 1$ can be written in the form $w = e^{i\lambda} \left[\frac{z - \alpha}{z - \bar{\alpha}} \right]$ where λ is real, also show that this transformation maps the upper half plane $\text{Im } z \geq 0$ onto the unit circular disc $|w| \leq 1$ iff $\text{Im } \alpha > 0$.

Unit:III

16. Show that $\int_c |z|^2 dz = -1 + i$ where c is the square with vertices $O(0, 0)$, $A(1, 0)$, $B(1, 1)$ and $C(0, 1)$.

17. State and prove Cauchy's theorem.
18. State and prove Cauchy's theorem for multiply connected regions.
19. State and prove Cauchy's integral formula.
20. State and prove Maximum modulus theorem.
21. State and prove theorem on Higher derivative.
22. State and prove Fundamental theorem of algebra.

Unit:IV

23. State and prove Taylor's theorem.
24. Expand $\frac{-1}{(z-1)(z-2)}$ as a power series in z in the regions
 - (i) $|z| < 1$ (ii) $1 < |z| < 2$ (iii) $|z| > 2$.
25. State and prove Laurent's theorem.
26. Expand $f(z) = \frac{z}{(z-1)(2-z)}$ in a Laurent's series valid for
 - (i) $|z| < 1$ (ii) $|z| > 2$ (iii) $1 < |z| < 2$ (iv) $|z-1| > 1$ (v) $0 < |z-2| < 1$.
27. Find the Laurent's series expansion of the function $\frac{z^2 - 1}{(z+2)(z+3)}$ valid in the annular region $2 < |z| < 3$.
28. For the function $f(z) = \frac{2z^3 + 1}{z(z+1)}$ find
 - (i) Taylor's series valid in a neighbourhood of $z = i$.
 - (ii) Laurent's series valid within an annulus of which centre is the origin.

Unit:V

29. Find the residue of
 - (i) $\frac{1}{z - \sin z}$ at its poles.
 - (ii) $\frac{2e^z}{(z-1)^3}$ at its poles.
30. State and prove Argument theorem.
31. State and prove Rouché's theorem.
32. Evaluate $\int_C \frac{z+1}{z^2 + 2z+1} dz$ using (i) Cauchy's integral formula
(ii) Residue theorem

where C is the circle $|z + 1 + i| = 2$.
33. Show that the function $2 + z^2 - e^{iz}$ has precisely one zero in the open upper half plane.
34. Prove that $\int_0^{2\pi} \frac{d\theta}{1 + a \sin \theta} = \frac{2\pi}{\sqrt{1-a^2}}$

35. Prove that $I = \int_0^\pi \frac{a \, d\theta}{a^2 + \sin^2 \theta} = \frac{\pi}{\sqrt{a^2 + 1}}$ where $a > 0$.

36. Prove that $\int_{-\infty}^\infty \frac{\sin x \, dx}{x^2 + 4x + 5} = -\frac{\pi \sin 2}{e}$

37. Evaluate $\int_0^\infty \frac{x \sin x \, dx}{x^2 + a^2}$

38. Prove that $\int_0^\infty \frac{\sin x \, dx}{x} = \frac{\pi}{2}$

.....

