### **MARIAN DIGITAL FLORA – ANGIOSPERM DATABASE**

A database on "Marian Digital Flora" has been created by the Department of Botany in order to document the existing flora in and around St. Mary's College Campus, located in Thoothukudi District, Tamil Nadu, India. A digital documentation of the rich biodiversity in and around the premises of St. Mary's College in the form of a digital flora has been long overdue. Therefore, Marian Digital Flora aims to bring all native and naturalized plant species available that act as an e-catalogue of angiospermic plants. Marian Digital Flora includes the systematic position, common name, vernacular name, description and photographs of the plants that would assist in better identification of plants. A digital documentation of the prevailing plants with their description would not only support in learning and identifying plants but would also help in creating awareness within the generation.

### **TREASURES IN HARE ISLAND – SEAWEED DATABASE**

Department of Botany created a database on "Treasures in Hare Island". Hare Island, a part of Gulf of Mannar, National Marine Reserve Park is a rich repository of diversified marine flora and fauna. It is situated 20km away from the Thoothukudi city. Hare island is locally known as Muyal Theevu, is a healthy ecosystem of coral reefs, sea weeds and sea grasses. This database is exclusively algal database of seaweeds which are present in Hare Island. It mainly comprises Chlorophyta, Phaeophyta and Rhodophyta. It provides information to search algae based on its species name and class. It contains images and description of the algae. It can be used as a tool for identification for young budding researchers and students.

### **SMC BOTANY E-MUSEUM**

Plants and plant organs were the first exhibits in the Botany Museum. These specimens have been preserved and are on display in the Room. Marian Star Centre intends to turn this museum into an E-Museum as a result of digitalization. The E-Museum is a comprehensive online resource for non-flowering and flowering plants. This will be an electronic museum with detailed information on each specimen. The E-Museum incorporates the entire collection of all species in a seamless manner. This platform will offer a variety of services.

### **SMC BOTANY E-HERBARIUM**

The online database is based on information from the herbarium, a selection of dried, pressed plant specimens, as well as the flora of the St. Mary's college campus. This online database will provide detailed information about each plant species, including its common name, systematic location, and taxonomic description. The online data base is a critical first step in resolving concern of the environment.

### **SMC ZOOLOGY E-MUSEUM**

The Museum of Zoology is one of St. Mary's major attractions. Our brilliant galleries showcase the diversity of animal life, from invertebrates to chordates. The Museum houses an extensive collection of scientifically important zoological material. Our museum harbors animals in fixing fluids, dried or specially prepared animals, stuffed animals, skeletons, hides, and articles made from horns, bones, shells, etc. In zoological museums scientific research is conducted on the taxonomic description of fauna, zoogeography, variations, comparative morphology and anatomy, and evolution, that is, historical development. Collections of molluscs, corals and other sea-dwellers offer insight into the biological diversity of the oceans. The redevelopment aimed to create displays and new interpretation to engage people with the wonders of animal diversity; create new stores to care for the Museum's internationally significant collections to the highest standards and expand the Museum's learning programmes, reaching out to wider audiences and increasing online resources.