9. In the discrete metric space M the diameter of $A = \{1, 5, 7, 9\}$ is _____.
 (a) 0 **(b) 1** (c) 9 (d) 8.
10. In (\mathbb{R}, d) the diameter of $[0, 1] \cap [2, 3] =$ _____.
 (a) 0 **(b) $-\infty$** (c) 4 (d) 3.
11. In \mathbb{R} with usual metric, for a $\epsilon \mathbb{R}$ the open ball $B(a, r) =$ _____.
 (a) **$(a - r, a + r)$** (b) $[a - r, a + r)$ (c) $[-r, r]$ (d) $[a - r, a + r]$.
12. In \mathbb{R} with usual metric the open ball $B(-1, 1)$ is _____.
 (a) $[-2, 0]$ (b) $[-2, 0)$ (c) $[-1, 1)$ **(d) $(-2, 0)$.**
13. In $[0, 1]$ with usual metric open ball $B(0, 1/4)$ is _____.
 (a) $(-1/4, 1/4)$ **(b) $[0, 1/4)$** (c) $(-1/4, 0)$ (d) $(0, 1/4)$.
14. If M is a discrete metric space then $B(a, 2) =$ _____.
 (a) $\{a\}$ **(b) M** (c) \emptyset (d) 2
15. In \mathbb{R} with usual metric the incorrect statement is _____.
 (a) any open interval (a, b) is an open set (b) $(-\infty, a)$ is an open set
 (c) (a, ∞) is an open set **(d) $\{0\}$ is an open set**
16. In any metric space (M, d) the incorrect statement is _____.
 (a) \emptyset is open (b) union of any family of open sets is open
 (c) M is open **(c) intersection of any number of open sets is open.**
17. In \mathbb{R} with usual metric the correct statement is _____.
 (a) $[0, 1)$ is an open set **(b) $(0, 1)$ is an open set** (c) \mathbb{Q} is open (d) \mathbb{Z} is open.
18. Let (M, d) be a metric space. Let A and B be subsets of M . The incorrect statement is _____.
 (a) A is open $\Leftrightarrow A = \text{Int } A$ (b) $A \subseteq B \Rightarrow \text{Int } A \subseteq \text{Int } B$
 (c) **$\text{Int}(A \cup B) = \text{Int } A \cup \text{Int } B$** (d) $\text{Int}(A \cap B) = \text{Int } A \cap \text{Int } B$.
19. Which of the following is not true in a metric space _____.
 (a) finite union of open sets is open

- (b) finite intersection of open sets is open
- (c) arbitrary union of open sets is open
- (d) arbitrary intersection of open sets is open.**

UNIT – II

20. In \mathbb{R} with usual metric $B[a, r] =$ _____.
 (a) $[a - r, a + r)$ (b) $[a - r, a + r]$ (c) $[-r, r]$ (d) $[a - r, a + r]$.
21. In \mathbb{R} with usual metric $[a, b]$ is _____.
 (a) **neither open nor closed** (b) closed (c) open (d) both open and closed.
22. \mathbb{Q} is not closed, the \mathbb{Q}^c is _____.
 (a) not closed but open (b) not open but closed
 (c) both open and closed **(d) neither open nor closed.**
23. Let $A = [0, 1]$, then $\bar{A} =$ _____.
 (a) $(0, 1)$ (b) $[0, 1)$ (c) $(0, 1]$ **(d) $[0, 1]$**
24. Let $A = [0, 1)$, then $D(A) =$ _____.
 (a) $(0, 1)$ **(b) $[0, 1]$** (c) $[0, 1)$ (d) $(0, 1]$
25. $D(\mathbb{Q} \times \mathbb{Q}) =$ _____.
 (a) \mathbb{R} (b) \mathbb{Z} (c) \mathbb{Q} **(d) $\mathbb{R} \times \mathbb{R}$.**
26. Choose the correct statement:
 (a) Any finite subset of a metric space has a limit point.
 (a) Any finite subset of a metric space has finite number of limit point.
 (a) Any finite subset of a metric space has infinite number of limit point.
(d) Any finite subset of a metric space has no limit point.
27. In \mathbb{R} with usual metric every singleton set is _____.
 (a) **closed** (b) open (c) both closed and open (d) neither closed nor open.

28. If $A = \{1, \frac{1}{2}, \frac{1}{3}, \dots\}$ then the derived set of A is _____.
 (a) $\{1\}$ (b) $\{0\}$ (c) A (d) $\{0, 1\}$

29. Which one of the following is a complete metric space in \mathbb{R} ?
 (a) \mathbb{Q} (b) $(0, 1)$ (c) $[0, 1]$ (d) $\{1, \frac{1}{2}, \frac{1}{3}, \dots\}$.

UNIT- III

30. Choose the incorrect statement:

- (a) \mathbb{R} with usual metric is complete (b) \mathbb{C} with usual metric is complete
 (c) **\mathbb{Q} with usual metric is complete** (d) Any discrete metric is complete

31. Which of the following subsets of \mathbb{R} is complete?

- (a) (a, b) (b) $[a, b)$ (c) $(a, b]$ (d) **$[a, b]$**

32. A subspace of a _____ metric space need not be complete

- (a) discrete (b) usual (c) **complete** (d) complex.

33. In cantor's intersection theorem $\bigcap_{n=1}^{\infty} F_n$ contains exactly _____.

- (a) ten points (b) **one point** (c) four points (d) five points.

34. In Cantor's intersection theorem $\bigcap_{n=1}^{\infty} F_n$ may be empty if each F_n is _____.

- (a) **not closed** (b) closed (c) open (d) both open and closed.

35. Which one of the following is of first category?

- (a) \mathbb{R} (b) **\mathbb{Q}** (c) (a, b) (d) $[a, b]$

36. Any complete metric space is _____.

- (a) of First category (b) **of Second category** (c) Both (a) and (b) (d) Dense set.

37. Which of the following metric space is not complete under usual metric $d(x, y) = |x - y|$.

- (a) $[0, 1]$ (b) **\mathbb{Q}** (c) \mathbb{R} (d) $[-1, 1]$.

UNIT- IV

38. A metric space M is said to be _____ if M cannot be represented as the union of two disjoint non-empty open sets.

- (a) discrete (b) disconnected (c) **connected** (d) continuous.

39. M is connected iff every continuous function $f : M \rightarrow \{0, 1\}$ is _____.
 (a) onto (b) **not onto** (c) one-one (d) bijection.
40. A subspace of \mathbb{R} is connected if it is _____.
 (a) not an interval (b) **an interval** (c) compact (d) open.
41. In \mathbb{R} any interval containing more than one point is _____.
 (a) countable (b) closed (c) compact (d) **uncountable**.
42. continuous image of a connected space is _____.
 (a) **connected** (b) disconnected (c) open (d) closed.
43. Which of the following is both connected and compact?
 (a) $(0,1)$ (b) \mathbb{R} (c) **$[0,1]$** (d) $\{1, \frac{1}{2}, \frac{1}{3}, \dots\}$.
44. M is a connected discrete metric space with n points where n is _____.
 (a) **1** (b) 2 (c) 3 (d) 4.
45. Which of the following is a connected subset of \mathbb{R} ?
 (a) $[4, 6] \cup [8, 10]$ (b) **$[4, 6] \cap [5, 6]$** (c) $[4, 6] \cap [8, 10]$ (d) $[4, 6) \cup [7, 8]$.
46. A subspace of a connected set is _____.
 (a) Connected (b) **Need not be connected** (c) Continuous (d) Infinite set.

UNIT- V

47. Any compact subset of a metric space is _____.
 (a) open and bounded (b) open and unbounded
 (c) **closed and bounded** (d) closed and unbounded.
48. _____ of a compact metric space is compact.
 (a) **closed subspace** (b) open subspace (c) bounded subspace (d) unbounded subspace.
49. _____ is a compact subset of \mathbb{R} .
 (a) (a, b) (b) $(a, b]$ (c) **$[a, b]$** (d) $[a, b)$.

50. Any compact metric space is _____.
 (a) closed (b) **totally bounded** (c) open (d) unbounded.
51. Non empty subset of totally bounded set is _____.
 (a) unbounded (b) **bounded** (c) closed (d) connected.
52. If every sequence in metric space M has a convergent sub-sequence then M is called _____.
 (a) compact (b) **sequentially compact** (c) connected (d) complete.
53. Any totally bounded metric space is _____.
 (a) compact (b) dense in \mathbb{R} (c) dense in M (d) **separable**.
54. Any continuous mapping f defined on a compact metric space (M_1, d_1) into any other metric space (M_2, d_2) is _____ on M_1 .
 (a) **uniformly continuous** (b) sequentially compact (c) a homeomorphism (d) closed map.
55. _____ states “Any closed interval $[a, b]$ is a compact subset of \mathbb{R} ”.
 (a) **Heine – Borel theorem** (b) Bolzano- weierstrass theorem
 (c) Rolle’s theorem (d) Intermediate value theorem
56. Any connected subset of a discrete metric space M is _____.
 (a) finite set (b) infinite set (c) **singleton set** (d) M .
57. Which of the following is true ?
 (a) \mathbb{R} with usual metric is compact (b) $(0,1)$ with usual metric is compact
 (c) $[0,1]$ is not compact (d) **$[0,1]$ is compact.**

Section B

UNIT- I

1. In a metric space prove that $|d(x, z) - d(y, z)| \leq d(x, y) \forall x, y, z \in M$.
2. In \mathbb{R} with usual metric find $B(\frac{1}{2}, 1)$.
3. Define discrete metric on a metric space M , and show that it is a metric on M .
4. Define Metric space.

5. Define usual metric on \mathbb{R} , and show that it is a metric on \mathbb{R} .
6. Determine $d(x, y) = (x - y)^2$ is a metric or not.
7. If d is a metric on M , is d^2 a metric on M ?
8. Prove that $B(a, r)$ is a bounded set in \mathbb{R} with usual metric.
9. Is Q open? Give your claim.
10. Let (M, d) be a metric space. Let $x \in M$. Show that $\{x\}^c$ is open.

UNIT- II

11. Is union of an infinite collection of closed sets closed? Justify your answer.
12. Define complete metric space. Give example.
13. Prove that any subset of a discrete metric space has no limit point.
14. Is \mathbb{Z} closed? Give reason.
15. Show that in \mathbb{R} with usual metric every singleton set is closed.
16. Show that any nonempty open interval (a, b) in \mathbb{R} is of first or second category.
17. Prove that any discrete metric space is complete.
18. Give example of a set E such that both E and E^c are dense in \mathbb{R} .
19. Show that any uncountable discrete metric space is not separable.

UNIT- III

20. Prove that any discrete metric space is complete.
21. Is subspace of a complete metric space a complete metric space. Explain with an example.
22. If A and B are closed subset of \mathbb{R} prove that $A \times B$ is a closed subset in $\mathbb{R} \times \mathbb{R}$.
23. In \mathbb{R} with usual metric prove that $A = \{1, \frac{1}{2}, \frac{1}{3}, \dots, \frac{1}{n}, \dots\}$ is nowhere dense.
24. In \mathbb{R} with usual metric prove that any finite subset A is nowhere dense.
25. In \mathbb{R} with usual metric prove that any $\{x\}$ is nowhere dense.
26. Prove that any nonempty open interval (a, b) in \mathbb{R} is of second category.

UNIT- IV

27. Define connected metric space.
28. Prove that any discrete metric space M with more than one point is disconnected.
29. Is subspace of a connected metric space always connected? Explain with an example.
30. Prove that if f is a non-constant real valued continuous function on \mathbb{R} then the range of f is

uncountable.

31. Prove or disprove if A and C are connected subsets of a metric space M and if $A \subseteq B \subseteq C$, then B is connected.
32. Let (M, d) be a metric space. Then show that the following are equivalent:
- (i) M is connected
 - (ii) M cannot be written as the union of two disjoint non-empty closed sets.

UNIT- V

33. Is $[0, \infty)$ with usual metric compact? Give your claim.
34. Let A be a subset of a metric space M . If A is totally bounded then Prove that A is bounded.
35. Define compact metric space. Give example.
36. Show that any infinite set with discrete metric is not compact.
37. Prove that any compact metric space is totally bounded.
38. Give an example of a closed and bounded subset of l_2 which is not compact.
39. Prove that any continuous function $f: [a, b] \rightarrow \mathbb{R}$ is not onto.
40. Let f be a continuous bijective function from a compact metric space M_1 to any metric space M_2 . Prove that f^{-1} is continuous on M_2 .
41. Let A be a totally bounded subset of \mathbb{R} . Prove that \bar{A} is compact.

Section C

UNIT- I

1. Let (M, d) be a metric space. Define $d_1(x, y) = \min\{1, d(x, y)\}$. Prove that d_1 is a metric on M .
2. Let A be a non-empty subset of a metric space M . Prove that A is open iff A can be expressed as the union of family of open balls.
3. Let x and y be two distinct points of a metric space (M, d) . Prove that there exist two disjoint open balls with centres x and y respectively.
4. Consider \mathbb{R} with discrete metric. If $A = [0, 1]$ find $\text{Int}A$.
5. Find $B(a, r)$ in a discrete metric space.
6. Let M be the set of all bounded real valued functions defined on a non-empty set E , then prove that $d(f, g) = \sup \{|f(x) - g(x)| / x \in E\}$ is a metric on M .

7. Let (M, d) be a metric space. Prove that $d_1(x, y) = \frac{d(x, y)}{1+d(x, y)}$ is a metric on M .

8. Prove that the complement of any finite subset of a metric space is open.

UNIT- II

9. Prove that in any metric space every closed ball is a closed set.

10. Prove that in any metric space arbitrary intersection of closed sets is closed.

11. Prove that in any metric space the union of finite number of closed sets is closed.

12. Let M be a metric space and M_1 be a subspace of M . Let $F_1 \subseteq M_1$. Then prove that F_1 is closed in M_1 iff there exists a set F which is closed in M such that $F_1 = F \cap M_1$.

13. Let (M, d) be a metric space. Let $A \subseteq M$. Then prove that x is a limit point of A iff each open ball with centre x contains an infinite number of points of A .

14. Prove that for any subset A of a metric space, $d(A) = d(\bar{A})$ where $d(A)$ is the diameter of A .

15. Prove that a subset A of a complete metric space M is complete iff A is closed.

UNIT- III

16. Prove that the limit of a convergent sequence (x_n) is unique.

17. Prove that any convergent sequence in a metric space M is a Cauchy sequence. Is the converse of this statement true.

18. Let A, B be subsets of \mathbb{R} . Prove that $\overline{A \times B} = \bar{A} \times \bar{B}$.

19. Prove that \mathbb{C} with usual metric is complete.

20. Prove that a subset A of a complete metric space M is complete iff A is closed.

21. Prove that \mathbb{R} is of second category.

22. Prove that a closed set A in a metric space M is nowhere dense iff A^c is everywhere dense.

UNIT- IV

23. Let M be a metric space. Let A be a connected subset of M . If B is a subset of M such that $A \subseteq B \subseteq \bar{A}$, then prove that B is connected.

24. State and prove intermediate value theorem.

25. If A and B are connected subsets of a metric space M and if $A \cap B \neq \emptyset$, prove that $A \cup B$ is connected.

26. Prove that M is connected iff every continuous function $f : M \rightarrow \{0, 1\}$ is not onto.

27. Prove that a metric space M is connected iff there does not exist a continuous function f from M onto the discrete metric space.

28. Prove that the continuous image of a connected set is connected.

UNIT- V

29. Is \mathbb{R} with usual metric compact? Explain.

30. Prove that any compact subset A of a metric space (M, d) is closed.

31. Prove that any compact subset A of a metric space (M, d) is bounded.

32. Prove that a closed subspace of a compact metric space is compact.

33. Prove that A metric space M is compact iff any family of closed sets with finite intersection property has non-empty intersection.

34. Define a totally bounded metric space. Prove that a compact metric space is totally bounded.

35. Prove that any continuous real valued function f defined on a compact metric space is bounded and attains its bounds.

36. Prove that the closure of a totally bounded set is totally bounded.

37. Prove that any continuous mapping f defined on a compact metric space (M_1, d_1) into any other metric space (M_2, d_2) is uniformly continuous on M_1 .

Section D

UNIT- I

1. Define l_p . Prove that l_p is a metric space.

2. Prove that in a metric space the intersection of finite number of open sets is open.

3. Prove that $\text{Int } A$ is the largest open set contained in A .

4. Let (M, d) be a metric space. Let A be any non-empty subset of M . Then prove that A is Open iff A can be expressed as the union of a family of open balls.

5. Let M be a metric space and M_1 a subspace of M . Let $A_1 \subseteq M_1$. Then prove that A_1 is open in M iff there exists an open set A in M such that $A_1 = A \cap M_1$.

6. Define usual metric in \mathbb{R}^n . Prove \mathbb{R}^n is a metric space.

UNIT- II

7. Prove that A is closed iff A contains all its limit points.

8. Let M be a metric space and $A \subseteq M$, then prove that $\bar{A} = A \cup D(A)$.
9. Let M be a metric space and $A \subseteq M$. Then prove that the following are equivalent
- (i) A is dense in M .
 - (ii) The only closed set which contains A is M
 - (iii) The only open set disjoint from A is \emptyset .
 - (iv) A intersects every non empty open set.
 - (v) A intersects every open ball

UNIT-III

10. Let M be a metric space and $A \subseteq M$. Then prove the following:
- (i) $x \in \bar{A}$ iff there exists a sequence (x_n) in A such that $(x_n) \rightarrow x$.
 - (ii) x is a limit point of A iff there exists a sequence (x_n) of distinct points in A such that $(x_n) \rightarrow x$.
11. Prove that l_2 is complete.
12. Prove that \mathbb{R}^n with usual metric is a complete metric space.
13. State and prove Baire's category theorem.
14. State and prove Cantor's intersection theorem.
15. Let M be a metric space and $A \subseteq M$, then prove that $x \in \bar{A} \Leftrightarrow B(x, r) \cap A \neq \emptyset$ for all $r > 0$.

UNIT- IV

16. Prove that a subspace of \mathbb{R} is connected iff it is an interval.
17. Let (M, d) be a metric space. Then prove that the following are equivalent:
- (i) M is connected
 - (ii) M cannot be written as the union of two disjoint non-empty closed sets.
 - (iii) M cannot be written as the union of two non-empty sets A and B such that $A \cap \bar{B} = \bar{A} \cap B = \emptyset$.
 - (iv) M and \emptyset are the only sets which are both open and closed.
18. (i) Let $f : M_1 \rightarrow M_2$ be a continuous function. Prove that $f(M_1)$ is a connected subset of M_2 .
- (ii) State and prove the Intermediate value theorem.

UNIT- V

19. State and prove Heine Borel theorem.
20. Let (M,d) be a metric space .Then prove that the following are equivalent:
- (i) M is compact
 - (ii) Any infinite subset of M has a limit point.
 - (iii) M is sequentially compact
 - (iv) M is totally bounded and complete.
21. Prove that any compact subset A of a metric space (M,d) is bounded and closed
22. Prove that a metric space (M, d) is totally bounded iff every sequence in M has a Cauchy subsequence.
- 24.(i) Prove that Continuous image of a Compact metric space is Compact.
- (ii) Prove that the range of a continuous real valued function f on a compact connected metric space M must be either a single point or a closed and bounded interval.

(Multiple Choice questions)

Unit – I

1. Two forces are like when they act in the _____ direction.
a) **Same** b) Opposite c) Both a and b d) None
2. Two forces are unlike when they act in the _____ direction.
a) Same b) **Opposite** c) Both a and b d) None
3. The construction for finding the resultant of two unlike parallel forces P and Q will fail if ____
a) $P > Q$ b) $P < Q$ c) **$P = Q$** d) None
4. The effect of two equal and unlike parallel forces cannot be replaced by a _____
a) **Single force** b) Opposite force c) Negative force d) Positive force
5. The algebraic sum of the moments of any number of forces about any point in their plane is ____
a) positive b) negative c) **zero** d) same`
6. If the algebraic sum of the moments of coplanar forces about any point on _____ of their resultant is zero.
a) **the line of action** b) perpendicular distance
